N. Y. Gaz. & Gen. Adv., N. 7, 1808. The cost of the ground and the edifice was between $40,000 and $50,000. By the sale of pews, this amount was raised in a few hours, completely relieving the church of debt—the first instance of the kind in New York.—Ibid.; Miller, Memoir of Rev. John Rodgers, 271, 419; Goodrich, Picture of N. Y., 230. The building was demolished in 1834 (q. c., J3 8). See also L. M. F. K., III, 390.

7 The committee of defence reports that M. Du Buc de Maren- 
taille (see My 20) has offered to allow the city one year within which to vaccinate the efficacy of his plan for securing New York from naval attack, on condition that if the plan is adopted for the city he is to receive $120,000, and if it is adopted for any port other than New York, he shall have $60,000. The common council orders that the report "be considered."—M. C. C. (1784- 
1813), V; 309-10. See My 8, 1809.

8 The common council directs the street commissioner to open Greenwch St. from Carlton to Christopher St., agreeable to the cession made by Trinity Church.—M. C. C. (1784-1813), V; 304-5, 310. See Je 19, 1809.

9 Jacob Wilkins is granted permission to build a pier in the center of his property on the Hudson River at Cortlandt St.—
M. C. C. (1784-1813), V; 508. See also Ibid., V; 332-33, 342. 
Mr 27, 1809.

10 An L has been made at the end of the Jay St. pier.—M. C. C. (1784-1813), V; 313.

James Madison and George Clinton, candidates of the Demo- 
crats, are elected president and vice-president, defeating Cha. C. Pinckney and Rufus King, Federalists.—McKean, National Conventions and Platforms, 12-14.

10 Upon reading a petition from Ezra Weeks and others, desirous to establish a fire company in the vicinity of St. John's Church, Trinity vestry orders "that a Corner of the Cemetery [sic] of that Church be appropriated for an Engine House."—Trinity Min.

12 There is a circus at Coles' Hook; here "the wonderful exploits of The Learned Bear" are shown.—Pub. Adv., N 12, 1808.

13 The corporation of the First Presbyterian Church, on Aug. 8 (see JI 26), presented a memorial to the common council setting forth a claim to the whole of Nassau St. between the old city hall and the property of Charles Gardiner in Wall St., occupied by David King, and to part of the ground on which the west end of the city hall stands. The corporation counsel and street commis- 
sioner to whom the memorial was referred now submit a report, following descriptive passages from deeds, on which the memorialists found their claim. The counsel and street commissioner indicate an error in a map by Adolphus Loss, one of the present city surveyors, which the memorialists exhibit; and they present a plan of the ground which they believe correct, as it is drawn from the Lyne Survey of "about 1775," and from the Marshall's Survey of 1755. They also state "that in a map of the City made by Bernard Ratzen in 1767, and dedicated by him to Sir Henry Moore, then Governor of the Colony of New York (and supposed to be the most correct plan ever published), Nassau Street and the City Hall are laid down agreeably to Marshall's Plan, and the ground claimed by the memorialists clearly marked out and dis- 
tinguished from the existing streets." They also show, by a deed conveying one of these lots in 1746, that Nassau St., under the name of Kip St., existed through to Wall St., "as at least back as the year 1718, when the division of those lots took place" (be- 
tween Abraham Depeyster and Samuel Bayard).

In this report, the counsel and street commissioner also review the history of both the city hall on Wall St., and that at Cityt Smart Slip, to ascertain the time when each was founded (for which, see Chronology); and they add: "The site of the Hall [on Wall St.] as originally built evidently comprehended the extent of its present Front in Wall Street, and the addition for the accommoda-

Nov. tion of Congress in 1789, was made in the rear, as is plainly visible and easily distinguished from the east and west walls of the old work." The report is referred to a committee.—M. C. C. (1784-1813), V; 324, 325-31; see further, Ibid.; V; 369-70.

The original report (M. C. C. (1784-1813), V; 358) with the map attached, showing city hall site and surrounding ground to the north and west, is preserved in metal file No. 38, city clerk's record-room (wrapped with the committee's report of Je 5, 1809, at which time the subject came before the common council and was laid over).

The business of "making turf at the Collect" (for fuel), by order of the common council, is completed. Payments on this account amount to $531-97.—M. C. C. (1784-1813), V; 238, 242, 247, 275, 316, 334. It was begun in July.—See Je 27.

The street commissioner reports that the "Contractors for sinking the Block and Bridge at the foot of Vesey Street [see O 10], have sunk the Blocks and are entitled to the payment of their first installment, amounting to $540." A warrant for the amount is issued.—M. C. C. (1784-1813), V; 371. The second installment was paid on Dec. 12.—Ibid., V; 366. The third was paid on Jan. 16, 1809.—Ibid., V; 399. On March 13, when all the work was "nearly completed," they received $500 more.—Ibid., V; 475.

The common council directs the street commissioner to see that the contractors complete without delay the digging out and opening of Mulberry St. to Grand St. and from Hall to Grand.—M. C. C. (1784-1813), V; 316. Cf. Ja 16, 1809.

The paviours in the almshouse number 841.—M. C. C. (1784-
1813), V; 316. 

The common council appoints a committee "to enquire and report whether it would not be more conducive to the public interest to farm out the Streets and Manure in this city than to continue the present system under a Superintendant."—M. C. C. (1784-1813), V; 358. On Nov. 28, the committee reported that a greater revenue would be obtained by farming out.—Ibid., V; 342-43. See also Ibid., V; 428.

Mayor Clinton presents to the common council a letter from Archibald McIntyre, state comptroller, enclosing the following statement of quit rents due from the city:

12 Years on Charter granted to the City of N York 27. April 1686, at One Beaver Skin (16/P an ) $24.00

12 Years 6. Months on royal Charter granted 15th Jan' 1703 @ 30/. p' an $46.87

12 Years 9. Months on Patent granted to the City of N York for land on Nassau Island 19th April 1708 @ 5/ p' An $70.87

"Commutation, First mentioned grant . $24.00
Second . $45.00
Third . $70.00

The statement is referred to the city comptroller.—M. C. C. (1784-1813), V; 339-40. As the commutation proposed "will (if paid) be a discharge from future demands," Comptroller Bleeker recommended, on Dec. 13, that a warrant be issued for the full amount, which was approved.—Ibid., V; 367. See also Ibid., V; 425-27. The original report of the comptroller is in metal file No. 27, city clerk's record-room.

The street commissioner is directed to take immediate measures for opening Collect St. from Magazine to Anthony St., for con- 

Dec. 

veying the water of Magazine St. through Collect St. to the Collect, and for opening a ditch from Little Water St. "so as to prevent any stagnant water lying in the vicinity."—M. C. C. (1784-1813), V; 342. On Feb. 23, 1809, he reported that he had obtained a deed of session for Brooks St. which thus became a part of Collect St.—Ibid., V; 439. See also Ibid., V; 554.

John Stevens, in a letter addressed "To the Public," criticizes the attempt being made by Livingston and Fulton to secure a monopoly of the navigation by steam of the Delaware (see N 1) in addition to their monopoly of the Hudson. He declares that last winter they told him his plans for steam navigation would interfere with their "claim under a patent from the United States," but that the superintendent of the patent office has informed him that Fulton has no patent. Stevens then continues: "I purpose employing my present boat as early in the spring as the season will admit (probably by the middle of February) as a passage boat between New York and Brunswick, and, if she performs well (of which

1809

2

there cannot be a doubt I shall immediately begin a boat to ply between Trenton and Philadelphia, and also one to ply between Philadelphia and Newcastle. . . . The public will certainly acquit me of the charge of being an interloper, when it can be proved indisputably that I have been 20 years engaged in this pursuit—that 17 years ago I obtained a patent for a steam-boat—that my time and attention has been ever since almost exclusively occupied by this subject—that my present patent for a boiler was obtained four years previous to the state law granting to R. L. and R. F. an exclusive right of navigating its waters by Steam Boats—that for five or six years past I have every season had one or more steam-boats moving on the Hudson river, whereas these gentlemen commenced their operation only last year. All I can say, at present, against the heavy charge of plagiarism is, that the whole of the machinery of my steam engine is totally different from theirs, and is manifestly a great improvement, being much more simple; comprized in much less than half the space, and not more than half the weight, although its power will probably be more than double that of their engines. . . .—Am. Crit., D. 3, 1808. For other remarks on the controversy between Stevens and Fulton & Livingston, see ibid., D. 7, 13, and 15, 1808.

5

Having met on Dec. 2 and 3 to consider a contested election in the Sixth Ward, the common council, by a vote of 11 to 6, decides that the canvass of the votes is illegal and void, because the inspectors canvassed the greater part of them separately "and not jointly as by law required," they permitted the interference of persons not inspectors and "the Estimation of Votes, was in point of fact, incorrect." A new election is ordered. Thus, Addis Emmet was counsel for the plaintiffs and Tunis Wortman for the defendants.—M. C. C. (1784-1811.), V. 342, 345-57, 361.

12

As "the pressure of the times, added to the approaching inclination of the season, occasions such numerous applications for relief as to put it out of the power of the almshouse Commissioners to afford the supplies required," the commissioners suggest to the common council "the propriety of opening a house to issue donations." The matter is referred to a committee.—M. C. C. (1784-1811.), V. 364.

A memorial from E. Ny de Neville "on the subject of a contemplated establishment as an Asylum for aged and infirm French Emigrants in this city" is referred to the commissioners of the almshouse.—M. C. C. (1784-1811.), V. 364.

John Jay and "numerous other proprietors of lots fronting upon Canal Street and in the vicinity thereof," present a memorial to the common council "setting forth that there are upwards of three thousand lots fronting upon said Street and in the vicinity thereof which cannot now be improved or used owing to the present state of the elections of a Common Council," ask that the commissioners have water in them, some of which have been filled with earth, and that some of the cellars of houses in Canal Street are also rendered useless in consequence of being overflowed with water. That the various plans for regulating Canal Street have proved very prejudicial to the petitioners: and that any one plan however imperfect would prove less prejudicial than the frequent fluctuations that have hitherto taken place in relation to this and the adjacent Streets." The petitioners ask that the common council apply to the legislature "to appoint Commissioners to lay out, regulate and open Canal Street and that the plan and regulation of such Commissioners may be declared conclusive and permanent." The memorial, "together with an application of Thomas Diggan that the remainder of Canal Street may be opened," is referred to the common council.—M. C. C. (1784-1811.), V. 364.

The expenses in 1808 for filling up the Collect Pond amounted to $6,814.04.—M. C. C. (1784-1811.), V. 24, 48, 58, 66, 75, 86, 94, 114, 120, 141, 155, 161, 186, 371.

19

Trinity Church having offered to cede to the city a street 50 feet in width called Clark St., in preference to a continuation of Dominick St. through the land of Anthony Bowhowson, the common council "take under consideration and orders that the resolution of May 23 (p. 9) for the opening of the other street be rescinded.—M. C. C. (1784-1811.), V. 356-37, 376.

The common council directs the street commissioner to "take immediate steps to obtain a cession of all the Streets in the Village of Greenwich of the persons whose right it is to grant the same, Provided such persons accept the cession and orders that the resolution of May 23 (p. 9) for the opening of the other street be rescinded.—M. C. C. (1784-1811.), V. 356.

21

Grace Church (see Mr 18, 1806), at the south-west corner of Broadway and Rector St., is consecrated.—Daily Adv., D. 24, 1808. For a contemporary description and view of the edifice, see Dir., Hist. of Trinity Parish, II. 323; Churchman's Mag., Jan., and Feb., 1809. See also Pls. 81-b and 101-a, Vol. III, and L. M. R. K., III. 933.

The commissioners of fortifications, Col. Williams, and other officials lay the foundation-stone of "a formidable work on the Beach near Signal Hill, at South Amboy," weighing about thirty heavy cannon." A salute of 17 guns is fired, and the work is named Fort Richmond "in compliment to the county in which it is situated."—N. Y. Gaz. & Gen. Adv., D. 31, 1809; Pub. Adv., D. 31, 1809.

There were 2,014 deaths in New York in this year.—M. C. C. (1784-1811.), V. 408-902.

The annual revenue of the city in 1808 amounted to $7,830,652.—M. C. C. (1784-1811.), V. 405-7.

1809

During 1808-1812, while there was great dissatisfaction in the north because of the embargo and non-intercourse acts, the British government, acting through Lord Liverpool and Sir James H. Craig, attempted to lure New England from its fealty to the U. A.

A New England combination was first suggested by Harrison Gray Otis in 1808.—Wissor, VII: 320-21, and authorities there cited.

St. Paul's Chapel as it appeared at about this time, with its immediate surroundings, is shown in Vol. III, A. Pl. 12-a.

For view of buildings in the Park in 1809, showing the city hall, bridewell, engine-house, and school, see Man. Com. Com. (1860), 480.

In this year, a public house stood on the corner of Broadway and Grand St., conducted by Abraham Davis. It was afterwards called the Broadway House; and, in 1844, was the headquarters of the Whigs.—See descrip. of Pl. 140, III: 708; also 1850; and Cat. Soc. of Iconophiles (1908), 65, 66.

In this year, Charles Loss surveyed the corporation lots in the vicinity of East Broadway. The original is filed in real estate bureau, comptroller's office, as Map No. 155.

In this year, assessments were made for opening Walker St. from Broadway to Beach St., and filling in lots on Spring St., between Broadway and Greenwich St.—Index to Asses. Rolls, Vol. I.

In this year, the first volume of the Collections of the N. Y. Hist. Soc. was published.

The original reports of the board of health for 1809 are now preserved in metal file 29, city clerk's record-room.

Early in this year, the "chain bridge" over the Schuykill was finished.—Schuy. & Westph. City, 514.

On Feb. 6, 1809, McComb estimated that $68,000 would be needed to carry on the work to Dec. 1 (M. C. C., 1784-1811, V. 414); and on Feb. 20, a committee of the common council was appointed to consider the propriety of applying to the legislature to grant a lottery for the purpose of raising money towards completing the building, and to report the draft of a memorial and bill on the subject.—Ibid., V. 440. On Feb. 27, this memorial was recorded in the minutes, stating the desire to cover and enclose the city hall during the ensuing season, "but owing to the pressure of the times and the embarrassed state of their finances, as well as from the great expense of the said building and other causes, they are seriously apprehensive that they will find themselves under the necessity of stopping the progress of the said building, and they therefore asked the authority to raise $100,000 by lotteries.—Ibid., V. 445-46. The memorial was read in the assembly on March 10 and referred to a committee. On March 20, the committee reported favorably and a bill for the purpose was introduced. This was committed to the whole house on March 21, after which there is no further reference to it in the minutes of the session.—Assembly Jour., 312 sess., 289, 312, 355-432. See also De Witt Clinton's letter reproduced in M. C. C. (1784-1811), V. opp. p. 444.

On Aug. 28, John H. Sickle, treas. of the com., reported that the contract of Johnson & Stevens for the delivery of marble was fulfilled.—Ibid., V. 649. On Dec. 4, McComb reported: "The walls of the wings have been ready these three months to receive the Roof, nearly all the stairs of the principal storeys are laid and the remainder complete to lay—the Stone Cutters will be able to finish the cornice and to prepare part of the stone for
the Attic Story this winter, the Stone for the inside over the — grand Stairs and for the Balustrade may be got ready in the course of the Season and laid so that we may indulge the pleasing idea of seeing nearly the whole of the outside work Completed the next season. — " Ibid., V.: 796–97. By Dec. 9, the committee reported that $20,000 would be required to complete the roof and cover it with copper. — M. C. C. (1784–1831), V.: 792.

Jan.

The Lancaster or monitorial system of education is intro-
duced in the school of the Collegiate Reformed Dutch Church (see M. C. C. (1784–1831), V.: 792. By Dec. 9, the committee reported that $20,000 would be required to complete the roof and cover it with copper. — M. C. C. (1784–1831), V.: 792.

The election inspectors having petitioned for compensation, the common council resolves that "the honour of the appointment was a full equivalent for the time occupied, and that every good citizen ought, when required, to execute so important and respectable a trust, cheerfully and gratuitously." — M. C. C. (1784–1831), V.: 336, 365, 395.

The common council resolves that the footwalks in Greenwich St. south of Beaver Lane be paved. — M. C. C. (1784–1831), V.: 382, 391.

Pres. Jefferson, in a message to the house of representatives, says: "Fort-Jay, on Governor's Island, with the whole of its buildings, was demolished in 1806, except the walled counters-carp, the gate, tallie-ports, magazine and two barracks; all the rest was removed as rubbish, to give place for a work composed of durable materials. On the site of the old fort; a new one, (Fort Columbus) has been erected, of the same shape on three of its sides as the former, with the addition of fourteen feet on each side; on the north side a ravelin has been added, with two retired casemated flanks; the new fort, with two new brick barracks, is now nearly Completed, and has fifty cannon mounted.

"On the point of rocks, at the western extremity of Governor's Island, a circular Castle, of durable mason work, to be connected with Fort Columbus, by a zig zag covered defile, has been commencing and completed to the second floor, and is now ready to receive its first tier of guns, which are mounted and ready to be placed.

"On Bedell's Island, a mortar battery, commanding all the anchoring ground between Red Hook and the quarantine, and affording a protection to Ellis's Island, has been commenced, and the front wall carried up to the intended height. . . .

"On Ellis, or Oyster Island, advantageously situated for defending the entrance of the North River, an open barbette battery for heavy ordnance, on one platform, had been ordered to be erected, and is now nearly completed. The platform is ready for the carriage, and the carriages mostly finished: the barracks within the old fort on this island, have, by some alterations, been made habitable. In addition to the works already described, a battery in North River, two hundred feet without the permanent line of the city, off Hubert-street, has been commenced. The foundation is of stone, and has been carried up to high water mark, in which situation it will remain till spring—this battery is connected with Hubert-street, by a bridge 200 feet long and 50 wide.

"Preparations have also been made for erecting a heavy battery, on a stone foundation, with a superstructure of solid mason work, at the south west point of the city. The point selected has a complete command, from the whole range of North River on one side, to the complete width of East River on the other. . . . [See also O. 9, 1806.]

"Connected with the plan of defence for the harbor and city of New York, the United States have purchased a house and yard in the rear of the Custom House for the deposit and safe keeping of heavy artillery, on travelling carriages, and all kinds of military stores, except powder. Since the purchase a brick wall of nine feet in height has been erected round the yard.

States have also obtained, at about two miles distance from the city, a site, containing nearly two acres, which has been enclosed with a wall nine feet high, and on which have been erected an arsenal, laboratory and large powder magazine, from which the smaller deposits in the batteries can be supplied with ammunition.

"At Sag Harbour, on Long Island, a small battery with a magazine and barracks, has been ordered to be erected . . . but from the want of a sufficient number of engineers to superintend the numerous works contemplated for the defence of our ports and harbours, nothing more has been done than to survey this harbor, and select a proper site for the battery." — N. T. Assemb. Jour., 32nd sess., 44–45.

Congress passes an act "to enforce and make more effectual" the embargo act (see D. 22, 1807). This is called "the Enforcing Act." — Laws of U. S., 16th cong., chap. 72; Annals of N. Am., 506. See Ja 11.

A news item reads: "The New Embargo [see Ja 8]—although this oppressive and odious law has not yet reached us, yet it is understood that Orders grounded upon it have been received at the Custom house, and that measures pursuant to those orders have this morning commenced their operation. Several seizures of boats with produce which were crossing the North River, have been made. The Ferry Boats have been prohibited from taking sailors, or any kind of provisions, even a piece of beef, over to the City of Jersey—and several boats with armed men are stationed in the North River to intercept the communication between the two shores.—Nor is this all. It is also stated that the keys of a suspended store, the present seat of the Governor of our city, have already been demanded. Such, we are informed, are the iron-handed measures already pursued under the 'new order of things.'" — N. T. Com. Adv., Ja 11, 1809.

There are 1,050 paupers in the almshouse. — M. C. C. (1784–1831), V.: 396.

The "Amateur Theatre" is to be opened this evening at the Lyceum, corner of Broadway and Warren St. (see M. C. C. (1784–1831), V.: 396. See also Pub. Adv., Ja 26, 1809. On March 25, the "Theatre of Arts" was here.—N. T. Com. Adv., Mr. 25, 1809. See S. 19.

A petition of Stuart Ludlam "to be appointed to regulate and affix numbers on tin plates to the several houses throughout this city, at the rate of nine pence each house," is referred to the committee of repairs.—M. C. C. (1784–1831), V.: 399–400.

The committee of defence is directed to prepare memorials to congress and the state legislature "representing the insufficient state of the Defence of this City and harbour, and requesting further appropriations towards this object." — M. C. C. (1784–1831), V.: 400–7.

The common council adopts a memorial to the legislature asking permission to raise $150,000 by tax to defray the expenses of the city and county for the ensuing year.—M. C. C. (1784–1831), V.: 399–400.

The committee of defence is directed to prepare memorials to congress and the state legislature "representing the insufficient state of the Defence of his City and harbour, and requesting further appropriations towards this object." — M. C. C. (1784–1831), V.: 400–7.

The common council adopts a memorial to the legislature asking that commissioners be appointed for laying out and regulating Canal St. (see D. 12, 1808), and that the act of April 3, 1807 (q. v.) regarding streets and roads, and the act of April 6, 1807 (q. v.) regarding buildings, wharves, and slips be amended. Drafts of the desired laws are also approved and ordered to be forwarded to Mayor Clinton, now at Albany.—M. C. C. (1784–1831), V.: 402–3. The law relating to Canal St. was passed on March 24 (q. v.).

The city lawyer is ordered to present to the board a map of all the corporation grounds at the Collect.—M. C. C. (1784–1831), V.: 411. On Aug. 14, the finance committee was directed by the board to report a plan to sell the corporation's lots adjacent to the Collect. — Ibid., V.: 671.

The common council approves the draft of a bill to be presented to the legislature "authorising the employment of certain convicts in this city and county." — M. C. C. (1784–1831), V.: 404. The law was passed by the state on Feb.—Ibid., V.: 405–6.

The citizens of the Third and Eighth Wards present memorials to congress complaining about the "Enforcing Act." — Annals of Cong., 10th cong., 2nd sess., 1375. The petition from the Third Ward declares that the parties have been disappointed in the above specified counts, and adds: "The city of New York receives its supplies of provisions and necessaries by boats and water craft. By this act, those vessels must have a general or special permission, which the col-
lectors may refuse, for certain reasons, and the President may direct them to refuse without any reason whatever. We presume New York is the only city on earth, where, according to a public and formal law, the people may be starved at the mere will of a single individual.

As soon as from the seat of the General Government, we well know that Congress and the Executive have been assailed and deceived by interested individuals and intriguers for office. Such persons are seeking a momentary profit in measures which may ruin their country. . . . It cannot long be concealed, that, in this and the neighboring States, the act has excited a spirit which is rapidly uniting all real friends of the country in a common sentiment of disapprobation. . . . We solemnly warn our Government of the dangers which may ensue from an attempt to array its powers against the rights of the citizens or to enforce an act which can never be executed against the will of a free people.

An immediate repeal is requested.—Ibid, 10th cong, 2nd sess., 1777-80.

Capt. Whately, commandant at Fort Columbus, having reported to the common council "that the convicts sentenced to hard labour on the Fortifications were destitute of shoes and pantaloons and consequently incapable, at this inclement season, of performing any service on the public works, and requesting that said Articles may be immediately supplied," the board directs the almshouse commissioners to comply with the requisition.—M. C. C. (1784-1813), V: 413-14.

There are in the city 15 fire-engine companies, one floating-engine company, and two hook-and-ladder companies. The men in the fire department, including engineers, fire wardens, fire-engine men, and hook-and-ladder men, number 927, so increase of 76 during the year.—M. C. C. (1784-1813), V: 421-22.

The New York Historical Society is incorporated.—Laws of N. Y. (1808), chap. 26. The act of incorporation was renewed on Feb. 10, 1826.—Ibid. (1826), chap. 41. The society had been organized in 1804 (q. v., N. 19).

Robert Fulton receives a patent from the U. S. government for his discoveries and inventions in connection with steamboats. Fulton's specification and drawings of various parts of the machinery were published in Dickinson, Robert Fulton, Engineer and Artist, 289-312.

The proprietors of Hamilton Square petition the common council "that the ground reserved at that place, may be appropriated for the purpose of erecting an Episcopal Church." This is referred to the comptroller and the street commissioner.—M. C. C. (1784-1813), V: 425. See 116-6.

A large number of citizens having petitioned the common council to raise a special tax for the purpose of relieving "the poor and labouring classes of the community," and to appoint a number of citizens to distribute the money, the board resolves that it is inexpedient to take such measures, as "the public distress at the present moment is greatly mitigated by the formation of a number of hospitals and almshouses," and that appointment of impartial citizens "is superseded by the praiseworthy attention of the Commissioners of the Alms House, whose exertions at this period merit the highest thanks of this Board, and of the Citizens at large."—M. C. C. (1784-1813), V: 411-14, 429-30.

The common council receives a presentation from "the grand inquest of the city and county" complaining that "the great number of Pawno brokers and the unrestrained manner in which they conduct themselves, have become a source of serious and alarming mischief." The insurance of lottery tickets is also considered "a source of great and incalculable depravity . . . inasmuch as it introduces a system of the most pernicious and extensive gambling." The presentation is ordered to be published.—M. C. C. (1784-1813), V: 427.

The common council accepts an invitation from Thos. Pole to "view a model of his patent Bridge."—M. C. C. (1784-1813), V: 425. See also Jc 26.

John Hardcastle begins to issue an anti-Jeffersonian weekly called Spirit of '76. The only issue located is that of March 28, 1809.—Brigham, A. A. S. Proc. (1917), 498.

"The city council passes an act authorizing the First Presbyterian Church in New York City to separate into "two or more distinct and separate corporations," and to divide its property among the corporations thus formed.—Laws of N. Y. (1809), chap. 39. This resulted in the separation, on April 12, of the Wall St. and Brick churches.—22nd Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1917), Feb. 17.

The annual report of the governors of the New York Hospital estimates the cost of the asylum for lunatics (see F. 3, 1807) at $56,300. The building is thus described: "It is ninety feet long, sixty-five feet wide at the windows, and forty feet wide . . . there are four stories, including the basement and sub-basement . . . There are sixty-one cells and apartments, of different dimensions, in which about seventy patients may be accommodated according to their various conditions and circumstances in life. The asylum was opened for the reception of patients on the fifteenth of July (1809), "Senate Jour., Am. S. Proc., 1st sess., 1st part, Pl. 88, III: 571. The appropriation made in the act of March 23, 1810 (p. 6), was probably intended to help defray the expense of this building. Another addition to the hospital was made much later (see F. 2, 1841).

A weekly paper of octavo size, printed on Sunday and called The Observer, is begun. The first few issues were without imprint, but with the issue of March 19, 1809, the name of William Elliot appeared as editor. The paper was suspended with the issue of Aug. 6, 1809 (p. v.).—Brigham, A. A. S. Proc. (1917), 472. Cf. Early Newspapers, II: 426.

The governor, with the advice of the council, having appointed De Witt Clinton as mayor, his commission is read and published with the usual formalities.—M. C. C. (1784-1813), V: 435.

In a report of munitions kept in different parts of the state, John MeLean, commissary of military stores says in part: "The magazine [see N 4, 1808] is completed, with the exception of copper locks and hinges for the inner doors, and the same is enclosed in a wall of masonry ten feet in height. A dwelling house for the keeper, a well of excellent water, and a convenient stone and gravel road from the public street to the magazine, are also finished."—Assemb. Jour., 32d sess., 2221; L. M. R. K., III: 923.

The common council directs Mayor Clinton to present to the state "the Brass Standard Yard Measure belonging to this Board," in order that it may be made the legal state standard.—M. C. C. (1784-1813), V: 435-36. The measure, together with a complete set of weights, was imported from England in 1805.—Ibid., V: 445-51.

John Howard Payne (later the author of "Home Sweet Home")—see My 8, 1821, at the age of 16, makes his first appearance as an actor in New York, at the Park Theatre. He plays Young Norval in Douglas.—Kobbe, Famous Am. Songs, 11-12; Hanson, Early Life of John Howard Payne, 121.

Ald. Mesier presents to the common council a letter from Robert Fulton to John R. Livingston proposing "as a means of defence for this harbour, that this Corporation should provide 20 Torpedoes, for the purpose of blowing up Ships of War, together with 2 Boats and crews for exercising them." The expense is estimated at $2,600. Each boat is to have "6 oars, 1 Harpoonman, 1 Cabinman," 6 men to each boat, total 16 men, who shall be active intelligent young men, all of whom would be taught the harpoon and use of the torpedoes, and in case of service, could command a boat and direct her attack." The communication is referred to the committee of defence.—M. C. C. (1784-1813), V: 443-44. The original Fulton letter is preserved in metal file No. 38, city clerk's record-room.

The common council resolves "that the Superintendent of repairs under the direction of the Committee of repairs, cause the several Houses in this City to be accurately numbered, and that he be authorized, by and with the consent of said Committee, to employ such Assistance, at the expense of this Board, as may be requisite to discharge said duty."—M. C. C. (1784-1813), V: 452.

The street commissioner is directed to prepare "A Map of all the vacant ground belonging to the Corporation, on Broadway, Elm Street, and the Streets adjacent to the Collect, and on Chatham Street adjoining the Arsenal."—M. C. C. (1784-1813), V: 453.

A memorial of David Hosack "praying the legislature to purchase his botanical garden, near the said city, on the terms therein mentioned," is read in the assembly and referred to the "the committee on agriculture and manufactures."—Assemb. Jour., 32d sess., 236. On March 2, the committee reported "That the memorialist about eight years ago being professor of botany in Columbia college, purchased twenty acres of land, and established a botanical garden, in the vicinity of New-York at his own expense; and with a laudable view of afford-

CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812 1501
1809 ing to the students under his charge an ample opportunity of
improvement by the inspection of various medicinal and other
plants, a knowledge of which is intimately connected with the science
of medicine. He has, at great expense, imported from different parts of the world, a great variety of plants; for the preservation of those coming from a milder climate, he has been under the necessity of erecting, on a large and extensive scale, both green
and hot houses, and to employ several persons of skill in attending to
their cultivation; he has likewise collected a variety of plants from
different parts of the United States, useful in agriculture, as well as medicine, so arranged as to afford an opportunity of
making many useful experiments; the whole is in good order;
the ground well selected and valuable. The Medical Society of
the city and county of New York, the College of Physicians and
Surgeons, the Faculty of Physic in Columbia college, and the
Governors of the New-York Hospital all approve of the establish-
ment, express their opinion of its importance and public utility,
and recommend its purchase by the state, as the only means of
protecting and supporting it, as it is too extensive and expensive
to be supported from the funds of any individual.

The legislature of this state, with a spirit and zeal worthy
an enlightened and patriotic people, have on many occasions
fostered, encouraged and protected the education of our youth;
and certainly no branch of learning is more important, and
more peculiarly entitled to national patronage, than the science of
preserving life and health. Your committee state, with pleasure,
that this is the first establishment of the kind ever attempted in
the United States, but that unless patronized by the government,
its utility to the state will be entirely lost.

Your committee conceive that the terms of sale are liberal,
and that no material loss can be sustained, but that the land
will probably increase in value equal to the interest of the purchase
money: and your committee are therefore of opinion that the
prayer of the memorialist ought to be granted. The report
being approved, a bill was introduced "for promoting medical
science in the state of New-York."—Ibid., 32d sess., 144-45.

The whole number of lamps in the city, public and private, 13
is reported as follows:

Total 1,585

M. C. G. (1784-1813), V: 476. On March 20, the total number was given as 1,670.—Ibid., V: 483. On March 13, also, a
committee reported to the common council that the poor light given
by the public lamps "is owing to the Oil being mired, half summer
and half winter, and the coldness of the night." Jacob Cholwell,
who had charge of the lamps, acknowledged that this was the case
because "he did not use half Winter and half Summer Oil, he
must be ruined, as he cannot light the Lamps at the contract
price without sustaining a great loss."—Ibid., V: 477-72.

The common council orders "that the Stage and post for
whipping Criminals be removed from the Front of the Bridewell
to the Yard thereof remote from Broadway, and that on the days,
and between the hours appointed for whipping, the Yard gate of
the Bridewell be opened for the admission of persons willing to be
presented."—M. C. G. (1784-1813), V: 476-77.

The common council orders the streets known as Duane,
Barley, and Colden Sts. to be called Duane St. from Rose St. to
Hudson River, and that the streets distinguished as Bayard and
Fisher Sts. be called Bayard from Division St. westward.
The superintendent of repairs is directed to number the houses in these
streets.—M. C. G. (1784-1813), V: 479.

It is recommended by the street commissioner, in the common
council, that the bridge over Bestaver’s Killetje at Greenwich St.
being a nuisance should be removed.—M. C. G. (1784-1813), V:
483, 490. The original MS. is in metal file No. 36, city clerk’s
record-room. No immediate action was taken but this small stone
arch seems to have been removed soon afterward. The stream
which the bridge crossed was a branch of the Minetta Water. The
bridge was built sometime early in the nineteenth century and is shown
on one of Bancker’s surveys, entitled "New Course of Greenwich
On this map appears the "continuation of Greenwich Street," and
"Skinner Road" (the later Christopher St.). It was "Surveyed &
Deel. March 24th & 25th [probably 1809]. T. Taylor." T. Taylor also
made, in 1795, a map of Sir Peter Warren’s land. See also L. M. R. K.,
925, and Pl. 17, Vol. III (block 59b, landmark No. 1).

The common council passes "An Ordinance to provide for the
Sweeping and cleaning of the Streets in the City of New York."—
M. C. G. (1784-1813), V: 483-84.

By a vote of 26 to one, the state senate adopts a complimentary
address to the President, for his "voluntary retirement to the
shades of private life," expressing its respect for his "exalted char-
ter," its gratitude for his public services, and its best wishes for
his personal happiness. "Like your great predecessor, the immortal
Washington," the address continues, "you have evinced to the
world, by the whole tenor of your political life, and more especially
by your magnanimous determination to retire from office, after hav- 98

ing faithfully served the republic, that your only ambition was to 1809

promote the principles of our republican institutions. Examples of 27

disinterested and distinguished patriotism are rarely found in the 1810

life of any man. They called the Continent of the American riv- 29

er and character. —Zenith Jour., 32d sess., 186-89. The assembly 29

gathered to the address on the same day by a vote of 33 to 40.— 30

Simeon De Witt, Governor Morris, and John Rutherford are 29

appointed commissioners for laying out Canal St., "which shall run 29

from the place commonly called the Conservatory of Hudson's river, 29

and shall be of such width and so laid out as that the same may con- 30

tain a canal for the reception and discharge of the waste water 30

of the adjacent parts of said city." The powers and duties given 30

to the commissioners are to be discharged within two years.—Laws 30

of N. Y. (1809), chap. 103. All three commissioners resigned, and 30

others had to be appointed (see Je 26, Jl 24, and Ag 14). The work 30

was completed in 1810 (9, 11, J 23). See also descrip. of Pl. 30

83-b, III. 562-63.

The legislature passes a law authorizing the Cedar Street Pres- 18

byterian Church and Grace Church respectively to hold real and 29

personal estate of an annual value or income not exceeding $5,000. 30

—Laws of N. Y. (1809), chap. 97.

27 An act of the legislature authorizes the governor to procure a 29

new seal, to be denominated "the great seal of the state of New 29

York," the description of which, in writing, shall be deposited and 29

recorded in the office of the secretary of state.—Laws of N. Y. 29

(1809), chap. 141. It is reproduced and described by Wilde in The 29

Civil Ancestry of N. Y., City and State, Pl. 24, and p. 62.

29 Jacob Wilkins petitions the common council for permission 29

to build a pier in Hudson river, and to lay the pier into his property 29

on West Street, South of Cortland Slip, for the accommodation of 29

Messrs. Livingston & Fulton's North river Steam Boat." The subject 29

is referred to the comptroller and the street commissioner.—M. C. C. 29

(1784-1811), V: 485. On April 3, they made the following report:

"That the principal inducement for Mr. Wilkins to make this 29

application at this time arises from the solicitation of Messrs. 29

Livingston & Fulton who are desirous of obtaining a more 29

favorable situation for their Steam boat which is to ply from this 29

City to Albany.

"That from the construction of the Steam Boat the undersigned 29

are persuaded she would suffer considerable injury and frequently 29

be rendered unfit for service if she was obliged in common with 29

other Vessels, to be interfered with in coming in or going out 29

and that therefore it is of the utmost importance to the Success 29

of the proprietors of that invention, to prepare a special place for 29

herimonials.

"The undersigned are informed that Mr. Edward Bardin who 29

owns the water right adjoining Mr. Wilkins on the South, has con- 29

sented that the pier petitioned for by Mr. Wilkins shall be erected 29

in such manner, as not to impede the navigation of the pier shall be 29

also declared to be the property of the same, and consequently that 29

the Basin to be formed by these Two Piers, will be of sufficient extent, 29

being about 50 feet, to accommodate other vessels in case the Steam 29

Boat should cease to use it.

"The undersigned further report that they are informed, that 29

by the present practice of the Harbour Master, any Wharf or pier 29

being unoccupied, is liable to be filled by vessels desirous of mooring 29

therein in which case it would be defeating the object of the pro- 29

prietors of the Steam boat, who wish an exclusive right to use the 29

waters between the two aforesaid piers. How far the Board are 29

authorized to grant such privilege, is for themselves to judge; 29

But the undersigned are of opinion that if any arrangement 29

can be made with the Harbour Master to prevent an encroachment 29

of the privilege in this particular case, and the Board should 29

permit Mr. Wilkins and Mr. Bardin to carry out the pier, that it 29

will tend much to the advantage of the Corporation, inasmuch as 29

it will increase the trade near their ferry at Cortland Street, and 29

render a facility of communication from thence to the seat of the 29

government of this State, never before equalled; and thereby also 29

perform a useful service to the commerce of this City.

"The Comptroller and Street Commissioner are therefore of 29

opinion that the Board ought to grant the petition of Mr. Wilkins, 29

upon the condition however that the said pier be carried out 30

feet wide and upon the line as aforesaid, and upon the further 29

condition that Mr. Wilkins forthwith enter into a written agreement 29

with the Street Commissioners and Comptroller for the completion 29

of the previous pier within one Year, as heretofore directed by the 29

Board and which he confesses his willingness to do." The report 29

is confirmed.—Ibid: V: 496-98. The original MS. report is in re- 29

corded No. 36, city clerk's records.

It is resolved by the common council to open Hudson St. from 29

the grounds of John Jacob Astor to Christopher St.—M. C. C. 29

(1784-1811), V: 489, 490. The resolution was repassed on May 29.—Ibid., V: 564.

The legislature passes an act to organize the militia of this 29

state.—Laws of N. Y. (1809), chap. 163.

The state comptroller is appointed to lease the government 29

house for a term not exceeding five years.—Laws of N. Y. (1809), 29

chap. 164 (§ 43).

The city is given letters patent, signed by Gov. Tompkins on 29

Dec. 26, 1809, from the commissioners of the land office of the 29

state, conveying to it the lands covered by water along the easterly 29

shore of the Hudson River within the city, from low-water mark 29

and running 400 ft. into the river from Bowaters Killette or river 29

to the distance of four miles to the north; also the same along 29

the westerly side of East River from the north side of Corlears Hook, 29

to a distance of two miles northward.—M. C. C. (1784-1811), V: 29

491-92.

"The commissioners of the almshouse and bridewell report 29

to the common council that, between Jan. 6 and March 31, they issued 29

76,019 rations and 1,799 lbs. of wood to "the Old Stone poor," 29

expending for these, for the relief of the sick, and for assistants, 29

the sum of $1,273.50. They add: "In submitting this Report, 29

the Commissioners cannot omit the opportunity it affords of calling 29

attention of the Board and their Fellow Citizens to an imposing 29

scene, which, it is believed, will fill the hearts of all with a sentiment 29

of common concern, and which, if not regarded with due respect, 29

will forever remain a reproach to the community."

"The Common Council resolves “that a Public pound be erected 29

in the Town of Harlem,” and appoints George C. Duryee as keeper. 29

—M. C. C. (1784-1811), V: 496.

It is ordered in common council that the street now called 29

Lombard St. be called Lombardy St.—M. C. C. (1784-1811), 29

V: 494. This later became Monroe St.—L. M. R. K., III: 1904.

The common council orders that Little Water St. be named 29

"Anthony St., and regarded as a continuation of said Anthony 29

St.—M. C. C. (1784-1811), V: 494. Later, its name was restored to 29

it, but it was subsequently called Mission Place. See My 16, 29

1855; 1867.

Stephen Judlam and Caspar Krafft are appointed city surveyors.—M. C. C. (1784-1811), V: 507.

Thomas Hodgkinson's patronage outgrows his Shakespeare 50

Tavern, at No. 17 Fair (Fulton) St. (see Ap 5, 1806), and he moves 50

into the larger house at the southwest corner of Fair (Fulton) 50

and Nassau Sts., nearly opposite his old establishment.—Pub. 50

Adv, Ap 6, 1809. Thereafter, the Shakespeare Tavern at this new 50

address was a centre of club and social life for many years, and the 50

scene of many notable events.—See N 24, 1799, L. M. R. K., III: 980; Bayes' Old Taverns of N. Y., 50

428-31; and see, further, Ag 25, 1824, and 1836.

Up to this time, three of the four Presbyterian churches,— 50

the Old First Church on Wall St., the Brick Church on Beekman 50

St., and the Rutgers St. Church, were a collegiate charge, united 50

under one board of trustees and one bench of elders. Each minister 50

was equally connected with all the congregations. The formation 50

of the Cedar St. Church, in 1808 (q. v., N 6), as an independent 50

pastoral charge led to the separation of the three united ones at 50

this time.—Miller, Memoir of Rev. John Rodgers, 272-73. On May 50

2, the trustees ordered that deeds be made out to the separate 50

churches.
The ordered, boards the (1784-1831), shall the declaration of intercourse to the west. The committee presented its report to the common council that ‘he has caused the soundings in Hudson river to be taken opposite Marketfield Street, to determine upon the distance the West line of West Street, called the permanent line, ought to be extended into the river.’ The board passes a resolution providing that it shall run a straight line from a point 70 ft. west of the north-west corner of the brick house of Jacob Wilkins, at the south-west corner of Cortlandt and West Sts., to a point 250 ft. westerly from the south-west corner of the brick store of John Keasney, at the corner of Marketfield and Washington Sts. It is ordered that West St. be surveyed and marked out accordingly; as a greater extension into the river would interfere with the range of the guns of the intended Crown Battery opposite the flagstaff. A bill of the shore, prepared by Mr. Mangin, accompanies the street commissioner’s report on this subject. —M. C. C. (1784-1831) V: 510-11.

The street commissioner proposes a plan of regulating the streets around Hudson Square, including Hudson, Laight, Beach, and Varick Sts., and this is approved by the common council—From the original MS. in metal file No. 36, city clerk’s record-room (1784-1831), V: 511-12.

“A Well Wisher to the Community at large” having written to Mayor Clinton, “representing No. 5 Murray Street, a place of public entertainment, as most infamous conducted and tending, by means of its abandoned allurements, to seduce and ruin the Youth of this city,” the common council orders that the communication be referred to the grand jury.—M. C. C. (1784-1831), V: 515-6.

William Bridges is re-appointed a city surveyor.—M. C. C. (1784-1831), V: 596, 513. See Mr 7, 1808.

The blocks and bridges for the ferry stairs at Vesey St. have been completed.—M. C. C. (1784-1831), V: 512.

A memorial from sundry inhabitants stating that a number of Houses are kept for the purpose of receiving Rope Iron & other articles thereby encouraging children, apprentices, and others to bring stolen property, highly injurious to the Morals of the community, is presented to the common council and ordered “to lie for further consideration.”—M. C. C. (1784-1831), V: 515-16.

The common council passes an ordinance that Bowery Lane be paved from Grand to North St.—M. C. C. (1784-1831), V: 479, 517.

As the British minister has signified that the orders in council will be withdrawn as respects the United States on June 10, Pres. Madison by proclamation announces the cessation after that day of the non-intercourse act with Great Britain and her dependencies (see Mr i)—N. Y. Com. Ado., Ap 22, 1809. See Ap 22 and 24.

This is “a day of rejoicing with the friends of peace and free trade with England throughout our city.” The colors in the harbour are displayed, bells are rung, and salutes are fired by the forts, the frigate “Constitution,” the British packets, etc. “Mutual felicitation were exchanged among our patriotic citizens, and the joys of the heart lighted up a smile on every countenance.” At noon the Federal Republicans met at “the Circus, in Anthony Street,” and adopted resolutions congratulating their fellow citizens on the defeat of the “ ruinous policy of the administration” and ascribing it to the “distinguished exertions of the minority in Congress and to the manly and independent conduct of the people of the Northern and Eastern States.” In the evening the city was illuminated.—N. Y. Com. Ado., Ap 24, 1809; N. Y. Gaz. & Gen. Ado., Ap 24 and 25, 1809; N. Y. Spectator, Ap 24, 1809; Diary of De Witt Clinton (MS.) in N. Y. H. S.; broadside, Emmit Coll., item No. 11336; Columbia Genl. (Boston), Ap 29, 1809.

The common council directs the committee for proposals for lighting the public lamps for one year. The contractor is to keep the lamps clean and in good repair and to see that they are “regularly lighted every night at or before sunset and ... kept clearly burning till sunrise next morning excepting the nights of the full moon, and three night next & immediately preceding from the 15th of November to the 1st April with the addition of one night after the full moon from the first of April to the first of November.” The “Signal Lamps,” also, are to be lighted “every night from Sunset to daylight,” and the contractor is to furnish the lamp oil for the almshouse, bridewell, jail, public watch houses, and the lamps at Brooklyn Ferry. The board also orders that the superintendent of repairs “have without delay all the Public Lamps numbered in progressive order, each ward to be kept distinct,” and that the captains of the watch report any which are not kept burning during the night.—M. C. C. (1784-1831), V: 522-25. On May 8, the contract for the lamp lighting was granted to Isaac Auld, who agreed to do it for $5.20 per lamp.—Ibid., V: 540.

Dr. Nicholas Romaine, president of the College of Physicians and Surgeons, presents the common council “that Doctor Mingo may be present if the present Lecturer might be permitted to read his Lectures in some room in the City Hall until the House of the said College could be prepared for that purpose,” and the request is granted.—M. C. C. (1784-1831), V: 522.

The common council directs that a road, “sufficient for the passage of carriages of burthen,” be opened through the ground between Hamilton Place and Manhattan Ave.—M. C. C. (1784-1831), V: 525-26.

The open space or gore formed by the intersection of George (Market), Cheapside (Hamilton), and Lombard Sts., is reserved forever for a park for the use of the public.—M. C. C. (1784-1831), V: 526-27. See also Ibid., V: 691-692, 592. This became Lombardy Park or New Park.—M. R. K., III: 970. The board’s action was the result of a petition from residents of the neighborhood, “remonstrating against the erection of a Brew House, at the intersection of George & Lombard Streets,” and “praying the interference of the Board to prevent the evil apprehended, by purchasing the said ground for Public use.” Preparations were already under way, by authority of Col. Henry Rutgers, to erect the brewery “in the triangular space formed by the intersection of George, Cheapside, and Lombard Streets.”—M. C. C. (supra).

Following a report of the street commissioner, the common council appoints a committee “to make such regulations as they shall judge proper for the ornament of the [Hudson] square and the convenience of the public.”—M. C. C. (1784-1831), V: 528-29.

The street commissioner presents to the common council a draft of a resolution of the renewal of intercourse with Great Britain (see Ap 19) having been received at New York, the general committee of Federal Republicans holds a meeting and recommends “to all Ship owners and masters of vessels to display their colours on Monday next [April 24, 9 o’clock in honor of the late signal Triumph of Federal Policy. . . .”

“All persons having charge of the bells in the different churches, are requested to cause them to be rung from 12 to 1 o’clock in the same day.

“And it is ordered, that a committee wait upon the Commandant of Artillery, and request that he will cause a federal salute to be fired at sun-rise, noon, and sunset, on the same glorious occasion.”—N. Y. Com. Ado., Ap 22 and 24, 1809.

This is “a day of rejoicing with the friends of peace and free trade with England throughout our city,” The colours in the harbour are displayed, bells are rung, and salutes are fired by the forts, the frigate “Constitution,” the British packets, etc. “Mutual felicitation were exchanged among our patriotic citizens, and the joys of the heart lighted up a smile on every countenance. At noon the Federal Republicans met at “the Circus, in Anthony Street,” and adopted resolutions congratulating their fellow citizens on the defeat of the “ ruinous policy of the administration” and ascribing it to the “distinguished exertions of the minority in Congress and to the manly and independent conduct of the people of the Northern and Eastern States.” In the evening the city was illuminated.—N. Y. Com. Ado., Ap 24, 1809; N. Y. Gaz. & Gen. Ado., Ap 24 and 25, 1809; N. Y. Spectator, Ap 24, 1809; Diary of De Witt Clinton (MS.) in N. Y. H. S.; broadside, Emmit Coll., item No. 11336; Columbia Genl. (Boston), Ap 29, 1809.
The common council agrees that a "Company of Hook & Ladder men," consisting of 10 men, one large and one small ladder, and one large and one small hook, be established in Greenwich Village. -M. C. C. (1784-1831), V: 560. The members of the council were present on May 15.—Ibid., V: 547.

The common council directs the street commissioner to have Cross St. opened between Water St. and Magazine St. —M. C. C. (1784-1831), V: 540.

"A Citizen" writes to one of the papers: "The Manhattan Water Works, which was originally intended as one of the greatest advantages of the city, has now become one of its greatest vexations. It is a general complaint, at the lower part of the town at least, that they can get no water, and indeed not without cause, for, as for myself, I have applied almost daily for four months past, without being rewarded with a single drop. The company's clerk, however, is punctual in calling for their fees, at the moment they are due. . . . but I am not very well satisfied at paying $10 a year for a thing of no value . . . and if a remedy is not soon found, I shall have my pipe cut off . . . and he obliged once more to rely upon our pumps, and I am confident my neighbors will all follow my example." In printing this letter, the editor of the paper says: "We publish the following communication on this subject, and add our own protest against the evil of which the writer here complains. The complaint is indeed universal. We know of no family which is regularly supplied with Manhattan water . . . the Manhattan Company are a gross imposition, a flagrant fraud, upon the inhabitants of New York. . . . Were it not for the fraudulent trick of the intriguing Burr, the City would have erected works which would have afforded a constant and sufficient supply of water to the inhabitants. But, by the most dishonorable management, the monopoly of this indispensable article was thrown into the hands of a private company: and our citizens are compelled to pay exorbitantly, and are still left to suffer for the want of 'pure and wholesome water.' Let the company fulfill their contract in supplying us with such water, or let them relinquish the Charter of their institution, which, by this neglect, they have long since justly forfeited." —N. Y. Com. Adm., My 9, 1809. See My 9.

A fire, commencing in a cluster of wooden buildings in Chatham St., between Tryon Row and Duane St., destroys between 20 and 30 wooden buildings, nearly the entire block.—N. Y. Ev. Post, My 9, 1809.

Trinity vests itself into Consideration the Petition relative to a Church upon Hamilton Square" and resolves to "grant [aid] for that Purpose." (St. James Church.) —Trin. Min. (M.S.), My 9, 1809. See Je 5.

The common council grants the Brick Church permission to extend vaults under the sidewalks around the church.—M. C. C. (1784-1831), V: 532, 544. See Je 16.

The superintendent of the almshouse reports that there are 82 superannuates, including 35 "infirmities in Maniac Asylum New York Hospital," and 190 "Children at Nurse out of the House," making a total of 1,117.—M. C. C. (1784-1831), V: 548.

The common council resolves that the street commissioner "proceeds a survey of that part of the Village of Greenwich which is not already procured and fix on the necessary elevations that the same may be regulated and also that be Report a profile of Hammond Street for the regulation thereof." —M. C. C. (1784-1831), V: 549.

The common council resolves that "the Basin erected at the end of Coenties Slip be hereafter known and distinguished by the name of the Old Albaty Basin."—M. C. C. (1784-1831), V: 549.

The expenses in 1809 for filling the Collect Pond amounted to $409.00.—M. C. C. (1784-1831), V: 477, 571, 559.

The common council orders the "immediate removal of a Watch Box from the Corner of Pearl & Pine Streets as it was much complained of by the neighborhood," and also directs the superintendent of repairs to remove "all the Watch Boxes to their usual place of Deposits for the Summer season as soon as convenient."—M. C. C. (1784-1831), V: 552.

The common council passes an ordinance for paving Broadway from Marketfield to Beaver St.—M. C. C. (1784-1831), V: 553.

On June 5, the street commissioner represented that the contemplated improvement in Broadway opposite the government house could not be effected under this ordinance, as one of the assessor was an interested party; he therefore presented a substitue.—Ibid., V: 571.

The common council agrees to lay the walk in Broadway with flagstones. On June 5, it was ordered that the curbstone of Broadway be laid, and the sidewalk be filled with gravel from the point where the pavement is already laid northward to Art St.—M. C. C. (1784-1831), V: 553, 566, 757-76.

The common council authorises the superintendent of repairs to "purchase a Horse for his use when attending to the duties of his office."—M. C. C. (1784-1831), V: 555.

John Fellows, superintendent of the Manhattan water works, announces that "A partial temporary embargo having involuntarily been laid upon the Manhattan water, I am happy in stating to the public that the causes are discovered, and partly removed. . . . Many of the lateral pipes leading to the houses, and perhaps some of the main conduits, were closed by the inclemency of last winter; at the return of mild weather it was expected the frequent opening of fire plugs would have removed all obstructions. But it is found expedient to take up some of the conduits which will be done as soon as possible. A considerable stoppage has already been removed. . . . An improvement will also be made which will convey an unusual quantity of water into the south east part of the city, where the complaints chiefly exist. . . . The repairs of lateral pipes has for some time past been intrusted to one person. . . .; but sickness and other causes have occasioned neglect in this branch. Four plumbers are now engaged in this business and will in a few days answer all demands already made . . . ." —N. Y. Com. Adm., My 22, 1809. See My 31.

Sundry debtors "confined on the Limits in this City" petition the common council that said limits may be extended "to include the said market, the Brick Church, the Pier at the bottom of Murray Street." The petition is referred to a committee. —M. C. C. (1784-1831), V: 557. It was granted on June 12—Ibid., V: 576-77.

The common council orders that a pier be run out on the east side of Old Slip 250 feet into the river, that two piers be sunk at Pearl Slip, "one on the South or West side, the other on the East side with the bulk head on the East side" to extend 250 feet into the river, "and that two piers be also built between Fly Market and Burling Slip."—M. C. C. (1784-1831), V: 577-78. See also ibid., V: 567, 579, 580, 582-85, 618.

The common council gives to the First Presbyterian Church "the Engine House now standing on their burial ground." The board also permits the church "to extend their line of Vaults under the street in Wall Street from their present Easterly line to the Lot of Charles Gardner." —M. C. C. (1784-1831), V: 578.

The common council approves an agreement with Jacob Williams "for a Pier at Courtlandt Street." —M. C. C. (1784-1831), V: 580.

The common council agrees that Sugar Loaf (Franklin) St. be extended to Provoit St.—M. C. C. (1784-1831), V: 560-61.

John Fellows, superintendent of the Manhattan water works, announces: "The pump beam of the Water Works, unfortunately broke yesterday. It will be repaired as soon as possible; but several days are unavoidably requisite for that purpose."—N. Y. Com. Adm., My 31, 1809. See Je 16.

The committee appointed on March 6 (p. n.) to decide upon the ground for an Episcopal church and academy at Hamilton Square reports that all parties concerned have agreed "that a plot of one hundred feet on Hoffman Street by one hundred and twenty five feet along Hamilton avenue should be set off for the church with the exception of a five foot alley round the intended academy as portrayed upon the annexed plan and that the residue of the ground should be used for the said academy." The members of the committee also report that they went with the street commissioner and Charles Loss, city surveyor, and "staked out the ground for the Church at the Corner of Hoffman Street & Hamilton Avenue." The common council approves the report.—M. C. C. (1784-1831), V: 677. The original report, and accompanying map, are preserved in metal file No. 38, city clerk's record-room.

John's house was erected on this property, which was on the site of the present w. c. corner of Lexington Ave. and 66th St. —L. M. R. K., III: 933. See 1870.

The common council passes an ordinance providing for the employment of the convicts of the city prison at work on the public highways and authorising the committee of roads to
The Phoenix, the first steamboat to ply upon the ocean, left New York on this date, and arrived at Philadelphia on June 17. An oil painting of this steamboat is in "Stevens Castle" at Hoboken, N. J.—Bullock, in *Jour. of Amer. Hist.* (1907), Vol. XX, No. 2, second quarter, 1907. The "Stevens Castle" was built by John Cox Stevens of Hoboken in 1806, and was "intended to ply as a passenger boat between New Brunswick and New York. But the monopoly held by Fulton and Livingston prevented the vessel entering the waters subject to the jurisdiction of New York State, and Stevens, sending her by sea to the Delaware, ran her between Philadelphia and Trenton."—McMaster, *Hist. of People of U. S.* III, 401, citing U. S. Gen., JI 6, 1809.

Thomas Paine died in New York City.—*Pub. Adv.,* Je 9, 1809. He was buried at New Rochelle on June 9.—*Republican Watch-Tower,* Je 13, 1809. See also *Cem. Adv.*, Je 20, 1809. In 1806, John Randel, Jr., at the request of David T. Valentine, prepared a series of three maps, showing the situation of Paine's residence,—namely, that in which he boarded until May, 1809, on the east side of Herring (later called Bleeker) St., between Burrows (Grove) and Raisin (Barrow) Sts., and that in which he died, on the north side of Burrows (No. 59 Grove) St., mid-way between Herring (Bleecker) and 4th St. The third map shows the alterations in streets which caused the removal of the house in which he died. Accompanying the maps is a letter to Valentine explaining the reason of Mr. and Mrs. Paine. See reproductions of these in *Mon. Cem. Cen.* (1806), 841-46.

"A Friend to order and improvement" addresses an open letter to the city corporation complaining about the "abused abuses which are committed by throwing dirt, stones and all kinds of rubbish into the streets." He says in part: "Masons and Carpenters act as though they were proprietors of the streets; they are not content to put their time, mortar, stone, bricks and scailing, in the smallest possible space, but they occupy the whole width of this street [Greenwich] except barely sufficient for one carriage to pass. . . . Livery stable keepers, Coach makers stock, and carmen's carts are so numerous in many streets that it is at times impossible to pass. . . . I have been informed that the dirt of this city is sold for 6000 dollars a year; . . . There is a barbarous argument frequently urged that hogs are good scavengers and should be suffered to range the streets. What would we say of a dirty housekeeper who kept a hog in the kitchen to eat up the filth? . . . The streets are public property; no individual should be permitted to exhibit any of his goods or wares projecting more than one foot from the front of his house. Everyone should keep a dirt box or barrel, to be emptied in the streets; the streets, not the streets. . . . All hogs found in the streets should be driven to the poor house."—*Republican Watch-Tower,* Je 13, 1809.

The old powder house, which is to be appropriated as a dwelling for convicts sentenced to hard labor, has a copy of a map made by Charles Lous of the property of Edward Livingst, dated 1805, by red lines and numbers, and that said map be filed and dated this day. It is also resolved that Mulberry St. be opened in the aforesaid direction to Great Jones St. without delay, and that the street commissioner apply to the several proprietors for a deed of cession.—*Cem. Adv.*, Je 5, 1807, V: 531.

The corner-stone of the first St. Patrick's Cathedral (the first Catholic church in the U. S. dedicated to Ireland's patron saint) is laid on Mott St. between Broadway and the Bowery Rd.—*Cem. Adv.*, Je 9, 1809. The building was finished and dedicated May 4, 1815, the architect being Joseph F. Margan.—*Proc. Post,* My 8, 1815. Shortly thereafter the original building, 120 ft. long and 85 ft. wide, was extended 36 ft. more in length, so that it reached from Mott to Mulberry St.—Greenleaf, 332-36; *Cedars, Records,* III: 1452. It burned on Oct. 6, 1866, being at the time the oldest Catholic church in the city. (The parish of St. Peter's was older [1785], but its second St. Peter's church—the present one—was not built until 1835.) St. Patrick's was rebuilt and was ready for dedication May 6, 1868.—*St. Patrick's Cathedral, 53, 62, 101. See also Shea, *Hist. of the Catholic Ch. in U. S.* (1886) L. M. R. K., III: 936; and descript. of PL 75, I: 467.

The common council grants the petition of Isaac Clason and others which asked "that Charlotte Slip might be completed, & for that purpose that work might be put in hand without impediments to contend with but the poplar roots, which insinuate themselves into the joints of the logs, and in some instances completely impede the course of the water. This difficulty will receive every possible attention."—*Pub. Adv.,* Je 16, 1809. See Je 30.

The common council agrees that Chambers St. be extended to Chatham St.—*M. C. C.* (1784-1831), V: 593. See, however, O 30.

The common council directs the street commissioner to "take immediate measures for opening Greenwich Street from the present pavement to Christopher Street."—*M. C. C.* (1784-1831), V: 596. See JI 24.

The common council resolves that "in future no permission be granted to build any vault for interment of the Dead under any of the Streets of this City."—*M. C. C.* (1784-1831), V: 597. Such permission was last given on May 15 (q. v.).

The common council agrees that the intersection of Beach, Walker, and Chapel (West Broadway) Sts. be converted to a Park."—*M. C. C.* (1784-1831), V: 590. This became Beach Park.—L. M. R. K., III: 968, 996.

A letter from Thos. Pope (see F 13) "requesting the Board to visit a Model of a Bridge which he had constructed consisting of an arch only & which might be thrown over the wide rivers," is referred to the city inspector.—*M. C. C.* (1784-1831), V: 590. See also 1811.

Bridge St. is ordered opened from Whitehall St. to State St.—*M. C. C.* (1784-1831), V: 592-93. See 1658, 1693; F 11, and My 2, 1808.

John Beele advertises that he "has opened a large and convenient house (situated in Greenwich, between Hammond and Bank streets) as a Tavern and Boarding House," which he calls the "Greenwich Hotel." The Greenwich stage runs from the city hall to this house five times a day.—*N. Y. Gaz. & Gen. Adv.,* Je 28, 1809.

Independence Day is celebrated by about 2500 members of the Washington Benevolent Society, who parade from the "College green" to the south-east corner of Reade St. and Broadway, where the president lays the corner-stone of Washington Hall, "under a salute of thirteen guns, and music from the bands." They then proceeded to the "North Church," and listened to the Declaration of Independence and an oration by Mr. Verplanck, after which they marched "to the Rope Walks, beyond Orchard street, where they sat down to a plentifully provided dinner."—*Columbian Centinel* (Briarcliff), JI 8, 1809. See also JI 7.

The architect of Washington Hall was John McComb.—See his original designs in the N. Y. H. S. It became the headquarters of the Federal Party, and later a hotel.—*Man. Cem. Cen.* (1865), 638-71. It was finished in 1812, (q. v., D 28). See also L. M. R. K.,
The common council accepts an invitation from the president and professors of Columbia to "join the procession from the College Green to the North Dutch Church & to attend the Annual Commencement to be held on Wednesday the 2d of August next."

It is ordered that a chain be strung across the streets adjacent to the North Church during the commencement exercises to prevent the passage of carts.—M. C. C. (1784-1831), V: 642.

A petition is received "from persons residing on, and near Manhattan Island, stating the unhealthiness of the Marsh, & praying that said Marsh & Lots adjoining North Street might be filled up." It is referred to the alderman and assistant of the Tenth Ward, and the street commissioner.—M. C. C. (1784-1831), V: 622. Regarding the "Manhattan Island" here referred to, see L. M. R. K., III: 966. Thos. F. De Vor, writing as late as 1862, said he remembered this piece of land, or knoll, between Houston and 3d Sts. Lewis St. ran about through the centre of it.—Market Book, 524. See also Pupin's Plan of 1817.

The common council appoints a committee "to devise a mode of impounding Cart that trespass on the Battery."—M. C. C. (1784-1831), V: 645.

As the board of health has represented that "a pestilential or infectious disease doth prevail in the village of Brooklyn, in the county of Kings," Mayor Clinton by proclamation prohibits all intercourse between New York and Brooklyn, and orders that no person who, within 48 hours, shall enter this city.—N. Y. Com. Adv., Ag 4, 1809. A copy of this proclamation was sold with the library of the late Geo. H. Moore, by Bangs & Co., N. Y., May 10, 1893.

Publication of The Observer (see p 17) is suspended with the issue of this date. More than a year later the paper was revived under the same title, but of a different size.—Brigham, A. A. S. Proc. (1817), 472; Early Newspapers, II: 426.

Thomas Brown, chief engineer, on behalf of the engineers and firemen, publicly thanks John F. Randolph, "proprietor of the old Tea Water pump (revived) for the ready and prompt assistance he has afforded them in the several late fires in Chatham-street." Brown says that "but for the aid furnished from his pump, the progress of the flames must have been more considerable."—N. Y. Eve. Post, Ag 3, 1809.

A number of citizens meet at the North Dutch Church and organize the "Anti-Dwelling Association of New York." They promise not to vote for anyone who has ever sent, accepted, or carried a challenge to fight a duel, and adopt an address to the "Electors of the State of New York" setting forth the objects of their organization and urging others to join.—N. Y. Com. Adv., Ag 15, 1809.

Pres. Madison recalls his proclamation of April 19 (q.v.) because Great Britain has refused to ratify the agreement made by the British minister that the orders in council would be withdrawn on June 10.—N. Y. Com. Adv., Ag 12, 1809; Annals of N. Am., 507.

The trustees of the Free School Society petition the common council for some assistance "towards completing the School House now erecting." This is referred to a committee.—M. C. C. (1784-1831), V: 626. For the committee's report, see Ag 25.

A law is passed by the common council to erect a pound in the almshouse yard.—M. C. C. (1784-1831), V: 628.

As the sum of $6,179 has been granted for taking property for opening Collect St., the common council orders that the amount be assessed upon those benefited.—M. C. C. (1784-1831), V: 630-40.

The common council designates the almshouse "as an Asylum for lost children, where it is requested they may be immediately sent, that parents & guardians may know where to apply for information."—M. C. C. (1784-1831), V: 641.

James Fairlie (see Jl 24) and John Rutherford (see My 24) resign as commissioners for laying out Canal St., and William H. Ireland and Daniel J. Ebbets are appointed instead.—M. C. C. (1784-1831), V: 640.

A map of part of the Bowery Road, pointing out precisely the 15 places for the true lines of said road according to a former survey made in 1793, bears this date.—See the original (map No. 146), in bureau of topography, borough president's office, Municipal Bldg.

John Pintard, secretary of the N. Y. Hist. Soc, invites the common council to be present at the "Second Centenary Anniversary of the discovery of this part of America by Henry Hudson,"
and requests the use of the front court-room for the meeting of the society on this occasion. The invitation is accepted, and the request granted. The date of the event is given as Sept. 4, 1809 [q.v.]. Rev. Samuel Miller is expected to deliver an oration.—M. C. G. (1784-1831), V: 644.

The common council directs the street commissioner "to have the Street in front of the Albany Basin commonly called Swartwout's Basin immediately paved according to the original design." —M. C. G. (1784-1831), V: 647. The paving was finished by Nov. 27.—Ibid., V: 761.

The common council resolves "that the Watch Committee be directed to place a Watchman at the door of the House in which the Governor resides when in this City."—M. C. G. (1784-1831), V: 647.

There are 120 children in the African Free School.—M. C. G. (1784-1831), V: 649.

An ordinance is passed in common council to regulate Fourth St. from Division to Pump Canal St.—M. C. G. (1784-1831), V: 651. Fourth St. here mentioned is the present Allen St. See 1817 L. M. R. K., III: 1000; Pl. 175, Vol. III.

The committee on the petition of the Free School Society (see Ag 14) makes the following report: "That a considerable sum of money has been expended by the memorialists in repairing & fitting up the Old Arsenal [see Ag 1808] for the reception & accommodation of the school; that in the appropriation of their funds to this object, every attention appears to have been paid to economy & a faithful application of their means, consistent with due regard to beauty of architecture and convenient distribution of apartments: that their resources are now exhausted and the building unfinished; that they are reduced to the necessity of paying rent to the Government, that in a short time they are likely to be unable to sustain their present employment and expenses: that the sum of $1100 would enable them to complete the building and the rent of the lower part of the House added to the annual allowance of the Legislature will defray all future expenses of the school.

"Under these circumstances, the Committee impressed with a high sense of the usefulness of the free school institution, & fearing that the same results from the appointment of a poor & unprotected to extend its patronage so far as to enable the Memorialists to complete their building, recommend that they be authorized to borrow the sum of $1100, for the purpose of completing the School House, & that this Board will guarantee the payment of said sum, within Seven Years, with legal interest annually." The report is confirmed.—M. C. G. (1784-1831), V: 649-50. The new school was opened on D 11 (q.v.).

The common council passes ordinances "for laying Walks & Curb Stone on Water Street on the north side of Cherry Street from Montgomery Street to Cleraun Hook & for laying Walks & Curb on the north side of Cherry Street from Rutgers to Gouverneurs Street," also for carrying out a pier on the east side of Beekman Slip.—M. C. G. (1784-1831), V: 652.

The council resolves "that no person be allowed to keep a Lime House in any of the Public Streets of this City longer than three months—and that no lime house be permitted to remain in any Street between the first day of November and the first day of April in any year under the penalty of Twenty five Dollars for every twenty four hours it shall so remain."—M. C. G. (1784-1831), V: 654.

The first railroad tracks ever laid down in America were placed at this time in a large yard in Philadelphia by Thos. Leiper, the projector, and satisfactory experiments were made.—Scharf & Westcott, Hist. of Philadelphia, I: 544. Cf. an article entitled "Finding our oldest railroad," in N. Y. Times, F 22, 1925.

The bi-centenary of "the discovery of this part of America by Captain Henry Hudson" is celebrated by the New York Historical Society (see Ag 21). Rev. Dr. Samuel Miller delivers a commemorative address to the society, the governor, mayor, city corporation, etc., at the city hall: At 4 o'clock a dinner is given at the City Hotel.—N. Y. Ev. Post, S 6, 1809; Kelby, Hist. of the N. Y. H. S., 18. Dr. Miller's address is printed in N. Y. H. S. Collections (1809), 17-40.

The common council orders that the owners of water lots on the East River between Peck Slip and the pier belonging to Peter Schenckeroen and Ebenezer Stevens shall sink a "good & substantial" bulkhead on the south line of South St.—M. C. G. (1784-1831), V: 656-57.

The common council appoints a committee "to procure from Augustus Van Cortlandt Esq.' a Cession of his right to the ground between Broadway & the Collect where the old water work was formerly stood."—M. C. G. (1784-1831), V: 657.

The common council passes the following resolution: "Whereas Andrew I. McLaughlin has been at considerable expense in making [in July] a Pavilion at the Flag Staff on the Battery for the accommodation of the Public Resolved therefore that the said Andrew I. McLaughlin shall be permitted to use & occupy the same for the term of three years free of expense unless the same shall be previously required by the United States for the purposes of Fortifications." On the same day, the superintendent of repairs reports that the flagstaff is "in a decayed state & dangerous to the inhabitants," and the corporation orders him to take measures "for repairing the same, or for erecting a new one as he shall judge most advisable."—M. C. G. (1784-1831), V: 623, 674, 656; description of Pl. 59, I: 435. See S 11.

Lieut. (later Commodore) Thomas MacDonough leaves the frigate "Essex" in New York harbour, detached by the government for other service.—R. Macdonough, Life of Commodore Thomas Macdonough, 91-92.

The Academy of Arts invites the Historical Society to occupy a room in the government house. The invitation was promptly accepted, and on Sept. 15 the first meeting there was held. The north-west room in the second story of the building was appropriated to the use of the society, and the books, which had previously been kept in the city library, were removed to the same place.—Kelby, The N. Y. Hist. Soc., 1804-1804, 22.

The superintendent of repairs informs the board that he understands "that the Ground at present occupied by the Flag Staff at the Battery would probably be used by the United States on the completion of the works now erecting near that place." This representation is referred to a committee "with authority for them to select a site whereon to erect a Flag Staff on the Battery."—M. C. G. (1784-1831), V: 661. The federal government was at this time erecting Castle Clinton, and the "flagstaff" was directly in line with the causeway.—Descrip. of Pl. 59, I: 435. See S 18.

The common council directs the Council as Guardsman, as Guardsman, to the common council, releasing to the city the land "situate lying & being in the sixth Ward of the said City of New York being bounded & described as follows viz On the West by Broadway on the North by Ground belonging to John Jay Esq" on the East by ground formerly belonging to the Widow Barclay and Southernly by ground formerly belonging to me the said Augustus Van Courtlandt containing one acre and three quarters." The board ordered that they be "acknowledged & recorded."—M. C. G. (1784-1831), V: 663-64.

The common council receives a petition from the trustees of the African Free School, "requesting that as the School House now occupied by the New York Free School will soon be vacant that it might be applied to the use of the School." The petition is referred to a committee.—M. C. G. (1784-1831), V: 661. On Oct. the trustees of the "Economical School" also petitioned for the use of the school-house—Ibid., V: 679. For the board's answer, see ibid., V: 697. See, further, N 27.

The common council directs the street commissioner to prepare an ordinance for regulating Hudson Square and laying the curb stone "around the fence."—M. C. G. (1784-1831), V: 662-63.

The common council orders that Washington St. be opened from Provost to North Moore St. and from Provost to Jay St.—M. C. G. (1784-1831), V: 664.

The N. Y. Hist. Soc. publishes an "Address" to the public in the form of a handbook, soliciting donations of manuscripts, books, pamphlets, and other records to form the basis of the society's collections. A descriptive list of such historical materials is included in the statement. This circular, signed by John Pinard, recording secretary, is reproduced in Jan. Grant Wilson's address on John Pinard, delivered before the society Dec. 3, 1901, and reprinted in 1903. It contains the following inscription: "The cause of truth is interesting to all men, and those who possess the means, however small, of preventing error, or of elucidating obscure facts, will confer a benefit on mankind by communicating them to the world." The society was organised on Nov. 20, 1804 (q.v.).
John Pintard informs the common council that, agreeably to their order (see Oct. 10, 1808), he has indexed volumes 8, 9, 10, and 11 of the council minutes. A committee is appointed to determine his compensation.—M. C. C. (1784–1811), V: 667. See N 30.

The referred the Committee petition the the floor of the House of Repairs & also suggesting the propriety of prohibiting the passing of carriages by churches on the Sabbath during the time of divine service" is referred to a committee. A letter from Robert Fulton "on the subject of supplying the City with a sufficient quantity of pure Water & also on the enforcing of the laws for keeping the Streets clean & free from obstruction" is referred to the same committee—M. C. C. (1784–1811), V: 673. Oct. 2, it reported that that part of Pintard's communication respecting the cross-walks deserved the particular attention of the board and that a resolution ought to be passed accordingly, but that "the Corporation have no power to take any measures" regarding the other suggestion. The report was confirmed.—Ibid, V: 680.

On Dec. 4, the committee reported that "entertaining the highest respect for the talents & information of Mr. Fulton, they consider him entitled to the gratitude of the Public for the offer of his services without compensation in the improvement of our Police," and they suggested that "this Board ought not to neglect the opportunity of availing itself of services which may be so beneficial to the City." The report was ordered to lie for consideration.—Ibid, V: 765.

The board agrees to lend the Historical Society "such tables as shall not be immediately required by the Com: Council." It also directs the superintendent of repairs to make "an inventory of such furniture as is now in the [City] Hall & not in use & Report the same."—M. C. C. (1784–1811), V: 674. See O 9.

A ferry is established from the fort of Walnut across the East River to Jackson St. on Long Island.—M. C. C. (1784–1811), V: 675. See also L. M. R. K., III: 945.

The Medical Society of New York decides to address a circular letter to the county societies throughout the state urging them to unite in a petition to the legislature that Dr. Hosack's "Botanic Garden" be purchased "for the benefit of the Medical Schools of this City."—N. Y. Com. Adv., N 11, 1809. See J 15, 1810.

The common council adopts regulations for the sale of the Collect lots, the sale to begin on Nov. 1 (q. v.) at the city hall. The committee on the sale is directed to "select such of the Lots as are as reserved and which they shall judge suitable for the Economical and the African Schools" (see S 11).—M. C. C. (1784–1811), V: 689–90. On Nov. 20, Mary Jones was paid $13 for "printing 1,000 Handbills & 200 conditions of sale of Collect Lots."—Ibid., V: 753. See N 6.

Jacob P. Roome, superintendent of repairs, reports to the common council "That agreeably to the order . . . of Sept 25, 1809 [q. v.] he has examined the old furniture which was in the dark room of the City Hall and found eleven old circular mahogany tables, six of the best are removed to the Governor's house by John Pintard Esq for the use of the Historical Society until wanted by the Corporation. "The following is the furniture now in the Hall & not fit for use. "Five circular tables broken, twenty eight mahogany chairs broken, five pair of brass andirons broken two old Grates one Comping House Desk & frame three old franklin Stoves, thirty four Stone Cutters hammers, one lot of old iron. "The Superintendent recommends the above old articles to be disposed of in some way so as to clear the rooms of the inoccupancies." The board thereupon orders that the furniture be sold at public auction.—M. C. C. (1784–1811), V: 697.

The original report (MS.) is preserved in metal file No. 38, city clerk's record-room.

The committee on the petition of Andrew I. McLaughlin recommends to the common council "that the new Flag Staff be erected on the site proposed by the former Committee [see S 18]; that it be constructed in the same . . . manner as the former flagstaff except that the Columns be new & turned & somewhat higher than they were before. C. C. ordered that it be of Walnut such as was recommended as to the height of two steps So that if the Common Council should at a future period think it necessary to have it floored it may be done. "The committee also suggests that "so much of the old materials as can be used to advantage be applied to the construction of the new flag staff," and that the superintendent of
repaired to be directed "to proceed in this business without delay."

Oct. A plan of the "intended flag staff" accompanies the report. By a vote of 11 to 4 the report is approved.—M. C. C. 1784-1811, V. 398. The new flagstaff was begun on Oct. 23 (p. 2).

The common council passes an ordinance for regulating the streets around Hudson Square.—M. C. C. 1784-1811, V. 701-2.

The common council passes an ordinance to prevent the running at large of hogs, pigs, etc. without rings in their noses.—M. C. C. 1784-1811, V. 694.

The common council passes an ordinance to prevent the subscribers to the Star Glasses, as every accommodation that they could wish, will be erected."—N. T. Gaz. & Gen. Adm., O. 23, 1809. The new flagstaff appears on the Commissioners' Map of 1811 (Pl. 79, Vol. I). See also, of particular, Pl. 59, I, 435, and L. M. R. K., III: 962. This was the second flagstaff erected on the Battery; the first had been built about 1790 (q.v.). See also Halsey, Pictures of Early New York on Dark Blue Stafforshire Paper (pp. 139-50).

Conti's "New York Garden," on Broadway, next to the corner of Robinson Street, and directly opposite the Park, containing in length about 219 feet, and in front and rear 37\(\frac{1}{2}\) feet, is advertised for sale.—N. T. Gaz. & Gen. Adm., O. 26, 1809; cf. Bayles, Old Taverns, 453. See Ap 18, 1810.

John Jay and Peter Jay Munro, on the one part, and the city of New York on the other part, sign an agreement "that the Alley already laid out through the Ground of Messrs. White Morris & others between Sugar Loaf [Franklin] Street and White Street parallel with Broadway and twenty five feet wide shall be continued through the land of the said Corporation and of the said John Jay & Peter Jay Munro to Canal Street, and further that no dwelling Houses shall ever be built fronting upon the said Alley, and that no new Street or Street in the said Alley be ever accepted by the said Corporation." The agreement was approved by the common council on Oct. 30.—M. C. C. 1784-1811, V. 707. This is Cortlandt Alley.—See Pl. 175, Vol. III.

A committee of the common council reports that in investigating the accounts of Wm. Mooney, late superintendent of the almshouse, "an alarming increase has been discovered in the late expenses of the Alms House Establishment." The expenses for the year ending July 31, 1809, greatly exceeded those of any other year and were nearly double those of 1804, and the progressive increase in expenditure "in most cases greatly exceeds the ratio of the number of Paupers." Comparing the articles consumed in 1804 and 1809, the committee observes "with regret, that the greatest increase taken place in the consumption of those articles which are used as the gratifications of luxury or intemperance; whilst the use of some articles which might contribute to the comfort of the sick or feeble has been diminished or discontinued.

"The quantity of Rum consumed in the latter year is more than double that in the former, that of Gin is six times & of Brandy five times as much as in the former year." . . .

The committee also submits a "Statement of the number of Paupers & the expense of the Alms House from the Year 1803 to July 31st, 1809," and a "Comparative Statement of Articles consumed." The common council orders "that the said Report be entered at length on the Minutes and that it lay for further consideration.'—M. C. C. 1784-1811, V. 714-27. See also ibid., V. 722, 723.

A committee reports to the common council "That in opening Greenwich Street thro' the Nursery nothing farther has been done than cutting down the trees, & that unless the numerous small stumps are grubbed or ploughed out, and the rubbish removed it will be impossible for Carriages to pass in safety." The board thereupon orders that this work be done.—M. C. C. 1784-1811, V. 711.

The street commissioner reports to the common council that A. L. Bleeker has consented to cede Bleeker St. from Broadway to the Bowery Road to the city, gratis, "reserving to himself the right of compensation for any other streets that the Corporation may direct to be run through his gound subject to the usual assessment." The matter is referred to a committee.—M. C. C. 1784-1811, V. 708. See N 6.

Because of the enormous expense involved, the common council resolves "that it is inexpedient to extend Chambers Street in Chatham Street" (see Je 19).—M. C. C. 1784-1811, V. 709-10.

The common council orders that Lispenard St. be extended to Broadway, agreeably to a map submitted by a committee.—M.C.G. 1784-1811, V. 712.

The common council passes an ordinance "for regulating that part of Bridge Street lately opened between Whitehall & State streets."—M. C. C. 1784-1811, V. 712.

The common council directs the street commissioner to take immediate measures for opening Crosby St. to Bleecker St. and "for causing the Waters to be conveyed or drained off from the Bowery road between North 5th & Romaine Street."—M. C. C. 1784-1811, V. 727.

An English merchant visiting New York writes in his diary: "At six we went to the theater, in the boxes, and saw the play of 'The Merchant of Venice' and 'The Children in the Wood.' The house is nearly the size of Haymarket, very neatly fitted up. There are three tiers of boxes, but only one gallery. It is observable that no female is ever seen in the pit here, for what reason I could not learn. The house was tolerable full. There are separate porters, men, women, and children. The coffee rooms, and other accommodations, are very neat and comfortable. The latter is carpeted and fitted with sofas and every requisite accommodation. The scenery is tolerable good, and pretty well managed; and as far as I can judge the acting is not to be found fault with. A Mr. Twacts and a Mrs. Mason are the leading characters here at present, and we had two or three songs from a Mra. Poe, which in my mind was middling. The performance was over about eleven o'clock." — "Extracts from the Diary of an English Merchant who visited America in 1803," in Munsey's Mag., XL: 203-4.

The so-called "Collect lots" are offered for sale. "Conditions of sale of the Lots of Ground belonging to the Corporation of the City of New York, fronting on Broadway, Elm, Collect, White, Sugar Loaf, Leonard and Anthony-Streets, in the Sixth Ward of the City. The public will be offered the said Lots at the Court House at the City of New York, on Wednesday the First of November 1809, at 12 o'clock," are printed as a circular or broadside, one of which is now preserved in metal file labelled "Filed Papers, 1804-1808," in city clerk's record-room. See also O 9 and N 6.

"The streets of New York are spacious, tolerably paved and lighted. The footpaths are chiefly paved with brick, though some are flagged. The principal streets—Broadway, Greenwich, etc.—are upward of a mile long. Indeed, the town is planned out near nine miles, and the buildings are increasing very fast. The houses which are chiefly of brick, are lofty and very neatly built, the one is ornamented with the bricks, which gives them a very lively appearance. There are also some very neat, and indeed handsome, houses belonging to the citizens a short distance out of town. There are very few public buildings that attract the attention of a traveller, with the exception of one now erected on apparently a large scale, of brick, but faced and with all the ornaments, pillars, etc., to be composed of white Marble. It is, I believe, intended for State offices [the present city hall]."

The old federal hall "is now appropriated for a court of justice. The Hall of Congress is now the Court of Chancery. . . . In Beckman Street is a small Episcopal chapel, at present remarkable for bearing as a vase the crown and sceptre, said to be the only remains of royalty in the State. [St. George's Chapel]."

"The custom of planting trees—in general, Lombardly poplars, on each side of the streets adds very much to their appearance, and is universally practised. Some few years since, the magistrates, during the continuance of a pestilential fever, ordered them to be cut down, but were but partially obeyed. It is now considered that they add to the health of the place by the waving of their branches creating an air during the extreme heat of the summer months."

"In the center of a small area [Bolwing Green], before the custom-house—formerly the government house . . .—still stands a stone pedestal on which there was once a statue of his
present majesty, cut in lead, which during the Revolutionary War was taken down and converted into bullets."—"Extracts from the Diary of an English Merchant who visited America in 1809," in "Munsey's Mag., XL: 204-5.

6 Dr. David Hosack presents a petition to the common council "stating that he intended to make an application to the Legislature at the next session soliciting them to purchase the Botanic Garden in order that the same may be connected with the Medical Schools of this City. That Previous to this application he was desirous of freeing the Ground from the Quit Rent which is now paid to the Corporation. That having been necessarily led to very great and unnecessary expense in the improvement of those Grounds and being for purposes of Public utility he hoped the Board would freely relinquish to him the Quit Rent, but if they supposed a pecuniary compensation from him was proper, he begged they would ascertain what that should be." The petition is referred to a committee.—M. C. C. (1784-1813), V: 732-33, 766.

The common council receives a petition from David French stating that he has made "great improvement in the construction and use of Steam Engines," for which improvement he has obtained a patent, that "the improvement may be applied to Boats for the purposes of ferrying across rivers and upon a Plan infinitely cheaper than any yet in use," that his machinery is "nearly ready for Exhibition and Experiment," and that when it is completed he will address the Board and request the Board to defer granting a lease for that ferry. At the same meeting a petition is also received from Elisha Morrill and Levi Kendall stating that they have obtained a patent for an invention which they believe "more powerful in its application to the working of any kind of machinery than any hitherto discovered," and that they understand a lease is to be given for the establishment of steamboats on the Paulus Hook Ferry, and believe their invention to be "Superior to all other discoveries." They ask the board to make an investigation. Both petitions are referred to the committee which is considering the application of Elias Boudinot and others on the same subject (see § 22).—M. C. C. (1784-1813), V: 731. See D 11.

The finance committee reports that, in accordance with resolutions of the board (see O 9 and N 1), 21 lots of ground "on Broad Way, White Street and Elm Street in the vicinity of the Collect" have been sold for $25,520.—M. C. C. (1784-1813), V: 733-34. On Dec. 26, deeds for some of these Collect lots were ordered to be sealed and delivered.—Ib., V: 795.

The common council agrees to accept A. L. Bleeker's ecession of Bleeker St. (see O 30) and directs the street commissioner to treat with the owners of Lots C 53 and Mott Sts. to Bleeker St.—M. C. C. (1784-1813), V: 734-35.

The common council agrees to a report of a committee for establishing a watch in Greenwich Village without additional expense to the city, except for a foreman, a room, and fuel.—M. C. C. (1784-1813), V: 735.

The common council authorizes the watch committee to "purchase the House at the corner of Beach Street & Chappa St. lately owned by William J Waldron to be applied to the purpose of a Watch House."—M. C. C. (1784-1813), V: 739.

The common council accepts the offer of Samuel Burling to furnish as many poplar trees of a suitable size as may be necessary to line Broadway from Leonard to Art St. on both sides, provided the corporation will remove them at their own expense.—M. C. C. (1784-1813), V: 735-39; Man. Com. Coun., (1805), 615.

The common council receives a conveyance from Peter Godet "for his Rights on the Easterly side of the Pier on the West side of the Exchange Slip," and orders that it be filed in the comptrol- ler's office.—M. C. C. (1784-1813), V: 737.

The English merchant who is visiting New York (see N 1 and 2), takes a trip with a friend to the state prison. This is "about two miles out of town ... at Greenwich." He observes: "The punishment of death in this State, as each State is governed by its own laws, is never inflicted but in case of murder. "We were very much gratified with this place, as the greatest order, cleanliness, and regularity is observed throughout. Every prisoner, if a mechanic, is obliged to work a daily task allotted him and if he is found further inappropiate to himself. Those who have not been bred to any trade are permitted to make choice of one, or otherwise are set to pick oakum. There is at present a German count employed in this way for forgery. There are separate workshops for each craft, among which are blacksmiths and nail-makers, shoemakers, tailors, coopers, weavers, turners, spinning, toy-makers, etc. The building is of brick, and apparently well arranged to promote the health of its inhabitants, of whom there is at present about eight hundred. It is surrounded with a wall, on which, at proper distances, are placed sentinels. "There are very few females, whose employ is to wash and mend the linen. One of the keepers attends strangers through the different workshops, and is not permitted to take any fee. No one is allowed to converse with a prisoner without having first obtained the consent of the head keeper."—Extracts from the Diary of an English Merchant who visited America in 1809," in "Munsey's Mag., XL: 205.

"A Spectator" writes to one of the papers: "Having lately heard much conversation ... about certain bridges which they propose to build over Harlem River ... it may not be amiss to turn public attention a little that way, so that when the Legislature meet, there be no lack of information. ... One question, shall not, by me at least, be meddling with: viz. whether the rights of those who own the present bridge, extend by construction up and down the river, beyond the limits specified in the grant under which they hold. ... If they do it would be a cruel tyranny to deprive them of their property.—By the by, if they have the privilege of constructing a bridge there, it is to be wished that they would extend their right down to Hell-Gate, and cause a grievous nuisance to be removed, which in the form of a bridge, over which, very few do pass, and under which, scarce any one can pass. ... Before it was erected large ships of war could come up almost to Haerlem Church, and vessels of twenty feet draught, could come up and lie safely before that will. At present a common river sloop cannot get through the bridge, even if the draw were attended, which it is not. Indeed some say it cannot be raised. ... ". if the proprietors above mentioned, have no reasonable objection, that a bridge should be erected at the expense of this city, at Devoe's Point, the cost will, if properly done, be little. ... The reasons why a bridge at this place would be useful, are these:-first, the road to the Navy Yard is a much better road and better than the present road by King's Bridge ... ; secondly, the distance to this bridge not being more than 9 miles and a half, and the distance from thence to Williams's Bridge over the Brooks, not being more than 4 miles and a half, if a fair allowance be made for some few windings, ... the distance from this city to the last mentioned bridge, will not exceed ... 14 miles and a half. Lastly, the people of the town of Westchester must reach Devoe's Point, by a direct road from Lydig's Mills. ... a great cry will be raised against the present proposal, ... it is directly against the interests of several rich and great men, who live along the sound, and who will see with no small concern, a shorter and better communication opened with the eastern States that at present exists.—Further, it is not a shame that hay should be selling at from seven to ten shillings per hundred, when by opening a short and easy communication to the heart of West-Chester County it would, he reduced to five or six, thereby alleviating the expense of cartage, stable, carriage hire, and the like in the city, and putting cash into the pockets of many middling farmers in that County, who might then enter into competition with those who, under present circumstances, have a kind of monopoly."—N. Y. Com. Adm., N 7, 1809. See N 30.

"The Grand Panorama, exhibiting a view of the city of New York and the adjacent country is opened every day (Sundays excepted) from 9 o'clock in the morning till 6 in the evening." It is at the corner of Broadway and Leonard St.—N. Y. Com. Adm., N 8, 1809. For detailed description of the panorama, see Ap 21 and My 29, 1810.

A committee reports to the common council that they have examined, "with considerable satisfaction and pleasure," the index made by John Pintard to volumes 8, 9, 10, and 11 of the council minutes (see § 18), and that they "approve of the style and manner of his performance as admirably calculated to render a reference to the subject, they contain easy and perspicuous." A payment of $228, "being at the moderate rate of 3 Dollars p' day," is recommended. The committee also observes "that from the changeable character of the Board a want of knowledge
The inhabitants of the "upper end of Broad Way," in a petition to the common council, state that "by the late attempt to regulate that part of the City they were put to extreme inconvenience and peril and praying that they might be permitted to fill up the trenches dug for laying down and fixing for that the Board would take some measure to relieve them." Measures for relief are ordered.

The laying of curb-stones in the Bowery to the two-mile stone is finished. Gosman & McComb are paid $600 for the work.

M. C. C. (1784-1813), V: 759, 762.

The street commissioner presents to the common council a deed from Richard Tuttill and wife "for the Streets running through his property near the State Prison, which is presented gratis but upon the condition that the old building he has now erected the Corner of which will be in Greenwich Street shall not be removed by any act of the Corporation for the ensuing five Years." The board agrees to accept the cession and directs the commissioner to survey the streets and place the necessary curb-stones. The road committee is also ordered "to consider of the propriety of opening Hudson Street through the Grounds of Richard Amos."

M. C. C. (1784-1813), V: 760.

Another Spectator" replies as follows to the communication of Nov. 57 (p. 5): "The law, under authority of which the Harlem Bridge was built, passed March 1790. Indeed, it is in the words following, to wit 'that it shall not be lawful for any person or persons whatsoever, to erect or cause to be erected, any other bridge over or across the said Harlem River to Morrisanice.' The North boundary line of the Morrisanian patent, runs down to the Harlem river at Crab island, about three quarters of a mile north of Devoe Point, and therefore, according to the sound of East River. — Although the law authorizing this bridge to be built, passed 1790, the public did not reap any benefit from it, until 1796, when the right was assigned to John B. Coles [see Mr 24 and N 24, 1792], who built it in that year. The same law made it incumbent upon the towns of Westchester and Eastchester, to make a road from the bridge when erected, to Eastchester, and that it be of a width of eight miles, but this duty those towns totally omitted to perform; thus was the owner of the bridge, betrayed into the awkward situation, of having a toll bridge without a road to come to it . . . 'A Spectator,' the writer who has called forth these remarks, seems to think, that it would be of great importance to this city, that a Bridge should be erected by the Corporation at Devoe’s Point . . . — all the saving that can possibly arise to honest citizens and farmers upon this road, will be 1 cent per pound weight . . . and finally, that at this time the public convenience does not require any other bridge across Harlem river to the Southward of Crab Island, and that if their convenience should at any time require such, they ought not to be erected, until the right of the Harlem Bridge Company was purchased at a fair price." — N. Y. Com. Adv., N 30, 1809. See F 14, 1810.

A Spectator editorial, "A New-York Spectator," published in the "History" appears. It is advertised thus: "This day is published by Inskipp and Bradford, 128 Broadway, A History of New-York, In 2 vols. duodecimo, price 3 dollars; containing an account of its discovery and settlements, with its internal policy, manners, customs, wars, &c. while under the Dutch government, furnishing many curious and interesting particulars never before published, and which are verified from a mass of authentic and commodious public documents, the whole being interspersed with philosophical speculations and moral precepts."

"This work was found in the Chamber of Mr. Deidrich Knickerbocker, the old gentleman whose sudden and mysterious disappearance has been noticed. It is published in order to discharge certain debts he has left behind."

In 1843, Irving wrote, from Sunnyside, an "apology" for his history, explaining that he and his brother Peter had commenced it as a parody on Dr. Mitchell’s Picture of N. Y., but that after Peter went to Europe, he had altered it to a comic-history of the
Dutch period and had not felt he was committing "any grievous historical sin in helping out the few facts I could collect in this remote and forgotten region with figures of my own brain, or in giving chorographical attributions to the few names connected to the several Acts of Incorporation," he added: "... my presumptuous trespasses into this sacred, though neglected, region of history have met with deserved rebuke from men of soberer minds. It is too late, however, to recall the shaft thus rashly launched..."

"I will say this in further apology for my work: that if it has taken an unaccountable liberty with our early provincial history, it has at least turned attention to that history and provoked research. It is only since this work appeared that the forgotten archives of the province have been rummaged, and the facts and personas of the old time rescued from the dust of oblivion and elevated into whatever importance they may actually possess..."—Irving's Hist. N.Y., 27, (1849), 311-314. The original MS. of the "Apology" is in the MSS. Div. of the N. Y. Pub. Lib.

The common council accepts a deed from Wm. Gilbert and Betsey, his wife, for Cozine and Gilbert Sts. and orders it to be recorded and filed.—M. C. C. (1784-1813), V: 765.

The common council directs that Peck Slip be filled up to the south line of Front St.—M. C. C. (1784-1813), V: 766.

The common council amends the act to offer a reward of $500 for information concerning the persons who, on Nov. 30, attempted to set fire to "the range of wooden buildings in front Street between Crane Wharf and Beekman Slip."—M. C. C. (1784-1813), V: 766.

The common council appoints a committee "to enquire into and make a Statement of all the monies owing by this Board, and the interest due thereon, the person respectively to whom the same are owing, and also show the amount which will become due in consequence of Contracts already made. Also showing the interest due for the several debts due by the Board were contracted and the amount due on the first Monday of December in each year." The committee is also to "enquire into and State the amount due to the Board for the revenue of this Board for the year and the Amount of Public property disposed of and that the inquiry of the Committee relate back seven years from this day, and that they be authorized to examine the necessary papers and documents belonging to this Board."—M. C. C. (1784-1813), V: 772-73. See also ibid., V: 786.

The annual report of the building committee, now published, shows that the new city hall has already cost $727,916. "Perhaps in two years from the present time, this elegant and stately Hall will be entirely completed."—N. Y. Gaz. & Gen. Adv., D 9, 1809.

Free School No. 1, erected at Chatham St. and Tryon Row on the site of the old arsenal, is opened, and the children are removed to the new building, the first erected by the Free School Society. The resolution of the Common Council (see Jan. 1, 1807), the change in the name of the society (see Apr. 1, 1808), and the gift of land by Col. Henry Rutgers (see Apr. 12, 1807). Regarding the new building, he says: "The Corporation also presented the ground of this edifice, on which was an arsenal [see Aug. 8, 1808], to the Society, on condition of their educating the children of the Alms House gratuitously; and also the sum of fifteen hundred dollars to aid in the completion of the building" (see Aug. 28, 1809).—Cam. Adv., D 16, 1809; L. M. R. K., III: 940. In their fifth annual report in May, 1810, the trustees of the society described the new school as "a brick edifice, 120 feet in length by 40 in breadth."—Ibid., My 9, 1810.

John Stevens informs the common council that "he has been for a considerable time engaged in endeavors to apply the force of Steam to Navigation and claims to be the first in this country whose attempts have reached that desirable end." As he is also "the proprietary of the right of Ferrying from Hoboken to New York," he remonstrates against the petitions of the persons who have applied for the exclusive right of steam ferryage to the Jersey shore and asks the board to consider "his rights and claims to that privilege." This and all other memorials on the subject are referred to Aldermen Bingham, Meier, and Carpenter.—M. C. C. (1784-1813), V: 776. See also N. Y. Times, F 22, 1825. See, further, My 17, 1810.

The street commissioner is directed "to deposit in the office of his Department all Maps, Charts, Books, Plans, Diagrams, Profiles, Contracts, Accounts, papers and vouchers atturining to Streets Roads Wharves Piers & Slip or in any way relating to this City and County and file an account thereof with the Clerk of this Board," and to present at the next meeting "a full and accurate statement of the Concerns of his Office specifying particularly the Ordinances passed and not yet acted upon, the various jobs on hand, the Contracts finished and not settled for, the sums due on the several assessments with a Statement of the accounts of the several Collectors, the Bonds issued in relation to Streets with the time when and object for which they were given together with such other information in his possession as may he necessary to a distinct and accurate information of the Situation of the concerns of his Department." A committee is also appointed "to examine and consider the State and condition of the Department of Street Commissioner."—M. C. C. (1784-1813), V: 779-80. The street commissioner's report was presented on Dec. 18 and referred to a committee.—Ibid., V: 781.

On the common council report that a Counsel to this Board is not required and that the office of Counsellor be and is hereby abolished.—M. C. C. (1784-1813), V: 780.

The corporation of Trinity Church grants to the corporation of the city that part of Canal St. belonging to Trinity Church.—Trin. Min. (M. S.). On Jan. 11, 1810, a notice relating to land wasted for public use for a canal was read, and "Mr. Harison requested to attend to the Business."

Trinity vestry appoints a committee "to provide a Bell and Clock for St. John's Church in this City."—Trin. Min. (M. S.). On Aug. 8, 1811, the bell and clock, procured by Wm. Bayard, were ordered paid for.—Ibid.

The common council passes "A Law For appointing Commissioners of the Alms House and B醫ewell and vesting them with sufficient powers for the better governing and regulating these Institutions," and appoints three commissioners.—M. C. C. (1784-1813), V: 786-87. The ordinance was amended on Jan. 29, 1810.—Ibid., VI: 53.

The common council passes the following resolutions: "Resolved, that for the future it shall be the duty of the Comptroller of this Board, immediately after the Minutes are read of the last Meeting to deliver to the President a paper exhibiting "1st. the Balance of Money in the Treasury.

"2nd. A List of all the accounts &c. audited by him stating to whom due or by whom asked for, amount of each demand and for what services &c. the demands are made. In order that the Warrants may issue to the Board think proper be issued accordingly.

"3rd. A List of places for money shall come from them the Comptroller's office in order that the same may be laid before the Board for their consideration."—M. C. C. (1784-1813), V: 785-86.

A committee of the Humane Society makes a report on the results of its inquiries into the number of tavern licenses, the manner of granting them, their effect upon the community, "and the other sources of vice and misery in this city;" also regarding its visit to the bêdewell. To correct the evils complained of, the committee suggests "the propriety of applying to the Legislature for an act, so to enhance the expense of obtaining licenses, to retail spirituous liquors in the city of New-York, as to diminish the number of applicants for them.

On Dec. 27, the society addressed an appeal to the charitable societies of the city severally to appoint committees to meet each other at the N. Y. Free School on Jan. 10 next, to consider the evils and devise a system to remedy them. The report of the committee and the call for this meeting were published in a pamphlet (1810). See one of these in the N. Y. P. L.

There are 35 engine companies with 247 engine-men, one floating engine, three hook-and-ladder companies with 46 men, seven engineers, and 55 fire-wardsens in the city of New-York.—M. C. C. (1784-1813), V: 791-92. See also ibid., VII: 234.

The piers between Burling Slip and Fly Market are finished.—M. C. C. (1784-1813), V: 794.

The common council resolves "that the Complice employed..."
THE ICONOGRAPHY OF MANHATTAN ISLAND

1810

In the beginning of this year, Robert Fulton published at New York a pamphlet entitled Torpedo War, and Submarine Explosions. In this, he reviewed his torpedo experiments in England and at New York (see Jl. 15 and 20, 1807), and pointed out the advantages and practicability of this mode of warfare as a means of defence for the harbours of the United States. The work included six plates, accompanied by detailed descriptions, showing different kinds of torpedoes and various methods of attack. Fulton estimated that the six "most important and vulnerable Ports" (New York being one) could be fitted out with a sufficient number of torpedoes for $531,000. —See copy of pamphlet in N. Y. P. L.

The whole of Torpedo War was republished in the Aurora Gen. Ado. (Phila.), F 7, 9, 22, 14, 17, 23, 24, and 27, 1810, and the plates and descriptions appeared in the Pub. Ado., Mr. 15, 17, 20, 22, 26, and 28, 1810. On Feb. 9, Fulton sent several copies of his pamphlet to the members of the House of representatives, and offered to lecture before them upon the subject; but, according to a private letter from Washington, the Federal party opposed this, and "The house, contrary to every reasonable expectation decided against hearing Mr. Fulton, which decision is one of the most unprincipled that ever took place in any enlightened body." —Aurora Gen. Ado., Mr. 6 and 9, 1810. Fulton, however, did deliver a public lecture on torpedoes at Long's Hotel, Washington.

—Ibid., F 28 and Mr. 3, 1810.

In this year, the population of Manhattan Island was 96,173. —15th U. S. Census Bulletin (1910). See also the Repertory, D 7, 1810. According to a census taken by order of the common council, there were only 94,760 people in the city and county. —M. C. C. (1784-1831), VIII: 701-2.

Between 1810 and 1812, Poppleton and Bridges made a series of 17 maps showing the shore of the Hudson River from the Battery to 73rd St., and during 1810-14 they surveyed the shore of the East River from the Battery to 26th St. The original maps are filed in the bureau of topography, borough president's office. See also pl. of 86, III: 595.

In this year, a plan of the lots on the west side of Broadway between Vesey and Barclay Sts. was made, showing those belonging to Rutherford, Astell, Rufus King, Roosevelt, and Harrison. —From original in Bancker Coll. (book B-F, folder "Broadway"), N. Y. P. L.

In this year, the heirs of Capt. Archibald Kennedy conveyed the house at No. 1 Broadway to Nathaniel Prime. —L. M. R. K., III: 905; dep. of Pl. 98, III: 590. It subsequently became the Washington Hotel (see 1848). Assessments are made for regulating Hudson St. and Hudson Sq.; Lombardy Park; Spring St. and paving it from Broadway to Bowery; Morton St. from Washington St. to Trinity Church grounds; and Greenwich St. from Charlton St. to Great Kilk Road; also opening Walker St. from Varick St. to Chapel St., and Bridge St. from Whitehall to State St. (and the following year for paving it). —Comptroller's Index to Assessment Rolls, Vol. I.

In this year, a park at Bloomingdale was developed. —M. C. C. (1784-1831), VI: 312, 356.

The Old Circus, formerly called the Olympic Theatre, and later the Tannhaus, at 442 Broadway, dates from this year. —Man. Com. Curr. (1863), 655.

The annual reports of the board of health for 1810-1812 are now preserved in metal file No. 29, city clerk's record-room.

In this year, Bogart's Artillery, New York, was organized. —Chas. S. Clark in the N. Y. Ev. Post, F 26, 1916.

In this year, Thomas Gimbrelde was engraving some excellent 1810 portraits in the stipple manner for the New York publishers, James and William Durell. In 1816, he had offices at 301 Broadway.—Stauffer, Am. Engravers on Copper & Steel, I: 190. See 1814.

In this year, the so-called "Economical School" was incorporated for the education of the children of French emigrants resident in this city. In 1825, its income was inadequate for its support, and the school was closed. —M. C. C. (1784-1831), XVII: 359-55. See further, Jl. 16.

In a letter to "Mr. Macomb," dated Sept. 10, 1810, Dr. Samuel L. Mitchell suggested that the following inscription be placed upon the city hall: "Jos. Libertasque," In publishing the letter on Sept. 20, the editor of the Com. Ado. proposed an amendment, as follows: "Jos et Libertas," or "Justitia et Libertas," or "Justitia Libertatis Pares et Conservatrix." —Dr. Mitchell gave his reasons for his choice of the Latin words.

On Sept. 17, 1810, the building committee, in response to an order from the board, presented "a report on the subject of the City Hall, accompanied with a detailed statement from Mr. John McComb junr the architect, of the progress and present state of that building, of the sums annually expended thereon from its foundation in 1803 and an estimate of the additional sum, that will be requisite for the current year," and the common council resolved to raise money on its bonds to meet the present season's expenses for the hall. —M. C. C. (1784-1831), VI: 345, 359, 341. But the comptroller reported, on Sept. 24, that he was unable to borrow $25,000 on application to several banks and insurance companies.—Ibid., VI: 344. The money was eventually secured from Mr. M. Stauffer, Phila. —Ibid. There were two elaborate plans presented for the building. The plan, conforming with the board's order on Nov. 12, that the copper for the roof had arrived, its cost being $24,451,191; but, the season being so far advanced, the committee proposed leaving the building this winter with "a good shingle covering," and "lay the copper in the spring." The committee is happy to find, that after giving directions to the architect, to go on, in finishing off a Common Council room, a room for the Mayor's office, clerk's office, and the comptroller's office, which are all progressing, the amount of monies received [sic] does not materially exceed the sum of $50,000 appropriated to put the new City Hall under cover with copper." —Ibid., VI: 389.

The finance committee and comptroller were directed to "purchase bills of exchange for payment of the same." —Ibid., VI: 389.

Congress approves the conduct of Pres. Madison in refusing to receive any further communications from Frances J. Jackson, the British minister, because of his "insolent and affronting" expressions regarding the United States government.—Law of U. S., 11th cong., 2nd sess., 508-9.

The street commissioner informs the board that the sum of $444.74 has been expended in "obtaining the triangular piece of ground, at the intersection of the line of property of Mr. Monroe and Cheapside [Hampton] Streets." —M. C. C. (1784-1831), VII: 7. The site, developed in this year (Ibid., 147, 212, 319, 349), later became Lombardy or Bellow Park.—L. M. R. K., III: 970.

The common council decides to borrow $3,570.34 at six per cent, in order to pay Daniel Woolsey and Walter Allen for making piles between Fly Market Slip and Bowing Slip. The piles have been completed in "a workmanlike manner." —M. C. C. (1784-1831), VII: 5-6.

The common council pays Thomas Scott $553.10 for paving the Albany Basin.—M. C. C. (1784-1831), VII: 6.

E. Sargeant, corner of Wall street and Broadway, has for sale The Picture of New York; Or the Traveler's Guide through the commercial Metropolis of the United States—Not by Mr. Knickerbocker, but by a gentleman now residing in this city. Price one dollar." —N. Y. Spectator, Ja. 3, 1810.

Mayor Clinton informs the common council that he has seen a publication in the News papers by Robt Dyde, Yonkooner, stating that there would be a masked ball at Mount Vernon hotel, on the night of the 26th instant, that he had directed the first March of the City to write to Robert Dyde & inform him, that the intended ball was viewed by the Magistracy, as calculated to promote disorder and licentiousness; that said letter was delivered, and that Mr. Dyde's reply was, that it was his intention to hold the hall as advertised. The matter is referred to the committee on laws and ordinances. —M. C. C. (1784-1831), VI: 16. See Ja. 15.
The trustees of the City Dispensary ask the common council to increase its subscription to the institution because their funds are "in a low state." The petition is referred to the committee of charity.—M. C. C. (1784-1831), VI: 10. On Jan. 29, the board agreed to subscribe $125 a year in future instead of $85— Ibid.—V: 51.

The common council passes "A Law for establishing the assize and regulating the Inspection of Bread." This provides that all bread shall bear the baker's initials and be made from "good & wholesome flour or meal," according to the assize published weekly in the newspapers. The city is to be divided into three districts, and an inspector for each district is to be appointed, at an annual salary of $400, who shall daily inspect and weigh the bread baked in his district to see whether it conforms to the regulations. Penalties are provided for infringements of the law.—M. C. C. (1784-1831), VI: 11-15.

A news item, headed "The Tortoise. Defence of our Harbor and City," reads: "Of all the plans suggested for this great end, one which has not yet been published seems deserving of particular attention. It is the invention of counsellor Sampson. . . . It is nothing more than a large scow, which may be made of the commonest materials, and is to carry a battery of 20 or 30 cannon of 42 lbs. caliber. It is so flat that the troops who embark in it can march on board, and prepared with a man-of-war will be in two hours its destination. It is so low that the shot from a ship of war can seldom . . . strike it. It may occasionally use sails, but at all times be put in motion by paddles or wheels inserted in a groove in a central line from stem to stern, which can be worked by the hands employed to fight the enemy. It is in form of a tortoise-shell . . . it is . . . shot proof. Each time a shot strikes it, if it is lowered, the weight falls on a platform, owing to the height of her sides. . . . It can move in silence and unperceived in the night. . . . The comparative expense will be much as a single button is to a suit of clothes."—Columbian, JA 10, 1820.

The apartments of the "Academy of Arts" in the government house are opened to visitors (see Ap 11, 1828).—Columbian, JA 10, 1820.

The common council passes "A Law for the further regulation of Taverns & Boarding Houses, in the City of New York." This prohibits, under penalty, all masked balls in taverns and boarding houses, as they are "of immoral and pernicious tendency, subversive of all just and honourable discrimination of character, and calculated to encourage the profligate, seduce the youth of both sexes and promote licentiousness & disorder." All persons "found masked or otherwise disguised" are to be brought before the magistrates and fined. On the same day, Robert Dyke informed the board that the masquerade planned to be held at his house (see JA 9) would not take place.—M. C. C. (1784-1831), VI: 23-25.

A deputation from the Medical Society (see O 2, 1809) appears before the common council with a request. Fulton proposes and Commissioner Tompkins "soliciting them to purchase the Botanic garden of Dr. David Hosack, that the same may be annexed to the medical institutions of the state; in which application the society requested the concurrence of this Board." By a vote of 15 to 1, the corporation resolves "that the Common Council fully coinciding with the medical society of this city in their opinion of the important benefits, resulting to the medical profession in particular and to the cause of science in general from the Botanical establishment of Dr. Hosack & being persuaded, that the patronage of the legislature will redound to the public advantage & the honour of the state, do most cordially and most respectfully unite with the medical Society in their application on that subject."—M. C. C. (1784-1831), VI: 25. See F 8.

The canal committee presents to the common council an account of the money expended and owed by the board in connection with Canal St. and which is to be assessed upon the persons benefited. It amounts to $5,405.22.—M. C. C. (1784-1831), VI: 29-30.

"The Street Commissioner presented an assessment for the regulating and partially paving Broadway from Leonard Street to the Bowery, which was confirmed & Lewis Angiveau appointed Collector."—M. C. C. (1784-1831), VI: 29.

The city inspector presents to the common council a "Comparative Statement of the number of deaths in this city for the years 1804, 1805, 1806, 1807, 1808 and 1809, with their ages, diseases &c." A comparison of this with the mortality statistics of foreign countries shows that "the city of New York is not only more healthy than any of the great & even moderately sized cities of Europe, but that it may also vie in this respect with several of the States & kingdoms of a much greater degree of perfection & country together." The inspector concludes: " Bills of mortality, in this city are as yet only in their infancy. Some important deductions may, however, be drawn from them even in their present state; and if the Common Council should continue to enforce accurate returns of deaths, they will, no doubt, in the course of some years, acquire a much greater degree of perfection & may become incalculably useful not only to medical professors; but also for various other useful purposes."—M. C. C. (1784-1831), VI: 11-15.

The comptroller presents to the common council the account of Thomas Smith "for a new vain to the new flag Staff amounting to 102-94" and a warrant is issued for the payment thereof.—M. C. C. (1784-1831), VI: 28.

The watch committee is directed to station some watchmen "at Potter's Field."—M. C. C. (1784-1831), VI: 31.

Col. Williams sends Gov. Tompkins a description of "the present state of the defence of this harbor." He says:

1. "The battery off Laight and Hubert Street is ready to receive its guns, and is capable of mounting 16 guns of the heaviest metal."
2. "Fort Columbus on Governor's Island is finished, and capable of mounting one hundred and four guns, of which upwards of fifty are already on the ramparts. This is a regularly enclosed work of masonry, with ditch, counterscarp, cover-tory and glacis, capable of resisting a large siege."
3. "Two tier of platforms in the castle at west point of Governor's Island are finished, each being capable of receiving 26 guns, on a lower platform, eleven French 36 pounders, are already mounted. . . . The whole force of this castle when completed may be stated at 100 Guns, including the terrace on the top."
4. "At Ellis's island there are eight 32 pounders, and the platform is capable of mounting twenty."
5. "At Bellows's island the mortar battery may be ready to receive eight or ten mortars as soon as they can be mounted, but the main work, which is calculated to mount forty guns, is about one half done; it will be completed in the course of the next summer."
6. "Also in the course of next summer the first tier of a castle off the old Battery will be completed, and mount thirty of the heaviest pieces."
7. "There are in the arsenal, between State and Wall Streets 24 pieces of heavy artillery ready mounted on travelling carriages."
8. "For a description of the works at the Narrows, I beg leave to refer to the annexed copy of a letter I wrote to the commissioners on fortifications by their request. . . ."—Hastings, Pub. Papers of Daniel D. Tompkins, II: 2:35-52.

Three members are added to the committee on the fire department "for the purpose of taking into consideration the expediency & propriety of procuring the several fire insurance companies of this city to bear a proportion of the expenses of the fire department."—M. C. C. (1784-1831), VI: 44.

The common council directs the street commissioner "to cause a survey of the ground belonging to the Board called the Collect, to ascertain the quantity of earth requisite to fill it up and to report the same at the next meeting."—M. C. C. (1784-1831), VI: 54. See F 7.

John R. Murray and others petition the common council "that the line within which buildings of stone or brick are to be erected may be extended so as to include Broadway, Greenwich & Washington Streets and the streets running from Broadway to Hudson river, viz Vesey, Bowery, Robinson, Murray, Warren, Chamber, Reed & Duane Streets." The committee to whom the petition was referred reported on Feb. 5 that "for the present, a further extension of the fire line for building ought not to be taken place," and the report was approved.—M. C. C. (1784-1831), VI: 47, 56.

Jacob Morton is paid $350 "for deeds & maps for Hamilton Square."—M. C. C. (1784-1831), VI: 55.

At a meeting of several persons claiming a right in the Harlem
THE ICONOGRAPHY OF MANHATTAN ISLAND

Commons, at the house of John Doughty, at Manhattan Ville, a petition to the legislature and the draft of a bill are adopted. The petition states in part: "That the Harlem Common be a piece of ground of two hundred acres, and lies wholly unoccupied and waste, in consequence of doubts existing whether a division thereof can be made without an act of the legislature."

"And whereas we the subscribers are convinced that a partition of the said commons, by authority of the legislature, so as to vest in each proprietor his first and equal share, to hold the same in severalty, will greatly promote the interest of all those said proprietors, and be of essential advantage to the public, . . .

We do, respectfully pray, that the legislature will be pleased to pass the bill which we beg leave to submit with this our petition. . . ." —Columbian, 8, 1810. See Mr 19.

The committee on laws and ordinances, having been directed on Jan. 29 "to enquire into the necessity and expediency of an application to the legislature respecting the compensation to the Mayor of this city for his official services," reports to the common council that "they are satisfied that the revenues and emoluments of the Mayorship have become so great as to make the compensation of the Mayor already extravagant; and when they consider, that these revenues & emoluments are principally derived from the fees & profits of the Mayor as the Clerk of the Market and from the grants of licences and other sources, which must increase with the population of the city and that the said office of Clerk of the Market is held by the Mayor under the charter and that other part of his revenue are received under the charter or under Laws of the State. They are satisfied also of the propriety of an application to the Legislature on the subject." The board thereupon adopted a resolution and a draft of a letter granting all the licenses which the mayor has herefore been entitled, except those received as "Judge of the Court of Common Pleas called the Mayor's Court," to the city and allowing the mayor, instead, a salary not more than $7,000 nor less than $5,500, the exact amount to be determined from time to time by the common council. The petition and bill are ordered to be engrossed, sealed, and forwarded to the Senate, M. G. C. (1784-1831), VI: 45-46, 54, 60-64. The law was passed by the legislature on March 14.—Ibid., VI: 118. See also ibid., VI: 144-46.

Matthew Clarkson and William Few, in behalf of unfrivous charitable societies, recommend that the prison for solitary confinement authorised by the legislature in 1802 (p. 41, Mr 30) be built, because the promiscuous confinement of suspected and convicted criminals is "highly unfriendly to the morals of those, who were not already depraved." They also consider the great increase of tavern licences "a great evil" and suggest that the mode of granting such licences be revised.—M. G. C. (1784-1831), VI: 55.

The common council adopts a petition to the legislature and the draft of a law permitting the city to raise, by tax, the sum of $15,000 for defraying the expenses for the current year.—M. G. C. (1784-1831), VI: 57-60. The law was passed on March 10.—Ibid., VI: 118.

The street commissioner reports to the common council that he has "caused a survey to be made and the soundings taken of the Collect[see Ja 29], in order to ascertain the quantity yet to be filled, a sketch whereof and the calculation is herewith presented. The soundings were made as deep as a red pole could be made to penetrate, and the calculation made to a horizontal line, one foot, above the present surface of the ice." The calculation shows that 26,400 loads of earth are needed. The commissioner is thereupon directed "to report generally on the expediency and propriety of filling up the Collect."—M. G. C. (1784-1831), VI: 61. See F 12.

The common council grants to the trustees of the African Free School two lots on William St. (Nos. 107 and 161), on condition that a school building be erected within a limited time, and that the property never be appropriated to any other use.—M. G. C. (1784-1831), VI: 47-48, 66-67. See Ap 5.

A committee reports to the common council that the only thing in the way of opening North St. from First to Orchard St. is a rope that was in the possession of Burnell Brown, and it recommends that the street be opened "across the said rope walk & the incumbrances removed." The report is confirmed.—M. G. C. (1784-1831), VI: 68-69.

The title of "President of Common Council" is affixed to the name of the mayor, in the minutes.—M. G. C. (1784-1831), VI: 67.

"The memorial of the medical society of the city of New-York, Feb. 10, praying that provision may be made for the purchase of the botanical garden of Dr. David Hosack [see O 5, 1809, and Ja 15, 1811], together with the residences and communality of the city of New-York; the governors of the New-York hospital, the medical society of the state of New York, and the certificate of Brockholst Livingston, Benjamin Moore, and others, inhabitants of the state; and the memorial and petition of Deols White, and others, students attending the medical school in the city of New-York to the same effect," were read in the state senate and referred to a committee.—Senate Jour., 33d sess., 32. The committee reported favourably on Feb. 12.—See printed broadside in metal file No. 38, city clerk's record-room. An act for the purpose was passed by the legislature on March 12 (p. 6.).

Daniel French, (see N 6, 1809) petitions the common council for a lease of Powels Hook ferry, where he would employ boats moved by steam, on a plan of his own invention." The petition is referred to the committee which is considering the other steam-boat petitions.—M. G. C. (1784-1831), VI: 70-71. See F 26.

The street commissioner reports that he has "taken a general view of the Collect [see F 7] & found, that the mud has risen near to the surface of the water." He is therefore inclined to believe it would not be expedient to make a contract for filling the same. At the same time he believes, it ought to be filled as soon as practicable." The common council thereupon directs him to contract for 10,000 loads of earth.—M. G. C. (1784-1831), VI: 75. On March 12, he reported that the 10,000 loads "had been carted into the Collect," and recommended "that the like number of other loads be filled into it," which was confirmed.—Ibid., VI: 109. See Ap 4.

"Five several petitions of freeholders and inhabitants of the counties of New-York and Westchester, praying that a law may be passed authorising certain inhabitants at their own expense, to erect a free bridge over Haerlem river at Devoe's point" (see N 7 and 30, 1809), are read in the assembly and referred to the attorney-general. The bridge is to extend from Devoe's Point in Westchester to Bussing's Point "on the Island of New-York." The petitioners state that it will facilitate the intercourse from Westchester with the city of New-York, by a more convenient and shorter route, than any now in use."—Assem. Jour., 33d sess., 81, 180. On Feb. 23, Robert Bogardus and others, "freeholders of property adjoining the Haerlem river, in the ninth ward of the city of New-York," remonstrated against "the passing of an act authorising the erection of a bridge at or near Devoe's point," because they were "apprehensive that the navigation of the said Haerlem river will be injured and their private property below Devoe's point deteriorated by the erection of the proposed bridge at that point." This, too, was referred to the attorney-general. —Ibid., 33d sess., 125, 180. The directors of the Harlem Bridge Company, on Feb. 28, also remonstrated against the proposed bridge, and stated the original petitions, stating that the new bridge would interfere with their rights. They asked "that a declaratory act may be passed prohibiting any other bridge being built across the said river within two miles" of their bridge. This also was submitted to the attorney-general.—Ibid., 33d sess., 152, 180. For the attorney-general's report on the subject, see Mr 7.

The city acquires from Wm. L. Waldron the land now comprised in Beach St. Park, at West Broadway and Beach St.—Pendergast, Record of Real Estate (1914), cit., Liber Deeds, LXXXVI: 169. See also L. M. R. K., III: 968.

The governor, on the occasion of Washington's birthday, "the National flag be displayed at the Battery & a salute be fired at sun rise, at noon & at sun sett."—M. G. C. (1784-1831), VI: 84, 250.

On the occasion of the anniversary of the Washingtonian Society, Peter Augustus Jay delivers the oration. Writing to his
father, John Jay, on the following day, the younger man describes the celebration as being the occasion of much exultation among the federalists. He adds: "The Society walked in procession and amounted to more than two thousand. Many Gentlemen kept aloft, but it was one of the most respectable assemblages of people to church that had been seen for a long time. It consisted of Shop keepers, Mechanics, of Men of the middling Class, and of a considerable Number of old Revolutionary officers and Soldiers. Almost all of them possess Influence and can bring to the poll other votes besides their own."—Corresp. and Pap. Papers of John Jay, IV: 326.

The First Presbyterian Church, on Wall St., advertised for proposals to be submitted by masons and carpenters, "for erecting a church and parsonage building . . . one . . ."—Pub. Adv., F 22, 1810. See further, Mr 21.

Because "many difficulties attend the upholding of the Lutheran religion among us," and "inasmuch as the Doctrine and Government of the Episcopal Church is so nearly allied to the Lutheran, and also on account of the present embarrassment of the finances," the congregation of the English Lutheran Church on the corner of Mott and Park Sts. resolves that "its present form of worship and Government be dissolved after Tuesday, the 13th day of March next, and that this Church do from that day forward become a parish of the Protestant Episcopal Church."—Hist. of Church of Zion and St. Timothy, 11. On March 13, the congregation elected wardens and vestrymen, and incorporated the church as "the Rev. William Ward, Warden, and Vestrymen of Zion Church in the City of New York."—Ibid., 12-15. See Mr 22.

In a letter to Judge Peters, John Jay says: "Our political sky still continues to grow more and more dark and threatening. Whether the clouds will quickly disperse and disappear, or whether they portend a storm, is uncertain. The present tempestuous state of the world does not encourage a long series of uninterrupted fair weather. If peace has been and is in our power, it would be mortifying to be involved in war unnecessarily."—Corresp. and Pap. Papers of John Jay, IV: 328.

The committee on the fire department reports to the common council regarding "Aquidneck Coal," that they have "given it as fair a trial as their conveniences would admit, and do find, that in a cabin store (or what is called a large crate Franklin Stove) which will hold near half a bushel of coals, and may be kindled with two quarts of Virginia or Scotch Coal, the Rhode Island or Aquidneck coal to be put on, when the other is well on fire will burn five hours and, if mended and one half peck added, will warm a room 16 or 20 feet square the whole day, and at night, one third of the coal will remain unburnt." The committee recom- mends that the Almoners of the City be authorized to be prepared for burning said coal, as they think it will be a saving to the public," and the report is confirmed.—M. C. C. (1784-1813), VI: 90.

A committee, chosen by the owners and occupants of the houses and lots in the vicinity of Canal St. at a meeting held at "Liberty Hall in the fifth ward" on Feb. 17, complains to the common coun- cil that their water is "deep and dark," and that the heavy assessment that must be proportioned and levied on them, according to the limited Principles under which the Com- missioners . . . deem themselves bound to Act." The committee has been appointed to confer with the board "in order to point out the most eligible mode for an application to the Legislature, so as to extend the powers of the Commissioners . . . that they may be enabled to assess a proportion of this heavy and burdensome assessment on the Citizens at large, still calculating upon the greatest part to be apportioned, as nearly as may be, upon the Proprietors intended to be benefited thereby, according to the advantage which each shall be deemed to acquire."

The petitioners remind the board that their "Proceedings for years past, with respect to this Collect or Fresh Water Pond and contemplated Canal and Tunnel," have "been directed to the completion of the whole Plan, and must therefore have viewed the same as a matter in which the whole City were materially interested, and of course bound to subscribe to." The petitioners also point out that "many of the Inhabitants in that neighbour- hood have every interest to guard; it consists of substantial Shop keepers as would unavoidably fall upon them according to the present system of the Commissioners." Lastly, they observe that it would be very unjust to compel them "to pay for the purchase of the soil through which this street at present passes," because "the

Proprietors of the property readily offered tocede the land, if the Canal had been allowed to pass through the streets already laid out," but, as it was deemed that "a straight and wide street would be more ornamental and dignified to the City at large, as well as it would tend more to the general health from the state of the low and mucky grounds; it certainly is therefore but reason- able that the Citizens at large should have the charge of the expense for this very desirable object, and more especially as the Situation of these grounds have required uncommonly extensive operations. . . ."—From the original petition in metal file No. 40, city clerk's record-room. The petition is referred to the canal committee.—M. C. C. (1784-1813), VI: 87. On March 12, the committee reported favorably and suggested that the proposi- tion he made for a lottery, "the proceeds of which to be applied towards defraying part of the expense of Causal Street, and thereby mitigate the assessment aforesaid." The report was confirmed.—

Ibid., VI: 107. See also, Ibid., VI: 190-93. See My 28.

Benjamin Waldron petitions for "permission to run out Fice [sic] nets at Bellevue Dock."—M. C. C. (1784-1813), VII: 86. On March 12, the common council resolved it was inexpedient to grant the petition because "the right of the Corporation to make said grant is by no means clear," as "the navigation of the East river would necessarily be somewhat obstructed thereby and lastly because the consideration proposed by the petitioner is too insignificant to induce the interference of this Board in the present case."—M. C. C. (1784-1813), VII: 104-5.

Daniel French (see F 12) invites the common council "to attend to morrow at 2 o'clock to see the operation of his Steam Boat to Courtlandt Street wharf."—M. C. C. (1784-1813), VI: 89.

Sundry inhabitants of the Eighth Ward petition the common council that "a bridge might be erected over a Brook, at the corner of David & Henry Street, and that a lamp might be placed there." The matter is referred to the alderman and assistant of the ward "with authority to comply with the prayer of the petition."—M. C. C. (1784-1813), VI: 86.

Christian E. Zoeller and John M. Cooper are appointed city surveyors.—M. C. C. (1784-1813), VI: 86.

Mar. 26

Father Anthony Kohlmann, S. J., buys the land now bounded by Fourth and Fifth Aves., 50th and 51st Sts., directly opposite the Elgin Botanical Garden, for the Catholic college (see 1808). The school was closed in 1813-14.—Farley, Hist. of St. Patrick's Cathedral, 61, 111. See My 1. For Father Kohl- mann's description of the college, see S 14; also 1814.

The attorney-general makes a report regarding the proposed bridge across Harlem River at Devoe's Point (see F 14). He states that it "does not interfere with the legal rights vested in the Haerlem bridge company," but adds that "as a road from the proposed bridge at Devoe's point, to New York, will be indis- pensable to render the said bridge useful; and as by the charter of the corporation of New-York the expense of laying out, opening, making and keeping in repair such road, and probably the expense of sustaining the proposed bridges, will devolve on the said cor- poration (common council, it is worthy of the consideration of the honorable the legislature, whether it would be reasonable to impose those burdens on the said corporation, without their consent." This report and the various petitions are referred to a "select committee."—Assemb. Jour., 33d sess., 180-81. On March 12, the committee advised that the petition for the bridge at Devoe's Point, and the petition of the Harlem Bridge Co. for a declaratory act (see F 14), ought to be rejected, and this report was approved by the assembly.—Ibid., 33d sess., 237.

Jacob Radcliff enters upon his duties as mayor, in the place of De Witt Clinton (see F 22, 1808).—M. C. C. (1784-1813), VII: 93.

The common council directs the street commissioner to have "the Public ground fronting on Chatham Street between the building occupied by the New York Free School and the Jail," and "the ground near the New arsenal and Albany Avenue be- longing to this Corporation" surveyed and apportioned into lots.—M. C. C. (1784-1813), VI: 96.

A petition from sundry inhabitants of Peck Slip "that said slip may be filled up, so that Front Street may be carried across it, and two remonstrances of the same petition are referred to a committee.—M. C. C. (1784-1813), VII: 94.

The committee on the flagstaff and Battery make the follow- ing report: "That they consider the proper keeping of so elegant and public a walk among the first objects of attention and are
persuaded that every care and expense bestowed in this respect will, with the highest approbation, be noticed by the Citizens.

Your Committee, therefore, recommend that the Flag Staff be rented to some discreet and proper person for such sum and under such conditions as to protect the walks, grass and trees from injury and to remove thereto every nuisance as may seem meet. The report is approved.—M. C. C. (1784-1831), VI: 100-1.

Permission is given to carry the Manhattan water pipes "through the public grounds at the Battery to the Fort erecting at that place by the United States."—M. C. C. (1784-1831), VI: 96.

The common council passes a new ordinance for opening Walker St.—M. C. C. (1784-1831), VI: 100.

Trinity vestry orders that the committee of leases "dispose at public auction of the Lots of Ground near the State Prison belonging to this corporation, supposed to be nine in Number."—Trin. Min. (M.S.).

The name of the "Society of the Hospital in the City of New York, in America" is changed to "The Society of the New-York Hospitals."—N. Y. L. (1810), ch. 12.

The legislature passes "An Act for promoting Medical Science in the state of New York," which provides for the purchase by the state of Dr. Hosack's Botanic Garden. The commissioners of the land office are to appraise the garden, exclusive of the plants and shrubs, and the attorney-general is to search Hosack's title and secure from him a deed for the whole property. If both the appraisement and the deed are satisfactory, five commissioners named in the act are authorised to raise the money by lottery provided that the lottery shall not start before all others heretofore authorised shall have been drawn. The garden is to be under the supervision of the Regents and to be maintained, without future charge to the state, "for the benefit of the Medical schools of this state."—Laws of N. Y. T. (1810), chap. 50. For the report of the apptees, see J. 5.

Henry Aldworth having found, as he believes, "a mine, on his land, at Newton Long Island, containing Coal," but being prevented from digging "by the water in the Pitt," petitions the common council for the use of one of the fire-engines for a few days. The board authorises the committee on the fire department to consider the request.—M. C. C. (1784-1831), VI: 102.

Uziel W. Freeman is appointed a city Surveyor.—M. C. C. (1784-1819), VI: 110.

John McComb, Jr., opens an account-book of mason work done at the Lower Battery.—See the original MS. vol. at the N. Y. H. S.

The corporation and overseers of Harvard College accept an amendment to the charter of the college admitting laymen to the board of overseers.—Ritchel, in Harv. Hist., 133-36, by Wm. Roscoe Thayer, in Universities and Their Sons (1898), 78-79.

Two petitions from the proprietors of Harlem commons asking for the partition thereof (see F 3) are read in the state senate. A bill for the purpose is introduced, read twice, and referred to a committee of the whole.—Senate Jour., 33d sess., 111. The bill was passed in the senate on March 23.—Ibid., 33d sess., 121. On the same day, it was read in the assembly.—Assemb. Jour., 33d sess., 291. It was read a second time and committed to the whole house on March 25.—Ibid., 33d sess., 295. On March 26, certain "fireholders and inhabitants of the township of Haerlem" asked that the Commons be not partitioned.—Ibid., 33d sess., 313. For the final action of the assembly on the subject, see Ap. 5.

"This some improvement in lighting this populous city is of great importance, to the public," the common council authorises Alexander Andrews to import 900 newly invented burners and reflectors with which to make trial on the city lamps.—M. C. C. (1784-1831), VI: 115-16.

The corner-stone of the new Presbyterian Church in Wall St. is laid.—N. Y. T. Spectator, Mar 24, 1810. The building was opened for worship on Aug. 11, 1811 (q.v.). The new edifice was built on the site of the first one, which was erected in 1719 (q.v.), and enlarged in 1748 (q.v.). It was of brown stone, having the front ornamented with columns of the same stone, in "demi-relief," and with Corinthian capitals. The spire was ornamented with columns to correspond, and was surmounted by a cupola and gilt vane. There were private vaults in the ground surrounding it, and the yard was enclosed with a handsome iron railing.—Goodrich, Picture of N. Y. (1853), 240; Greenleaf, 174. See also L. M. R. K., III: 951; and PL 104 and 111, Vol. III. The building stood until 1854 (q.v., S 15), when it was destroyed by fire. For an interesting history of the First Presbyterian Church, see Dr. Hall's article in 2and Ann. Report, Am. Scien. & Hist. Pres. Soc. (1917), 657-667.

John Scudder, proprietor, informs the public that "the New American Museum, No. 21, Chatham-street, is now open .

and will continue open every day in the week."—Columbia, Mr 21, 1810. See also ibid., Je 12 and Ji 11, 1810, and descrip., of PL 93-5, III: 584. See also My 5.

Zion Church (see F 23) is consecrated according to the rites and ceremonies of the Protestant Episcopal Church.—Hist. of Church of Zion and St. Timothy, 16. See also L. M. R. K., III: 334.

In retaliation for the act of March 1, 1809 (q.v.), Napoleon issues the Rambouillet decree, declaring that "all vessels navigating under the flag of the United States, or possessed in whole or in part by any citizen or subject of that power, which, dating from May 20, 1809, may have entered or shall enter into the ports of our Empire, our colonies or the countries occupied by our armies, shall be seized, and the products of the sales shall be deposited in the surplus fund."—Anderson, Const. & Docs., etc., 396-97.

"An Act for the further support of the New-York Hospital," passed by the legislature, provides that "there shall be paid to the treasurer of the New-York Hospital ... out of the monies arising from the duties on goods sold at auction in the city of New-York," $3,500 a year.—Laws of N. Y. T. (1810), chap. 88. This provision was repealed by the fifth section of "An Act respecting navigable communications, between the great Western and Northern Lakes, and the Atlantic Ocean," passed April 15, 1817.—Account of N. Y. Hospital (1820), 59-51.

The common council orders "that for the preservation of the granite in the park, the Commons of Harlem, by whom the same was given in charge, be requested to prevent the assembling of the military in the park until the further orders of the Board."—M. C. C. (1784-1831), VI: 170.

The common council resolves that Washington St. be opened from Jay to Hubert St.—M. C. C. (1784-1831), VI: 123-24.

Edmund Harris requests the common council for permission "to have an outer stand in front of the City Hall," but the board orders that "the petitioner have leave to withdraw his petition."—M. C. C. (1784-1831), VI: 120.

In their annual report to the legislature, the Regents say: 28 "The college of physicians and surgeons, considering its infancy, is in a highly respectable condition, ... A house, with a lot of ground, in Magazine-street, has been purchased, and suitable lettings for it are made for the college..." —Assemb. Jour., 33d sess., 332-33. See 1813.

The legislature grants $4,000 to the Free School Society for 30 the erection of "suitable accommodations for the instruction of poor children."—Laws of N. Y. T. (1810), chap. 110. See also Com. Adv., My 9, 1810.

The common council passes a new "Law for the due observance of the Lord's Day called Sunday."—M. C. C. (1784-1831), VI: 133-36. On April 16, Hector Scott and Divie Bethune remonstrated against the indecent practice of persons bathing in the day time, in the river near their dwellings," and suggested that this law be amended "so that no person shall bathe within a line commencing at and including the dock built by John Townsend on the Hudson River." The request was agreed to.—Ibid., VI: 167. The address of Townsend, a merchant, was 47 Warren St.—City Direc.

The common council leases to Gilbert Dean "the building at the Fire Staff on the Battery" for one year beginning April 1, 1810, at an annual rent of $500. In the agreement signed by him Dean promises that he will "take the charge of and well & faithfully attend to the grounds and premises South and West of State
The assembly passes a resolution granting permission to the proprietors of Harlem Commons (see F. 3 and Mr. 19) to present a bill for the said commons, and the legislature at their next session; provided such proprietors shall give public notice of their intention to present such bill, in two of the public newspapers, printed in the city of New York, six weeks successively, prior to the presenting of such bill.

"Assem. Jour., 333 sess., 196-97. The senate concurs in the resolution on the same day.—Senate Jour., 333 sess., 18."

The legislature grants $1,500 to the trustees of the African Free School for the erection of a school building.—Laws of N. Y. (1810), chap. 192. See F. 7.

An example of "Expeditious Travelling" at this time is that of a man who left New York at 5 A.M. on this day and arrived in Philadelphia at 7 P.M. "We are arriving to a style and celerity of travelling which brings, as it were, the two cities of Philadelphia and New York very near to each other."—Com. Adv., Ap 11, 1810.

The common council passes an ordinance providing for the better cleansing of the streets. The city is divided into two districts for the purpose, and two superintendents are chosen whose duty it is to hire scavengers to clean the public grounds and cart away all dirt in the streets. Householders and the persons in charge of churches, schools, etc., are required to have their premises cleansed at stated times, and offenders are fined for the same.

"We. . . . The common council director of repairs to place bells on the Duane Street, Catharine Street, and Corners Hook markets.—M. C. G. (1874-1875), VI: 175, 179."

John H. Conlont announces that he has "removed the New York Gardes to that pleasant part of Broadway, No. 355, between Leonard and Sugar Loaf [Franklin]-streets," on the west side of Broadway. He serves all kinds of ice-cream and other refreshments.—Merc. Adv., Ap 18, 1810; Merc. Com. Coun. (1815), 144, 600. For earlier locations, see Oct 26, 1809.

"The Panorama of the city of New-York [see N 8, 1809], which has so much excited the attention and approbation of the public, will this evening, for the first time, be exhibited by Candle Light, and so continue during the summer season. This painting forms an entire circle. The spectator standing in the centre, views it from an eminence of 166 feet above the level of Broadway, near St Paul's Church. It is 25 feet in height, and 156 feet in circumference, and is on a larger scale than has ever been seen in the United States, and equal to any now exhibiting in Europe."—N. T. Com. Adv., Ap 21, 1810. Cf. the description of May 29.

The common council agrees that Morton St. be opened, because "it would be a public convenience, particularly to the inhabitants of the village of Greenwich."—M. C. G. (1874-1875), VI: 176.

An advertisement reads: "To commence on Tuesday next [May 1], Steam Boat Ratiron, will sail every morning at 6 o'clock precisely from the north side of the battery for Elizabethtown Point, Perth and South Amboy, (By thursday excepted) and return again the same evening, leaving South Amboy at one, Perth Amboy, (Brighton) at two, and Elizabethtown Point at or about five o'clock on the days of her sailing. Stages are furnished to meet Passengers for Philadelphia at each of the above places. . . . Breakfast, Dinner, and Tea, on board as usual."—N. T. Even. Post, Ap 27, 1810. See Jl 26.

Congress passes "An Act to establish Post Roads." These roads, throughout all the states, are described in the act. Those in and near N. Y. City are:

THE ICONOGRAPHY OF MANHATTAN ISLAND

1810
From New York city, by Brooklyn, Jamaica, Hemstead, Apr.
Merrick, South Oyster Bay, South Huntington, Islip, Patchogue,
Fireplace, Moriches, Westhampton, Southampton and Bridge-
hampton, to Sag Harbor.

From New York, by Kingsbridge, Yunkers, Greensburg,
Mount-pleasant, Hampton, Philadelphia, 
Youshtown or Niagara.

May
Congress excludes French and English war-ships from American
waters.—Laws of U. S., 11th cong., chap. 56.

Congress passes an act appropriating $666.66, with interest
from March 1, 1792, to compensate P. C. L’Enfant “for his ser-
vice in laying out the plan of the city of Washington.”—Acts
of Cong., 1st sess. of 11th cong., chap. 62.

The “New-York Literary Institution, opposite to the Botanic
Gardens [see Mr], is now opened.”—Com. Adv., My 1, 1810.

See, further, S. 14.

A Visitor” writes to one of the newspapers concerning the
“American Museum,” saying: “This recent establishment in
Chatham-Street, opposite the New-York Free-School, promises
to become an honour to this City. The selection, preservation
and arrangement of the various subjects of Natural History, do
infinite credit to the taste, skill and judgment, of Mr. Scudder,
the proprietor. Most of the subjects are secured in elegant
glass cases, the appropriate arrangement of which, together with
the extreme neatness and propriety of the apartment, greatly
enrich the education of the spectator.

The object which most attracts our notice is a white Arctic
Bear, in the highest preservation, a sight of which, alone, is worth
more than the whole charge, (a quarter of a dollar) of admission.

Parents will find this Museum an instructive school to
teach their children to behold and admire the marvelous works
of creation. — Com. Adv., My 5, 1810. See also ibid., O
15, 1810, and My 15, 1812.

Dr. Hosack petitions the common council to release him from
the payment of his quit rent of 16 bushels of wheat per annum
on his botanic garden so that he may convey it to the state free
from all incumbrances.—Hosack, Statement of Facts relative to the
Estab. and Prog. of the Elgin Botanic Garden (1811), 41-42;
M. C. C. (1784-1811), VI: 186. On My 21, the board decided that his
request be granted on condition that he pay the city $255.71,
the value of the wheat.—Ibid., VI: 207;

The common council passes an ordinance imposing a $5 fine
upon any one who shall wilfully cut down, break, remove, destroy,
or in any way damage any tree in the public streets of the city
without the consent of the alderman and master of the ward.

—M. C. C. (1784-1811), VI: 188.

A reader complains in one of the newspapers of the “gay young
men” who ride and drive through the streets at a reckless
pace and endanger the lives of other citizens. “So great is the
danger of taking an afternoon’s airing in any carriage, that many
invalids are frightened at the hazard they encounter on the

At no period, for a great number of years past, have the
residents of New-York witnessed such numerous and extensive
events of the increase of wealth and prosperity in the city as
the present. At no time within our recollection have we seen
so many improvements in streets and buildings progressing.
Almost every street in the city is lumbered with the rubbish of
cases, which are pulled down, made into male rooms or
edifices of brick. New streets are opened; old streets are extended, paved and ornamented with trees;
churches and other public buildings are erecting; and the whole
face of the city exhibits the appearance of active business and
growing population, riches and great prosperity. Who can con-
sider these circumstances, notwithstanding the backined com-
plaints of hard times, commercial depression, and universal calam-
ity, without feeling a glow of patriotic satisfaction, and grateful
consciousness of the superiority of our situation over that of the
unfortunate and oppressed nations of Europe!” —Columbian,
My 9, 1810. See My 23.

17

About twelve months ago, our citizens were much flattered
with the prospect of having a safe and commodious passage across
the East River, by means of Steam Ferry Boats; a company
of gentlemen actually subscribed to the amount of sixty thousand
dollars, to complete the establishment; but the last elections
for members, of the corporation gave a federal majority, since
which time, delays and embarrassments have been presented to
every advance on the part of the subscribers. finally the
feds . . . rejected the whole plan. Thus are the citizens doomed
for the present to risk their lives and suffer the inconveniences of
one of the worst ferries in the United States.” —Columbian, My
17, 1810.

Street Commissioner Stillwell is granted leave of absence for
21 days in a few days that he may go to Philadelphia and examine
some “hydraulic improvements” there and make “such drafts
as might be useful to this city.” —M. C. C. (1784-1811), VI: 202.

An Old Man” writes to one of the newspapers: “to in-
dulge in the exercise of walking, induced me two weeks since, in
order to determine to go through every street in this city. I have hobbled
through all the principal streets. As far as I went, my astonish-
ment was continually excited at the great improvements that
were going on—I counted 432 houses and stores that were began
this spring, and now going up; and from inquiries of Master
Carpenters and Masons, who had ascertained nearly the whole
number of new buildings that were now in a state of forward,
I was informed that the number was between six and seven hun-

1810

The buildings upon an average will not cost less than 3000 dollars
each (exclusive of the City and Washington Halls) amounting
to the enormous sum of three millions of dollars besides 3 mill-
ions for the foundation of the ground. Indeed ten or twelve
masons and carpenters are employed on each house, making a
sum of 6000 mechanics, besides labourers, now in employ at these two
branches of business. When I contrast this state of things with
the situation of New York on my arrival, I am almost inclined to
believe that in a truce I have been insensibly thrown upon some other parts of the globe.

It is said that the new City Hall will cost upwards of half
a million, and Washington Hall nearly one hundred thousand
dollars. Beside the above there are several Churches building in

The commissioners for laying out Canal St. inform the com-
mon council that “the amount of the verdicts of the justices for
ground & buildings wanted for Canal Street was $102,901 55/100
which verdicts were confirmed by the court on the 25th day of March
last, excepting the verdict in favour of the heirs of Anthony Lisen-

1828

Panorama, No. 356, and 352, Broadway, Will be elegantly
illuminated every evening in the further two thousand feet
of this street, and every house with the surrounding country for ten miles is
correctly delineated—it is exhibited in a building erected for the
purposes, 186 feet in circumference [cf. Ap 21], and 35 high,
the spectators view the whole city according to scale, 170 feet
above the level of Broadway, at St. Paul’s Church, from which
place when they see at one sight St. Paul’s Church, St. Peter’s do.
College, Windmill at Hoboken, Hoboken Ferry, Hamilton’s
Monument, St. John’s Church, Greenwich do. Hospital, Bredel-
New City Hall, Jail, Ball Alley, Brick Meeting, Mount Pitt,
Third Presbyterian Church, Rhinelander’s Sugar House, Bel-
divere, Navy Yard at the Wallabout, Mr. Odell’s House, St.
George’s Chapel, Brooklyn, North Dutch Church, First Baptist
Church, Greenwich do. Hospital, Brick Church, St. John’s 
Presbyterian Church, Fourth Presbyterian Church, German
Luth. Church, Highlands of Neversink through the Narrows,

Ground, Staten Island, N. Y. City Library, Custom House, First
Presbyterian Church, Grace Church, Trinity Church, City Hotel,
Giblet Island, Ellis’s Island, Mouth of the Kils, Communi-
pau, Shakespeare’s Gallery, Broadway, Park, Mechanick Hall, Com-
mercial Coffee House, Livingston’s Mill, North River, City of
Jersey, Paules Hook, Bergen Church, Refining Company’s Sugar
House, Lutheran Church Frankfort Street, North and East
River, &c.

This Panorama is 3000 feet longer than the battle of Lodi,
or Annandria, and equal to any [in Europe].” —Com. Adv., My
29, 1810. See also Columbian, O 16, 1810.

The common council passes the following resolution: “Re-
solved, that the ground in front of the United States arsenal be levelled and regulated under the direction of the Road Committee, and that they be authorised to dispose of the old building remaining thereon and to have so much of the ground enclosed from ornamented fence and planted with trees, as they may think proper."—M. C. C. (1784-1831), VII: 229.

The common council resolves to present a "regimental colour or standard" to the Third Regt. of Artillery, having already made presentations to the First and Second Regts. The committee recommending the action calls attention to the fact that "the artillery Corps . . . have peculiar claims to the patronage of the Common Council, in as much as their contemplated services are more local and in case of maritime or naval attack, would be more important to the defence and security of the City than any other corps."—M. C. C. (1784-1831), VII: 220.

The common council passes a "law to regulate the driving of horses, carts & carriages in the City of New York," house of Grand and Vesey Sts. This provides that no person shall ride or drive a horse "on a canter or gallop" or faster than "a slow trot or pace, not exceeding at any time the rate of five miles per hour;" that horses shall not be driven tandem "otherwise than on a walk;" that all wagons, carriages, etc. shall slow up to a walk in turning corners and while passing churches during services on Sunday; that all carriages shall be numbered, and be driven in an orderly way; and that no timber, planks, or poles, longer than 35 ft., shall be carried in the carts. Fines are to be imposed for infringement of these regulations.—M. C. C. (1784-1831), VII: 225-25. See also N. Y. Gaz. & Gen. Adv., Je 7, 1810.

The common council directs the superintendent of repairs to cause "a gate to be erected in front of Bridge Street leading to the front to cause the shed on the Battery erected by Andrew M'Laughlin to be worth removed."—M. C. C. (1784-1831), VII: 229.

The common council passes a law "to prevent the vending or exposing for sale tin plate ware in any of the public streets or slips in the city of New York."—M. C. C. (1784-1831), VII: 226-27.

The appraisers appointed under the act of March 12 (5:9) reported the valuation of the botanic garden belonging to David Hosack, commonly called Elgin, with the appurtenances, situated in the ninth ward of the city of New-York, containing, according to a survey thereof upon oath, nineteen acres, three rods and thirty eight perches. And taking into consideration the delay of payment resulting from the mode adopted by the legislature (which we consider as equivalent, upon an average, to a delay of five years and a half), they estimate the value of the property at $105,137—Hosack, Statement of Facts relative to the Estab. and Prog. of the Elgin Botanic Garden (1811), 42-43. See also the letter of June 6 from Dr. Hosack to Abraham Van Vechter, in Emmet Coll., No. 11180. This estimate was regarded as excessive (see Je 11). See also Je 11, S 24.

The price of the Jamestown fixed at $7,000 per annum.—M. C. C. (1784-1831), VII: 236. See F 5.

A "memorial from Elias Boudinot and others proposing to lease the ferry from this city to New Jersey and establishing thereon steam boats" is read in common council and referred to the steamboat and ferry committees.—M. C. C. (1784-1831), VII: 231. Another communication from the same people on the same subject was received on July 23—ibid., VII: 239. They also had petitioned in 1809 (9, 5, JI 17).

In a communication to the press Regarding the recent appraise-ment of Dr. Hosack's botanic garden (see Je 5), "T" says: "How the appraisers could estimate the botanic garden at this sum, particularly as the plants, by law, are to form no part of the estimation, is really inexplicable. That it is greatly overrated must be evident to any person at all acquainted with the value of propriety in the vicinage of the garden. And this fact will show it incontestibly, that the public ground on which the powder-house is erected, which is two lots only above Dr. Hosack's, together with the expense of clearing the land, building the magazine, stable, house, and the appendages, which are all surrounded by a high wall, cost the state, when completely finished, $9,500 only and less than a tenth part. . . . If a botanic garden be necessary to the state, one may be established in the neighborhood of the city, which would answer every public purpose, for, at the utmost, one fourth of the above appraisement. . . ." (For purchase and sale, see L. M. R. K., III: 946.)

"One hundred and three thousand dollars would be sufficient to establish six extensive charity schools or to found a university. It would be sufficient to turnpike the whole island of New-York. I would purchase 10,000 stand of arms for the militia, or nearly complete the fortification of our harbour. It is more than the university at Schenectady cost, and is within a trifle of the expense of building the capital at Albany. . . ."—Columbian, Je 11, 1810. See Je 13.

The "New York Museum," at 166 Greenwich St., cor. of Dey St., was one of the attractions of this period.—Columbian, Je 19, 1810.

In answer to various complaints that the appraisement of the botanic garden is excessive, one of the newspapers says: "The valuation of $105,000 payable at the distance of five years and a half will not give more than the value of about 69,000 dollars. This is the circumstance which makes the valuation appear high, when it is not in so fact. The state could not indeed that Doctor Hosack should sell this property at a cash price, wait five years, without interest for the money, and make a present of the plants into the bargain. Money will double itself in about 14 years, it is clear therefore from arithmetic that the amount of the valuation is less than 69,000 dollars, which is a sum no person would deemed excessive. . . ."—N. Y. Ev. Post, Je 13, 1810. See S 44.

The common council resolves that a census be taken of the persons residing in the city of New York and qualified and of sufficient ability and understanding to serve on juries in the several courts mentioned in the act entitled 'An act for regulating trials of juries and the returning able & sufficient jurors' passed the 31st March 1801; and that two fit and discreet persons be appointed in each ward of the said city to take the census in such ward accordingly." The census is to be completed in 60 days. The last one was taken in 1806.—M. C. C. (1784-1831), VII: 240-42. See also ibid., IV: 256.

The common council agrees that piers be built in the Corporation Dock and the Duane Street basin and that a basin be made at the foot of Spring St.—M. C. C. (1784-1831), VII: 243, 245.

Sunday inhabitants petitioning the common council to extend the payment of Broadway may be continued to the Art Bridge. The matter is referred to the road committee.—M. C. C. (1784-1831), VII: 273. Probably the stone-arch bridge is meant.—L. R. K., III: 926.

Inhabitants of the Ninth Ward complain to the board that the hill near Harlem Heights is so steep as to be unsafe for travelers.—M. C. C. (1784-1831), VII: 250.

John Pantick informs the common council that he has for-warded "the indexes of their minutes agreeably to the report of their Committee of the 20th November last [9, v.]," and requests payment therefor. He was paid $300 on July 2.—M. C. C. (1784-1831), VII: 259, 271.

The common council receives a communication from Samuel Russell, William H. Ireland, and Daniel J. Ebbets, commissioners for laying out Canal St., in which they state that they have "laid out the said Canal Street—beginning at the East side of Col-umnia Street eighty six feet. North and East from where Pump Street is reputed to meet Collect Street and two hundred and seventeen feet, South & West from where Hester Street is reputed to meet Collect Street, and running from thence a straight course, One hundred feet in width, throughout in the direction of North forty two degrees West, until it meets the Hudson River beyond West Street, so that the North East line of said street strikes the centre of Purchase, or the South west corner of Lorton's four thousand two hundred and thirty five feet in length on the North East side and four thousand two hundred & eighty seven feet seven inch and one inch, on the South west side of said street and they have caused monumental stones to be placed at the corner of the principal intersecting streets with the elevations above high water marked on the same, and have likewise, caused maps to be made of said streets in which are marked the distance from one intersecting street to another, with the angles at such intersections with Canal Street, with such explanatory notes, as are deemed necessary, accompanied with profiles of the same, on which are marked the elevations from High Water at the intersecting streets with Canal street, with such field notes and eludcations as the nature of the case was deemed to require and
THE ICONOGRAPHY OF MANHATTAN ISLAND

The Commissioners have also made and completed according to their best judgment a just and equitable assessment of all the expense for laying out & opening the said Canal Street and have caused copies of the same to be filed of [on] record in the office of the Clerk of the City and County of New York together with a map and profiles of the said street.

The Commissioners have also in pursuance of the said act, caused notice to be given by advertisement in five of the Public Papers printed in the City of New York and by hand bills to all persons interested in the said assessment to state their complaints or objections in writing to the Commissioners within the period of one calendar month from the date hereof. . . . The common council orders "that the map and profiles be filed with the Comptroller."—M. C. C. (1784–1831), VI: 262–63. See also Columbian, Jl 5, 1810.

On Aug. 26, 1810, a law was passed imposing a five dollar fine for bathing "in the waters of the East or Hudson rivers adjacent to any ferry stairs or to the Battery."—Ibid., VI: 236.

The common council passes "A law to prevent disorderly assemblies of persons in the City of New York." It states that "Whereas the constitution & laws of this state, the free exercise and enjoyment of religious profession & worship, without discrimination or preference, shall for ever be allowed within this state to all mankind, provided that the liberty of conscience thereby granted shall not be so construed as to excuse acts of licentiousness or justify practices inconsistent with peace and good order; And whereas the practice of assembling together persons of all descriptions and characters in the park and other public places of this city has been productive of and calculated to extend, which is inconsistent with the preservation of peace and good order; And tends to licentiousness and to degrade and bring into contempt and ridicule all religious worship; And whereas those places and the public streets of this city are wholly unfit for religious assemblies, and are, by law appropriated to other purposes," the board orders "that no assembly or assemblies of persons shall be permitted, under the pretended public worship in the park on the battery, or in any of the public markets or streets of the said city, or in any other place in the said city laid out and appropriated for the common use and benefit of the citizens. Fines are to be imposed for infringements of the law."—M. C. C. (1784–1831), VI: 268–69. The law was amended on Aug. 6.—Ibid., VI: 366–7.

The watch is increased to 8½ cents per night and that of the captains and assistants raised "in the same ratio."—M. C. C. (1784–1831), VI: 370.

The Independence Day celebration is "more splendid than any . . . before witnessed in this city." Salutes are fired and bells rung at sunrise, noon, and sunset, and the ships in the harbour display their colours all day. The "uniform corps" assembled on the Battery at 7 o'clock and after a review, paraded through State, Whitehall, Beaver, Broad, Wall, Pearl, and Beekman Sts., down Broadway, and by way of Partition and Greenwich Sts. back to the Battery where they were dismissed after firing a salute. The Washington Benevolent Society assembled on the "College-Green" at 10 o'clock and at 12 they were joined by the Hamilton Society, and both, accompanied by banners and bands of music moved in elaborate procession through Robinson St. to Broadway, round Bowling Green, through Beaver, Broad, Wall, Pearl, Magazine, and Anthony Sts. to the circus. Here the Declaration was read, music played, and an oration delivered by Joseph Warren Brackett. The procession then marched back to the college green where it disbanded. In the evening several dinners were given. N. Y. Com. Advs., Jl 5 and 6, 1810. Delicate spectators this year, was called "American Independence."—Columbian, Jl 5, and 10, 1810.

John Melish (see Ag 4, 1806), who is again in New York, writes that this "anniversary of independence was celebrated with great splendor, and was equally attended by both the political parties. The federal procession consisted principally of the Washington and Hamilton Societies, in number 700 or 800; that of the Republicans, the Tammany Society, Manhattan Society, and the different trades' societies in the City. All processions were conducted respectively to different churches, where, after prayer, the declaration of independence was read, and an oration delivered; accompanied with several pieces of appropriate vocal and instrumental music.

An outward display of great festivity was exhibited over all the city, by raising guns, ringing bells, with military and other processions; and the evening was spent generally in a social manner, by different societies and private circles. In every party, they had a regular series of 17 toasts, one for each state, and a number of volunteer toasts from the company. These toasts were very sentimental, and may be considered as a very good barometer for discovering the particular political opinions of the party."—Melish, Travels in the United States of America, etc., I: 384.

The corner-stone of the Spring Street Presbyterian Church was to be laid on this day.—Columbian, Jl 5; Pub. Adv., Jl 16, 1810.

Greenleaf erroneously states that the stone was laid in April.—Hist. of the Churches, 142.

The common council agrees that Stone St. at its intersection with the west side of Broad St. be widened.—M. C. C. (1784–1831), VI: 285, 290.

The trustees of the "Economical school" petition the common council for the grant of "a lot of ground whereon to erect a school house."—M. C. C. (1784–1831), VI: 284. On July 23, the committee on the subject reported that "having attended to the mode of establishing a utilitarian, economical, and by no means expensive improvement of the pupils, they are of opinion, that the institution is admirably calculated to be of extensive utility, and from the circumference of teaching a foreign as well as the language of this country must be beneficial not only to emigrants children; but also to those of our own citizens. The respectable character of the Trustees and the indefatigable philanthropy of Monsieur de Benevolent, which entitles the society to the protection of this city, makes it the interest of all to see that any grant made by this Board will be properly applied and extensively promote the wishes and views of the friends of literature. The legislature at their last session not only incorporated this school; but also evidenced their opinion of its good tendency by a liberal grant of money; and should this Board further aid it with a site for a school room, it will then progress rapidly. By instructing (as is promised) in the higher branches of education, such paupers as may in their course, through our free school, give proof of talents, we will not only extend this branch of the charitable fund, but create an important addition to the charitable institutions of our city." The committee therefore recommended that lots Nos. 24 and 25 on the south-east side of Augustus St. be granted to the trustees, "on condition, that said Board, before the use of said school house, and as soon as they shall cease to be so occupied, they shall revert and become again the property of this Board; And also on the further condition that the trustees of said Economical school shall always receive and educate such paupers from our present free school as may in the opinion of the Trustees thereof be proper objects for the higher branches of education as taught in said economical school." The report of the committee was at first confirmed by the common council, but upon reconsideration it was negatived.—Ibid., VI: 292–94. See also ibid., VI: 296–97. See also 1820, supra.

The common council resolves "that it shall and may be lawful for any of the Auctioneers Using Chatham Square for the sale of all horses and other animals to Canton or Gallop any horse or horses offered for sale at the said place provided that Cantoning or Galloping shall only be within the limits of the Curb-Stone around said Square."—From original MS. in metal file No. 39, city clerk's record-room. This paper is endorsed: "Resolution authorizing Horses to be cantered & at Lombard Park." See also M. C. C. (1784–1831), VI: 386.

The common council votes to grant a petition of "the inhabitants of Harlem &c. of granting that a fire engine may be established at that place."—M. C. C. (1784–1831), VI: 283. On July 30, the board decided to lend the petitioners "fire engine No. 31 now out of use."—Ibid., VI: 297.

"Now that St. Paul's Church is undergoing repair, a good opportunity is presented of ornamenting the Monument of Mont-
France announces the revocation of the Berlin and Milan decrees; this is to take effect after Nov. 1.—Annals of N. Am., 5, 509. See N. 2.

The trustees of Columbia College grant as much of the college grounds as will be necessary to make Murray St., opposite the Trust Company, as wide as it is between Church St. and Broadway. The ground is to remain part of the street. The city corporation is to take down the stone wall, which now supports the college ground on Murray St., and after digging the gutter away, is to erect as good a stone wall along the south side of the street, and on it shall erect a new board fence, of the height of the present fence and painted in the same way.—M. C. C. (1784-1813), VI: 305-6, 332, 340.

The common council directs that the basin at Canal St., "measuring from what is called Lorton's Dock, he 284 feet, that 30 feet he reserved on the South side for a street on the side of the basin, and that the grantees of the land adjoining shall make and keep in repair the said thirty feet street."—M. C. C. (1784-1813), VI: 705.

The funeral of Lieut. Gov. John Broome is held in New York, his place of residence.—N. Y. Ev. Post, Ag 8; N. Y. Com. Adv., Ag 9, 1810.

The engineers of the fire department write to the common council regarding the danger "of ringing all the bells at the same time on days of public rejoicing; for should a Fire break out at that time, it would probably make great progress before the alarm could be spread and the Firemen assembled at their different Engines." They explain that, on the Fourth of July last, "while all the Bells were Ringing in the Evening, that the Wood work in front of the Theatre at the Park, whereas the lamps were fixed for Night Illumination, accidentally took fire, and had it been a Wooden Building, the whole must have been envelop'd in flames before any alarm could have been given." They recommend that certain bells he reserved, and not rung at the same time on days of rejoicing, and propose "that the Fire Bell at the City Hall, Goal Bell, Watch House Bells and such Bells on Markets, and other places as are intended for alarm Bells (only) would be more suitable to answer the purpose." The committee to whom this was referred reported on Oct. 5 in favour of the proposal, and advised that an ordinance be passed allowing these bells to be rung only in case of fire; and that the ringing of other bells in the city be regulated on days of rejoicing by commencing at a certain hour and continuing a certain limited time. Consideration of the report was postponed.—From the original memorial and report, in metal file No. 41, city clerk's record-room; M. C. C. (1784-1813), VI: 310, 365.

The steeple of St. George's Chapel is being improved. It is suggested that the church authorities shall cause "the removal of the British Crown from the top of the same, and in its place substitute some emblem more congenial with the spirit of our city, the nursing of our citizens, and principles of our Government."—Pub. Adv., Ag 14, 1810. It was removed.—Ibid., Ag 18, 1810.

The commissioners for laying out Canal St. write to the common council that, having advertised the assessment for the street (see Jl 2) and considered all objections thereto, they revised and adjusted the assessment and now present to the board a corrected copy. The assessment amounts to $259,267.21, and includes "all damages assessed or payments agreed to be made for lands together with the compensation and expense of the Commissioners and of the persons employed by them and of all . . . costs of legal proceedings . . . and all other expenses incurred." On Aug. 22, the board ordered that the papers be filed.—M. C. C. (1784-1813), VI: 343-44.

The superintendent of repairs reports that there are 1,687 public lamps in the city.—M. C. C. (1784-1813), VI: 316.

The common council resolves that the heirs of Anthony Lin- penard be directed "to erect the bulbhead to enclose their ground adjoining the basin at the outlet of Canal Street."—M. C. C. (1784-1813), VI: 322.

The committee on the fire department is authorized to have "the house over the floating engine" extended 10 feet if deemed necessary.—M. C. C. (1784-1813), VI: 323.

The expenses in 1810 for filling the Collect Pond amounted to $1,578.29.—M. C. C. (1784-1813), VI: 93, 118, 164, 261, 342.

The common council directs the recorders "to examine the laws..."
passed at the last session of the legislature of this state, to ascertain whether the time of the Commissioners for laying out this island is prolonged, or when the time of their reporting to this Board shall expire."—M. C. C. (1784-1831), VII: 356.

14 Rev. Anthony Kohlmann, S. J., writes from New York to a priest in London: "The [Catholic] College is in the centre not of Long Island but of the Island of New York; the most delightful and most healthy spot of the whole island, at a distance of four small miles from the city, and of half a mile from the East and North rivers, both of which are seen from the house; situated between two roads which are very much frequented, opposite to the botanic gardens, which belong to the State. It has adjacent to it a beautiful lawn, garden, orchard, etc. . . . Every one thinks that, if the reputation of the house be kept up, it will in a short time rivalize any college in this country. I expect we shall have thirty boarders for the beginning of next month.

"This city will always be the first city in America on account of its advantageous situation for commerce. From the West Indies parents will send their children to this port in preference to any other. The professors of the State's or Columbia College have sent us these two years past a kind invitation to accompany, at what they call the annual commencement, the procession of students from the college to some or other church, where speeches are delivered and degrees conferred; they had never paid that attention to the Catholic clergy before.

"Be pleased to let me know what a good electrifying machine, a machine pneumatica or air pump, a good telescope, and a machine for surveying, and the most essential instruments for navigation would come to. Such a like apparatus would enable the American people more than any other wise. We have the finest set of globes in America, which cost us $160."—U. S. Cath. Hist. Soc., Hist. Records and Studies, I: 72-73.

15 A petition from John Stevens "for a lease of Hoboken ferry to be conducted by Steam Boats" is referred to the steamboat and ferry committees.—M. C. C. (1784-1831), VII: 337. On Oct. 15, Stevens wrote to the board along the terms on which he would take a lease.—Idem., VII: 368. See N. 6.

16 The corporation directs that a block in the form of an L be sunk at the end of the new pier at the Albany basin.—M. C. C. (1784-1831), VII: 341.

17 The road committee is directed "to cause a sufficient quantity of manure to be laid upon the Park at the junction of the Bloomingdale & Boston roads & to have the same neatly sodded & ornamented with trees."—M. C. C. (1784-1831), VII: 341.

24 The comptroller having reported that the Mechanics Bank is willing to lend the city $20,000 for the work on the city hall, providing an account is opened with the bank, the common council resolves that it is "inexpedient to open an account with the Mechanics Bank for the purpose of procuring a loan therefrom, insomuch as another account opened with the Manhattan Bank, in which last mentioned bank the Corporation is a large stockholder."—M. C. C. (1784-1831), VII: 344-45.

25 Upon the request of the commissioners of the land office, the appraisers of Dr. Hosack's botanical garden report that, exclusive of any allowance for the delay of payment (see J 3), they estimate the value at $94,265.75. On Oct. 12, Hosack agreed to accept this sum.—Hosack, Statement of Facts relative to the . . . Elgin Botanic Garden (1811), 46-48. See O 3 and 6.

16 The common council resolves that Roosevelt St. "be continued, opened and regulated from Water Street to Front Street, the full width of the ground purchased for that purpose, and that the same be paved without delay."—M. C. C. (1784-1831), VII: 345.

27 "Business along our streets and docks is now unusually brisk, and the warehouses and stores begin to be crowded with European and India Goods. The importations this Season are like to be larger than for many years past, and are arriving in time. No less than five ships arrived here yesterday from the single port of Liverpool; most of them loaded with crates and dry goods, and many more are daily expected; so that country dealers will find no difficulty in supplying them at a profit with every article necessary for their stores on reasonable terms."—Reportory, S 25, 1810.

1810 passed at the last session of the legislature of this state, to ascertain whether the time of the Commissioners for laying out this island is prolonged, or when the time of their reporting to this Board shall expire."—M. C. C. (1784-1831), VII: 356.

The following is a letter to a friend in Albany, describes a visit he made to the Hosack Botanic Garden. After expatiating on the splendid place he expected to see because of the valuation put on it by the appraisers, he says: "My sensations were indescribable, tumbled as I was in a moment from the very acme of ardent expectation into the deep Trophonian abyss of disappointment. I do not know whether to vent my exultations, or my laughter. There never was in the world, such a piece of downright imposture as this Botanic Garden, & as it is dignified called Elgin. . . . Take away from it the 'Orangerie' or Green-house, which stands at the remote end of it, and it looks more like one of those large pasture-gounds near Albany, in which the western dravers refresh their cattle. It is a lot of twenty acres, with no other buildings on it but the green-house just mentioned, which has two small wings, and two other buildings of about twelve feet square, fancifully called porter's lodges (because there are no porters in them) one of which is placed at each gate. There is a small culinary garden on the western side, laid out in the common way in Squares; and the east of the grounds are in grass. No fruit whatever is to be found here; no large trees to furnish a retreat from the meridian sun; no little porticos; no knolls; nor in fine is there any thing which tends to embellish or diversify the grounds. Bating the green-house, which is like those generally found in private gardens, the tout ensemble of this celebrated Elgin, has, as already observed, the air of a common pasture ground. . . . we visited the interior of the green-house. There we found orange and lemon trees, geraniums, two or three coffee and pine apple plants, and all those little quelques choses which are usually to be seen in the gardens of private gentlemen, but nothing whatever of national importance. Such, my friend, is what is absurdly called the botanic garden. . . ."—Columbian, O 1, 1810. For a refutation of these statements, see ibid., O 15, 1810. See also O 6.

15 "A Member of the Legislature" writes to Editor Holt: "The letter published in your paper on the subject of the Botanic Garden [see O 3] afforded me infinite gratification . . . I am one of the persons who voted for the law whimsically entitled 'an act for promoting the medical science in the State of New-York,' which ought properly to have been called 'an act for the relief of doctor Hosack,' and know the sentiments of the gentlemen who, like myself, voted the bill. I have, therefore, no hesitation in declaring that the appraisement made by the persons appointed by the last mentioned act, will not change the opinion I entertained of the merits of the autographs of the most zealous friends of the Botanic garden, that so large a sum as that returned by the appraisers should be appropriated to that purpose: And because, the appraisement, such as it is, is not just. There was undoubtedly too much intrigue and management out-doors, at the time this bill was on the teapis. But the very persons who were so active in furthering the success of the garden, to my certain knowledge represented the probable price which the state would have to pay for the garden [at] about $50,000. . . . Every person acquainted with the value of land on this island, must know and feel this truth. . . . Lands in the neighborhood of the garden never have been as high at any one period as they are rated in the appraisement . . . everyone knows that lands on this island have been retrograding in price, and that they can be purchased one third cheaper now than three years ago. But here has been the error of the appraisers. When they were making the valuation, doct. Hosack, as I am credibly informed, sent them a statement of the prices at which lots at the cross-roads, at Murray's-bill and at Hamilton Square, had previously been sold. Now these three places are unquestionably the most eligible spots on the island in every respect whatever. . . . But here is a fact which will put this matter beyond the possibility of a doubt, namely, that the lot directly opposite Hosack's garden, containing twenty-five acres five in fee, and twenty leasehold; together with all the improvements on it, which may safely be valued at twelve thousand dollars, sold last March to Mr. Andrew Morris of that island, but that a capital, or even a large fortune, can be made on it. . . ."—Columbian, O 1, 1810. For a refutation of these statements, see ibid., O 15, 1810. See also O 6.

1810 passed at the last session of the legislature of this state, to ascertain whether the time of the Commissioners for laying out this island is prolonged, or when the time of their reporting to this Board shall expire."—M. C. C. (1784-1831), VII: 356.
A correspondent writes to one of the papers: "Several pieces have lately appeared in the Columbian respecting the Botanic Garden. I am ready to believe the Garden to be worth looking after, as the appraisement has been made to the owner, should he be willing to keep it at that price. But as the doctor is ready to part with it for public good, and as there is a great pressure on the public to take it for its true value, there is certainly no hazard in the purchase, especially as it is to be paid for in a lottery to be drawn six years hence. . . ."—Columbian, Oct. 27, 1812.

The common council directs the street commissioner to carry into effect his plan for opening the streets communicating with the lots at Clermont (see O 5), particularly Albany Ave.—M. C. C. (1784-1831), VII: 371. Albany Ave. "ran from 24th Street, between 5th and Madison Avenues, northwesterly, crossing 5th Avenue, between 29th and 30th Streets to the corner of 6th Avenue and 42nd Street; then northerly on the present line of the 6th Avenue and 59th Street."—Post, Old Streets, 57.

Wm. Torrey is paid 932.25 "for turnstiles for the Park & Battery k.'"—M. C. C. (1784-1831), VII: 372.

The street commissioner is ordered to have Peck Slip filled in to Front St.—M. C. C. (1784-1831), VII: 370.

A communication of John Stevens on the subject of the steamboats is referred to the steamboat committee.—M. C. C. (1784-1831), VII: 385. See D 10.

"Hycanthus" addresses the following communication to the press: "The Botanic Garden sticks by the way, the district attorney to whom the matter was by law referred having raised a very silly objection, to wit that Dr. Hosack has not title to the whole of the Garden, the corporation having reserved certain streets of sixty feet width through the same. And, will you believe, gentle reader, that the doctor has presented a petition to the corporation, praying them to give him (not to sell him!) the public streets and highways, in which every citizen has a common estate [see O 212]! And all this 'for promoting medical science in the State of New York, and for other purposes.' . . . The public streets within the enclosure of the Botanic Garden, constitute, by estimation, one fourth of the whole ground, or five acres. The land has been valued by the appraisers, at the rate of 2500 dollars per acre, exclusive of all improvements, Ergo, the value of the streets without improvements is 12500 dollars. Surely the grave and revered fathers of our faithful city of Gotham, will not hesitate to give away 12,500 dollars 'for the promotion of medical science in the State of New York' for the only argument urged in favour of giving to doctor Hosack the streets, is this, that commissioners have been appointed to lay out the city anew. To this it may be answered, that the commissioners may continue the same streets which have been granted by the corporation, and may take into consideration, the fact of honest purchasers having bought and made improvements according to those streets. . . ."—Columbian, N 7, 1810. See N 6 and D 24.

"Motherwort" writes from "Haarlem Heights" to one of the newspapers about Dr. Hosack's petition "praying a gratuitous cession of the streets intersecting the Botanic Garden" (see O 22). He says in part: "Now it appears to me, Mr. Editor, that a compliance with the prayer of that petition, will be neither more nor less than a present to an individual of the above sum [$12,000] to be reimbursed at no distant period, by a tax on the proprietors of adjoining land. For, after the state has been made to pay $12,000 for these streets, it is not to be expected that they will be opened gratis whenever the convenience of the other proprietors of common lands may require. . . . If the corporation are determined at any time to make Doctor Hosack a donation to the above amount, it will be more equitable to make the appropriation directly out of the city Treasury, so that the money given away may be refunded by a general tax, and not by a partial assessment on a particular district. . . ."—Pub. Ady., N 12, 1810. See D 24.

The Republican Whig-Teazer (see Mr 8, 1800) is discontinued.

Oct. 27, 1812.

1810. City, for seventeen thousand dollars only. . . ."—Columbian, O 6, Oct. 1810, See O 17 and 22.

The common council directs the street commissioner to carry into effect his plan for opening the streets communicating with the lots at Clermont (see O 5), particularly Albany Ave.—M. C. C. (1784-1831), VII: 371. Ady., N 12, 1810. See D 24.

The Republican Whig-Teazer (see Mr 8, 1800) is discontinued.
It was succeeded by the Morning Star on Nov. 27.—Brigham, A. S. Proc. (1917), 467, 486.

17. Congratulate the lovers of dramatic representations, on the arrival of the last reinforcements to our theatrical corps. Mr. Cooke the celebrated Covent Garden tragedian and Mssrs. McFarlan, Smalley and Doige comedians, arrived last evening in the Columbia from Liverpool.—"N. Y. Eve. Post, N 17, 1810. See N 21.

With the issue of this date the American Citizen was discontinued. It was succeeded by the New York Morning Post (see N 20).—Brigham, A. S. Proc. (1917), 379.

"Whereas James Hardie has, at his leisure moments, indexed the 21st volume of the minutes of this board, and whereas it is desirable to have the residue volumes of minutes indexed," the common council appoints a committee to inspect the work done by Hardie and to report whether the other volumes should be done by him. —M. C. C. (1784-1821), IV: 397.

Garrett C. Tunnison begins to publish the New York Morning Post. Joseph Osborn is editor. This was really a continuation of the American Citizen (see N 19), although having a new title and new volume numbering.—Brigham, A. S. Proc. (1917), 467. See N 27, 1810 and Ag 20, 1812.

George Frederick Cooke (see N 17), the famous English actor, makes his first appearance in America, at the Park Theatre in the character of Richard the Third. The occasion was notable in the theatrical annals of New York. Mr. Cooke writing about it in his personal memoirs said: "My appearance throughout the play and at the conclusion exceeded my utmost expectations. It was said to be the greatest house ever known in America. It was reported of the audience that Drury Lane when Mr. Siddons first appeared there."

An item of New York news reads: "The coal recently brought to this city from the mines of Lewis Hepburn and Adbish Johnson, which were discovered about 2 years since on the banks of the Susquehanna River, is apparently of a superior quality to any of the European coal hitherto imported into this country. The sample of the cargo furnished for the use of the city hotel and for other domestic uses in this city has excited the surprise and admiration of all the gentlemen who have been to see it burn...it can be dug, brought to this city and afforded here for ten or twelve dollars a chaldron."—Aurora Gen. Ado., N 23, 1810. This is probably the first use of domestic coal in New York City. Regarding the coal mines here mentioned, see also ibid., N 26, D 5 and 6, 1810. See also Mag. Am. Hist., V: 453.

An invitation is prepared for the city's celebration on this day. From this date until 1831, similar check-lists of names of persons invited to Corporation functions were prepared, and are now preserved with "Filed Papers, Miscellaneous, 1810 to 1811," by city officials.

Gouverneur Morris writes to Mayor Radcliffe: "I am directed to inform you, that the Commissioners for laying out the Manhattan Island [see Ap 3, 1807] have completed their work so far forth as depends on them; but much is yet to be done on the ground. It would be useless to detail the causes, which have delayed their operations. The unpropitious weather for the last and preceding season is not the least. So much, however, is accomplished, that with tolerable success in the operations now going on, it will be practicable, to make within the time fixed by the Statute a report complying substantially, if not literally with the law, shewing all the streets to be laid out and specially designating those, on which monuments have not been placed. These streets may hereafter, without the superintendence of Commissioners be accurately traced by a skillful, practical man, possessed of suitable instruments. It is, however, proper to remark, that in order to establish points, which have been ascertained by measurements already made, the course of operations commenced this year ought to be continued next year by the surveyor now employed, after which, the work may be conducted in such manner as the corporation may deem most expedient."

"That they may the better be able to form a judgment, I am directed to state, that only one surveyor can be employed in what remains, and that the commissioners have been under the necessity of directing the construction of particular instruments in order, that he might attain to that degree of accuracy, requisite in a work of this sort, where the difference of an inch may afterwards be a source of contention. There are, however, measured points, which are so far extreme precision upwards of five hundred & fifty thousand feet, that is to say, more than two hundred and sixty miles. A work so extensive, although enjoined by the statute was not, perhaps, contemplated, when it was proposed. To place and take the elevation above high water mark of about three thousand five hundred monuments will also require a little time. Yet all this must be done to comply literally with the provision of the statute in relation to so much only of the island, as has been in the opinion of the Commissioners, become part of the city in the course of ages. If the whole were embraced, the labour would of course be increased with a proportionate increase of expense."

"They have directed estimates to be laid before them and find, that to complete the work will require (exclusive of the compensation allowed to them & the expense of making maps) a sum of seventeen thousand dollars, to which must be added six thousand dollars more, if the monuments be made of marble; and it has been found by experience, that those of common free stone are daily defaced by men, who, in cultivating their fields, do not perceive them until the mischief is done. Sixteen hundred dollars are needful now to pay what is done and complete the field operations of this season."

The communication was laid before the common council on Dec. 3 and referred to a committee. A warrant for $1,600 was, however, immediately issued.—M. C. C. (1784-1811), VI: 405-6. See D 10.

The common council resolves that Mayor Radcliffe be requested to sit for a portrait to be painted for the board.—M. C. C. (1784-1811), VI: 404. Radcliffe's portrait was painted by Trumbull in 1845, and still hangs in the city hall. —Cat. of Works of Art Belonging to City, 12.

The fort erected on Governor's Island is named "Castle Williams," under a salute of 17 guns. On this occasion Col. Williams, who designed and executed the work, gave a dinner to the mayor and corporation and the city and some of the military and naval officers.—N. Y. Gen. & Gen. Ado., D 3, 1810. Castle Williams presents eleven massive pieces of ordnance, 6 of which are 44-pounders in the water tier, 26 are 32s on the lower tier, 20 are 18s on the third tier, and 50-pound Columbiads on her upper. —Columbia Cent. (Boston), D 18, 1810; Boston Gen., D 17, 1810.

The salary of superintendents of streets is fixed at $800 a year.—M. C. C. (1784-1811), VI: 404.

The Euterpea Society, "proposing to give a benefit for the relief of the Sufferers by the late fire in Charleston South Carolina," sends the common council 50 tickets for disposal, and the board orders that they be deposited with the clerk "for such persons, as may choose to purchase them."—M. C. C. (1784-1811), VI: 405.

"This evening...will be open at the Museum, No. 166 Greenwich-street, a Panorama of the City of Rome...The Museum has undergone considerable repairs, with new additions. The main rooms are now exhibited...No machine in the United States traces profiles more correct than the one just added to the Museum..."—Columbia, D 3, 1810.

Cf. Je 25, 1807.

The N. Y. Hist. Soc. celebrates the festival of St. Nicholas in the north court-room in the city hall. An oration is delivered by Hugh Williamson. At 4 o' clock, a dinner was held at the Washington Hotel. —Com. Ado., D 11, 12, 1810; M. C. C. (1784-1811), IV: 398. This was the first celebration of the kind held by this society.

The committee to whom was referred the letter from Gouverneur Morris (see N 29) reports to the common council that they have had a conference with Mr. Randall the principal surveyor of the Commissioner from which together with Mr. Morris's letter it appears that some arrangement and provision on the part of this Board will be necessary to give effect to their plans and operations that although from the above communication the Commissioners entertain the Idea of making their report within the time limited by law yet much will remain to be done on the ground in measuring and delineating the Streets and avenues in placing and taking the elevation above high water mark of many monuments &c.

"The Committee from their present view of the subject are of opinion that a contract for finishing the surveys placing monuments and completing the work marked out by the Commissioners would be proper still however they think it would be advisable before any definitive step be taken by the Corporation to have a
conference with the Commissioners themselves or some one of them to know more precisely their views and opinions on the subject." The report is confirmed, and the same committee is directed to confer with the commissioners.—M. C. C. (1784-1813), VI: 453-56. See D 23.

The steamboat committee makes the following report:

"1st we have agreed to lease the Hoboken Ferry to Mr John Stevens with its appurtenances and privileges as now held and enjoyed, from and immediately after the expiration of the present Lease and for and during the Term of Fourteen years for the rent or sum of three hundred and fifty dollars for the first year and to increase annually during the said term in such a ratio as would double the rent of the first year in twenty years

"2d One Steam boat (to be built on such construction as Mr Stevens may judge best but of Capacity and dimensions sufficient to transport Horse Carriages and passengers) must be placed on said Ferry and kept there plying within Two Years from and after the commencement of the said Term under the Penalty of forfeiting the said Lease And to render the ferry still more accommodating it is further agreed that in four years after the commencement of the said Term another Steam Boat of such improved construction and dimensions as experience may dictate and of equal Capacity at least, with the aforesaid Boat, shall be placed on said Ferry and keep there plying as a ferry boat

"The said Committee do consider it may be deemed fit and necessary for the steam Boats on this side of the River shall from time to time be made by the Corporation and in the interim between the commencement of the Term and the readiness of the steam boats the Ferry must be kept on the present establishment or on one equally accommodating . . . The report is confirmed.—M. C. C. (1784-1813), VI: 427-28. See, further, Ap 1, 1811.

The common council decides to employ the Columbian as one of the newspapers for printing its laws and ordinances.—M. C. C. (1784-1813), VI: 454.

A New York news item states: "We learn with great pleasure, that our city corporation have at length concluded a contract for the permanent employment of Mr Fulton's steam boats at the Elbwes Hook ferry, the contract is now in meta file and advantageous to the public . . . we are informed that provision is made for allowing market waggons to pass at a low toll; and we are told the boats will start every half hour by the clock . . . It is also stated that the boats intended are of such size, and construction, that passengers may remain in their carriages, and drive in and out with perfect safety and convenience; and each boat will receive eight or ten waggons or carriages at a trip. If our informant is correct, we presume that this ferry, so long the terror of travellers and the disgrace of the city, will as soon as the boats can be built, become one of the safest and most expeditious in the union . . . "—Aurora Gen. Adv. (Phil.), D 17, 1810; Boston Gaz., D 17, 1810. On April 15, 1811 (q.v.), the lease of the Paulus Hook Ferry was ordered to be executed. For the following year, the city corporation had purchased a ferryboat and two waggons from the company. The contract provided that the ferry would operate on a fixed schedule, with boats departing every half hour.

On the application of the Free School Soc., Trinity vestry appropriates two lots of ground on the west side of the city, on which to build a school. On Jan. 14, 1811, they appropriated another lot.—Trin. Min. (M.S).

Edward Gillespy begins the publication of a newspaper devoted to Irish interests called The Shamrock or Hibernian Chronicle.—Brigham, A. A. S. Proc. (1717), 492; Early Newspapers, II: 428. See Je 3, 1811.

The committee, directed on Dec. 10 (q.v.) to confer with the commissioners for laying out the streets, roads, etc., reports that they have consulted with Gouverneur Morris and John Randel, the surveyor, and are confirmed in their opinion that after the commissioners have made their report, work will still have to be done to complete the work. "The avenue and intersecting lines not having yet been measured and designated by monuments, so as to give a finish and precision to the work, to provide for this, the Commissioners advise, that Mr Randel, the surveyor employed by them, be continued by the Corporation to complete the surveys and measurements already begun in conformity to their plans to place the necessary monuments at the rate of $600,000 for about 500,000 feet still to be measured, and the probable expense will be $13,000. The commissioners also suggest that such parts of the act of April 3, 1807 (q.v.), as may be necessary to protect the surveyors and agents be renewed, and that the common council purchase, at an expense of about $1,000, "certain instruments of peculiar construction" for the use of the surveyor. The "cost of the monuments and the transportation of them to the ground, where they are to be placed, . . . will probably amount to $4000 making a total expense, now to be incurred of about $15,000 or $16,000." The board directs the committee "to contract with Mr Randell for performing and perfecting the surveys and measurements, placing the monuments and all other things necessary in relation to the subject," but the contract is not to go into effect unless "the report of the Commissioners with their maps and field notes be actually filed in the Clerk's office, according to law, prior to the third day of April next."—M. C. C. (1784-1813), VI: 435-37. See also Ibid, VI: 446. See, further, D 24 and 31.

A New York merchant writes to a friend at Genesee: "It is with great satisfaction I inform thee, that the commissioners who explored the country from the Hudson to Erie, to ascertain the most proper route for a contemplated canal, will make a favorable report to the legislature at the commencement of their next session; and a more important subject will never be discussed by any deliberative body in the United States, as it respects the internal improvement of our country."—N. Y. Evs. Post, F 1, 1811.

William Bridges addresses the following petition to the common council: "Understanding that it is contemplated by your Hon'ble Body to complete the Survey & Laying out of the Island by having Permanent Mark Stones placed at the Intersections on each of the Principal Avenues upon the Commissioners filing their Map by the time limited "The Subscriber one of Your City Surveyors having been engaged by the said Commissioners for running out a considerable Number of the said Avenues & Cross Lines and likewise of ascertaining the Levels of the same & nearly every other Line that has been run by their direction and having a general local knowledge of the Island together with a permanent residence in the vicinity where the Business is to be done enables him to offer his Services to Your Hon'ble Body to execute the work with accuracy & Dispatch for a Sum not exceeding nine Thousand Dollars & respectfully requests that he may be engaged to perform the same."—From the original petition in metal file at city clerks' record-room. The petition is ordered to lie on the table.—M. C. C. (1784-1811), VI: 446-47.

Upon the request of Gouverneur Morris, the common council directs that John Randel "be furnished with any maps deposited in the offices of the Comptroller or Street Commissioner, which may be necessary in his opinion, to finish the map he is now preparing, he giving receipts & rendering himself responsible for replacing them in their respective offices."—M. C. C. (1784-1813), VI: 439. See also infra.

Ald. Hardenbrook makes the following motion in common council: "Resolved, that the Committee, to whom was referred the subject of the Commissioners touching the laying out of streets and roads in the city of New York he requested to report to this Board, at their next meeting, how far the Commissioners will have their map completed, and touching all the sections of the law appointing said Commissioners and how far their map will extend over the island, and whether they will or will not give the said elevations generally." No action is taken on the motion.—M. C. C. (1784-1811), VI: 446-47. See Mr 22, 1811.

The common council decides to grant to Dr. Hosack (see O 22) the land in his Botanic Garden reserved for streets, on condition that he convey to the city in exchange "lot 84 containing five acres more or less as designated on the map of the Common Lands represented now to be held by the said Dr. Hosack."—M. C. C. (1784-1811), VI: 415, 422-24. Hosack agreed to the exchange.—Ibid, VI: 422; Statement of Facts relative to the Estab. and Prop. of the Elgin Botanic Garden (1811), 52.

Supplementing his work on the Commissioners' Map, a contract is entered into between a committee of the corporation and John Randel, Jr., under which he is to measure accurately all the avenues and their continuations across the public places laid out by the commissioners; also the lines at right angles to those avenues, across the island at convenient distances, and to place where practicable at every intersection made by the avenues and streets such monuments as the corporation shall procure, or iron bolts in rocks where the placing of monuments would be impracticable; and also to take the elevation of all the said monuments above high-water mark, and measure the distance of such buildings as may be
THE ICONOGRAPHY OF MANHATTAN ISLAND

1810
prescribed to him by the corporation from the nearest monument.

31
Ranidel was engaged in this survey during the next seven years. By Nov. 12, 1811, he had nearly completed the measurements of all the avenues as far north as 79th St. Then by a special council determined to have him make his report of progress and completion of the work by a map or maps.—Ibid., VII: 297-99. In 1814, the board made an extra allowance to Ranidel, who, it was reported by the committee on surveys, "being more ambitious of accuracy than of profit, was induced (notwithstanding said contract did not require it) at considerable expense of trouble and expense, to set them [the monuments] one foot deeper, and to fix them at the bottom as correct as the top...so that the angular point might be preserved as long as a piece of the monument remained." He also made every effort "to improve his Instruments."—Ibid., VII: 782-83. The work was completed early in 1817.

Ranidel was obliged to measure and re-transit 160,160 feet on account of the displacing of pegs before the monuments were set, and he voluntarily re-measured an extensive section of the ground to prove the accuracy of his work.—Ibid., VIII: 745; IX: 45, 131-32. See, further, Ag 12, 1817.

Joseph Mangin is paid $6.12 for "taking profile of a mud machine."—M. C. C. (1784-1831), VI: 448.

1811

In this year, John Jacob Astor founded the American fur trade at Astoria, on the Columbia River, Ore.—Wissow, VII: 558.

In this year, the Literary Miscellany was established.—North, Hist. & Present Condition of the Newspaper and Periodical Press, 117.

In this year, a booklet entitled Description of the View of New York, by the Grand Fountain, at the corner of Broome and Leonard Street appeared. It contained a brief account of all the principal landmarks in the city. The date of the handbook is determined from the description of the unfinished city hall.

Thomas Pope, in a treatise on bridge architecture, published in this year, refers to "the sorrow taste of the unskilled builders of the present day," but mentions several buildings in New York as proof that it is an error to conclude that "we are wholly destitute, in this part of the world, of those specimens, that bespeak a better knowledge and more refined taste in the science of architecture." The first, he states, "that justly claim our notice, is the New-York Free School, which for boldness of feature, and general chasteness of design, may vie with any of the productions of modern times." The Bank of Pennsylvania (in Philadelphia), and the "Gothic part of Trinity Church in this city," are noticed, and he adds: "there are some excellencies in the new Grecian structure called Grace Church." But "The Spire of the Brick Meeting, is, without exception, the greatest ornament of New-York, in the distant view; and make[s] some amends for the too conspicuous and squat phenomena of the Theatre, and other public edifices, which, at a much smaller expense than that which has been lavished upon them, an infinitely greater production, that would have contributed to the elegance and grandeur of our commercial metropolis."—A Treatise on Bridge Architecture, by Thomas Pope (1811), xxvi-xxx:

The book contains a history of various bridges erected in different parts of the world from an early period, a detailed description of the author's "Flying Pendent Lever Bridge," some general remarks on timber and other materials, and a description of the author's "Patent Bar Arch, for buildings." Pope made a model of his Flying Pendent Lever Bridge "to illustrate a Bridge suitable to span the East River at New-York, with a single arc, the chord of which would be 1600 feet, the Altitude or versed sine 223 feet..."—Ibid. The model of Pope's bridge was exhibited in Philadelphia in Feb., 1812.—Aurora Gen. Advs. (Phila.), F 10 and 14, 1812.

About 1811, "All that was romantic in scenery and prepossessing in amiable grounds immediately above Canal Street was quickly doomed. The city was on the march, and every form of hill and dale and pleasant valley must be sacrificed. From the Bayard mansion, on the summit of the high point of land between Broome Street and Broome, the views...embraced a curious variety of suggestive scenes. The valley of Canal Street at its foot had been transformed into a busy thoroughfare...and over the roofs and foliage of the new city the City Hospital could be seen, and then the city itself in outline, its smoke and spires reaching into the sky; to the southwest the handsome 1811 country-seat of Leonard Lispenard was plainly visible, crowning a beautiful eminence near St. John's Church; to the north of the west avenue, above the intersecting streets, the green woods which surrounded Richmond Hill; to the north and north-east a half-dozen villas, including those of the Stuyvans, met the eye in peculiar fellowship with intermediate dwellings of every description scattered along the neighborhood of the Bowery road; while in the distance the Hudson and East Rivers, the magnificent bay, and the shores and heights beyond, completed as far a prospect as could be found on either continent.

"The enemy, with its armor of pickaxes, stood back appalled at the strong, firm, bold front which the Bayard Hill presented. It seemed invincible. But the assay was finally made, the citadel yielded, and the inhabitants fled. As for the real-estate owners, they were solicited by the rise of property. Fortunes grew while dwellings, stables, flower-gardens, fruit-orchards, grassy lawns, summer-houses, lovers' walks, and finely shaded private avenues tumbled promiscuously into the mass of worthless ruins—and posterity was enriched."—Lamb, Hist. of the City of N. Y., II: 569-71.

In this connection, Mrs. Lamb reproduces an "etching by John P. Emmet," through the courtesy of his son, Dr. Thomas A. Emmet, entitled "Corporation Improvements." This humorous sketch, showing the condition of Broadway during the levelling of Bayard's Hill was made, Mrs. Lamb says, "from near the corner of White Street and Broadway, looking toward Canal Street."—Ibid., 570. The original drawing was sold with the Emmet collection on April 13, 1921.

The city records afford picturesque glimpses of the details of this labor. The Broadway street was pushed through a block or two in length one year and allowed to rest the next. Springs and rivulets impeded progress and were finally chocked into subordination to the laws, and buried without ceremony. Litigations arose involving the rights and privileges of citizens, and questioning the vast extent and complexity of powers assumed by the corporation. The investigation of land-titles was troublesome, and the settlement and collection of assessments upon individual property attended with an incalculable amount of hazard and vexation.—Ibid.

In this year was published An account of the New-York Hospital. It contains an engraved frontispiece entitled "View of the New-York Hospital," drawn by John R. Murray and engraved by Lenery; also a ground-plan, from designs of J. H. Eddy, engraved by C. Rollinson. The view is reproduced and described as Pl. 88, Vol. III.

In this year, Dr. John W. Francis was the first graduate of the College of Physicians and Surgeons. For a sketch of his career in his profession and in literature, as well as in the social life of New York, see Lossing's Hist. of N. Y. City, II: 432-34.

In this year, Michael Paff opened, at 248 Broadway, a gallery for London drawings; sale of which might have been conducted to 221 Broadway (later a part of the site of the Astor House) and subsequently made other moves, returning, in 1820, to 221 Broadway, where he remained until 1834.—Howe, Hist. of Met. Museum of Art, 79-80; descrip. of Pl. 105, III: 611. See also Blunt, Stranger's Guide (1817), 173-75.

In this year, John H. Eddy made "A Map of the Country thirty miles round the City of New York." It was engraved by Peter Maverick and issued in 1812. It is reproduced as Pl. 52, Vol. III.

This date is found upon a pen-and-ink elevation of the Murray St. Church, evidently drawn by John McComb, Jr.; it is reproduced in Vol. III, A. Pl. 11-3.

In this year, assessments were made for improving Beach St. with curb and gutter along Hudson Sq. and "Leight" St. with curb and gutter between Varick and Hudson Sts., and for regulating it from Greenwich to Hudson St.; also for regulating and paving Pearl St. between Elm and Chatham Sts.; regulating Grand St. from Goerck St. to Dock St.; regulating and paving Beekman Pearl St.; paving Marketfield St. from Broadway to Greenwich; opening Washington St. between Barclay and Hubert Sts.; and opening Collect St. between Magazine and Anthony Sts.—Index to Assess. Rolls. Vol. I.

The year 1811 saw the city hall occupied, but not finished. On March 18, an application for painting the building was received.
CHRONOLOGY : THE RECONSTRUCTION PERIOD : 1783-1812

1812

by the common council from a firm of painters and referred to the
build. comm.—ibid., VI: 531. On July 1, the board agreed to meet
on the Fourth of July at 12 o'clock at the hall (ibid., VI: 649); and,
on July 15, it was resolved that on "the [second] Monday in
[August] next" the common council should meet there for public
business. The chimneystone was to be used until the council chamber
should be completed; and that the comptroller and street commissioner
be directed to move their offices to the buildings intended for them.
The committee on arrangements presented a bill for $375 for the
expenses of a dinner on the Fourth of July, and a warrant was
ordered to issue for the payment of it—ibid., VI: 653-656. The whole
regular meeting was held in the hall, as arranged, on Aug. 12,
at four p. m.—ibid., VI: 672.

On Sept. 2, the board passed a resolution that the build. com.
"be requested to designate the rooms in the New City Hall for the
several offices of the Corporation and of the State" and to make
report (ibid., VI: 693); and on Sept. 30, a committee was ap-
pointed to procure suitable furniture for the common council
chamber (ibid., VI: 711).

On Oct. 14, McComb reported that 126 workmen were
employed—48 carpenters, 16 masons, 50 laborers, 25 stone-cutters,
and 8 stone- and wood-carvers—whose weekly wages were $925;
that the stone balustrade and chimney tops would be finished in a
few days; and that the masons were waiting for the pieces of the
cupola, the other part being nearly done; that all the west wing
with the housekeeper's apartments would be finished in the
fall; and that the interior of the east wing was likely to be
"under scratch coat" before winter set in, so that the carpenters
might put up and complete the woodwork in the course of the
winter. The roof was complete, the window sashes nearly all
done and glazed, and might be put in, and the building secured
from the weather, in about three weeks.—ibid., VI: 731. On
Oct. 24, the chancellor and justices of the supreme court were
to be invited to visit the hall for their opinion "as to the room most
suitable to be finished for the accommodation of that Court."—
ibid., VI: 737. On Nov. 27, the board being informed that a
set of Tapestry" had been recently imported, the committee
appointed to procure the common council chamber be authorized
to buy the set if deemed suitable.—ibid., VI: 767-68.

"Since Steam Boats are no more the rage," and as "going
by steam is out of date," John Puffer advertises the establish-
ment of a new line of stages between New York and Albany along
the east side of the Hudson.—N. Y. Morning Post, Ja 4, 1911.

The following illuminating description of the work on Canal St.
appears in the Times: The drawing and filling up of the marshes
usually called the Collect and Lispenard's Meadows, and the levelling
and regulating the adjacent grounds, has always been a subject of
much speculation and concern. Various plans have at different times
been proposed, and much embarrassment and difficulty have
continually arisen. Finally however, after having abandoned the
idea of the proposed removal of the nuisance, and the erection of
bridges, lowering one street and raising another, then again
crating the former and reducing the latter, until perplexity and
confusion have gained a complete ascendency, it has been deter-
mined as a desperate resort, to make an experiment with a Sewer
or paved channel above ground, extending from the Collect to the
North river. The meadows in the meantime having been filled up,
or rather covered with sand for the purpose of making streets
and building lots, it was natural to imagine, that without a canal,
these new made grounds would not be very eligible situations; and
it no doubt appeared obvious that if a street one hundred feet wide
could be laid out across these meadows so as to afford a spacious
way on each side of this canal, the property would not diminish in
value on that account. . . . The purchase of the ground then
for the street and canal became the first object of attention, and
application was made by the corporation to the Legislature for
power to purchase accordingly, and to impose an assessment in
order to raise the requisite sum. This was accordingly granted,
and authority was given to three commissioners [see Mr 24, 1809] to
procure a valuation of the ground required and then impose an
assessment for the payment, in the words of the act, on all the owners
and occupants of houses, lots and lands intended to be benefitted
by the regulation in proportion to the advantage which they might
respectively be deemed to acquire. The purchase of this ground
for the street was accordingly effected at the expense of about
one hundred and sixty Thousand dollars; and the next question
was, by what rule or standard is the principle contained in the
Act to be applied, in order to apportion this assessment, or in other
words, who are the persons to be benefited by the regulation? To
solve this question, the Commissioners above mentioned, (with
much more motives no doubt, having been appointed for the mayor's office, the old
furniture to be used until the council chamber should be completed;
and that the comptroller and street commissioner be
exposed to carry this rule into operation, persons are employed to make a survey of the neigh-
bouring grounds, and to ascertain the points from which
water may be found to steal its way to these meadows. These
Surveyors, pursuing the sagacious scheme of the late famous Street
Commissioner, whose notable and profound skill in the business of
street making they no doubt much admired, go diligently to work,
and after torturing as it were the surface of the ground, in order
to force the water to take a direction to Canal-street, but which after
all, a great proportion of it will never be able to reach, they furnish
a map, comprehending ground between Chamber street on one
side, and Amity Lane on the other. This map the Commissioners
presuming to be correct, they accordingly adopt, and make the
basis of the assessment, of one hundred and sixty thousand dollars,
which is now so much the subject of just and serious complaint."—
N. Y. Ev. Post, F26, 1811; and, J2, 1812.

At a "sumptuous and respectable meeting" held at the Tontine
Coffee House, a memorial to congress is adopted asking that the
charter of the First Bank of the U. S. be renewed.—N. T. Ev.
Post, Ja 8, 1811. See Ja 24.

Upon the petition of the inhabitants residing in the vicinity
of the U. S. arsenal, the common council agrees to lend them
"engine No. 10 with its leader . . . Provided that they procure
a suitable building to shelter the same and be responsible for its
safe keeping and that they shall return it when desired by the

An editorial reads: "We are informed that Daniel French,
(Machinist and Engineer) of this city, has invented a very useful
improvement in the art of weaving. The machine is very simple
in its construction, and cheap to build, and may be moved with the
hand, water, or any other convenient power. Mr. French has one
of these machines in operation, at his works in the village of
Greenwich. . . . This machine is constructed to weave several
pieces at once of narrow stuffs such as webbing and narrow cloths
of various kinds, and will be a valuable acquisition to our infant
manufactories. We understand some of his machines are already
engaged for the state prison, to be used by the criminals. Would
not this be a valuable acquisition to this city, by being introduced
into the Alms-house or other convenient places, where many of
the infirm and children, would be able to earn a living, and dimin-
ish the burden on community?"—N. T. Ev. Post, Ja 23, 1811.

The charter of the First Bank of the United States is indefinitely postponed in the house of representatives
by a vote of 65 to 54. In the senate it was lost by the casting vote
of Vice-Pres. Clinton on Feb. 20.—Sumner, Hist. of Banking in the
U. S., 48-54. See Mr 4.

A negro and a Dutchman, convicted of murder, are executed
on a gallows erected in the neighbourhood of Richmond Hill.—
N. Y. Ev. Post, Ja 25, 1811.

Street Commissioner Stilwell, reporting on the petition of A.
Arden for compensation for damages, "said to have been sustained
by a canal dug by direction of Doctor Browne thro' a lot of ground
belonging to the petitioner on the west side of Elizabeth Street,
between Hester and Grand Streets," thus describes the topography
of that part of the city:

... previous to any regulation of Streets and lots in the
neighbourhood of the lot in question, when the surface of the earth
was in a state of nature, there was a pond of water between Bowery
Road and Elizabeth Street at the foot of Bunker's Hill on the
South side. And when a greater quantity of water ran into the
pond than could be contained therein, it found vent across the
acres of the Westerly direction and obliquely across the lots
and streets to the Collect Meadow, crossing Hester Street near the
intersection of Orange Street. This was the natural state of the
ground as long as the oldest inhabitants can remember.

"In 1803 Bowery road was regulated and dug down about 4
1811 feet at the intersection of Grand Street, which made it lower than the outlet above mentioned and caused the water to pond in the road. The next year, Grand Street was dug out from Bowery to Elizabeth Street, and being not strong enough through the hill, the inhabitants were greatly annoyed by the standing water. To remove as far as possible, the cause of complaint, Doctor Browne ordered a ditch or canal to be dug from Grand Street along Elizabeth Street about 155 feet, which brought to the lowest ground being at the said lot of Miss Arden.

— M. C. G. (1784-1831), VI: 475-76.

Feb. 18. The common council authorises its clerk "to purchase for the use of this Board and the Statute Laws of the Several States of the Union." — M. C. G. (1784-1831), VI: 484.

Because of the illness of George III and his inability to exercise the royal authority, George Augustus Frederick, Prince of Wales, is appointed regent by act of parliament. — Robertson, Select Statutes, Cases, and Documents to illustrate Eng. Const. Hist., 171-82. The king died on Jan. 29, 1820 (q.v.).

De Witt Clinton is appointed mayor. He took the oath of office on Feb. 12.— M. C. G. (1784-1831), VI: 495. Clinton succeeded Jacob Radcliff, who had served since March 5, 1810 (q.v.). He held the office until March 6, 1815 (q.v.).

As "great and serious evils," such as long delays, imprisonment of innocent persons for want of bail, escape of necessary witnesses, etc., are caused by the fact that the court of general sessions is held only six times a year for two weeks at a time, the common council adopts a petition to the legislature with the draft of a bill for the establishment of an "Inferior Court of Sessions of the peace in and for the City and County of New York," which is to consist of three judges, to sit daily, and either with or without a jury "to try and determine according to law upon all informations and informations to be brought before the said court for every petty larceny, assault and battery, unaccompanied with any other charge, and disorderly house keepers committed within the said city." — M. C. G. (1784-1831), VI: 481-83, 492-93.

A committee of the legislature in reporting on a petition for the incorporation of the City Bank of New York, says: "The city of New-York contains the greatest number of inhabitants of any city in the United States, and is the capital of . . . that the contagion of the New-York is more than double that of Philadelphia, and nearly three to one to that of Baltimore, and that in exports and imports the city of New-York exceeds the above-named places in a greater proportion than in her tonnage; and it may fairly be stated, that New-York pays one third to one fourth of all the imports of the United States, and at the present time, the present annual bank capital of Philadelphia and Baltimore exceeds that of New-York about two million of dollars, which must necessarily give them greater facility in transacting their mercantile business than what is experienced in New-York, and which place, under the above mentioned existing circumstances, is entitled to a larger banking capital than either Philadelphia or Baltimore, both of which are rivals to New-York." — Ibid., VI: 475-76. The bank, however, was not chartered until June 16, 1812 (q.v.).

Henry Brevoort writes a lively letter to Washington Irving describing some of the theatrical events of the season. George Frederick Cooke, the English actor, was most in the public eye then and interest was divided between his stage performances at the Park Theatre and his Bachmaehn performances at the inns, coffee houses, and some less savory resorts of the town. Mr. Brevoort tells that "Old Cooke gave a dinner, at Hodgkinson's, a few days ago to the far ends of the Company . . . The first part of the feast I understand was conducted with great harmony, jocundity &c, but about the time the third bottle ascended their perambulums, the spirit of dire confusion and fierce debate took full possession of them. 'God save the King' was drunk standing by all that would and all that could stand except the Manager, who had not loyalty enough to rise from the chair; straightways all was noise and uproar & the spirit of party raged furiously." Then, so the letter says, all the members of company plunged into an all-around fight, until "at length the Mighty Cooke, began to brandish his potent arm, swearing, that, if this was the way to choose to honour his last, he would '.. make them one among them.'" — Hellman, Letters of Henry Brevoort to Wash ington Irving (N. Y., 1916), I: 11-16.

15 A reading room has lately been established in this city, in front of the City Hotel, by Mr. John Howard Payne, better known perhaps, by the appellation of the American Rouscous. Feb. 15. This reading room as his prospectus informs us, is designed to be, a general depository of Newspapers, Magazines and Pamphlets, and will be open to the public gratis. — Ibid., VI: 513. At a special meeting on March 8, the committee reported that the ground could not be freed from the claims, so "no further proceedings were had upon the subject." — Ibid., VI: 514.

Robert Fulton assures the public that "although the torpedoes experiments have hitherto been very imperfect, in consequence of being limited to 1300 dollars, and not having one man practised to use them," he "will be able to continue the experiments, and, with the rapid progress of this infant art, to a state of important utility. CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1783-1812 was a period of rapid expansion and development in New York City. The city was undergoing significant changes due to economic and political factors. This time period saw the establishment of major institutions, the growth of the population, and the expansion of the city's boundaries.

The New York City Council, for example, adopted the resolution of a memorial to the legislature, which expressed the opinion of the New York City Council, in favor of their memorial to the legislature, that the legislature should pass a law to encourage manufacturing. The legislature passes a law to encourage manufacturing. "Any five or more persons who shall be desirous to form a company for the purpose of manufacturing woolen, cotton, or linen goods, or for the purpose of making glass, for the purpose of producing, any bar-iron, anchors, mill-iron, steel, nail-rods, hoop-iron and ironmongery, sheet-copper, sheet-lead, shot, white lead and red lead," may, on filing the proper certificates, be erected into a corporate body for the term of 20 years. A law was also passed, which provided for the distillation and preparation of mineral waters, as well as for the establishment of a hospital for the relief of poor, insane, and indigent persons. The legislature also passed a law to encourage the development of new educational institutions, such as the New York University and the Pratt Institute.

1812-1815 was a time of war and conflict. The War of 1812 had a significant impact on the city, as it was a hub for the production of armaments and supplies for the war effort. The city was also a target for Britishnaval raids, which caused significant damage to the infrastructure of the city.

The construction of the New York City Hall and the completion of the New York City Subway were also significant events during this period. The New York City Hall was completed in 1812 and became the seat of the city's government. The construction of the New York City Subway began in 1823 and was completed in 1847.

The end of the War of 1812 marked a new era of growth and development for New York City. The city continued to grow and expand, with new industries and businesses being established. The period of 1812-1815 was a time of great change and transformation for New York City.
In laying out the streets and avenues the commissioners preserved certain old roads already shown on the Goeckler Map of the Corporation Lands (1796), such an Alhambra Ave. or West Road, Middle Road, and East Road. Thus, West Road was widened 40 ft. on the west side, making it 100 ft. wide, and was named Sixth Ave.; Middle Road which was 100 ft. wide was called Fifth Ave.; East Road was widened 40 ft. on the east side, making it 100 ft. wide, and was called Fourth Ave. and the other avenues were run parallel to these. The streets as laid out by these commissioners superseded the old roads; and the ground of the old roads was later conveyed to private buyers wherever not required for the new streets,—as, for example, the release of several old streets to James Lenox, Sept. 2, 1828 (City Grants, Liber 76, p. 243).—From remarks on Holmes' Map of the Common Lands (1874).

The commissioners’ report, together with the act of April 3, 1811, is the latest list of references to public buildings, churches, etc., was published (with some slight modifications) in 1811, in a 54-page pamphlet accompanying the so-called Bridges Map (see N 16, 1811).—Descrip. of Pl. 79, f. 471-73.

A supplementary act of the legislature was passed on April 9, 1811, "respecting Streets in the City of New York" (Laws of N. Y., 1811, chap. 148), which provided that "it shall and may be lawful for such persons as shall be appointed for that purpose by the Mayor, Aldermen and Commonalty of the City of New York in Common Council convened, to enter upon the lands of private persons and to run out streets and fix the boundaries thereof, and to erect monuments designating such streets and boundaries, according to the maps and plan of the said Commissioners, and generally the said persons shall be invested with power to do all such matters as may be necessary to carry the said plan into execution, upon the premises that the provisions contained in the 17th section of the act entitled "an act respecting streets in the City of New York" shall be and hereby are extended and applied to the proceedings authorized by this section." And about one year after the filing of the Commissioners’ Map, another act was passed, June 16, 1812, "relative to the opening, laying out and forming, and extending, and otherwise improving streets, avenues, squares, and public places in the City of New York" (ibid., 1812, chap. 174), which repealed sections IX, X, XI, of the act of April 3, 1807, and authorized certain debts to be funded. Again, on April 9, 1813, a revised law was passed making provision for street openings (ibid., 1813, chap. 86), and the substance of these acts was incorporated later in the act of 1815 (ibid., 1815, chap. 92), "relative to Public Squares and Places in the City of New York." For the various amendments to the act of April 9, 1813, see Gerard, 135-36.

On Oct. 26, 1812, the common council of the city adopted a resolution thanking Gouverneur Morris and John Rutherford for performing gratuitously "the arduous duties of Commissioners for laying out the Streets of the City," and each of them was presented with a coloured and mounted map of the City (doubtless the Bridges Map).—M. C. G. (1784-1871), VII: 287.

The act of 1807 required that the commissioners should "erect suitable and durable monuments at the most conspicuous angles . . . and upon the shores of the North and East rivers, to be noted on said maps." Their map and report show that they did as required; but on Dec. 31, 1808 (q.v.), John Randel, Jr. was engaged by the common council to erect monuments at the intersections of all the streets and avenues, and in the course of the next seven years he was occupied with this work.

Although the plan of the future city was to be "final and conclusive," many changes have been made in it by authority of the legislature. The principal acts modifying it are listed by Gerard, pp. 99-104. For Randel’s own testimony in regard to his appointment and work, see 1808; Hist. Mag., and see, III: 166 et seq.; and descrip. of Pl. 80-b, III: 498.

"The map and plan of the Commissioners," says James Kent, "laid out the highways on the island upon so magnificent a scale, and with so bold a hand, and with such prophetic views, in respect to the future growth and extension of the city, that it will form an ever-present monument of the stability and wisdom of the measure."

—Kent, Ch. 14, 1844. As a matter of fact it destroyed most of the natural beauty and interest of the island which, but for the commission of 1807, might have possessed the charm and variety of London.

The law passed on April 5, 1810, requiring all deeds of land in the city of New York to be recorded, commences operation.—N. Y. Ev. Post, Mr 26 and 28, 1811.

A lease to John Stevens of "the ferry at Hoboken to be navigated by Steam Boats" is ordered to be executed, and the steamboat company is ordered to report "what alterations are necessary to be made on this side the river to accommodate the Steam Boats."—M. C. G. (1784-1871), VI: 557. See S 18.

Washington Irving writes from Washington to his friend Henry Brewoof his arriving in that city after "a very expeditious journey of fifty-two hours from New York," having been "extremely fortunate in meeting with no delays." He tells us that at the moment of his arrival in Philadelphia "the packet was about starting from Newcastle so that we were in full sail in about twenty minutes . . . The next morning at half-past six we arrived at Baltimore, breakfasted and set off at eight in an extra stage, and reached Washington about half-past four in the afternoon."—Life and Letters of Washington Irving by Pierre M. Irving (1862), p. 276.

During the year ending on this day, three members of the board of directors of the N. Y. Tontine Coffee House Ann. died (Gullan Verplanck, Wm. Laight, and John Broome). This left only two surviving members (John Watts and John Delafield). In conformity with the constitution of the association—that, whenever the trustees, in whom the fee-simple of the Coffee House was vested, should be reduced to less than three, then five others should be elected, and the property conveyed to them—the two survivors now transfer their trust to Richard Varick, Matthew Clarkson, Francis B. Winthrop, John B. Coles, and Guillon Ludow. At this time the Tontine Coffee House was at the height of its commercial activity as a merchants’ exchange. It had operated as such since its opening in 1793 (q.v.), and the demolition of the East River wharves in 1799 (q.v.)—and so continued until the merchants’ exchange was opened on the south side of Wall St. in 1837 (L. M. R. K., III: 924, 925, 981).—Stone, Hist. of N. Y. City, 312-22.

At this time, the operation of the Tontine Coffee House was in the hands of Jas. Bredy, who had leased the house on Jan. 31, 1809. He was followed by Edw. Bard (April 3, 1812), Ebenzer Storer (Feb. 15, 1817), and Bethuel Bunker (May 2, 1823). As usual in these early days, the coffee-house was frequently referred to by the name of its proprietor. The provisions of their leases, in the case of this coffee-house, were about the same. The building was painted inside and out for Bardin, and an "orchesera" erected in "the Long Room on the second floor."—See the original papers in vol. lettered N. Y. Tontine Coffee House, in N. Y. H. S. See also Comm. Ads., My 3, 1817. See further, My 25, 1815.

The legislature passes a law providing that one third of the assessment for Canal St. shall be borne by New York City at large and two thirds by the property benefited.—Laws of N. Y. (1811), chap. 108. See also petition in metal file No. 43. city ch. rec., and other plans and maps of the city (M. C. G. (1784-1871), VI: 692, 728; N. Y. Ev. Post, Mr 7, 1811.

The legislature appropriates $34,500 for the support of the state prison, and orders that it be applied to "erecting a building for the female convicts; and to extend the yard of the southwest wing one hundred and six feet towards the Hudson river, and one hundred and nineteen feet along said river, and to erect such cellars and improvements as will be necessary to support the same."—Laws of N. Y. (1811), chap. 173. A southeast view of the state prison, made in 1814, is reproduced in Man. Com. Coun. (1837), 461. See Ap 12, 1820.

"Whereas a communication by means of a canal navigation between the great lakes and Hudson’s river will encourage agriculture, promote commerce and manufactures, facilitate a free and general intercourse between different parts of the United States, and tend to the aggrandizement and prosperity of the country, and consolidate and strengthen the union," Gouverneur Morris, Stephen Van Rensselaer, De Witt Clinton, Simeon De Witt, Wm. North, Thos. Eddy, Peter B. Porter, Robert R. Livingston, and Robert Fulton, are appointed commissioners for the consideration of all matters relating to the said canal navigation, and $15,000 is appropriated for the purpose of carrying it into effect.—Laws of N. Y. (1811), chap. 188. See also ibid. (1812), chap. 231, and Man. Com. Coun. (1838), 624-25. See Ap 17, 1816.

Wm. Bridges petition the common council "for the copy right of the map filed by the Commissioners of Streets and roads
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

8

Your Petitioners therefore pray that your Honorable Body will be pleased to cause the necessary steps to be taken for opening the said street called the Third Avenue from the Bowery road to the four mile stone on the Boston post road. . . . Among the signers are Bert. Peter Cruger, H. M. N. Cruger, Daniel D. Tompkins, Jr. Bayard Winthrop, Samuel Kip, John Y. Van Tuyll, Thomas Buckman, Mangle Cruger, Mr. Kip and Mr. Dixham, Thomas C. Pearsall, George Waite, and John Gilston.—From the original MS., with "Filed Papers, 1810-1814," city clerk's record-room.

On May 4, the board referred the petition to the road committee—M. C. C. (1784-1811), VII: 577. The committee's report, on May 10, 1811, was 578-579.

It says, in part: "That the public convenience, as well as the particular accommodation of the petitioners, make it desirable, that a street or avenue should be opened between the Bowery road and the east river."

"That from an examination of the Map, and a knowledge of the ground, it appears, that the 2d Avenue is preferable to the 3d in many respects, as well as in relation to the public, as to many of the petitioners, some of whom have so expressed themselves."

"The Committee therefore recommend that legal measures be immediately taken for opening the 2d Avenue from its commence-ment at first street to its intersection of the old post road between the New & five mile stones." From the original report, filed with petition. The report was read, and further consideration post-poned.—M. C. C. (1784-1811), VII: 586.

On May 20 (q. v.), the report was amended by inserting the words "and 3d Avenue" after the words "and 2d Avenue" in the last paragraph, and was agreed to by the board.—Ibid., VII: 597. The added words were also interlined in the original MS. report.

The common council orders that the Oswego Market be removed in order that Maiden Lane may be widened to 50 feet.—M. C. C. (1784-1811), VII: 590. On Oct. 7, an ordinance was passed for widening the street.—Ibid., VII: 753, 732. See My 20.

"It is much to be regretted that some attention is not paid to the repairing the pavements of the sidewalks of our city. Broadway, Wall-street, and a few more excepted, the most shameful neglect prevails in this particular. In some places the roots of the poplars loosen the bricks, and the hogs amuse themselves with snouting them up, in order to devour the roots; which, to be sure, has a very rural and picturesque effect in a populous city. In other places, the bricks are so worn away, that the foot passenger, in the evening, is continually stumbling; and strangers are apt to mutter a curse against our excellent police, for not having these things in better order . . . ."

"There are many obstructions in the side walks, which, if practicable, ought to be removed; such, for instance, as steps and cellar-doors. By contracting these, many of our narrow streets might be much improved, both in appearance and convenience."—N. Y. Eve. Post, My 7, 1811. Another complaint against obstruc-
tions in the street appeared in ibid., My 11, 1811.

The 2d anniversary of the Tammany Society falling on Sun-
day, it is celebrated on Monday, and the corner-stone of the first Tammany Hall or "Great Wigwam" erected by the society is laid on the southeast corner of Nassau and Frankfort Sts. (see L. M. R. K., III: 939). Addresses are made by Clarkson Crollius, grand sachem, and Alphus Sherman. In the afternoon the society had dinner at Martling's Tavern, where they were "hoUSED with the attendance of maj. Paulding, one of the surviving captors of maj. Andre . . . and several other survivors of the revolution." The Manhattan Society also joined in the celebration, and the Tammany men who were confined in the debtor's prison commemorated the day there. Joseph Delacorte held a special exhibition of fireworks at Vanrall's Garden in honour of the occasion.—Columbus, My 10, 16, 17, and 18; N. Y. Eve. Post, My 11; Pub. Adv., My 15 and 18, 1811. Ineffectual attempts to build a Tammany Hall had been made in 1792 (q. v.; Ja 18, 25, and Mr 8) and 1802 (q. v.; D 9), and the success in 1811 was due to Col. Rutgers and others, through whose efforts the sum of $12,000 was subscribed.—Man. Com. Cour. (1805), 869.

The corner-stone of this first Tammany Hall has been pre-
served by the society, and bears the following inscription: "Tam-
many Society or Columbian Order. Founded by William Mooney in 1786 [see Ap 30, 187]. Organized under a Constitution and
THE ICONOGRAPHY OF MANHATTAN ISLAND

1841 Laws in 1769 [q. v., Mr 9 and Ag 10]. William Mooney 1st Grand May Sachem. New York May 12th 1789."—Kilroe, Saint Tammany, 13. 119. For brief history of the building, see 21st Ann. Rep. Am. 11th & 12th and 14th; and descrip. of Pl. 163, 146. See Ja 6 8 9 and My 1 2 3.

The bridge committee directs its clerk to lend to Wm. Bridges "the map of the Commissioners of Streets & roads [see Ap 1] to enable him to complete the copy of the same" (see Ap 8).—M. C. C. (1784-1831), VI: 587.

Proposals are advertised for publishing the Bridges Map—Pub. Ad., My 13: Columbian, My 16, 1811. The map is reproduced and described as Pl. 80 b, Vol. III. See also N. 16.

An engagement takes place off the coast, between the U. S. frigate "President" and H. M. S. "Little Belt," in which the latter is greatly damaged, and 32 Englishmen and one American are hurt. Each commander accused the other of firing first.—McMaster, Hist. of the People of the U. S.: III: 405-411. For the diplomatic correspondence regarding the affair, see N. Y. Spectator, N 16 and 20, 1811. See My 23.

On this Sunday morning a fire breaks out in Chatham St., destroying almost 100 wooden buildings in the vicinity. The steeple of the Brick Meeting House and the cupola of the jail catch fire, but both are saved, the former by a sailor and the latter by one of the prisoners. St. Paul's Chapel, St. George's, and the Scotch church steeple are also threatened, but not burned.—Columbian, My 20, 21, and 23; Pub. Ad., My 20 and 21; and N. Y. Evoc. Post, My 21, 1811. See also Man. Com. Coun. (1866), 598; and Wilson, Mem. Hist. N. Y.: III: 208. On Aug. 5, the common council decided to pay $40 to the man who extinguished the fire on the jail.—M. C. C. (1784-1831), VI: 679, 676. See also ibid., VII: 591, 595, 596, 603, 610, 618.

The common council resolves "that the market committee be authorized to remove the present Oswego market house [see My 6] into Vesey Street below Washington Street and to erect such part of it there, as they may think proper."—M. C. C. (1784-1831), VI: 596. De Voey says: "no doubt the old 'Old Swaga' market's sound bones and ribs were left in the present Washington Market" (see J. 1).—De Voey, Market Book, 340.

The road committee and street commissioner are directed to take necessary steps toward opening Second and Third Aves. from their commencement at First St. to their intersection with the Old Post Road between the fourth and fifth mile-stones.—M. C. C. (1784-1831), VI: 597. See Je. 3.

News of the "President"-"Little Belt" engagement (see My 16) reaches New York.—N. Y. Spectator, My 23, 1811.

The fire committee meets at Bellevue and decides upon the site for the new almshouse which is to be erected on the land purchased from the heirs of Samuel Kip (see Ap 20).—M. C. C. (1784-1831), VI: 577, 599. On May 27, the plan for the building was adopted.—Ibid., VI: 606. The corner-stone was laid on July 29 (q. v.).

The common council passes a law imposing a tax upon all owners of dogs of three dollars for each dog, and prohibiting the running at large of all dogs.—M. C. C. (1784-1831), VI: 596-97, 603-5. The law was amended on June 10.—Ibid., VI: 625.

Sundry inhabitants petition the common council "that a road might be opened from Harrison village to the New River," and the subject is referred to the road committee.—M. C. C. (1784-1831), VI: 601. On June 17, the common council agreed to accept a cession of the ground from Jacob Harsen and Wm. S. Cock, (q. v.) and to open the road accordingly.—Ibid., VI: 629.

The corner-stone of the Third Associate Reformed Presbyterian Church is laid in Murray St. in the rear of Columbia College.—N. Y. Gen. & Gen. Ad., My 30, 1811; N. Y. Spectator, Je 1, 1811. See also M. C. C. (1784-1831), VI: 388. The church was completed in 1812, and, as Dr. John M. Mason officiated there until 1821, it became well known as "Dr. Mason's Church." It was this edifice which, in 1842 (q. v.), was taken down and rebuilt on the north side of 8th St. fronting Lafayette Pl.—Greenleaf, 207-9; L. M. R. K., III: 932. The appearance of the "Murray St. Church" (as it was also called), as it was 20 years after its erection, is seen in an engraved view published in the N. Y. Mirror, VII, opp. p. 289. It ceased to be used by the Presbyterians on Sept. 29, 1846.

The common council resolves to extend Hudson St. to meet Eighth Ave.—M. C. C. (1784-1831), 612. On Sept. 16, the committee on the subject presented a map drawn in June by Wm. Bridges, city surveyor, on which was delineated the course which in their opinion the street ought to take. It was resolved that the street be continued in the direction of and agreeable to the dotted line marked on this map, and that the map be filed in the office of the street commissioner.—Ibid., VII: 606.

The common council requests the Bellevue committee "to direct Mr. Randell to run out the lines of the Second & Third Avenues [see My 20] and also such of the Cross Streets, as they shall deem necessary for the convenience of the Public buildings about to be erected at Bellevue." It also appoints a "General Superintending Committee whose duties shall be from time to time "to direct & instruct Mr. Randell in running out the lines & fixing the monuments of the several streets on the island agreeably to the map of the Commissioners of Streets and roads."—M. C. C. (1784-1831), VI: 619.

The street commissioner is directed to report "a plan of piers for the accommodation of the Steam Ferry Boats at Paulus hook with an estimate of the probable expense of the same."—M. C. C. (1784-1831), VI: 625. He reported on June 24 a "plan proposed by Mr. Fulton" accompanied by a drawing to illustrate the intended improvements. This was referred to the steam ferry-boat committee.—Ibid., VI: 638-39; original report in metal file No. 44, city clerk's record-room. The essential parts of Fulton's plan were adopted by the common council on July 1.—Original report in same file; M. C. C. (1784-1831), VI: 647-48.

The common council authorizes the Bellevue committee "to use the huts erected on those grounds for work shops or in any other way they shall judge advisable."—M. C. C. (1784-1831), VI: 625.

The common council agrees to extend Chambers St. to Chatham St.—M. C. C. (1784-1831), VI: 606, 625.

It is resolved by the Trinity Corporation "that from the Circumstances and Situation of the Congregation associated with Trinity Church it has become expedient that the connection between Trinity Church and St. George's & St. Paul's Chapels be dissolved, and that the said Chapels be endowed and Established as separate Churches in like manner as Grace Church has been established."—Trin. Min. (MS.). See N. 4.

A committee appointed to consider what improvements might be made in the fire department reports "That the principal difficulty in extinguishing fires is to procure a sufficient supply of water, at an early period. In the central parts of the city, the pumps and cisterns, which are principally relied on are soon exhausted and before a line composed of engines & leaders can be formed to the fire, the fire may & often do get to a great height." The board therupon agrees to the following resolutions recommended by the committee:

1st Resolved, that two reservoirs of stone sufficient to contain two hundred hosegears each be built & placed at or near each wing of the New City Hall to be supplied from the roof thereof; and that the water be used for no other purpose than the extinguishing of fires.

2d Resolved, that it be recommended to the different religious societies in the city to cause to be built a reservoir for water, at or near their respective places of worship, to be supplied with water from their respective places of worship, and that the water be used only at fires.

3d Resolved, that a new supply engine be built under the direction of the Committee on the fire department.—M. C. C. (1784-1831), VI: 631-32.

The British frigate "Melampus" fires upon the pilot boat "Brothers" off Sandy Hook.—N. Y. Evoc. Post, Jl 1, 1811.

The common council directs the street commissioner to contract for 15,000 loads of earth "to be deposited in such parts of the collect where it is most wanted," and resolves that "three temporary bridges be erected over the ditch [in Collect St.], in such places as will be most convenient to the citizens."—M. C. C. (1784-1831), VI: 625, 640.

The common council pays Wm. Hoghland $100 "for a plan of New Alms House at Bellevue."—M. C. C. (1784-1831), VI: 632-33.

The common council authorizes John Randell, Jr. to "cause the South side of North Street to be surveyed," and to "ascertain and fix the lines of the street, from which the avenues take their direction."—M. C. C. (1784-1831), VI: 641. See Ag 10, 1812.
The Commissioners appointed by joint resolutions of the Honorable Senate and Assembly of the State of New York of the 15th and 18th of March 1810 to explore the route of an inland navigation from the Hudson's River to Lake Ontario and Lake Erie beg leave to...

Report

That they have examined the country as critically as time and circumstances would permit, and caused surveys to be made for their better information.

They beg leave to observe on the present navigation by the Hudson, River? West End, Oneida Lake, and the Genesee River, which extends from Schenectady to Lake Ontario (saving only a portion of the falls within twelve miles of Schenectady) that experience has long since exploded in Europe the idea of using the beds of rivers for internal navigation when Canals are practicable. The reasoning on that subject applies with greater force in America. For in the navigation of Rivers, reliance must be laid principally on the labour of Men, whereas along Canals the same employed is generally that of Horses. But the labour of Men is dearer and the subsistence of Horses cheaper in America than in Europe.
Robert Fulton writes to Joel Barlow: "My time is now occupied in building North River and Steam ferry boats, and in an interesting lawsuit to crush 12 Pirates who have cheated their passengers and freight. I have actually started my own inventions in opposition to me by running one trip to Albany: her machinery gave way in the first voyage and she is now repairing, which will detain her I presume until we obtain an Injunction to stop her. A more infamous and outrageous attack upon mental property has not disgraced America."—Dickinson, Robert Fulton, Engineer and Artist, 249-49.

The common council agrees that, "on their adjournment, they would adjourn to meet on the 4th instant at the New City Hall at 12 o'clock."—M. C. G. (1784-1831), VI: 649. See Jl 15.

"The Triumph of America" is the title of Delacroix's spectacular display of fireworks, etc., this year at Vauxhall.—Columbian, Jl 3, 1811. It proved to be his last performance.—See Jl 31.

Venona is detectives its independence of Spain.—N. T. Eve. Post, Ag 28, 1811.

"The inhabitants of the southern part of our city have not had a pitcher of Manhattan water for the last five or six days. The extreme heat of the weather, and the parching drought which at present affects the city, have made this unaccountable deprivation doubly afflicting. We are informed that the northern parts of the town have been amply supplied; how then does it happen that the southern parts are entirely neglected? There must be an unaccountable fault somewhere. The citizens pay a high price for the necessary article of water, and to be deprived of it when it is most wanted is not only extremely vexatious, but it actually endangers the health of the people. . . ."—Com. Adv., Jl 6, 1811. See also Ag 5.

Mr. Palmer, "who directs the Diving Bell, on board the gunboats, now in Hurl-Gate, and who has been for some months past, without avail, endeavouring to obtain a part of the wrecked British frigate Huzza, which sank there during the revolution," (see N 23, 1780), succeeds in getting up her rudder. "The quantity of copper which is in it, together with the chains and bolts, will have considerable value. . . ."—Columbian, Jl 16, 1811. See, further, Jl 18, 1818.

The common council resolves that "on the Second Monday of August next, the Common Council will meet for public business, at the New City Hall in the room intended for the Mayor's office; that the old furniture be used, until the Council Chamber is completed and that the Common Clerk & Street Commissioner be also directed to remove their respective offices to the apartments intended for them."—M. C. G. (1784-1831), VI: 655. See Ag 5.

Under the heading "Military Hall," Robt. Dyde "respectfully informs military gentlemen his ground is now well laid out, and is perhaps the best that can be found so near the city for troops to exercise in, and has likewise built a Target Bank for Riflemen to practice at, upon the same plan as those in Hyde Park, London." The ground is "Little more than a mile up the Broadway, on the left-hand side."—N. T. Morn. Post, Jl 18, 1811. There was a sham battle here on Aug. 16.—Ibid., Ag 16; Columbian, Ag 17, 1811. See also Morn. Post, Ag 31, 1811.

The common council appoints a committee "to take into consideration how far it would be expedient to fill up the Collect and whether it would not be expedient to leave some of the Springs of fountain of it open & report thereon to the Board."—M. C. G. (1784-1831), VI: 660.

Col. Ireneé Amelot de la Croix, formerly "Chiel de-Brigade in the French service," establishes in New York a school of military instruction and proposes a view to forming a "Battalion of Independent Cadets." His published notice says that "the system introduced by Baron Steuben into this country, and all other systems of the old school, were good in former times, but must now be totally reformed, to enable America to cope, in case of necessity, with the wonderful improvements in the science of war, invented at the close of late years."—N. T. Morn. Post, Jl 26, 1811. His "Military Room" was "contiguous to the Commonhall, upper story, at the Circus, with award of prizes, for the military exercises, fencing, etc., of his pupils."—N. T. Morn. Post, O 17, 1811; see also ibid., O 22, 24, 25, and N 3, 1811.

The corner-stone of the new almshouse (see My 24) is laid under the southeast corner of the chapel wing—Goodrich, Picture of N. T. (1828), 96; Man. Com. Comn. (1859), 577; Address of
common council holds its first regular meeting "in the New City Aug. Hall, in the room designated for the Mayor's office."—M. C. C. 1784-1785.

"The statue of William Pitt (see Jl 16, 1788) is presented to the Academy of Fine Arts by the common council. "Though, at present, in a very mutilated state," it is deemed worthy of preservation, "on account of its excellent workmanship [see Ag 3]."—M. C. C. (1784-1831), VI: 675-76. The statue was in the same custody in 1827 (N. T. Daily Adve., Jl 25, 1827), and continued to be probably, until 1841 (q. v.), when the society was dissolved. For the next mention of the statue, see 1841.

"The Managers of the New-York [Park] Theatre have pleasure in announcing to the public, that, during the vacation, the internal part of the Theatre has been painted in a style of splendour and ornament far surpassing what has been before exhibited in this city. They have also been altered so as to present an entirely new appearance, and to afford very considerable comfort and accommodation to the ladies visiting the Theatre. The Managers trust that the arrangements they made for lighting the house, will not only answer the purpose of display, but that the theatre will be kept perfectly clean and free from smoke. The front of the house still retains its unique appearance.

The Theatre will be opened on Monday, September 2d."—N. T. Eve. Post, Ag 13, 1811. The theatre was again re-decorated in 1816 (q. v., Ag 26 and S 3).

"A French picaroon privater full of men, came into Sandy-Hook last night, and is skulking about in our bays and creeks, no doubt in search of plunder. . . . After the repeated and outrageous robberies that have been committed by these free-booters, against American vessels, and sometimes in our own waters, it behoves defenceless merchants, who are about sailing, to be on their guard."—N. T. Eve. Post, Ag 14, 1811.

With this issue of the date, the title of the Public Advertiser (daily) is changed to American Patriot, and Public Advertiser.—Brigham, A. A. S. Proc. (1917), 485; Early Newspapers, II: 427. See Ap 20, 1812.

As "an old obtrusive building" is removed "from the site at the head of Agustus-street, near the alsms house," and there is thus formed "a beautiful space, which is already decorated with every requisite for a growing park."—Am. Patriot, Ag 19, 1811.

"The common council authorizes the street commissioner and superintendent of repairs "to cause the Old Canal in Canal Street to be kept open, if they judge it proper."—M. C. C. (1784-1831), VI: 682. See also ibid., VI: 707.

"Thanks are certainly due to the proprietors who keep the Flag-Staff on the Battery, for their assiduity to render it a pleasant place of innocent amusement during these warm summer evenings. Many thousands of Gentlemen and Ladies resorted to the Battery last evening, and were highly delighted by the performance of an excellent Military Music, accompanied with Fireworks. A number of rockets were set out from the Flag-Staff, and by a gentle breeze from S. E. were carried in a direction across the North River, and produced the most pleasing effect."—N. T. Eve. Post, Ag 21, 1811. See also Janvier, In Old N. T., 259. See, further, Ap 1, 1812.

The British letter-of-marque "Tottenham" is brought into New York Harbour as a prize by the French privater "Duke of Dantzig."—N. T. Eve. Post, Ag 28 and 29, 1811.

Sept.

The common council resolves "that the Building Committee be requested to designate the rooms in the New City Hall for the several offices of the Corporation and of the State and report thereon to the Board."—M. C. C. (1784-1831), VI: 696.

The Manhattan Society celebrates its first anniversary. After forming in line in front of their "Great Wigwam" in the Bowery, the society parades down the Bowery and Chatham St. to the Park, around the Park, up Broadway, down Chamer St. and up Green- wich St. to the State Prison. After visiting the prison, the procession moved along Sandy Hill and Stuyvesant St. to "Brandy- muley Point." Here James Elliot delivered an address, and after a short interval, the society dined and drank toasts.—Pub. Adve., S 10, 1811.

Two English frigates (one the "Guerrrière") and a brig are cruising off New York Harbour. "Their declared purpose is to keep a look out for the French privaters which swarm on the American coasts and take shelter and refit in our harbours."—N. T. Eve. Post, S 9, 1811.

"A Watchman" writes to one of the papers: This harbor is intended to be defended by several strong, and I believe well constructed, batteries. The Tottenhams have been nearly completed, and have their guns mounted; and I presume, if manned, would present such a powerful barrier to an enemy approaching the city, as to dispose them to advance with great caution. But alas! the impropriety of our government has never been more clearly discovered, than it has respecting these works. The Water Battery at Staten Island, called Richmond, when all the guns are mounted, is some distance from any dwelling, and is left without any guard; what is then to prevent one of the British frigates, now lying at the Hook, from sending up one or two well armed boats with muffled oars, at night, and spiking all the guns? The same might be done at Castle Williams, and even at the works at the foot of Dnane street. It is astonishing to think that with a government so poorly provided for our present critical situation, whilst our enemy is using every exertion to place her provinces, bordering on us, in the best possible state of defence—her troopers are assembling on our frontiers, and her ships are blockading our harbors. . . . The most important work in the harbor is in the most incomplete state, and might with the greatest ease be possessed by an enemy."—N. T. Eve. Post, S 12, 1811.

Benjamin Waldron advertises that he has erected "a large Target in a field adjoining his garden, situated in Stuyvesant-street, near the two mile stone, Bowery. Any number of gentlemen, civil or military, may have the use of this Field and Target gratis: likewise he can furnish them with Liquors. . . ." Waldron's place is called the "Sign of the Noah's Ark."—Com. Adv., S 11, 1811.

An advertisement reads: "Hoboken Steamboat.—Mr. Godwin respectfully acquaints the citizens of New York and the public at large, that he has commenced running a steamboat on the Hoboken Ferry, of large and convenient size, and capable of affording accommodation in a very extensive degree. The boat moves with uncommon speed and facility, and starts from the usual ferry stairs, at the Corporation wharf, foot of Vesey Street, New York, where passage may be taken at any hour of the day. . . ."—Columbian, S 18, 1811. This was "the first announcement of a steam ferry boat."—Stone, Hist. of N. T. City, 355. On Sept. 30, the common council accepted an invitation from John Stevens to inspect the new steamboat, and on Oct. 14 the members who "crossed the river in the Hoboken Steam ferry boat" expressed "their approbation of the same."—M. C. C. (1784-1831), VI: 714, 723, 721. See also De Vo, Market Book, 194. See Je 7, 1813.

A New Yorker, in a communication to one of the papers, describes an experiment he performed, "in the rear of Mr. Lispenard's house," to illustrate a "new method of blowing rocks with powder."—Repeartory (Boston), O 22, 1811 (in the archives of the Peconic). Lispenard owned the nearby Nineveh.

A New Yorker writes to one of the papers that, although Philadelphia is "allowed to be nearly the same size as New York," it employs only about 40 watchmen who also act as lamplighters and receive about $10,000 a year, whereas New York has 150 men employed as watchmen only, and pays them from $45,000 to $50,000 per annum.—Moc. Adv., S 9, 1811. The common council appointed a committee to "procure suitable furniture for the Common Council Chamber in the New City Hall."—M. C. C. (1784-1831), VI: 721.

The new fort erected on the lower point of Staten Island, Oct. at the Narrows" is opened "under the designation of Fort Hud- son."—Aurora Gen. Adv. (Phil.), O 7, 1811.

Mayor Clinton informs the common council that "a dan- gerous fever" prevails in the bridewell and some of the sick have been sent to the marine hospital on Staten Island. He adds that it is necessary to cleanse and ventilate the bridewell, and the corporation authorizes the board of health to take measures "for remediying the evils complained of and for the preservation of the health of the city."—M. C. C. (1784-1831), VI: 722.

The common council appointed a street commissioner to open "the ancient drain through which are called Lispenard's meadows to the Hudson River."—M. C. C. (1784-1831), VI: 722.

The deputation of the seven Indian Chiefs of the Ottowa tribe, under the direction of Dr. Le Baron, have arrived here from Washington, having settled a treaty with the United States—they leave this [city] on Wednesday [Oct. 18]. We understand they
will attend the Theatre to night, dressed in their national costume."—N. Y. Ev. Post, O 16, 1811.

17 The 1st, 2d, and 3d Regiments of Gen. Morton's brigade and the troop of horses, &c., are ready on the orders of Gov. Clinton for Gen. Stevens. "Their fifings and evolutions were performed in a style that reflected the highest honour on both officers and men."—N. Y. Ev. Post, O 18, 1811.

28 The common council passes the following resolution: "Whereas it has been represented to the Common Council that sundry persons owners & proprietors of Great Barn Island under a pretence of having power from the Legislature of the State of New York to erect a Bridge across Haerlem river & to keep the same in repair, have in part filled up the Channel with Stone and are now actually engaged in extending such nuisance & which it is apprehended will greatly increase the Current of the East river & injure the navigation thereof, for prevention of which Resolved that his Honor the Mayor be authorized & requested to cause such coercive measures to be taken as he may deem proper & sufficient to prevent the Channel of Haerlem river from being further obstructed except so far as may be actually necessary for the purpose of repairing the said Bridge."—M. C. C. (1784-1811), VI: 739, 741. See also ibid., VII: 750.

A general committee of surveys is requested to take charge of the stone monuments marking the streets on the island, and see they be not injured.—M. C. C. (1784-1811), VI: 741.

The vestry of Trinity Church approves a report which prescribes terms for the separation of the congregation of St. George's Chapel, which will become incorporated as "the Rector, Church Wardens and Vestrymen of St. George's Church in The City of New York."—Trinf. Min. (J.S.). See N. 24.

 Gunnison, of the surveyors of Greenwich Village is complained of.—M. C. C. (1784-1813), VII: 743.

"It having been represented to the Board that a very considerable number of the Maps of the City remain unsold," it is referred to the comptroller and clerk of the board "to sell them to the best advantage" that they can.—M. C. C. (1784-1813), VII: 744. The Goerck-Margin Map (see E. Post, Vol. I) is in the one referred to.

Amos Comminus, city surveyor, makes a plan of a proposed sewer from Pearl St. through Collect and Canal Sts.—See original (map No. 153), in bureau of topography, borough president's office, Municipal Bldg. Another plan, filed in the same place as map No. 161, shows a sewer in Canal St. between Collect St. and the Hudson River. This is endorsed "Built 1811" and "Canal Street ditch."

Gen. William H. Harrison defeats the Indians at Tippecanoe.—

Winter, VII: 756-76, 454.

Free School No. 5, in Henry St., is opened to pupils. —Com. Adv., My 6, 1812. See also L. M. R. K., III: 941.

18 William Bridges publishes an engraving of the Randall Survey (or Commissioners' Map), bearing copyright date of Nov. 16, 1811. This is in the most correct style, to the Board it is "of the most important service," and its members endorsed it favorably. The street which led to the making of this map appear in the following brief history of his connection with the city as surveyor. He was appointed city surveyor May 19, 1806 (q. v.). His map-making began at this early period. Four years prior to the publication of the so-called Bridges Map, an advertisement appeared in the Ev. Post of Sept. 22, 1807 (q. v.), announcing: "This day is published by Isaac Riley and for sale by Brishman and Brannan, City Hotel, Broadway, a plan of the City of New York, with the recent and intended improvements.—Drawn from official survey, by William Bridges, City Surveyor. Either in sheets, mounted on rollers, or in cases for the pocket." On March 7, 1808 (q. v.), for reasons not stated in the minutes, he was dismissed from office. One year later, April 10, 1809 (q. v.), he petitioned the common council for reinstatement, and the petition was granted.

On Dec. 24, 1810 (q. v.), Bridges stated in a communication to the board the terms on which he was "willing to fix permanent marked stones," and his letter was ordered to be "lie on the table." On the 31st, however, John Randel, Jr., being the successful one to enter into a contract with the board to do this work of setting up marks and in the intersecting of streets as laid out by the Commissioners' Map (see D 17 and 31, 1810), undertook its execution. Bridges now arranged to act as publisher of the Commissioners' Map. On April 8, 1811 (q. v.), he petitioned the common council for the copyright of the map filed by the commissioners of streets and roads, offering to have it engraved, and to furnish the corporation with free copies. The petition was referred to the committee to whom the Commissioners' Map had been referred: Alderman Fish, Mr. Hardenbrook, and Mr. Jones. This committee, on April 9, reported "agreeably to the request of the common council they have examined the said Map, and are of opinion that they give exclusive permission to Mr. Randel to make a copy of said Map, on condition that he furnish to this Board 50 copies of free of expense, it being understood that he make compensation to Mr. Randel for certain memoranda and explanations respecting said Map," which at the request of the committee Mr. Randel was to furnish. On May 15 (q. v.), Mr. Bridges wrote to the common council requesting the loan of the Commissioners' Map to enable him to complete the copy of it, on which he was now engaged; and it was ordered that the clerk of the board lend it to him. On the same day there appeared in the Public Advertiser an advertisement entitled "Proposals for publishing," which was an announcement of his intention of placing his issue of the map on sale, "with the Figural Notes and remarks, appinted to the said Map."

The Bridges Map was sold by subscription, the list of subscribers being printed at the end of Bridges' book, which accompanied it. This book also contains the laws of April 3, 1807, and of March 24, 1809 (regarding the duties of the commissioners), the commissioners' remarks (which originally accompanied the Commissioners' Map), and a list of references to the public buildings, churches, etc.

A year after the Bridges Map was issued, Mr. Bridges found that his privilege to reproduce the Commissioners' Map was not an exclusive one as he supposed. To use his own words, as stated in the minutes, he believed that the right to publish the map was to be "exclusively his property," for he wrote to the common council, on Nov. 23, 1812, "that at the time the Corporation gave to him the right to print the Map of the City and Island furnished by the Commissioners of Streets and Roads it was understood that the same was to be exclusively his property; that as a consideration therefor he agreed to furnish to the Common Council sixty maps; but that it had been discovered that as the Map was a public record exclusive privilege to publish it could not be given to him."

He asked the common council, therefore, to say what number of maps he ought to furnish under such view of the case; and the subject was referred to the committee of surveys with authority to settle the matter with him as they should consider just and equitable.—M. C. C. (1784-1811), VII: 305. The committee reported on Jan. 4, 1813 (q. v.), that on information it was evident "that Mr. Bridges commenced his operations for publishing the Map under an erroneous construction of the resolution of the Board. His impression was that an exclusive right was conveyed to him, by virtue of the resolution, and when too late convinced of his mistake, he was compelled, to prevent competition, so to reduce the price, and they added that, "unless the Corporation grants him some indulgence, he must inevitably be a sufferer."

The committee recommended "that, upon his producing certificates to the Comptroller of having delivered forty Maps completely mounted, and furnished to the subscribers, he be ordered to be paid $20 per Map to Mr. Randel, and the comptroller be directed to pay him therefor as follows: $9 per map for 30 maps, and $15.50 per map for 10 maps, he to be entitled to receive back again all unmounted sheets already delivered. The minutes of Nov. 1 and 29 state that the city gave copies of the map of the city (probably the Bridges Map) to the commissioners and the purveyor of the almshouse and to certain former members of the common council, other copies having been already given out."

John Melish (see Ag 4, 1806 and Je 30, 1810), quoting from "A Brief Topographical and Statistical Manual," which he saw during a tour of New York State, gives a table of statistics about the different counties. This table shows that New York County has a population of 96,773, two post-offices, three town-halls, nine saw-mills, eleven distilleries, fifteen breweries, five hat factories, and two carding-machines.—Travels in the U. S. etc., II: 427.

"Penn" writes to one of the papers in praise of the "New York African Free-School, which is kept in a building in Cliff-street, which, altho' not sufficiently commodious for its object, yet above one hundred children of the African race, are enjoying here, the advantages of education..."—Com. Adv., N 25, 1813.

The first meeting of the vestry of St. George's Church, as a separate corporate body, is held.—Antioch, Hist. of St. George's Church, 54.

The common council approves the draft of a letter from Mayor Clinton to the governor of New Jersey "on the subject of Aliens.
As a "set of Tapestry" has been recently imported into the city "which would be highly ornamental in furnishing some of the apartments in the New City Hall," the common council authorizes the committee on the furnishing of the common council chamber "to purchase the said set of Tapestry for account of this Board if in their opinion suitable."—M. C. C. (1874-1871), VI: 760-62.

Dec.

In this month, Geo. and Robert Waite began to publish a weekly of quarto size called the New York Weekly Messenger. The last issue located is that of Oct. 2, 1813.—Bingham, A. A. S. Proc. (1917), 506.

A correspondent suggests that a subscription be opened in New York for erecting a statue of Washington.—Columbian, D 8, and earlier attempts had failed (see D 15, 1802, and Ja 20, 1806), and nothing was done at this time. The matter was revived in 1821 (q. v., O 1). See also F 4, 1812.

Five years ago it was considered impracticable to make a useful steam boat, and Livingston and Fulton were universally ridiculed for the attempt, but now there are 13 steamboats in the U. S.—Aurora Gen. Adv. (Phila.), D 9, 1811.

"Aqueduck Rhode Island Coal" is for sale at the "Coal yards of March & Van Tassel, near the bottom of Warren street, and Prince and Waterbury, a few doors above Peck-slip in Water-street."—N. T. Morning Post, D 10, 1811. On Dec. 28, directions were given for setting the coal on fire.—N. T. Eve. Post, D 28, 1811.

Gov. Tompkins writes from Albany to Alderman Peter Mesier: "It is very certain that it will not be advantageous to the state to repair the Government House in New York, and it is equally true that without very extensive repair it will soon be a brothel to the city. The corporation did once, I think, offer the state 50,000 Dollars for it, which was thought, by the Surveyor General and others here, to be an inadequate price, and indeed the amount for which some goes near Mr. Gracie's sold, evinced that the price offered by the corporation was far below the real value of the Government House and Ground. My own opinion is that $35,000 equal to $62,500 would be a proposition to which the Legislature would accede, and in case that offer shall be made I shall use my influence to induce them to accept it. It appears to me the first thing necessary to be done on your part is to have an accurate survey made of the Ground. The next thing will be to procure a Resolution of the corporation 'reciting the ruinous and disreputable appearance of the Buildings and fences.' The provisions of the act which prevents the state from appropriating the ground to any other than public uses [see Mr 16, 1790], and the objects of the corporation in wishing to have it retained for public uses &c., and then resolving that they will give such a price in stock or money for securities for money to be applied to the purchase of Ground and the erecting a Government House at Albany or to such other publick object as the Legislature may direct. Upon my being furnished with an official copy of such Resolution with a survey annexed, I will make it the subject of a special message and doubt not that a bargain will be immediately closed."—Pub. Papers of Daniel D. Tompkins, III: 382-83.

The letter was laid before the common council on Dec. 30 and referred to a committee.—M. C. C. (1874-1871), VI: 792. See My 26, 1812.

Peter R. Maverick, the engraver, dies at No. 73 Liberty St.—N. T. Eve. Post, D 13, 1811.

Four or five buildings on Broadway, beginning at the corner of Water-st, are destroyed by fire.—N. T. Spectator, D 18, 1811. "A Citizen" writing on Dec. 16 praised the "activity and zeal displayed by the firemen." He added: "They have brought their system to a great degree of perfection; ••• The leather hose which they now employ have entirely superseded the necessity of the ranks which formerly required the exertions of all the citizens, so that at present few more persons are necessary than immediately connected with the fire companies. •••"—Com. Adv., D 19, 1811.

The completed fortifications at New York are described in a report to congress, made by order of the president. Briefly, these consist of:

Fort Columbus on Governor's Island, consisting of an enclosed work of masonry, comprehending four bastions and a ravelin; a brick magazine; brick barracks; and a furnace for Dec. 17 heating balls red hot.

Castle Williams, a fortress on a projecting point of Governor's Island, with a bomb-proof covering, and two stone magazines; another stone magazine on that island, a brick arsenal, a wooden gun-house, and wooden barracks.

A star fort of masonry on Bedlow's Island, having a stone magazine; with barracks of brick, and a brick arsenal.

A circular battery of masonry on Ellis Island, opposite Fort Columbus, with barracks of stone and wood.

A circular battery of stone at the south-western extremity of the city (the present Castle Garden), having 28 heavy cannon mounted; two magazines and cisterns, and barracks. See L. M. R. K., III: 932.

North Battery, about a mile up the Hudson, a semi-circular work of stone, a stone magazine, and a furnace for heating shot.—See L. M. R. K., III: 924.

A brick arsenal near the custom-house (formerly the government house), and a three-storey brick magazine.—See L. M. R. K., III: 924.

An arsenal near the junction of the Harlem branch (East Post Road) and the Bloomingdale branch of the Bowery Road (see Pls. 175 and 176, Vol. III), together with a magazine, and a laboratory, all of stone and brick, and enclosed with a high wall. See L. M. R. K., III: 924. —Am. State Papers, Docs. of Congress (1832), 190-10; and the same reprinted in Man. Com. Coun. (1868), 882-83.

... The militia of the city and county consist of ten regiments of infantry, one battalion of riflemen, one squadron of cavalry, three regiments of artillery, one company of flying do, and one company of veteran volunteers. The field-pieces are of brass in complete order for service, and well provided with ammunition.

"Exclusive of these, the heavy iron pieces, mounted on traveling carriages, and the small arms and accoutrements, in the arsenal, under commissary M'Lean, are numerous and in perfect readiness, but to what amount we are not precisely informed.

"The fortifications belonging to the United States, exclusive of the forts of the Narrows, and immediately attached to the city, are as follows, and could be strengthened by almost any number of cannon at the shortest notice.

—Columbian, D 19, 1811.

"Those citizens who are in the habit of walking or riding out to Corlear's Hook or Manhattan Island, are informed, that now, by order of the corporation, both Broome and Grand-streets are open which make their passage extremely dangerous, particularly at night. Travellers may at least save much trouble, and perhaps life, by keeping the Bowery as far up as Delancy-street, before they cross— or, by keeping Cherry-street; both of which routes are perfectly safe, and but little farther than the dangerous passages above mentioned."—Columbian, D 20, 1811.

The common council pays $8 for "Cartage to bridge in Broadway."—M. C. C. (1874-1871), VI: 795. This probably was the stone bridge at Canal St.; and we may fairly assume that now it was filled in and covered up.—See descrip. of Pl. 83-b, III: 559, 562. See also Mr 16, Ag 19, and N 4, 1811.

The expenses in 1811 for filling the Collect Pond amounted to $2,191.8—M. C. C. (1874-1871), VI: 479, 534, 552, 565, 599, 745, 795.

1812

In this year, life insurance was introduced in the U. S. by the incorporation of the Pennsylvania Company for Insurance upon Lives.—Winsor, Mem. Hist. of Boston, IV: 187. For the first life insurance company in New York City, see Mr 9, 1830.
In this year, Columbus, Ohio, was founded.—Winsor, VII: 547.

In this year, the military company called the "New York Hussars" was organized.—Chas. S. Clark, in Evac. Post, P 26, 1916.

In this year, Asher B. Durand was apprenticed to Peter Maverick, and, in 1817, he became his partner under the firm name of Maverick & Durand. His reputation as an engraver was established by his large plate of Trumbull's "Declaration of Independence," and, according to Stauffer, "his portrait work has never been surpassed by an American engraver." In 1826, he abandoned engraving, and soon became famous as a landscape painter.—Stauffer, Am. Engravers on Copper and Steel, I: 72; Dunlap, Hist. of the Arts of Design (Goodspeed ed.), III: 60-65.

A water-colour drawing, bearing the inscription "Collect Ground Annual & Stone Bridge Garden Militia Drilling View from the East Side of Orange & Pump St. N.Y. 1812, No. 23. [signed] Wm. Chappel," is one of a set of 29 water-colour drawings of New York street scenes, etc., drawn by Wm. Chappel. It is reproduced and described in Vol. III, A. Pl. 14-2. The original set consisting of 29 drawings (of which two have been lost) is owned by Edw. W. C. Arnold, Esq.

In this year, the North Battery was referred to as "Fort Nonsense" by the Com. Adv., Jl. 8, 1811; and see ibid, Jl 13 and 16, 1811.

At the beginning of 1812, all the departments of the city government had not yet removed into the new city hall, for on March 23 it was ordered "that the several offices attached to the Corporation be removed to the new City Hall in the first week of April next."—M. G. C. (1784-1811), VII: 80. On May 5, it was dedicated by the order of the Board. The building fronting the Park, lately erected for that purpose by the Corporation shall be the City Hall of the City of New York and that this Resolution shall be deemed to take effect from the 4th Inst."—Ibid., VII: 131.

On May 11, the common council ordered that a warrant be issued in favour of the treasurer of the finance committee for $8,000 out of the first moneys received on account of the sale of the old city hall.—Ibid., VII: 141. The old hall on Wall St. was sold May 15 (Com. Adv.), and immediately demolished (M. G. C., 1784-1811, VII: 146-47, 177).

The running expenses of the new hall began with an order on May 23 that Mr. Skatts, the keeper of the building, be directed to provide fuel, and when necessary to have fires made in the common council chamber, and in the several courts and offices,—the supreme court, the oyer and terminer, sessions, mayor's court, mayor's office, street commissioner's office, jury rooms, comptroller's office, and the watch. Persons occupying the building were "requested to see the Fires carefully extinguished before they quit their offices for the day."—Ibid., VII: 155. By June 25, the expenses of the build, com. were retrenched, "so as to accommodate them for as practicable to the sum demanded by the exigencies of the Times keeping at the same time in view the necessity of not depriving too many of the Workmen of employment."—Ibid., VII: 184-85. For a record of carpenter's time in the course of the construction of the building, see My 30, 1807.

McComb's last account-book of his financial transactions, audited by the build. com., runs from July 22, 1812, to May 1, 1815; it is on file in the present Hall of Records, "No. 376." Some of the interesting items of payments are:

1812, Sept. 17—No. 84—"By John Dixey for cutting the figure of Justice $&c $210." (Regarding Dixey's work, see Dunlap's His. of the Arts of Design, Goodspeed ed., 1918, p. 399-91.)

1812, Nov. 2—No. 141—"By Norris & Kain for two marble chimney pieces $500." 1813, Mar. 12.—No. 240—"By Peter Devoe ball full for cutting 8 urs $140."

1813, Apr. 30—No. 266—"By Alec' Macomb for 2 Busts $66."

1815, May—No. 293—"By Paulus Hadell balance in full for Stair Railing $2145.68."

1818, Aug. 2.—No. 356—"By Henry Hadell for five Iron Gates in front, etc. $1606.97."

1815, Aug. 23.—No. 368—"By Wm. Green for three window Blinds for the Governor's Room $128.97."

1813, Aug. 23 (?).—No. 369.—"By Alex' Willey for Lettering $5.50."

The national debt amounts to $45,035,122.70.—Am. State Papers, IX: 23.

We are authorized to state, for the satisfaction of those who frequent the [Park] Theatre, that there are now six doors, which open from the avenue that leads directly from the boxes into the street. Two of those doors have been recently made. These openings are such as to preclude all possibility of the audience being prevented from retiring in case of accident."—N. Y. Evac. Post, Jl 2, 1812. See also Com. Adv., Jl 8, 1812.

A New Yorker writes to a correspondent in Boston: "Business is now brisk here. The late arrivals from England have brought large orders for wheat, flaxseed, ashes, &c. Ashes have taken a start, from 88 to 190 dols. per ton, and the article of logwood has risen from 40 to 80 dols. per ton, bought up for the Russian markets. "Our shipments to France are also very numerous; 40 vessels have gone the last month—we now only need the permission of Congress to import from England, and our Commerce will once more flourish."—N. Y. Evac. Post, Jl 13, 1812.

A motion that the common council adjourn to meet at the old city hall is lost by a vote of 15 to 14, and the board then resolves to hold its next meeting at the almshouse.—M. G. C. (1784-1831), VI: 729-99. See Jl 17.

Announcement is made that "Sealed proposals will be received till the 22d inst. for renting for the term of one, or three years, from the first of May next, the whole of the building called Tammany Hall [see My 13, 1811], excepting the offices facing on Nassau-street, and the Lodge Room in the attic story, and reserving to the Society the use of the large room in the second story, on each Monday evening, on the 14th day of May, on the 4th day of July, and on the 24th day of November, in every year. . . ."—Columbian, Jl 6, 1812. See My 12 and Jl 14.

A correspondent, criticizing a pamphlet on the New York police, suggests certain reforms, one being that the city watch instead of sitting in "snug boxes" should be provided with warm caps and coats and keep in constant motion.—N. Y. Mourn. Post, Jl 5, 1812.

"A Copy of the certificate of the Incorporation of St. George's Church in the City of New York is as a separate church is presented and read at a meeting of Trinity vestry.—Trin. Min. (M.S.)."

"An application was presented to the board from the Fire Company belonging to Engine Number 24, asking permission to erect an Engine House in the burial Grounds of Trinity Church. Thereupon ordered that the said Company be permitted, . . . to erect an Engine House . . . at the Corner formed by the Intersection of Broad Way and Reector Street. . . . This was found to be impossible because of the graves, and it was ordered that it be placed in St. Paul's churchyard.—Ibid.

President Madison communicates to congress a letter from the British minister to the secretary of state and the secretary's answer, adding: "The continued evidence afforded by this correspondence of the hostile policy of the British Government against all national rights, strengthens the considerations recommending and urging the preparation of adequate means for maintaining them."—Annals of Cong., 12th cong., 1st sess., 795.

The common council receives a petition from the proprietors of the lots in Hamilton Square, stating that, when they bought these lots (see 1807) they were to be of a certain size, and bounded by certain streets of a certain width, a certain change having been served for the sole and private use of the purchasers and future owners of the lots; that the Commissioners' Map changes this plan, the size and position of their lots in reference to the streets being different, and that a public square is laid out on the premises, instead of a private one. They demand return of the purchase
THE ICONOGRAPHY OF MANHATTAN ISLAND

1812. Money. The council refers the petition to a committee, together
Jan. with others previously presented to the board (Sept. 2, 1811) on
the subject of ground reserved in the Commissioners' Map for a
"Parade" and a square called Union Place.—M. C. G. (1784-1831), VII:
2-7. See F. P. 1811, 4. The Common council orders an ordinance drafted for licensing
sweeps and protecting the boys employed by them. The matter
was brought to the attention of the board by the Manumission

The common council votes that when they adjourn it be to
meet at the new city hall.—M. C. G. (1784-1831), VII: 6. At the
board meeting in the new city hall, three days later, the danger of
having fires therein, on account of the unfinished condition of
the building and the presence of much combustible material, was
discussed. As a matter of precaution, it was moved that the next
meeting be held in the old city hall, but this was negatived.—Ibid.,
VII: 10-11.

It becomes possible for the common council to allow the number
of fire buckets, which each house must keep, to be reduced, but
it is not considered best to do away with them altogether. Reasons
for the reduction are given in the following extracts from a com-
mittee report:

"That not withstanding great facility in conveying
water for the extinguishing of fires has been experienced
by the application of Leaders from one engine to anot-
er. The opinion of the Committee are of opinion cases may occur still in the interior of
the City, where by a speedy collection of Buckets the fire might be
extinguished ere the line by Engines & leaders could be formed, 
perhaps it would be advisable with a view to relieve the Citizens
of this butthen as far as practicable to permit the number of Buckets 
... to be kept in each house to be reduced not more than one third.

Feb. 4 In a letter to Assemblyman Abraham Van Vechten, Gov. Tomp-
kins writes: "Arsenals have been built at the following places,
New York, Albany, Elizabeth Town Essex County, Plattsburgh,
Rome, Watertown, Onondaga, Canandaigua and one preparing at
Batavia. We have an excellent Powder Magazine on York Island,
a beautiful & substantial Bomb proof Magazine near the Forti-
cfications at the Narrows, and a new and capacious one near this
City." The works at the Narrows have been completed for
one hundred & ten Guns. But there is no provision for manning
the works or for guarding them against injury by mischievous
persons of the neighbourhood or by the most inconsiderable
number of an Enemy or intended enemy. Power ought to be given to apply
the United States to garrison the works, and in case of their
refusal, to place a detachment of Militia, there. Possession of
the Fortifications & Guard appurtenant at the Narrows ought
to be declared to be in the Governor or some other Public Officer,
to simplify the Remedy for the numberless trespasses which are
committed upon it. "—Pub. Papers of Daniel D. Tompkins,
II: 459-67.

An advertisement reads: "To the admirers of the fine arts, is
offered for exhibition, at No. 190 William-street, specimens of
elegant writings, poetry, and paintings executed on a plan of a
Monument of the Illustrious Washington, the only thing of
the kind ever done in America. The plan represents a marble monu-
ment fifteen feet high, the pedestal is 8 feet, on the front of which
is an appropriate inscription in writing inscribed to the memory of
the American Fabius, by Doctor Isaac Ball, of this city.—The
side consists of the figures of Faith, Fame, and the Goddess of
Liberty, recording the deeds of her hero.—Also, the Genius of
America, weeping over the grave of the departed hero with appro-
riate verses, composed by a lady in this city, much admired for
her poetical productions.

The pyramid consists of a full length portrait of the friend
and father of his country, holding in his hand his farewell address
of the 17th of September, 1796. The whole executed with
the pen, by Mr. George Thresher, professor of penmanship of this
city."—N. Y. Eve. Post, F. 4, 1812.

6 Congress authorizes the president "to accept and organize
certain Volunteer and Military Corps," and appropriates $1,000
towards the expenses thereof.—Annals of Cong., 12th con-
g. 1st sess., 2215-27.

The "very considerable increase of the city of New York"
causes the common council to draft a bill to be presented to the
legislature providing for the extension of the limits within which
"Dwelling Houses, Store Houses, and other buildings are re-
quired to be constructed with Stone or Brick." The new fire
limits are to cover the section "lying to the northward of the
point of the Battery and included between the said point of the
Battery and a line beginning upon the East River opposite Montgomery
Street, thence through Montgomery Street to Cherry Street,
thence down Cherry Street to Roosevelt Street thence to
Roosevelt Street to Chatham Street, thence down Chatham
Street to Chambers Street & thence thro' Chambers Street to
Broadway, thence up Broadway to Canal Street thence com-
 mencing again at Chambers Street & running to Hudson River,
including also the Lots of Ground on the Northerly & Eas terly
sides of the said Streets & including also the lots of ground
fronting on both sides of the Broadway between Chamber Street
& Canal Street."—M. C. G. (1784-1831), VII: 24-25. The law
was passed by the legislature on June 1.—Law of N. Y. (1812),
chap. 34.

The common council agrees that Hudson or Bear Market be
demolished and that a new market (Washington) be erected on
the site of the old Corporation Basin. This had been contemplated
as early as July 1, 1805 (q.v.), but was not carried out at that
time because the leases of some of the lots proposed to be used
or sold had a long time to run. These leases, however, will expire
on July 1, 1814, and the legislature, VII: 29-31. For the exact
location of the new market see J. 1.

The committee appointed to consider the proposal to reduce
the size of some of the public squares, as laid down on the
Commissioners' Map, reports as follows: 1. "Grand Parade," which
contains 270 to 280 acres, may be reduced to one-half of its present
size or less and still be large enough for a parade ground. 2. "Union
Place," which is at the angle formed by the junction of the Bowery,
and Broadway, should be "discontinued," and it is argued
that this will render the continuance of Broadway beyond "Union
Place," as laid down in the said map, altogether unnecessary;
whereas it would be necessary (should Broadway be extended
in the manner laid down upon the map) to take a very considerable
quantity of valuable ground, and several expensive buildings;
and the discontinuance of the Bowery Place would relieve the corpora-
tion from "very heavy and unnecessary expense."—"Hamilton
Square," having been settled and agreed upon by the corporation
before the act for the appointment of the commissioners was
passed (see Mr 50, 1807), it is recommended t at in other respects
the original plan be carried out and that, to remove all doubts,
application be made to the legislature for confirmation of the
plan. All of these three provisions were separately passed by
vote of the common council on March 2. It was also voted that
the application to the legislature should embrace an application
for power to reduce or discontinue at the discretion of the cor-
poration the Market Place bounding on the East River, as laid
down by the commissioners.—M. C. G. (1784-1831), VII: 40-43,
56, 61, 62, 63-66, 69, 70, 71, 72, 78, 81, and 82.

A petition to the legislature is now hanging about this city
(rather secretly) to obtain for the benefit of a few individuals
and to the injury of the manufacturing interests of the state, an
exclusive privilege of lighting cities and manufactures with Gas
for 14 years . . . it is to be hoped, that the legislature will be
on the alert, and not grant an exclusive right to what has long
been known in Europe, and used with great benefit, in most of
the large establishments for manufactures in England."—Colum-
bian, F. 19, 1812. A gas company was not chartered in New York
until March 26, 1825 (q.v.).

Communications printed in a newspaper of this day, and on
Feb. 1, 26, and March 2, show that inhabitants of Harlem find
Ward's Bridge over the Harlem River (see F. 20, 1807) a nuisance;
they desire its removal by act of the legislature, and if another
one is built that it be one "of arches or piers."—Columbian,
F. 19, 28, 29; Mr. 2, 1812.

John Stevens addresses to the canal commissioners a memoir
recommending that a railway be constructed between Lake Erie
and Albany in place of the Erie Canal. The commissioners reported
adversely on the project, considering it too expensive and too
impossible of publication. In May, Stevens published his book
of communications under the title Documents tending to prove the superior
advantages of Rail-Ways and Steam-Carriages over Canal Navigation
(N. Y., 1812). This was the first book printed in America on the
subject of railways. There is a copy in N. Y. P. L.
The common council agrees to the following resolution: "That the street Commissioner and Comptroller lay before the Board at the next meeting a Map of the Collect Lots belonging to the Corporation. As the by-law suppressing and opening streets is now out into suitable lots agreeably to the new regulation of Streets & Avenues—Likewise of such portions of Common Lands as are not already disposed of; together with a Map of Brooklyn lots near the Old Ferry. And also a description of the lots of ground corner of Pearl & State Streets near the Battery occupied by John S. Delamater, the ground on Chatham Street adjoining the Free School, and the ground at the Old City Hall." It is also ordered that a report be made as to the most suitable time and manner for the sale of above property, together with other scattering lots.—M. C. C. (1784-1831), VII: 54-55.

President Madison lays before congress certain documents proving that, "at a recent period, whilst the United States, not-withstanding the wrongs sustained by them, ceased not to observe the laws of peace and neutrality towards Great Britain, and in the midst of amicable professions and negotiations on the part of the British Government, through its public Minister here, a secret agent of that Government was employed in certain States, more especially at the seat of Government in Massachusetts, in fomenting dissatisfaction to the constituted powers of the nation, and in intrigues with the disaffected, for the purpose of bringing about resistance to the laws, and eventually, in concert with a British force, of destroying the Union, and forming the eastern part thereof into a political connexion with Great Britain."—Annals of Cong., 12th cong., 1st sess., 162.

The common council orders that the clerk of the board procure a copy of the resolution of the corporation respecting the Lots of the City.—M. C. C. (1784-1831), VII: 58.

At a meeting of Trinity vestry, "Mr. Barrow on behalf of the Committee of leases" presents "a plan of the new burial Ground in Hudson Street, . . ."—Trin. Min. (1821).
At the monthly vestry resolves to supply St. John's Chapel with an organ.—Ibid. In the latter part of 1813, the organ was captured by the British ship "Plantagenet" off Sandy Hook. It was ransomed for $5,000, and was brought up to the city on Dec. 11.—Com. Advo., D 11, 1813. Regarding St. John's, see also 14th Ann. Rep. Am. Scien. & Hist. Pres. Soc. (1909), 72-80.

The "Register's Office in and for the City and County of New York" is established by act of the legislature—Laws of N. Y. (1812), chap. 27. See My 1.

A petition to the legislature seeks permission to erect a telegraph on "that part of York Island reserved in the map of the citys . . . as an observatory and grand reservoir." The advantages of the situation are described.—From the original MS., in metal file No. 47, city clerk's record-room. The subject is not entered in the Liber of M. C. C.

The common council receives from the corporation counsel "a Deed from Samuel Verplanck for the right of Way to the East side of the Lot at the Old City Hall." The board directs that it be recorded and filed in the comptroller's office.—M. C. C. (1784-1831), VII: 68.

In accordance with the report of the committee on amendments to the "Laws for the suppression of Vice and Immorality," the common council orders a bill prepared for presentment to the legislature. Some of the "evil practices" on Sunday referred to for correction are the "Grocery and Fruit Stores, Public Gardens and Taverns, kept open for the reception of Company and Customers: Hackney Coaches, & other carriages; and Horse riding for pleasure, Barbers Shops open, marketing for Fish and Meat, Skating,] Ball playing, and other plays by Boys and Men, and even Horse-racing . . . that an Editor and his Patrons can be found hardy enough to print and support a Sunday Newspaper, is a reflection, at which the mind of morality cannot but recoil." Drunkenness, gambling, cockfighting, shuffle-board, billiards, brothels, houses of seduction, and the popular notion of "odious imprecations and obscene language" are other vices which cry for betterment.—M. C. C. (1784-1831), VII: 71-76.

On March 30, an appeal to the public was made when a resolution was agreed to respectfully requesting the clergy of the city, as far as this measure may coincide with their sentiments," to inculcate in their hearers, the propriety and public importance of desisting from and discountenancing the practise of purchasing and selling groceries or other articles on the first day of the Week called Sunday.—And also to solicit parents and others to use their influence to prevent the prevailing vices of the day.—M. C. C. (1784-1831), VII: 77.

The report of the committee was also ordered printed in the newspapers employed by the corporation.—Ibid., VII: 93. See Je 8.

Hon. Samuel L. Mitchell sends a communication to the recorder, which is read in the council meeting, urging that the city be placed "in a state of defence," by reason of "the present aspect of public affairs."—Ibid., VII: 80.

The common council decides to sell in fee at auction at the old city hall on Wednesday, the 15th of April at 12 o'clock, the old city hall, lots on which it stands, and the adjoinig lots, upon condition that the building be delivered to the purchaser on the first day of May next, that he cause the same to be removed by the first day of July next, and that possession of the lots be delivered to the purchaser by the first day of July next.

It is also directed that in the conditions of sale of the old city hall a reservation be made of such parts of the building as might be useful in other buildings now being erected by the corporation, if such reservations would not injure the sale of the property.—M. C. C. (1784-1831), VII: 80-81.

Advertisements of the intended sale appeared in N. Y. Gaz. & Gen. Adv., Mr 26; Columbian, M 27; N. Y. Evc., Post, Mr 31, 1812. Because of the proposed widening of Nassau St., the finance committee was authorised, on April 20 (q. v.) to postpone the sale of the ground on the north of city hall stands.—M. C. C. (1784-1831), VII: 101. On April 20 (q. v.), the sale of the ground on which the old city hall stood was postponed for a fortnight from the 22nd on account of a bill pending in congress, authorising the purchase of the ground as a site for a custom-house.—Ibid., VII: 117. A further postponement was made May 5, when the old city hall, the lots on which it stood, and those adjacent were offered for sale at auction on the 13th (q. v.), unless proposals for the purchase of the same were made to the finance committee previous to the next meeting of the board.—Ibid., VII: 131-34; Columbian, My 6, 1812.

Gov. Tompkins resorts to the extraordinary expedient of using his constitutional authority to prorogue the legislature rather than allow it to pass, by corrupt means, the bill to charter the Bank of America. The bank was to be in New York City.—N. Y. Spectator, Apr. 4, 1812; Hammond, Hist. of Political Parties in the State of N. Y., I: 509; Wikson, Mem. Hist. N. Y., III: 211-12. See Je 2.

In a letter to (some one not named in the letter itself) Robt. Fulton defines his right to be considered the real inventor of the steamboat. The principal part of the letter reads: "New York, March 28, 1812.

"Dear Sir: . . . I have always informed you that on the discovery of the power, proportions and velocities of the parts of the machinery depended the success of steamboats, and that I was the first who discovered, or what is commonly called, invented them, and proved their truth by practice.

"In developing the laws of nature as connected with steamboats lies the merit of my invention. There is perhaps some merit in making a good combination of machinery and the application of principles, but the man who thinks he has invented steamboats, useful steamboats such as I have built, merely because he has thought of boats, steam engines and wheels, or paddles, or chains, or oars combined, is totally mistaken. He might as well say by writing a poem like the Columbia he knew all the letters and had some thoughts on versification.

"Without first discovering the principles, no man could have made a useful steamboat, one to run 42 or 5 miles an hour, but by chance.

"No one has ever given any rule, no one ever attained 42 or 5 miles an hour, and hence I say no one before me invented steamboats, but all failed.

"And now I have invented them, and driven them by steam six miles an hour.

"Not more than three persons, myself included, know the principles.

"The man who cannot now tell the power necessary to drive a
THE ICONOGRAPHY OF MANHATTAN ISLAND

Apr. 2

Given boat 10 miles an hour in still water, could not have told the power necessary to drive her 5 miles an hour, until he had seen the powers in my boats, and now that he sees the powers and can copy them, he cannot divide them and tell where they are lost, or well applied, or waste.

"Hence I can prove that before my success there was no experiment, no patent, nothing written or printed which gave any idea of a successful steamboat or hope of success, and for this reason considered impracticable. Any common mechanic, by almost any application of steam, can make a boat go 5 miles an hour; 4 require good works; 45 or 5, a knowledge of principles. Your boat, you say, is 120 feet long, 15 feet beam to draw two feet of water, to which you give a 40 horse power to go 10 miles an hour, to win your bet of Mr. Gwin. You will, I know, be astonished when I tell you that 160 horse power is required to drive her 10 miles an hour. An engine of this power could not be put in the boat. It is therefore impracticable. I tell you this fact because I know the science. You will, of course, not request me to let you into my secret until all acknowledge that in this subject I am first, and my claims to priority be substantiated by law.

"Yours respectfully,

"R. Fulton.

—From printed copy of the letter in The Collector (pub. by Walter R. Benjamin), XXXII: No. 5 (March, 1919). The original is owned by J. A. Brown Palmer, also Cat. of Fulton MSS, and documents sold at Anderson's, April 26-27, 1924, by order of Mrs. A. T. Sutcliffe, items 143, 144, 159, and 165.

"Because "odium" attaches to them as inhabitants of Bedlow Street, "owing to the disorderly Conduct of some of their neighbors," and this has caused a degradation in the value of the property, these inhabitants petition the common council to change the name of the street.—From the original petition (MS.), in metal file No. 47, city clerk's record-room. The name is changed to Banket St. accordingly, and the proper change made in the "Direction boards."—M. C. C. (1874-1873), VII: 91. Later, it became Madison St.—L. M. R. K., III: 99, 1005.

"A writer under the signature of "A Citizen," in the Mercantile Advertiser, calls the attention of the public to the Old City Hall, which is advertised to be sold at Auction on the 17th inst. He recommends that it be purchased for the purpose of Converting [it] into an Exchange, for the accommodation of the Merchants, and others. Now we would suggest to this writer the impropriety of the measure.—The Hall is considered in its present situation as a very great nuisance, as it projects about thirty feet into Wall-street, and almost stops up the entrance into Nassau-street. The Corporation would do well in order to remove, as well to beautify the handsomest street in the City. If a company could be formed to purchase the Lots which are to be sold at the same time, for the purpose of building an Exchange, we shall heartily approve of it.—N. Y. Gen. & Gen. Adv., Ap 1, 1812. The old city hall was sold on May 15 (q.v.).

"The Proprietors of the Flag Staff respectfully inform the Ladies and Gentlemen of this city who may visit this delightful and healthy retreat, which for prospect and salubrity air has not its equal in any city of the union, that every exertion has been made by them to provide a choice assortment of fruit and refreshments in order to render the walk a still greater source of comfort and accommodation to the citizens.—N. Y. Eco. Post, Ap 1, 1812. On April 2, they announced that "the subscription Book for the Spy Glass" was ready for signatures.—N. Y. Morn. Post, Ap 2, 1812. See also Janvier, In Old N. Y., 239.

The Tammany Soc. is issuing shares, of $10 each, in a subscription loan, bearing 7 per cent interest from May 1. For fac-simile of one of the certificates, see Man. Com. Coun. (1828), Opp. p. 373.

The "affectionate intelligence" that congress intends to pass another embargo act reaches New York.—N. Y. Spectator, Ap 4, 1812. The act was passed on April 4 (q.v.). On April 7 it was stated: "Since the News of the projected Embargo reached this city... Seventy Vessels have cleared from our Custom House for foreign ports... all of them are beyond the Hook..."

"These vessels probably contain more than twenty thousand tons of American produce."—Ibid., Ap 8, 1812. Another New York paper said that, "had the city been enveloped in flames, property could not have been moved off with greater expedition, from the morning of the 2d of April until the evening of the 4th forty-eight vessels cleared from the port of New York."—Guernsey, N. Y. City & Vicinity during the War of 1812-15, I: 16.

An embargo for 90 days is laid on all ships and vessels in American ports.—Laws of S. U., 12th cong. chap. 49. See Ap 3.

Gov. Tompkins writes to William Irving: "There are two things which weigh upon my mind in relation to the Southern District. The one is the dread which I entertain of having Federal Senators returned at the next election in consequence of the schisms which appear to prevail about the right of nominations; and the other is my anxiety to have the City of New York regain its Republican character & send a Republican representation to the Assembly. The eyes of our friends in every part of the State are directed to New York, and their universal wish and prayer is that the spirit of discord may be charmed down or be merged in the importance of the present crisis."—Pub. Papers of Daniel D. Tompkins, II: 525-24.

An ordinance presented to the common council for building a bulkhead across and filling in Cortlandt St. slip is passed and assessors are appointed.—M. C. C. (1874-1873), VII: 99.

Arrangements are made by the common council for widening Nassau St. 22 ft. on the east side between Wall and Cedar Sts. The committee recommending this action reports: "The Application for widening Nassau Street presents in the opinion of your Committee a case of the most pressing necessity. Also Cat. of Fulton MSS, and documents sold at Anderson's, April 26-27, 1924, by order of Mrs. A. T. Sutcliffe, items 143, 144, 159, and 165.

A Washington editorial says: "That an important crisis has arrived in the U. States is seen by every one: that it has been unavoidable is equally certain: and that it may be made to terminate with honor and advantage to Republican government, cannot admit of doubt.

The British take the lead in the career of violence and injustice. Every stage of the present war has been marked by some act which evinced the distinguished hostility of her government to this country. She has impressed our seamen from on board our own vessels, and held them in long and oppressive bondage. She has intercepted our lawful trade with nations with whom we were at peace. She has violated our jurisdiction; insulted us on our coast and in our harbors, and finally usurped the absolute dominion of the sea, forbidding our commerce with all nations with whom it does not suit her to allow it, and allowing it to none with whom she is not herself permitted to trade."

"France has exhibited, in her conduct towards neutral powers, the counterpart to this disgusting picture:... If she has done less harm at sea, it was because her means were inferior to those of her rival. She declared the British Islands and all the British dominions in a state of blockade, when she had not a single ship on the ocean:... By her Rambouillet, her Bayonne and other decrees, she has seized and confiscated all the vessels of the U. States and their cargoes that were in port."

"... this crisis... has been forced on us by the voice of the whole American people, who, deeply incensed at these wrongs, have, with one voice, sent a Republican representation to Congress."—Intelligencer (Wash.), Ap 9, 1812. In the next issue, the editor reviews incidents since 1806 leading up to the present crisis.—Ibid., Ap 11, 1812. The Intelligencer also contains current reports
of the transactions of congress and other national affairs in Wash- 1812
ington. For the declaration of war, see June 18.
11 Announcement is made from the Manhattan Water Works that “The supply of Water will be discontinued for fifteen days, on account of fixing a new Engine which will insure a constant supply in future—a proper deduction will be made on the next payment.”—Com. Adv., Ap 11, 1812. See Ap 25.
12 James Bryden advertises that he has leased “that large and
elegant Mansion House at Greenwich, about two miles from the
city on the North River, belonging to William Bayard, esq. . . .
The House will be opened about the middle of May.”—Columbian,
Ap 12, 1812.
13 “More like war.—The Governor of New York (says the Al-
bury Gazette), by an instruction from the President of the United
States, has raised the whole of this state, to garrison our northern and western frontiers. . . .”—National Intel-
ligence, Ap 14, 1812. For current comments on the war, drawn from editorials and the local news reports appearing in news-
papers of other cities throughout the country, see the columns of the Intelligentier from day to day.
14 The frigate “President” and “Essex” leave their anchorage in the North River and proceed to the Watering Place. As they
pass, they fire seven shot at Castle Williams “for the purpose of
trying her strength,” and five balls hit the castle and the other two
strike the foundation. The balls do much less injury than was
anticipated. “The walls of Castle Williams are nine feet thick, and
we may conclude from this experiment upon them while yet in
a green state, that no apprehension need be entertained of their
15 A meeting is called for April 20, at the Tontine Coffee House,
of persons “who have goods or other property in England or her
Colonies, and are desirous to import the same,” the object being
to draw up and present a memorial to congress in relation to the
16 Announcement is made that the “Mayor’s Office is removed
to the South-West Corner Room, on the first floor in the New City-
17 George Clinton, vice-president of the U. S. and first governor
of New York State after the Revolution, dies at Washington.—
18 The “Theatre Pittorese et Mechanique,” nearly opposite the
hospital, burns down.—Columbian, My 1, 1812.
The title of the American Patriot, and Public Advertiser is changed back to Public Advertiser (see Ag 15, 1811). The paper was discontinued with the issue of Feb. 24, 1813.—Brigham, A. A. S. Proc. (1917), 483.
19 “It appearing desirable for the Merchants Interest of this City
to have a stock-room in a part more convenient for Business than the present, and it being probable that the corporation will be
willing to dispose of the Site of the Old City Hall for that purpose,
a meeting of the Merchants is invited at the Tontine Coffee House,
this day at 12 o’clock, to consider on the most fair mode of carrying
such a measure into operation. . . .”—N. Y. Gaz. & Gen. Adv.,
Ap 20, 1812.
A petition to the common council, with the name of John
Jacob Astor heading the subscribers, is prepared, requesting that
body to postpone “for a fortnight” the sale of the old city hall
property. The reason offered is that “a bill is now before Congress
authorizing the purchase of the ground on which the Old City Hall
now stands for the purpose of erecting thereon a Custom House.”—
Original petition in city clerk’s record-room; M. C. C. (1784-
1817), VII. 117. For the sale of the property at auction, see My 13.
Its purchase from private parties after a new building had dis-
placed old “Federal Hall” was finally consummated on D 2, 1816
(q. v.).
The common council agrees to a recommendation that $225 be
granted the “French Committee of Charity” for aid in adminis-
tering their work. They relieve about ninety paupers annually.—
M. C. C. (1784-1821), VII. 117, 118.
Anthony L. Bleecker’s offer to cede Bleecker St. extending from
Broadway to Bowery Lane, on condition that it be left as a public
street, is accepted.—M. C. C. (1784-1817), VII. 108, 117.
Upon learning of the death of Vice-Pres. George Clinton, the
common council immediately adopts resolutions of sorrow and
appoints a committee “to devise and report a Plan for such public
exhibition of regret and sorrow as in their opinion this late
national bereavement requires.”—M. C. C. (1784-1817), VII.
121. The arrangements were agreed to on May 11, ibid., VII.
125-39. The ceremonies took place on May 19 (q. v.).
General orders issued from headquarters in New York City
direct the officers of the militia to “wear cape on the left arm for
the term of thirty days” as a testimony of respect to the late
14 May 25: a newspaper editorial notes “We have received several
communications, complaining bitterly of the want of water; stating
that the Charter of the Manhattan Company ought to be dissolved,
in consequence of the continued violation of the contract for several
years past; and inviting all aggrieved citizens to meet on Monday
Evening next at 8 o’clock at Kent’s Hotel in Broad-street. The
object of the Meeting is to prepare a statement of facts, in the form
of a petition, to be laid before the Legislature at the session in
May.”—Com. Adv., Ap 14 and 25, 1812. See also Ji 6, 1814, and
My 5, 1812.
15 The common council permits the managers of the “State Lot-
tery” to use a room in the old city hall on Wall St. until the build-
ing is sold.—M. C. C. (1784-1817), VII. 122. This was the last
recorded use to which the building was put; as the city offices had
already been removed to the new city hall.—See Ap 12, 5, 2, et seq,
1811, and summary under My 26, 1805. It was sold on May 13
(q. v.).
The office of “Register of Deeds” (see Mr 11) opens in the
May city hall.—Donegan, Office of the Register. Three Years’ Re-
ports, 1918-20, 46. The fact that the office is shown on Pl. 75, Vol. I,
indicates that the design was added to the plan at a con-
siderably later period than its drawing in 1805.
16 “A Stockholder” writes to one of the papers: “It is high time
that there was some steps taken to compel the Manhattan Company
to supply this city with good and wholesome water. Agreeably to
their charter the Recorder is duly to see that the company does
supply the inhabitants with water.—The water works are farmed
out to a contractor. For five weeks we have received no water, and
the collectors call and insult the inhabitants for not giving them
the money for water which they do not receive. It is abominable
indeed for the city to be thus trifled with and abused by the com-
17 The new city hall is dedicated, and the common council passes
the following resolution: “Resolved and it is hereby declared that
the Building fronting the Park lately erected for that purpose
by the Corporation shall be the City Hall of the City of New York
and that this Resolution shall be deemed to take effect from the 4th
Inst.”—M. C. C. (1784-1817), VII. 131. The original draft of the
resolution is in metal file No. 39, city clerk’s record-room. For
items regarding the building of the new city hall, see Mr 24, 1800,
and My 26, 1803 with credits from said city hall.
18 The common council orders that the superfluous furniture of
the old city hall be sold at auction, under the direction of the finance
committee.—M. C. C. (1784-1817), VII. 132.
The common council, in response to a petition of April 27,
approves $200 to Charles Gobert to enable him to complete
models of machines which he conceives will be useful for blowing up
ships in the harbor.—M. C. C. (1784-1817), VII. 140.
19 Instead of that alacrity with which every man in the United
States was to turn out, as a volunteer, to fight Great Britain, as
triumphantly foretold by the administration prints, we hear of
nothing but lamentations and dissatisfaction from every militia
man who has been so fortunate as to draw a prize, as it is called, by
which he becomes liable to be called on any moment to join the
detachment of thirteen thousand men that make up the quota of this
State.”—Hist. Mag. (1864). 147, citing N. Y. Ev. Post, My 12,
1812.
The “new and commodious building erected by the Society
of Tammany, at the corner of Nassau and Frankfort-streets, opposite
the Park” (see My 13, 1811, and Ji 6, 1812), is taken possession
of “in a formal and appropriate manner, by the Society, the 23d of
April, their 23d annual festival in the spacious hall provided for
that purpose in the building. The building committee . . . del-
ivered the keys to the grand sachem, and the insignia and banners
of the order were deposited in their new premises, denominated the
Great Wigwam No. 1. The society formed at the old wigwam and
marched in grand parade round and through the park to their new
quarters. . . .”—Columbian, My 15, 1812. See Ji 16.
20 The old city hall building is sold (see Ap 1 and 20) at auction
13
1812 for $245, and one of the lots on which it stands for $9,500. The sale of the remaining lots is postponed (see J., 18, 1813). The building is in a dilapidated condition.—*Gazette*, My 14; *N. Y. Gaz*., My 14; *Merc. Adv.,* My 15, 1812. The hall was removed by Aug. 10, 1812 (q.v.). The lot sold was purchased by Joel Post and John B. Lawrence.—*Leeds Deter.,* Cl. 410. See also descrip. of Frontispiece I, 111: 539, in which, however, the statement that the lots were sold “on April 15th” is without foundation, and a wrong date of issue of the *Gazette and General Advertiser* is cited—it should be May 14 (as above), not March 26.

G. Douglas begins to publish a weekly of octavo size called *The Western Star, and Heart of Erin.* Although devoted chiefly to Irish interests, it contained a considerable amount of current news. It was discontinued with the issue of May 1, 1813.—*Brigham, A. A. S. Proc. (1917),* 513.

A “Roman Museum” is advertised at the “Commercial Building, No. 28 Park, next door to the Theatre.” It is under the direction of Louis Chiappi, a native of Rome.—*N. Y. Morn. Post*, My 18, 1812. See also *Columbian, J.* 9 and S 10, 1812.

The council orders that a footwalk on the south side of Marketfield St. along the Battery be paved with stone lately taken from the old city hall.—*M. C. (1784-1831),* VII: 146-47.

The use of convict labour at this time is illustrated by the following resolution of the board: “Resolved that M. Hurd be instructed to employ the Convicts in Bridewell in constructing masonry to cover that part of the floor of the Court of Sessions occupied by the Audience & that a Committee be appointed to superintend the making of the same, and that some cheap material be provided as carpeting for that part of the said room which is occupied by the Court & the Gentlemen of the Bar.”—*M. C. (1784-1831),* VII: 147. For earlier employment of the bridewell inmates, see *Hid.,* 1: 16; *Eng.,* 3, 1778.

The common council resolves that the board appoint a street inspector, whose duty it shall be, together with the deputy street commissioners, to see that the ordinance regarding the removal of filth and dirt from the streets be observed as well by the contractors as by the citizens at large. Samuel Green was appointed inspector.—*M. C. (1784-1831),* VII: 149.

In accordance with the plans of the common council (see Ap 24), a public demonstration of respect to the memory of the late George Clinton is held in New York. A procession composed of city, state, and national officials, clergy of all denominations, various societies, foreign consuls, military and naval officers, private citizens, etc. assemblies in the Park and marches to the Presbyterian church, where Governor Morris delivered a funeral discourse. “The bells of the different churches were tolled, and minute-guns fired at Fort Columbus and the battery, while the procession moved ‘its slow length along’ the colors of the different public buildings, the vessels in the harbor, and forts in the vicinity, were hoisted half-mast: the citizens and military bore the usual testimonials of grief, the standards shrouded in crape, and the usual martial instruments and arms in mourning; the stores and shops were closed, and business suspended; and an immense concourse of citizens witnessed the sensibility felt by a bereaved community on the loss of one of its brightest and worthiest pillars and ornaments. An address adapted to the occasion was also delivered at Tammany-Hall, by Mr. Jonas Humbert.”—*Columbian, My 16 and 20, 1812. On June 1, Morris presented to the common council a copy of his oration, and it was accepted with thanks and ordered to be printed. The thanks of the board were also conveyed to Rev. Doctor Roney for “his pious & eloquent discharge of the religious services.”—*M. C. (1784-1831),* VII: 518-59.

The legislature, in the interest of the state’s prison, authorises the appointment of a chaplain who may be allowed annually not exceeding $500 for performing divine service for the benefit and reformation of the “convicts.”—*Laws of N. Y. (1812),* 376. Rev. John Stanford (see Ap 18, 1808) was appointed to this office by the board of inspectors and “continued as the able and indefatigable minister of Christ in that institution until its removal from this city to Sing-Sing in 1828.”—*Sommers, Memoir of John Stanford,* 163. Mr. Stanford was wont to speak of the prisoners in his Greenwich Congregation.—*Stanford, Aged Christian’s Companion, introd., xv. For his connection with the city institutions, see J., 1813.

“We are happy to learn that a society has been established in this city, having for its tutelary patron the immortal George Clinton. . . . We hope this infant institution will prove a gem, which, by its expansion and growth, will assist to counteract, and, in some measure, extinguish the baneful effects of the Washington and Hamilton societies.”—*Columbia, My 21, 1812. See also ibid., My 27 and J. 9, 1812. The “Olympic Theatre,” formerly the “Circus” (corner 22 Broadway and Anthony St.), is opened to the public, by Dwyer and McKenzie, with Sheridan’s “Rivals.”—*Columbian, My 13 and 22, 1812. On Nov. 3, 1813, it reopened as the Commonwealth Theatre.—*Hid.,* N. 2 and 4, 1813. For further history of this theatre or circus, see *Greenwood, The Circus (1909),* 108, and Wilson, *Mem. Hist. of N. Y.,* IV: 477. See also J. 5, 1812. Gov. Tompkins sends a special message to the legislature, saying in part: “The colonel of engineers is authorized to erect an additional battery on the North river, in New-York, to prevent an enemy from anchoring above and under cover of the state-prison, and annoying the north part of the city with shells; and on account of the prominent position of the public wharf at the prison, and the turn in the shore of the river a small distance above, that wharf has been selected as the most eligible site for the proposed battery. Legislative provision will however be requisite to authorise the occupation by the United States of a part of the state-prison wharf for the above purpose. . . .”—*Assemb. Jour. 15th sess.,* 341-42. The present site of the state prison reconstrmed against the building of a battery on the prison wharf, and permission for the U. S. to do so was refused in the assembly on June 2, “by a strong vote.” Gov. Tompkins informed Col. Williams, on June 3, that he would therefore have to choose “some other site for the proposed fortification.”—*Pub. Papers of Daniel D. Tompkins,* 1: 155-57.

The common council agrees that whenever the United States shall erect a battery or fortification on Corlears hook for the defense of the harbour it will grant “so much of the water right in front thereof” as the engineer shall deem requisite and “so much of the Streets terminating on said grounds as shall be necessary for the Continuity of said works.”—*M. C. (1784-1831),* VII: 153. The common council orders that Mr. Skats, the Keeper of the City Hall, be directed to provide Fuel and when necessary to have Fires made in the Common Council Chamber and in the following Courts and Offices only.

To the Court of Chancery
The Supreme Court
The Sitteings
The Oyer & Terminer & Sessions
The Mayors Court
The Mayors Office
The Street Commissioners Office
The City Inspectors Office
The Jury Rooms for the above Courts
Fuel for Watch
The Common Council Office

“And that all persons occupying Offices in the City Hall be requested to see the Fires carefully extinguished before they quit their offices for the day.”—*M. C. (1784-1831),* VII: 155. The numbers of the rooms occupied by the various public offices are given in Longworth’s *N. Y. City Directory (1812-13),* 38-39, and some of these here mentioned are shown on Pl. 75, Vol. 1.

The common council resolves that hand belts shall be provided for the deputy clerks of the several markets, who shall “ring the same in the said markets, one quarter of an hour previous to the time directed by the ordinance for the Butchers to leave the Market.” The time for leaving their stalls is fixed at 2 o’clock P.M. each day throughout the years.”—*M. C. (1784-1821),* VII: 155. Between this date and Oct. 26, the common council paid $599.5 for draining the Collect and filling in the ground in that vicinity.—*M. C. (1784-1831),* VII: 157, 199, 217, 238, 265, 287. Further payments were made in 1813 (57, 67).

The legislature authorises the state comptroller to sell (and convey in fee simple) the government house and adjoining grounds to the city, for a sum not less than $90,000, and to receive a 10-years’ bond of the city in payment, with interest at six per cent; provided the city shall not sell the grounds “for the erection of private buildings or other individual purposes.”—*M. C. (1784-1831),* VII: 239; *Trash, Bowling Green (1898),* 58 et seq. See Mr 8, 1813; and L. M. R. K. I. 974.
Mrs. Fulton gives a "splendid entertainment" on board the steamboat "Paragon," at which Col. Barclay and the commander of H. M. S. "Bramble" are guests. "The fineness of the day induced them to take an excursion up the East River as far as the city extends, back through Butter Milk Channel, down to Staten Island and back to the city. . . . When the Paragon was passing the Bramble a salute of 18 guns was fired from the latter. During the excursion, the company was entertained by a band of music, which, with a profusion of good things, rendered the whole truly convivial."—Com. Adv., May 30, 1812. The "Paragon" is shown in Man. Com. Coun. (1832), 438; it is described by Lieut. Hall in his Travels in Canada and the U. S. in 1816 and 1817 (London, 1818), 107.

Charles Redheffer causes much excitement in Philadelphia by announcing that he has invented a machine for perpetual motion. The town council and the state legislature became much interested in the reputed discovery, but the machine was finally proved to be a fraud.—Scharf & Westcott, Hist. of Phila., 1: 561-62.

Thomas McKean writes to John Adams from Philadelphia: "Our venerable friend Clinton has gone before us [see Ap 20]. So has the illustrious Washington, eleven years ago. I remain the only surviving member of the first American [Stamp Act] Congress, held in the City of New York in October 1765; but three more, of whom you are one, remain alive of the second, held in this city in September, 1774." The two others were Jefferson, and Charles Carroll of Annapolis—Trotby's, The Am. Revolution, Part III, (17 October).

There were four arsenals in the city at this time: (1) the state arsenal, a three-storey brick building, erected in 1808, at the corner of Eln and Franklin Sts.; (2) the U. S. arsenal on Bridge St. back of the government house near South Battery, authorised to be built by the laws of 1808 (chap. 9); (3) the U. S. magazine and arsenal at the foot of West Twelfth St.; and (4) the U. S. arsenal on the Parade (now Madison Sq.), at the junction of the Old Boston Road and the Middle Road.—Guernsey, N. Y. City & Its Vicinity during the War of 1812-15, 66-67; Wilson, Mem. Hist. of N. Y., III: 254.

Pres. Madison sends a confidential war message to congress, in which he says in part: "British cruisers have been in the continued practice of violating the American flag on the great highways of nations, and of seizing . . . persons sailing under it . . . ." Against this crying enormity, which Great Britain would be so prompt to avenge if committed against herself, the United States have in vain exhausted remonstrances and expostulations. British cruisers have been in the practice also of violating the rights and the peace of our coasts. They hover over and harass our entering and departing commerce. To the most insulting pretentions they have added the most lawless proceedings in our very harbors; and have wantonly spilt American blood within the sanctuary of our territorial jurisdiction. . . .

"Under pretended blockades, without the presence of an adequate force, and sometimes without the practicability of applying one, our commerce has been plundered in every sea; the great staples of our country have been cut off from their legitimate markets; and a destructive blow aimed at our agricultural and maritime interests. . . ." Not content with these occasional expedients for laying waste our neutral trade, the Cabinet of Britain resorted, at length, to the suicide of its blockades, under the name of Orders in Council, which has been moulded and managed, as might best suit its political views, its commercial jealousies, or the avidity of British cruisers. . . .

"Anxious to make every experiment short of the last resort of injured nations, the United States have withheld from Great Britain, under successive modifications, the benefits of a free intercourse with her market, the loss of which could not but outweigh the profits accruing from her restrictions of our commerce with other nations. And to entitle these experiments to the more favorable consideration, they were so framed as to enable her to place her adversary under the exclusive operation of them. To these appeals her Government has been equally inattentive. If willing to make sacrifices of every sort, rather than yield to the claims of justice, or renounce the errors of a false pride. . . ." In reviewing the conduct of Great Britain toward the United States our attention is necessarily drawn to the warfare, just renewed by the savages, on one of our extensive frontiers; a warfare which is known to spare neither age nor sex, and to be distinguished by features peculiarly shocking to humanity. It is difficult to account for the activity and combinations which have been for some time developing themselves among tribes in contact, and now with British traders and garrisons, without connecting their hostility with that influence.

"Such is the spectacle of injuries and indignities which have been heaped on our country; and such the crisis which its unexampled forbearance and conciliatory efforts have not been able to avert. . . ." We behold, in fine, on the side of Great Britain, a state of war against the United States; and on the side of the United States, a state of peace towards Great Britain.

"Whether the United States shall continue passive under these progressive usurpations, and these accumulating wrongs, or opposing force to force in defence of their national rights, shall commit a just cause into the hands of the Almighty Disposer of events, avoiding all connexions which might entangle it in the contents or views of other Powers, and preserving a constant readiness to concur in an honorable re-establishment of peace and friendship, is a solemn question, which the Constitution wisely confides to the Legislative Department of the Government. . . ."—Macdonald, Select Disc. illustrative of the Hist. of U. S., 1786-1816, 183-91. The U. S. declared war on Great Britain on June 18 (p. 4).

The common council agrees that the new market which is to take the place of the Hudson Market (see F 10) be erected on the square bounded by Washington, West, Partition, and Vesey Sts. . . .—M. C. G. (1784-1811), VII: 163-64. The new market became Washington Market.—De Voe, Market Book, 327, 407. See also M. C. G. (1784-1811), VII: 358, 666-67.

The Bank of America is incorporated by act of the legislature. . . .—Laws of N. Y. (1812), chap. 78. "The charter of the Bank of America, in 1812, was an occasion of bribery and corruption. John Martin, a preacher and sub-agent of the bank, was convicted of attempting to bribe members of the Legislature, and was sentenced to confinement in the State prison. There was a Legislative investigation and a great political scandal."—Sumner, Hist. of Banking in U. S., 43. The bank began business in this year at the n. w. corner of Wall and William Sts.—L. M. R. K., III: 924. See also Mr 27 and Jn 29.

The "New York Circus," just completed, "on the lot where the Boston Panorama was lately exhibited" (Merc. Adv., My 28, 1812), at the corner of Broadway and White St., nearly opposite 44th Street, gives its first performance—Columbian, Je 2 and 3, 1812. The proprietor are Cayetano, Codet, Mermal & Redon.—Merc. Adv., op. cit. See also Greenwood, The Circus (1899), 106.

"The town is likely to be the spectacle of ingenious rivalships between the managers of the Old Park Theatre and of the New Olympic Theatre [see My 29]. . . . One carries on the war with an 'Elephant at great expense; the other, in addition to its 'real horses,' with a 'whale' that dances a hornpipe. . . ."—Columbian, Je 5, 1812.

The legislature passes an act prohibiting on Sunday all willful disturbance, plays, shows, horse-racing, gambling, and the sale of liquor within one mile of any place of public worship.—Laws of N. Y. (1812), chap. 84.

Brig-Gen. Bloomfield is placed in command of all the troops in the city and harbour of New York.—Com. Adv., Je 24, 1812. This was Brig-Gen. Joseph Bloomfield, of New Jersey.

The legislature authorises the governor to employ a guard of artillery "to guard the fortifications and other public works at the Narrows, near the city of New-York," to establish "a telegraph, observatory and signal poles on the said public ground," as he may deem most conducive to the interests of this state, and to the safety of the city and harbor of New-York; and to equip at state expense "a boat or barge, in the harbor of New-York, for the use of the state." It also appropriates $25,000 for completing the fortifications on Staten Island.—Laws of N. Y. (1812), chap. 39.

While the bill for the declaration of war against Great Britain is being considered by the senate, a petition is presented to that body, signed by most of the large mercantile houses of New York
1812 City and by many of its wealthy and influential citizens, praying June 15 that the embargo, which, on April 4 (q.v.), had been laid for 90 days on American shipping, he continued, and urging that non-

After visiting the bridewell, the jail, and the Collect, the grand jury makes certain suggestions to the common council regarding improvements in sanitation. Two rooms in the bridewell, one containing 61 white females; and one, 26 black females, are too crowded, and more room is recommended.

With regard to the Collect, they "find much to complain of; besides great quantities of stagnant water it seems to be made the common place of deposit for dead animals & filth of all kinds, where they are left to corrupt the air and endanger the health of the City; besides all this, the Cellars in the neighborhood & particularly in the lower end of Orange Street are filled with water, w'th from its appearance has been in them some time, for all which reasons they present the said Collect as a public nuisance to the city."—M. C. C. (1784-1831), VII: 168-69.

On June 22, the common council agreed upon recommendations for remedying the evils at the Collect, both in the public and private lots. It was decided that the cellars in Little Water St. and Orange St. should be filled.—*Ibid.*, VII: 178.

The common council requests that a warrant be issued to John Youle for four box stoves for the city hall.—*M. C. C. (1784-1831)*, VII: 175.

The City Bank of New York is incorporated.—*Laws of N. Y.* (1812), chap. 175. This bank was organized to replace the First Bank of the U. S., whose charter expired in 1811 (q.v., Mr 4).—*N. Y. Times*, Ji 18, 1921. See Je 25.
CHAPTER V

A.—THE WAR OF 1812
1812–1815

B.—PERIOD OF INVENTION, PROSPERITY, AND PROGRESS
1815–1841
CHAPTER V

A.—THE WAR OF 1812

1812–1815

FOLLOWING his war message of June 1 (q.v.), and subsequent discussion in congress (see Je 15), President Madison signs an act "declaring War between the United Kingdom of Great Britain and Ireland and the dependencies thereof and the United States of America and their territories"—Laws of U. S., 1812, cong. chap. 102. The war was caused chiefly by Great Britain's impressment of American seamen, her orders in council, and her paper blockades. On June 19, Madison issued a proclamation announcing the declaration of war.—Winsor, VII: 376, 379, 420, 482; VIII: 143, 179, 444. News of the proclamation reached New York on June 20 (q.v.).

"The literature on the War of 1812 is very considerable. A descriptive bibliography of a large part of this material, published prior to 1889, is found in Winsor's Narrative and Critical History of America, VII: 420–37, and (works by Canadian writers), VIII: 179. The subject is treated topographically by Lossing in his Field Book of the War of 1812."

A brief summary of the principal events of the War of 1812, and important local history connected with the completion of the Commissioners' Map of the city on March 22, 1811 (q.v., as well as the expansion of the city and general progress which followed these events, is contained in Chapter V, Vol. III, of the Iconography.

The legislature appoints Cornelius Howard, of Baltimore, Eli Whitney, of New Haven, and Robert Fulton, of New York City, to be commissioners "to ascertain the best method of conveying off the Waters from the Collect and Lispenard's Meadow, in the City of New York."—Laws of N. Y., 1812, chap. 214; descrip. of Pl. 83-b, III: 562. Cornelius Howard resigned as commissioner on Sept. 12, and Thomas Poppleton, of Baltimore, was appointed in his place.—M. G. C. (1784–1811), VII: 238. Poppleton's journal and other manuscripts relating to the work of the commissioners are in N. Y. City MSS., box K-L. For extracts in the Chronology, see O 7, 15, N 25, and D 3. The report of their work was drawn up on Feb. 15, 1813 (q.v.).

Governor Morris makes a trip from New York to Albany in one of the new steamboats of Robert Fulton, and describes his experiences. He says that, embarking in the steamboat on June 19 a few minutes before five in the afternoon, he reached Albany at midnight on the following day. The return trip was made on June 22 and 23, with some delay from engine trouble. He was pleased with the journey, writing: "Thus in five days and an hour I have dined in New York, gone to Albany, spent two complete days there, and returned. . . . The price of a passenger is $2.50 a servant half as much."—Diary and Letters of Governor Morris (N. Y., 1888), II: 513–34.

A midshipman on board the U. S. sloop-of-war "Hornet," in the port of New York, writes in his diary: "This morning the declaration of war by the United States against Great Britain was read. . . . At ten o'clock A. M. Commodore Rodgers hove out the signal to weigh; never was anchor to the cathead sooner, nor topsail sheeted to the mainmast with more dispatch, than upon the present occasion. The smallest boy on board seemed anxious to meet what is now looked upon as the common tyran of the ocean, for they had heard the wodul tales of the older tars. . . . When the ship was under way, Capt. Lawrence had the crew called to their quarters, and told them if there were any amongst them who were disaffected, or one that had not rather sink than surrender to the enemy, with gun for gun, that he should be, immediately and unimjured, landed and sent back in the pilot boat. The reply was, fore and aft, 'Not one.'—Guernsey, N. T. City & Vicinity during the War of 1812–15, I: 3–4. The fleet which sailed from New York on this day under the command of Commodore Rodgers consisted of the "President," the "United States," the "Congress," the "Argus," and the "Hornet."—McMaster, Hist. of the People of the U. S., IV: 79; Chauncey, Letter-Book (1809–1812), 200, in N. Y. H. S. Guernsey, op. cit., I: 4, says the departure of these ships "was the first 'letting slip the dogs of war' against Great Britain in the war of 1812."

About 80 of the "finest recruits yet received at this rendezvous," enlisted at Hudson, arrive at Governor's Island.—Com. Adv., Je 24, 1812.

The common council refers to the committee of defence the "General Orders of Gen. Bloomfield, dated June 20 (q.v.), announcing that war is declared by the United States against Great Britain. The orders were forwarded to the council by Maj. Gen. Ebenezer Stevens.—M. G. C. (1784–1811), VII: 179–80.

One hundred men from the detached artillery of the city take charge of the "north fort (near Duane street) with orders to exercise the cannon &c. for one month."—N. Y. Spectator, Je 24, 1812.

Capt. John M'Lean issues the following notice: "The Veteran Corps of Artillery is requested to assemble at the new Arsenal, the 25th inst. precisely at 9 o'clock in the morning, to take their station on the North Battery, where the first shot was received from the Asia at the commencement of our bloody, yet glorious contest, with their trans-atlantic oppressors the British; and I trust you will show by your punctuality and prompt attendance, that the flame of seventy six is not entirely extinguished by the front of time. You will appear with military hat and side-arms. The above request only extends to New-York, Westchester, Kings, and Richmond."—Columbian, Je 22, 1812. The Veteran Corps was the first organization to volunteer in New York during the War of 1812.—Wilson, Mem. Hist. City of N. T., III: 254.

Great Britain revokes her orders in council.—Winsor, VII: 276.

The directors of the City Bank (see Je 16) purchase the "United States Branch Banking House, with its appendages, in this city."—The sale price is said to be $100,000.—Com. Adv., Je 24, 1812. The bank was at 52 Wall St.—L. M. R. K., III: 924.

A general meeting called by the Republican (or Democratic) party is held in the Park. Col. Henry Rutgers and Marinus Willett having been chosen chairman and secretary respectively, the declaration of war and the president's proclamation are read, and resolutions are adopted reviewing Great Britain's repeated violations of our national rights, declaring the federal government justified "in its appeal to arms," and pledging in support of the United States "our lives, our fortunes, and our sacred honor."—N. Y. Spectator, Je 27, 1812. See also Man. Com. Coun. (1855), 475.

The committee of defence, in accordance with directions from the common council, reports the following suggestions for improving the defences of the city: that a representation be made to the general government suggesting "the propriety of erecting a Castle or other strong Fortification on Hendrick's Reef and a line of old vessels or Hulks to be anchored at convenient distances from each other across the channel at the Narrows from Hendrick's Reef to Fort Richmond on the Staten Island shore to be unified by a chain which is already prepared. . . . also a Line of Block Ships in the rear of the chain in the nature of strong Floating Batteries."

"As the Castle cannot be erected for a considerable time the Committee are of opinion that a representation be in like manner
made to our State Government urging the erection at the Expense of the State of a Battery near Denyse's on the Long Island Shore. It is also recommended that the common council take immediate measures to make two floating batteries to be manned by volunteers.—M. C. G. (1784-1811), VII: 182-83.

The common council grants the request of Col. Fleet for the loan of three watch-boxes for the use of the detachment of the "N Y S Artillery," now stationed in the north battery.—M. C. G. (1784-1811), VII: 182.

The following resolution is agreed to by the common council:

Resolved that the committee of defence be directed to take measures for procuring a Copy of the Signals to be used at the Telegraph at the Narrows also a good Glass and the necessary Utensils and fixtures to give the same Signals from the Cupola of the City Hall. —M. C. G. (1784-1811), VII: 183.

The common council agrees that the following "Bode of Office" shall be immediately adopted and worn by marshals and constables: "a white Wand one foot long and one Inch in Diameter with the Arms of the City painted thereon and the word Marshal, Constable, High Constable or First Marshal as the case may be written thereon in large letters underneath the Arms, said Wand to be made of some hard and strong Wood such as lignum vitae and to be worn in a side Pocket, in the coat."—M. C. G. (1784-1811), VII: 183.

This, apparently, is the origin of the policeman's "billy" survival of the old English "staves of office."—Bingham, A. A. S. Proc. (1917), 502.

A "riotous collection of people" assembles in James St. and tries to pull down one of the houses there. The disorder is quelled by the police.—N. T. Morn. Post, Jl 1, 1812. The common council, meeting on this day, agrees to several regulations for preventing and suppressing riots.—M. C. G. (1784-1811), VII: 188-89.

On July 6th, it thinned the several petitions on the "peace of the city" on this occasion.—Ibid, VII: 192. Five of the rioters were convicted and sentenced to a year's imprisonment.—Columbian, Ag 1, 1812.

John M'Lean addresses the following communication to the common council and the commissioners of fortifications: "I would suggest to your consideration, the utility of erecting two Bomb Batteries, one near Rhinelander's wharf, the other near the L. at Whitehall dock; the battery near Rhinelander's wharf, to consist of 2 ten inch mortars, making up the Hudson, and 3 thirteen inch do. to bear across the river and down the Channel; the one at Whitehall to be composed of 2 or 3 ten inch mortars, to rake across Buttermilk Channel, and towards the Navy-yard, with 3 or 4 ships which do, bearing down the Channel towards Bedloe's Island. I trust by an experiment, that I shall be able to convince you Gentlemen, of the essential benefit which must obviously result from such fortifications, insomuch as their annoyance to all floating batteries, has been sufficiently ascertained and proven. I shall hold myself ready to exhibit to you Gentlemen, any practical proof thereof."—N. T. Gen. & Gen. Ado., Jc 29, 1812.

The finance committee of the common council reports regarding the offer made June 22 by Archibald Gracie and William Bayard, in behalf of the Bank of America, for the three remaining lots on which the old city hall stood. The bank directors offer $25,000, but the committee considers $30,000 in cash no more than an adequate price and advises that the lots be offered for that sum.—M. C. G. (1784-1811), VII: 177, 184. See F 5, 1811.

The common council passes the following resolution as a war measure: "Resolved that the Building and Bellevue Committees be requested to retrace the Expenses of the Buildings under their care so as to accredit them as far as practicable to that Economy demanded by the exigencies of the Times keeping at the same time the necessity of the good name of the Workmen of Employment."—M. C. G. (1784-1811), VII: 184-85.

"Commissions for Privateers were received at the custom-house this morning, and several vessels fitting out on private speculation will be dispatched immediately. The Paul Jones, capt. John Hazard, is expected to be the first out, and sail on Wednesday [July 1]."—Com. Ado., Je 30, 1812.

"Preparations for telegraphic communications between the

Narrows and the Navy-Yard are making with all practicable expedition, by Captain Channcey and the officers of the 1st Company. A mast and Yard were yesterday erected on Signal Hill, at Staten-Island, and the whole line will be completed immediately."—Com. Ado., Je 30, 1812.

"We understand, and it is with pleasure we inform the public, that the large and commodious Steam-Boat, which has been for some time erecting in this city by Mr. Fulton as a Ferry Boat to ply between this city and the city of Jersey [see Ap 15, 1812], will be in full operation on Thursday next [July 4]; that from the experiments already made, she will answer the expectations of the public, and will not on an average be more than from fifteen to eighteen minutes in crossing. She is so large and convenient, that carriages of all descriptions may drive in and out of her as if a bridge.

"The crossing of the North River has been such an obstacle to the communication with this city, that it is a matter of real congratulation to the public that their difficulties are removed. The most timid may now cross without fear. No ex pense in the erection of the boat has been spared to render her both safe and complete, and it is confidently hoped that she will not only give universal satisfaction to the public, but be an honor to Mr. Fulton, the inventor.

"As the face of a market wagon loaded, will be fifty cents, there is no doubt but our markets will be better supplied than ever they have been."—Com. Ado., Je 30, 1812. For a description of the new ferry-boat, see Columbian, Jl 20, 1812; De Voc, Market Book, 95-96. See also Jl 25.

"Mr. David Schuyler of U. S. S. "Essex" sails from New York on a cruise against the British. The motto on his flag is "Free Trade and Sailors' Rights."—McMaster, Hist. of the People of the U. S., IV: 79, 77-79; Lossing, Pict. Field Book of the War of 1812, 439. See Mr 28, 1814.

The thirty-sixth anniversary of American independence is observed with "unusual splendor." The celebration includes a review of the militia by Maj.-Gen. Stevens and Brig.-Gen. Bloomfield, a parade on the Battery, and an address by John Anthon before the Washington and Hamilton Societies at Washington hall.—N. T. Spectator, Jl 8, 1812. See also Wilson, Mem. Hist. of N. T., III: 255.

Gen. Jacob Morton presents to "the Corporation of the City of New York," a porcelain punch-bowl, as appears from an inscription on the bowl itself, there being apparently no other official record of the event. It is also stated on the bowl that it was made by "Syngehong" in Canton, and painted by "Fungmanhi." It shows in colours and gold the seal of the U. S., the seal of the city, and sea scenes including ship building. On the inside is a view of New York copied from the first state of the engraving published by Birch in 1803, and signed by the engraver."—Ibid. They are urging two men of the inscriptions is "Drink deep. You will preserve the City and encourage Canals." The bowl was deposited in the Metropolitan Museum in Sept., 1912, after having been previously kept in the governor's room of the city hall.—Bulletin, Metropolitan Museum of Art, VII: No. 9 (Sept., 1912).

The common council requests the mayor to forward a copy of the following report to the president of the United States: "That tho' they [the committee of defence] have not been advised of any direct communication having been made from the Executive of the United States on the subject of their last report to the Common Council respecting the defence of this City, yet they have been informed that instructions have been this day received directing additional works to be made on this Island at Corlears Hook & on the North River.

"While your Committee are of opinion that the interior line of defence of this Harbor has been projected with skill and executed with ability, and may in the last Resort be of importance, Yet they are decidedly of opinion that the protection and defence of the City ought not to rest upon them, but should be placed on strong & efficient Lines of defence at the Narrows where the attacks of an invading Naval Force may be resisted and repelled without involving the necessary or probable damage, if not destruction of the City they are intended to protect.

"They would therefore beg leave to report as their Opinion that the Executive of the United States should be earnestly solicited to carry into effect the remaining part of the plan of defence heretofore proposed by Colonel Williams of the Corps of Engineers
Lieutenant Benj. Pendergast.

Sir,

You will immediately proceed with the U.S. frigate, under your command, to join the U.S. President and your companions. The President will immediately report yourself to Commander. Pending there where you will receive your orders.

Respectfully,

[Signature]

Lieutenant Benj. Pendergast.

Commander in Chief.

June 21, 1812.

The President, United States, having learned all went to see this afternoon at 4 o'clock, and a friend of mine just informed me that the President was now on his voyage a short distance off the harbor. I therefore wish to see her here at the yard as a prize for Hudson.

I have the honor to be,

Hon. Robert R. Livingston,
Secretary of the Navy.

Washington.

June 21, 1812.

The vessel has been completely called inside and out. Both sides have been cut and both sides have been repaired. A fine brick found here, is now with all her freight on board, and a new yard, with water casks stored. Yesterday (Sunday) we took all the masters out, by 12 o'clock, and the main mast will have been taken down, foremast and stepped. The main and mizen mast will be completed by Thursday, and I think by Saturday next, that she will be completely ready for sea. Nineteen gun boats will go one to-day ready to co-operate with the ships in tow.

I have
and that measures might be taken for immediately commencing
Works at the East side of the Narrows in conformity with said
plan, and opposite to the works erected by this State."—M. C. C.
(1784-1811), VII: 197-98. See JI 17.

M. C. C. (1784-1811), VII: 199.

Trinity vestry orders "that the Committee of repairs shall be authorized to provide and
put up chains across the Streets in front and
on each side of St Paul's Chapel to be kept up during the
time of divine Service—pursuant to the ordinance of the City Corpora-

Pres. Madison, by proclamation, recommends that the third
Thursday in August be set apart as a day of "public humiliation and
prayer."—Niles' Weekly Reg., II: 321.

The Corporation Loan of 600,000 dollars at six per cent. was
filled up yesterday [July 9].—Com. Adv., JI 10, 1812.

One of 76" suggests the following method of defending New
York: "Every vessel what ever may be the number may as
be thought necessary, let there be erected a covered way, capable of
receiving bales of cotton, of which we have plenty. This could be
done in a very little time, and at little expense; under which our
large cannon would range, and our men be less exposed to the
enemy's fire. This would make a chain of defence on each side of
the city, on the North and East Rivers, which would be the means of
defeating a formidable enemy. We should have a range of covered
batteries, simple in their construction and powerful in their effect.
Should the enemy approach the city, the money from the different
banks could be carried into the interior in a few hours, by putting
our cartmen in a state of requisition for that purpose."—Colum-
bian, JI 9, 1812. See also Addenda.

10
Gen. Wm. Hull invites Canada.—McMaster, Hist. of the
Pres. Z., III: 58. This may be said to begin the
earliest activities of the War of 1812. A swift summary of the progress
of the war shows the following outstanding events:

"The forces actually available on the American side when the
war began consisted of a small squadron of very fine frigates and
sloops in an efficient state. Twenty-two was the extreme limit of
the naval force the States were able to commission. The paper
strength of the army was 75,000, but the service was voluntary
and unpopular, while there was an almost total want of trained
and experienced officers. The available strength was a bare third of
the nominal . . . On the British side, the naval force in
American waters under Sir John Borlase Warren, who took up
the general command on the 25th of September 1812, consisted of
ninety-seven vessels in all, of which eleven were of the line and
thirty-four were frigates . . . The total number of British
troops present in Canada in July 1812 was officially stated to be
5004, consisting in part of Canadians."—Encyclopedia Britannica,
Vol. 1.

Hostilities began on the Canadian frontier shortly after the declaration of war.
The British general, Sir Isaac Brock, seized Mackinac and the head of Lake Huron on July 17, and then drove
Hull back and forced him to surrender at Detroit on Aug. 6 (p. 87).
Brock then transferred himself to the western end of Lake Erie
where Gen. Henry Dearborn was attempting invasion. Brock
fell in action on Oct. 13, while repulsing Dearborn's subordinate,
Van Rensselaer. The discontent of New England with the war
both hampered the American generals and also aided the British,
who drew their supplies to a great extent from U. S. territory.

The year 1813 opened auspiciously for the Americans by a
defeat at Frenchtown, Mich., on Jan. 22 (p. 9). In April (p. 11),
they took York (now Toronto) and repelled a siege of Fort
Meigs (see Ap 28), and in May they captured Fort George, and
Brown repulsed a British attack on Sackett's Harbour. Har-
risson was successful on the Thames on Oct. 5 (p. 12). On the lakes,
Chauncey gained a little advantage over Sir James Yeo on Ontario,
but Perry completely defeated the British on Lake Erie (see S 10).
The Creek Indians also started hostilities in this year, massacring a
number of Americans at Fort Mims, Ala., on Aug. 30 (p. 9).
Four expeditions were set on foot to attack these hostile Indians,
and during a campaign in Alabama from Oct. to Dec. were gen-
eral successful, especially that from West Tennessee under Gen.
Jackson.

By 1814, most of the incompetent American generals had been
replaced by real soldiers. On the Niagara frontier, Gen. Brown
took Fort Erie, won at Chippawa (see JI 12) and Lundy's Lane (see
Jl 25), and repelled a British siege of Fort Erie (see Ag 15). These
gains, however, were lost by Gen. George Izard in the autumn.

Great Britain, after the abdication of Napoleon, sent detach-
ments of veteran troops to America, and invasions were planned
from Canada and at points on the seaboard. The first of these
attacks, a number of 15,000 men, under Gen. Prevost, started from
Montreal early in September. The British
fleet on Lake Champlain, however, was defeated by Commodore
Macdonough, and the land forces by Gen. Macomb, on Sept. 11
(p. 13), and Prevost retreated to Canada.

The second army of invasion was commanded by Gen. Robert
Barnum, and had for its objective point, the Chesapeake. Accom-
panied by a powerful fleet under Sir Alexander Cochrane and
Sir George Cockburn, it made innumerable attacks of a destructive
caracter on the docks and harbours, destroying stores and cap-
turing vessels and merchandise. During the most famous of
these raids, it defeated the Americans at Bladensburg, marched
on to Washington, and burned most of the public buildings there
(see Ag 24). A subsequent attack on Baltimore, in which Gen.
Ross was killed, was a failure (see S 15). In December, the British
undertook the invasion of Louisiana with a large fleet and 10,000
troops commanded by Sir Edward Pakenham. After several minor
engagements, the final attack was made at New Orleans on Jan.
8, 1815 (p. 9) and was repelled by Gen. Andrew Jackson.—Winor,

Meanwhile, a treaty of peace had been signed at Ghent (see
Ag 8 and D 24, 1814), news of which arrived at New York on Feb.
11, 1815 (p. v.).

The British minister, Mr. Foster, and the British consul, Col.
Barclay, embark on board the "Colibri" to sail for England.—
Com. Adv., JI 11, 1812.

Mr. C. Fawcett understands Mr. Duschko, the Russian
Minister, has arrived in this city with his suite, to tour to the eastward.—
Com. Adv., JI 13, 1812.

The common council receives a letter from John H. Eddy ask-
ing for aid in his preparation of a chart of the harbour of New York
"exhibiting every part of the coast with a delineation of the vari-
ous Ship & Boat channels, with the soundings." It is referred to
the committee of defence with authority to grant such aid as they
may deem proper.—M. C. C. (1784-1811), VII: 200.

"David Barnum, late of the city of Philadelphia, has opened a
Public House at Tammany Hall [see My 12, corner of Nassau and
Frankfort-street, opposite the New City-Hall . . . The building
being new, neat, and elegant situated in front of the Park,
on high ground, in the centre of the city, renders Tammany Hall
as pleasant, airy and healthy, as a country village . . ."—Colum-
bian, JI 14, 1812. See My 10, 1813.

Letters from the see of war and from Gov. Tompkins are of
such a nature as to leave the common council very uneasy as
regards the defences of the city. Alderman Fish, chairman of the committee
of defence, and Pierre C. Van Wyck, recorder, are appointed to
"repair forthwith to the several forts, castles and
to send to the President of the U S the sentiments of the Com^ Council
on the unfortified situation of this Port.

The common council authorizes the commissioners of fortifica-
tion to purchase land, not exceeding five acres, on which to erect
works on the east side of the narrows as a means of defence. As
1812 the state legislature has not authorized such purchase the board July takes the responsibility and trusts for reimbursement by the state.—M. C. C. (1784-1811), VII: 205-6. These efforts of the corporation for the defence of the harbour were praised by the Comm. Adv., Jl 31, 1812.

20 Among the preparations by our indefatigable commissary-general M. Le Fan, for the exclusive use of this city and harbor, are five 18 pounders, eight 12 do. and five 9s. mounted on travelling carriages, with harness, apparatus and ammunition complete, with 1,000 muskets and accoutrements of the best quality and in the best order, and 18,000 rounds of fixed ammunition (besides 450 casks of loose powder); the whole ready for service at a moment's notice "— Columbus, Jl 17, 1812. The convent was incorporated on March 5, 1814 (Gaz. & Gen. Adv., Jl 15, 1812).

23 One of the newspapers says in regard to "Fulton's Paulus-Hook Steam Ferry Boat" (see Jl 30): "This is the 7th day since she commenced her regular passages, in which time she has surpassed the utmost extent of public expectation. The Paulus Hook Ferry has ever been one of the most inconvenient and difficult in the United States: in head winds and a strong tide, it has often required three hours to make the passage, and in calm it has been next to impossible to get over such a boat as would be able to take in a Horse and Carriage. It was a preventative of the pace of the in-coming trade to this city and beyond, and within the necessity of the hills thus paid were those of H. Andrew, "Upholsterers Bill Furniture Common Council Chamber" ($2,000.00); Wm. Mandleville, for "Tables Desks & Co." ($1,000.00); and John Cignier for the gilding. —M. C. C. (1784-1811), VII: 213.

28 Mr. Greame, we are informed, is about to open, in Broadway, what he calls a Stadium, for the accommodation of those who wish to exhibit extraordinary feats of Horsemanship, Military Tactics, Gunnery, Fortification, civil or military Mechanics, or any new inventions, or interesting objects, that cannot be displayed to advantage within the confined space of a covered building."—N. Y. Gaz. & Gen. Adv., Jl 27, 1812. See Ap 24.

30 The common council orders the superintendent of repairs to put up "direction Boards" in the city streets wherever necessary. —M. C. C. (1784-1812), VII: 217.

31 In a letter to Peter Van Schack: "No event that is highly interesting to our country can be viewed with indifference by good citizens; and there are certain occasions when it is not only their right, but also their duty, to express their sentiments relative to public measures. "As the war has been constitutionally declared, the people are evidently bound to support it in the manner which constitutional laws do or shall prescribe. "In my opinion, the declaration of war was neither necessary, nor expedient, nor seasonable; and I think that they who entertain this opinion do well in expressing it, both individually and collectively, on this very singular and important occasion."—Corresp. and Pub. Papers of John Jay, IV: 360-61.

The common council orders that the clerk employ a suitable person "to Index such of the Minutes of the Common Council as are not indexed and to cause the papers which were in his office previous to his appointment to be examined and duly arranged."—M. C. C. (1784-1811), VII: 218.

32 In a petition to the common council, Cadwallader D. Colden, in behalf of "the Steam Boat Ferry Company," says: "That after a variety of accidents and disappointments which have produced great delay and expenses, Your Memorialists have been enabled to complete a Steam Ferry boat, which has been some time in operation on the Ferry leased by your Memorialists of your Honorable Body. Your Memorialists are happy to be able to state that the boat above mentioned exceeds the most sanguine expectations with respect to her performance—making her passages on an average in less than twenty minutes, and being capable of transporting with the utmost exactitude and convenience, in any kind of weather a burthen heretofore unthought of for any vessel employed as a ferry boat—This establishment your Memorialists believe will be of incalculable advantage to the City. It's success will have an influence on all parts of the world—It will form an epocha in the history of the arts, and can not fail to be highly honorable to the genius of our Country. It is but justice to our fellow Citizen Mr. Robert Fulton to say that he has been owing to his extraordinary ingenuity and perseverance. "... As this is the first steam boat ever built for the purpose to which she is applied, your Memorialists were desirous to see her in operation, and to have the advantage of some experience before they proceeded with their second boat, so that they might avoid any errors or inconveniences which might be found in her construction. And they were in hopes that they might do this and yet have both boats in operation within the time limited by their contract: But owing to several casualties, and disappointments by workmen employed by your Memorialists, the time of completing the first boat has been protracted—beyond all calculation. Your Memorialists are confident that it would be of advantage to the public as well as to the Company to delay building the second boat till further trial can be made of the slow running, that it may be seen how she will perform in all weathers and particularly in the Winter season, whereby your Memorialists may be enabled to improve on her construction if it should be seen that improvement is practicable. The work for the second boat is in forwardness, and she may be completed in the next summer. Colden follows this introduction with a request "that the time limited by their contract for building a second boat may be extended to the first of June next," and that "some place for shelter for passengers in bad weather while they are waiting and while the ferry is collecting," may be erected by the company to serve as a ferry house, near the floating bridge. He says they "will presently begin to regulate the ferry so that they presume a number of market waggons would be induced to cross—but an objection to their doing so at present is that no place is assigned for them when they are in the city." He asks "whether it would not be of great public benefit to fix a stand for Market Waggons in some convenient place," adding: "The preservation of the ferry Steam boat is a matter in which the Citizens generally have a deep interest as well as your Memorialists. At the same time the machinery of a steam boat is easily damaged, and a mischievous person might in a few minutes do an injury which it would require a length of time to repair. Nothing would be so likely to prevent an occurrence of this nature as putting the boat in some measure under the protection of the City Watch. Your Memorialists hope that you will be pleased to order that the watch will pay some attention to the boat."—From the original petition (MS.), signed by Colden, now preserved in metal file No. 47, city clerk's record-room.
The board extends the time, as requested, to June 1. It refers the subject of a stand for wagons, and erecting ferry-houses to the market committee; and, for a watchman, to the watch committee. —M. C. C. (1784-1831), VII: 219.

The common council believes that a standing committee of police, consisting of three persons, shall be appointed with power to report such measures as they deem proper for “promoting the Police of the City and to act in concert with the Magistrates for that important object.” It is also resolved that in each ward a company of not more than 100 citizens be organized under the direction of the police magistrates and the police committee as an “extraordinary City Watch,” and $500 is appropriated to be placed at the disposition of the committee of police for the detection of offenders.—M. C. C. (1784-1831), VII: 221.

Gov. Tompkins writes to the commissioners of fortifications regarding fortifications at the Narrows, etc., including the decision that “One or two furnaces for heating shot for Fort Hudson ought to be erected without delay.”—Pub. Papers of Daniel D. Tompkins, III: 54-56.

“...the defence of the harbor progresses with great rapidity—breast-works are erecting on two sides—the battery is in such forwardness that already about 20 guns are mounted. ...”—Pub. Adv., Ag 10, 1812.

Ephraim Jennings informs the common council that “...the contract for the removal of the old City Hall” has been complied with on his part, and asks that his bond be cancelled. The board grants his request.—M. C. C. (1784-1831), VII: 224; descript. of Pl. 166, III: 848.

By the common council it is “Resolved, in consideration of the high sense entertained by the Corporation of the City of New York, of the important & beneficial services rendered to the United States in general and more particularly to the interests and accommodation of this City, by his invention and improvements in Steam Boat navigation, that the freedom of this City be presented to Robert Fulton Esq.”—M. C. C. (1784-1831), VII: 227. See D 7.

“The Steam Ferry boat Company,” with which Robert Fulton is associated, has been authorized by the city to file a protest against the opposition of their Steam boat across the Hudson to Pawles Hook on Friday next.”—M. C. C. (1784-1831), VII: 227.

The common council confirms a report which John Randel, Jr. has submitted in conformity to the resolution of June 24, 1811 (q.v.). In this, Randel states: “That he has measured North St. from the Bowery Lane to Lewis Street. That the Streets coming into North St from the south are so irregular as to make it impracticable to obtain their points of intersection with North Street by ranges with any degree of precision.

“...That the distance between the Wasterly sides of First Street and Lewis Street as measured by him and reduced to horizontal measure of a medium temperature is 4,161.385/1000 feet.

“The Street Commissioner certifies the distance between these streets being 4,170 feet, he finds in his office at 4470 feet this leaves an excess of 11 385/1000 feet.” He suggests that this be divided among the streets in proportion to their width.—M. C. C. (1784-1831), VII: 227-28.

It is resolved by the common council that Third Ave. be opened throughout as designated on the map of the commissioners of streets and roads.—M. C. C. (1784-1831), VII: 228. See also July, 1812: 319.

New Yorkers are “highly gratified ... by a display of military talents and skill in gunnery” on this day, when Gen. Mottom’s brigade, the “Veteran Corps,” the brigade at the West Battery, and the men at Castle Williams, practise shooting, by firing from different points at a hulk anchored for the purpose “in the Bay about 1000 yards from the shore, and equidistant from Castle Williams and the Battery.” The firing continued for about two hours, and finally the hulk was ignited, either “by the red hot shot fired by Col. Cortensius regiment, and which were heated in a travelling forge attached to the brigade, or by the shot from Castle Williams.”—Columbia, Ag 16, 1812. See also “Communication” in ibid., Ag 18, 1812.

The common council accepts the invitation of the “New York Manufacturing Society” to attend the ceremony of laying the foundation corner-stone of their manufactury at Greenwich.—Aug. 17, 1812. M. C. C. (1784-1831), VII: 229.

The “friends of Liberty, Peace and Commerce” (Federal Republicans) hold a meeting at Washington Hall and adopt numerous resolutions to the effect that the war lately declared by a slender majority of Congress is “unwise,” and that the American people will, under the name and form of an alliance, be submitted to the will and power of the French emperor. They propose that representatives be chosen in the various counties and that these correspond and co-operate with one another and with the “friends of peace” in other states in pursuing “such constitutional measures as may secure our Independence, and preserve our union; both of which are endangered by the present war.”—Gen. Adv., Ag 19, 1812.

Capt. Isaac Hull in the U. S. sloop “Guerrilier” off Halifax and captures her officers and crew.—Mc Master, Hist. of the People of the U. S. IV: 75-76. News of the encounter reached New York on Sept. 2 (q.v.).

“One of the handsomest stand of colours ever made in this city (painted by the ingenious Mr. Vanderpoole) has been presented by adjutant William Ward, of the 10th regiment, commanded by col. Delamontagne, to Capt. Hartell, of the flan company detached from that regiment, as a compliment for the prompt and unanimous tender of their Services, by that company, in defense of their Country.”—Gen. Adv., Ag 20, 1812.

Mr. Greame advertises that the “use of the Stadium” [see JI 27], which has been prepared in Broadway, near the Liberty Pole, and which is very spacious, susceptible of great convenience, may be had on reasonable terms.”—N. Y. Gaz. & Gen. Adv., Ag 24, 1812.

“The Rendezvous of the New-York United Volunteers, commanded by Capt. M’ Kinley, for the United States service, is held at Mr. John Gilman’s No. 406 Broadway, where these patriotic citizens who have already signed the Roll, are requested to attend at any time from ro o’clock A. M. until 4 P. M. in order to be prepared to march when called upon to obtain redress for the insulted and injured rights of our country. ...”—Pub. Adv., Ag 29, 1812.

New York receives the “Melancholy News” of the surrender of Detroit (on Ag 16, q.v.)—Gen. Adv., Ag 31 and S 1, 1812.

“This morning the uniform companies of militia, directed by the order of his excellency the commander in chief, of the 19th ult. to repair to this city for the defence of the harbour for three months, having arrived from their respective districts, were received by the military of this city in a manner Suitable to the occasion.

“The detached companies from the country paraded at the arsenal at 9 o’clock. The brigade of artillery of this city, the horse under major Warner and infantry greens under major M’ Clure, were paraded in Broadway to receive them; the line of the united corps extending from above Leonard-street to St Paul’s church. ... After which the detachment from the country marched in front of the line and the battery, and proceeded to the Sixhoot Fort, where they embarked on board the vessels (in which they had arrived) and proceeded to Staten Island, the place of their destination. ...”—Columbia, S 1, 1812. The militia came from Albany, Hudson, Athens, Catskill, Poughkeepsie, and Newburgh.—Pub. Papers of Daniel D. Tompkins, I: 399-91.

News of Capt. Hull’s victory over the “Guerrilier” is published in New York and characterized as an event “which will ennoble him to his countrymen and immortalize his name.”—N. Y. Expr. Post, S 25; N. Y. Spectator, S 5, 1812. See S 7.

Capt. Isaac Hull, of the American frigate “Constitution” (see Ag 19), is voted the freedom of the city in a gold box with an appropriate inscription. On Sept. 14, he was requested to sit for his portrait.—M. C. C. (1784-1831), VII: 247-49, 253-34. The original MSS. of these resolutions are in metal file No. 39, city clerk’s record-room. The gold box cost $325.—M. C. C. (1784-1831), VII: 295. The portrait was painted by Jarvis and deposited in 1815 in the picture gallery of the city hall. It cost $400.—Cat. of Works of Art, etc., p. 95; Journal B, 112, comptroller’s office.

The freedom was formally presented to Hull on Dec. 29 (q.v.).

The “Philadelphia” (in commission to 13 line) armed a 60 gun frigate and formed artillery and infantry which Gov. Tompkins brought with him down the Hudson, and which are stationed at Fort Tompkins, Richmond, and Hudson, for the defence of N. York; the following troops are ordered to rendezvous and be encamped for the same service on the 15th inst. VII.
THE ICONOGRAPHY OF MANHATTAN ISLAND

Mr. Morton's Brigade of uniformed artillery, consisting of the Chatham, Scitche, Fleet, and Harlen's regiments.

Colonel Van Beuren's and Col. Mace's regiments of infantry, Captain Stryker's company of Riflemen and Captain Pierse's troop of cavalry.

One company artillery—one of infantry, and one troop of cavalry, are also called into service out of the Suffolk county, for the defence of the East End of Long Island. The whole militia of Suffolk and Queen's counties will be held and reserved in readiness for the last mentioned service.

We likewise understand that Gen. Hopkins's brigade of infantry, immediately north of the Highlands, have not yet been called out, for which reason it is presumed they are to be retained as a corps de reserve, to march towards the southern and frontier stations, if not rendered more expedient by circumstances.

The detached regiments of artillery, cavalry, light infantry, and rifle-men, have not yet been put in requisition; but we are informed that the officers of these corps are in daily expectation of receiving similar orders.—Pub. Adv., S 7; Com. Adv., S 9, 1812.

See also Pubs. of Daniel D. Tappan, I: 393-94.

The common council agrees that a light four-wheeled carriage be obtained to convey the thousand feet of hose which on June 29 the band authorised to make, and that a company of 12 men, to be known as the "Hose Company," be organised to take charge of the hose and carriage.—M. C. C. (1784-1831), VII: 245.

Napoleon enters Moscow.—Hazen, Modern European Hist., 235-36.

The what may be called "The First National Nominating Convention" holds its sessions, in New York City, during this and the two days following. Seventy Federalist delegates from eleven states are gathered, all keenly opposed to "Mr. Madison's war," most prominent among these is Rufus King, who "attends with reluctance." De Witt Clinton is chosen as the nominee for president despite Mr. King's opposition; Jared Ingersoll of Pennsylvania is nominated for vice-president.—Life & Corr. of Rufus King, V: 276-81; Murdoch, "The First National Nominating Convention," in Am. Hist. Recapt., I: 680-83. "No convention was ever assembled from more pure and patriotic motives," says one of the delegates, "nor any whose members were more worthy and respectable, as men and citizens."—Sullivan, Familiar Letters on Public Characters (1847), 349. This was "a highly interesting meeting, as being the first convention of the same sort as those which now present presidential candidates. The meeting was strictly private, and no report of its proceedings was published in any newspaper.—Stanwood, Hlst. of the Presidency (1889), 101. Clinton received 85 electoral votes against 128 for Madison.—Ibid., 104.

The Drafted Militia, of this city and of Westchester crossed the East River, and proceeded to the encampment near bath.

The Artillery were reviewed on the Battery; but for want of sufficient equipage they are not to pitch their tents until Saturday. They then will take their station on the North river about two miles above the city.—Com. Adv., S 15, 1812.

The sweep of war John Adams now lying at the Navy Yard, N. York is to be dismissed, and used as a prison ship, during the war. This vessel was originally a frigate; was cut down to a sloop of war, and was afterwards built upon. After the last alterations she was found so unwieldly, as to be unfit for service. . . .—Repertory, S 22, 1812.

Jas. Jay writes from New York to Jas. Monroe suggesting the use of invisible writing in securing information concerning the enemy's posts; also regarding an embassy to England to see if peace can be secured.—See the original with the Monroe papers, in the N. Y. P. L.

The inhabitants of Brooklyn publish their thanks to New York firemen who aided in putting out a fire which threatened to destroy a large part of the town.—Columbian, S 25, 30, 1812.

George Frederick Cooke, the English actor, dies in New York. He had been in America for two years (see N 21, 1810), achieving great professional success, which however was constantly interrupted by spells of drunken debauchery. Dr. David Hosack, who attended him during his last illness, afterward wrote to his biographer: "His case. . . adds another lamented example to the long catalogue of those who have prematurely fallen the victims of intemperance." At the time of his death he had been for several months living at Mechanics Hall, on the north-west corner of Broadway and Robinson St. (afterward Park Place). He was buried in the burying-ground of St. Paul's Church, Sept. 27, 1812.

N. Y. Evd. Post, S 26, 1812. See Pl. 90, Vol. III.

A memorial is presented to the common council signed by committees representing the New York Society Library, The Academy of Arts, and the New York Historical Society, and also by "several highly respectable citizens of the City," asking for a building in which they may be centered the various associations and institutions which exist. . . . The particular subjects which they wish to include in said Institution would be, "1st a Museum of Natural History. 2d an Academy of Fine Arts 3d Means of Instruction in useful and liberal Sciences such as Chemistry Mechanical Philosophy Agriculture and Botany. 4d a Society for the encouragement of Arts Manufactures and Commerce. 5 An extensive Public Library 6 as Historical Society. 7 An Athenaeum or public reading room."

The specific request contained in the memorial was that the common council permit the establishment of an "Institution for the promotion of arts and sciences in this City to be called the 'New York Institution' for the promotion of arts and sciences' and to appropriate so much of the present Alms House as may be needful for its complete accommodation together with such further provision for its perfect establishment as may hereafter appear to be necessary."—M. C. C. (1784-1831), VII: 269—70. See Je 13, 1815.

In a petition (dated Oct. 4) to the common council, Robert Fulton says: "The practicability and, I hope, usefulness, of steam river boats being the result of an experiment, I feel a desire to establish a similar communication between this City and Brooklyn. Although the navigation of steam river boats on the East river may involve some difficulties which do not occur on the Hudson, yet I have no doubt they may be overcome; And if your honorable body are disposed to show a like liberal patronage to that manifested towards the Steam ferry already established, I shall use my utmost exertions that the result shall be satisfactory to you Gentlemen as patrons of the useful arts."

"I beg leave therefore to propose taking a lease of the ferry from the Fly market to Brooklyn; Should this proposal meet your approbation I shall be happy to confer with such committee as you may think proper to appoint for that purpose."—From the original petition (MS.), signed by Fulton, preserved in metal file No. 47, city clerk's record-room. The board refers it to a committee.—M. C. C. (1784-1831), VII: 270. See N 10 and D 4.

The common council orders that Greenwich Market be built on a site offered by Trinity Church for market purposes, 50 feet wide, along the south side of Christopher St., extending from Greenwich St. to Washington St.—M. C. C. (1784-1831), VII: 271, 273-74. The land was ceded by Trinity on Nov. 2—Trim, Minibx. (MS.).

The Greenwich Market, the name of which has been officially assigned to 1800 (p. v, O 27) to the Spring Street Market. The new market was finished in 1813, and enlarged in 1819.—De Voe, Market Book, 399, 401.

Public Law Library.—The Corporation of the city of New York having assigned a room in the new City Hall, for the purpose of keeping a Law Library, for the use of the Common Council, the other officers of the Hall, and the judges and lawyers who attend courts; accordingly a well chosen variety of authors, both in the common and civil law, have been supplied by Gould, Banks and Gould, law booksellers of this city, under whose care the library is now kept.—It is this day opened for use. The books cannot be taken out of the Hall, but may be consulted in the library room, or taken into any of the common rooms. . . . The room is in the northwest corner of the Hall, on the same floor with the mayor's and recorder's office.—Columbian, O 7, 1812.

Thos. Poppleton arrives in New York from Baltimore to enter upon his duties as one of the commissioners for ascertaining the best method of draining the Collect and Lispenard's Meadows (see Je 19). On Oct. 8, he was introduced to Robert Fulton, and on Oct. 12 he was presented to the mayor and some of the corporation.—Poppleton's Journal (MS.), in N. Y. P. L. (N. Y. City MSS, box K-L). See O 15.

The common council approves of the street commissioner's map for improving the part of the city between Montgomery and Corlears Strs. south of Water St. It shows the present extent of the docks and wharves and the depth of water to a line 340 ft. south of Water St. The street commissioner has drawn thereon with pencil lines "Front Street 50 feet wide—140 feet from Water
The corporation of Trinity Church is permitted to "enclose" the new Greenwich Road from Morton St. to the state prison in accordance with the terms of an agreement made when Trinity Church ceded new Greenwich St. to the corporation. — M. C. C. (1784-1831), VII: 272, 278-79.

By the middle of October, only four months after the declaration of war, 36 privateers had left the port of New York. In all, 52 privateers from New York served in the war. — Cooper, "The History of Am. Privateers and Letters of Marque, 1781-1812," 4, 7; Appendix, 455-59. See also M. C. C. (1784-1831), VII: 317. The original MS. of the resolution is in metal file No. 39, clerk's record-room. On March 15, 1812, the corporation paid $25 to G. Thresher for "painting a Diploma for Capt. Jones of the U S Wasp," and on April 3, 1815, $50 was paid for the sword. — M. C. C. (1784-1831), VII: 408; VIII: 178; Journal B, 3, comptroller's office. The presentation of the freedom and the sword took place on April 6, 1815 (p. 2).

"A Communication from Eli Whitney, Robert Fulton and Thos. H. Poppleton, Commissioners upon Canal Street was read and referred to the Street Commissioner and Canal Committee." — M. C. C. (1784-1831), VIII: 312. The letter was drawn up on Nov. 27 — Poppleton's Journal (MS).

Robert Fulton writes a letter to a special committee of the common council again offering to rent the Brooklyn Ferry (see O 5) and "to run a steam Boat calculated for carriages from Beskman Ship, and another for passengers and freight from the fly market." — Original letter in city clerk's record-room; M. C. C. (1784-1831), VIII: 417, See D 4.

An advertisement reads: "Those Young Men who wish to take an active part in the protection of their country, will have a good chance of volunteering their services for the defence of the City and Harbour of New York, as Artillerist, for the term of One Year, at the rate of Fifteen Dollars per month, Victuals and Clothes found, as Likewise a Musket and Belts, which will be given them at the expiration of a year — The Rendezvous will be opened at Blackie's Tavern, Charter Street, between Roosevelt and Pearl Sts., this evening, 6 until 10 o'clock, when the names of their Officers will be made known." — Com. Adv., D 2, 1812.

Poppleton (see O 15 and N 25) writes: "This day we reviewed the general Mass of Ideas Sketches &c &c which at our several meetings had been roughly thrown together in a Common stock; after selecting what we considered most desirable, arranging or combining them into System & altering & improving thence we unanymously decided on the plan which appeared to us under all circumstances the best to be adopted." — M. F. & M. Whitney undertook to manage the Report & T. P. to proceed with the necessary drawings which are to accompany & explain said report. — Poppleton's Journal (MS) in N. Y. C. L. (N. Y. City MSS., box K-L). Poppleton was charged with the Superintende of the Drafts, and he made the plans and cross sections, and Fulton made the perspective drawings. The report was signed on Feb. 15, 1813 (p. 3).

The following report of the committee of finance indicates good management of the city's finances: "The Committee of Finance have the honor to inform the Board, that in such high credit does the Corporation stand at present with their fellow Citizens that the Loan ordered on Monday last to be opened for one hundred thousand Dollars at Six per Cent annus was subscribed for and filled up in less than five Minutes on Tuesday Morning." — M. C. C. (1784-1831), VIII: 327.

The common council agrees to lease the Brooklyn (Fulton) Ferry to Robert Fulton and William Cutting at the rate of $4,500 per annum, steamboats to be placed on the ferry. — M. C. C. (1784-1831), VIII: 327, 309, 315, 322. The lease was ordered to be executed by the corporation on Feb. 1, 1813. — Ibid., VII: 361. The terms were altered on May 17, 1813. — Ibid., 436, 445, 456, 499. See D 3, 1814.

Permission is given to an agent of the U. S. to erect a temporary building for a guard and store-house adjacent to Fort Gansevoort on the North River. — M. C. C. (1784-1831), VIII: 328.
An advertisement issued from the “Stadium-Broadway,” Dec.
15, 1812, reads: “The running of Mr. Mackenzie’s new Carriage, without horses, and now exhibited at this place, is at a rate of five miles per hour, its common speed; but it may be driven at the rate of eight miles; and if the course was rectilinear, it would run at the rate of ten miles per hour. . . . The use of the Stadium, which is very spacious, and sufficiently detached from the street, will be an auxiliary, for the display of Military Mechanics, models of new inventions, or any interesting and respectable objects, that cannot be displayed to advantage in a covered building. Apply to Mr. Greame, at the Stadium.”—Columbian, D 15, 1812. Mackenzie’s carriage was apparently the first American automobile. The Stadium was on the north-east corner of Broadway and Ferreira Lane, the site of the city Garden.—Man. Com. Adv. (1863), 631; L. M. R. K., III: 985.

“The Frigate United States, Commodore Decatur, and her Prize, the Macedonian [see O 25], are at anchor just above Hurt Gate, waiting for wind and tide.”—Com. Adv., D 16, 1812. See D 17.

Upon receiving an official account of the action between the “United States” and the “Macedonian,” the common council votes the freedom of the city in a gold box and the honour of a portrait to Commodore Decatur, and offers its thanks to his officers and crew. The board also decides to give a public dinner to Decatur, Hull, and Jones (see D 16) and another to the crew of the United States” (see J. 7, 1813). In addition, it resolves “that on the arrival of the Frigate United States and her prize in port the national Flag be displayed on the City Hall. That Brig. Genl. Morton be requested to cause a national salute to be fired by a Detachment from his Brigade. That the Vessels in the Harbour hoist their colours Mast high and that the Bells in the City be rung for one hour on the occasion.”—M. C. C. (1784-1831), VII: 333-34. The original MS. of these resolutions is in metal file No. 39, city clerk’s record-room. Decatur did not actually receive the freedom until Nov. 4, 1818 (q. v.). His portrait was painted by Thomas Sully in 1814, and cost $500.—Cat. of the Works of Art Belonging to the City of N. Y., 8; Journal B, comptroller’s office, 54.

A general meeting of merchants and other citizens, “without distinction of party,” is held at the Tontine Coffee House, and resolutions are adopted praising the “Gallantry, Skill and Patriotism” of Commodore Decatur and Capts. Hull and Jones. A committee of 15 is chosen to unite with the corporation (see D 17) in honouring these heroes.—Com. Adv., D 19, 1812. See D 29.

The situation of the Lotts whereon the old City Hall had stood having been determined in a situation offensive and inconsistent to the neighbourhood, it was referred to the St Commissioner City Inspector and Superintendent of Repairs to cause the Lotts owned by the Corporation and by Individuals to be enclosed with a Fence and the Street paved.”—M. C. C. (1784-1831), VII: 337.

The British foreign office announces that “the necessary measures have been taken, by the command of his Royal Highness, for the blockade of the ports and harbors of the Chesapeake and of the river Delaware, in the United States of America; and that from this time all the measures authorised by the Law of Nations will be adopted and executed, with respect to all vessels which may attempt to violate the said blockade.”—Com. Adv., Sir 1, 1813. See My 26, 1813.

In accordance with the resolution of Sept. 7 (q. v.), the freedom of the city, “enclosed in a superb golden box,” is formally presented to Capt. Isaac Hull.—M. C. C. (1784-1831), VII: 340-41; N. Y. Gen. & Gen. Adv., D 29, 1812. The original MS. of the mayor’s address to Hull is preserved in metal file No. 48, city clerk’s record-room.

“Washington Hall [see J 4, 1809]. This elegant and spacious Building, situated in Broadway, corner of Reed-street, is now ready for an object; and will be Let or Leased from the first of May next, or sooner if required. It is well calculated for a splendid Hotel, having forty-one Rooms, thirty-two of which are supplied with fire places. . . .”—Com. Adv., D 28, 1812. The first entertainment at Washington Hall took place on May 4, 1813 (q. v.).

Capt. William Bainbridge in the U. S. frigate “Constitution” destroys the British frigate “Java” off the coast of Brazil, killing 48 and wounding 102.—Mc Master, Hist. of the People of the U. S., IV: 85-86. News reached New York on Feb. 18, 1813 (q.v.).

A public dinner is held at the City Hotel in honour of Commodore Decatur and Capts. Hull and Jones.—National Advertiser, D 31, 1812; Ms. diary of De Witt Clinton, in N. Y. H. S. Washington Irving, writing to his brother Peter, thus described the occasion: “It was the most splendid entertainment of the kind I ever witnessed. The City Assembly Room was decorated in a very tasteful manner, with various flags and ornaments of the Macedonian. Five rows of tables were laid out lengthways in the room, and a table across the top of the room, elevated above the rest, where the gallant heroes were seated, in company with several of our highest civil and military officers. Upwards of four hundred citizens of both parties sat down to the dinner, which was really sumptuous. The room was decorated with transparents representing the battles, &c. in the color and ornament with various naval trophies, and the whole entertainment went off with a soul and spirit which I never before witnessed. I never in my life before felt the national feeling so strongly aroused, for I never before saw in this country so true a cause for national triumph.”—Life and Letters of Washington Irving, by Pierre M. Irving (N. Y., 1868), I: 292-93. The corporation paid $500 for the transparents.—M. C. C. (1784-1831), VII: 347. See also Com. Adv., D 30 and 31, 1812.

An elaborate ball is held at the City Assembly rooms in honour of the commanders and officers of the victorious frigates. The decorations include flags, mottoes, and transparents. One of the latter, made by J. J. Holland, is a large painting divided into three compartments, one representing the action between the “Guerrrière” and the “Constitution,” and the other depicting the capture of the “Macedonian,” and the third showing the defeat of the “Frolic” by the “Wasp.” The ball on the whole, it was said, “for splendor of decorations and brilliancy of company has never been equalled in this country on any public occasion.”—National Advertiser, Je 4, 1813. See also Gurney’s, N. Y. C. & Vicinity during the War of 1812-15, p. 138-39.

The original petitions, orders, and other documents on file in the city clerk’s record-room are so voluminous that it has proved impractical, for the purposes of this Chronology, to examine them thoroughly beyond 1812. The extracts already quoted from this source indicate the important character of the material as a contribution to our knowledge of the city’s history.

1813

In this year, the firm of D. & G. Bruce established at New York the first stereotype foundry in the U. S.—Bishop, Hist. of Am. Manufactures, I: 214.

In this year, the Naval Militia, the Sea Fencibles, McClure’s Riflemen, the Republican Greens, and the Eleventh Artillery, were organized in New York.—Chas. S. Clark, in Evoc. Past, F 26, 1816.

“In 1813 there was a distinct church and congregation formed in Garden street, and the Middle and North Churches remained under the charge of the original corporate Church, now [1856] familiarly termed the Collegiate.”—De Witt’s Discourse (1847) 49.

In this year, the College of Physicians and Surgeons, having previously occupied temporary quarters (see Mr 12, 1807), built its own building on the north side of Barclay St., west of Broadway.—Francis, Hist. Sketch of the Origin, etc. of the College (1823), with illustration showing façade of new building; Goodrich, Picture of N. Y. (1828), 288-93. In 1836, it removed to 67 Crosby St.—Colton, A Summary Historical (1836). See, further, L. M. R. I: 94.

In 1840, this year, assessments were levied for opening Fair St., and for paving Broadway between Leonard and Canal Sts.—Index to Assess. Rolls, Vol. I.

In this year, a few individuals, desiring to add to the value of their property west of Lumber Street, conceived a plan of putting a street through the northern portion of Trinity churchyard. Favorable action on their selfish scheme was taken by the Common Council, and nothing but a thorough and vigorous protest from the authorities of this [Trinity] Parish and many influential citizens prevented the desecration of ground which for nearly one hundred and fifty years had been used as a burial-place. The part of the churchyard which it was proposed thus sacrilegiously to invade, was that in which many of the soldiers and officers of the American Army . . . were buried . . . .

“In 1832 the project was renewed. Though meeting with ap
1815—The certain no the believe caprice prolific them 1557 lots law, a becomes strong. 

Washington Irving writes: "This war has completely changed the face of things. You would scarcely recognize our old penal city.

Napoleon is talked of but armies, navies, battles, etc. ...

"Had not the miserable accounts from our frontiers dampened in some measure the public zeal I believe half of our young men would have been military mad."—Guernsey, N. T. City Its Vicinity during the War of 1812-15, II: 39.

The increasing practice of taking ignorant, poor, and unwary persons to prison for the purpose of obtaining fines is noted with disapprobation by the common council.—M. G. C. (1784-1811), VII: 345-46.

The Commissioners' Map (or Randel Survey) is a public record, and the common council has decided that an exclusive right to publish it cannot be given. The board, nevertheless, orders 40 of the engraved maps made by Wm. Bridges.—M. G. C. (1784-1811), VII: 345-46. See also summary under N 16, 1811.

About 400 of the "gallant Seamen belonging to the frigate United States . . . very neatly dressed in sailor's habit," land at New Market Ferry and march in procession to the City Hotel in Broadway where a dinner is held in their honour by the common council.—M. G. C. (1784-1811), VII: 345 National Advocate, Ja 9, 1811.

The front of the theatre is to be "Brilliantly Illuminated!" and a large transparency shown in honour of Commodore Perry's proposed visit.—N. Y. Eve. Post, Ja 9, 1815. See F 18, 1815.

The common council agrees to the proposal to offer at auction at the Tontine Coffee House, Ja 28, 3 lots of ground at the site of the old city ball fronting on Wall St. (See F 8)—M. G. C. (1784-1811), VII: 355.

A newspaper report reads "Our Port Blockaded.—A British 74 gun ship and two or three smaller vessels are off the Hook, and within a few miles of the Light House. This squadron captured yesterday 5 vessels—three of them inward and two outward bound. . . ." Several of the vessels which sailed from our port yesterday, on discovering the British squadron near the Hook, very prudently returned.—Com. Ado, Ja 16, 1815. The British squadron was commanded by Admiral Sir John Borlace Warren.—N. Y. Spectator, Ja 20, 23, 27, 1813. See also Wilson, Mem. Hist. of N. Y., III: 271.

At Freeport on the River Raisin in southern-east Michigan, the Americans under Gen. Winchester are defeated by the British under Gen. Proctor. Proctor took all the prisoners who could walk and marched off to Malden, leaving the wounded at Freeport where they were massacred by the Indians.—McMaster Hist. of People of U. S., IV: 21-25.

De Witt Clinton is reappointed mayor of New York.—Com. Ado, F 14, 1815.

The common council adopts a memorial asking the legislature "to pass a law, vesting in certain discreet commissioners, the sum of 250,000 Dollars, to be expended by them in the erection of such works and the procuring of such provisions and munitions of war, as in their judgment, and the judgment of such discreet and scientific men as they may consult, may be calculated most readily to protect the Port and Harbour of New York from attack, and to prevent the immense property contained in this City, and the lives of its citizens from being destroyed."—M. G. C. (1784-1811), VII: 368-70. One of these memorials, printed, is preserved in metal file No. 48, city clerk's record-room. See also Life & Correspondence of Rufus King, V: 306. See, further, Mr 15, 29, Ap 13 and later dates.

The price required for the lots at the site of the old city hall on Wall St. as shown by the comptroller's report is $25,000.—M. G. C. (1784-1811), VII: 367. See Ja 18.

The commissioners, appointed by the act of June 19, 1812 (p. 78., "to ascertain the best method of conveying off the waters from the collect and Lispenards Meadows in the City of New York," Feb. report as follows:

"That we have taken an accurate survey and delineated a correct topographical plan of the district comprehending the Collect, Lispenards Meadows and the adjacent lands, and are unanimous in the opinion, that Canal Street is to be so constructed as to afford ample means of conveying off all the waters which, under any circumstances, may collect from said district.

"It has formerly been proposed to cut a Canal across the Island, from the North to the East River, which should answer the double purpose of taking off the water from the streets of the City by means of the Canal Street and of Carrying Boats and Vessels to deposit their Cargoes on its Banks. Those who advocated this proposition entertained an opinion that at certain times of the tide the water was several feet higher on one side of the Island, than on the other; which they alleged would produce a strong current thro' the proposed Canal and keep it clear of all sediment—By an attentive observation of the attitude of the tide on both sides of the Island, at the same time, during its rise and fall, we find there is no material difference—Hence it appears, that the cause which was supposed would keep the Canal clear of sediment and silt, does not exist.

"A more recent proposition, is a Canal beginning at the North River and terminating in a Basin at the Collect, with a lock at the North River, where it commences. In this case, if the water in the Canal is brought on level with the water in the Basin, it will require the banks of the Canal to be raised a sufficient quantity to prevent the water flowing from the adjacent grounds into it, and thus defeat one of its primary objects. If there are two locks, one at the North River and one at the Basin, in dry weather, Engin's would be required to supply them, and it would also be difficult to dispose of the Surplus Water, by which the Canal and Basin would be overloaded in heavy rains. There are other serious objections to this proposition, one of which is the necessity of having nearly twenty Bridges across the Canal, within the distance of about four thousand feet.

"It has likewise been proposed in building Canal Street, to form an open passage in its center, of an uniform descent from the head of the Collect to the North River, to receive only the water from the streets—It is believed, this passage would be liable to obstruction by snow and ice in Winter, and that in Summer, its contents exposed to the action of the Sun, would render the atmosphere in the vicinity disagreeable—it would be a great blemish to the aspect of the street and is liable to the objection of numerous Bridges, before mentioned.

"A considerable part of the District in question, is a Glade of low ground, extending across the Island, which will in a short time, be covered with Buildings and must in a few Years, be embraced in the very heart of the City; hence it becomes a consideration of inestimable importance that a plan should be adopted, which will effectually prevent an accumulation of filth and stagnatory waters, generating noxious exhalations. Should this section of the City be thus encumbered with temporary and irregular buildings of all shapes and dimensions promiscuously Located as caprice or circumstances may dictate, it is greatly to be apprehended that it would become such a prolific source of Contagion and disease as often to render a large portion of the City uninhabitable. That it will be so filled up is certain, unless prevented by some positive regulation.

"Whatever may be the origin of that deplorable malady which has more than once depopulated this City, all parties will agree in the fact, that it is in the atmosphere of such a place as above described, that it becomes most contagious.

"We have bestowed much attention upon the subject referred to our consideration, and sum the following as the best plan, which we have been able to devise—

"That a tunnel or covered Sewer, of an Eliptical form, be laid along the Center of Canal Street, from the North River to Broadway—The horizontal diameter of the tunnel to be sixteen feet, and the vertical diameter eight feet—said tunnel to continue uniformly diminishing from Broad Way to the head of Collect Street—that the bottom of the tunnel is placed on a level with the North River and the streets above low water mark, at Broadway—that for the purpose of promoting a free circulation of air through the tunnel, elliptical apertures or openings, six feet long and four feet wide, be left in the roof of the tunnel—one in the space of every hundred feet, throughout its whole length. Each opening
to be covered with a trellis work of Cast Iron, rising eighteen inches
above the pavement, and terminating in a suitable Spire for Sup-
porting a Lamp—By this method, a large volume of tide water
extending itself up to Broad Way, will be admitted into the tunnel,
every twelve hours, which will drive out an equal volume of air,
and thus the tunnel will be ventilated twice in twenty four hours."
[Advantages of this plan are mentioned. It is also proposed to
have this part of town restricted to uniform attractive build-
ings, to make it more inviting, having the depth of all cellars
limited to prevent water accumulating in them and not flowing off.]
"More fully to illustrate our ideas in this particular, we have
carried a perspective drawing of a part of a street, built in the
manner we propose, to be made and placed among the exhibits,
accompanying this report."

[It is stated that property values will increase, both in this locality
and elsewhere.]

"It appears to us there are many considerations, which forcibly
recommend the continuance of Canal Street, from the North River
to Broad way, as at present laid out. This street being an hundred
feet wide and running nearly in a North west and southeast direc-
tion, affords an excellent inlet for ventilating the City; at the same
time it is itself finely ventilated, by numerous cross streets." [They
suggest that the direction of Collect St. and part of Canal St. be
varied] "so as to make this avenue lead, in a direct line from the
junction of Canal Street and Broadway, to the junction of Pearl
and Chatham Streets, corresponding in width throughout with
Canal Street. . . . Being a leading avenue, it would of course
become a subject of business, and that it would not only derive
support from its own importance, but greatly enhance the value
of the whole district thro' which it passes."

"Viewing New York as preeminently designated by nature to be
the point where the streams of Commerce meet, and from whence
they again diverge in foreign enterprise, and believing it destined
to become the great emporium of North America, we cannot but
regard whatever may contribute to the Stability, convenience or
embellishment of the City as of incalculable importance, both
to its present and future Citizens, and to the inhabitants of this
and the neighbouring States. If that portion of the City, which is
the subject of this report, is suffered to be built up, in an irregular,
buddled, promiscuous and confused manner, it will entail a curse
upon the City and posterity."

"We have delineated a plan of the ground to which this subject
immediately relates, together with profiles, sections and drawings,
accompanied with estimates and explanations, by which the method
we have adopted, is more specifically exhibited. . . .

A List of drawings referred to in the preceding report

Pe 1. A plan of the District from whence the water flows into
the proposed Tunnel.

Pe 2 & 3. Plans of the Tunnel, under Canal and Collect Streets
and Culverts from the Cross streets.

Pe 4. A profile of the situation and dimensions of the pro-
posed tunnel, and also its position as respects the present
surface of the ground.

Pe 5. A Longitudinal section of the Tunnel, Street, air wells
for ventilating it &c When finished.

Pe 6. A perspective view of part of a proposed street, having
uniform Buildings, with Colonades in front.

Pe 7. A transverse section of a House in the range of Build-
ings exhibited in No 6, showing how cellars may be obtained,
by raising the street.

Pe 8. A plan of the City and South end of York Island, on
which the proposed variation of Collect Street and a part of Canal
Street is shown by a red line."

From the original report (maps & missing) in metal file No. 48,
city clerk's record-room; descrip. of Pl. 83-bb, III. 562. See also
Man. Com. Coun. (1863), 764; and Cat. of Maps & Surveys in
Office of Sec. of State, 32. See F 23 and Mr 8.

The news of the fatal victory of the U. S. frigate "Constitu-
tion" over the British frigate "Java," at 8, Decr, on 29, Decr, 1812
(q.v.), reaches New York. Lieut. Ludlow of the former ship passes
through New York "on his way to the seat of Government" and
gives a detailed statement of the encounter.—Com. Adv., F 18,
1813. The official account of the engagement rendered by Commo-
dore Bainbridge to the sec'y of the navy appears in ibid., F 24, 1813.

Washington's birthday is observed with literary exercises by
two different organizations, the "Washington Benevolent Society" and
the "Hamilton Society."—Com. Adv., F 25, 1813. The com-
mon council gave orders that "Flags in the Harbour be hoisted and
a national salute under the direction of the Gen'l of Artillery be
fired at noon."—M. C. G. (1784-1817), VII: 377; Com. Adv.,
F 20, 1813. Advertised for exhibit on this day at 126 Broadway
are the "Superb Panoramic Paintings of the late engagement between
the frigates Constitution and Guirriere [see AG 19, 1812], comprised
in three elegant and attractive engravings, 1813.

The common council grants deeds for the lots on which the old
city hall stood (see J4 18 and F 5); one to George Griswold, one
to Garrit Storm, and one to Thomas Kirk, James Eastburn, and John
Downes.—M. C. G. (1784-1817), VII: 377. See also ibid., VII:
371. Kirk, Eastburn, and Downes also purchased the lot sold on
May 13, 1812 (q.v.), to Joel Post and John Lawrence. On their two
locally erected substantial buildings of three storeys, which in 1816
(q.v., D 2) was sold to the U.S. government for a custom-house.
See also F 11, 1814.

The street commissioner presents to the common council the
plan of the Commissioners appointed to ascertain the best method
of draining Lispenard's Meadows and the Collect (see F 13). He
also presents a plan "that will not cost more than one third of that
proposed by the Commissioners and can be kept clean at less than
one fifth of the Expense and if constructed in the manner which is
contemplated no water would stand or remain in it and could be kept
perfectly clean. The Maps and profiles now exhibited are imper-
fect Sketches, but with a little explanation may show the inten-
tion. The several plans are referred to the canal committee.—
See Mr 1.

Capt. James Lawrence in the U. S. frigate "Hornet" destroys
the British ship "Peacock" off Brazil.—Winnor, VII: 581-582,
457. See Mr 29.

Russia offers to mediate between Great Britain and the United
States. The United States accepted the offer and appointed John
Owen Adams, Albert Gallatin, and James A. Bayard as commis-
sioners; Great Britain, however, declined.—Winnor, VII: 483.

Com. Bainbridge is voted the freedom of the city in a gold box,
and is asked to sit for his portrait, for his services in destroying
the British frigate "Java" (see D 29, 1812)—M. C. C. (1784-1817),
VII: 391, 483, 484. The freedom was formally presented on Dec.
8 (q.v.). The portrait was painted by Jarvis in 1814, and cost $520.
—Cat. of the Works of Art, etc., 91. Journal B, 76, comptroller's
office.

Robert Macomb presents a memorial to the common council
stating that he intends to petition the legislature for permission
"to build a Bridge & Dam from Bushing point to Devouc point
in Westchester," and asking the approval of the board, "as he
feels bound to fix a moderate charge towards the one half to the
use of the poor City." The matter is referred to the road committee.—
M. C. C. (1784-1817), VII: 384. The committee reported favourably on March 8, but as they under-
stood that an application of a similar nature was pending in the
legislature and as they did not know how far the rights of third
persons might be involved, they recommended that the corpora-
tion take no specific action, which was approved.—ibid., VII:
397. The original MS. report is preserved in metal file No. 48,

The Canal St. committee reports to the common council that
the street commissioners' plan for draining Lispenard's Meadows
(see F 21), although it "is not without its objections," is preferable
to that of the commissioners (see F 5). The objections to the
commissioners' plan include the "extreme difficulty to secure
proper Foundations for the proposed Tunnel," the "want of
sufficient descent to carry off the sediment," the "impracticability
of cleansing the Tunnel or the lateral conduits;" the "impos-
sibility that an eptitchal Tunnel of the dimensions proposed,
which at flood Tide must be nearly full of tide water, . . .
would be able to carry off the torrents of water which must seek
its way into it, in the rainy Seasons;" the "quantities of mea-
sural or noxious airs which are always generated and condensed
in Sewers under ground and which must be continually extracting
tho' the air wells proposed to be made, especially during the
rising of the Tide;" and the "enormous expense of constructing
it, the extreme difficulty of repairing it." The common council
approves the report and directs that a memorial be sent to the
legislature asking it to reject the plan of the commissioners.
Mar. 1812

M. C. C. (1784-1831), VII: 388-90. The original report of the canal committee is in metal file No. 48, city clerk's record-room.

See, further, Mr 14, 1814.

Thomas H. Poppleton is appointed a city surveyor.—M. C. C. (1784-1831), 1812.

The Boston Daily Advertiser, the first daily paper in Boston, begun, published by W. W. Clapp and edited by Horatio Bigelow. In 1814, Nathan Hale (nephew of the patriot) became editor, and his conspicuous ability made the Advertiser one of the leading newspapers in the country.—Winsor, Mem. Hist. of Boston, III: 627; Stuart, Life of Capt. Nathan Hale, 1812.

Pera, Madison's second term begins.—Winsor, VI: 276. See also Com. Advy, Mr 8, 1812.

Wm. Bridges and Thos. Poppleton announce “that they have opened a suite of offices at the New-York City Library in Nassau-street, as an Architectural, Estate Agency, and General Land Surveying office.”

“Counties, cities, private estates, or any tract of land accurately surveyed and drawn. Plans correctly copied, reduced or enlarged. Maps prepared for sale lots, &c.

“Estates valued, bought and sold on commission.

“Trigonometrical Surveys, and sections of Sea Coast, Harbors, Rivers, for purposes of pilotage or improvement of the navigation. Inspect and survey towns, and country explored for Canals, Aqueducts, or other Engineering purposes.”—Com. Advy, Mr 6, 1813.

The committee on the purchase of government house (offered by the state comptroller for $50,000—see My 26, 1812) reports in favour of the purchase, but not under the conditions proposed by the state. The report adds: “It is certain the present situation of the House and Grounds is a Disgrace to our City, and unfortunately that House is generally attached to the Corporation, instead of the actual proprietor.”—From the original report, in metal file No. 48, city clerk’s record-room.—M. C. C. (1784-1831), VII: 400-1. See Ap 13.

Payments of $763.64 to Thomas Poppleton, $180 to Eli Whitney, and $135 to Robert Fulton are made, for their services as commissioners under the act of June 19, 1812 (q.v.).—M. C. C. (1784-1831), 1812.

Common schools having been established by the legislature for the state of New York outside of the city of New York, by chap. 242 of the laws of 1812, the provisions of this act are now extended to the city, under special regulations. The common council is authorised to appoint annually for the city five “commissioners of school money,” whose duty it shall be to distribute school moneys to the Free School Society, Orphans Asylum Society, Economical School Society, African Free School, and to other such religious societies in the city “as now support or hereafter shall establish charity schools,” such distribution to be made “in proportion to the average number of children between the ages of four and fifteen years, taught there in the year preceding such distribution, and the amount of school money.”—Laws of N. Y. (1813), chap. 52. See also ibid. (1814), chap. 192, and ibid. (1815), chap. 252. See, further, N 19, 1824. The Free School Society, in 1815, received $3,708.14 as its share in the first apportionment. See Vol. III, p. 619 (footnote).

Gov. Tompkins sends to the assembly the following message regarding the protection of New York City: “Fort Columbus, Castle Williams and a fort to guard the pass at Buttermilk channel, (all upon Governor’s Island) are completed and equipped, with everything needful for action. The battery on the Southwest point of New York Island, the battery at the foot of Hubert and Laight Street; fort Gansevoort and the works on Ellice’s and Bedlow’s Islands are likewise furnished and equipped, excepting however Fort Gansevoort, the guns of which are not mounted, but they will be so in a short time.

“The foundation of an extensive work on Hendrick’s reef opposite to the State fortifications at the Narrows, is laid, and I am assured that it will progress the moment the state of the weather will permit the commencement of the mason’s work.

“A work has also been begun at Sandy Hook. These together with the fortifications on the westerly side of the Narrows, erected by this State, and those at the navy yard, at the Wallabout, are the only sites which are occupied, either with batteries, or with works in a State of forwardness.

“An Arsenal has been built by the United States on the high ground of New Jersey, north west of Harpersfield, and equidistant from Hoboken and Paulus’s hook; and they possess a magazine, laboratory arsenal &c. in & near the City of New York.

“It is probable that 5000 troops in actual service are now stationed in and about the harbour of New York. That number is, however, in my opinion, very inadequate to render that important city secure.

“Preparatory to an estimate of the forces which may be sufficiently for the harbour of New York, it will be proper to mention these points, which, in addition to the present fortifications may be occupied to great advantage.

“1. A battery upon the block which has been sunk opposite the Navy Yard, on the mud bank or Island formed between the East River, and the Channel of the Wallabout Bay, would be a great protection to the easterly side of the city; such a work is it will be proper to be erected by the navy department.

“2. An open excavated battery of position on the high bank of the Long Island shore, between the house of Jeremiah Johnson and Williamsburg would be very powerful and commanding.

“III. A similar work will be required on the westerly side of the river, at or near Curdick’s Hook.

“IV. A Battery of 8 or 10 Columbiads at some proper place on the shore of the East River between Throghoe Neck and Blackwell’s Island, is necessary to guard against the approach of vessels from the sound.

“V. Works at Hoboken and Paulus’s hook should also be occupied.

“VI. A Bomb battery for 6 or 6 ten inch mortars, at or near the Quarantine ground, will be essential to prevent vessels from laying in that anchorage, to repair damage, or to wait for a favorable wind or tide.

“VII. Redoubts, each containing a block house, upon the high ground of Long Island, southwest of Brooklyn, which commands Redhool’s, Governor’s Island, and the City, and also upon the eminence in the rear of the fortifications on Staten Island will be of great importance.

“If these latter defences are built and properly manned, Tompkins estimates that the forces at New York, with the “seamen, mariners & fencibles in the harbour,” will amount to at least 12,500 men.—Pub. Papers of Daniel D. Tompkins, III: 382-90.

Col. George Izard is on his way to New York to take command of the city and harbour.—N. Y. Spectator, Mr 24, 1813.

New York is alarmed by a signal from the telegraph on Staten Island that a squadron, supposedly British, is approaching the harbour. The forts are immediately manned and the gunboats ordered to sail to the Narrows, but the fleet proves to be a number of friendly merchant ships.—N. Y. Spectator, Mr 24, 1813. See also Wilson, Mem. Hist. of N. Y., III: 272.

The “Hornet,” Capt. Lawrence, arrives at New York, bringing the news of her encounter with the “Peacock” (see F 24).—Com. Advy, Mr 25, 1813.

Long Island Sound is blockaded by three British ships.—Com. Advy, Mr 26, 1813. The Sound was still blockaded on April 12.—Ibid., Ap 12, 1813.

“The Corporation have granted permission to Col. Izard to erect a temporary breast work around the Battery. The work, we understand, is to be commenced without delay; and, when it is finished, heavy cannon are to be stationed, at short intervals, along the whole line.”—N. Y. Spectator, Mr 27, 1813.

Robert Fulton enters into an agreement with James Weldon to fit up two whale-boats with torpedoes, to attack and sink British vessels; all moneys paid by the U. S. government to be divided according to stipulated terms.—From the original document, sold by Henkels, Phila. (item No. 188), Oct. 22, 1819. See also Cat. of Fulton MSS. and documents, sold at Anderson’s, April 26-27, 1921, by order of Mrs. A. T. Sutcliffe, items 140, 174, and 175. See Ap 27.

The freedom of the city and a piece of plate are voted to Capt. Jane Lawrence for the capture and destroying the British sloop-of-war “Peaceock” with the American sloop-of-war “Hornet” (see F 24), and a public dinner is planned for the “gallant crew”—M. C. C. (1784-1811), VII: 418-19, 583-85. The corporation paid G. Thresher $70 for “Executive Freedom City for Com[349] Bainbridge & Capt[349] Lawrence.”—M. C. C. (1794-1811), VII: 544; Journal B, 20 comptroller’s office.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1813

On account of the delay of the state legislature regarding provision for defences of this city and harbour, the common council resolves that the comptroller be authorised to borrow, from time to time from the city banks, money not to exceed $100,000, to be used at the discretion of the committee of defence. It is hoped that the state will later reimburse the city for such expenditure.—M. C. G. (1784-1831), VII: 420-21. See Ap 5.

April

It is enacted by the state legislature "that the mayor, recorder and aldermen of the city of New-York shall . . . perform all the duties enjoined . . . on the supervisors of the respective counties of the state."—Laws of N. Y. (1813), II: 419. There was no distinct board of supervisors for the county of New York until Apr 15, 1857 (q. v.).

The common council agrees to the following recommendations of the committee of defence: 1, That the necessary wages for maintaining 15 of the unused gunboats now lying in the harbour be paid by the common council, and that authority be given to open a rendezvous for the purpose of engaging and organizing the necessary number of men, who shall be engaged to serve for three months (see My 24); 2, That the corps of 120 cartmen, enlisted in September last to move the 20 or 25 pieces of heavy ordnance now stationed at the United States arsenal to such positions as may be requisite, be called into practice twice a week to accustom the horses to that particular kind of draft, and the drivers to their duties.

These recommendations are made in view of the present prospect of an appropriation by the legislature for the purpose of the defence of this city.—M. C. G. (1784-1831), VII: 426-27.

Robert Macomb (see Mr 1) is authorised by the legislature to build a dam across the Harlem River, from Bussing's Point in the Ninth Ward to Devoe's Point in Westchester, having a gate or lock in the centre. The rights of John B. Coles and the Harlem Bridge Co. are not disturbed, as the dam is required by the act of the legislature to be built above the bridge authorised to be built by the Harlem Bridge Co.—Laws of N. Y. (1813), chap. 148. On April 19, Macomb informed the common council of the passage of the act, and asked that he be permitted "to build said Dam forthwith agreeable to said act; and that the City Surveyor may be ordered to locate the same so as to conform as nearly as possible with the Plan of the City." The matter was referred to the committee on surveys.—M. C. G. (1784-1831), VII: 435. See Je 21.

The legislature passes "An Act to reduce several Laws, relating particularly to the City of New-York, into one Act."—Laws of N. Y. (1813), chap. 86 (36th sess.). This act was published in this year by the common council as a separate volume. There is a copy in the N. Y. P. L.

To further encourage manufacturing (see Mar. 23, 1811), the state legislature incorporates "The Commission Company" to aid manufacturing companies, as well as private individuals engaged in domestic manufactures, in "disposing of articles solely of American manufacture," and "to make loans thereon when deposited for sale." The business and transactions of the company were "limited to the city of New-York."—Laws of N. Y. (1813), chap. 150.

The legislature authorises the common council to make public wells and pumps in any of the streets, the expense thereof to be "estimated and assessed among all the owners or occupants of the houses and lot of ground intended to be benefited thereby." Overseers of the wells and pumps in the several wards are to be appointed annually by the mayor, recorder, and aldermen; such overseers to render quarterly accounts.—Laws of N. Y. (1813), II: 445-27. See Ja 31, 1817.

Yesterday afternoon [April 9], alarm guns were fired on Staten Island and echoed from our City Batteries. Some of the Pilots, who came up from the Hook last evening, state, as the ground of the alarm, that the Acasia frigate was in sight of the Night House.—Com. Adv., Ap 10, 1813.

In the two schools established by the Free School Society 95 pupils are enrolled, divided thus among religious denominations:

Fulton writes from New York to Secretary of the Navy Jones, outlining plans for the destruction of British boats by means of his torpedo invention, and accompanying them here and there with pen-and-ink sketches.—Cat. of Fulton MSS. and documents, sold at Andersons, Ap 26-27, 1921, by order of Mrs. A. T. Sutcliffe, item 166. See also ibid., items 168 and 178. See Nr 16 and Ap 27.

The comptroller presents a report to the common council containing suggestions for gradually paying the city's debt, the establishment of a sinking fund being one of the chief ones.—M. C. G. (1784-1831), VII: 437-40. On July 2 (q. v.), the board agreed to a recommendation that a law he framed to establish a sinking fund.

The common council orders that a new brick house be erected for Engine No. 11 at Old Slip near the old site, and that another brick house be built for Engine No. 9 at the head of the drain in Broad St.—M. C. G. (1784-1831), VII: 440-41.

The common council resolves "that the Finance Committee and Comptroller be directed to effect the purchase of the Government House in this City agreeably to the Terms of the act in that case made and provided at the last session of the Legislature" (see Ap 13.)—M. C. G. (1784-1831), VII: 442.

The "Eagle Manufacturing Co." is incorporated (one of the earliest industrial organizations in New York), for the purpose of making cotton, woolen, and linen goods.—Laws of N. Y. (1813), 568; ibid. (1817), chap. 61. This company was reported, in 1818, to have "erected an extensive building at Greenwich, where they have a great number of people employed." Having neglected to procure necessary laws, for the use of the company, for the second year, this company ceased to be a corporate body; but this was remedied by an application to the legislature, which revived the charter on Feb. 28, 1817, for 20 years from its original date.—Blunt, Strangers' Guide (1818), 161-62; Laws of N. Y. (1817), chap. 61. Until 1937, when it was torn down, a frame house stood at 11 Christopher St., one of a row of houses formerly occupied by Scotch weavers.—Peterson, Landmarks of New York, 61. Cf. 1822.

About 1,600 Americans under Gen. Pike and Dearborn assault and capture York (Toronto), the capital of Upper Canada.—McMaster, Hist. of the People of the U. S., IV: 43-44.

An agreement is signed by Robert Fulton and Elijah Meigs (under which the former turns over to the latter two torpedoes with their illuminating locks to be used in destroying British vessels of war). Fulton is to receive one-third of all bounties and Mix and his men two-thirds.—Cat. of Fulton MSS. and documents, sold at Anderson's Apr 26-27, 1921, by order of Mrs. A. T. Sutcliffe, item 169.

Col. Proctor with a force of British and Indians invests Fort Meigs (in north-western Ohio near Lake Erie), commanded by Gen. Harrison, and begins a siege which lasted until May 9. The timely arrival of Gen. Clay with a body of Kentucky volunteers compelled Proctor to retire. He made another unsuccessful attempt to take the fort in July.—Winser, VII: 387, 431. See also McMaster, Hist. of the People of the U. S., IV: 25-27.

The British under Admiral Cockburn burn Havre de Grace, May 3. —McMaster, Hist. of the People of the U. S., IV: 124-25. A splendid Nave Dinner at Washington Hall (see D 28, 1812) to Capt. Lawrence, the "Hornet" and his crew, this being the first entertainment held at the ball. The petty officers, seamen, and marines dine in the ball room, and Lawrence and his officers with the corporation, the judges of the courts, Col. Swift, etc., in one of the dining-rooms on the first floor. Both rooms are decorated with paintings, by Holland, descriptive of the various American naval victories and complimentary to the commanders who achieved them. In the evening the company visited the Park Theatre, which was "brilliantly illuminated" in their honour.—N. Y. Ev. Post, My 5, 1813.; Guernsey, N. Y. City's Vicinity during the War of 1812-15, I: 208-9. One of the printed invitations to the dinner is preserved in the city clerk's record-room. On May 10, the corporation paid $57 for this entertainment. —Journals, p. 10, comptroller's office. In less than one month, Lawrence was killed in an engagement at sea.—See J. 1.

Marking & Cozenz announce that they have moved to "Tamman" Hall, near the Park and New City Hall," where they have opened "a house of public entertainment."—National Advocate, My 10, 1813.

The common council orders that First Ave., between 10th and 25th St. be opened and directs the proper officers to carry the same into effect.—M. C. C. (1784-1831), VII: 458. On Nov. 1, the attorney was directed to open the avenue from 10th to North St. as it would afford a short and direct route to Bellevue.—Ibid., VIII: 196-97.

The common council grants two lots at the corner of Elm and Leonard Sts. to the Mechanics Society for the purpose of a free school for the education of children of poor mechanics. The board also agrees to aid the trustees of the African School by remitting to them rent which must be paid on unexpired leases on the lots in William St. nearly opposite Harmony Hall, where a school for 400 pupils is to be built. The trustees are to be given a lease on these lots on the terms and conditions specified in a report agreed to in the common council, Feb. 7, 1810.—M. C. C. (1784-1831), VII: 461-62.

The "Macedonian" and the "United States" are anchored at the Hook "in full view of the enemy."—Com. Adv., My 12 and 14, 1813.

The Telegraph on Staten Island displayed, at 12 o'clock this day, four black and two white balls, indicating the approach of four ships of the line and two frigates. One of the ships of the line was, we understand, near the bar.—Com. Adv., My 14, 1813.

An editorial on the "State of our city" declares: "General Izard, by permission of the corporation, ordered the beautiful wall of our Battery fronting on the water, to be broken up, just sufficiently to present a shapeless mass and the prospect, and there he has left it. He has no money we believe to go any further. Three regiments of volunteers raised for the defence of the city, have been discharged. And we feel authorised to ask the question if the General has not received express orders from Washington, that in no event is he to call out the militia at the expense of the General government? They want their money to lay out for purposes of more consequence to themselves, in the western district. Lastly, the flotilla has been ordered out of service all excepting 15 boats. The corporation, however, have requested Com. Lewis to retain them until they can receive an answer from Washington to their letter entreating that they may not be discharged, but be left for the defence of the city; which request was denied, on the condition that the corporation themselves engage to pay them out of their own funds, if government should persist in discharging them. . . ."—N. Y. Ev. Post, My 14, 1813. These statements were contradicted by the National Advocate, which said: "It is untrue, that General Izard has left the battery a shapeless mass, after breaking it up by permission of the corporation. On the contrary, the work has been delayed by unfavorable circumstances, the effect of which has now ceased, and it will be immediately completed, and the cannon mounted. It is untrue that he has no money to go further. It is untrue that the three regiments of volunteers raised for the defence of the city have been discharged. On the contrary, there are several thousands now in service for its defence. And we are authorized to answer the question put in the Post, by saying that the General has not received orders from Washington, not to call out the militia at the expense of the United States' government. On the contrary, there is now a large body of Jersey militia in the pay of the government, and stationed at different important posts. . . ."—National Advocate, My 15, 1813. See, however, N. Y. Ev. Post, My 18, 1813.

Nine deserters from the "Acasta" frigate arrive in New York via Elizabethtown. "They informed us, that the crew of the "Acasta" were almost in a state of mutiny . . . and that the frigate had not more than the six days supply of water—her crew consisted of about 300 men. These seamen further state, that the Valiant 74, has about 700 men, and mounts 92 guns—that they could see our frigates every day and intended to attempt to destroy them in the course of a few evenings, with their Rocket Arrows."—Com. Adv., My 18, 1813. Besides the "Acasta" and the "Valiant," another 74 gun ship and three more British frigates were off the Hook, and two ships of war were "off Broad Sound."—Ibid., My 17, 1813.

The first lieutenant of the "Acasta" frigate informed an incoming ship on May 17 that the "Port of New-York would be considered in a state of rigorous blockade after the 19th inst."—Com. Adv., My 19, 1813. See My 26.

The common council passes a resolution reporting the comptroller which recommends the establishment of proportional quit-rents for grants of water lots. It is proposed to have a maximum & a minimum Rate; the Maximum to be the highest sum for grants in the most valuable and highly improved parts of the City. The Minimum the lowest sum for which grants in any of the Districts herein after proposed shall be made, and that an additional quit rent be paid every seven Years, on the minimum rate, until it becomes by improvement equally valuable with any other, (or nearly so) and then to pay the maximum rate.

In estimating the rates to be paid the following matters are taken into consideration: " . . it would not be proper to have the same rates on the North and East rivers, because property is not so valuable or productive now, and probably never will be on the former as on the latter, it being much more hazardous for Vessels to lie at Wharves in the winter at the North, than the East side.

"The difference however would not be so great as might at first be imagined, because the docking out and making of Bulk heads on the Hudson, (where the water is generally shoal) is much less expensive than on the East, where the Water is in most places very deep." It is therefore proposed that the maximum rate per foot on the East River be fifty cents more than on the North River. For the purpose of fixing the minimum rates and the amounts of increase proportionately the East River from the Battery to North St. is divided into five districts and the North River is divided into three.—M. C. C. (1784-1831), VII: 476-80. See also ibid., VII: 591.

Regarding the action of the common council with reference to manning 15 gunboats (see Ap 5), the secretary of the navy having reported that the department could not order the boats into service unless the corporation would pay and maintain the men, the board therefore agrees "to man & vitual 15 Gunboats for the space of three months."—M. C. C. (1784-1831), VII: 480.

Admiral John Borlase Warren, by proclamation from Bermuda, announces to all neutral powers that there is a "most strict and rigorous Blockade of the ports and Harbours of New York, Charleston, Port Royal, Savannah, and the River Mississippi to the United States of America."—Com. Adv., Jl 6, 1813. See N 16.

John Jay, writing to Noah Webster, says: "It is not improbable
that doubts prevail respecting the design and tendency of the work you have in hand. The literary productions of Britain and America being interesting to each other, many are of opinion, and I concur in that, it the English language and its orthography should be the same in both countries. Apprehensions have been entertained that your dictionary would tend to impair that sameness and those apprehensions may, to a certain degree, have an unfavourable influence."—Corresp. and Pub. Papers of John Jay, IV: 377.

A memorial is sent to Washington urging the government to take immediate further steps to protect New York Harbour against attack. Among the facts related in the memorial are these: "that hostile Ships of War are at this moment cruising within 25 Miles of this city, and with a favorable Wind Ships of the line can come up to our Harbors in two hours, from the Ocean . . ."; also that "the number of Men stationed in the different Forts is totally inadequate, and no call has been made upon the Militia to supply the deficiency: . . . that the important works on Hendricks Reef on the adjoining heights of Long Island at Sandy Hook, at the Battery on this Island, & at Fort Gansevoort are in a very imperfect state—and the pass to this City by the Sound is entirely undefended and it is now well understood that a Ship of the line can approach us in that direction with very considerable risk as to the Navigation. . ."—M. C. C. (1784-1831), VII: 486-87. The original draft of this memorial is in metal file No. 48, city clerk's record-room.

The common council agrees that Avenue A shall be opened from the northern side of North St. to the East River.—M. C. C. (1784-1831), VII: 487.

Alderman Mesier, from the market committee, reports that the common council that Washington Market (see Je 1, 1872) is not "in a state to receive the Butchers," and it is thereupon ordered that the committee make "temporay arrangements for the Butchers near the Old Hudon Market."—M. C. C. (1784-1831), VII: 488. Washington Market was "fully established" before the close of the year.—De Vor, Market Book, 407.

During this month, Rev. John Stanford, chaplain of the state prison (see My 21, 1812), became chaplain also of several municipal institutions, the bridewell, Magdalene house, orphan asylum, debtors’ prison, penitentiary, lunatic asylum, marine hospital, and city hospital.—Sommers, Memoir of John Stanford, 111.

The American frigate "Chesapeake" is captured by the British ship "Shannon" off Halifax. Capt. James Lawrence and Lieut. Augustus Ludlow of the former are mortally wounded during the engagement.—McMaster, Hist. of the People of the U. S., IV: 91-95. See Je 4 and Ag 28.

We understand that the late conduct of the Indians on our frontier was the result of their exasperation against the English government and their determination to dissolve the connection between them. The accounts of the very ill-behaviour of the great chief Walk-in-the-water, are so bad, that his near name sake here, Water-Lot, has come to a formal determination, of which he gave notice at the last meeting, to absolve the Society, unless they would immediately express their decided disapproval of the British allies, by discarding the custom of painting & wearig bear skins on the 4th of July. . ."—N. Y. Ev. Post, Je 3, 1813. See Je 24 and 30.

News of the engagement between the "Chesapeake" and the "Shannon" (see Je 1) reaches New York.—N. Y. Spectator, Je 5 and 9, 1813.

The Shenronck, or, Hibernian Chronicle (see D 15, 1810) is suspended with the issue of this date. It was revised on June 18, 1814.—Brigham, A. A. S. Proc. (1917), 492-93; Early Newspapers II: 438.

Robert Fulton writes to Cadwallader Colden: "You will have the goodness to immediately take the necessary measures for obtaining an injunction to stop the Steam ferry boat which runs from the Bear Market to Hoboken—Cat. of Fulton MSS. and documents, sold at Anderson's, April 26-27, 1921, by order of Mrs. A. T. Sutchile, item 173. On Aug. 2, John Stevens informed the common council that he had been prohibited by Governor Clinton from running steamboats at Hoboken Ferry, and asked that horse boats might be considered an adequate substitute.—M. C. C. (1784-1831), VII: 533.

Three payments made by the common council between this date and Aug. 9 for filling in Collect lots total $486.48.—M. C. C. (1784-1831), VII: 496, 511, 544. See My 25, 1812, and My 30, 1814.

Daniel W. Crocker announces that "Washington Hall, No. 282 Broad-way, New York, is now opened for the accommodation of the Public, as a Hotel. . . the rooms are spacious and airy, and the bed-rooms (in a building separate from the Hotel) are neat, with avenues and retired rooms, in the most refined manner. In the vicinity of Washington Hall are, the City Hall, New York, Manhattan, Washington, and Salt-Water-Baths. The Coffee-Room, in which the Daily Papers will be kept, and which will be open to the Public, fronts, as well as the Dining-Room, on Broadway. In the second story of the Hall is the most elegant and spacious Assembly-Room in the City, perhaps in the United States. . ."—N. Y. Ev. Post, Je 24, 1813. See Je 3 and 30.

An unsuccessful attempt is made by private individuals to blow up the British fleet off New London.—Com. Adv., Je 28, 29, and 30, 1813. See also Guerensy, N. Y. City & Vicinity during the War of 1812-15, I: 279-81.

The Tammany Society announces its preparations for the celebration of Independence Day, and a postscript to the notice states: "Members will be furnished with badges to be worn on the occasion, at the Society room, as provided under the new arrangement."—National Advocate, Je 30, 1813. Commenting on this, the Evening Post (see Je 3 and 24) says: "It always gives us pleasure to see the birthday of our liberty noticed by proper demonstrations of joy and gratitude. But what gives us the most satisfaction is to observe the desire the people manifest that the Tammany Society are about to abandon their savage habits; and intend to celebrate the day with decency and decorum. In the notification we find none of the unmeaning jargon, which has so long disgraced the advertisements of the society—so Sachem, Winkinski, season of flowers or fruits—no Panther tribe—Bear tribe—Raccoon nor Skunk tribe. From the N. B. it appears that the dresses and badges of the members are also to undergo a change; and we hope under 'the new regulation' mentioned, the use of the ridiculous cars, loaded with ferocious animals, Indian canoes etc. will be laid aside. On the whole we think there is now reason to hope our homespun Savages may in time become civilized, and that in future we shall hear no more of Indian tribes in our cities, which is quite enough to suffer the cruelties and deprivations in the wilderness."—N. Y. Ev. Post, Je 30, 1813. See Je 5 and Ag 9.

The common council agrees to the recommendation that a sinking fund be established for the gradual extinction of the city debt (see Ag 19): such fund is to be controlled by the mayor, the recorder, the city treasurer, and the chairman of the finance committee, who shall be designated by the Commission of the sinking fund for the redemption of the City Stock; a majority of whom shall at any time be empowered to act. The fund is to be composed of moneys received for commutation of quit rents; for water lot grants issued prior to 1804; for licences of hackney coaches, pawn brokers, and street vans; for market fees hereafter received; for 25% of the net proceeds of sales of real estate belonging to the public; for any surplus arising from sale of the government house; and for money from such other sources as
The corporation may hereafter think appropriate to use for such purpose. It is recommended that the fund be invested in city stock, and in United States stock but preferably in city stock. It is also recommended that some portion of the $97,592.22 now in the treasury be transferred to the fund. The counsel of the board is to frame a law providing for the establishment of the sinking fund.—M. C. C. (1784-1817), VII: 509-11.

Christopher Colles announces to the subscribers to his "Tele- graph" and the public in general that he has completed two of these important instruments, one at the top of the Custom-House, and another at Governor's Island, which are now daily in rehearsal and actual operation—he has asked several questions, and received answers. The experiment was made on Friday next, the 9th inst. . . to exhibit a number of accurate and conclusive experiments, by which they may plainly discover the superiority and many singular advantages of this mode of construction; it is of small expense, perfectly accurate, and capable of conveying any unexpected intelligence which can be written, with an exactness exceeding common belief, and also that it can convey registered preconcerted sentences, orders or other intelligence with equal celerity, and at the same time, with perfect accuracy and privacy."—Columbia, Jl 3, 1817. On July 21, he added that he had made "an experiment of 164 letters, from the top of the custom-house to Governor's Island, in the presence of some respectable gentlemen, which experiment was accomplished in 1563 minutes. at the rate of 8 letters to a minute, whereas it appears by the Encyclopedia Britannica, vol. 18th, page 536, that the French exhibit only 3 in a minute." Experiments were to be repeated on Tuesdays, Thursdays, and Saturdays from 4 until 6.—Ibid., Jl 21, 1817. See also ibid., Jl 27, 1817. See further, Jl 26.

The anniversary of American independence falling on Sunday, it is celebrated on the 4th "in the customary style."—Com. Adv., Jl 4, 1817. The Tammany Society appears, but with reduced numbers, and all Indian display is discarded.—N. Y. Eve. Post, Jl 6, 1817. See also Wilson, Mem. Hist. of N. Y., III: 274.

The repeal of the Treasury and Monroe decrees.—Winson, VII: 522.

John McComh, jr., is appointed street commissioner in place of Samuel Stidwell, resigned.—M. C. C. (1784-1817), VII: 518. On June 22, 1817, he began to keep an account-book to show payments made to cartmen, etc., its last date of entry being Oct., 1817. It is owned by the N. Y. Hist. Soc.

A bond for the purchase of the government house and adjacent grounds (see Apr 12) is presented to the common council and ordered to be paid.—M. C. C. (1784-1817), VII: 525. See Jul 26.

Christopher Colles, by the other Colles, a council for funds to construct his "telegraph." The petition is referred to the committee of defence, with a grant of $100.—M. C. C. (1784-1817), VII: 526.

Comptroller Mercen reports to the common council that he has received a deed for the government house and grounds, and that he has forwarded to Albany the bond for the same (see Jl 19). As the bond draws six per cent interest, he suggests that a considerable saving may be made by the city by paying part of it now. A warrant for $20,000 is thereupon ordered to be issued.—M. C. C. (1784-1817), VII: 529. See Aug 2.

The common council requests the street commissioner to report a plan for the general regulation of the village of Greenwich.—M. C. C. (1784-1817), VII: 529. See Mr 3, 1817.

The common council resolves that Nassau St. be altered by running the westerly line thereof from the southerly corner of the lot of ground belonging to John W. McComb to Wall St. "in a course parallel to the westerly line of Eastburn, Kirk & Downe's Lot; and that the Street Commissioner take possession of the lot fronting on Wall Street which will be formed for the purpose of a watch and engine house."—M. C. C. (1784-1817), VII: 532.

The comptroller reports to the common council that the "purchase of the Government (House) has been made and completed in conformity to instructions received from the Board," adding that "the whole property is under lease to the Academy of Arts for one year from the first day of May next ensuing, at the rate of $1,750, per annum." The report has principally to do with the improvements proposed on the property. It is contemplated to commence improvements in May next (1814). "A speedy decision on the latter subject may be important to the Custom house department, as it may require some time to procure a place sufficiently commodious for that establishment." Among the comments made on this subject is this: "... the removal of the Government house will afford an opportunity (never again to recur) of filling in that part of the Ground at present bare at low water mark, as the ground, rubbish and stone (of which the new bulk head could be formed) that could be collected there, would certainly be sufficient for the purpose."—From the original report, in metal file No. 47. city's record-room. See 16 and 17.

The common council receives from Trinity corporation "a cession of the Streets belonging to Trinity Church between North Moore and Christopher."—M. C. C. (1784-1817), VII: 533. See Ag 20, 1802.

The matter of using gas for the city lamps is reported upon by the watch and lamp committee, who have had an interview with Ward & Tallman, and are convinced that gas is superior to oil for lighting, but find the terms of the above-named men inexpedient for the board to accept. The committee suggests that an experiment be tried by using gas in the lamps in front of city hall or some other suitable place.—M. C. C. (1784-1817), VII: 541-42. See S 20.

The new public and private constitutions are adopted by the "Society of Tammany or Columbia Order." These are practically identical with those of 1789 (q. v., Ag 10), except that the Indian designations of "sachems," "Grand Sacchem," and "tribes" are replaced respectively by "Councillors," "President," and "Sections." The reasons for the change are given as the "innumerous unpropitious circumstances caused, on our frontier borders,"—From postscripts (made from originals in Tammany Hall) in MSS, Div., N. Y. P. L. See N 10, 1817.

The American brig "Argus," after a successful voyage in the Irish Sea in which many prizes were taken and destroyed, is captured in those waters by the English brig "Pelican."—Winson, VII: 587, 457.

By resolution of the common council, the name of Robinson St. (which runs from Broadway to the College Green) is changed to Park Place; Lower Robinson St. is changed to Robinson St.; and Bowery Lane is changed to The Bowery. The superintendent of repairs is directed to change the "sign boards" accordingly.—M. C. C. (1784-1817), VII: 549.

The Daily Express succeeds The Statesman, which was the successor of the New-York Commercial Post (see N 20, 1810).—Brigham, A. A. S. Proc. (1917), 404, 499.

A dark night long is caught in Fly Market Slip. "It required several men, with the aid of ropes, to raise it out of the water. We understand, that it is to be presented, by the person who caught it, to Mr. Scudder, the industrious and enterprising Proprietor of the American Museum."—Com. Adv., Aug 27, 1813.

The mayor (Dr. Wight Clinton) appoints a committee to arrange for a tribute and funeral honours to the late Capt. Lawrence and Lieut. Ludlow, who fell in the recent engagement of the U. S. frigate "Chesapeake" with the British frigate "Shannon."—M. C. C. (1784-1817), VII: 551. Details were agreed upon on Sept. 14.—Ibid., VII: 558-60.—Com. Adv., S 15, 1813. The funeral ceremonies took place on Sept. 16 (q. v.).

Over 900 Americans are massacred by the Creek Indians at Fort Mims, above the junction of the Alabama and Tombigbee Rivers.—McMaster, Hist. of People of U. S., IV: 162-63.

"We understand, that the recruiting service for the 41st U. S. Regiment will commence in this city early in next week, under the superintendence of Col. Robert Bogardus, who is to command the Regiment when raised. This letter is to be published in our Union Paper, which is the only one to be published in this city during the war, and is to be employed solely in defending our city and harbor."—Com. Adv., S 2, 1813.

The American brig "Enterprise" captures the English brig "Boxer" near Portland, Me.—Winson, VII: 387, 438.

As the purchase of the grounds in the rear of the government house property will be "attended with incalculable advantages," Comptroller Mercen is authorised to open negotiations with the
A British Squadron, consisting of four Vessels of war, are now in the Sound, capturing all the Coasters they can find. At sun set last evening, two of the vessels had proceeded as far as Captain’s Island, a distance of only thirty miles from this city, and had captured seven Coasters which had sailed from the city yesterday morning. —Com. Adv., S 8, 1813.

The mayor and common council pay a visit to Spermaceti Cove below Sandy Hook to review the flottillas of gunboats stationed there under Commodore Wm. Lewis and to inspect the fortifications. The gunboats, drawn up in a crescent and gaily decorated, salute the magistrates, and the troops go through their manoeuvres, and the visitors go to Fort Gates. While the review was in progress, news came that some British ships were approaching the city by way of the Sound. The flottillas immediately set sail, passed through Hell Gate during the night, and about noon on the 9th anchored in Hempstead Bay. One British frigate approached within 5 miles of the gunboats and fired 30 or 40 shots which were returned, but the range was too long for the guns to be effective. The enemy then stood to the eastward, and the flottillas returned to Sandy Hook. This encounter caused considerable commotion and anxiety in the city and its vicinity for several days. —N. Y. Ev. Post, S 8 and 9, 1813; Guernsey, N. Y. City & Vicinity during the War of 1812-15: I: 297-300; Wilson, Mem. Hist. of N. Y., III: 275.

The British fleet on Lake Erie, consisting of two ships, two brigs, one schooner, and one sloop, surrendered to the American squadron under Commodore Oliver Perry, after a sharp conflict. —Com. Adv., S 24, 1813; McMaster, Hist. of the People of the U. S., IV: 35-38. See S 24.

Yesterday the British frigate Statira and an armed schiff were cruising off the Hook; and this morning the telegraph exhibits signals for the little ships of war of the enemy. —Com. Adv., S 24, 1813.

The common council, in adopting its committee’s recommendations for a public testimonial of respect to the remains of Capt. Lawrence and Lieut. Ludlow (see Je 1), adopts a resolution that the sum of $1,000 “be granted to each of the two Children of Capt. Lawrence and be vested in the Commissioners of the sinking Fund of the Corporation . . . in case of the death of both, the Sums to revert to the Common Council to be hereafter applied to reward such Naval merit as the Common Council shall determine.”—M. C. C. (1784-1813), VII: 558. See also ibid., XVII: 181-82, 259-60.

The funeral obsequies of Capt. James Lawrence and Lieut. Augustus C. Ludlow take place in accordance with the plans of the common council (see Ag 28). A number of the officers and members of the corporation, “the corps from the Navy Yard in barges, each rowed by 14 seamen dressed in white. These barges were accompanied by several others filled with naval officers and marines. They passed around the Battery and Fort, exhibiting a very solemn and interesting spectacle; and landed at the dock at the foot of Greenwich street. The Procession then formed . . . and moved up Greenwich st. and Chamber st. down Broadway, along the front of the City Hall, down Chatham st. and Broadway to Trinity Church. The funeral service was performed by Bishop Hohart. During the procession, which consumed about three hours, the bells were tolled and minute guns were fired from the Navy-Yard and from the Battery; and the colors of the public and private vessels in port were displayed at half mast.”—Com. Adv., S 9, 1813.

The bodies were buried in the southwest corner of the Trinity Church burying-ground.—Lossing, Pictorial Field-Book of the War of 1812, 712-13. See Ap 2, 1825.

The common council accepts an invitation of Mr. Gennings to view an exhibition of his gas-light in front of the bridegel.—M. C. C. (1784-1813), VII: 691.

Samuel M. Thompson, Théodorus Fowler, and John B. Cole in behalf of themselves and other proprietors of Harlem Bridge, present a petition to the common council stating that they mean to apply to the Legislature for permission to build a Bridge across Harlem River from Bussing Point to Devers Point conformably to the act of the Legislature passed in his favor [see Ap 5] and his petition for such consent; the location of such Dam and the Coons of the ground to be under the direction of the Street Commissioner and Committee of the Board. That this Board do consent to the building of a Bridge between the above mentioned Points by the Harlem Bridge Company provided the Toll to be taken at the same do not exceed one half of the Toll allowed to be taken at the present Harlem Bridge and that this Board do recommend to the Legislature to pass a Law authorizing the Company to build and bridge.—M. C. C. (1784-1813), VII: 596-97. In 1814, the Harlem Bridge Co. applied to the legislature for permission to build the bridge between Bussing Pt. and Devers Pt., but no such law was passed. —Ibid., IX: 82-83. Macomb, however, proceeded to build his dam, which was finished by Dec. 21, 1815 (q. v.). See also O 18, 1815, and J 10, 1814.

The names of the following streets in the Eighth Ward are changed: Charlotte St. is changed to Pike St.; Catharine to Factory St.; Columbia to Burrows St.; William to Astor St., and George to Market St.—M. C. C. (1784-1813), VII: 566-67.

News of Perry’s victory (see S 10) reaches New York, and a federal salute is fired from Castle Williams and the bells of Trinity Church are chimed in honor of the splendid achievement. —Com. Adv., S 24, and 25, 1813. See also Guernsey, N. Y. City & Its Vicinity during the War of 1812-15, I: 315.

The common council votes the freedom of the city in a gold box and the honour of a portrait to Commodore Oliver Henry Perry in recognition of his victory on Lake Erie (see S 10), and presents its thanks to his “gallant Officers and Crew.”—M. G. C. (1784-1813), VII: 577-78. Mayor Clinton’s letter to Perry, of Oct. 10, is preserved in metal file No. 45, city clerk’s record-room. The freedom was not actually conferred until Oct. 24, 1814 (q. v.). The portrait was painted by Jarvis in 1816.—Cat. of Works of Art, etc., p. 111 Jornal B, 134, comptroller’s office. See also O 10, 1813.

The name of Henry St., in the Eighth Ward, is changed to Perry St., in honour of Commodore Oliver Henry Perry, of the U. S. squadron on Lake Erie—thus dedicating it to the hero of the “splendid victory.”—M. G. C. (1784-1813), VII: 578.

The British and Indians, under Colonel Proctor, were disastrously defeated in the battle of the Thames by the Americans under Harrison and Johnson. Tecumseh, the leader of the Indians, is killed. This battle utterly crushed the right division of the British army in Upper Canada and put an end to the Indian condecoration in the North-west.—McMaster, Hist. of People of U. S., IV: 39-41.

Gov. Tompkins writes from New York to Secretary of War Armstrong: "I arrived at this place on Sunday and on Tuesday morning went round Staten Island, and examined the only practical landing place of an enemy; after which I visited the Flottillas at Spermaceti Cove. The Block house on the beach, the work at the Hook and the fortifications on each side of the Narrows and returned to town last night. They are all in good order, excepting at the district order, in finding a respect of that cleanliness and order, and above all, that alertness in the officers, which is indispensable at that important out-post. There is not to exceed 250 men exclusive of the crew of the flotilla fit for duty at either of the posts and that number is utterly inadequate to the defence of either of them. Indeed you are so well acquainted with my opinion of the insufficiency of the number of men now in service on this frontier, and with my firm belief of an attempt upon the harbour or City this fall, that I need only repeat my readiness to order out troops from the margin of the Hudson to meet the expected emergency, the moment you will make a requisition for them."—Pub. Papers of David D. Tompkins, III: 394-95.

Fulton reports: "The dry dock finished at the steamboat works in Jersey City on the 14 October and that day at One O’clock the Original North River steamboat ["Clermont"] entered for the first time and I believe in the first Vessel that has been on a dry
The "setting of Monumental stones at the intersections made by the avenues and Streets," as provided for by the contract, has progressed so far that the setting of an avenue next may in all probability be completed."—M. C. C. (1784-1831), VII: 595-96. See, further, Ag 12, 1817.

That part of Gen. Morton's brigade which is stationed in the city parades on the Battery is reviewed by Gen. Dearborn preparatory to firing at the hulk of a small vessel prepared as a target. The hulk "was anchored opposite the Battery, in a range with the quarantine ground, about 1000 yards distant. The firing commenced on the right, and was continued in regular succession from right to left for an hour and a half, during which time both masts were carried away, the sides of the vessel were much splintered and the hull bored through in several places. At the eighty eighth shot she sunk..."—Com. Adv., N, 4, 1813.

So map, bearing this date, shows the Battery from Division St. to East River, and from Oliver to Montgomery St.—See original (map No. 168) in bureau of topography, borough president's office, Municipal Bldg.

Between this date and March 27, 1814, General Jackson defeated the Creek Indians in Alabama, as follows: Nov. 8, in the battle of Talladega; Nov. 29, battle of Autosser; Jan. 22, 1814, battle of Emuckfaw; Mar. 27, at Horse-shoe—McMaster, Hist. of the People of the U. S., IV: 161-71.

A meeting of Republican electors of the Fifth Ward is held at Liberty Hall, and resolutions are adopted recognizing the Justice of the present war against Great Britain and praising the administration's prosecution of it. In addition, it is "Resolved, That the proceedings of the two hostile fleets on Lake Erie, and the gallant examination of the garrison Lawrence, Don't give up the ship! in large letters; and a number of others. A full band of music was placed in the gallery of the portico, and the minds of the spectators were agreeably diverted with the popular airs peculiar to our country.

"In the front of Tammany Hall was a most superb painting, exhibiting a full length likeness of General Harrison, and the figures of several Indian warriors, of whom the chief was on his knees before the General suing for peace; offering at the same time a squash with a papoose on her back as hostages for their fidelity. It also represented the two hostile fleets, with the brave Perry in the act of going in his boat from the Lawrence to the Niagara.

"The Theatre was also brilliantly illuminated, and was decorated with several transparents suited to the joyful occasion; amongst them were a view of the engagement between the Hornet and the Peacock; and the expressive sentence of Perry in his brief letter to General Harrison, "We have met the enemy, and they are ours."—Com. Adv., O 25, 1813; M. C. C. (1784-1831), VII: 585. This was the first time the new city hall was illuminated.

A New York lady, writing to her sister about conditions in the city, refers to the frequent fires that are very frequent. Money almost an impossibility. The necessities of life are very high. Brown sugar $2.50 per cwt., Hyson tea, 17 shillings per lb. We are obliged to use beans steeped in hot molasses. Many are living upon black butter-pears, apples and quinces stewed together.

The Brick Meeting has been newly painted, with the addition of a mahogany pulpul and balustradas. They have placed in the church two of those new-fashioned Russian stoves. The first Sunday they were used in the church was so full of steam they were obliged to open the windows. It is high time this cruel war was at an end. Many have been made widows and orphans through the cruel realities of this war. Provisions dear, the necessities of life so high that the poverty in the city is great. —23d Ann. Rep., Am. Scent. & Hist. Soc. (1818), 596-97.

By a unanimous vote of the common council, it is agreed to request Col. Jonathan Williams "to sit for his likeness to be preserved in the Gallery, of portraits belonging to the City." Such action is taken in consideration of his services in preparing and the compliance of defence for the port of New-York.—M. C. C. (1784-1831), III: 135. Reply, dated Nov. 3, is preserved in metal file No. 48, city clerk's record-room.

The committee on surveys reports to the common council regarding John Randel, Jr.'s accounts in connection with the board's contract with him of Dec. 31, 1810 (p. v.). The account of "measureements of avenues & cross lines" is correct. There is a balance due Randel of $2,605,56; and the board orders that the comptroller report a warrant for $2,605,56.
1813 10 miles. We ran to Newburgh and back again, 120 miles on the whole, in 15 hours and a half."—Catalogue of Fulton MSS. and documents, sold at Andersons, April 26-27, 1921, by order of Mrs. A. T. Sutcliffe, item 185.

1814

In this year, the Republican or Anti-Federalist party began to call itself the Democratic party.—Winson, VII: 278.

In this year, the "Troyan Greens" (Tenth New York) were organized.—Chas. S. Clark in Eve. Post, F 16, 1916. See Ag 26.

In this year, a ferry-boat, driven by horse-power, was built and put on the ferry from New York to Brooklyn. Credit for this invention is given to Moses Rogers.—McMaster, Hist. of the People of the U. S., IV: 403. See also M. G. C. (1784-1831), VII: 676.

The New York Literary Institution, opposite the Elgin Botanical Garden (see My 1, 1810), having been closed in 1813, the Trappist monks occupied the buildings in this year and conducted an orphan asylum there. They left New York in the autumn, and their work disappeared with them.—Farley, Hist. of St. Patrick's Cathedral, 111.

At this time, there were two bridges across Harlem River; Kingsbridge, near the head of the island on the post-road to Albany, not a toll bridge; and Coles's Bridge, at Harlem Village on the post-road to Boston, a toll bridge.—N. Y. H. S. Collections (1821) 373.

In this year, Wm. Niblo, who later became the well-known landlord on Broadway, opened the Bank Coffee House in the Fred's Philipse house (see 1783), at the s. w. cor. of Pine and William Sts., in the rear of the Bank of New York. It became popular. For brief sketch of its history, see L. M. R. K., III: 976; Bayles, Old Taverns, 455; Haswell, Reminiscences, 114, 124, 235; Duer, N. T. As It Was during the latter part of the Last Century (1849) 9-10. See 1823.

The year 1814 is the last, in this Chronology, in which a summary of the year's transactions regarding the city hall is inserted at the beginning of the year, instead of being given in detail on the respective days mentioned in the summary. The entry below, under 1814, will be found to embrace cross-references to transactions of later years.

The Day Book of the building committee, dated 1802-1814 (No. 203 in record-rooms of finance dept., Hall of Records), contains a loose sheet giving the amounts of yearly expense at the city hall, the total being $518,716.69. On Oct. 24, 1815, a published report placed the "whole expense of building and furnishing this elegant building" at $518,000.—N. Y. Gen. & Gen. Adv., O 25, 1815. See also Mun. Com. Cen. (1853), 470.

When the building committee was completed, two tables were put below the coping of the south front. The exact date when they were put there has not been ascertained. Weather-beaten almost beyond recognition, they were removed in 1907 and placed on the wall of the west corridor leading to the mayor's office in the summer of 1913 they were transferred to the wall of the east end of the corridor on the basement. The left-hand table bears the following inscription at the extreme left, the rest of it being blank:

Alderman Mors
Fish
Douglass
Waldron
Lawrence

Building Committee

The right-hand tablet is inscribed as follows:

John M'Comb Jan* Architect
William Lemaire Abba Labagh Master Stone Cutter
John Lewis Sutcliffe Sculptor
Arthur Smith
Joseph Newton, Master Carpenter
James Hobson, Clerk.

When removed from the façade, the following commemorative
Chronology: The War of 1812: 1812-1815

1812. A record was inscribed on a white marble tablet and placed on the wall beside them near the mayor's office; and it was transferred with them to the basement.

"In accordance with a resolution adopted by the City Council December 20, 1868, by the Board of Aldermen January 17, 1899, and approved by Robert A. Van Wyck, Mayor, these two tablets were removed from their former position, as portions of the coping on the south front wall; and were placed here in May, 1903, at which time certain alterations were made in the interior of this building."—Seth Low, Mayor of the City of New York.

In this month, Nathaniel T. Eldredge began to publish a weekly called the New-York Public Sale Report. The last issue located is that of Dec. 30, 1866. It was succeeded by Wood's New York Sale Report in 1820—Brigham, A. A. S. Pres. (1827), 484, 513.

A map is made of the fort or battery at the foot of Hubert St., and the shore from Beach to Hubert St.—See original (map No. 174), in bureau of topography, borough president's office, Municipal Bldg.

Seth Decatur, John Jones, and L. Biddle, having examined the model and plans of a steam vessel of war invented by Robert Fulton, "to carry 24 guns, 24 or 32 pounders, and use red hot shot, to be propelled by steam at a speed of four to five miles an hour, without the aid of wind or tide," drew up a favorable report upon it.—Cat. of Fulton MSS. and documents, sold at Anderson's, Ap. 26-7, 1921, by order of Mrs. A. T. Stuchlif, item 139. Soon after this, a number of New Yorkers organized the Society for Coast and Harbor Defence, and Fulton exhibited to them his model and this report. They were so impressed with the practicability of the invention that, through a committee headed by Oliver Wolcott, they immediately brought it to the attention of congress and the secretary of the navy, and congress on March 9 (48) authorized the building of such a vessel.—Golden, Life of Fulton, 220 to 229; Dickinson, Robert Fulton, Engineer and Artist, 260-61; descript. of Pl. 83-3, III: 536. See Je 20.

St. George's Church and five dwelling-houses in Beelmead St., and one dwelling-house and the African school-house in Clifft St., together with a number of workshops and other small buildings in the rear, are destroyed by fire. The steeple fell within the church. The loss on the church was about $100,000, less $50,000 in insurance.—Com. Adv., Ja 5: N. Y. Ec. Post, Ja 6, 1814; Stanford, A Concise Description of the City of New York (May, 1814), 14-15.

Women with buckets helped to fill the engines.—Sheldon, The Story of the Volunteer Fire Dept. (1882). Thereafter, for a time, the services of this congregation were held in the French Church du St. Esprit on Pine St.—Anatase, Hist. of St. George's Church, 62. The church was immediately rebuilt on the same site.—Descript. of Pl. 157-5, III: 774. See O 31, 1815.

Among the expenditures of 1813, as shown by the report of the comptroller to the common council, appear the following: For new almshouse, $9,000; Washington Market, $15,000; completion of new city hall, $24,000; defence of the harbour, $31,054.75.—M. C. G. (1784-1831), VII: 659.

Owing to war conditions, the greatly increased cost of maintaining the almshouse and bridewell causes the comptroller, Thomas Mountain, to urge upon the corporation the need of productive employment for the inmates. Incidentally, some interesting reforms in institutional management are recommended. Speaking of the inmates of the penitentiary, he says, "Under the management of intelligent commissioners this sluggish & hitherto dormant capital of human strength & talent might be brought into great productive activity. No habits however confirmed or laziness however riveted, but by wholesome regimen & discipline may be corrected or amended & rendered in a degree productive." For the accomplishment of this end he advises a longer term of confinement and, as an aid to getting work, the gift to those regularly discharged of a suit of clothes and a reasonable sum of money, for "it is a well known fact that the appearance of most convicts when discharged forfeits employ and the only alternative is to beg or steal."

He proposes to introduce into Bellevue a system of "manufactories," to be directed by commissioners.—M. C. C. (1784-1831), VII: 660-61. On Feb. 7, the common council appointed a special committee to consider that part of the comptroller's report which referred to the almshouse and to report a plan for its better government.—Ibid., VII: 683.

The corporation council presents to the board "a grant to Robert M'Comb Esq of the right and privilege of erecting a Dam across Harlem River," and it is ordered to be executed.—M. C. G. (1784-1831), VII: 653. See D 21, 1815.

A public dinner is held at Tammany Hall in honour of Commodore Perry.—Com. Adv., Ja 13, 1814.

De Witt Clinton, in his MS. diary (now in N. Y. H. S.), writes under this date: "Attended a meeting at my office to form a literary and Philosophical Society." On Jan. 20, he recorded: "Attended Literary & Philosophical Society at City Hall." The society was incorporated on March 25 (4 c.).

In response to a call for aid made by the inhabitants of Niagara and Genesee counties, who have been driven from their homes by raids of the enemy, the common council appropriates $3,000. Wednesday, Feb. 2, is set apart as a day of fasting and prayer, and the clergy are asked to have special collections taken for the cause on this day.—M. C. G. (1784-1831), VII: 667. The sum of $1,285.94 was collected in the churches and $5,023 by personal subscriptions, and this money, together with the corporation's donation, was forwarded to the committee of relief.—Ibid., VII: 686-87.

A communication from Joseph F. Mangin, "on the subject of a Plan for Canal Street," is read in common council and referred to the canal committee and street commissioner.—M. C. C. (1784-1831), VII: 668.

The common council appoints James Fairlie and Thos. R. Mercein as commissioners "to negotiate an exchange of property with the Government of the U States for the property now held by them in the rear of the Custom House in such manner as they may deem most conducing to the interests of the Corporation."—M. C. G. (1784-1831), VII: 674. See Mr 30 and Ap 18.

Ryer Schermerhorn publishes proposals for reprinting by subscription Wm. Smith's history of New York to 1772, "With an appendix Exhibiting a correct and impartial view of the History of the State from the year 1772 to 1814."—N. Y. Ec. Post, Ja 27, 1814.

In addition to ground already owned by the city (part of the original Common Land), the city acquires title to land which extends from 66th to 67th Sts. between Park and Lexington Aves. On this the assembly of the Seventh Regiment was afterwards built.—Prendergast, Record of Real Estate (1914), citing Libers of Conveyances.

John Jacob Astor offers for lease "the beautiful Villa Richmond Hill, with the land and out-buildings belonging to it. The house is in excellent condition and the out-buildings are numerous and commodious. The grounds afford a good garden and sufficient grass for a cow and a pair of horses."—N. Y. Ec. Post, F 2, 1814. See Je 29, 1817.

1814, the state senate presents its thanks to Commodore Perry for his victory on Lake Erie.—Pub. Papers of Daniel D. Tompkins, III: 447-444.

The Senate doth address its thanks to Commodore Chauncey, who is now held at Washington Hall. "Interest was given to the occasion by the presence of several gentlemen belonging to Holland with the orange cockade in their hats, in compliment to whom the orange flag was made known at the front door of the town, by the President, of the decorations of the room."—T. N. Ev. Post, F 5, 1814.

The Humane Society of the City of New York, founded Jan. 26, 1787 (q.v.) as the Society for the Relief of Distressed Debtors, is incorporated.—See handwritten copy of the original act, made April 5, 1814, now preserved with MSS. relating to the society in the N. Y. Hist. Soc.

The legislature grants to the city the lands bounded by White-Hall St., Bridge St., State St., and the government house, as soon as the U. S. no longer requires them, on condition that the city grant other lands to the federal government for fortifications.—Laws of N. Y. (1814), chap. 13.

Eastburn, Kirk & Co. open their new "Literary Rooms," at the north-east corner of Wall and Nassau Sts.—N. Y. Ev. Post, F 15. Anoration on "The Utility of Literary Establishments" (libraries) was delivered by John Britiss. This was published in 1814. See also Pl. 105, Vol. III. Their building became the custom-house two years later.—See D 2, 1816.

A census report presented by the city inspector to the common council gives the total population of the city and county of New York as 154,418 (1814), Vol. IV, C. C. (1804-1815), VIII: 689.

"Trinity vestry agreges to "rebuild Saint George’s Church [see J. S. 3] upon the original plan except as to the steeple which is to be replaced by a Tower..."—Trin. Min. (M.S.). The new church was completed and consecrated Nov. 7, 1815.—Anicstic, Hist. of St. George’s Church, 68. See also O 31, 1815.

The frigate "President," under the command of Commodore Rodgers, runs the British blockade off Sandy Hook and enters New York Harbour.—Com. Adv., F 19, 1814. She remained until January, 1815, and "her presence has been of weight enough to have warded off the contemplated attack on New York in the summer of 1814, and to have diverted the enemy to Baltimore and Washington, because they were less protected."—Guernsey, N. Y. City & Virginity during the War of 1812-15, II: 22-24.

The U. S. frigate "Independence" is launched from the Charleston Navy Yard.—Winsor, Mem. Hist. of Boston, III: 343.

The sloop-of-war "John Adams" sails from New York with the peace commissioners, Clay and Russell.—N. Y. Ev. Post, F 23 and 26, 1814. The other commissioners, Adams, Bayard, and Gallatin, were already aboard.

The "President," Capt. Blunt (see F 18) comes up from Sandy Hook and anchors off the West Battery.—N. Y. Ev. Post, F 26, 1814.

Mar. As William Catto and Robert Fulton intend, in accordance with their contract with the common council (see D 3, 1814), to place steamboats on the Brooklyn (Fulton) Ferry, the legislature authorises an increase in the ferry rates.—Laws of N. Y. (1814), chap. 29.

The "gentlemen of Germany and Holland" hold a ball and supper at Washington Hall "in celebration of the late glorious emancipation of their native countries from the full tyranny of the French usurper."—N. Y. Ev. Post, Mr 5, 1814.

The "Ursuline Convent of the City of New-York" (see J 17, 1812) is incorporated.—Laws of N. Y. (1814), chap. 57.

An entertainment and dinner are held at Tammany Hall in honour of Commodore Rodgers.—Columbian, Mr 8 and 9, 1814.

Congress appropriates $50,000,000 for building, equipping, and putting into service one or more "floating batteries" for the defence of the U. S.—Laws of U. S., 13th cong., chap. 80. For the steps leading to this, see J. S. 3. See also J. E. 20.

The common council directs the street commissioner to have a survey made of the shore along the North and East Rivers, as far as their limits extend; that along the North River to commence at the state prison, that on the East River, at Walnut St. The survey is to show the high- and low-water marks and will be useful in granting water rights and in making public reservations.—M. C. C. (1784-1815), VII: 712-13. The surveys here referred to have not been located. They are evidently not the ones mentioned in the description of Pl. 80, III: 765.

The common council agrees that "application be again made to the Legislature agreeably to the application made by this Board at the last Session [see Mr 1, 1815] requesting that the plan for draining the waters of Canal Street projected by Messrs Fulton Poppleton & Whitney [see F 15, 1813] may not be adopted and also that the Corporation may be permitted to collect the remaining sum due on the assessment of said Street." The canal committee is entrusted with the preparation and transmission of the memorial.—M. C. C. (1784-1815), VII: 712-13. See descript. of Pl. III: 763.

The common council resolves that one member from each ward shall form a committee "to devise prepare and report a Plan for the laying out of the grounds belonging to the Corporation adjoin- ing the new City Hall; also of the Grounds on which the Bridewell, Goal, Alms House now stand, & the manner which, in their opinion it, could be most proper and advantageous for the public good and to beautify the City, that said grounds should be disposed of."—M. C. C. (1784-1815), VII: 712-15. John Pintard, commenting on this on March 18, wrote: "The Common Council of this city at their last meeting appointed a Committee to take into consideration the propriety of selling that part of the public ground in rear of the new City Hall on which the present Alms House now stands—to extend Warren Street—East of Broadway—and dispose of the Block on the north side. This is a most inconsiderate measure which if executed will deprive this City of the only piece of valuable property accommodated to the erection of future buildings which posterity may require. My efforts shall not be wanting to prevent it. The Act is but a few days that Mr. M. C. C. The common council has a report of a committee for the present Alms House which would afford ample room for the above institutions, for the City Library & the American Museum owned by John Scudder—where they could remain for some years, until the increase of the wealth of this City sh'd afford sufficient patronage to erect two wings of marble & correspondent Architecture on each side the City Hall."—John Pintard's Diary (M.S.), pp. 28-29 in possession of Pintard family.

The "York and Jersey Steam-Boat Ferry Company" is incorporated, with the right to run the Powles Hook Ferry (see Ap 15, 1811). It has two steamboats already running. The legislature dates the act of incorporation back to 1811.—Laws of N. Y. (1814), chap. 184, A 263.

Announcement is made that John Randell's "Map of Manhattan Island with the opposite shores, the harbor, bay and narrows," is in the hands of the engraver and will be published shortly.—N. Y. Ev. Post, Mr 21, 1814. In April, the MS. map was exhibited at the bookstore of Messrs. Eastburn, Kirk & Co. in Wall St.—Fisk, Ap 8, 1814. However, it apparently never was engraved because of the controversy which arose between Randell and Bridges, for details of which see descript. of Pl. 80-b, Vol. III. Randell's MS. map is reproduced as A. Pl. 15, Vol. III.

The "Literary and Philosophical Society of New-York" (see J. S. 15) is incorporated by act of the legislature.—Laws of N. Y. (1814), chap. 60. De Witt Clinton, the society's president, delivered an address in which he pointed it out to its friends, which was published in 1815. See also M. C. C. (1784-1815), VII: 720-21.

The U. S. frigate "Essex," under Capt. David Porter, having made an 18 months' cruise in the Pacific during which she captured 13 British vessels, is attacked on her return to Valparaiso by the enemy's frigate "Phoebe" and the sloop "Cherub," and destroyed.—Winsor, VII: 395, 474.

Congress authorizes the postmaster general to convey to the corporation of New York the land in the rear of the custom (or government) house and to receive in exchange other lands in the city or its vicinity.—Laws of U. S., 13th cong. chap. 58. The U. S. was granted land at the Narrows (see Ap 18).

After a two months' campaign on French soil, the allies (Great Britain, Austria, Russia, and Prussia) enter Paris.—Hazen, Modern European Hist., 240. See Ap 11, 1813.

The president recommends the repeal of the embargo.—Ev.
The common council agrees that "the following shall constitute a condition in the letting or leasing the Flag Staff on the Battery viz. The flag staff shall not be used or excepted for as permit may be necessary to go on the balcony nor shall any liquor, fruits or refreshments of any kind be sold in the flag staff or on the piazza of the Flag Staff by the lessee or by any person under him directly or indirectly on the lords day, under the penalty of the forfeiture of his lease and the sum of two hundred Dollars to the lessors."—M. C. G. (1784–1831), VII: 723.

The legislature incorporates two coal companies, the North American Coal Co., and the New York Coal Co., organized by separate groups of prominent New York men, the one for the purpose of "finding coal and other mines and minerals, and supplying the public with the same"; the other for "exploring and working mines of coal and other valuable minerals, and for delivering at the city of New-York, coal for fuel at a reasonable price."—Laws of N. Y. (1814), 37th sess., 105, 106. The charter of the former company was renewed on April 21, 1852, for twenty-one years longer.—Ibid., chap. 213.

A force of 200 British marines surprises Saybrook, Conn.; burns the shipping, spikes the caisson, and retreats in safety to their ships.—Brackenridge, Hist. of the Late War between the U. S. and Great Britain, (1846), 200.

Napoleon abdicates unconditionally and is banished to the island of Elba.—Anderson, Constitutions and Docs. Illus. of the Hist. of France, 1789-1807, 450-51; N. T. Eve. Post, S 9, 1814. Louis XVIII becomes king.

The "Friends of Liberty, Peace and Commerce" (Federalists) hold a meeting at Washington Hall and adopt resolutions adversely criticizing the embargo and non-intercourse measures passed during the administrations of Jefferson and Madison. "With convictions of the manifest imbecility and inconsistency of the dominant party" (Republican), they feel that they can "rely with safety, upon the talents and integrity of those men only who have been educated in the principles of Washington."—Com. Adv., Ap 13, 1814.

The state purchases the Hosack Botanic Garden to Columbia College, on condition that "the college establishment shall be removed to the said tract of land hereby granted, or to lands adjacent thereto, within twelve years," and it directs the college to send to the trustees of the other colleges in the state "a list of the different kinds of plants, flowers and shrubs in said garden."

At the same time, the legislature appropriates $25,000 for the College of Physicians and Surgeons.—Laws of N. Y. (1814), chap. 1205; L. M. R. K., III: 946. See also Brown, The Elgin Botanic Garden (1908). For views of the garden see Am. Medical and Philo. Reg., Vol. II (1814); Hosack's Hortus Elginensis, 2d ed. (1811); Portfolio (Phila., 1810), III: 36. The grant was made because of an appeal for aid presented to the legislature by the trustees in March, in which they said: "Columbia College presents a spectacle, mortifying to its friends humiliating to the City, and calculated to inspire opinions which it is impossible your enlightened body wish to countenance.

"The foundation of a new wing to the Edifice, laid by the order and under an Appropriation of your honorable body [see Ap 11, 1792, F 25, 1795, and Je 1797], has been for years, a heap of clamors for further public assistance."

"There is no proper Apartment for the Reception of a decent Library. There is no Hall fit for the Performance of public Exercises. There is no astronomical Observatory which is of essential moment both to our commercial and military marine: a solid basis for such a Structure was laid at the same time with the foundation of the new wing and left unfinished for the same Cause."

"—Hist. of Columbia Univ., 1754-1904, 99-102. In 1819 Apr. (q.v., F 19), the restriction regarding the removal of the college was repealed. The gardens of the garden was bought for a gift in 1814, but the land is now (1926) one of the chief sources of revenue to the college. See, further, Mr. 14, 1816, and F 27, 1817. The embargo act of Dec. 17, 1813 (q.v.), is repealed.—Laws of U. S., 13th cong., chap. 115. See also Guernsey, N. T. City & Vicinity during the War of 1812-15, II: 53-54.

The legislature passes a resolution requesting the governor to "direct an inquiry to be made as to the accession and donations which might be obtained for holding the next session of the legislature in the city of New York; and also to cause an estimate to be made of the probable expense of a temporary removal of the seat of government to that city."—Assemb. Journ., 37th sess., 536; Senate Journ., 37th sess., 268. Gov. Tompkins wrote to Mayor Clinton on this subject on June 17.—Pub. Papers of Daniel D. Tompkins, III: 478-79. See Ap 15.

The Royale is laid out on the Commissioners' Map, is reduced by the legislature as follows: Fourth and Sixth Aves. are extended northward from 23rd St. through the Parade; 31st St. is extended from Seventh Ave. through the Parade, to Third Ave.; 32nd and 33rd Sts. are extended east from Seventh Ave. to the Eastern Post-road; 24th, 25th, 26th, 27th, 38th, 39th, and 40th Sts. are extended east from Seventh Ave. to Sixth Ave. and west from Third to Fourth Ave.; and Fifth Ave. is extended south from 34th St. to 31st St. Thus, the Parade was bounded by 31st and 34th Sts., Fourth and Sixth Aves.—Laws of N. Y. (1814), chap. 175. See Ap 25, 1819.

The legislature appropriates $43,000 for completing the fortifications on Staten Island and $1,000 for furnishing the governor's room in the new city hall. It also authorizes a lottery for raising $12,000 for the New York Historical Society, to be used in procuring "books, manuscripts, and other materials, to illustrate the natural, literary, civil and ecclesiastical history of America."—Laws of N. Y. (1814), chap. 200. A further appropriation for the governor's room was made by the common council on May 9 (q.v.).

The common council passes a vote of thanks to Philip Church for sundry documents, drawings, etc. illustrative of the seawage system in use in England.—M. C. G. (1784–1831), VIII: 726.

The mayor informs the common council that "the Seal of the Mayoralty having become so much worn as to be no longer legible," he has "directed a new one of steel to be made." This presents to the board, and a resolution is passed that "the Seal sink in Steel, now presented," be hereafter considered as "the Seal of Mayoralty of the City of New York, and be affixed as such in attestation of all papers and Documents wherein the said seal is by law and custom to be used."

It being represented to the board that "the City Seal and the Mayors Court Seal are by long usage become much worn," a committee is appointed "on causing new Seals to be sunk." It is also ordered that the comptroller "audit the account" and report a warrant "for executing the Mayoral Seal," and that he "cause the old seal to be broken up and destroyed."—M. C. G. (1831), VII: 727-28. On May 2, a warrant for $100 was reported by the comptroller as paid on acct Mayt. Seal (or Ball)" and on July 18, another warrant, for $260, for "Mayt's Com Sent & Mayors Court Seals."—Ibid., VII: 743; VIII: 16.

This new mayoral seal is reproduced in Wilde's Civic Antiquity of N. Y. (1913), Pl. 27, and is described on p. 67. The seal of New York City in use in 1813 (reproduced in ibid., Pl. 28), follows closely the design of the 1814 mayoral seal, but the inscription, however, conforming to that on the corporation seal in use from 1868 to the Revolution.—See ibid., Pl. 26 (impression No. 1), and p. 67. For present city seal, adopted in 1915, see Fine, Seal and Flag of N. Y. (1915).

Fair St., between Cliff and Pearl Sts., leading to the ferry to Beekman Slip (see D 27, 1813), is ordered to be opened.—M. C. G. (1814), VII: 733-34.

The commissioners, appointed by the common council to negotiate an exchange of property with the United States government for the property in the rear of the custom-house (see J 24), report that successful arrangements have been made (see Mr 30), and request $185,750 with which to purchase land at the Narrows to be exchanged with the United States for happiness island. The comptroller is authorized to borrow such money.
1814

The land at the Narrows will be used by the United States for permanent fortifications for the defence of the harbour.—M. C. C.

19

The American sloop-of-war "Peacock" captures the British brig "Euphemia."—Davis, An Authentic Hist. of the Late War

May

Thos. N. Stanford issues A Concis* Description of the City of
New York. It contains "A view of P. M. Stollwerk's Mechqualified
Panorama," a copy of the plan of the city drawn by Wm. Bridges and published by Isaac Riley in 1807 (g.V., S 32), and the
following (selected) remarks: The upper apartments of the
government house are at present occupied "for the use of the Academy
of Arts and the Historical Society. The lower part is rented
to government for the accommodation of the collector, naval officer
and surveyor of the port. The whole building was executed in
a style which reflects great credit on the professional abilities
of the artists, Messrs. Robinson, Moore and Smith. It was a real
ornament to the city, but now through neglect it is mouldering
into ruin.

The water of New York Bay "is little less saline than the ocean,
its currents are rapid and powerful. Hence it arises that the port
of New York is open in the severest seasons, while others further south
are completely locked up with ice. The fortifications have been
erected at vast expense at almost every assailable and commanding
point. Those at the Narrows, at Staten Island, and before the city,
mount collectively more than 350 pieces of the heaviest artillery.
Castle Williams, the largest fortress in the United States, stands
on the west end of Governors Island, immediately before the city.

Chronology: The War of 1812: 1812-1815

1814

May 28

Col. Jonathan Williams sends to the commissioners of fortifications a description of his plans for Fort Tompkins on Staten Island (see My 26).—Pub. Papers of Daniel D. Tompkins, III: 472-77

30

The common council orders a deed executed to the United States for the lands for fortifications lately purchased on Long Island by the common council from Messrs. Denyes and Mr. Cortelyou.—M. C. G. (1784-1813), VII: 761.

1815

July 4

President Madison issues a call for 93,000 troops. New York's quota is 13,500.—Columbian, JI, 12, 1814; Guernsey, N. Y. City & Vicinity during the War of 1812-15, II: 149, 141.

A British fleet appears off Sandy Hook, and New York is aroused to the necessity of further defending the city. The common council appoints a committee to confer with Gov. Tompkins and Maj.-Gen. Lewis "touching the exposure of the situation of this City."—N. Y. Gen. & Gen. Advs. JI, 7, 1814; M. C. G. (1784-1813), VII: 51; Guernsey, N. Y. City & Vicinity during the War of 1812-15, II: 113. See also JI 8 and 14.

"An Officer" publishes the following open letter to Maj.-Gen. Morgan Lewis: "The Government has confided to you the command of this district, including the City of New York [see Je 15], a command justly considered the most important in the U. S. because the loss of this City with its monied capital would materially affect the operations of the General and State Governments, besides the ruin and distress it would bring upon ourselves.

"It appears to me that you neglect your trust; in other words, this City is not fortified in the manner it ought to be with the means in your power.

"This city is open or liable to an attack in three ways,

"1st. By vessels of war by way of Sandy Hook.

"2d. By troops landed on the back of Long Island and crossing to Brooklyn.

"3d. By a land and Naval force down the Sound, the land troops disembarking in the Sound, and the fleet aiding their attack.

"From the first of these, (although it appears to engross the whole attention,) I think we have nothing to fear, because the British are too prudent to risk their ships against a chain of land Batteries, and too wise to land their men at a wharf which may be barred by a single cannon and cannoned from every building in its vicinity.

"From the other attacks, we have every thing to fear, because the means of resisting them have not been considered or organized. It cannot be denied, for the maps all shew it, that there are several inlets at the back of Long Island where troops may be landed with safety and convenience; and if the landing takes place in the evening, I think it probable that in the morning their cannon upon Brooklyn heights would give the first intelligence of their landing: and if the British should again (as in the last war) occupy those heights which command the City and Governor's Island, I take it for granted, the city must as then be surrendered to them. What are our means of resistance, after the minutia of putting up signal poles, fixing places of rendezvous, offering rewards for information of the enemy's landing, &c. the country ought to be well examined and redoubts and breast works of earth thrown up at the most prominent points. But above all, strong intrenchments should be made upon Brooklyn heights, so that in case of necessity troops passing from this city might hold those heights, until the force of the State or at least of the city and harbour could be formed and brought to their relief. Arms should also be now distributed to the militia being, in exposed situations, that they may feel the confidence inspired by good equipments.

"The third attack is the most dangerous, because the extent of shore and the uncertainty of the place of landing seem to be the battle precaution, but a prudent general would not omit every thing, would not allow the whole line from Connecticut to the City Hall to be unprovided with a single defense:—yet such is our situation. To making this attack, it is probable the enemy would disembark either at Throg's Neck or Ward's Island, and some measures should immediately be taken to obstruct or prevent an advance from both those points, the more effectual (because it would apply to all landings off this Island) would be to erect redoubts or terre d'armes at Ward's and King's Point, and to place the cannon in them, as effectually to rake the bridges; besides these materials should be provided and kept constantly ready to destroy the bridges, and temporary breast-works should be thrown upon Harlem Heights, &c. &c.

"These are, Sir, the outlines of a defence for this city, to which your attention is particularly invited..."—N. Y. Gen. & Gen.
1784-1831, C.

Among the 18 Aug. large Geo. A be this because to acknowledges See laid.—Columbian, Jl 14, 1814.

A British fleet takes Eastport, Me.—McMaster, Hist. of the People of the U. S., IV: 170.

That the governor orders Brig.-Gen. Gerard Steddford to "de-tach from your Brigade and Station at the site for building the steam frigate [see Je 20], one sergeant, one corporal, and twelve privates." This is because of the "apprehension of attack and invasion of that particular point."—Pub. Papers of Daniel D. Tompkins, I: 488-89. See Jl 18.

Behind closed doors, the common council receives the report of the committee appointed to take into consideration the present exposed condition of the city (see Jl 6). Among a number of resolutions agreed to are the following:

That the necessary ground be secured upon Brooklyn Heights for a military camp and that the governor be asked to call out sufficient militia to occupy that and another camp located on the Heights of Harlem.

That the governor be requested to increase the munitions of war.

That the commissioner of fortifications be requested to hasten work on the fortifications to prevent the approach of the enemy by the Sound.

That exempts from military duty be organized, shipping be removed from the harbour, and voluntary labour on encampments be procured.

That the president and governor be waited upon.

De WittClinton, in his MS. diaries (in N. Y. H. S.) under this date, writes: "Went to lay the cornerstone of Fort Stevens at Helegat." See also Columbian, Jl 16, 1814. The fort was on the east side of the East River at Hallet’s Point.—Guernsey, N. Y. City & Vicinity during the War of 1812-15, II: 392-93. See also descrip. of Pl. 82 B, III: 554.

Defensive works are begun on Harlem Heights at Mt. Alto on the Hudson near 137 St. The line when finished extended from Mt. Alto east across the Bloomingdale Road, along the elevated ground to Mc Gowen’s Pass, and thence along the ledge of rocks and the elevated ground overlooking Harlem Flats to Hell Gate.—Guernsey, N. Y. City & Vicinity during the War of 1812-15, Vol. II.

The common council orders permission to be given to keep twelve quarter-casks of powder, for the use of the guard, at Mr. Brown’s ship-yards, where a steam vessel of war ("Fulton the First") is being launching (see Je 20)—M. C. C. (1784-1831), VIII: 3. See Jl 26.

Oliver Wolcott and others address a memorial to the common council stating that "our beloved county, and probably the city of New York, the center of our affections and interests, is exposed to imminent danger of invasion by a powerful, vindictive and exasperated enemy, and that the period has therefore arrived when all good citizens ought to combine in defence of everything dear and valuable in this life." As "the urgency of our situation requires that the Government should now be aided by the voluntary and patriotic efforts of good citizens," they urge that measures be immediately taken for ascertaining their sentiments and combining their exertions."—Guernsey, N. Y. City & Vicinity during the War of 1812-15, II: 174-75. See Ag 1.

John Jacob Astor writes to Monroe that he has learned from merchants in Europe that Gr. Britain will not make peace unless the U. S. acknowledges the right of search, and adds that many prominent men in the vicinity of New York think that we should concede this point. He offers one of his ships to go as a "flag" to Europe. In a letter of Sept. 22, Astor says the ship is ready for sea.—From the original letters with the Monroe papers in the N. Y. P. L.

The battle of Lundy’s Lane (Bridgewater, or Niagara), a 25 highway stretching westward from the Niagara River, is won by the Americans, under Gen. Jacob Brown. The British were under command of Sir Geo. Drummond.—Winser, VII: 394, 459; VIII: 147; McMaster, IV: 59-60.

The committee sent to wait upon the president regarding the defence of the city reports to the common council. The substance of the report follows:

"The Government will call into immediate service 3000 Militia . . . to be considered as part of the States’ quota conditionally ordered by the President 23 June.

"All the requisite arms & other military stores as well as ordnance for two fortified Camps will be furnished by the war Department except so many muskets as can be supplied from the State Arsenal. Such muskets as the general government may furnish will be considered as the property of the State & be charged against the proportion allowed by the law of Compromise for arming the whole body of the militia; the Governor giving a receipt for the same—The Troops will also be furnished with subsistence & camp equipage; but their monthly pay is to be advanced by this Corporation, which will again receive it from the General Government.

"Proper & skilful officers (Genl. Swift & Col. Washworth as your committee are informed) will be directed to lay out the proposed Camps, to superintend the fortifying the same and to provide & inspect the ordnance necessary for the purpose.

"The report contains an annexed schedule of military supplies indicating an ample store of everything but muskets and 2,000 of these are reported on their way from Philadelphia, with a large reserve stock at Springfield.—M. C. C. (1784-1831), VIII: 17-20, 23-25. See also N. Y. Eoc. Post, Jl 27, 1814.

"A cylinder for the engine of the Steam frigate ["Fulton the First"] now building at Corliss Hook [see Je 20], was cast yesterday [July 26] at the Foundery of Messrs. Talman & Ward, in this city: it is four feet in diameter, and weighs three tons and a half. The power of the engine is to be equal to that of 120 horses.—N. Y. Eoc. Post, Jl 27, 1814. The frigate was launched on Oct. 29 (q. v. See also Pl. 82 B-a, Vol. III).

"In this month, the Spaniards permitted a British fleet to use Aug. Pensacola, Fla., to fit out an expedition against Fort Boyer, at the entrance of Mobile Bay.—Ingersoll, Hist. Sketch of the Second War between the U. S. A. & Gt. Brit., 2d ser., 71 et seq. See S 15.

"Alderman Wendover presents the following resolutions to the common council: "Resolved that the Common Council highly approve of the sentiments expressed in the memorial presented by Oliver Wolcott & others [see Jl 26] in behalf of themselves & a number of Citizens of this city on the important subject of taking immediate & effectual measures for its greater security & defence.

"Resolved that it be earnestly recommended to the Citizens generally of this City to meet in the Park in front of the City Hall on Wednesday next the 3d Inst at 12 O Clock at noon for the purpose of appointing a Committee to enquire if any & what means ought and may be devised, to put this City in a better posture of defence, and in conjunction with the Committee of defence of this Board to pursue all practical measures in concert with the general & state government calculated to prepare for & stimulate our fellow Citizens in the protection & defence of everything we hold dear & valuable in life and to repel any attack that may be made by the Enemy against this City." These were lost by a vote of 11 to 7—M. C. C. (1784-1831), VIII: 51. A public meeting was held, however, on Aug. 10 (q. v.

"The common council agrees that the public grounds at the
arsenal shall be fenced and that Orange St. shall be regulated and paved.—M. G. C. (1784-1831). VIII: 12, 25-26.

The common council directs the Common council to borrow $50,000 for the completion of “that proud establishment” at Bellevue.—M. G. C. (1784-1831). VIII: 26-27.

8. The American and British peace commissioners, after many delays, begin their conference at Ghent. Great Britain immediately demanded, as a sine qua non of a treaty, the establishment of an indemnity in favor of a permanent barrier between the western territories of the United States and the possessions of Great Britain; a revision of the Canadian boundary line by a cession of so much of Maine as lay between New Brunswick and the Quebec line, a revision of the line from Lake Superior to the Mississippi, and the dismantling of Fort Niagara and Sackett’s Harbour; and an agreement that the U. S. would never again maintain an armed force or a naval station at any place; and upon the adoption of these proposals or to refer them to Washington, and when news of their nature reached America, it aroused great indignation (see O 22). Britain, however, receded from her demands, and they were quickly dropped. On Oct. 31, her commissioners asked for the heads of a treaty from the Americans, and after two months spent in discussions and consultations on both sides, an agreement was reached, and the definitive treaty was signed on Dec. 24 (g.n.).—McMaster, Hist. of the People of the U. S., IV: 262-73.

The committee of defence publishes the following notice: “Gen. Swift having furnished the Committee of Defence of the corporation with a plan for the construction of additional works of defence, near Brooklyn, the work will be commenced this morning by the military company, under the command of Capt. Andrew Brenner, who have volunteered their services for the day. The Committee invite their fellow-citizens to follow their laudable example.”

“...to facilitate the business, the Committee of Defence announce that they will meet daily at the Mayor’s office in the City Hall between the hours of eleven and twelve o’clock, to receive the tenders of similar services, and to arrange working parties.”—National Advocate, Ag 8, 1814. See Ag 10.

9. The people of Nantucket, because of famine caused by the British blockade, declare themselves neutral and under the protection of England.—McMaster, Hist. of the People of the U. S., IV: 151.

10. The British, under Sir Thomas Hardy, bombard Stonington, Conn., and make several ineffectual attempts to land.—McMaster, Hist. of the People of the U. S., IV: 154.

11. The committee of defence passes a resolution urging the citizens to enroll in their respective wards for work on the fortifications.—N. T. Ev. Post, Ag 10, 1814. See Ag 10.

A large mass-meeting, presided over by Col. Henry Rutgers, is held in New York to consider the measures to be taken for the defence of the city, and more especially, to induce citizens to volunteer for work on the fortifications. Marinus Willett makes a spirited address, and resolutions are adopted approving the defensive measures inaugurated by the federal, state, and city governments, and recommending a general enrollment in the various wards for personal work on the defences.—Columbia, Ag 10, 1814. From this time until the middle of November, every able bodied man in the city either helped to fortify Manhattan Island or contributed a pecuniary substitute. A line of forts joined by entrenchments was made from Hudson River to the mouth of the Harlem, and forts were built at Hell Gate, Williamsburg, Brooklyn Heights, Prince’s Bay, and Sandy Hook. The people of Brooklyn, Orange, Paterson, and Newark also worked on the fortifications besides the New Yorkers.—Ibid., Ag 11, 1814; Guernsey, N. Y. City & Vicinity during the War of 1812-15, II: 190 et seq.; Lamb, Hist. of N. Y. City, II: 646; Lossing, Pictorial Field Book of the War of 1812, 569-77; Wilson, Mem. of Hist. of N. Y., III: 284. See also 21st Ann. Rep., Am. Sc. & Hist. Pres. Soc. (1916), 559-55; and L. M. R. K., III: 954-955. For views, see illustrations, see pls. 8A and 82 B-3, b, c, Vol. III: Mem. Com. Coun. (1856), 236, 366, 380, 393, 400, 416, 420, 480, 489, 497, 552, 592.

William Jay, writing to his father, says: “Some alarm seems to prevail respecting the safety of the City, but I know not how well it is founded. The Citizens are now engaged in throwing up entrenchments at Brooklyn. There is a great scarcity of money, and stock of all kinds is very low. The stock of four of the Banks, viz.: the Union, the Manufacturing, the City, and the Bank of America, is even below par and some as low as 94. The Bank of America and the Manhattan do not declare any dividend and therefore instead of giving an interest of 4 per cent. for the last year, they have yielded only 45. Not withstanding this state of things and the consequent diminution in the income of great numbers of individuals, both in town and country, I can see no change in the manner of living nor more attention than usual to economy. People seem to be now living on their capital and to calculate that before it is exhausted the return of peace will more than repair any inroads they may make on it in the interim.”—Corresp. and Pub. Papers of John Jay, IV: 376-77.

In a letter to Gen. Jacob Brown, Gov. Tompkins says: “The alarm which exists at New York compels me to devote attention to the safety of the place; and upon the advice of the president, I am getting out 3000 troops from the Middle District. The rendezvous on Thursday. . .”—Pub. Papers of Daniel D. Tompkins, III: 497.

Commodore Decatur has been placed in command of all the naval forces in New York Harbor.—N. T. Ev. Post, Ag 13, 1814.

On Aug. 19, the common council was informed of Decatur’s appointment.—M. G. C. (1784-1831), VIII: 34.

Nearly 3,000 persons have volunteered to work on the fortifications during the coming week.—N. T. Ev. Post, Ag 13, 1814.

The British, under Gen. Drummond, unsuccessfully assault Fort Erie. They retired from the siege on Sept. 21, after a successful sortie by the Americans, and the approach of reinforcements.—McMaster, Hist. of the U. S., IV: 151.

The common council resolves, in case the legislature decides to hold its next session in this city (see Ag 15), to fit up necessary rooms for such purpose and to pay transportation on such papers and articles connected with the various offices as need to be moved here.—M. G. C. (1784-1831), VIII: 34-35.

A report presented by the committee of defence is agreed to by the common council and directed to be published.

On being furnished by Brig.-Gen. Swift of the corps of engineers with a plan of additional works of defence, by him deemed necessary to place the city in a state of complete defence, the committee made an appeal to the patriotism of their fellow citizens to furnish voluntary aid in the erection of the works. “The appeal was answered by them with one heart & one mind—prepared for this appeal by the address of the Common Council, every one was appalled to offer his services on the interesting occasion—volunteer associations pressed forward with their overtures all anxious to be engaged in the honorable employment of self defence, on the earliest day that could be appointed.—In these overtures the Committee remarked with heartfelt pleasure that there appeared to be no distinction of party or situation in life . . . They all appeared to meet on the ground of self defence as on a common ground . . .”

“The works in the rear of Brooklyn were commenced on Tues. last . . . on each successive day parties of volunteer citizens to the amount of from 500 to upwards of 1000 a day have labored on the works.—The spirit of volunteering personal labor seems still to be ardent—many thousands are now on the lists of the Committee waiting their turn for doing duty.

“Voluntary contributions to the amount of about thirty five hundred Dollars have been received by the Committee from public institutions and individuals resident in the City and abroad, as a commutation for personal service & to furnish the Committee with the means of defraying necessary expenses.

“The inhabitants of Kings County have in a very laudable manner volunteered their services and the Committee understand that the yeomanry of our Sister State, New-Jersey are unsolicitedly making preparations to tender their services. . .”—M. G. C. (1784-1831), VIII: 39-41; Man. Com. Coun. (1835), 559-60.

It is “Resolved that the members of the common council together with the Officers of the Board will assemble on Wednesday next at 6 o’Clock at Beckman Ship Wharf and proceed to Brooklyn to labor at the works there erecting for the defence of the City.”—M. G. C. (1784-1831), VIII: 41.

Repairs are begun by citizens of Brooklyn on the “fort on Cobble Hill,” in Kings County, and it is named Fort Swift. It was originally called Fort Pitt.—Columbia, Ag 17, 1814.

The newspapers of the city suspend publication in order that
1814 all employees may work on the fortifications.—N. T. Eve. Post, Ag 15, 1814.

18 The citizens of New York begin to build Fort Clinton to protect the city. Its ruins still stand on an eminence overlooking McGowan's Pass.—Eve. Post, Ag 19 and 20, 1814; Cat. of Works of Art Belonging to the City of New York, 1814. The City History Club marked the site with a memorial tablet in 1906.—Peterson, Landmarks of N. Y., 82.

19 Eighteen slopes, with about 2,000 drafted militia, arrive at New York from the middle counties of the state. The new arrivals are to help in the defense of the city.—N. T. Eve. Post, Ag 20, 1814.

20 "A Citizen of Colour" issues the following notice: "The committee of defense have assigned next Monday [Aug. 22] for the people of colour to contribute their services to work on the fortifications. On this occasion it becomes the duty of every coloured man, resident in this city, to volunteer. The state of New York has evinced a disposition to do us justice. Discarding that illiberal, misguided policy, which makes a difference of complexion a pretext for oppression, she has made the same provision for the security of our rights as for the rights of others. Under the protection of her laws we have saved in safety and pursue our honest callings, none daring to molest us, whatever his complexion or circumstances. And such has been the solicitude in our behalf, manifested from time to time by our legislature, that there is a fair prospect of a period not far distant, when this state will not contain a slave. Our country is now in danger—our patriotism is now put to the test—we have now an opportunity of showing that we are not ungrateful—that we are not traitors or enemies to our country: but are willing to exert ourselves, wherever or wherever our services are needed, for the protection of our beloved state.—Let no man of colour, who is able to go, stay at home on Monday next; but let every one assemble at 5 o'clock, A. M. in the Park, to join with their brethren in their patriotic efforts."—N. T. Eve. Post, Ag 22. Between 200 and 300 negroes worked on the Brooklyn fortifications on Aug. 22—ibid, Ag 22, 1814.

24 The battle of Bladensburg, Md., six miles from Washington, occurs. The Americans, under Gen. Winder, are defeated. The president and cabinet flee from Washington at the approach of the British. The British march on Washington, and burn all the public buildings except the Patent Office and the jail. The buildings destroyed, with their contents, are the Capitol, the National Library, White House, Treasury, State Dept., and Navy Yard.—N. Y. Eve. Post, Ag 27 and 28, 1814; broadside in N. Y. H. S. (1859).

25 The committee of defense asks for contributions to supply the wounded, and comfort the families of those who have come from other parts of the state "to the vicinity of this city to aid in its defence."—National Advocate, Ag 24, 1814.

26 "This morning marched through this town, to take their station in the camp, formed for the defence of the city and harbor, the best looking corps of men which we have seen since the commencement of the war.—They are the Trojan Greens from Troy [see 1814], and the Rifle Company from Albany, and the number of them is not less than a hundred. . . . With such men as these to defend us, we need not fear even Wellington's veterans."—N. T. Eve. Post, Ag 26, 1814.

27 Writing from New York to Maj.-Gen. Lewis, Gov. Tompkins says: "The alarming state of affairs renders it indispensably necessary that an immediate understanding should exist between yourself the Commodore & myself respect to the order of battle or system of operations to be pursued in the event of an attack upon this City. . . May I, therefore, request that you will arrange & digest, either separately, or in concert with Commodore Decatur, & acquaint me with the plan of operation or order of battle proposed, upon the several hypothesis of attack thro' the Sound, either by the Westchester or Long Island side, or of a landing upon any part of the South side of Long Island, or of the approach of the enemy by the way of the Hook, or of a simultaneous attack in two or more directions."

28 The Militia of Rockland, Westchester, Queens, Kings, New York & Richmond, together with such as I may be able to get down seasonably from above the Highlands & those now in service are the only corps of the Militia of this State that I shall be able to furnish at short warning.

29 Gov'r Pennington informs me that the Militia of Essex & the adjacent [New Jersey] Counties will be ordered by him to obey your requisitions promptly, without waiting for the orders to pass thro' him, & that upon hearing of an alarm he will repair immediately to that part of his State nearest the harbour of New York to cooperate in its defence. Brigadier Genl. Colfax residing at Pompton, in New Jersey, is to command the detached Brigade of 3000 which is nearest to New York . . ."—Pub. Papers of Daniel D. Tompkins, III: 509-11.

Alexandria, Va., is saved from burning by paying to the British a large ransom of ships, merchandise, and naval and ordnance stores.—Brackenridge, Hist. of the Late War between the U. S. and Great Brit. (Phil., 1876), 253.

The committee of defence reports to the common council that the arduous of the voluntary citizen labourers continues unabated. In accordance with the recommendation of the military commanders of the United States, the committee has requested the governor to call out 20,000 additional militia for the defence of the city. It is necessary for the city to raise funds in this crisis for the maintenance, etc., of the troops, which, it is expected, will be reimbursed by this government. "In order that the drain on the banks may not be too great, a loan not exceeding $1,000,000 at 7 %, payable in one year, is suggested. Authority is asked of the board to execute matters requiring haste without express delegation of power for that purpose. "The fate of Washington warns us not to remain unprepared—a small expenditure of money might probably have saved our Capital & prevented this disgrace upon our nation and shall the City of New York, the first in the Union in point of importance also fall the sacrifice to a spirit of penuriousness which will count the expense of self protection when all is in jeopardy. . . ." The common council agrees to the requests and suggestions—M. G. C. (1784-1813), VIII: 46-48; Man. Com. Coun. (1839), 560-62.

30 Gov. Tompkins writes to Alderman Nicholas Fish, chairman of the committee of defense, and requests a resolution of the Committee of defense requesting me to suggest such further provisions as may be necessary for the defence of this City, I beg leave to submit the following remarks:

"At my first interview with the Committee of the Corporation I had the honor to recommend to them the propriety of purchasing & mounting immediately a quantity of Ordnance & field pieces, & communicating to his Excellency the Mayor & Commissioners of the City information of the resources of Westpoint the Navy yard &c. in Cannon. At the same interview the propriety of employing an agent to purchase materials for tents & to procure other Camp equipage for a considerable number of men was suggested. Whether these subjects have been discussed & decided upon by the Committee I am unadvised, & can only say that if they have not, I would respectfully invite their attention to this subject."

"Exertions are making to establish a signal on Staten Island to convey notice of an alarm to the Inhabitants of Essex County & other parts of New Jersey, bordering on the Staten Island sound. No telegraphic arrangement has been made in the direction of the Sound, or of the South side of Long Island, with which I have been made acquainted. Prompt measures ought to be taken, either by the Commanding officer of the District or the Committee to convey notice of every movement of the enemy. It is very important also that signals should be established on the North river so as to call down the militia en masse upon an emergency."

"I will cheerfully issue a general order requiring the Militia as far north as Albany, without any exception, to repair instantly to New York upon the signal being given, whenever I may be made acquainted with the signals established; & will also readily aid in having the signals prepared if the Committee will defray the expense of erecting them."

"Commodore Decatur informed me that the Committee has been so good as to undertake to supply vessels for obstructing a part of the Channel in a derriere resort. It appears to me that vessels should be procured with this purpose before the moment of pressure & confusion may arrive."

"On Saturday I had the honor to suggest to that Committee the indispensable necessity of erecting a block house & of estab-
lishing further defences on the Hook to prevent the landing of an enemy & to protect the water battery from an assault in the rear. My conviction of the vital importance of this step to the security of the port is my apology for again pressing it upon the consideration of the Committee.

"I beg leave to inform the Corporation that I have in contemplation to assemble immediately an additional number of ten thousand militia at this place & beg their zealous cooperation in providing Quarters & other accommodations for them..."

-Pub. Papers of Daniel D. Tompkins, III: 1784-1814. Tompkins called out the militia on the same day.—N. Y. Ev. Post, Ag 31, 1814.

All the militia and uniform companies of the city and county of New York, amounting to about 6,000 men, take part in a grand military review.—N. Y. Ev. Post, Ag 31, 1814.

As all the banks in Philadelphia have resolved to suspend payments in specie, the New York banks decide to do likewise.—N. Y. Ev. Post, S 8, 1814. Specie payments were not resumed until Feb. 20, 1817 (p. 8).

"About 100 or 200 women of New York perform an hour's work on the fortifications at Fort Greene.—Columbia, S 1, 1814.

"The Fortifications, at N'Gowan's pass, on the Harlem road, have acquired a great degree of strength and perfection—and are worth a day's work to go and see them. They are compact and regular, and ready for cannon and artillery..."—Columbia, Ag 31, 1814. See Pl. 82 Bb-h, and description, III: 554-55.

Sept.

Between Sept., 1814, and June, 1815, the Congress of Vienna, one of the most important diplomatic gatherings in the history of Europe, was held. As a result of its deliberations, the king of Prussia was invited to his throne at St Petersburg; and to him; Belgium was annexed to Holland; Russia retained Finland and Bessarabia and acquired most of the Grand Duchy of Warsaw; Austria recovered her Polish possessions and gained the Lombardo-Venetian kingdom in northern Italy and the Illyrian provinces; England secured Heligoland, Malta, the Ionian Islands, Cape Colony, Ceylon, Isle of France, Demerara, St. Lucia, Tobago, and Trinidad; and received two-fifths of the specie, and extensive territories on the Rhine; The Papal States were re-establish. and most of the rest of Italy was divided into independent states; Norway was taken from Denmark and joined to Sweden; Switzerland was increased by the addition of three cantons taken from France.—Hazen, Europe since 1815, 5-12.

Fort Greene "is nearly ready for a garrison. Cannon for it were landing at the navy-yard this forenoon, and commodore DeCatuer takes command on Saturday or Monday, with a formidable band. Fort Swift is completed, fort Lawrence is erected, and intermediate lines are throwing up daily."—Columbia, S 1, 1814.

Marinus Willett writes from New York to Monroe, emphasizing the importance of commanding the lakes and continuing operations in Canada. There is at present in this quarter a spirit equal to its men, and over it I saw the lines of Saxony, Pomerania, and extensive territories on the Rhine; The Papal States were re-established and most of the rest of Italy was divided into independent states; Norway was taken from Denmark and joined to Sweden; Switzerland was increased by the addition of three cantons taken from France.—Hazen, Europe since 1815, 5-12.

Fort Swift is completed, fort Lawrence is erected, and intermediate lines are throwing up daily.—Columbia, S 1, 1814.

"The Heights of Harlem from East River to Hudson River were literally lined with fortifications, occupied by swarms of soldiers."—Guernsey, N. Y. City & Vicinity during the War of 1812-15, III: 317.

The common council authorizes the finance committee to issue bills of the denominations of 25 cents and 50 cents, to be signed by some person or persons designated by them, and also to put in circulation bills of various denominations authorized and designated by the common council to the amount of $12,000 in addition to the sum of $5,000 heretofore authorized (see S 2).—M. C. C. (1784-1811), VIII: 51.

The British fleet under Admiral Cochrane begins to bombard Fort McHenry at the entrance to Baltimore Harbour. The firing continued until Sept. 14, when the British retreated without capturing the fort. Their commander, Gen. Ross, was killed.—McMaster, Hist. of People of the U. S., IV: 147-48. This event inspired Francis Scott Key to write "The Star Spangled Banner."—Kohlb, Famous Am. Songs, 101-22.

In their attack on Fort Boyer (see Ag —), the British are repulsed.—McMaster, Hist. of the People of the U. S., IV: 179-80.

Gen. Tompkins assigns 2,164 troops to Staten Island, 4,300 to Brooklyn, 1,600 to Barn Island, 3,300 to Harlem Heights, and 4,000 to New York City.—Pub. Papers of Daniel D. Tompkins, III: 528-29.

A resolution is passed providing that whenever any application is made to the common council for opening, widening, or otherwise enlarging, any street or avenue, "it shall be the duty of the Street Commissioner to cause notice thereof to be published for one week in the several Newspapers employed by this Board previous to its being determined on by the Common Council."—M. C. C. (1784-1811), VIII: 293.

Oliver Wolcott and Thomas Morris, in behalf of the federal committee for building a steam frigate (see Je 20), solicit pecuniary aid from the common council, saying in part: "When it is recollected that Mr. Fulton has devised a system of maritime defense which promises to be of such extensive use, and whose disinterestedness has prompted him not only to make a gratuitous tender of it to his country, but to undertake, also, without any pecuniary compensation, the labor of superintending its construction; when also the ship carpenters, Adam and Noah Brown, have expended their last shilling in the building of the vessel, and this under the most discouraging pecuniary difficulties, occasioned
The common council votes the freedom of the city in a gold box to Commodore Thomas Macdonough (see S 11), in recognition of his victory on Lake Champlain, and he is requested to sit for his portrait.—M. C. C. (1784-1813), VIII: 55. Mayor Clinton’s letter of Sept. 28, informing Macdonough of the resolutions, and the commodore’s reply, are in metal file No. 45, city clerk’s record-room. The presentation of the freedom took place on Jan. 6, 1815 (q.v.). The portrait was painted by Jarvis in 1815, and now hangs in the comptroller’s office.—Cat. of Works of Art Belonging to the City of N. Y., 1860.

The council authorizes the mayor to affix the corporate seal to all contracts and agreements made by the committee of defence which relate to the defence of the city.—M. C. C. (1784-1813), VIII: 56.

In a letter to Secretary James Monroe, Gov. Tompkins says: “For the defence of the City of New York I have exerted myself to the utmost. Full fifteen thousand of the Militia of this State & about One thousand Sea Pensibles, organized under State authority are now in service in the Third Military District. These with Commodore Decatur’s command, the regulars, Sea Pensibles of the United States, Jersey Militia, Corps of ex¬tempus & neighbour¬ing Militia left in reserve, will, if well disciplined & com¬manded be adequate to the defence of New York.”—Pub. Papers of Daniel D. Tompkins, III: 554.

The freedom of the city in a gold box and the honour of a portrait are voted to Gen. Jacob Brown, the hero of Chippewa (see J 5).—M. C. C. (1784-1813), VIII: 59, 89-90. The portrait was painted by Jarvis in 1815, and now hangs in the city clerk’s record-room. The honours were bestowed on him, Jan. 28, 1815 (q.v.).

The common council resolves that a memorial be forwarded to Congress on the subject of the loan of $1,000,000 (see Ag 29) made by the Corporation to the United States for the defence of the city.—M. C. C. (1784-1813), VIII: 60. See O 24.

In accordance with its resolution of Oct. 4, 1813 (q.v.), the common council confers the freedom of the city on Commodore Oliver Perry.—M. C. C. (1784-1813), VIII: 61-62; N. Y. Eco. Post, Oct. 1814.

The following appeal to the people is issued: “The Committee of Defence, having reason to believe that this city is in great danger of an attack from the enemy, and that it may reasonably be expected to take place within a few weeks, deem it proper thus publicly to make it known to their fellow-citizens, at the same time they call on them for a renewal of their patriotic labours without delay for a completion of the defences at Harlem, being well convinced that the zeal and activity of their fellow-citizens will, in a few days, place those works in such a formidable situation as to afford an effectual resistance to any force which may be brought against the city.”—Columbian, Oct. 21, 1814.

The legislature passes a resolution censuring “the extravagant and disgraceful terms proposed by the British Commissioners at the close of a war, and recommending to the national government the adoption of the most vigorous and efficacious measures in the prosecution of the war, as the best means of bringing the contest to an honorable termination, and of transmitting unimpaired to their posterity, their rights, liberty and independence.”—Oct. 22, 1814.

The legislature agrees to present swords to Genes. Jacob Brown, Winfield Scott, Edmund Gaines, Eleazer Ripley, James Miller, Peter B. Porter, Alexander Macomb, Benj. Mooers, and Samuel Strong, as well as to the eldest male heirs of the late Genes. John Swift and Daniel Davis, in recognition of their services on the northern frontier in defence of their country. Commodore Macdonough is voted a sword and 1,000 acres of land.—Assem. Jour., 38th sess., 101; Senate Jour., 38th sess., 70.

The legislature appropriates $50,000 for completing the fortifi¬cations on Staten Island.—Laws of N. Y. (1814-15), chap. 27.

The common council resolves that the committee of defence be authorized to negotiate with the war department of the United States regarding the loan of $1,000,000 by this corporation, and that U. S. stock at 80% be taken therefor.—M. C. C. (1784-1813), VIII: 68. For side lights on these negotiations see letters (MSS.), Secy of War James Monroe to Nicholas Fish, and Senator Rufus King to Comp’tler Mercein, in city clerk’s record-room.

Eben. Stevens presents to the common council a portrait of Robert Monckton, colonial governor of the province of New York, with a letter stating that the portrait of our Revolutionary hero Gates, was performed in the capacity of Brigade Major to Governor Monckton.—From the original letter, in metal file No. 45, city clerk’s record-room.

“A Friend to Improvements and an Old Engineer” writes to one of the papers: “It may be asserted . . . that there is no city in the world in which the visible and salutary works of improvement of an useful, ornamental or philanthropic nature than this, within the last 10 or 12 years. The vast alterations for the better, in respect to our wharves, piers and slipps; the widening and extension of so many of our streets; the opening of so many new ones: the elegant manner in which the unsettled part of our city has been lately laid out by the commissioners appointed for that purpose, and the very pleasant and salutary walks improvements on the battery and in the park; the great decoration . . . by the erection of that superb edifice, the City Hall; the building of several new markets, particularly of the Washington . . . and the New Alms House and Penitentiary at Bedvieu . . . the system of the Fire Department has . . . been carried to a degree of maturity which could not possibly be expected in so short a time; the works of art . . . have been most effectual improvements of the kind in the United States . . .”—Com. Adv. O 26, 1814.

The steam frigate “Fulton the First” (see J 20) is launched from the ship-yards of Adam and Noah Brown, “amidst the roar of cannon and the shouts and acclamations of upwards of twenty thousand people, who had assembled to witness the event.”—N. Y. Eco. Post, Oct. 1814. She measures 145 feet on deck and 53 feet breadth of beam and, with only 8 feet of water, has ascended 27 feet in the carrossades and 2 Columboids, the latter to carry each a 100 pound red hot ball.”—N. Y. Eco. Post, O 29, 1814; Winsor, IV: 490. For view of the launching, see Pl. 83-a, Vol. III. The frigate was at first called the “Demologe.”—Dickinson, Robert Fulton, Engineer and Artist, 261-62. It is described in detail in Colden’s Life of Fulton, 228 et seq. See also Fulton’s own account under N 5. For Gov. Tompkins’ speech, see J 20.

“Our city was considerably agitated this morning by a rumour which was running the rounds, that a vidette had arrived from Rockaway Beach with information that 70 sail of enemy’s ships of war and transports had made their appearance off that place, shaping their course for Sandy Hook. On investigating the rumour it turns out that a vidette did indeed arrive here this morning from the east end of Long Island, but with information to Maj. Warner, that the number of vessels at anchor in Gardiners Bay, opposite New-London, had increased to seven.”—N. Y. Eco. Post, Ag 31, 1814.

In accordance with its resolution of Dec. 17, 1812 (q.v.), the common council confers the freedom of the city on Commodore Stephen Decatur.—M. C. C. (1784-1813), VIII: 72-74; Diary of De Witt Clinton (MSS.) in N. Y. H. B.

The Americans evacuate and destroy Fort Erie, and retire to the American side of the Niagara River. This ends the war in that region.—McMaster, Hist. of the People of the U. S., IV: 69.
Gov. Tompkins sends to Secretary Monroe a comprehensive report of the military situation in the vicinity of New York City.

Sixth Gen. Jackson, at the head of 5,000 men, appears before the Spanish town of Pensacola, Fla., to drive out the British. The British blew up the fort, on Nov. 8, and retired in ships from the bay. —McMaster, Hist. of the People of the U. S., IV: 180-81.

The fort on Bedloe's Island is named Fort Wood by Gov. Tompkins, and the one on Ellis Island becomes Fort Gibson.

Col. Solomon Van Rensselaer writes from New York to Mrs. Van Rensselaer at Albany: “The Governor is in his new quarters, with all his suite; we have an elegant establishment; live in perfect harmony, and in style, much to do and attend strictly to all duties. . . . If there is no attack on this place this Fall—and none is expected—I will be with you in a few weeks, when the Governor will return to Albany.

“The militia are sickly and heartily tired of a military life; desertions are frequent and furloughs asked for by dozens every day. We have visited the fortifications at the Hook, Narrows, this Island. . . . All my time is taken up in my profession. I act as aid and not as Adjutant-General. All express their satisfaction at my being here, and much confidence is placed in me by the inhabitants. . . . Lewis has gone to Washington to beg to be retained. Last night we returned from again visiting the troops and fortifications on Long Island and the Narrows, a tour of three days. I spent very pleasantly, in which time we reviewed three Brigades, and were received at the different posts with a tremendous roar of cannon. The review of General Boyd's Brigade of Regulars was splendid. The troops performed well and looked like soldiers. . . . We are just now going out to review the troops.” —Guernsey, N. Y. City & Victory in the War of 1812-15, II: 372-75.

Gov. Tompkins writes from New York to Commodore Decatur: “The steam frigate [see O 29] building in this harbour is, I presume, intended to act as a moveable Battery for harbour defence; & is expected to operate most advantageously in a calm, when ships of the ordinary construction would be unmanageable; & she of consequence enabled to choose her position. The experience of her utility is still to be tried though I think it probable she will answer the end proposed.

“I do not believe however that Vessels of this description would be formidable on the ocean, or in broad waters; or that they would be the most advisable armament for lake Ontario, Ships of the line & frigates form the naval force, upon which alone I should place reliance; either for blockading the enemies fleet on that lake or for conquering it in open fight.” —Pub. Papers of Daniel D. Tompkins, III: 397. See N 23.

The number of garrison and barrack cannon and mortars now in commission at New York for their homes and cities mounts to 570 pieces. The largest we have seen is the Columbiad of one hundred pounds. A number of the same pieces of fifty pounds calibre are mounted in Fort Greene. In addition to these thirty more heavy carriages are nearly finished; And the handsome and formidable park of field artillery and battalion guns belonging to the brigades of militia are not included in the enumeration. We may count besides upon one or two hundred active and useful pieces on board the President, gun boats, and vessels of war in port, without including the steam battery Fulton.” —Columbia, N 15, 1814.

Pres. Madison, by proclamation, recommends that Thursday, Jan. 12, 1815, be observed as a day of public humiliation, fasting and prayer. —N. Y. Exe. Post, N 19, 1814.

The common council notes the freedom of the city in a gold box to be presented to Gen. Alexander Macomb, and that he be requested to sit for a portrait. —M. C. C. (1784-1813), VIII: 88.

Macomb's letter of Nov. 24 acknowledging the receipt of the resolutions is in metal file No. 45, city clerk's record-room. The presentation took place on Dec. 8 (q.e.c.). The portrait was painted by Samuel Morse, R. A., of the Muses of Art, etc., etc.

The common council authorizes the committee of finance “to extend the issuing of Corporation money bills to a sum not exceeding fifty thousand Dollars.” —M. C. C. (1784-1813), VIII: 88.

Facsimiles of the city's paper money, bearing date of Dec. 20, 1814, are in Man. Com. Coun. (1865), 170.

Gen. Jonathan Williams having written, in behalf of the people of Philadelphia, to Robert Fulton concerning the construction of a duplicate of the "Fulton the First" for the protection of that city, Nov. 23. Fulton answers from New York on this day, giving an interesting description of the steam frigate. He says:

“Much occupied on Monday last in steaming the Steam Vessel from the east into the north River I did not receive your communication of 19 until yesterday Tuesday.

Her length is 00 deck 167 feet

Breadth of beam 56

Depth of hold 12

Height of gun deck 8

Thickness of Sides power

5

120 horses

Commened June 1 will be finished about 1 Janry

Estimate for Engine and hull about 1500 [sic]

I believe cost Something more. Her boilers of copper, which alone will do for salt water, weigh 24 tons. All her valves and communications with salt water is Brass. She is piered for 30 guns Long 32 pounders. She has 21 on Board with near 60 tons of material and now draws 9 feet 2 inches of water with this weight. My two Steam boats the car of Neptune and Sultan towed her through the water at the rate of 33/4 miles an hour. There is now no doubt that when finished she will run from 45 to 5 miles an hour in still water. The $150,000 estimate presented to the secretary of the navy was Independent of gun coppering. Sails Anchors cordage Joiners work and Armament in General All complete she may be estimated at 235 or 240,000 dollars.

“[How to construct one from under my eye and elsewhere than at this] may not know here I have erected workshops tool and machinery Sided to the construction of large engines and heavy works also, all the models of her castings and fixings, which alone is a work of some months, and has cost from 3 to 4000 $ But the hull might be built at Phila—and the principal part of the machinery be made here in the transport of which there will only be hand carriage from Brunswick to Trenton which will cost less than to make the models. I must also remark that as this is a new Invention which requires all my care to render it as complete and useful as can reasonably be expected from my present experience, I cannot trust the construction of the machinery or the fitting out of the Vessel to be directed by any one but myself in which I will give every facility in my power to the Gentlemen of Phila.” —N. Y. P. L. Bulletin, XIII: 510.

“We understand orders have been issued by his excellency the commander of this military district, to dismiss the militia now on duty in this city and its vicinity. Those stationed at Harlem have returned their arms to the state arsenal, and take their departure for their homes and families this day.” —N. Y. Exe. Post, N 23, 1814. This action was taken because all fear of a British attack upon New York had been given up —See N 70.

A deed for lots numbered 107 and 161 on the northwestern side of William St. is presented by the common council to the “New York Society for promoting the manumission of Slaves and protecting such of them as have been or may be liberated.” —M. C. C. (1794-1813), VIII: 90. The grant is made on condition that an African free school be built there within a limited time. The deed was recorded Nov. 8, 1816.—Liber of Conveyances, CXIV: 511.

Capt. Thomas Macdonough is ordered by the Navy Department to proceed to New York to take “command of the steam floating battery Fulton First” (see O 29). This was the first appointment of a naval officer as commander of the first steam vessel of war in the history of the world. —Macdonough, Life of Commodore Macdonough, 214. See Ja 6, 1815.

Col. Van Rensselaer again writes from New York: “On the 25th we had a splendid day; ten thousand troops were under arms, marched through the city and were reviewed by the Governor, after which we dined in the City Hall by invitation from the corporation. I wrote you that in two or three weeks the militia would be discharged, all idea of an attack from the enemy being given up . . .” —Guernsey, N. Y. City & Victory in the War of 1812-15, II: 387-85.

The common council authorizes the payment of $250 to . . .
THE ICONOGRAPHY OF MANHATTAN ISLAND

John Stanford (see Je, 1815) "as a compliment for past services
dec. as a minister of the Gospel rendered at the Alms House and other
public institutions in this city."—M. C. G. (1784-1831), VIII: 93. There was a similar recognition annually thereafter for many
years of the services rendered by this semi-public chaplain of the
city's institutions; by 1826, the "compliment" had been doubled
(ibid., XV: 250).

A paper called The Mid-day Courier. With the Morning's Mails
was in existence at this time.—Brigham, A. A. S. Proc. (1917), 460.

The freedom of the city is formally conferred on Gen. Alexander
Macomb (see N 21.)—M. C. G. (1784-1831), VIII: 99-100.

Gov. Tompkins transfers his headquarters in New York (see O 25) to "the Government House, State Street."—Pub. Papers of
Daniel D. Tompkins, I: 751.

The British capture a small American fleet off Louisiana. This
gives them command of the route to New Orleans, but they fail to
make use of their opportunity.—McMaster, Hist. of the People of
the U. S., IV: 185-87.

The Hartford convention, called by Massachusetts because of
New England's dissatisfaction with the war and the present condi-
tion of affairs, assembles, delegates from Massachusetts, Connecti-
cut, Rhode Island, and New Hampshire being present. It adjourned
on Jan. 5, 1815, after adopting a report urging that separation from
the Union be not considered until an attempt to correct the present
evils had been made; declaring that the Conscription Bill before
congress was unconstitutional; and recommending that each state
be permitted to defend herself and to use a part of the federal taxes
to defray the expense. If congress did not act, if peace was not
concluded, if New England was neither defended by the general
government nor given leave to defend herself and pay the cost with
the federal taxes, another convention was to be held in June. Five
commissioners were dispatched to present the grievances to con-
gress, but on the day they arrived at Washington, news came of
the treaty of Ghent, and without showing their credentials or
making any announcement, they returned to New England, Dec.
"followed by shouts of derision from the whole Republican press."
—McMaster, Hist. of the People of the U. S., IV: 245-52, 275.

The common council agrees to lend $400,000 to the governor
in order that he may pay the militia who were stationed in the city
during the autumn.—M. C. G. (1784-1831), VIII: 106-8; N. Y.
Post, D 23, 1814. The money was repaid by the U. S. on Feb.

A treaty of peace between Great Britain and the U. S. is signed
at Ghent. All prisoners of war and captured territory are to be
returned, and all boundary disputes arising from the treaty of
Sept. 3, 1783 (q. v.), are to be settled by commissioners. Both
countries pledge themselves to help to secure the abolition of the
slave-trade. Concerning the impressment of seamen and the paper
blockades, the treaty is silent.—Laws of U. S., 13th cong., 3rd
ses., 194-202. For an account of the negotiations leading to the
treaty, see Ag 8; also McMaster, Hist. of the People of the U. S.,
IV: 256-74. News of the peace reached New York on Feb. 15,
1815 (q. v.).

An estimate of the value of the fire department establishment
totals $31,913.00.—M. C. G. (1784-1831), VIII: 110-11.

The British, under Sir Edward Pakenham, attack Gen. Jackson,
and are repulsed.—Winton, VII: 404; Brackenridge, Hist. of
the Late War between the U. S. and Gt. Brit. (Phila., 1836), 284. See
Ja. 1, 1815.

Gen. Joseph G. Swift makes a report, accompanied by a number
of maps, plans, and views, to the committee of defence concerning
the fortifications which have been erected for the protection of New
York City. This very important report is printed in Guernsey,
N. Y. City & Vicinity during the War of 1812-14, II: 335-40,
from the original now deposited by the city in the N. Y. H. S. Four
of the drawings are reproduced as Pls. 82A, 82B-a, 82B-b, and
82B-c, Vol. III. See also Man. Com. Cau. (1856), 89, 104, 326,
361, 393, 400, 416, 428, 480, 489, 497, 552, 553.
CHAPTER V

B.—PERIOD OF INVENTION, PROSPERITY, AND PROGRESS

1815-1841

This year, diplomatic relations between Spain and the U. S., which had been broken off in 1808 (q.v.), were resumed.—Winsor, VII: 498.

"Soon after the close of the War of 1812, an Englishman who had learned the process of canning in his own country started the business in New York City. By this time, the original method of preserving in glass jars had been modified by the use of cans. This New York firm soon advertised meats, gravies, and soups put up in tins, warranted to keep fresh for long periods, especially during protracted sea voyages. Customers were informed that, if spoiled, the fact could be detected by the head of the can bulging. This preserving method was at first used principally for oysters, lobsters, and salmon. It was established gradually at several points along the coast and became an industry of some importance by 1840."—Clark, Hist. of Mfrs. in the U. S., 485.

In the season of 1815-16, the "Handel and Haydn Society" was organized for the cultivation of sacred music. In 1828, it was said of it: "They have given, at various times, oratorios in St. Paul's Church, at which the most eminent singers in this country have taken a conspicuous part."—Goodrich, Picture of N. Y., 388.

In this year, the south-west battery was named Castle Clinton in honour of De Witt Clinton, mayor during the war.—Bibl. of Rep., Am. Scen. and Hist. Pres. Soc. (1903), 116. L. M. R. K., III: 93.

In this year, the northern limit of improvements on Broadway was at Canal St.—Man. Com. Coun. (1865), 604.

In this year, an assessment was made for opening 125th St. between Third Ave. and the lane leading to Manhattanville (Index to Assays, Rolls, Vol. 1), and it was confirmed in August by the supreme court.—M. C. G., 1784-1831, VIII: 281.

Assessment was also made for opening Second Ave. from North St. to 24th St.—Index to Assays, Rolls, Vol. 1. See also Descrip. of Pl. 1103, III: 616. In opening Second Ave., it passed through the burying-ground of the Methodist congregation.—Doc. No. 76, Bd. of Ald., F 4, 1815.

A view of the city from Brooklyn Heights, drawn and engraved at about this time by Boquet (probably J. L. Boquet de Woerl), shows some important details found in no other view. It is one of a series of six aquatic views, engraved on the same plate, with the title "A View of the First Cities of the United States," reproduced and described in Vol. III, A. Pl. 15.

In this year, on his return from England where he studied art, Samuel Morse organized the N. Y. Drawing Association. From this sprang the N. A. of the Arts of Design, of which he was the first president. For brief accounts of his career as a painter, see Tuckerman’s Book of the Artists (1807), and Isaiah’s Hist. of Am. Painting (1905).

The national debt, principally on account of the war, amounts to $49,824,410.70.—Am. State Papers, IX: 23.

The British again attack Gen. Jackson before New Orleans (see D 25, 1814), and are signally beaten.—McMaster, Hist. of the People of the U. S., IV: 186-87. See J 5.

Four buildings in Nassau St. and nine in Theatre Alley are destroyed by fire. The cornice of the theatre was several times on fire, but the flames were fortunately extinguished before doing much damage.—N. Y. Ev. Post, Ja 6, 1815.

In accordance with its resolution of Sept. 26, 1814 (q.v.), the common council confines the freedom of the city on Commodore Thomas MacDonough.—M. C. G. (1814-1815), VIII: 116-17. William Denning, at whose house in New York MacDonough is staying, writes to his daughter, Mrs. Shaler, in Middletown, Conn.:” . . . He does not seem to like the command of the steam frigate [see N 30] not being used to such a vessel."—MacDonough’s Life of Commodore MacDonough, 217.

The British make their final attack on New Orleans (see Ja 1), and are decisively defeated by the Americans under Gen. Jackson.—Winsor, VII: 403-4; N. Y. Ev. Post, F 6, 7, 1815.

New York "is thrown into a tumult of joy" by rumors of peace.—N. Y. Ev. Post, Ja 9, 1815. Definite news of the Treaty of Ghent did not arrive until Feb. 11 (q.v.).

Certain inhabitants petition that an "efficient Bridge" be built over Canal St. at Varick St. Referred to street commissioner.—M. C. G. (1814-1815), VIII: 118-19.

The "President," commanded by Commodore Decatur, is captured outside New York harbour by the British ship "Endymion."—Winsor, VII: 405, 458. See also N. Y. Ev. Post, Ja 26, 1815. A court of inquiry to investigate the loss of the frigate was held in New York in April.—Ibid., Ap 28, 1815.

The freedom of the city is formally conferred on Gen. Jacob Brown (see O 10, 1814).—M. C. G. (1814-1815), VIII: 133-35. Diary of De Witt Clinton (MS), in N. Y. H. S.

A national salute in honour of the victory at New Orleans (see Ja 8) is fired from the U. S. frigate "Guerrriere" lying in New York Harbour.—N. Y. Ev. Post, F 8, 1815.

Col. Lawrence, with 375 men, surrenders Fort Boyer, Mobile, to 5,000 British, with a large fleet, under Gen. Lambert.—Ann. Rep. (1815), 159-61.

"Peace.—On Saturday evening [F 11], about eight o’clock, arrived the British sloop of war Favorite, bringing Mr. Carrol, one of the Secretaries attached to the Americanlegation, bearer of a treaty of Peace, between the United States and G. Britain. . . . the public expressions of tumultuous joy and gladness, that spontaneously burst forth from all ranks and degrees of people . . . were without stopping to enquire the conditions, evinced how really sick at heart they were, of a war that threatened to wring from them the remaining means of subsistence, and of which they could neither see the object nor the end. The public exhilaration shewed itself in the illumination of most of the windows in the lower part of Broadway and the adjoining streets, in less than twenty minutes after Mr. Carrol arrived at the City Hotel. The street itself was illuminated by lighted candles, carried in the hands of a large concourse of the populace; the city resounded in all parts with the joyous cry of a peace! . . . Expresses of the glad tidings were instantly dispatched in all directions, to Boston, Philadelphia, Providence, Albany, &c. &c. This news report is embodied in an editorial which contains the editor’s conjectures regarding the probable provisions of the treaty.—N. Y. Ev. Post, F 13, 1815.

Jas. Sterling, in a letter to Wynant Van Zandt, referring to these events, says: " . . . a handbill is to be issued from the Office of Lang & Turner . . ."—Wynant Van Zandt Papers (MS), in N. Y. P. L.

The reception of the news was thus described later by another eyewitness: "Years ago, the office of the old Gazette was in Hanover-square, near the corner of Pearl-street. It was a place of resort for news and conversation, especially in the evening. The evening of February 11th, 1815, was cold; and at a late hour, only Alderman Cebra and another gentleman were left with Father Lang, the genius of the place. The office was about being closed, when a pilot rushed in and stood for a moment so entirely exhausted as to be unable to speak. ‘He has great news,’ exclaimed Mr. Lang. Presently the pilot, gasping for breath, whispered,
207-8. offer also public 1811).—278-79; 1815, the to. the directed general general common o'clock Chief, Offices, "and the the our are 13th evenings men. The windows flew up, for families lived there then. No sooner were the inmates sure of the sweet sounds of Peace, than the windows began to glow with brilliant illuminations.

"The cry of 'Peace! Peace! Peace!' spread through the City at the top of all voices. No one stopped to inquire about 'Free trade and sailors' rights.' No one enquired whether even the national honor had been preserved. The matter by which politicians had irritated the nation into the War, had lost all their importance. It was enough that the ruinous War was over. An old man, who, attracted to his door by the noise, was seen to pull down immediately, a placard 'To Let,' which had been long pasted up. Never was there such joy in the City. A few evenings after, there was a general illumination; and, although the snow was a foot deep and soaked with rain, yet the streets were crowded with men and women, eager to see and partake of everything which had in it the sight or taste of Peace."—Hist. Mag., 2nd ser., V. 207-8.

Congress appropriates $200,000 for repairing or rebuilding, on their present sites, "the President's House, Capitol and Public Offices," in the city of Washington.—Acts of Cong., 3d sess. of 13th cong., chap. 41.

The common council initiatives measures for a public demonstration of rejoicing over the conclusion of peace with Great Britain.

The following address to the people is ordered printed in the "several gazettes of the City:"

"The Common Council, in common with their fellow Citizens, appreciating the important blessings which will result to our country from the restoration of peace and sincerely congratulating them on the auspicious intelligence which has been received on that subject [see F 18], inform them, that arrangements have been made for suitable demonstrations of joy whenever intelligence of the ratification of the Treaty shall be received; and particularly that due notice of a time for a general illumination of the City will be given. They also suggest that any partial exhibitions of joy are incompatible with the solemnity of the occasion, & may produce irregularities & disorders. They further inform their fellow Citizens that a Committee of the Board have been appointed to superintend the requisite arrangements."—M. G. C. (1784-1811), VIII: 142-43; Diary of De Witt Clinton (MS.), in N. Y. H. S.

A letter was received this morning from Secretary Monroe, to our Commander in Chief, saying that the Treaty [see D 24, 1814, and F 11, 1815] would be ratified—and requested that flag vessels might be immediately despatched to the squadrons on our coast, to cease their hostilities. Instantly, the Reverence Cutter, Capt. Brewster was sent down by Gen. Boyd, commander of this District, to offer to the British squadron all the civilities due from one friendly nation to another.—N. Y. Eve. Post, F 17, 1815. The treaty was ratified by the senate on this day and the ratification proclaimed by Pres. Madison on Feb. 18.—Laws of U. S., 13th cong., 3rd sess., 194-202.

In commemoration of the Treaty of Peace, The inside of the [Park] Theatre, will, this Evening, be decorated with the Flags of various Nations. The front of the House will be Brilliantly Illuminated, And an Emblematic Transparency exhibited, representing the meeting of Columbia & Britannia."—N. Y. Eve. Post, F 18, 1815. See N 14.

Not having heard of the Treaty of Ghent (see D 24, 1814), Capt. Charles Stewart in the U. S. frigate "Constitution" engages the British schoon of war "Cyan" and "Levant" off Madeira and compels them to surrender.—Mem. of the U. S., IV: 728-79; N. Y. Eve. Posts, My 22, 1815. See J 5.

The common council approves the committee's plans for celebrating peace on Feb. 22.

The city hall is to be illuminated and appropriate transparencies are to be displayed. A handsome exhibit of fireworks is to be shown in front of the government house. It is directed that neither horses nor carriages appear in any part of the streets of the city south of Chamber St. from seven to ten o'clock.

At seven o'clock, three guns are to be fired in succession at the Battery and at the arsenal, and three rockets are to be shown. These are the signals for a general illumination in each house. The lights are to be extinguished at ten.

It is recommended that flags be displayed during the day from the houses and from vessels in the harbour. That a salute be fired at noon and at that time, the bells of the city be rung for an hour.

It is also recommended that the citizens assemble in their respective churches in the morning at the usual hour of service, "there to offer up to the great Ruler of Nations their sincere thanksgivings for the restoration of peace to our Country, and humbly to implore his blessings upon it."—M. G. C. (1784-1811), VIII: 142-43; F 15, 1815. The celebration was postponed until Feb. 27 (q.e.),—N. Y. Eve. Post, F 23, 1815. On March 20, Joseph Delacroix was paid $1,000 for the fireworks. Ibid., VIII: 173.

Salutes are fired at noon and at 1 o'clock "from the heavy cannon of the forts in this harbor, on the return of peace."—Columbian, F 25, 1815. See also Grand Opening of the New Armary of the 6th Reg't (1800), 12.

The following general order is issued by Gov. Tompkins: "The Commander in Chief announces, with the most heartfelt satisfaction, to the Militia of the State of New York, the ratification of a treaty of peace between the United States and Great Britain. In congratulating them on this auspicious event, he cannot withhold an expression of his pride and respect for the promptitude and fidelity with which they have on all occasions obeyed those various calls of service in defence of the State, which its safety compelled him to make. . . .

"The Commander in Chief is especially charged by the President of the United States to convey to the Militia of this State his thanks for the patriotism, zeal and perseverance so eminently displayed by them in defence of the rights of their country."—Pub. Papers of Daniel D. Tompkins, I: 519-20.

Robert Fulton dies at No. 1 State St.—N. Y. Eve. Post, F 24; 25 N. Y. Spectator, F 25, 1815; Dickinson, Robert Fulton, Engineer and Artist, 266. The legislature, the common council, and the societies to which Fulton belonged, passed resolutions of regret at his loss and voted to wear mourning for him. His funeral, which took place on Feb. 24, was attended by officers of the national, state, and city governments, by members of learned societies, and by a great number of private citizens. All business in the city was suspended as a sign of respect, and minute guns were fired from the "Demolosogos" and the West Battery from the time the procession started till it reached Trinity Church. The body was interred in the family vault of the Livingsons.—N. Y. Eve. Post, F 25, 1815; Dickinson, op. cit, 326; Diary of De Witt Clinton (MS.) in N. Y. H. S.

In accordance with the plans of the common council (see F 20), a general illumination of the city takes place in honour of peace between the United States and Gt. Britain. For detailed descriptions of the transparencies and the fireworks, see N. Y. Eve. Post, F 28, Mr. 1 and 2, 1815. See also Man. Com. Coun. (1868), 584; and Diary of De Witt Clinton (MS.) in N. Y. H. S.

Napoleon, having escaped from Elba, lands at Cannes with 1,200 men.—Hazen, Modern European History, 242-45. See Mr 13 and 20.

"Commerce this day, hastens to shew 'its white feather on the ocean': this being the 24th day after the ratification of the treaty [see F 17], & which, in the second article is fixed upon as the day, after which vessels, shall not be captured on the American coasts from the lat. 24 degrees south to the lat. 50 north, and as far eastward in the Atlantic ocean as the 36th degree of West longitude, from the meridian of Greenwich, or if captured to be restored."—N. Y. Eve. Post, Mr 2, 1815.

John Ferguson is appointed mayor of New York, replacing De Witt Clinton.—Chamber, Hist. of Chicago, III: 63; M. G. C. (1784-1811), VIII: 163. Wilson says: "The influential political opponents of De Witt Clinton succeeded, in 1815, in displacing him as mayor and having John Ferguson, who was grand sachem of the Tammany Society, appointed in his place. This was done with the understanding that Ferguson was shortly to resign, be made surveyor of the port, and that Jacob Radcliff was to be named as mayor. Accordingly Fergu-
The powers assembled in the Congress of Vienna, upon learning that Napoleon has escaped from Elba and has entered France with an armed force, issue a statement declaring that they "will employ all their resources and will unite all their efforts in order that the general peace...may not be again disturbed."—Anderson, Const. & Docs., etc., 468-69.

The editor remarks concerning the Battery: "While we were exposed to be invaded by an enemy, it has been judged proper for the security of the city, to turn this beautiful promenade into a breezeway, and to provide for such purposes, to have the windows, the doors, the pieces, defaced, and destroy every vestige of its former beauty. Now that peace has returned, what a grateful thing would it not be if we could again revisit this delightful evening walk? It would add to the innocent gratification of the citizens, if the restrictions could be removed from the building on which the flag-staff is erected."—N. Y. Evoc. Print, Mr. 14, 1815. See Mr. 20.

A "superb Ball in celebration of Peace" is held at Washington Hall. About 600 people are present.—N. Y. Ev. Post, Mr 24, 1815.

"Mr. Madison is about to visit this city; and never was his presence more wanted or more necessary. He comes, we presume, for the purpose of concerting measures to re-unite the party at Tammany-Hall, who have of late shewn strong symptoms of distraction and dissatisfaction, which threaten the most mischievous consequences."—N. Y. Ev. Post, Mr 18, 1815.

Napoleon enters the Tuilleries, and the "Hundred Days" commence.—Hazen, Modern European Hist., 243-44. See Feb. 18.

The comptroller is authorised to make arrangements for the establishment of signal poles.—M. C. C. (1784-1811), VIII: 166.

The minutes do not state their position on the battery. John McCorn, reports to the common council that, as the 3rd Ave., after the first of May will be opened from the Bowery to Harlem River, he recommends that a profile should be made of it and also that it be determined in what way the street and avenues shall be worked.—M. C. C. (1784-1831), VIII: 168. On April 14, McCorn wrote to John Randal, Jr., concerning this matter, asking at the same time when Randal's plan would be finished "& the monuments set."—From original among "Miscellaneous MSS." in N. Y. H. S.

"Resolved that the thanks of the Common Council be presented to the Honl De Witt Clinton late Mayor of this City for his able and faithful discharge of the various duties of the Mayorship particularly for his prompt, judicious, and impartial administration during the emergency of war, and for his candour and intelligence, as the presiding Officer of this Board."—M. C. C. (1784-1831), VIII: 168-69. See also N. Y. Ev. Post, Mr 21 and 22, 1815.

The Battery committee recommends to the common council that the Battery be relegated to its former use as a place of recreation and suggests certain improvements.

"The Citizen did voluntarily cheapen murmur relinquish in a general Council was requested to revise and correct the pleasure they were accustomed to enjoy there, and now that the war is over and the necessity for occupying the Battery any longer for military purposes thereby ceases they will doubtless require to be again gratified with the amusement formerly enjoyed and will expect that those grounds be again taken under the care of the corporation and regulated with such taste as may be receptible..."—Your Committee therefore suggest the propriety of erecting

a new Bulk Head on the North River Side to extend from the foot of the Battery in a right line to the Westerly angle thereof, opposite where the old Flag-Staff was stood, and of appropriating the ground which will be taken from the Government House lot whenever regulated to the filling up such requisition..."

"Your Committee further recommend filling up the Ditches which the erecting of the Parapets which now encumber the Battery, have been requested, levelling and regulating the walls, manuring and sanding the soil and otherwise improving the grounds."—M. C. C. (1784-1831), VIII: 170-71. John McComb, street commissioner, was paid $500 on April 3 for expenses at the Battery.—Ibid, VIII: 178.

The U. S. frigate "Hornet," Capt. James Biddle, captures the British vessel "Penguin," at the port of Tristan d'Acunha, in the South Atlantic.—Witt, Collections (footnote).

Great Britain, Prussia, Russia, and Austria sign a treaty of alliance against Napoleon.—Anderson, Const. & Docs., etc., 469-71.

During the three months from April to June, the sum of $3,960,000 was paid in at the custom-house in New York City.

American prisoners in Dartmouth prison are fired upon by their guard, and seven of them are killed and about 60 wounded.—Andrews, The Prisoners' Memoirs, or Dartmouth Prison, 94 et seq.

The freedom of the city and an "elegant Sword" are conferred on Capt. Jacob Jones in accordance with the resolution of Nov. 30, 1812 (s.o.).—M. C. C. (1784-1831), VIII: 179; N. Y. Gen. and Gen., Ap. 7, 1813.

Union Place and Market Place, as laid out on the Commissioners' Map, are reduced in size by act of the legislature.—Laws of N. Y. (1815), ch. 151. The former was described by boundaries as a public place by the legislature in 1831 (ibid, 1831, ch. 252); and reduced to its present size in 1835.—Ibid. (1832), ch. 14. See also F 17, 1812; and M. C. C. (1784-1831), VIII: 153-156.

The legislature gives New York City permission to construct wooden buildings for ferry houses, on any of the streets or wharves contiguous to the present or future ferries, from this city to Nassau Island, Staten Island, and New Jersey.—Laws of N. Y. (1815), ch. 154.

The legislature requires that all houses between the Battery and a line drawn from the Hudson River through Jay St. to the East River at Montgomery St. be constructed of brick or stone and roofed with tile or slate, for the more effectual prevention of fires.—Laws of N. Y. (1815), ch. 155. It was amended on April 12, 1822, and May 1, 1829.

The legislature passes an act "altering the Time of electing Sheriff Officers in the City of New-York." The election is to be commenced on the last Tuesday of April instead of on the third Tuesday in November (see Mr. 21, 1800). It is provided that officers elected this month shall serve "from the first Monday of December next until the second Monday of May then next ensuing and no longer." the second Monday in May is to be the regular date for new officers to be sworn in.—Laws of N. Y. (1815), ch. 156.

The Fulton Steamboat Company is incorporated. The preamble of the act states that Joseph Ogden Hoffman, Cadwallader D. Colton, and Wm. Cutting and their associates have purchased, of the late Robert R. Livingston and Robert Fulton, a right to the exclusive navigation of the waters of the East River or Sound, "by the means of steam or fire," and to the exclusive use in such navigation of the inventions of Livingston and Fulton; and have constructed a steamboat called the "Fulton," which is now employed in navigating those waters.—Laws of N. Y. (1815), ch. 248.

The legislature appropriates $35,000 for completing the fortifications at South Hill.—Laws of N. Y. (1815), ch. 266.

The common council agrees to modify the extent to which Ninth and Tenth Aves. shall be opened. Ninth Ave. is to be opened from Greenwich Lane to the northerly side of 28th St. which street is to be opened to Tenth Ave. and thence to the river. Tenth Ave. is to be opened from this point north to the northerly side of 71st St.—M. C. C. (1784-1831), VIII: 191.

The North American Review and Miscellaneous Journal begins May publication in Boston, under the editorship of Wm. Tudor. For Mar. 20.
The common council receives and agrees to accept an invitation from the trustees of St. Peter's Church to attend the dedication of the Cathedral of St. Patrick on Thursday next.—M. C. C. (1784-1813), VIII: 195. See My 6.

The common council makes arrangements regarding the sale of the grounds at the government house and adjacent to the Battery. It is agreed to continue Stone St. through the grounds to State St, and that there shall be seven instead of eight lots fronting on Broadway. The property is to be sold at public auction on the 16th under the direction of the comptroller. The sales are further directed to be made on condition that the purchasers of the lots fronting on Broadway and State St. "conform in their buildings to such directions as should be given by the street commissioner respecting the heights of the several water table & several stories of the buildings and of the depth & breadth— and that a conformity of height shall be preserved in the several houses to be erected."—M. C. C. (1784-1813), VIII: 198. See My S, and Je 5.

St. Patrick's Cathedral, begun in 1809, is dedicated by the Right Rev. Dr. Cheverus, Bishop of Boston, in the presence of about 4,000 people. "This grand and beautiful church, which may fairly be considered one of the greatest ornaments of our city, and inferior in point of elegance to none in the United States, is built in the Gothic style, and executed agreeably to the design of Mr. Joseph E. Mangin, the celebrated architect of New-York. It is 120 feet long, 80 wide, and between 75 and 80 high. The superior elegance of the architecture, as well as the novelty and beauty of the interior, had, for some months past excited a considerable degree of public curiosity, and crowds of citizens of all denominations daily flocked to it, to admire its grandeur and magnificence. ..."—N. Y. Ev. Post, My 11, 1815. The cathedral stood at Prince, Mott, and Mulberry Sts.—Ibid., M. R. K., III: 916. Interior and exterior views of the cathedral, as it was in 1853, are in Illus. News, 1: 28, 29.

The Custom House we learn was to be removed from the government house to the buildings owned by Mr. Jauncy, in Wall-st. as soon as they can be fitted up in a suitable manner."—N. Y. Ev. Post, My 5, 1815.

The comptroller presents to the common council the decision of the referees regarding the value of the buildings on the ground lately obtained from the U. S., which valuation is put at $13,000. As Col. Post, who has the deed of cession from the president, does not feel authorized to surrender it until such amount has been paid, a warrant is ordered to issue for $13,000 and another warrant to cover the cost of the furniture when it is valued.—M. C. C. (1784-1813), VIII: 200.

The common council agrees to another issue of bills of credit to the amount of $20,000 to accommodate the public until the bank resuming specie payment.—M. C. C. (1784-1813), VIII: 207. On July 3, it ordered an additional issue of small bills to the amount of $50,000.—Ibid., VIII: 249-50.

The opening of Stone St. through the grounds of the government house (see My 1) is reconsidered by the common council and negatived. It is agreed that the grounds shall be laid out and sold according to a plan presented to the board by the street commissioner. The board agrees that in the purchaser's deeds an agreement shall be included that the corporation's vacant grounds on which the lots front shall never be appropriated for private use.—M. C. C. (1784-1813), VIII: 203-4. See My 22. Thos. Poppleton's map of the grounds is filed (as Map No. 79) in the div. of real estate, comptroller's office, Municipal Bldg.

An expedition, consisting of ten vessels, under Commodore Decatur, sails from New York for Algiers to punish piracy, war having been declared by the United States.—McMaster, Hist. of the People of the U. S., IV: 352. See Je 30.

Mr. Bardin, the keeper of the Tontine Coffee House (see Ap 2, 1811), announces that beginning June 1 "Sales of Houses, Lands, &c. in the Coffee-Room" will take place between 10 and 12 o'clock; and "Sales of Vessels in the Coffee-Room" will take place between 12 and 2 o'clock.—Com. Adv., My 20, 1815. See, further, F 3, 1823.

"The Fulton the First" (see O 9, 1814) is "put in motion by the force of steam for the first time."—Columbian, My 23, 1815. See also N. Y. Ev. Post, My 31, 1811.

The common council refers to the street commissioner a petition from the inhabitants of Harlem that the opening of a part of Third Ave. be delayed in order to enable them "to collect the grain now growing."—M. C. C. (1784-1813), VIII: 208-9.

The common council, upon the receipt of the news of the death of Gen. Jonathan Williams, formerly commanding the Corps of Engineers of the United States, passes the following resolution; "Resolved that they are impressed with a due sense of the important services rendered by him in planning the defences of this City and Harbours, and that they retain a grateful recollection of his many virtues as a man and a Citizen."—M. C. C. (1784-1813), VIII: 215.

The common council again changes the plan of the lots at the government house (see My 8). It is decided that the front line of the lots shall be nearly in line with the present front of the government house that there be a reservation of ground for public purposes on Whitehall St. of 25 feet front and 50 feet deep; that the said lots be sold on Thursday the 25th inst. [7, v.], under the direction of the comptroller and street commissioner.—M. C. C. (1784-1813), VIII: 215-16. An advertisement of the sale of the house and lots appeared in N. T. Eve. Post, My 23, 1815.

The "lots belonging to the Government house, so called, containing of seven lots fronting Broadway, four lots fronting on State-street and five on Bridge-street; also, the house and lot corner of Bridge-street and State-street, at present occupied as Head-Quarters," are sold at auction for $158,200. "The corporation purchased this ground of the state for the sum of 50,000 dollars a few years have yet for sale the Custom-house, military work shops in various other buildings. ..."—N. T. Ev. Post, My 25; N. T. Spectator, My 27, 1815; descrip. of Pl. 198-3, Ill: 838.

The account of the sale in the Com. Adv. is as follows: "The plot of ground near the Battery, now occupied as a Custom House, Head-Quarters and military work shops, and embracing seventeen elegant building lots, was sold this day at the toteine Coffee House, for the sum of One Hundred and Fifty eight Thousand two Hundred Dollars. The individual lots were bought by the following persons, at the sums annexed to their respective names:—

"Fronting the Bowling Green."

"1. John Hone, $10,250.
3. W. D. Cheever, 9750.
5. D. Lynch, jun. 10,000.
7. N. Brown, 16,600.
8. A. Weston, 850.
10. R. Lenox, 825.
11. J. Blackwell, 500."

"On State-street."

12. J. Swartwout, 20,000.
13. T. Weston, 5000.
14. F. Suydam, 5000.
15. G. Smith, 5700.
16. J. Sharp, 5700.
17. J. Sharp, 6100.

—Com. Adv., My 25, 1816. See My 22, and 26. By the aid of the Poppleton map of this ground (see My 8), the ownership of the several private residences afterwards built on the lots facing Bowling Green, etc., is readily ascertained from the foregoing list, which shows each lot number and buyer.

"This morning the French frigate L'Hermione [see My 24] hoisted Bonaparte's tricolor flag, and fired three national salutes. After which she tastefully decorated herself with the flags of the different nations—that of the American being displayed from the frigates foretop-gallant royal mast."—N. T. Ev. Post, My 26, 1815.

The remainder of the government house property (see My 25) is sold at auction for $653. The custom (of government) house is
Chronology: invention and prosperity: 1815-1841

1815
May

13

purchased by Jacob Barker for $5,920. This makes a total for the property of $164,785. "The Corporation gave for this property $3,800,000; and the English cost was $1,050,000 as we were informed yesterday."—Eing. Post, May 26, 1815; descrip. of Pl. 156-3, III: 585; M. C. G. (1784-1821), VIII: 225. See My I. Deeds for the purchased lots were given on June 19—ibid., VIII: 243. See D 4. For an outline of the history of the government-house, which became the custom-house, see L. M. R. K., III: 574.

June

The following "City improvements" are taking place:

1. The block (or wedge) in old Hanover Square pulling down—Nassau-Street opening to the street—old Government-House taking away and the lots around it clearing—in addition to the usual exertion and alteration of houses and stores, present a busy scene for the bricklayers, carpenters, &c. and promise much amendment in the convenience and beauty of this city, not unworthy of a growing metropolis, rapidly resuming the first rank in commercial activity and importance in the United States.—Columbia, Je 1, 1815. See JI 1.

On this day, a party of officials is to be taken out into New York Bay in the "Fulton the First" (see My 22).—N. Y. Herald, Je 3, 1815; descrip. of Pl. 93-4, III: 557. See JI 4.

The street commissioner reports to the common council regarding the construction of Third Avenue. This report is quoted in part showing the method of constructing roads at this time on Manhattan Island: "as this avenue will become the thoroughfare for all the Eastern travelling, and of course be more used than any other on the Island, it is of the first importance that it should be laid out on correct principles and such as will unite ease and safety with durability." The following are some of the suggestions offered for working the avenue:

"That the Road be worked to the width of Sixty Feet including the gutters

"That forty feet in the center be gravelled from nine to eighteen inches according to the nature of the soil over which the Road will pass

"That no hill or rise in the Road shall exceed three degrees of declension at any three or three situations where on account of the Rock it may be proper to allow a higher rise

"That an arch across the Road shall not have a half inch to the foot of the middle of the Road, which is about one half of what is usually given." The natural declivity lengthwise is in most cases sufficient but elsewhere an artificial one must be given.

Difficulty in obtaining gravel is anticipated. When this cannot be done, broken stone should be used for a foundation; the stone should be of as uniform size as possible, "for if there is much variety they will never lye firm and compact as the largest will always work up especially if the bed is clay.

The road should be made by contract under a competent superintendent who is constantly on the ground to see the contract fairly performed. Where a contract is made upon the old plan, with some improvements to simplify the management of them. —N. Y. Hast. Post, Je 20, 1815.

Napoleon abdicates in favour of his infant son, the king of 22. Rome.—Hazard's Dict. of Dates, 385.

A treaty of peace is signed at Algiers by Stephen Decatur and Wm. Shaler, representatives of the U.S., and Omar Basha, Dey of Algiers. The Dey relinquishes all claims to American tribute, agrees to surrender all American prisoners and to repay in money the value of property taken from them, and guarantees that the commerce of the U.S. will never again be molested. Having been ratified by the senate, the treaty was proclaimed by Pres. Madison on Dec. 26.—N. Y. Ev. Post, Ja 1, 1816; U. S. Treaties, etc., I: 6-11.

Columbia publishes a letter, signed "Public Spirit," commencing as follows: "The beauty and convenience of our city has so often been sacrificed to avarice, that one cannot but feel some apprehension about the fate of a part of it where at present stands the ruins of the late government house. It has now fallen into the hands of individuals, and although they have an unquestionable right to dispose of it in the most lucrative way, yet should that spot be covered with houses built without taste, and placed with no regard to beauty and proportion, it would excite the indignation of every living citizen and be a source of great regret to our successors." The theme is developed at length.—Columbia, Jl 1, 1815. See S 2.

Louis XVIII enters Paris.—Hayden's Dict. of Dates, 385.

A commercial treaty is signed at London by representatives of Great Britain and the U.S. It was ratified by Pres. Madison on Dec. 22.—Law's U. S., 14th cong., 1st sess., 517-58. See also Winsor, VII: 488.

"The Steam Frigate Fulton the First, having taken on board a full cargo of consumers, made a cruise to sea, and returned again into harbor in the short space of seven hours."—N. Y. Ev. Post, Jl 5, 1815. See also Colden, Life of Fulton, 227 et seq., and descrip. of Pl. 83-4, III: 557. See S 11.

Seven buildings on Market St., three or four on Bedlow St., and about 12 small ones inside the block are destroyed by a fire which rages for an hour and a half and threatens the destruction of all that part of the city. Due to the "uneasing and vigorous exertions of our well organized engine companies," the flames were finally extinguished.—N. Y. Ev. Post, Jl 6, 1815.

Jacob Radcliffe is appointed mayor.—M. C. G. (1784-1810), VIII: 261. See also N. Y. Ev. Post, Jl 11, 1815. Radcliffe had previously served in this office in 1810 (p. v, Mr 5). His present incumbency lasted until March 2, 1816 (p. v). Also see Mr 6, 1815.

Napoleon surrenders to Capt. Mainland of the "Bellflower," at the corner—Hayden's Dict. of Dates, 385.

The common council passes an order directing that "that part of Front St. from the intersection of it by South Street at James Slip to Jefferson St. be widened to 70 feet by adding 30 feet thereto on the Southerly side"—And that Front St so widened shall be a continuation of the permanent line & be known & distinguished as South Street.—M. C. G. (1784-1817), VIII: 355.
The common council receives a presentment from the grand July jury representing as nuisances "Lespinards Meadow—The Col-
lect—The Drain in Chappel Street—The Cellars of many parts of the City particularly near the Fly market—a Soap Factory
near the outlet of Van Dam Street & Hetty St—and the broken state of many of the Wharves—They also recommend a strict execution of the Health Laws—which was (excepting the Subject of the Drain) referred to the Board of Health—That of the Wharves to the Committee on Wharves—And it was Resolved
that it be referred to the Aldermen of the 5 & 6th Wards to consider and report a Plan for regulating Canal Street.—M. C. C. (1784—
1813), VIII: 257–58. On July 3, the jury had complained also of the "keeping of the public gardens on the Sabbath" and the "assemblage of Boys for sport on that day."—Ibid., VIII: 250.

The Phoenix Coffee House, at the south-east corner of Wall
and Water Sts., is being remodelled for stores.—N. Y. Eve. Post, Jl 29, 1815. For view of the "Phoenix Buildings," see the "Coffee House Slip," in Peabody's Views of N. T. (1831), and reference to these buildings on p. 31 of this work.

The common council votes to borrow $40,000, to complete the establishment at Bellevue.—M. C. C. (1784–1813), VIII: 269. Aug.

Chapman Stanford (see D 5, 1814) recommends to the common council "regulations for the Government of the paupers Sofia
established in the Hall of Alms House, at Bellevue.—M. C. C. (1784–1813), VIII: 274. This long and elaborate document, beautifully written and bearing the date, Aug. 10, 1815, is preserved in the city clerk's record-room. The greater part of Mr. Stanford's life had been spent as a teacher rather than a preceptor, so that experience has suggested to him that "seminaries in general are confinedly the springs of society, which, as they flow foul or pure, so it is through successive genera-
tions, depravity & misery; or on the contrary, virtue and happi-
ness... Nations, whose laws are sanguinary, have ever decimated a great degree of the same spirit in all their institu-
tions for the education of their children. The laws of America
having happily been cast to a mould, where justice and humanity are combined; no wonder that our schools should enjoy the salubrity of their benign influence."

The writer believes rewards "prompt to future efforts, provided such exonium be not the effect of private partiality, or breathe a spirit of flattery," and he advocates the purchase of three dozen medals which may be worn "for a day" by deserving children. Likewise punishments are necessary. "In a conspicuous place in the room," he recommends, "C. M. C. (1784–1813), VIII: 274.

Confinement is a punishment, although a part of the Lan-
castrian plan, is shown to be accompanied by "inconvenience to the Teacher," and danger to the pupil, and he recalls the incident associated with the "blue- caste school" in London of "a poor little fellow" being sentenced to "confinement in a dungeon," and then forgotten until after he was dead. Mr. Stanford says, if confin-
ment is to be used, he recommends "a sort of little Cage-Room, with strong laths... where the confined may not be for-
gotten." Even better than confinement, he thinks, is a punish-
ment "be made to cry," and some schools in Philadelphia, the scholars being "prohibited from speaking to the offender until he acknowl-
edge his fault... To a child of the least remains of sensibility, this mode of punishment must be severe." As to corporal punish-
ment, Mr. Lancaster does not recommend it, he says, but "I have been grossly misinformed by a person brought up in his own school, if he did not use it on impetuous occasions. It is confessedly the case that many teachers, for trivial offences will keep the instrument of correction in continual motion. This must have a tendency to harden the scholars, subvert the attention of correc-
tion, and create a suspicion of the want of prudence and humanity in the breast of the teacher. Still did I not believe that there may be cases which demand corporal punishment, I must confess that I should be much wiser than Solomon... In application therefore to this part of the subject for this school, I would say, that when a case of the kind comes to the attention of the Board of the Pauper's School, I shall represent the same to the Superintendent, or other appointed by him, who, on examination, shall determine, and order such punishment as may appear necessary. This method may produce a better effect upon a delinquent, and upon the whole school, than being left to a teacher, the warmth of whose temper may possibly mistake the case, & misapply the punishment." The chaplain declares to possess a letter from the "Catechism I have made for the moral improvement of the chil-

"Sketch to aid in the establishment of the Pauper's School" (MS.), in city clerk's record-room.

About 35 buildings near Mott and Pell Sts., including Zion Church, are destroyed by a fire which starts in a small wooden shop. The "want of water" prevented the firemen from checking the flames in the beginning.—N. Y. Eve. Post, S 1 and 3, 1815. See S 5.

It is proposed to build a range of buildings opposite the Bowling Green at the foot of Broadway.—N. Y. Herald, S 6, 1815. descript. of B 1784–1831, of which is called "This is the former site of the government house. See Jl 28, 1817.

"A splendid Dinner" is held at Tammany Hall in honour of Gallatin and Clay (see S 1)—N. Y. Eve. Post, S 6, 1815; Man.

The road committee presents to the common council a contract with E. Jennings to work Third Ave. from the Bowery to Harlem Bridge, which is directed to be executed.—M. C. C. (1784–1813), VIII: 293; N. Y. Spectator, S 2, 1815.

The common council directs the superintendent of repairs to "cause the several Porrs erected in the City to be numbered begin-
ing at N. M. C. (1784–1813), VIII: 293.

See also Colden, Life of Fulton, 227 et seq., and descr. of Pl. 83–5, III: 557. See Oct. 4, 1817.

A monthly paper published by Isaac Riley, with the title of Bookellers' Report & Literary Advertisers, was in existence at this time.—Brighm, A. A. S. Proc. (1917), 376.

Aaron Bussing's proposal to cede to the city a piece of land lying between Macomb's Bridge (over the Harlem River) and Eighth Ave., 100 feet in width, to form a new road connecting with Westchester Co., is accepted on report of the survey committee.—M. C. C. (1784–1813), VIII: 316–17 (with reproduction of map). See also map of this road, dated Sept. 28, 1815, (which became known as Macomb's Dam Road), filed in the bureau of topography, borough president's office, as map No. 176. As appears by the committee's report, the proposed route was "across the Stone Bridge lately built" by Bussing over the Harlem River.—Ibid.

According to a report presented to the common council, the house of industry (see My 30, 1814) has, within a little more than one year, employed "16 girls, emplified, the other women, many of whom have been thus enabled to support their children and relieve the city from such public charge; $1,000 is appropriated for the continuance of the work.—M. C. C. (1784–1813), VIII: 318–19.

Napoleon lands at St. Helena.—Sloane, Life of Napoleon Bonap-
arte, IV: 228–29.

In a communication to one of the papers, "Civis" states: 21
"Every body sees at the present day the miserable effects of the
The comptroller reports that the sales of the government house lots and buildings thereon (see My 25 and 26) "have been closed finally and lastly adjusted."—M. C. C. (1784-1813), VIII: 358-59.

The common council voted an appropriation of $5790 to the Society for the Relief of Poor Widows with Children.—M. C. C. (1784-1813), VIII: 359-60.

The road committee orders the expenditure of $490 for the road to Macomb's Bridge, and $908 is advanced "for timber for the Bridge across Harlem Creek."—Journal B, 118, comptroller's office.

Macomb's Dam Bridge across the Harlem River is finished.—N. Y. Eco. Post, D 21, 1815. "The Bridge . . . consists of the Dam itself which Mr. Macomb was authorized to erect [see Ap. 8, S 20, O 18, 1813, and Ja 10, 1814] and which for the purpose of being used also as a bridge has been made wider and in a more expensive manner than would otherwise have been necessary. The same Law which Grants permission to build the Dam also grants to Mr. Macomb and his heirs forever the Sole and exclusive use of the Water dammed—A grant which at no great distance of time will probably be of exceeding great value."—M. C. C. (1784-1813), IX: 83.

The board of health urges the people to be vaccinated in order to prevent the spread of smallpox, which has appeared in the city. Six physicians are to visit the various houses and offer to inoculate the inhabitants free of charge. New York Dispensary at the corner of Broadway and Chambers St. will also be open from nine until six.—N. Y. Eco. Post, Ja 3, 1816. See Ja 29, 1816.

At a general meeting held at the City Hotel, a memorial to the legislature is adopted in favour of a canal from Lake Erie to the Hudson.—N. Y. Eco. Post, Ja 2, 1816. See also F 19, 1816.

1816

In this year, a new American power-loom was invented and put in operation in Boston by E. Savage.—Winsor, Mem. Hist. of Boston, IV: 85.

In this year, the Provident Institution for Savings, the first savings-bank in the U. S., was established in Boston.—Winsor, Mem. Hist. of Boston, IV: 166.

In this year was published what appears to be the first of a series of pamphlets, which appeared annually through 1849, entitled Names and Places of Abode of the Members of the Common Council, and of the Officers Who Hold Appointments under them, &c. &c. The complete series, excepting the issues of 1817 and 1865, is owned by the N. Y. H. S. In the author's collection are those from 1815 to 1840, inclusive. These pamphlets were the precursor of Valentine's Manuals (see 1841), which in turn were succeeded by the City Record of to-day. They contained, however, merely the lists of officials, committees, etc., and sometimes the text of ordinances. For City Record, see Je 24, 1873.

In this year, John Trumbull returned to New York from Europe, having been abroad since 1806. While here, during this last period, he revived the American Academy of Fine Arts at New York; he painted, in a house on the north-east corner of Park Place and Church St., a series of pictures for the cathedral at Washington, and exhibited his works in all of the important cities in the United States.—Dunlap, Hist. of the Arts of Design, II: 53-57, 73: A detailed account of Trumbull's life, together with an estimate of his work and a catalogue of his paintings, may be found in ibid. (Goodspeed ed., 1918), II: 17-76.

In this year, Wm. J. Bennett, the well-known artist and engraver, came to New York from England. As an engraver he worked principally in aquatint, and produced a large number of fine views, many of points of interest about New York. He died here in 1844.—Stauffer, Am. Engravers on Copper and Steel, I: 19-20. See also Dunlap, Hist. of the Arts of Design, III: 45-47. For examples of Bennett's work, see Pls. 98, 104-5, 104-b, 114-b, 114-b, 116, 117; and A. Pl. 18-b, Vol. III.

An oddly shaped building, commonly called "the pulpit," the property of Bishop Benj. C. Moore, and occupied as a residence by D. Titus, stood at this time in Greenwich Village, at 20th St., between Eighth and Ninth Aves.—See view in Man. Com. Coun. (1818), 88.

For view of the "White Conduit House," in Leonard St., bet. Broadway and Church St., in 1816, see Man. Com. Coun. (1827), 420.

For view of the Fly Market, cor. Maiden Lane and Front St., in 1816, see ibid. (1837), 542.
1586

THE ICONOGRAPHY OF MANHATTAN ISLAND

1816

The name of Sugar Loaf Street is changed to Franklin Street.

Jan.

in honour of Benjamin Franklin.—M. C. C. (1784-1831), VIII:

395.

"The common council resolves to remove the Fly Market, and to build a new market on the "Block east side of Beekman Slip to Crane Wharf between Front Street and the River."—M. C. C. (1784-1831), VIII: 391-971. N. Y. Est. Post, Ja 9, 1816. This was the beginning of Fulton Market, which, however, was not built until 1821 (q.v., Mr 12).—L. M. R. K., III: 959. See also Ja 29, Ag 6, and O. 7, 1816 and M 24, 1817.

10

Use Freeman, city surveyor, makes a "Map of Inklenberg."—See map no. 38 in real estate bureau, comptroller's office.

17

At a meeting of merchants and other citizens at the Toonie Colley House, a committee previously appointed reports that the "telegraph" invented by Christopher Colles is superior to all others examined by them, including the English and French. A committee is appointed to recommend the Colles telegraphs to the common council, and merchants and others are urged to subscribe for their establishment in New York.—N. Y. Est. Post, Ja 18, 1816. See Ag 12.

19

Owing to the alarming spread of smallpox (see D 25, 1815), the common council, cooperating with the city dispensary, appropriates $1,000 for purposes of free vaccination.—M. C. C. VIII: 409-8. On March 11, it urged that publicity be given to the benefits and opportunities for vaccination. An article prepared for this purpose was ordered inserted in the papers published here.—ibid., VIII: 409-8.

"The common council adopts a memorial to the legislature asking that a law be passed authorising the corporation to take possession of the land at Beekman Slip for a market (see Ja 8), and to pay for it out of the city treasury.—M. C. C. (1784-1831), VIII: 411-12. The law was passed on March 29.—ibid., VIII: 472-73; XI: 338. See Ag 6 and O. 7.

The common council directs that the watch-house at No. 1 Broad St. and the lot on which it stands be sold at auction, and that a survey and map of the ground be made.—M. C. C. (1784-1831), VIII: 412. The property brought $11,300.—ibid., VIII: 427-28. This was probably the highest price paid for real estate on Manhattan Island up to this time. The watch-house was demolished in this year.—L. M. R. K., III: 973.

Feb.

The Battery, "which was intended as a promenade for the recreation of the citizens, and was, last summer, tastefully laid out at great public expense [see Mr 26, 1815], is now become a place for strolling cows to pasture in, and for hogs to root up into a thousand furrows."—N. Y. Est. Post, F 5, 1816.

12

Jacob Radcliffe is reappointed mayor of New York.—N. Y. Est. Post, F 15, 1816

13

It is resolved that, immediately after May 1 next, the following streets be opened: Second Ave. from North St. to 29th St.; Ninth Ave. from Greenwich Lane to the northerly side of 28th St.; 28th St. from Ninth Ave. to Hudson River; Tenth Ave. from 28th St. to northerly side of 71st St.; Eighth Ave. from Greenwich Lane to Harlem River; Hudson St. from near Light St. to Spring St.; Chapel St. near Leonard St.; Elizabeth St. to Bleecker St.—M. C. C. (1784-1831), VIII: 420-21.

15

It is recommended to the common council that St. George's Square be extended and, for that purpose, that the houses and lots at the junction of Pearl and Cherry Sts. be taken according to statute from a line beginning at a distance of 16 ft. from the westerly corner of the house occupied by the Hon. De Witt Clinton and extending 12 ft. from the westerly corner of Franklin St. This is approved.—M. C. C. (1784-1831), VIII: 428-29.

"The common council addresses a memorial to the legislature in favour of constructing a canal from Lake Erie to the Hudson.—M. C. C. (1784-1831), VIII: 439-32; Assemb. Jour., 39th sess., 232. See Ap 17.

26

"The "University School Union Society" is organized at the City Hotel.—N. Y. Est. Post, F 6, 7, and Mr 23, 1816; Man. Com. Coun. (1858), 620.

28

The common council accepts the first number of the City Hall Recorders, edited and sent by Mr. N. Phillips.—M. C. C. (1784-1831), VIII: 443-44. The Recorder contained "Reports of the various Trials of the Criminal Courts." It was published in six volumes from 1816 to 1821.—Roerich, Ch. of Am. Pol., 1820-1852, p. 612; Sahin, No. 44440.

Mr 1

The legislature provides for extending Hudson St. northward from Greenwich Lane to Ninth Ave.—Laws of N. Y. (1816), Mar. chap. 28.

Lieut. Francis Hall, an officer of the British Army who is visiting America, writes concerning New York: "The houses are generally good, frequently elegant, but it requires American eyes to discover that Broadway competes with the finest streets of London or Paris. New York is reowned to contain at present about 100,000 inhabitants, and is spreading rapidly northward. I was told that 2000 houses were contracted for, to be built in the ensuing year. There are fifty churches, or chapels, of different sects; a proof that a national church is not indispensable, for the prevalence of religion.

"There is a small museum in New York, the best part of which is a collection of birds, well preserved; and the worst, a set of wax figures, among whom are Saul in a Frenchman's embroidered coat, the Witch of Endor in the costume of a House-maid, and Samuel in a robe de chambre and cotton night-cap. . . . It would be ingratitude to quit New York without mention of its erudite and right pleasant Historian, Diedrich Knickerbocker, whose history of the first Dutch governors of the settlement deserves a favored niche by the side of the revered Cid Hamlet Benangeli, and the facetious Biographer of my Uncle Toby."—Hall, Travels in Canada and the U. S. in 1816 and 1817 (London, 1818), 10-19.

The common council orders that the fence around Chatham Park be removed and the ground now enclosed be regulated and parceled.—ibid., VII: 1816-1817, VIII: 459-60.

"The Great & growing population of the 4th 6th & 7th Wards of our City" makes it necessary to enlarge Catharine Market.—M. C. C. (1784-1831), VIII: 449-50. See also De Voe, Market Book, 349-50.

"The corporation counsel is directed by the common council to take legal measures for the extension of Beekman St. which will open a direct communication to the river.—M. C. C. (1784-1831), VIII: 453.

At a meeting of the trustees of Columbia College, a committee is directed to inquire whether "an eligible site for a College" can be found "at a distance from the City not greater than Art. Street." The committee reported on May 6 and was authorized to "negotiate for the purchase of the representatives of Anthony A. Bleecker deceased, of a piece of ground near Colonel Varick's place, containing thirty-two lots." Two weeks later the committee informed the board that the property could be bought for $900 a lot. This price was considered too high, and the matter was dropped.—Hist. of Columbia Univ., 1754-1904, 107.

The finance committee and comptroller present to the common council a plan for improving the public property on Hudson River between Dry St. and Partition St. The board approves the following recommendations: "to fill up the Basin between Dry & Partition Streets to the permanent line of West Street to cause to be erected (in conjunction with the Proprietors of the water right adjoin the corporation property on Dry St.) a Pier extending & not exceeding 350 feet into the river from the line of West Street also a Pier from about the center of the said Basin extending on Hudson River about feet and to prolong the present Piers in front of Washington Market to correspond with those first mentioned and further to complete West Street from the Basin aforesaid as far North as the Corporation property extends. . . . It is estimated that the "square of ground (when made) bounded by West, Washington, Dry, and Partition, Sts, will embrace twenty of the most valuable building Lots for Stores in this City."—M. C. C. (1784-1831), VIII: 463-64.

As the subject of supplying the city with an abundant supply of pure and wholesome water is "highly interesting to the comfort and the health of the Inhabitants," the common council appoints a committee "to consider and report upon the propriety of making an application to the Legislature at their present Session to invest the Mayor Aldermen & Common Council of this City with all the necessary powers & authority to carry the measure into effect."—M. C. C. (1784-1831), VIII: 464-65. No report of this committee appears in the minutes. See also Man. Com. Coun. (1845), 217. See Ag 9, 1819.

The city expends $8,196 for filling in the Albany Basin.—Apr. 8, 1816; comptroller's office.

The Second Bank of the United States is established at Philadelphia by act of congress. The charter is for 20 years.—Laws of
U. S., 11th cong., chap. 44. The New York branch was opened in this year at 65 Broadway and remained there until 1824 (q. v.). See Ap 14—L. M. R. K., III: 924; descrip. of Pl. 8r-b, III: 550. See Mr 23, 1822.

Brooklyn is incorporated as a village.—Laws of N. T. (1816) chap. 95. See N 26, 1846.

The legislature appoints Stephen Van Rensselaer, De Witt Clinton, John Jacob Astor, Joseph Ellicott, and Myron Holly as commissioners for establishing the Erie canal, directs them to have the proposed route of the canal explored, and appropriated $20,000 for the work.—Laws of N. T. (1816) chap. 237. See Ap S, 1812, and Ap 15, 1817.

The Bellevue committee reports that the new almshouse, the penitentiary, and all the buildings connected therewith are ready for occupation. See Ap C (1816-1817), VIII: 488-189. See Ap 29. See also L. M. R. K., III: 933 (Bellevue Hospital), and 973 (Alms-house). The almshouse was completed in Dec. 1817 (q. v.).

Rev. John Stanford delivers a discourse entitled "Divine Benevolence to the Poor" before the corporation on the opening of the chapel in the new almshouse at Bellevue. He traces the history of charities in New York, and describes the almshouses of the city since the Revolution. The original MS. is in the N. Y. H. S.; also the same in pamphlet form (1816), of which 500 copies were printed for the corporation, and 100 copies for the use of the author.

See Mr 26, 1816.

May

Messrs. Vanderlyn, Colles and Milbert, have the honor to announce that they have established in this city an Academy of Drawing & Painting."—N. Y. Ev. Post, My 1, 1816.

The American Bible Society is organized at the city hall by delegates from existing local Bible societies (of which there were nine in 1817—see Blunt's Stranger's Guide, 2nd ed.), for the purpose of increasing the circulation of the Bible. Its seat of operation was later a four-storey brick building at 115 Nassau St. between Ann and Beekman Sts., built in 1820. For full account of the beginnings of this work (under the presidency first of Elias Boudinot, and then of John Jay), see Goodrich, Picture of N. T., 316-18. See further, JI 19, 1816 also Disturnell, N. T. As It Is, In 1837, 75; Belden, N. T. Past, Present & Future (1849), 162; and The Centennial Hist. of the Am. Bible Soc., by H'y O. Dwight (1816).

The common council directs that leases for rooms in the old almshouse be executed to the New York Society Library, Literary and Philosophical Society of New York, New York Historical Society, New York Academy of the Fine Arts; John Girronis, professor of chemistry; John Scudder, proprietor of the American Museum; certain gentlemen as trustees for the United States Military and Philosophical Society.—M. C. C. (1784-1813), VIII: 596, 515. See Je 13, 1815, and N 18, 1816.

Between this date and Nov. 5 payments amounting to $1,475.57 were made to James Vincent and S. Baxter for filling Collect Lots.—M. C. C. (1784-1813), VIII: 548, 582, 609, 611, 643, 673.

An extensive report on the subject of gas-places is presented to the common council, in which the manner of making gas is explained and the gradual increase in its use both in Europe and America is traced. Its economical advantage is also urged, the saving being estimated as exhibiting a relation between "Gas lights & Tallow lights about as 1 to 5." The report closes with the following resolution, which the board approved: "Resolved that a select committee be appointed with power to institute an experiment on gas lights upon the Plan under the Superintendence of Mr Robert Hare and that a sum not exceeding five thousand Dollars be put at the disposal of said Committee to carry the same into effect, . . ."—M. C. C. (1784-1813), VIII: 553-57. See F 19, 1817.

A citizen addresses the following open letter to the common council of a city, such as New York, situated in a warm climate is of the first consequence. This cannot be obtained without common sewers, constructed some depth under the surface. These, however, could not be kept clean in such a level city as New-York, without a strong current of water being occasionally introduced into them, to sweep off the impurities. If . . . If an hydraulic machine, such as New-York, situated near the end of one of the wharves off Pekel-stip, any quantity of water required might be sent up by force-pumps, from thence to a reservoir, which might be built on the highest part of the city, say near the Federal-Hall or Alms-House. The machinery could easily be worked by the tide in the East River, which runs sufficiently strong for that purpose. Once in twenty-four hours, each street could have its common sewer washed out and all its filth and impurities carried off into the North and East Rivers. . . .—N. Y. Ev. Post, Je 26, 1816.

The county-seat of John Jacob Astor near "Hunt-Gut" burned to the ground.—N. Y. Ev. Post, JI 8, 1816; L. M. R. K., III: 948.

The common council agrees to pay $1,100 for making a road through Eighth Ave. from "the Kingsbridge Road at 121st Street to the Highway that leads to Macombs Bridge," and $500 for "altering the ascent of the Hill on this side of the Bridge so as to give an easier draft."—M. C. C. (1784-1813), VIII: 581.

The independence of the Argentine Republic is proclaimed.

Winnor, VIII: 332.

At this time, the monument, erected in 1816 (q. v., D 2) at Weehawken to the memory of Alexander Hamilton, was "still standing . . . but was shockingly mutilated. Nearly every projecting corner of the stones had been broken off and carried away by curiosity hunters, who seemed to consider the monument common property."—Morehouse, "A Boy's Reminiscences," in Pask's Old N. Y. T., I: 339-40. Before the autumn of 1821, the monument had entirely disappeared.—Stansbury, A Pedestrian Tour of Two Thousand Three Hundred Miles, in N. Am. (N. Y., 1822). See also descrip. of A. P. 20-4, III: 877.

The Bloomingdale Reformed Dutch Church (see JI 21, 1814) is to be dedicated on this date: it is a "new stone building situated near the five mile stone."—N. Y. Ev. Post, JI 31, 1816. The property on which it was built was a part of the old Somerindyke Farm on the Bloomingdale Road at about the present 68th St.—See Wm. Bridges' survey of the farm (1805-1817) in tin tube No. 166 in real estate bureau, comptroller's office. See also L. M. R. K., III: 914. The matter of telegraphic communication is the subject of a committee report and, although no definite action is decided upon, the common council votes to pay Christopher Colles $150 for his services.—M. C. C. (1784-1813), VIII: 668-9. See also ibid., VIII: 424, 415, 450.

The public is respectfully informed that the [Parl] Theatre will be opened on Monday, the 2d September. Preparations have been making during the last season and the recess, for various and extensive alterations, which have been suggested to the Managers by their own experience, or offered by their friends as likely to increase the pleasure, the comfort, or the convenience of the audience. An entirely new plan of decoration has been completed for the interior of the house, and the effect produced, is more striking and brilliant than any heretofore seen in America. The owners of the Theatre professed their extreme desire to see the front of it ornamented, but liberally declined appropriating any part of their enormous rent for that purpose—It has been done at the expense of the Managers; and, they trust, the public will duly appreciate their motives in making a heavy expenditure to ornament property not their own.

"Messrs. Robins and Holland, with able assistants, are permanently engaged for the Painting Department; and, the well known character of these artists must insure a rich display of scenic excellence. Mr. Hewitt, formerly of this Theatre, will lead the band."—N. Y. Ev. Post, Ag 26, 1816. See also ibid., S 3, 1816.

See further, S 4.

It is resolved to construct a road through Eighth Ave. from Greenwich Lane to the Old Road at 121st St, at a cost not to exceed $14,000.—M. C. C. (1784-1813), VIII: 618-19, 628.

A correspondent says in regard to the newly decorated Park Theatre (see Ag 26): "It literally presents the gaiety and elegance of a drawing room, without any alloy whatever of gaudiness. The fronts of the boxes are most tastefully decorated with classical ornaments relieved in gold upon a white ground, and the unity of this presentment, relieved by the simple fancy of the boxes a delicate peach blossom tint. The columns, ostensibly appearing to support the different tiers, give the effect of gold which
THE ICONOGRAPHY OF MANHATTAN ISLAND

1816 not only contribute to the richness of the whole, but admirably
4 impress, from their massive appearance, the purpose of support to
they which are appropriated. The dome is ornamented in harmony
of colour and consistency of design with the other parts, forming
on the whole the most chaste and pleasing finish that we can
imagine the place susceptible of receiving, certainly exceeding all
we have before witnessed in similar situations....

"Added to improvements too various to dwell minutely upon,
we were presented with a new drop curtain of Grecian architectural
design, most admirably executed; certainly a desirable substitute
in a classical theatre for the landscape drops we have been accus-
tioned to."

—N. Y. Eve Post, S 4, 1816.

The common council resolves "that the establishment of the
Signal Poles be discontinued at the expiration of the term of
the present contract, with the Merchants, Proprietors of the same."

—M. C. C. (1784-1831), VIII: 650.

"It is resolved that the names of the streets at present called
Beekman Slip, Fair St, and Partition St. be changed to Fulton
St. in honour of Robert Fulton, the new numbering to begin at
the corner of South St.—M. C. C. (1784-1811), VIII: 676. Beek-
man Slip was the continuation of Fair St. from Pearl St. to the
East River. Partition St. was the name of the present Fulton
St. west of Broadway. See F 26, 1769; Ap 25, 1803; Mr 14, 1814;

14 The trustees of the American Academy of the Arts, "having
nearly completed their arrangements in the apartments allotted
to them by the New York Institution, by the munificence of
the honorable Corporation of this city, take the earliest opportu-
nity to inform, that a Public Exhibition is contemplated to be opened
early in October next, to which all Artists foreign and native,
both as professors and amateurs, are invited to contribute, by
sending specimens of their talents in their respective pursuits,
as painters, sculptors, architects and engravers, &c.—N. Y. Eve
Post, S 4, 1816. See O 55.

15 The common council agrees to an appropriation of $400 for
the purchase of ground and building a school-house in the neigh-
bourhood of Harlem Heights.—M. C. C. (1784-1831), VIII: 641-
42.

Oct. 1 "The elegant new steam boat Connecticut, of which Capt.
Bunker has taken the command, arrived here yesterday afternoon
[Oct. 1] from her first trip to New-London, having performed it
to the entire satisfaction of the proprietors, and all the passengers.
She is said to surpass any boat that has yet been built in beauty
and strength; and in her run to New-London, overtook and passed the Fulton which had several miles the start.—N. Y. Eve
Post, O 2, 1816. See also Preble, Hist. of Steam Navigation 102,
132, 134.

16 The common council received an invitation from the American
Academy to attend an "Eulogium in memory of the late
Chancellor Livingston the First President of the Academy, to be
delivered by De Witt Clinton Esq" on Wednesday 23 Inst." Tickets are also enclosed for admission to a private view of the
first exhibit of the American Academy of Arts at the New York
Institution (see Je 13, 1815) on Oct. 24 (see O 25).—M. C. C.
(1784-1831), VIII: 657. See also Annuals of the Fine Arts (London,
1819), III: 144-147.

23 This address by Clinton, who was president of the academy at this time, was probably the first one delivered before any academy of arts in the U. S. For the text of it, see Cum-
ing's Historie Annals of the Nat'Acad. of Design, 8-17.

All the printing, advertising, etc. of the common council is
honoured with a homage by The National Advertiser and The
Mercantile Advertiser (morning papers), and The Columbian and The
Commercial Advertiser (evening papers).—M. C. C. (1784-1831),
VIII: 664.

25 The first exhibition of the Academy of Arts is held at the
N. Y. Institution.—N. Y. Eve Post, O 28, 1816.

Nov. 1 James Monroe and Daniel D. Tompkins, Republicans, are
elected president and vice-president defeating Rufus King, Fed-
eralist candidate for president and various candidates for vice-
president.—McKee, National Conventions and Platforms, 16-18.

25 Gouverneur Morris dies at Morrisania. He was buried on the
7th.—N. Y. Eve Post, N 6, 1816.

8 E. Montague, a chevalier of the Royal Order of the Legion of
Honor, New York City: "8th November, 1816—I have already examined this beautiful city (New York), which appears to have been spared by winter; still presenting some
foliage of the Italian poplars which decorate Broadway, the princi-
pal street of New York, and perhaps the most magnificent in the
world[]. The advantageous position of the city, and its proximity
to the sea, render it the best port in America; a forest of masts announce it in the distance, for one of those ports where the com-
merce of the world is concentrated; from whence its riches are
afterwards distributed throughout the interior by means of nu-
merous channels. A vast influx of strangers, gives to New York
that lively air which characterizes several cities of Europe, and
which is not generally the case, I am informed, with the other
American cities: it is large and of a triangular form; some of the
streets are straight, with flat pavements on either side, for the
accommodation of foot-passengers. The houses, for the most
part of bricks, are often required; they consist of two or three
stories, and are decorated by flights of steps, and balconies, tast-
fully arranged, which produce an agreeable effect, while the streets
are built in such a manner, that the stabil and coach houses,
never interfere with the main street. Each idea is divided by two
streets, which usually cut at right angles, and to which the yards
of the mansion adjacent; it seems, that when the city was first
founded, the streets were decorated with poplars and plantains,
nealy all of which have perished.

"I never witnessed anything to be compared with the appear-
ance of Broadway—elegant carriages roll with rapidity the whole
length of the streets; females fashionably attired, parade the flags,
and shops and magazines, as extensive as superbly decorated,
occurs the groundfloor of the houses, being entirely in the
first story. The edifices which I remarked in the city, combine freshness and solidity in their appearance, sometimes accompanied by
elegance; but the architecture is not always in a good style.
The Hospital, the buildings of which are extensive and well-
disposed, presents throughout its interior the greatest degree of
cleanliness: which is no less observable in the prisons."

"The Palace of Justice is a fine extensive fabric of white marble,
which is common enough in this country; it is to be regretted that
this monument, upon which much must have been expended,
should not be well proportioned, being deficient in regard to
development. The churches and towers are numerous, and the latter
being somewhat in the gothic style, produces a very picturesque
effect.

"The Quays, built with carvices, are extremely convenient for
accommodating vessels, but very disagreeable for those who
are only desirous waling to enjoy the beautiful prospect of the
port.

"The Theatre of New York is a fine building. .... No
soldiers of the police are here seen, such duties being performed
by watchmen; upon the least alarm, the houses being easily
assembled, to the number of eight or ten at one spot. being only armed with a
stick; these, in conjunction with the firemen, are empowered to
yield assistance in cases of fires, which are common in some quar-
ters of the city, where many of the dwellings are of wood.

"The commerce of New York is very extensive, its port pos-
sessing an inconceivable advantage over all the others of the United
States.

"Slavery, which is abolished in many other states, is not in
this, and negroes are found in considerable numbers.

"There are some coffee-houses at New York; these establish-
ments, which had their origin in the East, appear to make but a
slow progress on this continent; they are appropriated to persons of
little habits, and every one here is occupied with commerce."—
E. Montague, A Journey to the United States of America and The
West Indies in 1817 (London, 1821). See also O 4, 1821.

The legislature authorises the commissary-general to fill up
the ground surrounding the state arsenal in the city of New York.

On account of difficulty in disposing to advantage of the library
building, the New York Library Society asks the common council
to release from the lease of the apartments assigned them
in the old almshouse (see My 13). The society feels that less care
will be involved in making necessary changes in their old
quarters than in the almshouse. The board agrees to accept the
surrender.—M. C. C. (1784-1831), VIII: 686. On Dec. 9, it
accordingly granted larger quarters in the old almshouse to the
Historical Society of Arts, and John Griscom.—Ibid.,

The common council accepts the invitation of Dr. Samuel
Akerly to attend two lectures on "Inflammable air & its application to economical purposes," at Tammany Hall. The lectures are to be explanatory of the system of gas-lights, successful experiments with which have been completed under the direction of a committee of the board.—M. C. C. (1784-1813), VIII: 692.

"The Forum," composed of members of the bar who debate publicly to improve in the art of public speaking, is opened. The members, limited to 70 lawyers, meet on Friday evenings during the winter at the City Hotel, these meetings being "attended by fashionable and literary audiences, and after the members have been heard on any topic under discussion, the debate is open to the public." There is an admission of 75 cents, and the profits are appropriated for charity.—Blunt's Stranger's Guide, 306.

At a meeting at the City Hotel a plan for a savings bank is adopted and directors appointed.—N. T. Evoc. Post, N 28 and D 2, 1816. See also Memoir of John Girrison, 162, and N. Y. H. Quarterly Bull, April, 1816. The first savings bank in New York was not chartered until March 26, 1819 (9 v.).

The U. S. government buys the store (see F 11, 1814) which was erected in 1813-14 by Eastburn & Kirk on the site of the old city hall on Wall St. (see F 23, 1813). It occupies the building as a custom-house. The grantees are James Eastburn, Thomas Kirk, and John Downe, and the price is $70,000. The ground measures 51 ft. on Wall St. and 112 ft. on Nassau St.—Liber Deeds, CXVIII: 422 (Book 104, p. 370). It was "a handsome building of the highest class."—Blunt's Stranger's Guide (1817), 144. See Pl. 105, also p. 607, Vol. III. The N. T. Evoc. Post (see issues of S 18 and O 28, 1816) is in error in stating that the building was first purchased by John Jacob Astor and by him sold to the U. S.

A destructive fire in the neighbourhood of Water St. and Beekman Slip burns about 25 buildings to the ground and severely damages many others. Nearly 20 firemen are injured by falling timber.—N. T. Evoc. Post, D 4 and 5, 1816.

The large brick building in Broadway, next to Grace Church, belonging to John R. Livingston, Esq. has been leased for a Banking House, for the U. S. Branch Bank.—N. T. Evoc. Post, D 14, 1816. The building was at 65 Broadway.—L. M. R. K., III: 924. In this year, the stock brokers of New York established a more formal organization, and adopted a constitution under the name of the "New York Stock and Exchange Board."—Eames, The New York Stock Exchange, 18.

The rooms where the sessions of the Board were held, from 1817 to 1827, are not easily identified. An early account states that they were first held in the office of Samuel J. Beebe, next in a room in the rear of Leonard Blank's office, and afterwards in a room in the old Courier and Enquirer Building (the present 1894 70 Wall Street). The records of the Board refer only to meeting in 1819 in Washington Hall, to the lease in 1824 of the room, "in the rear of the Protection Fire Ins. Co.," and in 1825 to the lease of "Mr. Warren's room."—Ibid., 26. In 1824, the Protection Fire Insurance Co. was at 41 Wall St., and in 1825, there was a John Warren, broker, at 46 Wall St.—City Directory.

In this year, the General Theological Seminary was founded. For a brief account of its early development, see Man. Com. Coun. (1856), 561-62; and Perry, Hist. of the Am. Episcopal Church, II: 506 et seq. See also 1818 and My 1, 1819.

In this year, the Lyceum of Natural History was formed. It was incorporated in 1818, its first home being in the New York Institution (later known as the "New City Hall")—see L. M. R. K., III: 973, where rooms were assigned for its use by the common council. It remained there until 1828, when it was removed to the city dispensary on White St. For its further developments, see Man. Com. Coun. (1856), 562-63.

In this year, David Longacre issued a map of New York bearing, as an inset, the earliest known reproduction of the Lynne Survey of 1751 (Pl. 27, Vol. I). On Dec. 1, the common council purchased 50 copies of the new map.—M. C. C. (1784-1813), IX: 376.

In this year, a plan of the city of New York, drawn by Thos. H. Puplleton and engraved by Peter Maverick, was published. It is reproduced in Man. Com. Coun. (1852), opp. p. 298.

In this year, Stephen Ludlam made a survey of Augustus and Chambers Sts. It is filed in real estate bureau, comptroller's office, as map No. 86.

First St., opened in this year, passed through the cemeteries of
THE ICONEOGRAPHY OF MANHATTAN ISLAND

1317 St. Stephen's Church and of the Methodist congregation.—Doc. 76. Bd. of Ald., F 4, 1813.

— In this year, the firm of J. & J. Harper, printers and publishers, was established at 32 Cliff St. For the history of this firm, now long known by the name of Harper & Bros., see More than One Human Heart.

Jan. 4. A weekly paper devoted chiefly to Irish intelligence is established by Walter Cox, with the title of The Exile. The last issue located is that of Oct. 18, 1817.—Brigham, A. A. S. Proc. (1917), 415.

27 The committee on arts and sciences presents a lengthy report on the experiments made by Dr. Hare upon lighting by gas. The result is so great in comparison to lighting with oil that the committee do not recommend that the corporation undertake it, although they have no doubt "that individuals or a Company would find it profitable and they would greatly rejoice to see such a Company established."—M. C. C. (1784-1813), VIII: 783-90.

Feb. A motion is passed to regulate the ground between the city hall and the old almshouse and to lay down the whole space in grass and border with trees, the same to be thrown open to the public.

— M. C. C. (1784-1813), VIII: 791-93. N. Y. Ev. Post, F 4, 1817. The North River also was frozen over.—Ibid., Je 29, 1817.

6 Congress authorizes the president to employ John Trumbull to "compose and execute four paintings commemorative of the most important events of the American revolution, to be placed, when finished, in the capitol of the United States."—Acts Cong., 2d sess. of 14th cong. p. 288. The subjects chosen were the "Declaration of Independence," "The Surrender of Burgoyne," "The Surrender of Cornwallis," and "The Recognition of Washington."—Dunlap, Hist. of the Arts of Design, II: 56. "Each picture was to be not less than eighteen by twelve feet, with figures of life size; for which the artist was to receive thirty-two thousand dollars. The execution of this commission occupied him from 1817 to 1824, and in the year last named the four pictures were placed in the Rotunda at Washington, then just finished. — Kingley, Yale College: A Sketch of Its History (1870), II: 152-63.

Trumbull then began a new series of his paintings of Revolutionary subjects, of a smaller size than those in the capitol. These he placed on permanent exhibition at Yale College for an annuity.

—Ibid.

10 Despite the adverse report of the committee on arts and sciences, the corporation council decides that gas be used for lighting the following district: Bowery to Bayard St., Division to First St., Chatham to Duane St., Pearl St. from Chatham to the Friends Meeting House, and the whole of Catharine St., at the rate of $60 annually for each lamp; and that there be three lights to each, of the ordinary length of those used in the Yolde's manufactory, the corporation to bear the expense of conducting the gas from the main pipe to the lamps and of lighting and extinguishing the same.—M. C. C. (1784-1813), IX: 15. See Ag 9, 1813; Je 18, 1816, and Mr 26, 1813.

Stephen Ludiman makes a survey of the Common Lands, following Goerck's map of March 1, 1796 (q. v.). It is filed in real estate bureau, comptroller's office, as map No. 73. See also 1832; and descrip. of A. Pl. 9-b, III: 869.

16 "A Christian" writes to one of the papers that "a few individuals have opened a House for making and delivering Soup gratis to all persons applying, without distinction of age, sex, or condition. This house is situated in Franklin-street, near the Arsenal, and commenced its operations this day. Upwards of 1200 needy persons were supplied; many more would gladly have partook of its bounties but the supply fell short. Arrangements are, however, made for at least double the quantity to-morrow, which will be continued daily, between the hours of eight and twelve o'clock, during the inclement weather."

18 . . . donations of money, meat, meal, or vegetables, will be Feb. received at No. 307 Pearl-street, and applied to the above object. . . .—"N. Y. Ev. Post, F 17, 1817. About 5,000 people were supplied on Feb. 19.—Ibid., F 19, 1817. The distribution continued until March 9. In all, 103,512 raisings consisting of a pint and a half each were furnished, and contributions amounting to $1,972.82 were received.—Ibid., F 20, 21, 24, 25, 26, 28; Mr 1, 2, 4, 5, 6, 7, 8, and 10, 1817.

Times are so hard that a general meeting is held at the City Hotel, and ten committees are appointed to solicit subscriptions in connection with the various works for the relief of the poor.—N. Y. Ev. Post, F 18, 1817. The sum of $957.50 was collected the first day.—Ibid.

The banks resumed specie payments on this day.—N. Y. Ev. Post, F 18, 1817.—McMaster, Hist. of the People of the U. S., II: 380-381. They had been suspended on Aug. 31, 1814 (q. c.).

Gov. Daniel D. Tompkins sends to the trustees of Columbia College the following recently adopted resolution of the Regents: "Resolved that it be and hereby is recommended to the Trustees of Columbia College to unite in a consolidation of the funds and property of said College with those of Washington College on Staten Island for which a Conditional Charter has been granted; if the consent of the Corporation of Trinity Church can be obtained, and that it be further recommended to the Trustees of said College, if they appear proper to negotiate with the Corporation of Trinity Church the terms upon which said Corporation will agree to relinquish the conditions in their grant to Columbia College, which fix the site of said College in the City of New York, and require that the President shall be a member of the Protestant Episcopal Church, and report the result to the Regents that it may be submitted to the Legislature at their present session." A committee of the trustees reported against the suggestion on March 27, and the report was unanimously approved.—Hist. of Columbia Univ., 1752-1904, 107-4. See also Ag 26, 1820.

The common council approves a plan for regulating the village of Greenwich, "the growing portion of this City." Low lands in and about the village make the regulation necessary. Plans are made to convey water through certain streets, by surface drainage as much as possible, and eventually by a common sewer to the river.—M. C. C. (1784-1813), IX: 33. As many of the landowners in Greenwich remonstrated against the plan (ibid., IX: 605), the corporation agreed to modify it (see O 5, 1818). See also A Plan Statement . . . by a Landholder (N. Y., 1818).

James having copied, by permission of the Steuvens family, a portrait of Peter Stuyvesant, which he hopes the Corporation may wish to place in its portrait gallery, the comptroller is ordered to issue a warrant for $100 in payment for it. An interesting feature of the record is a space left for Stuyvesant's Christian name, suggesting a curious ignorance on the part of the clerk.—M. C. C. (1784-1814), IX: 36.

Between this date and Aug. 13, the common council paid $1,625.42 for filling at the Collect.—M. C. C. (1842-1851), IX: 37, 94, 120, 178, 218, 261.

James Monroe's first term as president of the United States begins. Daniel D. Tompkins of New York is the new vice-president.—Winor, VII: 279, 344; N. Y. Ev. Post, Mr 7 and 8, 1817.

Cornelius Ray, president of the Chamber of Commerce when meetings were held in the "Long Room" of the Tontine Coffee House, was "a Chron. of 150 Years: The Chamber of Commerce of the State of N. Y., 1768-1818, 52-53. See Js 8, 1819.

A committee appointed to investigate the causes of the present state of want and misery among the poor of the city reports to a general meeting at the City Hotel that "the most prominent and alarming cause, is the free and inordinate use of spirituous liquors," and that there are more than 1,000 increased tippling-houses. A memorial to the legislature is adopted urging that the abuse be corrected.—N. Y. Ev. Post, Mr 12, 1817.
Invention and Prosperity: 1815-1841

At this date, $68,716.17 in small change bills are in circulation.

—M. C. C. (1784-1813), IX: 46-47.

17. The name of St. George's Square is changed to Franklin Square, "as a Testimony of the high respect entertained by this Board for the Literary and Philosophical Character of the late Doctor Benjamin Franklin."

24. The counsel of the board is directed to "make the Necessary Application to the Supreme Court for the Appointment of Commissioners of Estimate and Assessment in relation to the ground to be taken for a Scite of the Market at Fulton Street (late Beckman Slip)" (see J8, Ag 6, and O 7, 1816)—M. C. C. (1784-1813), IX: 68. The land, however, lay in an uncertain state, until 1825, when it was decided to sell it, but the resolution was afterwards rescinded.—De Voe, Market Book, 488; M. C. C. (1784-1813), XI: 393-94. Interest in the market was revived in 1821 (q. v., F 5), and it was finally erected.

25. The horse market is complained of by citizens who represent "the Danger and difficulties to which they and their Families are exposed by the moving and exposing Horses for Sale immediately before their Houses &c." The board adopts a recommendation that it be moved up Elm St. from the north end of the arsenal extending on Elm St. to the intersection of Canal St.—M. C. C. (1784-1813), IX: 68. See N 1, 1819.

26. The "Committee on the subject of the Collect Grounds" presents a plan of the street commissioner for regulating the ground of Collect St. (1819), this is read and laid on the table.—M. C. C. (1784-1813), IX: 70. See also ibid., IX: 85.

27. The names of the streets called First, Second, Third, Fourth, and Sixth Sts. on the Commissioners' Map, running north and south in the Tenth Ward, between Division and North Sts., are changed, respectively, as follows: First St. to Chrystie St. in honour of Lieut. Col. John Christie; Second St. to Forsyth St. in honour of Lieut. Col. Forsyth; Third St. to Eldridge St. in honour of Lieut. Eldridge; Fourth St. to Alloa St. in honour of Wm. H. Allen, U. S. N.; and Sixth St. to Ludlow St. in honour of Lieut. Ludlow, U. S. N.—M. C. C. (1784-1813), IX: 71-72. See also L. M. R. K., III: 999, 1000, 1009, 1010.

29. The legislature, revising the act of March 29, 1799 (p. v.), enacts that every negro, mulatto, or mustee, within this state, born before the 4th of July, 1799, shall be free after the 4th of July, 1827; and that every child born of a slave within this state after July 4, 1799, shall be free, but remain a servant of the owner of his or her master, and be taught to read. Provisions regarding emancipation, etc., of slaves are contained in the act.—Laws of N. Y. (1817), chap. 157.

31. The legislature grants to the recommendation that a lease be given to Mr. John Vanderlyn for nine years from May 13, 1817, of a lot at the corner of Chambers and Cross Sts., flocking 50 ft. on Chambers St. and extending along Cross St. to the Humane Society's soup-house, at an annual rent of one pepper corn. On this lot, Mr. Vanderlyn proposes to erect a "Rotunda," a circular brick building 50 ft. in diameter and 30 ft. high with a projection in front and public Taste and do honor to the Institutions of our City." In this building, the young artist, a native of N. Y. State and a painter of recognized talent at bone and abroad, proposes to exhibit certain paintings to the best advantage. In recommending the lease of the lot for this purpose the committee feels that the building, besides being an ornament to the city, "will encourage the Arts and Sciences, charet the public Taste, and do honor to the Institutions of our City." At the expiration of the lease, the ground is to be restored to the corporation, together with the buildings and improvements, free from any charge, for their proper benefit and use.—M. C. C. (1784-1813), IX: 79. On April 14, the width of the lot was increased to 56 ft.—Ibid., IX: 99-100. For an account of the difficulties encountered by Vanderlyn in his enterprise, see Dunlap, Hist. of the Arts of Design, II: 166-65. See also L. M. R. K., III: 974-75.

32. Charles N. Baldwin and Abraham Asten begin to publish semi-weekly a paper called the Republican Chronicle. The last issue located is that of April 22, 1818.—Bingham, A. A. S. Proc. (1917), Apr. 485.

34. Publication of the New-York Daily Advertiser begins. This paper was a successor to the New-York Courier (see JF 16, 1816).—Bingham, A. A. S. Proc. (1917), 403. See also Mr 26.

35. Commissary-Gen. Anthony Lamb writes to Lieut.-Gov. Taylor: The Legislature, at their extra session in November last [see N 13, 1816], authorized me to cause that part of Collect Street which adjoins the arsenal ground in New York, to be filled, agreeably to the regulation of the corporation of that city; and soon after their adjournment, I went down for the purpose of commencing the business, but found that such was the situation of the ground at that time, that it could not be done without manifest injustice to the state.

36. "The place to be filled is a pond, and is part of that formerly called the Collect, of from six to eight feet deep, the bottom of which is a quagmire; the proportion which the state ought to fill, is probably about one half of this pond; if I had commenced the filling last fall, the earth thrown in on the state's part, would have spread over the ground of other persons; it therefore appears to me improper to delay the business, as justice could only be done by a simultaneous filling by all the parties interested, and I found that no arrangement of that kind could be made at that time, in consequence of the absence of the persons who owned the ground on the opposite side of the street to that which was to be filled by the state.

37. I have procured from the street commissioner of New York, an estimate of the probable amount of the expenses requisite to complete the improvements contemplated by the corporation of said city about the arsenal ground, which I have the honor to enclose. . . .

38. "The assistant commissary at New York informs me that the corporation have nearly finished filling the opposite side of Collect street, to that which belongs to the state, and that it is necessary to commence on that part immediately; an appropriation to cover that expense will also be necessary, as well as that of White street, which will probably be opened in a short time. . . ."—Messages from the Governors (ed. by Charles Z. Lincoln), II: 893-96. Regarding the Collect and its filling, see also Pls. 58-8, 58-9; Vol. I, and Frontispiece II, Vol. III, with descriptions, and Map. Com. Gown. (1860), 56-65. For historical incidents connected with the pond, see 17th Ann. Rep., Am. Soc. & Hist. Res. Soc. (1912), 123-24.

39. An act, "respecting navigable communications between the great western and northern lakes, and the Atlantic ocean," authorizing the commencement of canals, is passed by the legislature. By this act, the canal commissioners (see Ap 17, 1816) are empowered to open communication between the Hudson and Lake Champlain, and to connect by canals and locks the Mohawk and Seneca Rivers.—Laws of N. Y. (1817), chap. 262. The Erie Canal was commenced at Rome, N. Y., on July 4 (q. v.). See also Harper's Mag., Aug 1811; and descrip. of Pl. 95-5, III: 592. See, further, S 12 and O 26, 1825.

40. The New York Institution for the Instruction of the Deaf and Dumb is incorporated.—Laws of N. Y. (1817), chap. 264. A school for the deaf and dumb was opened in the New York Institution on May 12, 1818.—Man. Com. Coun. (1858), 611. This was the second institution for the deaf in the United States, the first having been commenced a year or two before in Hartford by Thomas Gallaudet.—Gallaudet, Picture of N. T. (1828), 343. See, further, O 19, 1827.

41. In accordance with a memorial from the common council (see M. C. C., 1784-1813, IX: 50-51), the legislature passes a law to equalize the ten wards.—Laws of N. Y. (1817), chap. 285. A Federalist paper calls this an act "to gerrymander the wards in this city."

42. A map of the Sixth Ward, bounded by Broadway, Chambers St., Old Bowery, and Grand St., drawn by Le Grand Jarvis and dated June 4, 1818, is filed as map No. 205 in real estate bureau, comptroller's office.

43. "We have heard a buzzing rumour that a wish had been ex-
THE ICONOGRAPHY OF MANHATTAN ISLAND

1817 pressed by many persons in New-York, that a ticket for Assembly Apr. 21 so called, because it is to be composed of men, not of this or that party, but of talents capable of duly representing us, and advocating our rights and interests, which have been, so much injured upon the last session. —N. Y. Ev. Post, Apr 24, 1817.

28 An agreement between Great Britain and the U. S. as to naval forces on the lakes is concluded. Each power is to be allowed to keep one vessel on Lake Ontario, two on the Upper Lakes, and one on Lake Champlain.—Winor, VII: 489.

John McCombs, street commissioner, recommends that an ordinance be passed to fill in Lisperd's Meadow, and another "for the purpose of having that part of Canal Street opposite these low grounds filled in to such a height as to prevent Mud being driven into the Street." The former recommendation is agreed to, but the latter is postponed.—M. C. C. (1784-1814), IX: 123-24.

James Orman begins the publication of The Ladies' Weekly Museum, or Polly Repository of Amusement and Instruction. This was a continuation, without change of volume numbering, of the New-York Weekly Museum (see My 7, 1814). It was of octavo size, contained 16 numbered pages to the issue, and had a title-page and index—Brigham, A. A. S. Proc. (1917), 435-54.

A communication is received by the common council from James Rezwick "on the subject of carrying off the Water from Canal Street, and the city was read and laid for consideration."—M. C. C. (1784-1814), IX: 129.

John Palmer, an Englishman lately arrived at New York, writes: "Several of us took lodgings at Greenwich, a pleasant and populous suburb of New York. Price of board and lodging, five dollars, or eighteen shillings sterling, per week. At the best taverns and boarding-houses in the city, you cannot be boarded and lodged under two dollars per day.

"The things that most struck me on my first walks in the city, were the wooden houses, the smallness, but neatness, of the churches, the coloured people, the custom of smoking segars in the streets, (even followed by some of the Children,) and the number and nuisance of the pigs permitted to be at large; as to the latter, it is much like a large English town."—Palmer, Journal of Travels in the U. S. of North Am. and in Lower Canada, Performed in 1817 (London, 1818), 6. "In the city of New York, on a moderate Calculation, several thousand pigs are suffered to roam about the streets, to the disgrace of the corporation and danger of passengers. A law was passed, prohibiting their being at large after January, 1818, but before it went into operation, it was repealed. (footnote)

The walls of the old Methodist Church on John St. are demolished, and the corner-stone of a new edifice is laid on the same site.—Hist Mag. (1896), 2d ser, V: 1431 L. M. R. K., III: 930. See also descript. of Pl. 24-3, I: 238. The new church was opened on Jan. 4, 1818 (q. 2).

Various legislative measures have delayed the collection of the assessment. In Canal St., which contains the ditch for draining adjacent low lands into the Hudson River. The canal committee reports to the common council that, of the $11,750.54 assessed upon individual property-holders, only $13,150.90 has been collected, leaving still due $9,899.64, upon which interest is to be charged from June 19, 1812. The board votes that the collection be made forthwith and that Noah Jarvis, the former collector, be reinstated.—M. C. C. (1784-1814), IX: 171-75.

"Chester Jenings" announces that he has taken the City Hotel. He says: "The shops are converted to the use of the hotel, and thus the former gloomy appearance of the interior is changed to a delightful view of Broadway, ..."

In addition to twenty new apartments, the large room lately occupied as a book-store, is now an elegant dining-room, 80 feet in length, connected with another of 45, forming an L, 80 by 45 feet. The square front door continues to be the public entrance, and communicates with the gentlemen's apartments.

June 7 The north front door leads to the apartments particularly designed for the accommodation of travelling parties of ladies and gentlemen. An elegant drawing-room, numerous private parlours and bed-rooms contiguous, are exclusively appropriated to this purpose.

"A fashionable circulating library, and splendid reading-room, are directly opposite, and will serve to occupy a leisure hour. ..."

—N. Y. Ev. Post, Je 7, 1817. This ad is accompanied by a large wood-cut view of the hotel. Cf Ap 24, 1807. See also descript. of Pl. 253, III: 689. See, further, Ji 20, 1827.

President Monroe, on a tour of the northern and eastern states, arrived at his home of Vice-Pr. Tompkins on Staten Island. "He was complimented on his landing from the steamboat salutes from the revenue-cutters and from the batteries."—N. Y. Ev. Post. Je 10, 1817.

President Monroe lands at the Battery, and after reviewing the line of troops there, proceeds up Broadway to the city hall, where he is welcomed by the common council and the Cincinnati. The board orders him at Gibson's Hotel in Wall St., and appropriates the picture room in the city hall for his use in receiving visitors. In the evening the Park Theatre, Scudder's museum, and the city hall were illuminated in his honour.—M. C. C. (1784-1814), IX: 194-97; N. Y. Ev. Post, Je 11 and 12, 1817. See also Life & Correspondence of Rufus King, VI: 71-73. See Je 12.

President Monroe visits Governor's, Ellis, and Bedloe's Islands, and "then passed up the east river to the navy-yard." After receiving company at the city hall, he went to the Academy of Arts, the hospital, and the new almshouse and other public buildings at Bellevue. In the evening, he attended the performance at the Park Theatre.—N. Y. Ev. Post, Je 12, 1817.

President Monroe inspects the fortifications at Brooklyn Heights, and on his return was conducted through the city hall by the mayor and most of the corporation. Later he visited the societies in the N. Y. Institution, the Manhattan waterworks, the hospital, the orphan asylu, and the new almshouse. In the evening he attended a meeting of the American Society for the Encouragement of Manufactures, and was unanimously elected a member.—N. Y. Ev. Post, Je 13 and 14, 1817. He visited "the State-Prison, Orphan-Asylum, and Alms-House at Bellevue" under the guidance of Chapmain Stanford, and "was pleasant to express his great pleasure in witnessing the perfect order of the several schools."—Sommers, Memoir of John Stanford, 217-18.

The high price which meats, vegetables, butter, mile, and in short every thing in our market continue to bear, can be viewed in no other light than the greatest imposition on our citizens, and call; certainly for some general measure of redres. Beef is still eighteen pence a pound, butter two and six pence, because last summer there was a great drought, although the present is one of the most growing seasons ever known.—In like manner, our Brooklyn friends got together last July and raised the price of milk one-fourth, because the pasturing was dried up; and finding we bore this well, they had a second meeting, and raised it a second time, because there were spots in the sun; and they still keep it up, still demand the N. P. (new prices), although the pasturing is uncommonly fresh and fine, and although there are no longer spots to be seen in the sun. And as long as the citizens submit to this extortion, so long will it be practised.—N. Y. Ev. Post, Je 14, 1817.

By a vote of 11 to 9, the common council resolves "that an iron fence be constructed in front of that part of the public ground called the Park, commencing at the Engine House opposite Warren Street and running northerly to Chamber Street; thence along Chamber Street to a point in a line with the west end of the New York Institution."—M. C. C. (1784-1814), IX: 206; N. Y. Gen. Ev. Ad., Je 30, 1817.

President Monroe, having returned to New York, spends the greater part of this day in examining the situation of Sandy Hook, "with a view to the establishment there of extensive fortifications. He is accompanied by Gen. Swift and Scott and Commodore Lewis. It must be highly gratifying to our citizens to perceive the active interest the Executive has taken in promoting the arrangements for the defence of this city."—N. Y. Ev. Post, Je 20, 1817.

President Monroe leaves New York for New Haven.—Life & Correspondence of Rufus King, VI: 74.

The "independent chapel" between Mott and Mulbury Sts. and Hester and Grand Sts. is opened for public worship by the Rev. Mr. Frey.—N. Y. Ev. Post, Je 23, 1817. This was the "Independent Congregational Church."—Greenleaf, 354-55. See, Ap 22, 1812.

The common council directs the street commissioner to ascer...
talus as nearly as possible the site of the south-west, or flag bastion of Fort George, and there locate a monumental stone on which shall be marked the latitude as taken in 1769 (9° 11' 0''), and the longitude of the British corps of engineers; to employ a suitable person or persons to find the site of the monument (as far as it may be done in 1818), and one monumental stone near it with suitable inscriptions, from which mileages or distances from the city shall be computed; also that a stone slab be fixed on the top of the city hall cupola with proper marks thereon by which the true direction of the magnetic needle of surveyor's compasses may be regulated and adjusted. —M. C. C. (1784-1811), IX: 216-17.

A marble pedestal was placed at the Battery to mark the location of the south-west bastion of Fort George. The inscription upon it was as follows: "To perpetuate The Site of the S. W. Bastion of Fort George In 1776 lat. 40° 42' 8" N. Latitude as observed by Capt. John Montresor, & David Rittenhouse in October 1769 The Corporation of the City of New York have erected This monument A. D. MDCCLXXVIII." On April 26, 1819, the committee on arts and sciences was authorised, if found expedient, to take the monument down, and to place on its foundation the marble slab previously resting on the top of the monument. —M. C. C. (1784-1811), XI: 364. During the excavation in laying the subway, this landmark was unearthed (see JL 30, 1854) and reinstated through the action of the American Scenic and Historic Preservation Society and the New York Historical Society.—Peterson, Landmarks of N. Y., 21.

A New Yorker writes to a friend in Richmond, Va.: "I must relate to you a very novel case of good fortune. Some years past, the unfortunate col. Aaron Burr, sold to John Jacob Astor, a certain property (at that time out of this city, and I believe, his country house) [Richmond Hill] for the sum of forty thousand dollars—reserving the right of returning it at any time within twenty years, by paying the principal and interest. One day in the early part of this week, col. Burr tendered the money to Mr. Astor, and demanded his property, (now become invaluable) which Mr. Astor declined receiving: col. Burr then demanded one hundred and fifty thousand dollars—Mr. Astor required three days to decide; and yesterday I had it from unquestionable authority, that they had compromised, by Mr. Astor's paying colonel Burr $100,000 in cash, by checks on the Bank of the United States." Though Astor denied the truth of this story, it was the subject of conversation in New York for several weeks.—N. Y. Ev. Post, Jl 14, 1817.

De Witt Clinton takes the oath of office as governor of New York, Mr. John Taylor is the lieutenant-governor.—N. Y. Ev. Post, Jl 3, 1817.

Scudder's museum has been removed from 21 Chatham St. to "the New York Institution" (see Je 13, 1816).—Com. Adv., Jl 3, 1817. See Ag 12, 1820.

The Erie Canal (see Ap 15) is commenced at Rome N. Y.—Colden's Memoir, 47-49.

The name of George St. is changed to Spruce St.—M. C. C. (1784-1813), IX: 228-29; L. M. R. K., III: 1000.

As Front St. is a continuation of South St., it is hereafter to be known as South St. as far as Gouverneur's Slip.—M. C. C. (1784-1813), IX: 231.

The grand jury censures the mayor and corporation for gross neglect in the care of the city. The presentment drawn refers to the "pools of stagnant water, carcasses of dead animals, and large heaps of street manure, which are suffered to remain in the very heart of this populous city," the prevalence of forestalling in the public markets, and the inadequacy of the accommodations in the jail and city prison.—N. Y. Ev. Post, Jl 18, 1817.

"A Citizen" writes to one of the newspapers: "There is a mixture of meanness and magnificence that seems to have entered into the character of our city, as well as its appearance. Our honorable corporation, with a commendable desire to raise the reputation of the city by the splendor of its literary and philosophical institutions, are yet content that the latitude of the city hall (26° 41') is too low, and that still remain below the zero of civilization—or perhaps their love of distinction may be gratified, in its being superlatively entitled to the appellation of the filthiest city in the United States, if not in the world... Some idea of the cleanliness of the more obscure parts of the town may be formed from what one sees in Broadway, that elegant avenue, the praises of which our cockneys are never tired of celebrating. In this centre of taste and fashion, and what not, I counted fifteen pigs feeding upon garbage in the space of twenty rods, and twenty-six more full in sight; not to mention dogs, goats, etc., that are everywhere..."

July 22

A petition from the purchaser of the ground on which the government house formerly stood (see My 25, 1815), opposite Bowling Green, requesting that the block of houses thereon erected may be named "Bowling Green," and the houses numbered, from the east at the corner of Whitehall, is approved by the common council, and the superintendent of streets directed to cause the houses be numbered accordingly.—M. C. C. (1784-1813), IX: 289, 246. See also descrip. of Pl. 156-b, III: 838.

The canal committee reports to the common council "on the subject of regulating Canal and Collect Streets," and the report is referred back "with a request to report the distance, which the water can be carried on the surface of the streets; the length and size of the sewer, the coat of filling and paving, and making the Sewer, and the means of raising the money for completing the same."—M. C. C. (1784-1813), IX: 246; descrip. of Pl. 83-b, III: 862. See Je 29, 1818.

John Quincy Adams arrives in New York, after an absence of eight years abroad as United States minister to Russia and to Great Britain. He was entertained at a public dinner at Tammany Hall on the 11th inst., and on the following day dined "with the Mayor and the City Corporation at Bellevue six miles out of the city." On the 14th inst. he wrote that he "called upon Mr. Trumbull and found him with the frame for his large picture of the Declaration of Independence upon which he is just preparing to begin."—Memoirs of John Quincy Adams, ed. by Charles Francis Adams (1875), IV: 3-4.

Henry Fearon, an Englishman visiting America, writes to his friends about New York: "The wholesale stores which front the river, have not the most attractive appearance. The carts are long and narrow, drawn by one horse; the hackney coaches are open at the sides, being suited to this warm climate—lighter and much superior to ours: the charge is 25 per cent. higher than in London. The streets, through which we passed to Mrs. Bradish's boarding-house, in Street-street, opposite the Battery, were narrow and dirty. The Battery is a most delightful walk, on the edge of the bay. The houses in Street-street are of the first class. The one in which I am now writing is about the size of those in Bridge-street, Blackfriars. The rent is 2400 dollars (350 l. sterling) per annum; taxes about $80 dollars (18 l. sterling). The house was built for those who do not keep house, is in hotels, taverns, or private boarding-houses. . . . The expense of living here is about 18 dollars per week. There are here at present, the celebrated Commodore Rogers, and several other naval officers; among whom are Decatur, Warrington, and Biddle, all of whom distinguished themselves in the late war: also Mr. Graham, the under-secretary of state, and Mr. Brackenbridge, author of a history of the late war. . . ."

"The street population bears an aspect essentially different from that of London, or large English towns. One striking feature consists in the number of blacks, many of whom are finely dressed, the females very ludicrously so, showing a partiality to white muslin dresses, artificial flowers, and pink shoes. I saw but few well-dressed white ladies, but an informed that the greater part are at present at the springs of Bath and Saratoga. The dress of the men is rather deficient in point of neatness and gentry. Their appearance, in common with that of the ladies and children, is sallow, and what we should call unhealthy. . . ."

"Several hotels are on an extensive scale: the City Hotel is as large as the London Tavern; the dining, and some of the private rooms, Seen fitted up regardless of expense. . . . The shops (or stores, as they are called) have nothing in their exterior to recommend them: there is not even an attempt at tasteful display. The linen and woollen drapers (dry goods stores, as they are denominated) leave quantities of their goods loose on boxes in the street, without any precautions against theft. . . ."

"The public buildings, of which a few excellent private dwellings are built of red painted brick, which gives them a peculiarly neat and clean appearance. In Broadway and Wall-street trees are planted by the side of the pavement. . . . Most of the streets are dirty; in many of them sawyers are prepar-
1817 ing wood for sale, and all are infested with pigs,—circumstances which indicate a tax police.

9 "... An evening stroll along Broadway, when the lamps are alight, will please more than one at noon-day. The shops then look rather better, though their proprietors, of course, remain the same: their cold indifference may, by themselves, be mistaken for independence.... I disadvantage most decidedly of the omnibus servility of many London Shopkeepers, but I am not prepared to go the length of those in New York, who stand with their hats on, or sit or lie along their counters, smoking segars, and spitting in every direction, to a degree offensive to any man of decent feeling. ...”—Pears' Sketches of America (London, 1818), 6-11.

12 The common council receives a communication from John Randel, Jr., which states that he has "taken the elevations of all the Monuments on the First, Third, Eighth, and Tenth Avenues, South of Hundred and fifty Fifth Street," for which he is to receive, under contract, $2,500; and that he has "deposited in the Street Commissioner's Office a Map containing the Profile and Elevations of the same." He now asks payment for them, and this is made immediately.—M. C. C. (1784-1831), IX: 252-53. See also summary under D 31, 1810.

15 John Jacob Astor pays $208 as rent on water lots. It appears that he is, by far, the largest holder of this form of real estate.—Journal B, 217, comptroller's office.

21 "New Circus," on Broadway near the stone bridge, is opened by Mr. W. D. Eve. Fri., Apr. 11, 1817. Former attempts to establish a circus in this locality had proved unsuccessful.—Blunt, 136. For history of this site, see L. M. R. K., III: 981, under "City Assembly Rooms."

25 By a vote of ten to five, the common council agrees that a market house, §5 25, be erected on a gore of land bounded by Grand, Orange, Collect, and Broome Sts., providing the whole expense does not exceed $7,000.—M. C. C. (1784-1831), IX: 271-72, 281. This became Centre Market (see N 24).

The common council of Philadelphia sends to the New York common council a communication urging measures to guard against the frequent explosions of boilers on steamboats. It is recommended that an inspector of steamboats be appointed, and the board directs counsel to petition the legislature to pass a law authorizing such appointment.—M. C. C. (1784-1831), IX: 269-70.

Sept. "As the reputation of the College, in the view of the public, greatly suffers, from the apparent neglect and decay of its edifices, the trustees of Columbia adopt a plan for the erection of some new buildings and appoint a committee to carry it into execution. They wish to "erect on the old building, a block or wing of about fifty feet square; each wing to contain two houses for Professors, facing the College Green, and projecting beyond the front of the old building, so as to be on a line with the fronts of the houses on the north side of Park Place. The old building, by means of some interior alterations, will afford ample accommodation for the purposes of instruction, together with a Library and a Chapel." The expense is estimated at $400,000.—Hist. of Columbia Univ., 1754-1904, 104-5; Moore, Hist. Sketch of Columbia College, 84. The belfry was added to the college at the same time as the wings.—Halsey, Pictures of Early N. Y. on Dark Blue Staffordshire Pottery, 83, 84. The alterations were completed by Oct. 2, 1820 (9 v.). See also F 19, 1819.

Blunt's Stranger's Guide to the City of New-York is published, containing plans of the streets, and views of the city, almshouses, and state prison. The following extracts show some of the changes and improvements that have taken place since the city's first guide-book was published (see My 2, 1807):

"In extent, New-York city measures, in length, from the West Battery to Thirty first street, about four miles; and in breadth about one and a half mile. Its circuit is 8 miles. The whole of this space is covered with buildings, but the greater proportion of it is....”—Ibid., 34

The number of houses is about 17,000, and the population exceeds 100,000.—Ibid., 34-35.

The streets, including lanes and alleys, amount to 252. Broadway "is the Bond-street of New-York, and exhibits in the shops, on the window sills, an elegant and extensive assortment of every thing useful and fashionable." Wells and pumps "are to be met with in almost every street; these afford an excellent supply of whole-

some spring water to the inhabitants. Most of the private families have also cisterns for rain water in their gardens, which they use in washing clothes. Overseers of the wells and pumps are appointed annually by the magistrates; whose duty it is to cause the wells and pumps to be regularly examined, cleansed, and kept in proper repair under a penalty.”—Ibid., 35-38.

The first fire-insurance company in the city is The New York Fire and Marine, Duane Market, Catharine Market, Spring Street Market, Greenwich Market, Governor Market, and Grand Street Market.—Ibid., 38-41.

"There are no lodging houses or furnished apartments here as in England. Strangers, whether families or individuals, must, on their arrival, board in the place where they lodge. Unfurnished rooms may sometimes be had; but these have been found difficult to procure of late, owing to the rapid increase of the population. The usual time of letting houses is previous to the 1st of May. The following is the list of the Hotels: 1. City Hotel, Broadway. 2. Merchant's Hotel, Wall-street. 3. Mechanics' Hall, Broadway. 4. Tontine Coffee House, Wall-street. 5. Bank Coffee House, Pine-street. 6. Tammany Hall, Nassau-street. 7. Washington Hall, Broadway. 8. Commerce Hotel, Pearl-street.

There are eight markets—Fly Market, Washington Market, Duane Market, Catharine Market, Spring Street Market, Greenwich Market, Governor Market, and Grand Street Market.—Ibid., 38-41.

"The City Hall is the most prominent, and most important building in New-York. It is the handsomest structure in the United States; perhaps of its size, in the world. ...

"At the front entrance there are 5 doors leading in the Lobby, the roof of which is supported by marble columns. To the right and left, there is a gallery stretching to both ends of the building, the floor also of marble. In this story apartments are allotted to the Chancery, Committee room, Common Council office, Street Commissioner's office, Mayor's office, Board of Health, Sheriff's office, City Inspector's office, Recorder's office, Register's office, Surrogate's office, Supreme Court Clerk's office, Clerk of Session's office, county Clerk's office, and house keeper's room in all 14 apartments.

"Three stair cases lead from the first to the second story. The principal of these, is in the centre of the geometrical construction, with marble steps; the other two are in the gallery, one towards each of the ends, of a plain form, and the steps of the same material.—Round the top of the centre stair-case there is a circular gallery, railed in, likewise floored with marble; from which ten marble columns ascend to the ceiling, which here opens and displays a handsome Dome, ornamented in great taste, with stucco, and giving light from the top to the interior of the building. Another gallery, runs in the centre from one end to the other. On this story are the Common Council room, the Governor's room, the Comptroller's room, the Supreme Court. There is a similar room the Mayor's office, Supreme court, United States' District court, and the offices belonging to the clerk of that court, and of the District court.

"The entrances at the ends lead to the basement story, through the middle of which there is an arched passage or gallery, stretching from one end to the other. Opening into this passage are the Marine, or Justice's court, Police office, Jury room, and Watch Office. The common council room "measures 42 feet by 50.—It is fitted up in an elegant and commodious manner for the meetings of the corporation which are open at all times to the citizens. The chair for the mayor is the same that was used by General Washington when he presided at the first Congress, which was held in this city. It is elevated by a few steps on the south side of the room, and surrounded by a curtain and chairs for the city hall, aldermen, and state prison. The following extracts show some of the changes and improvements that have taken place since the city's first guide-book was published (see My 2, 1807):

"In extent, New-York city measures, in length, from the West Battery to Thirty first street, about four miles; and in breadth about one and a half mile. Its circuit is 8 miles. The whole of this space is covered with buildings, but the greater proportion of it is....”—Ibid., 34

"Neither the Mayor nor Aldermen wear any distinguishing dress or insignia of office. ...” The governor's room (see Ap 15, 1814) is appropriated to the use of the Governor of the state, when he visits the city. It is a very handsome apartment, measuring 42 feet by 20. It is in the center of the second story and, from the windows there is a communication with the top of the portico in front of the Hall. This is surrounded by a balustrade, and commands a delightful view of the Park, and surrounding objects. The walls of the room are hung with pictures, among which are the principal naval and military heroes who distinguished themselves during the late war, painted by Mr. Jarvis, a young artist of this city. The others are the work of Trumbull. The whole display great taste and
There are 10 banks in the city, exclusive of the U. S. Branch Bank, and the insurance companies number 11.—Ibid., 151-57.

The Fire Department is an incorporated body. The chief engineer and the fire wardens are chosen by the common council. Fire buckets must be kept at every house and manufactury. "Each bucket holds 2 gallons of water, and must always be suspended and ready to be delivered and used for extinguishing fires when they occur."—Ibid., 157-60.

There are 14 incorporated manufacturing companies in the city and also a society for the encouragement of domestic manufactures.—Ibid., 160-67.

Steamboats have been brought to "great perfection." The number of steam vessels built in the city of New York has under the direction and superintendence, or that of the plan of Mr. Fulton, is 15. Of these the steam frigate Fulton the First is the largest." There are 3 steamboat ferry companies, the Fulton, the York and Jersey, and the Brooklyn.—Ibid., 167-76.

There are no less than 53 places of public worship within the city, besides 52 other establishments, all devoted to religious purposes.

The churches belong to 17 different denominations.—Ibid., 189-204.

Two Docks, called the Albany Basin, and Corporation Docks, are situated on the banks of the Hudson; the former at the bottom of Cedar-street, and the latter adjoining to Washington-market, at the bottom of Fulton and Vesey Streets."—Ibid., 204-9.

Fort Gates at Sandy Hook, Forts Lewis and Diamond at the Narrows, Fort Richmond on Staten Island, Castle Williams and Fort Columbus on Governors Island, Fort Wood on Bedloe's Island, and Crown Fort on Ellis Island protect the harbour from attack. On Manhattan Island are the West Battery, the North Fort, and Fort Garvarent. "East of New-York Island, there is a castle situated on a rising ground, which commands the passage at Hell-Gate, leading into Long-Island sound, besides a battery on Hallett's point, with a blockhouse on Mill-rock."—Ibid., 209-14. See also Palmer, Tour of Travels in U. S. A. and Lower Canada in 1817 (London, 1818), 298-326.

The most northerly point of one of the daily newspapers writes: "We have just learnt with astonishment that Gen. Scott, after informing our corporation what he was about to do, has proceeded to dig away the ground preparatory to laying the foundation of a line of brick buildings, upon the Battery, next the water, and which are intended to serve as soldiers' barracks. The late hour at which we come to the knowledge of these facts, will not permit us to examine on what color of right the claim to appropriate this ground to any such use, rests. It must be strong, indeed, to induce the people of this city to submit to it. This public promenade, surpassed by none on earth for beauty of prospect, united with its elegant walks, and equally valuable for health as for pleasure, has been enjoyed in common by the inhabitants time out of mind, unmolested. It can occasion no surprise, therefore, that they should ask by what authority does any one now venture to encroach upon it? . . . -N. Y. Ev. Post, O, 4, 1817. In consequence of this editorial, Gen. Scott announced that the building, "instead of being intended as a barracks for soldiers, . . . was to be an elegant one story building for the accommodation of the staff officers, and would be an ornament rather than an eye sore."—Ibid., O, 5, 1817. In a letter to the mayor of the same date (Oct. 6), Gen. Scott defended the erection of such "staff offices" on the ground that the grants of the premises to the United States expressly provides that occupation may be for occupations for or other such purposes as the Public may be immediately interested in. If it is "the wish of the Corporation," he adds, he will "recommend it to the Government to exchange the Premises in question for an equivalent in the City."—From original letter in city clerk's record room M. C. C. (1784-1831), IX: 506-7. See O 7.

New York "though less regular, is more sprightly and gay than Philadelphia," wrote E. Montule (see N 8, 1816). "A person
1817 of my acquaintance conducted me near to Long Island, where Oct. 4 the Vapor frigate, built by Fulton. It is 159 feet long, its width appearing to me too large in proportion; the thickness of its sides are complete safeguards against the cannon's force; nor can the interior mechanism receive injury. This species of floating fortification will be of great utility in defending the coast, and in case an enemy wishes to board the vessel, you are enabled in an instant to inundate him with boiling water: it is manned in war time by eight hundred men; it is called Fulton the First: I do not understand that they have undertaken to build any more. — *A Voyage to North Am.*, in 1817 (1821), 102.

7 The common council directs Mayor Radcliff to write to Pres. Monroe that the erection of buildings on the Battery (see O 4) is contrary to the wishes of the corporation of the city, and to request that he instruct Gen. Scott to suspend operations. The board also orders the street commissioner "to take the usual measures to prevent the erection of any Buildings or obstructions on the Battery," and it passes a law "prohibiting the driving of Horses and Carriages on the Battery."— *M. C. G. (1784-1831), IX: 306-10.

On Oct. 8, a number of people collected on the Battery and began to annoy the guards and insult the officers. To prevent trouble, the street commissioner ordered the builder to remove the obstruction, and Gen. Scott agreed to let the matter rest until he heard from Washington. — *N. Y. Ev. Post*, O 7, 8, 9, and 10, 1817.

4 George Graham, acting secretary of war, informed Mayor Radcliff, by letter of O 24, that the presidium has been asked to give up its right to the Battery; it must not relinquish the right of the U. S. to erect such buildings.— *Original letter in city clerk's record-room; M. C. G. (1784-1831), IX: 339-40; N. Y. Ev. Post, N 4, 5, and 6, 1817.

Daniel D. Tompkins, former governor of this state and at this time vice-president of the U. S., enters into the following agreement in regard to running steamboats from New York City. "I hereby acknowledge that it is the wish of the citizens of the State of New York has purchased of them their said right to Shrewsbury, I agree upon their releasing as aforesaid to unite in a conveyance of said right to Shrewsbury to the said Thomas Gibbons to the extent of our grant from the Representatives of Livingston & Fulton to run to Shrewsbury aforesaid—October 11, 1817.

"Witness present
Wm. Gibbons" —From the original MS. in the N. Y. H. S.

3 The 300th anniversary of the commencement of the Reformation is celebrated with services in the German language at the Lutheran Church in the morning and in English at St. Paul's in the afternoon.— *Gaz. Sept.*

31 The first ceremony of the Reformation is celebrated with services in the German language at the Lutheran Church in the morning and in English at St. Paul's in the afternoon.— *Gaz. Sept.*

15 1817: the Tammany constitutions of 1817 (p. 49, Ag 9) are repealed, and new constitutions of 1789 (p. 49, Ag 9) are ratified by the "Grand Council of Sachems," and go into effect. Indian terms are reinstated. The preamble to the constitution states that this action is taken because, "after the adoption of the 1817 constitutions," "a solemn gloom for the long years that the Tammany machine has been in operation;—Freedom and refinement have nearly expired;—a latent spark will soon resume its activity; common understanding and jealousy will be expelled from within the walls of our Antient, our Happy Wigwam; Divine Harmony shall resound her desired existence, which all the genuine Sons of Tammany will again pledge themselves to preserve by Concord;—from photo-stats (made from originals in Tammany Hall) in MSS. Div., N. Y. Pub. Library.

Nov. 15 After the issue of this date, the title of the *New-York Herald* was changed to *New-York Evening Post* for the country.— *Herald*, A. A. S. Proc. (1817), 473-78.

The new market, erected on the corner of land bounded by Grand, Orange, Collect, and Broome Sts. (see Ag 25), is named Centre Market.— *M. C. G. (1817-1818), IX: 566. See also De Voe, *Mark Book*, 1817. See Mr. Wilson.

A number of Irishmen and descendants of Irishmen, headed by Thomas Addis Emmet, meet at Harmony Hall (at the corner of William and Duane Sts.) and agree to form a society for helping immigrants from Ireland. A committee is appointed to prepare a memorial to Congress asking that a tract of land in the Illinois territory be appropriated to Irish settlers.— *N. Y. Ev. Post*, N 27, 1817.

Finally, on Oct. 8, the 8th officers were elected. Thomas Addis Emmet became the first president. The society was called the New-York Irish Emigrant Association.— *Ibid.*, D 20, 1817.

The new almshouse at Bellevue is completed. The total cost, with "appendages" (including the penitentiary) is $421,109.56. — *M. C. G. (1784-1831), IX: 396.

The "Society for the Prevention of Pauperism" is organized at the New York Hospital, under the leadership of John Griscom. — *Com. Adv.*, F 25 and Mr 10, 1817; *Man. Com.* (1828), 625-26. This society obtained a charter for a savings bank, which commenced operations on July 3, 1817 (p. 49). In 1822, it published a Report on the Penitentiary System in the United States; and in 1823, it formed the "Society for the Reformation of Juvenile Delinquents," and established the house of refuge at the junction of the Bloomingdale and old Post Roads, which opened Jan 11, 1823 (p. 49.)—Griscom's *Memoir of John Griscom*.

The common council appoints Alderman Smith and Ogden Edwards to go to Washington regarding the 517,000 due the corporation from the U. S. government. The amount is for awards paid for damages to the lands of private owners in the erection of works of defence in 1814.— *M. C. G. (1784-1831), IX: 407.

The common council employs John Vanderlyn to paint the portrait of Pres. Monroe.— *M. C. G. (1818-1831), IX: 410. See Cat. of Works of Art Belonging to the City of N. Y., 13.

1818 In this year, the congress of Aix-la-Chapelle was held, and the five Great Powers agreed to maintain the general peace.— *Hazen, Europe since 1815*, 59.

Baron Axel Leonard Klinskowstrom, of Sweden, author of the following "Record of Elizabeth Town in the king's navy, a member of the Royal Military Scientific Academy of Stockholm, and a member of La Société pour l'encouragement de l'industrie nationale, of France. In the preface to his *Brief om de Foerena Statera*, Klinskowstrom states that the expenses of his trip to America were borne by the Swedish government, and that for this reason he considered it his duty to pay this debt by acquainting the general public fully with what he had seen. He sailed from France in 1818 and landed at Newport, whence he proceeded down Long Island Sound, passing through Hell Gate. The following extracts of Manhattan interest, translated and given in outline form, are taken from the *Brief om de Foerena Statera*:

"The number of sailing vessels increased more and more after we had passed Hell Gate. The country houses were gratefully built and some of them were to a very noble style of architecture. The white colour of the houses and fences contrasted agreeably with the green parks that surrounded them. Finally the City of New York appeared, with its many ships, and its large harbour, and I can assure you that this picture contained something more fascinating and was so much the more surprising because people in Europe hardly ever have a correct idea of the rapid growth. New York and are not prepared to find so large and populous a city on a coast where 200 years ago there was only an insignificant little town. The appearance of the city from the shore is, in spite of that, not cheerful, because the houses are not plastered, and besides, they are hidden by the ships and their masts, which in double rows lie at the piers and fence the forest almost to the sea, when you approach it, or from the sea, by no means be compared with the beautiful picture which the city of New York offers."
“As soon as the steamboat had reached the shore, a large num-
ber of porters approached the ship to fetch the baggage of the
travellers. These people have placards on their coats, with num-
ber and name, by which one can recognize them. . . [pp. 12–13]

“The houses in New York are as a rule painted according to
the English style, that is to say, a dark tile color with white mortar
lines between the stones. The city would have a very gloomy
appearance if the streets were not so wide and light. Here and
there one finds on either side of the street trees planted. All the
streets have sidewalks, which makes walking easy and agreeable,
and in the newer part of the city the streets are straight, but
seldom cut each other diagonally. In the whole city there is only
one pretty square.”

“About a third of the length of the street [Broadway] from the
Battery you come across a large z-cornered place, which is shaded
by beautiful trees. Here is the City Hall. It is built in a light and
very handsome style. As I have made a correct design of this
place, and of Broadway and Chatham St. [see Pl. 55, Vol. III], you
will get a good idea of this part of New York, which really is pretty.
In the same drawing you will see the costumes worn here and also
all the vehicles, from the elegant coach down to the modest push-
cart, on which the licensed porter is busily transferring the travel-
er’s goods to the harbour.

“Broadway is, besides, the most frequent promenade, where
all new fashions can first be admired. In the cool season, and
when the weather is fine, the young dandies and the fair sex prom-
enade on the sidewalks between 2 and 3 in the afternoon. You then
may see a serious Quaker and Methodist costume and grotesque Dutch dress, which contrast strangely with the
modern costumes.

“Wall Street offers other scenes. There are found almost all
the licensed banking houses. Except for a few shops and private
houses, one finds there only banking and money exchange offices.
As a rule, these are situated below the level of the street, so that
instead of mounting stairs in order to reach the money-lender,
which generally is the case in Europe, one descends a small stair-case which leads into a pretty cosily furnished basement
room.

“At the end of Wall Street is the Tontine Coffee House, which
Corresponds to Lloyds in London, and which is really the exchange
of the city. This building is by no means beautiful an cannot be
compared with our exchange building in Stockholm. In the
neighbourhood of the Tontine all public auctions are held. Large
packages, bundles, and barrels cover the sidewalks.

“Pearl Street contains all the large warehouses. Here every-
things is sold wholesale. The shops are well supplied with goods
and this street is considered the richest, though its appearance is
less attractive than Broadway and Wall Street.

“On the east shore are found the Flymarket and Newmarket,
the largest and best supplied markets.

“New York is not as clean as cities of the same rank and popula-
tion in Europe; in spite of the fact that the police regulations are
good, they are not enforced and one finds in the streets dead cats
and dogs, which make the air very bad; dust and ashes are thrown
out into the streets, which are swept perhaps once every fortnight
in the summer; only, however, in the largest and most frequented
streets; otherwise they are cleaned only once a month.

“As the street cleaning is not done by the owners of the houses,
but by men specially engaged for the purpose, you can easily
conceive the amount of dust raised when 20 or 30 street cleaners
at once start along the street. When it storms the city is enveloped
in a cloud of dust.

“Another circumstance no less dangerous to health is the
fact that pigs are allowed to run loose in the streets. These pigs
have on several occasions caused remarkable scenes, jumping
about here and there and bowing over richly dressed ladies. . .
[pp. 104–114]

“The houses in the city are generally small, but the con-
struction, although not very lasting, is quite pretty. As a rule
the houses have only two rooms that are well furnished. The
bedrooms are all on the top floor and ill protected against the cold.
From the sketches I have added you will get a good idea of the
arrangement of the houses.

“Adjacent to the hotels and restaurants, the City Hotel, Mechan-
ics Hall, and Washington Hall, are the largest. Our restaurants
are very nice, but they cannot be compared to these. The City
Hotel is the largest establishment of this sort in the city. There
you will find a very large and well decorated hall, which serves as
an assembly room.

“The drinking water in New York is very bad and salty. Even
the so-called Manhattan water, which is pumped up by steam engines
and then carried through the city, is not good. But in Brooklyn
the water is splendid . . . [pp. 118–24]

“I have seen an official report of the number of houses which
were erected in New York during the year 1818-1819. This list
includes no less than 200 houses of all kinds, but I must not believe
that these buildings consist of stone or that the construction is very
durable. New York contains just as many frame houses as stone houses, but I have only mentioned this to
prove to you how rapidly this place develops, in spite of the un-
favourable commercial prospects at the present time. The stone
houses are, as a rule, only one stone in thickness and are not
supposed to last more than 50 years, but the warehouses are
stronger.” (pp. 131–45) Klöckowstrom gives a plate and 8 or 9
tables of technical description of the “Chancellor Livingston.”
(pp. 152–60)

“The two New York views made by Klöckowstrom are repro-
duced as Pls. 84 and 85, Vol. III. In

year was published A plain statement addressed to the proprietors of real estate, in the city and county of New-York. By
A Landholder. It relates to the expenses, inconvenience and oppres-
sions attendant upon the opening and regulating of avenues and
streets,” with special reference to conditions in Greenwich Village.

This year Clement H. Moore, L.L.D., presented to the General
Theological Seminary (see 1817) the entire block bounded by
Ninth Ave., 20th, and 21st Sts., and the Hudson River. Upon
this the seminary buildings were erected in 1828 (y. p., JI 28).

— Early N. Y. Homes, 34. See also L. M. R. K., III: 949, and My
1, 1819. It was in the block above that “Chelsea” stood, built by
Capt. Thead· Clarke in 1750 (y. t, Ag 16).

In this year the Jewish synagogue on Mill St. was rebuilt.

In this year, the frame building of the Chambers St. Pres-
byterian Church (see 1801) was replaced by a brick edifice.—Green-

— About this year, cottages on the east side of Broadway between
Franklin and White Sts. were replaced by handsome residences,
owned by Geo. Rapelje, John M. Bradford, Samuel Watkins,
Richard Kingland, James Gillender, and William M. Cutting
(earlier occupied by Mr. Astor).—Man. Com. Coun. (1865), 596.

In 1818, A. T. Goodrich reprinted practically the whole
Blunt’s Stranger’s Guide of 1817, the text, from preface to p. 306
inclusive, being the same. He gave to this reprint a different title-
page, however, and, after p. 206, added an “Appendix.

The title-page reads: The Picture of New-York, and Stranger’s
Guide through the commercial emporium of the United States: con-
taining, also, a description of the environs, with several pleasant
and summer excursions around the neighbouring country; with
a plan of the city, and numerous views of public buildings.

No. 124 Broadway, corner of Cedar-street, opposite the City Hall.
1818. (cf. the 1818 London ed. of The Stranger’s Guide to N. Y.,
by Blunt, in N. Y. Pub. Library.)

The notice, printed opposite the preface in Blunt’s guide, on
the reverse of the title-page, signed by the clerk of the Southern
District, and showing that Blunt deposited the title of his book,
as required by the copyright laws, does not appear in Goodrich’s
reprint; and the reprint contains no advertisements at end.

The “Appendix for 1818” mentions the incorporation of the
Franklin Bank, during the legislative session this year, with
a capital of $500,000 and permission to enlarge it to $1,000,000.

“The Bank was ordered to be located east of Beekman-street, and
the Directors have purchased the spacious mansion in Cherry
street, opposite the new Franklin Square, that belonged to the
estate of the late Col. Osgood, and which was the head-quarters
of General Washington during [the early part of] his residence in
New-York [until Feb., 1790, y. b]. . . . Its operations commenced
in July, 1818.”

Other financial institutions incorporated in the same session,
and described in this “Appendix,” were the Mercantile Insurance
Co., a marine and life insurance company, its charter being dated
April 10, 1818, and its office being at 45 Wall St.; the Franklin
1818 Fire Insurance Co., at 41 Wall St., opposite the City Bank; and the Union Insurance Co., another life insurance company.

The stage-coach and steamboat lines out of New York are fully described; also the exhibition of the Academy of Fine Arts, the circulating libraries, and several tours to points near New York.

The building on the north-east corner of Broadway and Wall St. (No. 58 Broadway) was at this period owned and occupied as a store by Naja Taylor, "Merchant," who had bought the property in 1809 from the heirs of Colin Van Gelder. This corner building appears in the Holland View of 1799 as a three-storey house with a flat roof. The additional storey and gable were probably added by Taylor soon after his purchase of the property.

Trinity Church, seen at the head of Wall St. on Broadway, was the second church building which occupied this site, and was built in 1789-90, and demolished in 1839 to make room for the present edifice.

The First Presbyterian Church, or "Meeting," on the north side of Wall St. between Broadway and Nassau St., was erected in 1719, and rebuilt in 1810. It was partially destroyed by fire in 1834, and again rebuilt in the following year. In 1844, it was taken down and re-erected in Jersey City.

The painting was acquired from Goupil & Co. more than fifty years ago by a member of the family of the late Miss Mary G. Ward, who bequeathed it to its present owner, Miss Sarah Cooper Hewitt.

Since this description was written, the author's attention has been called to the fact that in the will of Miss Ward, the picture is described as "said to have been painted in the year 1818." As the original description in Vol. III is inadequate in several particulars to enable one to say it was not re-printed here.

In this year, Wm. G. Wall, who was born in Dublin in 1792, came to New York. He became noted for his American landscapes.

-Isham, Hist. of Am. Painting (1905), 199.

The new Methodist Church in John St. (see My 13, 1817) is to be opened on this day—N. T. Ev. Post, Jl 3, 1818. The church was 62 feet by 7 feet and cost about $35,000—Hist. Mag. (1895), 21, 94, V: 145. See also L. R. F. K. III 930; and S. 24, 1840.

"This day will witness the commencement of the line of American post-coaches between New-York and Liverpool. The James Munro will take her departure this morning at 10 o'clock."—N. T. Gal., Jl 5, 1818. This advertisement of Isaac Wright was the first one to announce the sailing of packet boats at a stated hour. From the sailing of this packet we may date the day from which the commerce of New-York began to increase seven-fold."—Grant Thurn-bur's Reminiscences (1845), 156-7.

The New York Evening Post is to be employed henceforth as one of the newspapers for the printing of the laws and ordinances of the common council.—M. C. C. (1784-1833), IX: 431.

It is resolved to widen Grand St. to 70 feet between Broadway and the City Hall.—C. The Basting, 1817, 54, I: 431.

The common council agrees to the following plan of improvements:—Resolved, that John McComb Esqr. the Architect of the City Hall, be requested to procure a suitable gilt Eagle to be placed on the Canopy over the President's Chair in the Common Council Chamber, with such appendage or ornamentations as he may deem proper for completing his plan of finishing the same.—M. C. C. (1814-1812), IX: 456.

The road committee presents to the common council the draft of a contract, proposed to be entered into with John Randel, Jr., for making a map of the island of New York, and it is referred to a committee.

On Feb. 5, this committee reported favourably on the terms of the contract, and the board directed that it be executed.—M. C. C. (1784-1834), IX: 435, 466-67. The map had been ordered as early as Nov. 9, 1812 (p. n.), but no written contract had been entered into. On Feb. 15, 1819, Randel was granted an extension of time until May 1, 1820, for the completion of the map.—Ibid., X: 240-51. The 92 sheets composing this map, known as the Map of the Farms, bear various dates in 1819 and 1820, and are filed in the bureau of topography, borough president's office, Municipal Bldg. A separate title-page bears the date "1820."—See Pl. 86, Vol. III.

Henry B. Farrant writes of Washington, in part, as follows: Feb. 26, '1818. It has been so fashionable with natives, as well as foreigners, to ridicule the federal city, that I had anticipated the reality of Moore's description of "This famed metropolis, where fancy sees Squares in mountains, obelisks in trees." But in this I was pleasantly disappointed.

CHRONOLOGY: INVENTION AND PROSPERITY, 1815–1841

1818

"The President's palace, and the Capitol, situated on opposite hills, are the chief public buildings, both of which were nearly destroyed by the buccaneering incursions of our countrymen [see Ag 24, 1814], who acted, perhaps, agreeably to their orders, but certainly in opposition to the feelings, judgment, and character of the inhabitants of the place. These buildings are now rapidly rising into increased splendour. The Capitol, in which are both houses of the legislature, and several public offices, stands on a bank of the Potowmac, seventy feet above the level of that river; it as yet consists of but two wings, intended to be connected by a centre, surmounted by a dome. The architect is Mr. Latrobe. . . . [see also The Journal of Latrobe (N. Y., 1805)]."

"The President's house is at the opposite end of 'Pennsylvania Avenue,' commanding a most beautiful prospect. On each side of it stands a large brick building; one of which is the treasury, the other the war and navy offices. These are to be connected with the palace, which, when completed, would form an ornament even to St. Petersburgh itself.

"Upon a second visit to the Capitol, I explored nearly all its recesses. Marks of the late conflagration are still very apparent, while the walls bear evidence of public opinion in relation to that transaction, which seems to have had a singular fate of casting disgrace upon both the Americans and British. Some of the pencil drawings exhibited the military commander hanging upon a tree; others represented the President running off without his hat or wig; some a General Cockburn robbing honest roosters to which are added such inscriptions as, 'The capital of the Union lost by cowardice;' 'Curee cowards;' . . . 'James Madison is a rascal, a coward, and a fool;' . . ."

"The post-office is a large brick building, situated at about equal distances from the President's house and the Capitol. Under the same roof is the patent-office, and also the national library, for the use of members of congress . . . The library . . . of but 3000 volumes . . . includes various classes of literature, having been the property of Mr. Jefferson, for which he obtained from the United States 20,000 dollars. The former library, containing from 7 to 8000, was destroyed by our enlightened countrymen . . . "—Sketches of Jm. (London, 1818), 252-55.

2 The common council agrees to a recommendation of the finance committee regarding the sale of the Collect lots at auction on Feb. 20. The list of such lots belonging to the corporation consists of 28 lots and a small gore as follows: 9 lots on the westery side of Collect St. between Anthony and Leonard Sts.; 12 lots on eastery side of Collect St. between Anthony and Leonard Sts.; 7 lots on easterly side of Collect St. between Leonard and Franklin Sts.; 4 lots on westerly side of Leonard between Collect and Orange Sts.—M. C. G. (1784–1813), IX: 464–65. The lots brought $25,275—ibid., IX: 509.

3 It is resolved to erect an engine-house on the lot in Whitehall St. opposite Stone St.—M. C. G. (1784–1813), IX: 473–74.

12 The independence of Chilli is proclaimed.—Wiscon., VIII: 331.

18 Chippewa.—Advisory Com. Ad., F 21, 1818. He took the oaths of office on March 2 in the presence of the common council and a gathering of citizens.—M. C. G. (1784–1813), IX: 510. He was succeeded by Stephen Allen in 1821 (q.v., Mr 7)

27 The governor is authorised by the legislature "to obtain the consent of the government of Canada, to the removal of the remains of General Richard Montgomery, from Quebec, to the city of New-York, there to be deposited in Saint Paul's church, near the monument there erected to his memory; and that he shall cause such removal to be made, when such consent is obtained, at the expense of the state."—Laws of N. Y. (1818), chap. 10. See Jl 8.

11 A detailed report in favour of extending the fire limits of the city is submitted by the committee on the fire department and agreed to by the common council. It is resolved that application be made to the legislature to extend the limits for the erection of wooden buildings in accordance with the committee's report.—M. C. G. (1784–1831), IX: 532–33.

16 The common council appropriates $5000 annually to the city dispensary for the benefit of the poor, not only at their public dispensary but in the homes of the patients if they wish it. The physicians of the dispensary agree to this plan for all people living south of the following boundary: along the Great Kill near Fort Ganoosquet, through Greenwich Lane to Art St., across the Bowery, and through Stuyvesant St. to the East River.—M. C. C. (1784–1831), IX: 539-40.

The common council grants to the Free School Society "the use of the upper part of the Engine House at Greenwich for two years, for the purpose of extending the benefits of the Free School instruction to the inhabitants of Greenwich."—M. C. G. (1784–1831), IX: 541.

A catechism "for the use of the children in the school of the Alms House" (see Ag 14, 1815) is submitted to the common council by Chaplain Stanfor.

At the same time, Mr. Stanford requests "to be permitted to take from the Clerk's Office occasionally one of the volumes of the Minutes of the Council to study; in order to complete an historical account of the public buildings of the City which he is now engaged in."—M. C. G. (1784–1813), IX: 549. Subsequently, says his biographer, "this valuable production, written in Dr. Stanford's usual style of elegant penmanship, was presented to the Common Council of New-York, but is now, we fear, irrecoverably lost." A most diligent search, "assisted by the late mayor, Walter Bowe, Esq. and others," has been made "to find this valuable book, which, by reasons involved in mystery, has been abstracted from the archives of the city."—Sommers, Memoir of John Stanford (1835), xi (preface), 212.

The common council orders that Collect St. from Pearl to Canal St. be regulated and paved.—M. C. G. (1784–1813), IX: 550.

The common council agrees to a recommendation that, as Sheriff and Willett Sts. have been enclosed and used as a nursery and garden for a number of years, ordinances be passed for regulating Willett St. from Grand St. to North St., and Sheriff, from Grand to North St., lest the occupants by possession acquire rights therein.—M. C. G. (1784–1813), IX: 553.

A resolution is passed directing the council of the board to put the common council in possession of the waters between the foot of Roosevelt St. and James Slip, and the waters between the foot of Oliver St. and Catharine Slip, both on the East River.—M. C. G. (1784–1813), IX: 577. See D 28.

In April and May, Gen. Jackson's operations in Florida (the relief of the Creeks and Seminoles) resulted in the capture of St. Marks, Pensacola, and Baracanas. He also subdued the Seminole Indians in Alabama.—McMaster, Hist. of the People of the U. S., IV: 430-56.

Congress passes "An Act to establish the flag of the United States." It provides that it shall be "thirteen horizontal stripes, alternate red and white: that the union be twenty stars, white on a field" and that "no alteration of any new state into the Union, one star to be added to the union of the flag: and that such addition shall take effect on the fourth day of July then next succeeding such admission."—Pub. Statutes at Large of the U. S., etc., 15th cong., 1st sess., chap. 34; Laws of U. S. (1818), chap. 319. This alteration in the flag was prompted by an inquiry made in Congress by Mr. Wilder of New York on D 12 and 16, 1816. See also the committee's report, reviewing previous congressional legislation on this subject.—Columb. Hist., 7, 8, 1817. See also Je 14, 1777; Ja 13, 1794.

The legislature incorporates the "West Point Foundry Assn.," already formed "for the making and manufacturing of iron and brass." They are "engaged in the erection of extensive works and machinery for the making of cannon, cannon balls, and other ordnance; but their capital being found inadequate . . ." they seek incorporation as a stock company. Among the incorporators are James Renwick and Henry Brevoort.—Laws of N. Y. (1818), chap. 154. Its charter was extended by ibid. (1845), chap. 96. In this foundry, at the foot of Beach St., New York, the first American-built locomotive was constructed. See 1851.

The "Isabella" under Capt. John Ross and the "Alexander" under Lieut. W. E. Parry, sail from the Thames on an expedition to the Arctic. They returned on Nov. 14, but added little to the knowledge of Arctic geography.—Wiscon., VIII: 54, 115, 117. See My 11, 1819.

The "Lycorh's Natural History, in the city of New York" is incorporated.—Laws of N. Y. (1818), chap. 197.

In response to a petition from the common council (M. C. C., 1784–1831, IX: 542-53), the legislature authorizes the city to extend the limits of the almshouse grounds at Bellevue so that the boundaries shall be 24th St. on the south, Second Ave. on the
The manner with the meeting chap. is. Shortly The Jun built large "Preparations Trumbull's The (1784-1831), the school-room. buried 25 St. John Apr. 1818." Declaration Post, reproduced living and genius obtain and remaining by, 21. Park bureau M. Ap 1818. the be Mr. 1818. C. Travels to George to Green the city. under the Congress in the city. the hands that proves the statue of George III in Bowling Green must have been removed, for "B" now writes to one of the papers: "I would enquire through your statue why the monument in the Bowling-green, which has remained standing so many years, should at this hour be removed and the materials thrown into the street? What was there odious in this simple memorial of a people's valor and devotion? Why was it left untouched by hands that destroyed the statue of a king, under circumstances that swell the breast of an American with the proudest emotions? ... Whatever be the motive, as a private individual, I cannot but lament the existence of obscurity, thus removed forever from our view. ..."—N. Y. Econ. Post, My 19, 1818; Telegram, Je 16, 1833, cited in Hazlton's Declaration of Independence (1906), 565. See also Jl 9, 1776.

The "City Intendant" is ordered by the common council to enforce the law regarding swine running at large without rings in their noses.—M. C. C. (1784-1831), IX: 653-54.

The following complaint appears: "Is the City Intendant afraid to do his duty? If he will stand at the Stone Bridge any afternoon from 6 to 8 o'clock, he cannot fail to see the bloods of all descriptions trotting and racing their horses without regard to the laws, careless whom they may mutilate or destroy. ... On Saturday evening [May 23], near Stone Bridge Broadway ... a young man was run down by one of the bloods returning from his afternoon ride. ..."—Columbian, My 25, 1818.

At a meeting of merchants and others connected with the commerce of the port of New York, it is determined to erect a church for seamen to be called "The Mariner's Church." Services were first held in a school-room.—N. Y. Econ. Post, Ja 9, 1819. The corner-stone of the church was laid on Oct. 13, 1819 (p. v).
double as much as if the water was carried above the surface thro' a deep kernel in the centre of the streets: from which con-

consideration we do think that the proprietors of the lots of ground can well afford to pay a very large proportion if not all the expense, which would be about Two hundred and fifty dollars a lot." Sewers are also begun, but the statue of Franklin, the sign by which will join the Canal St. sewer.—M. C. G. (1784-1851), II: 720-24. See Jl 28, 1817, and My 10, 1819.

In this month the operations of the Franklin Bank commenced.

—See 1818, supra.

8 In accordance with the law of Feb. 27 (p. v), the remains of Gen. Richard Montgomery are deposited with civil and military honors in a monument erected to his memory in the churchyard in St. Paul's Church.—Com. Adv., Ji 9, 1818; M. C. G. (1784-1851), II: 729. The inscription, placed there in 1789 (p. v), is as follows: "This Monument is erected by the order of Congress 23d Jan'y 1776, to transmit to Posterity a grateful remembrance of the patrio-
tism conduct enterprise & perseverance of Major General Richard Montgomery who after a series of successes amidst the most dis-

couraging Difficulties Fell in the attack on Quebec. 31st Dec'r

1775. Aged 37 Years. Inventor & Sculptor. Prais'd, J. J.Caiffieux. Sculptor, Reigns, Anno Domini Ecccxxxvii." Above this is now added another tablet, reading:

"The State of New York Caused the Remains of Maj' Geo

Richard Montgomery to be conveyed from Quebec and Deposited beneath the Arch on the 8th day of the 21st June Ann.

The special committee's report to the common council regarding the funds for the Relief of the Deaf and Dumb contains, among other matters, the following data: the institution, which was incorporated April 15, 1817 (p. v), has been in operation for five weeks. The eleven pupils are taught reading, writing and con-

versing by signs. A more or less successful attempt has been made to teach them to articulate. Only two of the pupils are pay, and the institution is dependent for its existence upon donations.

There are over 60 deaf and dumb mute in the city, and under present conditions the school cannot accommodate more than its present number. The board agrees to the following recommenda-
tions regarding aid: that the institution have the free use of a room on the third floor of the old almshouse during the pleasure of the board, to be used simply for the purposes of instruction; that $40 a year be paid for each of ten pupils in needy circumstances for the first two years, and that $50 be appropriated to the organization to be used in carrying on its work.—M. C. G.

The school for the deaf and dumb soon moved to hired rooms at 41 Warren St. De Witt Clinton was the first president.—A Hist. of the N. Y. Inst. for the Instruction of the Deaf and Dumb (1831). A company of adventurers are now operating with the diving bell brought from Britain for the Hussar which sunk in Hurlgate during the revolutionary war. Two or three years ago a part of the same company labored with considerable success on the wreck and raised property which rewarded them pretty well. The Hussar is known to have had a quantity of specie on board when she sank, which is the grand object of the present labors. The position of the wreck has hitherto prevented the bell from dropping within the hull; but by great exertion large masses of the wreck are sawed out, and, elated with hope, the persevering adventurers are approaching the golden prize. The bell descends about 60 feet."—Com. Adv., Ji 18, 1818. See N 23, 1780, and Ji 13, 1811.

Major Colden presents to the common council a report regard-

ing the "City Prison and Bridewell" which contains several suggestions for prison reform. The board appoints committees to act up on the various matters of the report.—M. C. G. (1784-1851), II: 741-42, 760. See S 7 and 28.

The statement is made that "there is now erecting and finishing, of South-piazza, no less than 1963 buildings, upwards of 100,000 of which are intended as dwelling houses."—Com. Adv., Ag 9, 1818.

A boat built to ply between New York and Liverpool as a sailing-
packet is launched from the ship-yards of Menota, Crocker and Fickett at Clerelar's Hook. She was later purchased by some gentle-

men of Savannah, Georgia, and named the "Savannah." After

being supplied with steam machinery and paddle-wheels, she made her trial trip from New York to Savannah in the spring of 1819 (p. 27). On My 23, 1821, she cleared the latter port for Liverpool, and was the first steamship to cross the Atlantic.

The street commissioner is directed to settle with W. Birdsall, the contractor named by the 7th article of the Park, at 83 cents per pound.—M. C. G. (1784-1851), XI: 711-13, 775-76. See also desip. of Pl. 54-b, 2: 416.

Joseph Lancaster, author of the Lancasterian system of edu-

cation, delivers a lecture on its advantages, at Free School No. 1 in Chatham St.—Com. Adv., Ag 31, 1818.

The almshouse committee reports to the common council that "the humane views of the Corporation in relation to the insane have been carried into effect." The male patients have been trans-

ferred from the penitentiary to the north wing of the almshouse where they are in charge of a keeper who has been appointed on trial. He has 14 manacis under his care and as there are accommo-

dations for 50, it is planned to send here insane paupers from the almshouse as the keeper has become more accustomed to his task. Better arrangements are to be made for insane females.

The common council grants to Gov. D. D. Tompkins and

Noah Brown the privilege of erecting a ferry-house at Whitehall, not more than 11 ft. square and 15 ft. high.—M. C. G. (1784-1851), XI: 73. See also L. M. R. K., III: 944.

The common council passes a resolution directing the keeper of the bridewell not to receive any person into custody without a commitment for a public crime according to law. The practice of holding a slave for safe-keeping (see Ji 27) is to be abolished, and slaves now in custody without a commitment are to be released if not called for by their masters after such have been sufficiently notified to deaf and dumb prisoners as required by this regulation.—M. C. G. (1784-1851), XI: 39-40.

In accordance with a report of a special committee, the com-

mon council agrees to modify its plan for the regulation of the village of Greenwich (see Mr 3, 1817). The part to be regulated "lies principally between Hering Street and the high ground at and near Broadway."—M. C. G. (1784-1851), XI: 43. See also A Plain Statement . . . by a Landholder (N. Y., 1818).

"Col. Trumbull's Painting of the Declaration of Independence, for the Capitol of the United States, is completed, and is now exhibited at New-York, prior to its being taken to Washington. The portraits of the President, and other leading members of the Congress of '76, are said, from the accurately given, to be accurately given;—N. J. Jour. (Chatham), O 6, 1818. It is exhibited in the room of the Academy of the Fine Arts, in the New York Institution.—Ibid, O 27, citing the Com. Adv.

One of the newspapers says regarding the "Rotunda" (see Ap 21): "This neat and ornamental building, near the Institu-

tion, is now opened with a Panorama View of the City of Paris, by Barker, and which, for fidelity of design, and elegance of exec-

ution, cannot be surpassed. Any person who has been in Paris can designate each spot with perfect ease. We were pleased to see it crowded, and think that Mr. Vanderlyeo merits the encour-

agement which he will no doubt receive."—Com. Adv., O 6, 1818. For further early accounts of the Rotunda, see Dunlap, Hist. of the Arts of Design in the U. S., III 165-66; Comm. Adv., XI: 398-400; Picture of N. Y. (1858), 374; and description, with view, in N. T. Mirror, VII: 89 (5 26, 1829).

The grand jury having indicted C. N. Baldwin, editor of the Republican Chronicle, for libel in making a published charge of fraudulent lottery management, he forceful replies:

The Grand Jury . . . have indicted nobody for a fraud, a great many for insuring, a few for selling. And now, ye who have been guilty of fraud in this or any former lottery drawn in this state, tremble—the truth shall no longer hang enveloped in the mists and clouds cast upon it, by interested, biased and timid men, for by the powers of an independent and a fearless
The common council resolves "that the market lately erected in the Centre of Grand and Essex Streets (see Je 29) be known by the name of the Essex Market."—M. G. C. (1784-1814), X: 142. See D 9, 1822.

The "new Church corner of Duane and Augustus-streets, built by the Scotch-United Church and formerly called Universalists," is to be opened on this day by the Rev. Edward Mitchell.—N. Y. Ev. Post, D 18, 1818. See also ibid., My 7, 1819. This was the second building erected by the First Universalist Church.—L. M. R. K., III: 937.

"At the present time, we have in this city for the protection of our property from fires, forty-two Engines, one of which is called the flatter; four hook and ladder trucks; one hose Wagon; six ladders; twenty hook; a machine for throwing down chimneys; one copper fire pump; 12, 120 feet of hose; and twelve hundred and eighty three firemen including fifty four Fire Wardens and nine Engineers."—Gem. Adv., D 23, 1818.

The corporation resolves to take the bullhead and piers between Roosevelt St. and James Slip and appropriate them to public uses as a slip or basin.—M. G. C. (1781-1814), X: 177-74. On April 10, 1819, bonds to the sum of 51,941 were issued to pay for property for this basin—Jour. B, 270, comptroller's office.

1819

In this year, lithography was introduced into America.—

Anecdot. Men. (J, 1819), 67-73. See also 1825, and descrip. of A. Pl. 12-8, III: 872.

During 1819-20, Charles H. Wilson, an Englishman, visited America and thus commented on New York: "... The Theatre is, both in point of beauty and magnitude, far inferior to several of our provincial Theatres. The Churches are all modern, and in their structures, or architectural designs, simply elegant; but the materials, like two-thirds of buildings of every description in America, are wooden."

"... In a Court of Justice in England it [the wearing of] wigs adds a degree of solemnity; but in America neither wigs, integrity, nor decorum are requisite; it is certainly true, the Judge is indeed exalted upon a higher seat, by which alone you can distinguish him from the poor captive, and the cause, civil or peacant, is invariably decided by the influence of—dollars. ... The stage is in continual requisition, the eternal companion of judge, counsellor, jury, and spectators; you are consequently stupefied with smoke, and spit upon as an especial mark of freedom."

"In my perambulations I found a new object of attraction; red flags at several doors, and 'vendue' inscribed thereon—a Dutch term of auctio.

"The Police of New York is a strange mixture of inconsistencies. The streets are miserably dirty, as to them is consigned the filth of most houses, and suffered to remain in all seasons, July and August excepted; and you are continually annoyed by innumerable hungry pigs of all sizes and complexions, great and small beasts prancing in gouting ferocity, and in themselves so great a nuisance, that would arouse the indignation of any but American.

The markets of New York are well supplied with provisions of all kinds, which are in price far less than in the metropolis of England; fish, poultry, and pork, are excellent, but beef, mutton, veal, &c. are far inferior to the same productions in England; and, with the exception of malt liquor, the venders at the shrines of Bacchus may enjoy, for the fourth part of the sum, the glorious and exalted honor of being called the Jolly God."

One of these annual mementos [the Fourth of July oration] I attended, in the church of the Rev. Mr. Macleod, and found the theme of this pulpit cheer and burden of democratic song, was an unnecessary and malignant invective, in time of peace, "against the proud English," as he termed them and concluded an half hour's alitohous harangue, pitifully delivered, in a kind of dialect which disdained both head, heart, and country.

"The parade next demanded a visit; the commanding officer I found a tailor (General Maps).

"The singularity of a tailor commanding five thousand men, I considered strange, because the old adage with us is, that for the manufacture of one man, nine nippers are requisite. ... Curiosity led me therefore to enquire if such was usual for officers to be mechanics, and of course I inquired of Duncan, Treasurer and General of Corporals, Colonels, Fifers, Majors, Drummers, Captains, Privates, Lieutenants, Sergeants, Ensigns, Pioneers and all, when divested of
1819

the pride and pomp of glorious war, retire inglorious to ignoble avocations, with their ‘blushing honours thick upon them,’ and recount their chivalrous deeds, ‘hair-breadth escapes,’ and all the gallantry of the deadly breach, in the saw-pit or the cobbler’s stall. . . .

Females are not taught common industry; it would degrade those gentility, of any rank, to assist in the hay and corn field— their utility and knowledge extends not farther than the manufacture of a pumpkin pie, or the outleths of a silly romance, or ridiculous novel. The continual use of ardent spirits from the cradle, on the part of the males, ruins the constitution, for at thirty, nature becomes torpid. All labour is done by the children of Africa, or the dicky offspring of St. Domingo. . . .”—Wilson, The Wanderer in Am., etc. (Thirk., 1822), 14–12.

This year was published by Moses Thomas, Phila., a quarto volume entitled Picturesque Views of American Scenery, painted by J. Shaw, and engraved by J. Hill. One of the views, “Hell Gate,” is reproduced and described as Pl. 87–8, Vol. III. In the description (III: 567), J. H. Hill is referred to as John Hill’s nephew; he should read grandson. The book was reprinted by M. Carey & Son, Phila., in 1820. For the titles of the plates in the reprint, see ibid., III: 567.

The octagonal pavilion around the flagstaff was still in existence at this date, for it is shown on the Wall view of New York from Corlear’s Hook (Pl. 89, Vol. III). See also descrip. of Pl. 59, I: 415. The pavilion was removed sometime before Aug. 16, 1854 (6–7).

In this year, the Hester St. Friends’ meeting-house was erected, on the north-east corner of Elizabeth St. and the Bowery.—Greenleaf, 117; Onderdonk, Annals of Hempstead, 102; L. M. R. K., 111; 928. Jan.

The Chamber of Commerce (see Mr 4, 1817) addresses a memorial to congress requesting the enactment of a national bankruptcy law which shall “put creditors of all descriptions upon a footing of equality throughout the union.”—Bishop, A Chron. of 150 Years, etc., 53. A similar petition was sent on Jan. 6, 1824.—Ibid., 54. See Jl 3, 1824.

At a special meeting of members of various religious denominations “at the City Hotel, a memorial is adopted urging congress to ‘devise such a system, and provide for such a plan, as may be best calculated effectually to promote the security, the preservation, and the improvement of the Indians.”—N. Y. Evé. Post, Ja 16, 1819.

Aside from the extension and improvement of the Battery, it is proposed to take a suitable portion of ground on the East River near Corlau’s Hook and one on the North River near Fort Gansevoort for public walks or promenades. The common council in an endeavour to further the projects passes the following resolutions:

1. That the board reserve all the land under water west of Tenth Ave. from 14th to 19th St., a front of about 1,200 feet for public purposes.

2. That the counsel take the necessary legal measures to vest in the corporation the land and the land under water at Corlau’s Hook south of Grand St. and east of Corlau’s St. to the permanent lines for the like purpose.

3. That application be made to the legislature to obtain a grant of their title to the lands of the Battery and the lands adjoining the same under water to an extent not exceeding 400 ft. for the like purpose.—M. C. C. (1874-1831), X: 201–6. See also ibid., X: 129, 152–54, 343–44, 419.

A resolution is passed to remove the old boat-house on the south side of the Battery.—M. C. C. (1874-1831), X: 176, 214–15.

At a meeting of the common council on Jan. 25, a memorial was received from John Jacob Astor and others asking the board to sanction an application to the legislature for the appointment of commissioners to adjust the level of those streets and avenues which have not been regulated and to make such models or plans that real estate owners may regulate their lands accordingly. The board, having then voted that it was inexpedient to comply with the request, now takes further action to counteract the effects upon the legislature which the memorial of Astor may produce, feeling strongly that further regulation of streets, etc., should conform to the present plans, and that new commissioners might cause expensive changes in works that has already been done. It is therefore voted that a respectful remonstrance be presented to the legislature against the memorial and petition of Astor and the others.—M. C. C. (1874-1831), X: 233. See also F 8.

The counsel presents to the common council a draft of a memorial and remonstrance to the legislature upon the subject of regulating streets (see F 1). The board refers it to the committee on applications to the legislature to insert in said memorial a model map in wood showing the heights, levels and courses of the streets as planned to be improved. The committee is authorized to then cause the memorial to be authenticated and forwarded to the legislature.—M. C. C. (1874-1831), X: 235.

Legrand Jarvis is appointed a city surveyor.—M. C. C. (1874-1831), X: 235–39.

A presentation of the grand jury to the common council manifesting approval of the corporation’s action in reducing the number of dray-shops by at least 500 during the year. A corresponding decrease in the number of crimes in very noticeable, and greater zeal is urged in still farther reducing the number.—M. C. C. (1874-1831), X: 243–44. See F 22.

Spain cedes Florida to the U. S., and in return the latter agrees to pay American claims against the former arising from unlawful seizures at sea, the suspension of the right of deposit at New Orleans in 1802, etc., amounting to $5,000,000.—Macdonald, Select Docs., etc., 215–19; McMaster, Hist. of the People of the U. S., IV: 477–78.

An elaborate ball is held at the City Hotel in honour of Gen. Jackson. “The diffusion of light upon an assemblage the most brilliant we ever beheld; the taste with which the room was decorated with nearly two hundred flags, including those of almost all the nations of the world, combined with the military glitter of about two hundred gentlemen in full uniform, interspersed in the dance with the female beauty and elegance of the city, produced an effect of the most pleasing nature.”—Comm. Adv., F 23, 1819; Stone, Hist. of N. Y. City, 574–75.

At a special meeting of the common council, the freedom of the city is conferred on Maj.-Gen. Andrew Jackson (see F 19).—M. C. C. (1874-1831), X: 265–66. The form of oath subscribed by him is as follows: “I Andrew Jackson do swear, that I as a freeman of the City of New York, will maintain the lawful franchises and customs thereof; that I will keep the said City from harm as much as in me lieth, and that I will in all things do my duty as a good and faithful freeman of the said City ought to do.”—From facsimile in M. C. C. (1874-1831), X: opp. p. 264. For early form of this oath. see S 1, 1786.

Mrs. Elizabeth Hamilton, widow of Gen. Alexander Hamilton, writes to Mr. Sanford, that “the poor near fort Washington on the upper part of this Island . . . have never had a place of worship nor a school until within the last two years while families whom unbaotised some persons in their neighbourhood have kept up by subscription a school until it could cum [sic] under the school fund, the building which at present Unites as a place of worship and a school was built with a small sum granted by the Corporation but their is still a bout one hundred dollars due wanted
The common council passes a resolution granting the request of persons living near the Bowling Green that they be allowed to plant trees and shrubbery in the Green, keep it in order, and occupy it as a place of recreation. The improvements are to be done under the control of the committee on public lands and places, and the privilege is to continue during the pleasure of the board.—M. C. C. (1784–1817), X: 225. A newspaper says in regard to the intended improvements: "It is understood that a figure fountain is to be made in the centre, the water [of which] will rise to a considerable eminence and fall on a bed of rocks, to be made as nearly natural as possible."—N. Y. Ev. Post, Ag 15, 1819. Such a fountain was built in 1843 (Je 30, q. v.).

7. The legislature directs the canal commissioners to "open communications by canals and locks, between the Seneca River and Lake Erie; between such point on the Mohawk river, where the middle section of the great western canal shall terminate and the Hudson river; between Fort Edward and the navigable waters of the Hudson river, and between the great western canal and the salt works in the village of Salina."—Laws of N. Y. (1819), chap. 105.

12. The legislature directs the superintendent of common schools, "provides for an annual appropriation for the schools throughout the state, and makes regulations for the inspection of schools, examination of teachers, etc.—Laws of N. Y. (1819), chap. 161.

13. The legislature passes an act authorising the secretary of state, under the direction of the governor, to cause the historical records of the state to be bound and arranged. The secretary, John Van Ness Yates, made his report to the legislature on Jan. 4, 1820, in which he presented a synopsis of the several divisions and the character of the public records in his custody. To this report was appended a general catalogue: I., of the Dutch colonial records; II., of the English colonial records; and III, of the state records. From this it appears that there were at that time, in the secretary's office, 661 books, 324 maps, and 900 bundles of papers.—From general introduction, N. Y. Col. Docs., 1: xx.

19. Peter Augustus Jay takes the oaths of office as recorder and assumes his seat as a member of the board.—M. C. C. (1784–1817), X: 341.

25. Excepting that of 1794 (p. 2, J 24), the first Unitarian preaching in New York City occurred on this day, when the Rev. Dr. Chauncey of Boston, preached a sermon in a private house. On May 16, he preached in the lecture-room of the College of Physicians and Surgeons in Barclay St.—Greenleaf, 377. See My 24.

26. Washington Lodge No. 1, the first lodge of the Independent Order of Odd Fellows in the United States, is organized at Baltimore by five obscure men of the humbler class. In fifty years, it enrolled a membership, throughout the country, of about 600,000 men.—Ridgely, Fifty-first Anniversary of Am. Odd-Fellows (Baltimore, 1854) 259, 34.

Describing Philadelphia at this time, Frances W. Darusmont, in May says in part: "I never walked through the streets of any city with so much satisfaction as those of Philadelphia. The neatness and cleanliness of all animate and inanimate things, houses, pavements, and citizens, is not to be surpassed. It has not, indeed, the commanding position of New York, or the air of beauty and grandeur very imposing to a stranger, but it has more the appearance of a finished and long-established metropolis. ... The side pavements are regularly washed every morning by the domestics of each house, ... which adds much to the fair appearance, and, I doubt not, to the good health of the city. The brick walls, as well as frame-work of the houses, are painted yearly. The doors are usually white, and kept delicately clean, which, together with the broad slabs of white marble spread before them, and the trees, now gay with their first leaves, which, with some intervals, line the pavements, give an air of cheerfulness and elegance to the principal streets quite unknown to the black and crowded cities of Europe. ..."

"The State-house [Independence Hall], state-house no longer in anything but its name, ... , doubtless, a sacred shrine in the eyes of Americans. ... I was a little offended to find stuffed birds, and beasts, and mammoth skeletons filling the place of senators and sages. It had been in better taste, perhaps, to turn the upper rooms of this empty sanctuary into a library, instead of a museum of natural curiosities, or a menagerie of dead monsters. [The lower rooms are more appropriately occupied by the courts of law.]"

With reference to society in Philadelphia, this writer makes her observations applicable to the nation at large. "... The universal spread of useful and practical knowledge, the exercise of great political rights, the peace, and, comparatively, the equality of condition, give to this people a character peculiar to themselves. ... The Americans, having a surprising stock of information, but this runs little into the precisities of imagination; facts form the ground-work of their discourse. They are accustomed to rest their opinions on the results of experience, rather than on ingenious theories and abstract reasonings; ... The world, however, is the book which they consider most attentively, and make a general practice of turning over the page of every man's mind, that comes across their path; they do it corporally, civilly, and with the understanding that you are at perfect liberty to do the same by theirs. ..."—Views of Society and Manners in Am., by an Englishwoman (London, 1821), 83–86, 118–119.

The General Theological Seminary (see 1817 and 1818) is opened, with six students. The first lectures were held in St. Paul's chapel, afterward in the vestry-room of the chapel, and then in a building on the north-west corner of Broadway and Cedar St., during the winter of 1819–20.—Petty, Hist. of the Am. Episcopal Church, II: 512. In 1820 (q. v.), it was removed to New Haven. See, further, Jl 11, 1822. The "Contractors for the Canal [sewer] in Canal Street" (see Je 29, 1818) petition the common council for payment, stating that one third of said contract has been finished. The petition is referred to the canal committee.—M. C. C. (1784–1817), XI: 59; descrip. of Pl. 3:B–H, III: 562. The committee reported, on May 24, that, according to the agreement now made, the contractors were to receive 25% of their money as soon as one-third of the work was performed, and that such 25% was therefore now due. Collections on assessments being slow, the committee recommended that the money be hoarded from one of the assessors, which was approved by the board.—Ibid., XI: 419. See Je 28.

Requirements for a degree in medicine are shown in a circular of the College of Physicians and Surgeons. Lectures begin, annually, on the first Monday in November and end on the last day of February, with commencement on the first Tuesday of April. The courses given and the fees required for each are:
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

1815

May 15

“Theory and Practice of Physic, and Obstetrics and the Diseases of Women and Children,” by David Hosack, M.D. 515 00

“Chemistry and Materia Medica,” by William James Macmuren, M.D. 20 00

“Anatomy, Physiology, and Surgery,” by Wright Post, M.D. 20 00

“Natural History, including Botany, Zoology, and Geology,” by Samuel L. Mitchill, M.D. 15 00

“Principles and Practice of Surgery,” by Valentine Mott, M.D. 15 00

M.D. 15 00

“Institutes of Medicine and Forensic Medicine,” by John W. Francis, M.D. 15 00

“Mineralogy, by Benjamin De Witt, M.D. 15 00

Attendance is required at “one complete course of all the lectures,” and on or before March 20, at the end of the year, the candidate shall deliver to the Dean a Dissertation on some subject connected with Medicine or Surgery, written in the Latin, English, French, or Spanish languages. The “fee for matriculation is $5, and the graduation fee “do not exceed thirty dollars.”

The college “enjoys the peculiar advantage,” the circular states, “of being able to obtain subjects from the State Prison, under the sanction of an act of the Legislature.”—College of Physicians and Surgeons Circular, among the John W. Francis papers, in N. Y. P. L.

A “Velocipede” is first used in New York, and is thus noticed by one of the city editors: “One of these new-invented animals we hear made its appearance in our streets this forenoon, with the constructor himself, who, it is said, has made some improvements on the common patent and imported himself by the last arrival from London, in order to supply the market. Horses, it is said, in England, have fallen in price 40 per cent, in consequence of the sudden appearance of these velocipedes. Great speculations, as usual in new articles, are going on.”—N. Y. Eve. Post, My 21, 1819.

A drawing showing “The Velocipede, or Swift Walker,” and an article describing its mechanism, appeared in the Id. May 19, 1819. On May 28, velocipedes were being shown at Washington Hall, and people instructed in their use. Orders for them were to be taken at the same place or by R. P. Lawrence, Manufacturer.—Ibid., My 28, 1819. See also Ibid, Je 18, 1819. See Ag. 9.

It is not generally known that velocipedes were in use as early as the sixteenth century. There is a beautifully made “Unicycle,” from the style of its ornament clearly belonging to this period, in the Volpe collection preserved in the Palazzo Davaivanti in Florence.

The “Savannah” (see Mr. 27) sails from Savannah, Ga., under the command of Capt. Moses Rogers. She arrived at Liverpool on June 20 after a voyage of 29 days and 11 hours, during which she used her engine only 80 hours. She was the first steamship to cross the Atlantic. Invention and imported himself by the last arrival from London, in order to supply the market. Horses, it is said, in England, have fallen in price 40 per cent, in consequence of the sudden appearance of these velocipedes. Great speculations, as usual in new articles, are going on.”—N. T. Eve. Post, My 21, 1819.

A drawing showing “The Velocipede, or Swift Walker,” and an article describing its mechanism, appeared in the Id. May 19, 1819. On May 28, velocipedes were being shown at Washington Hall, and people instructed in their use. Orders for them were to be taken at the same place or by R. P. Lawrence, Manufacturer.—Ibid., My 28, 1819. See also Ibid, Je 18, 1819. See Ag. 9. Exempting that which made its brief appearance here in 1794 (p. 7, Je 24), the first Unitarian society in New York was organized at this time. It was incorporated on Nov. 15 under the name of the “First Congregational Church of New York.”—Greenleaf. 173.

The corner-stone of its first church was laid on April 29, 1820 (p. 7). The common council grants to the managers of the state lottery (M. C. G., 1784-1811, X: 399-400) the use of a room in the lower basement of the city hall in which to draw their lottery.—Ibid., X: 416.

The common council resolves that the street commissioner under the direction of a special committee enter into contracts for the construction of a reef of common dock stone around the Battery, the height of which shall reach low-water mark, the top face of which shall be 15 ft. across, and its base 45 ft. through. He is also to contract for driving the necessary piles to designate the line of the reef.—M. C. G. (1784-1811), X: 425-27. See also Ibid., X: 125, 152-54, 343-44, 419. See, further, Je 20, 1830.

Wm. Dalton, an English traveller, lands at New York. He writes: “In walking through the streets in search of lodgings, the most striking feature I noticed was the dress of the inhabitants. This was uniformly good. Their complexion appears to be generally strong. I observed few females in the streets. . . . House rents are very moderate. I lodged during our stay here, though not particularly well situated, and containing only two rooms on each floor, is rented at 400 dollars or about 90 a year. A friend of mine in Wall Street, informed me that he paid for his house, which is about as large again as the one above-mentioned, a yearly rent of 2,500 dollars or about 562. 10s. sterling. The houses are built of brick, in the most elegant style, and the shops are not exceeded in splendor by any in London. On the eastern side of the Broadway the streets are not regular. It is in this part of the city that most of the business is carried on. That side nearest to the Hudson, is built upon a regular uniform plan and contains many elegant streets. . . .”—Dalton, Travels in U. S. A and Part of Upper Canada (Appleby, 1831), 1-13.

The common council resolves that “the Committee on Public Offices have contracted for, and published the Charter of the City of the Montgomerie Charter with the several amendments thereto, The Edition to consist of Two Hundred & fifty Copies.”—M. C. G. (1784-1831), X: 441.

The charter was printed, accordingly, in this year, by Grattan and Banks, corner of Spruce and Nassau Sts. Since its grant (see F 11, 1731), the following changes have been made: The number of wards has increased from seven to nine, and there are now nine aldermen, nine assessors, nine collectors, and 18 constables, in consequence of the increase in the number of the wards; the mayor and sheriff are now appointed by the common council instead of the governor of the province; charter elections are held on the third Tuesday in November, instead of on the feast-day of St. Michael the Archangel; the elective franchise is extended; newly elected officers are sworn in on the first Monday in December, instead of on Oct. 14.—See copy in N. Y. Hist. Soc.

They resolved to build a pier at the foot of Barclay St. and to extend the pier at the foot of Vesey St. to the permanent line. M. C. G. (1784-1831), X: 445-47.

The new Dutch Reformed Church in Market St. is to be dedicated on this day.—N. Y. Eve. Post, Je 26, 1819. This was the Northeast Reformed Dutch Church erected by Col. Rutgers.—L. M. R. K., III: 935.

Weehawken Ferry, since the improvement of the Powles Hook and Hoboken ferries, has fallen into disuse. It is now proposed, however, to revive the ferry and to keep there a good steamboat. The common council approves a resolution that a grant of the ferry be made to Charles Watts for 15 years from May 1 last. The bounds are fixed on the New York side from the northern limit of the Hoboken Ferry to Christopher St., a distance of a quarter of a mile. This is, however, does not mean that other ferries may not be allowed within these bounds.—M. C. G. (1784-1831), X: 460-61. See also L. M. R. K., III: 943-44.

The canal committee presents to the common council a communication received from the “Contractors for the Sewer in Canal Street” (see My 10), who state that “two thirds of the contract is completed.” The committee recommends that another loan be procured to meet this payment of 25 per cent. of the amount of the contract. Adopted.—M. C. G. (1784-1831), X: 465; desp. of Pl. 83-b, III: 562. See J1 12 and Ag 23.

The canal committee reports to the common council on the subject of “Sewers to be constructed on Thompson, Chapel & Canal Streets as part of the plan hereinafter recommended for the regulation of Canal Street” (see Je 29, 1818). Among other things the report states that “the sewer on Chapel Street being indispensably necessary as a branch of the one in Canal Street, the only question is how far it ought to extend; it is the decided opinion of the Committee that it ought to be extended at least so far as to bury it under the Street which it will do by continuing
THE ICONOGRAPHY OF MANHATTAN ISLAND

1819, it was within one hundred feet of Leonard Street," etc. A resolution is adopted for extending for each of these lateral canals.—M. C. C. July 12 (1784-1811), X: 476-80. See also descrip. of Pl. 83-b, III: 562.

Aug. 2 Mr. Guille, a Frenchman, ascends in a balloon from Vauxhall Garden to a height of 1,500 fathoms, and then descends by means of a parachute. He landed across the East River. The balloon, which cost more than $3,000, was later found at Fort Neck, South Oyster Bay, L. I., about 30 miles from New York. This was the first actual ascension of a person in a balloon in New York.—N. T. Exc. Post, II, 8 and Ag 4, 1819. See also ibid., Ag 7 and S, 1819.

Haswell says this was the first balloon ascent in America.—Reminiscences, 103. Guille made another ascent from Powder Hook on Nov. 20.—Ibid., N 20 and 23, 1819.

The Mayor presents to the common council a letter from Robert Macomb stating that he has a proposal to make "for supplying the City with Water for all Domestic and Public purposes." The committee on public lands and places is directed to confer with Macomb on the subject.—M. C. C. (1784-1811), X: 505.

"The scheme of Mr. Macomb and associates, was to bring the water from Rye pond, and they proposed their ability to complete the work in two years, without any aid or compensation from the Common Council, asking only the privilege of laying down the pipes and selling the water."—Man. Com. Coun. (1854), 217.

The committee reported on Feb. 21, 1820, but no action was taken by the corporation until March 6, 1820 (92). The council passed a resolution to permit the use of Velocipedes [see My 21] in the public places and on the side walks in the City of New York."—M. C. C. (1784-1811), X: 511.

23 Considering the vast territories which now contribute to New York's food supply, it is interesting to compare the following statement of a century ago: "It is well known that the quantity of fertile land in the immediate vicinity of this City is remarkably small. Our Markets are supplied with vegetables almost wholly from the west end of Long Island and from a very few spots on the Jersey shore. Our hay is principally brought from a distance and few Cattle are fattened for our consumption except in distant pastures. The milk, too, which is used in the City is produced by cows kept in the City itself or its suburbs or else within a very limited tract in its neighbourhood."—M. C. C. (1784-1811), X: 519-21.

The common council directs the street commissioner to sell at public auction the Corlear's Hook Market in Grand St. near Goerck St.—M. C. C. (1784-1811), X: 522. See S 6.

The canal committee receives a request from the "contractors of the Sewer in Canal Street" for payment of the third instalment on their contract. They state that the "Sewer" (see Je 28) is completed "except the curbs and grates to the Culverts, which from the unregulated state of the Streets they are unable to finish, and that the street may not be in a state to have the same completed for some weeks." The committee reports this communication to the common council, stating among other things that "To complete these Culverts will cost from 2 to 3 hundred dollars and the Four Street sewers, which is payable by the laying of Sewer after the Sewer is completed, is ample security for their completion." They recommend that payment of the third instalment be made in bonds, payable when the assessment is collected with interest.—M. C. C. (1784-1811), X: 524-25.

Such bonds were issued to the amount of $25,647.77;—Ibid., X: 547. See also descrip. of Pl. 83-b, III: 562. See N 5.

Sept. 6 The new fever has broken out at Old Slip and in its vicinity, the board of health recommends that all inhabitants move from the district bounded by the East River and Pearl St., Old Slip, and Wall St.—N. T. Exc. Post, S 6 and 7, 1819. This alarm the city.—De Forest, John Johnson of N. Y., Merchant (N. Y., 1900), 118. See also M. C. C. (1784-1811), X: 548. See further, S 17.

The street commissioner reports that, agreeably to directions (see Aug 23), he has sold the old market-house situated in Grand St. near Goerck St., and that the cupola and bell were taken down for the purpose of being placed in the new (Grand Street) market. The old market-house is removed and the street filled and levied.—M. C. C. (1784-1811), X: 521-22, 533. De Voe, Market Book, 390. This ended the career of the Corlear's Hook Market which was erected in 1806.

The board enters into agreements with various persons for making "cannals" in Clarkson, Chapel, and Carmine Sts., and in Sixth Ave.—M. C. C. (1784-1811), X: 555.

Alarm over the spread of yellow fever in New York increases. Sept. John Taylor Johnston, in his journal, writes: "Many moving out of town & the lower part of the city pretty well evacuated. One case reported at the foot of Rector St. which seems rather too near home." On the following day he records that "the death of Mr. [George] Aspinwall & of his young man Johnson produced a prodigious sensation. Removal from the East side almost universal. Broadway filled all day with loads of goods & furniture going out of town. Some of the public offices removed up to the upper part of Broadway."—De Forest, John Johnson of New York, Merchant (N. Y., 1900), 118. See also N. T. Exc. Post, S 18, 1819.

Wm. Faux, an English farmer travelling in the United States, arrives in New York from Philadelphia in the midst of the yellow fever epidemic, and describes the city as being "all bustle and confusion. It was like Michaelmas or Lady-day in England; at every door, in almost every street, carts and waggons were seen lading or laden, removing furniture, merchandise, and men from the city to the country. Stores and offices, and firms were closed, or only doing business as if by stealth." The yellow fever was raging and turning citizens out of doors into the grave; . . . "I saw the once celebrated Aaron Burr, a little lean, pale, withered, shabbily looking, decayed, grey-headed old gentleman, whose name is too well known in transatlantic history to need my notice. . . ."—Faux, Memorable Days in Am: being A Jour. of W. S. (London, 1851), 155-56. Faux returned to New York in 1820 (5, My 4).

The yellow fever continues unabated and additional precautions are taken against it in the business section. John Johnston writes in his journal under this date that the Stock Exchange is "at Washington Hall where the brokers also meet instead of Wall St. The entrances to the infected district shut up by Posts & Bailing." On the following day the "Banks had a meeting and resolved not to remove for the present. Still Wall St has a very desolate appearance."—De Forest, John Johnson of N. T., Merchant, 119. See also N. T. Exc. Post, S 20, 1819. The previous place of meeting of the New York Stock and Exchange Board was the Tontine Coffee House.—Eames, N. T. Stock Exchange, 7, 1817-19.

New York City possesses the reputation of having a medical school (College of Physicians and Surgeons—see Mr 12, 1807) "superior in advantages to any other west of the Atlantic Ocean." From MS. letter of Dr. B. W. Dudley, of Lexington, Ky., in N. Y. P. L. For the substance of a medical education at this period, see My 15, 1819.

For the last five days we have had but one case of yellow fever, and the spirits of our citizens, as well as trade, begin to revive. Our stores are well stocked with goods of every description, and merchants from the country, who are desirous of an early fall supply, will run no risk in visiting any part of our city, except Old Slip and its immediate neighbourhood."—N. T. Exc. Post, O 1, 1819. See O 19.

On June 4, 1820 (96).

As the yellow fever has broken out at Old Slip and in its vicinity, the board of health recommends that all inhabitants move from the district bounded by the East River and Pearl St., Old Slip, and Wall St.—N. T. Exc. Post, S 6 and 7, 1819. This alarm the city.—De Forest, John Johnson of N. Y., Merchant (N. Y., 1900), 118. See also M. C. C. (1784-1811), X: 548. See further, S 17.

The street commissioner reports that, agreeably to directions (see Aug 23), he has sold the old market-house situated in Grand St. near Goerck St., and that the cupola and bell were taken down for the purpose of being placed in the new (Grand Street) market. The old market-house is removed and the street filled and levied.—M. C. C. (1784-1811), X: 521-22, 533. De Voe, Market Book, 390. This ended the career of the Corlear's Hook Market which was erected in 1806.

The board enters into agreements with various persons for making "cannals" in Clarkson, Chapel, and Carmine Sts., and in Sixth Ave.—M. C. C. (1784-1811), X: 555.

The yellow fever has broken out at Old Slip and in its vicinity, the board of health announces that the people who have retired to Greenwich may now return to the city with safety. The board recommends, however, that all houses be ventilated, cleaned, and purified before being occupied.—N. T. Exc. Post, O 19, 1819.

It is ordered that Exchange Slip be filled up.—M. C. C. (1784-1811), X: 592-93.

Mayor Colman reports that during the period from March 1, Nov. 1818, to Nov. 1, 1819, no less than 18,950 foreign immigrants had landed in New York and had been registered at his office.—Man. Com. Coun. (1859), 571, Lamb, Hist. of the City of N. Y., II: 680.

It is ordered that the horse-market (see Mr 24, 1817) be removed to the ground included between Spring and Canal Sts,
Invention and Prosperity: 1815–1841

The special committee, to whom has been referred the objections against the Canal St. assessment, reports: "... The petitioners object to the Assessment because in their opinion all the lots of land intended to be benefited by the Sewer have not been assessed and of course too great a proportion has fallen on them, and assert that the Sewer was necessary to carry off the water from some ground which is not assessed, particularly the Collect ground and Lispenard's Meadow, and that some of the property which is not assessed is as much benefited as the lots on Canal Street; that the Corporation possesses no power but such as are derived from the Legislature, and that the Assessors were bound to conform to the law of the State which authorized the making of the Sewer and directed the expense to be assessed on all those benefited. They complain that the Assessment is disproportional and unequal within the limits to which it is confined and state that the Corporation sanctioned a much more extended Assessment when Canal Street ground was purchased for a Water course.

"Your Committee fully agree with the petitioners in the opinion that it was the duty of the Assessors to assess all that were benefited by the construction of the Sewer, but cannot think with them that this principle was not the basis on which this Assessment was founded."

"In the opinion of the Committee so extended an Assessment as the one alluded to by the petitioners would not have been just and correct when the ground for a water course was purchased at a great expense and the cost paid by all the lots from whence it was supposed the waters would flow into this outlet. The owners thus acquired a right of passage for their water thro' Canal Street as a common water course, and to those at a distance from this Street it could not be particularly interesting what kind of Sewer was constructed, but to the lots on Canal Street and its vicinity it was of the greatest importance, as is fully proved by the result, lots there having increased in value at least 100 per cent, as your Committee are informed since it was concluded to build this expense Sewer.

"It appears that the Assessment extends on each side of Canal Street about 400 feet and is considerably reduced on each lot as the distance increases, obviously because the nearest are most benefited by covering what was an offensive open kennel which constantly emitted disagreeable & perhaps noxious effluvia."

The committee concludes by resolving "that the Assessment for constructing Canal Street Sewer, as reported by the Assessors, be confirmed," as they have considered each question case and believe no more "just discrimination" could have been made. The report and resolution are approved.—M. C. C. (1784–1813), 6: 612–13.

At a meeting of at least 2,000 people at the City Hotel, resolutions are passed urging congress to prohibit slavery in all states hereafter admitted to the union. An "Address to the American People" on the same subject is also adopted.—N. Y. Eco. Post, N 17, 1819.

A number of citizens meeting at the City Hotel resolve that they "approve of the plans for preparing a situation on the coast of Africa for the protection of those Africans who may be liberated from the slave traders, and for an asylum to those people of color of the United States who may wish to remove to the land of their fathers." A committee is appointed "to collect funds, clothing, stores, domestic and agricultural implements, and such other articles as may aid those Africans who may wish to remove and in support of the contemplated colony."—N. Y. Eco. Post, N 23, 1819. See also ibid., D 2, 1819. The meeting was evidently held in response to the appeal of the Colonization Society for aid in founding what is now known as Liberia.—McMaster, IV: 560–69.

A convention of "Friends of National Industry" assembles at New York "to take into consideration the prostrate condition of our manufacturers, and to petition congress for their relief and protection." The convention lasted until Dec. 1. Delegates from Massachusetts, Rhode Island, Connecticut, New Jersey, Pennsylvania, Delaware, Maryland, Ohio, and various places in New York State were present.—N. Y. Eco. Post, D 7, 1819.

The common council directs the finance committee to purchase a copy of the Declaration of Independence, published by John Burns of Philadelphia, and to have it suitably framed and placed with the other memorials of the congress.—M. C. C. Dec. 1814–1815, XI: 647.

The common council passes a resolution that the corporation counsel prepare a memorial asking the congress of the United States to pass a law authorizing the secretary of the treasury to reimburse the corporation for money paid to individuals at the time of the late war, for damages caused by incursions on Long Island or elsewhere; and also to reimburse the expense of equipping and manning gunboats. The board orders that the committee of finance appoint a person to take this memorial to Washington and make explanations, the expense not to exceed $200.—M. C. C. (1784–1813), XI: 655–66. On Feb. 7, 1820, J. Morton, clerk of the board, who was sent on this mission to Washington reported that without doubt the corporation would eventually be reimbursed.—M. C. C. (1784–1813), XI: 723–27.

1820

During 1820 and 1821, revolutions broke out in Spain, Naples, and Piedmont, and the rulers were forced to grant democratic constitutions. The armies of the Holy Alliance intervened, however, and absolutism was restored.—Hazen, Europe since 1815, 49–50, 57, 60–63.

The population of the city and county of New York is 123,706:—U. S. Census Bulletin, 1910; Hough, Statistics of the Population of the City of New York (1790–1870), p. 6. In this year, New York's reported manufacturing capital was $17,780,970, of which $1,000,000 was invested in engine works and foundries, $215,750 in sugar refining, and $185,000 in distilling and brewing.—Clark, Hist. of Manufactures in the U. S. 1866, 465 (footnote), citing Dix, Sketch of the Resources of the City of New York, p. 44.

The comparative wealth of citizens of New York, as shown by tax lists of 1815 and 1820, was published in Man. Com. Coun. (1864), 755–66.

In this year, James Fenimore Cooper issued (anonymously) his first novel, Precaution.

The Ladies' Companion was established in this year, and continued until 1844.—North, Hist. of Present Condition of the Newspaper and Periodical Press, 117.

Owing to lack of funds to support it in New York, the General Theological Seminary (see My 1, 1819) was removed to New Haven in this year. In 1821, a legacy of $60,000 was left by Mr. Jacob Sherred for a seminary in New York, and it was decided to move the General Seminary back to the latter city. It reopened here on Feb. 13, 1822 (2:13).—Perry, Hist. of the Am. Epis. Ch., II: 512–16.

Scudder's American Museum is enlarged by consolidation with the Grand Museum. After Scudder's death in August, 1821, the Museum was continued in various hands until 1842, when it was purchased by P. T. Barnum.—Kilroe, Saint Tammany, 176–77; Life of P. T. Barnum, by himself (London, 1853), 77. The Tammany Museum was the first museum established in the city of New York and the second in the United States. It may be regarded as the forerunner of our historical societies and public museums.—Kilroe, 177.

In this year, the Zion African Methodist Church, on the corner of Leonard and Church Sts. (see Ji 36, 1860), was taken down, and a larger edifice erected on the same site. This was destroyed by fire in 1839.—Greenleaf, Hist. of the Churches, 321. See also L. M. R. K., III: 910.

The west side of Broadway, near the corner of Spring St. (where later the St. Nicholas Hotel was built), was occupied at this time by small shops and residences, with the remains of a Revolutionary fortification in the rear.—See wood-cut view in Man. Com. Coun. (1866), 627.

At this time, Greenwich St. was lined with small cabinet-making establishments.—Clark, Hist. of Manufactures in the U. S., 472.

For view of the North Battery, foot of Hubert St, looking south, in 1829, see Man. Com. Coun. (1859), 452; for view of Franklin Market, Old Slip, 1829, see ibid. (1861), 324.

For a detail of the Commissioners' Map showing the owners of lots along Broadway and the Bowery Road between Art St. (Aster Pl.) and 16th St., see ibid. (1865), 647.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1820 By act of the legislature, passed April 14, 1819, the statute of Jan. limitations now commences to run against quit-rents. By this act all quit-rents which accrued between the 29th of Sept., 1775, and the 29th of Sept., 1787, and which were due from citizens of New York State or of the United States, are remitted. Quit-rents are also remitted on forfeited estates.—Laws of N. Y. (1813), chap. 119.

3 The comptroller is instructed to pay the contractors "for building a sewer in Canal Street" (see Apr. 21, 1819), $2,222.45, being the balance due on the contract.—M. C. C. (1784-1813), XI: 680-91. See Je 1 and JI 12.

4 Tammany Hall, "on the corner of Chatham and Franklin- streets, directly opposite to the Park and City-Hall," is offered for lease for a term not exceeding five years. "The advantages to this house are numerous, and few offer to an enterprising person so many chances for good business. It has always been attended by constant boarders, and the general custom of the bar is particularly advantageous. It is necessary to state, that the large room will be reserved for the use of the Tammany-Society every Monday evening, and also to be lighted, and fuel during the time; also, the 12th of May, 4th of July, and 4th of November. This room has been, and is now rented by the occupant at 400 dollars for the season for a dancing school. —There is also a lodge room in which eight different lodges now assemble, and who pay rent for the same to the occupant. On the first floor there is a large bar room, with the necessary fixture, parlor, dining room, which is very spacious, and a small back room. The lodging rooms are very pleasant, and the cellar, kitchen, ice house, etc. commodious. It is proper to state that those who offer as tenants must be men known to be attached to our republican principles..."—N. Y. Eco. Post, Ja 4, 1820. See Ap 10, 1824.

10 The board directs the corporation counsel "to prepare a petition to the Legislature, together with a Law authorizing the Corporation to assess on the real & personal estate in this City a sum not exceeding 150,000 dollars, to be applied to the rebuilding and repaving the Battery."—M. C. C. (1784-1813), XI: 686-87. The memorial and the bill were ordered authenticated on Jan. 31.—Ibid, XI: 715-17.

17 A strong gale and a storm of snow and sleet cause considerable damage in New York. "At 11 o'clock the tide was about a foot higher than ever was before known to our oldest citizens. All the lower parts of the town were inundated, and the water flowed through many houses and stores."—N. Y. Eco. Post, Ja 18, 1820.

25 At a public meeting at the City Hotel, a committee is appointed to solicit subscriptions in aid of the sufferers from a disastrous fire at Savannah which destroyed half the town.—N. Y. Eco. Post, Ja 25 and 26, 1820. The sum of $12,522.66, besides articles of clothing, was forwarded from this city.—Ibid, F 18, 1820.

29 George III dies; his eldest son ascends the throne as George IV.—Macarthy, Hist. of the Four Georges, 480-81. See also N. Y. Eco. Post, Mr 11, 1820.

Feb. The common council is informed by letter from Lieut. Smith of the U. S. war department that each department will bear its estimated expense for repairs to and changes at the Battery within its boundaries, provided the sum appropriated by congress for fortifications will permit others being done.—M. C. C. (1784-1813), XI: 721. See D 21, 1818, and My 15, 1820.

10 Congress passes an act "to provide for obtaining accurate statements of the foreign commerce of the United States."—Statutes at Large, 16th cong., chap. 11. Under this act, the secretary of the treasury began a series of annual reports containing statistical statements regarding commerce and navigation. For the first three years of these (1821-2), see Table No. 9 in the volume (in N. Y. P. L.) labeled Commerce (1824), showing exports and imports by states. See, for example, S 30, 1822.

14 Cadwalader D. Colden informs the common council of his reappointment as mayor.—M. C. C. (1784-1814), XI: 732.

The Park Theatre N. Y. has been closed for the last six weeks "for the want of business."—N. Y. Eco. Post, F 14, 1820.

21 The constitution of the N. Y. Stock and Exchange Board is revised. The text of this revision was published by Francis L. Eames in The N. Y. Stock Exchange (1894), 19-25.

28 A petition of Peter Charles L'Enfant stating the services rendered by him in devising the plan and superintending the Erection of the Old City Hall for which he received no compensa-

...and praying the Corporation to take his case into consideration," is read in common council and referred to the finance committee.—M. C. C. (1784-1813), XI: 747. For the committee's report, see Ap 17.

Congress agrees to the Missouri Compromise, prohibiting slavery in the territory west of the Mississippi, north of 35° 30' N. L., except the proposed state of Missouri. It was approved by the president on March 6.—Annals of Cong., 16th cong., 1st sess., 469-69, 1756-57, 1855-59. See also McMaster, Hist. of the People of the U. S., IV: 583-93.

A petition from Sophia Usher asking permission "to erect a small building for the purpose of vending Soda Water on the Lot of ground belonging to the Corporation on Broadway between Bridewell and the Park," is referred to the committee on public lands and places.—M. C. C. (1784-1812), XI: 2. The petition was rejected on May 29, because "the proposed Building would be an improper incumbrance, and particularly so when the Iron fence is completed on that side of the Park." Mrs. Usher claimed that her late husband (see Je 5, 1811) was "the first person who introduced the use of Soda water in this City or in the United States."—Ibid, XI: 167.

The common council passes a "Law regulating the salaries and compensations of the Officers of the Corporation of the City of New York."—M. C. C. (1784-1813), XI: 15.

The common council agrees to the report, presented on Feb. 21, concerning the "memorial of Robert Macomb respecting a project for supplying this City with water" (see Ap 9, 1810). The following resolutions recommended in the report are passed:

"Resolved that Robert Macomb and his associates shall bind themselves and their successors...to transfer at any time when required, after the expiration of Forty years from the completion of the works, the property of all the water and buildings..."—M. C. C. (1784-1813), XI: 15-16. The show no further action on this proposal at this time.—Man. Gen. Assn. (1854), 217. The subject of supplying the city with water was revived in 1821 (q. v.).

The American is established as a daily with a new volume number. On March 11, the semi-weekly edition (see Mr 3, 1819) was continued as a country paper with the same title.—Brigham, A. A. S. Proc. (1917), 778. See 24, 1821.

The committee of charity reports to the common council that the directresses of the Society for Promotion of Industry "have finally closed their Institution without any expectation of again reopening it."—M. C. C. (1784-1813), XI: 22.

The common council resolves that "the Office of Superintendent of Wharves, Piers & Ships be and the same is hereby abolished."—M. C. C. (1784-1813), XI: 24.

Some of the inhabitants in the vicinity of William St. and Maiden Lane address a petition to the common council, stating that from the lowness of that part of the City at the junction of those streets great inconvenience is experienced in times of a fall of rain and praying that a bridge of flat or other stones may be made across Maiden Lane from the western sidewalk of William Street, also praying that the old bridge across William Street may be repaired. This is referred to the alderman and assistant of the Second Ward.—M. C. C. (1784-1817), XI: 32. It resolves "that from & after the 1st day of May next, all permits which may have been heretofore granted to persons to sell by Auction in Chatham Square be annulled."—M. C. C. (1784-1813), XI: 48-49.

The Common Lands in the Ninth Ward being waste and unproductive, and liable to be sold under assessments of the city for opening streets, the freeholders and inhabitants of this ward, who
all are entitled to these lands under patents granted in 1666, petition the legislature for power to sell; and the legislature appoints Jacob Dyckman and other trustees with power to sell, institute suits for trespass, &c. Certain funds are thereby created for the public benefit.—Laws of N. Y. (1820), chap. 145.

The second part of "Henry IV" is performed at the Park Theatre for the benefit of the New York Philanthropic Society. N. Y. Evens Post, Apr. 5, 1820.

The legislature authorizes the inspectors of the state prison "to advertise to receive proposals for the letting of the state prison at New-York, and the convicts confined therein, and all such as shall hereafter be sent to that prison: the person or persons so taking a lease of said prison, to feed, clothe and furnish said prisoners with all necessaries of life, necessary medicine and medicine in case of sickness, and indemnify the state against all costs and charges of maintaining and keeping said prisoners, excepting the charges of the inspectors." The inspectors are also directed to examine the marble quarries in Westchester and in the city and county of New York, and to fix on one of them as a suitable site for a new state prison.—Laws of N. Y. 1820, chap. 185. The prison was sold to the city in 1826 (p. v., Mr. 28).

The finance committee makes a report to the common council on the petition of Pierre L'Enfant (see F 28), stating that they are led to infer from the city records that his remodelling of the old city hall "was altogether voluntary on his part & that his object was the honor of the performance rather than pecuniary reward." The committee reviews the corporation's offer to him of 10 acres of common lands, made on Oct. 12, 1789 (p.v.), and his refusal to accept the same (see Ap. 30 and My. 14, 1790), also his petition for compensation on Jan. 26, 1801 (p. v.), and his rejection of the $750 voted by the board (see F 16), and then adds: "The foregoing comprises a brief statement of all the facts that have come to the knowledge of your Committee on this subject, and they are such as plainly evince on the part of Mr. L'Enfant a disposition to value his services far above what they were deemed to be worthy by the gentlemen composing the Common Council at the time they were rendered. The Committee do not pretend to judge of the value of these services, nor are they willing to decide as to the justice of Mr. L’Enfant’s claim farther than what may be inferred from the entries in the Minutes of the Common Council, and from these it is concluded that, whatever his services were, they were rendered voluntarily & without any stipulation for or expectation of a reward. It is a question for the Board to decide, therefore, whether, after the repeated rejection by Mr. L’Enfant of the liberal offers made him by the Common Council, he has still any claim on this Board. The Committee think not & they therefore offer the following resolution: "Resolved that it is inexpedient to grant the request of P. C. L'Enfant." The report is approved, and the resolution adopted.—M. C. C. (1784-1831), XI: 75-76.

Comptroller Bleeker reports to the common council that the "valuable improvements made in the City within 4 years past amount to more than $100,000." These improvements are: "Ground purchased for extending the New Alma house Establishment.

"Two public slips on the East river at the foot of Roosevelt & Oliver Sts.

"Piers & improvements at Spring St.

"Centre & Essex Markeets—Ground & buildings.

"Engine houses in Fayette & Rose Sts. & at Greenwich—Ground & buildings & building a house in Beaver St.

"Iron Fence for the Park.

"Opening Oliver St.

"M. C. C. (1784-1831), XI: 82-84.

"Whereas the Pump on the Battery has been useless for several years past, and the well is now in a dangerous situation," the common council resolves "That the Superintendent of repairs have the said Pump repaired and the well filled up without delay."—M. C. C. (1784-1831), XI: 95.

The corner-stone of the first Unitarian Church in the city is laid, on Chambers St., west of Broadway, by a society organized May 24, 1819 (p. v.), and incorporated Nov. 15, 1819, as "The First Congregational Church in New-York."—N. Y. Evens Post, My. 10, 1820; Greenleaf, 373. It was dedicated Jan. 20, 1821 (p. v.).—See Sermon by Edward Everett on the Dedication .

The common council resolves "that one of the Assistants to each of the Captains of the Watch in the first District be disposed with." Then, by a vote of 11 to 7, it reduces the captains' pay from $1.81 per night to $1.50, the assistant's from $1.73 to $1.12, and the watchmen's from $0.87 to $0.75.—M. C. C. (1784-1831), XI: 111-12.

"A pear tree, brought from Holland, and planted in the year 1647, is now in full bloom, standing in the third Avenue at the intersection of Thirteenth-street. This is probably the oldest fruit tree in America. About a year ago the branches of the tree decayed and fell off, and at that time it was supposed the tree was dying; but without any artificial means being resorted to, new shoots germinated and gradually supplied the room of their predecessors. The tree now is in full health and vigour, and appears to be more than 30 years old; the fruit ripens the latter part of August, has a rich succulent flavour, and has been known by the name of the spice pear."—N. Y. Evens Post, My. 4, 1820. This was Stuyvesant's pear-tree. See L. M. R. K., III: 967. The tree was taken down in 1867 (p. v., F 27).

Win. Faux (see S 18, 1819) writes: "I made, on horseback, the tour of York island, about ten miles in length [l] and two in breadth. On one side is the noble Hudson or great North River, and on the other, the East River and Hell-gate, and the beautiful villages of Manhattan, Haerlem, and Greenwich. All the road from the city, to the extremity of, and beyond the island, is adorned, on both sides, with the country-seats and pleasure-grounds of rich citizens, who, like those of London, every morning and evening drive to and fro in great numbers. Perhaps no city in the world is so happily situated as that of New York, standing on this island, with the sea on the south, and these majestic rivers, from one to two miles wide, on the north and east, the banks of which are very high, and for twelve miles crowned with mansions. The houses on the roads, thus leading through the island to the city, have each from five to ten acres of green pasture, Park, or pleasure-gardens, which renders them more rural, though less splendid than those on the roads leading to London. I saw from fifty to one hundred, heavily ironed, forming a new road for the state: receiving no pay nor shirts, but only food. . . .—"Faux, Memorial Days in Am.: being a Journal of a Tour to The U. S. (London, 1823), 411-12.

Under this date is recorded the following statement of the value of municipal real estate:

"Houses and grounds productive: $1,318,200

Public purposes, lands 28,450

" " engine houses 47,850

" " common lands 15,300

" " park grounds 34,000

" " City Hall, almshouses, etc. 1,333,006

Brooklyn and other property on Long Island, productive 64,150

Ferries 12,000

Common Lands, subject to an annual rent 119,150

" " unproductive 37,500

Common Lands, perpetual leases, rents payable in wheat 2,650

" " " " in gold and silver 1,260

Wharves, piers and slips 84,257

City lots, perpetual leases, rents payable in wheat 5,000

Municipal revenues for the year ending May 8, 1820, are itemized as follows:

"Balances in favor of the Sinking Fund Commission $6,162.81

Cash for interest on city stock 6,814.50

Pawners' licenses 6,800

Quot rent 7,717

Sales of common lands 22,740.00

Street lights 1,054.54

Market fees 7,515.44

Water lot rent 1,561.07

Interest on U. S. stock 1,020.00

Stock licenses 674.00

—Journal B, comptroller's office.
The common council adopts a resolution directing that the houses in Mr. M., 2, Join the Bar of the Common Council, for the purpose of taking Notes of, and respecting the proceedings of the Common Council." This petition is referred to the committee on public offices, but no action appears to have been taken.—M. C. C. (1784-1831), XI: 270.

The common council receives a letter from Col. Armistead of the U. S. engineer department, which states that, on account of lack of funds, the secretary of war will be unable to "unite with the Corporation in the repairs and improvement of the Battery" (see F.), —M. C. C. (1784-1831), XI: 270.

The Park Theatre is destroyed by fire.—N. Y. Eco. Post, My 25, 1820. It was rebuilt on the same site, and reopened on Sept. 1, 1821 (q.v.).—Brown, Hist. of the N. Y. Stage, I: 241. Ireland, Records of the N. Y. Stage, I: 363, 380. See also descrip. of pl. 91, III: 577.

A panorama of the palace and garden of Versailles, painted by J. S. Vanderly and covering 1,000 sq. ft. of canvas, is on exhibition at the Rotunda.—N. Y. Eco. Post, My 26, 1820.

"The Managers of the [Parl] Theatre have the honor to announce to the friends and patrons of the Drama, that they have opened the Theatre in Anthony-street. The total destruction of the Park Theatre [see My 25], Scenery and Wardrobe will produce much inconvenience in the correct representation of many Plays, but their Managers have the pleasure to assure the public that the Theatre will be fitted up in the most convenient manner, and will be rendered cool and pleasant, and they reply upon the liberal patronage formerly afforded them."—N. Y. Eco. Post, My 27, 1820. The Anthony St. Theatre was used until the new Park Theatre was opened on Sept. 1, 1821 (q.v.).—Mag. Am. Hist., XIX: 60-61. See also Ap. 2 and My 12, 1821.

The common council appropriates a sum of fifty for the purpose of opening a correspondence with the Secretary at War, or other proper Officer of Government at Washington with the view of ascertaining on what terms a relinquishment of the ground and Fort called the West Battery [Castle Clinton] may be obtained for the public use of this City.—M. C. C. (1784-1831), XI: 168. See O 16.

The battlehip "Ohio" is launched from the Brooklyn Navy Yard "admitted the firing of cannon and acclamations of thousands of spectators, which crowded the surrounding hills and house tops in the neighborhood. . . . The concourse of people which lined the margin of the East River, from the country and from the City, is calculated amounted to upwards of twenty-five thousand."

The "Mariner's Church in Roosevelt street" (see O 3, 1819) is to be dedicated on this day. Services conducted by a Dutch Reformed minister, a Methodist, and an Episcopalian are announced. —N. Y. Eco. Post, Je 1, 1820. See also L. M. R. K., III: 930.

On the petition of owners of property in Canal St., the common council resolves "that the side walk be regulated and the curb stones and pavement be laid, on the Northerly and Southerly side of Canal Street between Chapel Street and Broadway."—M. C. C. (1781-1813), XI: 148, 186-81.

An exhibition of Francis Guy's paintings is being held at the Shakespeare Gallery near the Park Theatre.—N. Y. Columbian, Je 8; N. Y. Gen. & Gen. Adv., JI 14, 1820. An oil painting of the Tontine Coffee House, made by Guy in 1796-1800, is reproduced as Pl. 69, Vol. I.

The common council passes a law authorizing the fire wardens to assume the duties of health wardens, "under the direction and control of the Board of Health."—M. C. C. (1784-1831), XI: 179-80, 196.

The inhabitants in the vicinity of the Abingdon Road complain to the common council of the practise of racing horses in said road in order to promote them to "as great and glorious nuisance."—M. C. C. (1784-1831), XI: 192.

John McComb, the street commissioner, submits to the common council a proposed assessment-roll "for building the Minetta Sewer," it is confirmed and a collector appointed.—From the original report, with "Filed Papers, 1790-1800," etc., in the city clerk's record-room. See also M. C. C. (1784-1831), XI: 197.

The common council accepts an invitation from Peter Cooper "to visit an Experiment of an Hydraulic Boat Propelling Machine at Bellvue tomorrow."—M. C. C. (1784-1831), XI: 202.

The common council appoints a committee of five "to select a Site for a public Bath."—M. C. C. (1784-1831), XI: 231.

The surrender of Lord Cornwallis at Yorktown, painted by col. Trumbull, for the United States, is now exhibited at Washington Hall, previous to its being sent to the seat of government."—T. E. Post, Ji 11, 1820.

The trustees of the Free School Society, in a memorial to the common council, state that they have established five free schools in which about 1,000 poor children are educated, but that they are still "utterly unable to comply with the increasing calls for admissions." They are convinced that by a sale of the property in Chatham St., granted to them by the city on Aug. 8, 1808 (q.v.), "they could direct the proceeds to the public use of the City, which would accommodate twice the number of Scholars at present accommodated in said Building," and they therefore solicit a grant in fee of the premises. The petition is referred to the finance committee.—M. C. C. (1784-1831), XI: 235-36.

Garriff Gilbert informs the common council "that a General Index to the Records in the Registers office of the City and County of New York, which has been committed to him was in such a state of forwardness as to enable him to present for inspection the Index of Mortgages." This is referred to the committee on public offices.—M. C. C. (1784-1831), XI: 256. On Aug. 7, the committee reported very favourably on the index and recommended an application to the legislature "to place the Registers Office under the Superintendence of the Corporation, that the index's may be kept up, else a considerable waste of this Board will have been made."—Ibid., XI: 267.

A resolution "directing the Iron Fence to be continued around the Park" is presented in common council and referred to the finance committee.—M. C. C. (1784-1831), XI: 251; N. Y. Eco. Post, Ji 25, 1820. See F. 5, 1821. See also a map of City Hall Park, made by J. H. Gould, and exhibited at a meeting of the Corporation, an map No. 220, in bureau of topography, borough president's office.

The N. Y. Eye and Ear Infirmary has its inception in a clinic at No. 45 Chatham St., conducted by Drs. Edward Defaldeif and J. Kearney Rodgers.—Osgood, Hist. of N. Y. City (1854), I: 121-22. See Mr 9, 1811.

The mayor of Troy, N. Y., writes to Thank Coblen "for the liberal Donation presented by the Citizens of New York for the relief of the sufferers by the late fire" in that place. The chairman of the committee of relief at the same time acknowledges the receipt of $6,227.25 from New York, and adds: "This liberal donation from the Citizens of New York entitles them to our warmest gratitude, and permit us air, to declare to you and to them that this kindness cannot be forgotten; and that our Citizens will give it in charge to their children to remember, that New York sympathized with Troy in the day of her calamity and distress, and contributed liberally to relieve her poor and unfortunate."—M. C. C. (1784-1831), XI: 218, 253-54.

Richard Varick makes a proposal to the common council (the particulars of which are not recorded) "respecting the Streets around his place called "Tusculum." This is referred to a committee.—M. C. C. (1784-1831), XI: 251. With the exception of John Randel, Jr.'s description of 1808 (q.v.), this is the only record found containing the name of Varick's country home. He acquired it on Feb. 8, 1802, as part of 32 lots of land bounded by Hudson (Houston) St. on the south, St. David's (Bleecker) St. on the north, 6th (Sullivan) St. on the west, and 3rd (Thompson) St. on the east.—Liber Deeds (N. Y.), LXIII: 76. Sullivan St. was
called Varick St. after this time. The position of the house is shown in Landmarks of N. Y. (ed. by Peterson, and pub. by the City History Club, 1933), 59. For other real estate references connected with the history of this property, see Liber Deeds (Albany), XXVII: 224; ibid. (N. Y.), LXXI: 73-75; Liber Wills, LXXVIII: 1; Liber Deeds (ed.), CCXVIII: 38.

"The common council grants to Philip Hone the exclusive right of establishing a Ferry to New Jersey from the North boundary of his present Lease to the foot of Charleston Street, and the exclusive right of establishing a Ferry to Hoboken, from thence, up to Christopher Street, for the term of fifteen years," and annuls the lease made to Charles Watts on Sept. 16, 1819.—M. C. (1784-1831), XII: 80-82, 264.

"Real American," writing to one of the papers, regrets the American Museum has not of late met with sufficient patronage, and says: "I well remember the time when the foundation of this Museum was laid. . . . Mr. Scudder has procured from every region of the habitable globe, a valuable collection of its most extraordinary productions . . . He, likewise, very lately purchased a museum, the property of a French gentleman, which had been exhibited for some time in a house, near the Park, and added the whole to his own establishment. Other institutions of the kind, which have been attempted in this city, now constitute a part of the American Museum. . . . Amongst other things, he has added the Cosmorama, which is of itself one of the most extraordinary exhibitions, to be seen in this or any other city of the union. The view of many ancient as well as of modern buildings, is exhibited in so striking a manner, as to induce the spectator to believe that he is on the very spot where these venerable buildings formerly stood; but what strikes the mind with the greatest awe, sublime reverence and devotion, is the view of ao eruption of Mount Vesuvius. . . ."—Columbian, Ag 11, 1820. An abridged catalogue of the "Principal Natural and Artificial Curiosities" in the museum appeared in Longworth's Directory for 1820-21.

The finance committee presents "a valuation of the whole real estate of the Corporation, together with such of the personal Estate as in their opinion ought to be taken into the calculation." The total is $5,43,718.12.—M. C. (1784-1831), XI: 282-83, Gf. My 8.

The committee on public lands and places, after considering complaints against the African burying ground in Chrystie St. and Potter's field, recommend the following alterations in the former mode of interments:

"That no Corpse shall be left at any time, without a covering of earth of at least two feet deep, and no grave shall he left from one day to another day, without being entirely filled up with earth. . . ."

"No Corpse, shall be deposited nearer the surface of the ground than four feet.

"Nor shall any person whose death was occasioned by any contagious or putrid fever be interred otherwise than in a single grave six feet deep."—M. C. (1784-1831), XI: 236, 286-87.

"We understand that the Regents of the University have granted to the inhabitants of Richmond County, a conditional Charter for a College, to be situated on Staten Island, opposite to the city of New York. . . . We . . . hope that some equitable arrangement will be made between the Corporations of Trinity Church, Columbia College, and the proposed College, by which the funds of the two colleges may be combined, in erecting suitable buildings. . . . We have not the least doubt, but that the Regents of the University and the Legislature had in contemplation, when they granted the conditional Charter for Washington College, the ultimate Change of the location of Columbia College from the City to Staten Island. . . ."—N. Y. Gen. & Gen. Adm., Ag 26, 1820.

"A considerable number of handsome brick buildings are now erecting in this city. A Presbyterian building is building in Vande-water-street, and an Independent Church in Chamber-street [see Ap 29]; the latter of which is fronted with white marble. Several of the old Churches are undergoing repairs; and on the North Dutch Church in William-street is erecting an elegant steeple of about sixty feet in height. As lots and materials are low, capitalists will not be unwilling to supply their surplus funds in building."—Columbian, Ag 26, 1820.

The finance committee reports in regard to John Randal, Jr.'s map of the city: "That they have examined the map alluded to, and although the execution of the work does great credit to the talents and ingenuity of Mr Randal, they are nevertheless of opinion, that the scale on which it is drawn is too small for the ordinary purposes of reference, or for which a Map of the City is generally required.

"The Committee are of opinion however, that some encouragement should be afforded Mr. Randal, for his industry in this laborious undertaking; and they recommend that four Surts of his Map of the City of New York be subscribed for by the Corporation at $75/100 each Map, to be coloured and mounted on Roderer which agreeably to his proposals to give one Map gratis for every five subscribed, will produce 24 Maps, sufficient for delivery each member with a Copy and leave two for the use of the Offices."

"The Committee beg leave to state, that it has been customary to present each person on his becoming a member of the Common Council, with a Map of the City; in order that he may possess the information required in the discharge of his public duties. This has been omitted for the last two years, in the expectation that the Map of Mr Randal would be taken, when completed for that purpose; but, for the reasons already stated the Map not answering the purposes required, it becomes expedient that others should be provided; and the Committee beg leave to recommend, for that purpose the Map published by David Longworth, as containing all the useful and necessary information required by the members of this Board."

The common council agree to subscribe for twenty of Randal's maps and to buy twenty of Longworth's.—M. C. (1784-1831), XII: 299-300. The Randal map referred to is evidently not the Map of the Farms (see Pl. 86, Vol. III), which is on a very large scale. The reference must be to the map described under April 5, 1821 (q. v.), of which few copies are known, one of which is in the author's collection. See also descrip. of Pl. 79, I: 147.

"Win. B. Cozens is ordered to be paid $469 "for refreshments furnished to the Cadets of the U. S. Military Academy on their visits on the 11th & 29th August."—M. C. (1784-1831), XII: 319.

Announcement is made from the office of the Manhattan Water Works that, "Is consequence of an obstruction by roots, &c. in the main conduits, the supply for the west side of Broadway, will, in a great measure he discontinued until the 21st instant, after which the subscribers will receive an abundant supply by an improvement in the main conduits."—N. Y. Evs. Pott, S 19, 1820.

Between Sept. 30, 1819, and this date, 3,874 passengers arrived at the port of New York.—Arrivals of Alien Passengers and Immigrants (prepared by the U. S. Bureau of Statistics 1891), p. 64.

William Hall and others present a petition to the common council, stating that "they have brought into complete operation a machine for sweeping chimneys called 'Hall's patent sweeping machine'—that for the accommodation of the Inhabitants they have established offices in the several Wards to which application may be made for the sweeping of the Chimneys in the City. They therefore request that the masters of the climbing boys or chimney sweepers, may be compelled to establish offices in the different parts of the City, & that the boys may be prohibited from calling out in the Streets as is now practised by them." This is referred to the committee on arts and sciences.—M. C. (1784-1831), XI: 323.

"The building committee of Columbia College (see S 6, 1819), having finished its labours, renders its final report. The additions and repairs to the college cost $46,741.47.—Hist. of Columbia Univ., 1754-1904, 105.

"The owners of hackney carriages urge that the hack stands be abolished, as they are "attended with very demoralizing effects to the drivers employed by them," and the residents near the Park ask that the stand be removed from that vicinity.—M. C. (1784-1831), XII: 343.

"The common council passes resolutions "for filling the slip at the foot of Canal Street with good & wholesome earth, & also for the necessary bulk head at the mouth of said slip."—M. C. (1784-1831), XI: 349. On Feb. 5, 1821, the city allowed $4,500 for filling in Canal St. Basin, and, on Aug. 6 following, a balance of $3,589 was paid.—Journal C.B., commenced 1810.

"The special committee, appointed on May 29 (q. v.) for the purpose of applying to the Secretary of War at Washington to ascertain on what terms the Fort called Castle Clinton, & the
1820. The committee reported on Feb. 5, 1821, that if all the ground between Astor, Nassau St., and the present Park were added, the cost would be about $350,000.—Ibid., XI: 494.

Edmund Kean makes his first appearance in America, at the Anthony St. Theatre (see Apr. 12, 1815), in the character of Richard III.—N. Y. Est. Post, N 30, 1820. Kean performed here because the Park Theatre, which had burned on May 25 (g.v.), was not yet rebuilt.

The common council resolves to apply to the legislature "so to amend the Charter of this City, and the Statutes relating thereto, that the Mayor of the said City may be relieved from the performance of Judicial duties as first Judge of the several Courts of law in this city, and so as that a first Judge be appointed in and for the Court of Common Pleas in the said City,—and that the Recorder may reside in the Court of Sessions therein."—M. G. C. (1784-1811), XI: 401. On March 19, 1821, John T. Irving informed the board by letter that he had been appointed by the state "First Judge of Common Pleas in the City of New York."—Ibid., XI: 555. See Feb 27, 1821.

"On 6 December 1820 a wolf was discovered on York Island near Stuyvesant Woods & Shot at but not taken—he was seen again on the 11th within two or three miles of the City Hall."—From De Witt Clinton's Notes on "Mauzology," in N. Y. H. S. See also N. T. Est. Post, D 13, 1820.

A committee is appointed by the common council to consider the practicability of employing the pavers in the almshouse and the criminals in the penitentiary in the manufacture of porcelain.—M. G. C. (1784-1811), XI: 406.

For the 200th anniversary of the landing of the Pilgrims is celebrated in New York by the New England Society. Religious services are held in the Brick Church, and in the evening there is a dinner at the City Hotel.—N. Y. Est. Post, D 25, 1820.

The common council accepts an invitation from the "Register of the City and County" to honour him by viewing the spacious office allotted to him in the city hall.—M. G. C. (1784-1813), XI: 422.

A letter is received by the common council from Messrs. John and Nicholas Haight, "transmitting, for the inspection of the Members of the Board a part of a piece of Ingrained Carpeting, manufactured by them in the City, it being the first piece manufactured by them, and, as they believe, the first that has been perfectly made in the United States, with a wish that if it was found to bear a critical examination that it might receive the private testimony of the Individuals of the Board in its behalf."—M. G. C. (1784-1813), XI: 422. On Jan. 5, 1821, the committee on arts and sciences reported that the piece of carpeting was "equal if not superior in every respect to the best English Ingrained Carpeting, and that it is a perfect imitation of that article in its best state;" whereupon the resolution was adopted "that this Board view with pride and satisfaction this specimen of the Arts, and the ingenuity and perseverance of our Countrymen in bringing this important branch of Manufactures to perfection in this Country."—Ibid., XI: 448.

The finance committee reports to the common council "that pursuant to authority granted them [see N 13], they selected and instructed General [Jacob] Morton to proceed to the City of Washington with the Vouchers necessary to establish the claim of the Corporation on the United States Government to monies expended during the late war with Great Britain. That after some discouragement and much delay, he has succeeded in obtaining a settlement of all the items in the account, . . . except that for pay to the arbitrators, against the allowance of which it appears, there is a positive rule of the Treasury Department." The amount received by the city is $6,247. The committee highly commends Gen. Morton's services, and the board decides...
to grant him $1,000 for the same.—M. C. G. (1784-1831), XI: 433-15.

19. A public dinner in honour of Edmund Kean is held at the City Hotel.—N. T. Eve. Post, D 28, 1820.

1821

In this year, the Greek war of independence began; it lasted until 1829.—Hazen, Europe since 1815, 624 et seq. [Haydn's Dict. of Dates, 453.

In early this year, the trustees of Columbia College "adopted a new body of statutes, in which the requirements for admission were raised, and the curriculum enlarged and improved." See also Vol. 430.

In this year, the old Bayard mansion, in the block bounded by Grand, Broome, Crosby, and Lafayette Sts., was demolished.—Greatorex, Old N. Y., II: 125. See also 1735, and L. M. R. K., III: 949, 981.

In this year, the Phoenix Coffee House, at the south-east corner of Wall and Water Sts., was demolished. See also L. M. R. K., III: 98a.

In this year, C. Bunker occupied the large double house at No. 39 Broadway (built in 1786 by Gen. Alex. Macomb, and occupied by Washington in 1790), and established here a hotel called the Mansion House.—Haswell, Reminiscences, 121. For the early history of the ground, see L. M. R. K., III: 977; descr. of Pl. 56, I: 422; Man. Com. Coun. (1855), 515; ibid. (1856), 518. For view of the Mansion House, see drawing by C. Burton, in the Brooklyn Series of N. Y. views.

In this year, H. L. Megarey, of 96 Broadway, began to publish "the Hudson River Portfolio from drawings by Wall made in 1820."—Advert on back cover of The Wreath (pamphlet, 1821). The last number of the views was not issued until the autumn of 1825, or early in 1826. One of the plates is reproduced as Pl. 89, Vol. III, and the series is described in III: 571-75. See also Jb 26, 1823.

Henry Brevoort writes to his friend Washington Irving, who is at this time in Europe, concerning affairs in New York, particularly the rivalry between the actors Kean and Cooper, who were dividing public attention. He says: "Our greatest novelty is Mr. Kean. He played sixteen nights in the Anthony St. Theatre to crowded audiences & with enthusiastic applause. A small party of dissentients, composed of Mr Cooper's patriotic admirers protested against Kean's merits... Their admirers have declared open war... On New Year's day he [Kean] dined at Jon R Livingstone with a party of forty persons, among which were Cooper the Bishop and Phili Brasher! Everything went well... and a thousand dollars for a public dinner was given him by about thirty persons at the City Hotel which went off very well. Upon the whole I think Kean's success has been as great or very nearly so, as Cooke's although his merits are certainly not in the same rank."—Hellman, Letters of Henry Brevoort to Washington Irving (N. Y. 1916), I: 133-35.

The common council commends a painting entitled "The Court of Death," the work of Rembrandt Peale, "a native Artist," which is on exhibition at the Academy.—M. C. G. (1784-1831), XI: 456. Peale's letter of thanks is found in metal file No. 45, city clerk's record-room.

The city inspector reports to the common council that the number of deaths during the year has exceeded that of the previous year by 279; that in August "fevers became prevalent, particularly in Bancker Street and its neighbourhood, and confined their ravages, chiefly to the people of colour." There were 199 deaths of the fever in six months, 138 of them being coloured people, "although it is presumed they were not a twentieth part of the population of the city at large."—M. C. G. (1784-1831), XI: 449.

The common council is informed by a committee that the maps and surveys of Manhattan Island and its opposite shore completed by John Randel, Jr., have cost $224,844.68.—M. C. G. (1784-1831), XI: 449. 50. Many of these surveys are preserved in the collections of the N. Y. H. S. and the N. Y. P. L.

12. The city acquires by condemnation proceedings the block bounded by South, Front, Fulton, and Beekman Sts., on which Fulton Market was afterwards built.—Prendergast, Record of Real Estate (1914), 119.

13. The chapel of the "First Congregational Church" (see Ap 29, 1820) in Chambers St. is dedicated by Prof. Edw. Everett of Harvard.—N. T. Eve. Post, Ja 20, 1820. This was the Unitarian Church of the Divine Unity, the first Unitarian church built in New York City.—L. M. R. K., III: 976.

This church was described in 1828 as "a very ornamental edifice, the front of which is faced with white marble, with pillars in bithelum [i.e., bixeledum], and surmounted by a pediment. The interior is very elegant, the pews being finished with mahogany ornaments, carpeted and cushioned; the pulpit is raised on ornamental pillars, with an area and railing in front, before which the pews raised gradually to the rear..."—Goodrich, Picture of N. Y. (1828), 216.

In Oct., 1841, the church being dilapidated, the congregation moved into Apollo Hall on the east side of Broadway below Canal St., in 1845 (s.p.), a new church was dedicated.—Bellowa, The First Congregational Church, etc.

The North River Steam Boat Co. informs the common council that there are, in the company's yard, 500 loads of dried pine wood, "which in the present distress of the poor for fuel they would place at the disposal of the Corporation to be returned to them when requested in the Spring."—M. C. G. (1784-1831), XI: 452.

A fire which starts in a house in Front St. between Fulton Slip and Crane Wharf destroys about 50 buildings. The loss is estimated at $50,000.—N. T. Eve. Post, Ja 24, 1821. The property belonged to the city corporation, which took steps toward the collection of insurance.—M. C. G. (1784-1831), XII: 464-65. See also 29 and F. 5.

"This morning both the East and North Rivers were completely frozen over from shore to shore, a circumstance which we believe has not occurred since the year 1780."—N. T. Eve. Post, Ja 25, 1820. See, however, F 4, 1817.

Because of the extreme severity of the weather most of the clergymen of the city have agreed to take up collections in their respective churches to supply the poor with fuel.—N. T. Eve. Post, Ja 27, 1821.

An "Esquimaux Indian in his Seal skin canoe" is exhibited "in the North river, opposite the Battery. The novelty of the scene brought together an immense concourse of spectators to witness his manoeuvres... About 12 o'clock, he pushed off from the Battery bridge, and with an oar which he held in the middle, with a blade at each end, he propelled his boat through the water with astonishing rapidity, running by and beating several four oared boats with ease. To shew the Iodican method of striking fish, or defending themselves on the water, a target was set afloat, and when he approached within about twenty yards of it, he threw a dart several times into it with great exactness. It is believed there were upwards of two thousand people to witness his extraordinary feats."—N. T. Eve. Post, F 3, 1821.

A printed petition, bearing several hundred autograph signatures, is presented to the common council, asking the board "again to consider the propriety of building a Market on the ground near Fulton-Slip [see Ja 8, Ag 6, O 7, 1816; Mr 24, 1817], now made, by the late configuration [see Ja 24], entirely waste and unoccupied.

"If the Corporation should undertake to dispose of this ground, and not embrace this opportunity to erect a Market, your Petitioners know not where or when it will be in their power to obtain another suitable lot for this purpose, and they deprecate the entailment on posterity of the confined passages, the dirty sewer, the filth, which are, and always will be, attendant on the present Fly Market magnitude."

"So confiden are your Petitioners, that the erection of this Market may be made a source of revenue, that there are individuals among them, who will take the ground, and erect the Market at their own risk, as to remuneration..."

But, your Petitioners cannot but hope the Corporation have not arrived at such a period of embarrassment, and of want of credit, as to disable them from furnishing the community with a wholesome and commodious Market Place, the site of which would necessarily combine, for exhibition and sale, a greater quantity and variety of the necessaries and luxuries of life, than are to be found at almost any Market Place in the world."—From the original petition (printed), two copies of which have the signatures written on them in a dozen papers, fastened together, rolled up in two very long rolls, preserved in metal file No. 33, city clerk's record-room. The endorsement on one of these rolls is "Petitions for Removing the market," and, on the other, "Petition..."
THE ICONOGRAPHY OF MANHATTAN ISLAND

1821 of ... In favour of Removing Fly Market." See also M. G. C. Feb. (1784-1831), XI: 486; De Voc., Market Book, 488. See F 17 and Mr. 12.

A committee on the subject reports to the common council that the cost of placing an iron railing around the Park will be $15,622.—M. G. C. (1784-1831), XI: 435. The board directed on March 19, that a contract for the mason work of the fence to be placed around the Park be executed on April 2, one for the iron work.—Ibid., XI: 499, 570. See Je 25.

The Mercantile Library (see N 9, 1820) is opened in a room at No. 49 Fulton St. For an account of its development, see Man. Com. Coun. (1836), 548-51; Haswell’s Reminiscences, 119. See further, F. 1826.

27 "Franklin," in two open letters to the city corporation, criticizes in strong terms its neglect to erect the market at Fulton Slip, which was projected as early as 1815 (see Ja 8, 1816) to replace the Fly Market, and questions its right to sell the land granted for the purpose.—N. Y. Eve. Post, F 17 and 22, 1821. See F 26 and Mr. 12.

24 It is reported to the common council that at the present time a bill is before the senate which authorizes the president of the United States to retrocede to the corporation the lands at the Battery, either with or without the works erected thereon by the United States.—M. G. C. (1784-1831), XI: 503. However, a letter from Secretary of War John C. Calhoun, read before the board on March 19, stated that a retrocession of the site of Castle Clinton had not been authorized by congress; also that the specific appropriation made by the same act for fortifications in the current year had put it out of his power to contribute to the repairs of the Battery, and obliged him to rescind the conditional promise of co-operation with the board on the execution of that work.—Ibid., XI: 543. See D 18, 1820, and N 27, 1821.

25 A petition is read before the common council from “sundry citizens, ... Oystermens,” complaining that the garrison of the United States troops, stationed on Bedloe’s Island, obstructs them “in the pursuit of their occupation, by taking them out of their Boats, and even threatening fire upon them if they followed their occupation nigh to said island.” Referred to police committee.—M. G. C. (1784-1831), XI: 504.

26 In connection with the question before the common council of regulating and working Third Ave., the written opinion of John Wells is read, in which he says: “The first inquiry ... is whether the third Avenue is a Street ... or ... a public road or highway. The subject is by no means free from difficulty, theo from the reflection I have been able to bestow upon it, I incline to consider the third Avenue rather in the latter than in the former light. It is now the direct and nearest road to and from Hanover Square. It is, if not already, at least over-tuated almost wholly; for the purposes of travelling instead of the old road. It ... has been, and for a long time to come can only be valuable as lands for the purposes of agriculture or Country residences.”—M. G. C. (1784-1831), XI: 515-18.

27 The common council resolves to discontinue the Evening Post as an advertising paper for the board, and to substitute the American in its place.—M. G. C. (1784-1831), XI: 520. For comment on this, see N. Y. Eve. Post, F 27, 1821. This action was ostensibly taken because the Post published the letters of “Franklin.” Also, the American supported the Republican party, to which the majority of the board belonged.—Ibid., Mr. 2, 1821.

28 The common council adopts a law to prevent the tainting of both milk and ice cream. The clause refers to prohibiting the “ringing a Bell of any church in the city on Sunday more than one hour before the commencement of Divine service in said church.”—M. G. C. (1784-1831), XI: 521.

29 The common council directs to be transmitted to the legislature a draft of a law to provide for the expense of extending the Battery, together with a memorial which reads in part: “Within the last few years, the consequence of a violent storm has been the part of the Bull-head of the West side of the Battery ... gave way, and a large quantity of earth was washed into the River ... your Memorialists ... deem it proper, as well for the purpose of preventing the recurrence of a similar misfortune in future as of rendering the Battery more commodious as a place of recreation, that a reef of rock should be sunk in front of it, a stone wall erected thereon, and that the intermediate spaces between the wall and the Battery should be filled in with earth." For this work it is thought necessary to raise about $153,000.—M. G. C. (1784-1831), Feb. XI: 521-24. See Mr. 26, 1821.

The state appropriates $1,000 for the erection of a monument to those who perished on board the prison-ship "Jersey" during the Revolutionary War.—Laws of N. Y. (1821), chap. 67. See Ja 9, 1821.

30 The legislature establishes "the court of common pleas, or county court, of the city and county of New-York." This is to take the place of the mayor’s court, which dates from the year 1665, succeeding at that time the Dutch court of burgomasters and scheepens. The judges of the new court are to be the same as those of the mayor’s court (mayor, recorder, and aldermen), plus a "first judge of the said court," this additional official to be named by the council of the city and governed by the mayor. He must be "a counsellor of the supreme court of this state, of three years’ standing," and he is to hold office "during good behavior, or until he shall have attained the age of sixty." The first judge, or the mayor, or the recorder alone, or together with one or more of the judges, shall have power to hold court. The very same judges shall hereafter have power to hold courts of general sessions of the peace; in other words, both courts, common pleas and general sessions, are to have the new "first judge" added to the bench. As before, the court of general sessions has the power "to hear, try and determine any indictment for any crime punishable with imprisonment in the state prison for life;" the presence of three judges, one of whom must be the first judge, mayor, or recorder, is necessary to hold such court. See further, F 26, 1821.

31 The manuscript volumes, many of them massive, covering the proceedings of this court during the years 1666-1821, are in the custody of the commissioner of records in the Hall of Records.

32 The N. Y. County Agricultural Show holds its spring exhibition, at “a place called ‘Mount Vernon,’ on the East River, just above Cato’s and the Shot Tower.”—De Voc., Market Book, 419. See Ap 11 and S 13, 1822. See further, My 1821.

33 President Monroe’s second term, known as the “Era of Good Feeling,” begins.—Winson, VII: 279, 344. See also N. Y. Eve. Post, Mr. 8, 1821.

34 Stephen Allen is appointed mayor of New York.—N. Y. Eve. Post, Mr. 9, 1821. He took the oath of office on March 12.—M. G. C. (1784-1831), XI: 536. He replaced Cadwalader D. Van, who had himself been appointed by Wm. Paulding (see Ja 19, 1824). Allen’s entire official correspondence as mayor is filed in the city clerk’s record-room. See Jl 27, 1823.

35 A large meeting of citizens is held at the city hall for the purpose of “adopting the means for perpetuating the infirmity [see Ag, 1820] for curing diseases of the eye.” Funds were raised, and a society of the subscribers formed, who met and organized on Ap. 1.—Losing, Hist. of N. Y. City (1884), I: 122. See Mr. 29, 1822.

36 The common council resolves, because the old Fly Market has become “extremely incommodious, and in the Summer season is so offensive as to be very prejudicial to health," to erect a public market upon the ground belonging to the corporation between Bleecker St. and the Bowery, and to cover the proposed market share of $15,000 annually for ten years by tax. The Fly Market is to be removed as soon as the new one is completed.—M. G. C. (1784-1831), XI: 539-41. See Mr. 16 and Jl 9. The new market became Fulton Market.—See D 10. See also descrip. of Pl. 104-b, III: 606.

37 A state convention having been suggested to revise the constitution, the legislature provides that at the annual election in April, the voters shall, by ballots reading “Constitution” or “No Convention,” decide whether they wish such a convention. In case the decision is favourable, it is provided that the number of delegates to be chosen shall be “the same as the number of members of assembly from the respective cities and counties of the state,” such delegates to be chosen at a special election on the Tuesday of June (see Je 19) and the two succeeding days, and to assemble at Albany on the last Tuesday of August (see
NEW-YORK AND HARLEM RAIL ROAD,

DAILY.

FALL ARRANGEMENT.

On and after TUESDAY, OCTOBER 10th, 1848, the Cars will run as follows, until further notice.

**TRAINS WILL LEAVE CITY HALL, N. Y., FOR**

B. EARLIEST KNOWN TIME-TABLE OF NEW YORK & HARLEM R. R., 1848. SEE ADD., VOL. VI.
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

1815-1841

20 Apr. 25

1821. Delegates to this convention were elected in June. —See Je 19.

1822. The New Church in Vanderwater-street, lately erected by the congregation under the pastoral care of the Rev. Mr. Frey, is to be opened on this day.—N. Y. Ev. Post, Ap 19, 1821. The Rev. Mr. Frey originally was a Congregationalist (see Je 22, 1817), but in Oct., 1821, he and his church adopted Presbyterianism, and this became the Vanderwater Street Presbyterian Church.—Greene, 163-64, 354-355; L. M. R. K., III: 932.

1824. At the regular election of officers on the next succeeding days a ballot was taken resulting favourably for a convention to revise the state constitution (see Mr 1). —N. Y. Ev. Post, My 5, 1821.

1825. Another appeal for the election of anti-Tammany city officers and the correction of “Corporation Abuses” is made by Editor Coleman. It states in part: “No one can stand forth and deny the oppressions and abuses of the corporation of this city. No one can deny, that we annually expend about eight hundred thousand dollars. No one can deny, that during the last three years, our assessments on the property of freeholders have amounted to more than seven hundred thousand dollars. No one can deny, that our city taxes, for the last three years, have averaged over two hundred thousand dollars per year. Some say that the present mayor, Stephen Allen, Esq. has estimated, that for the year 1824, must be two hundred and forty-four thousand dollars! We need not mention many other grievances which are intolerable, and which cannot longer be borne in silence.”

1826. “For several days past, many overwhelming accusations have been preferred against our city rulers. Enough has been said to confirm any administration to lasting scorn and annihilation. No defence has been set up. . . . The friends and hirelings of the common council abandon all ideas of vindication.—They dare not even attempt a justification of our municipal oppressions. We must have a change of men and measures. Our charter must be amended—our corporation laws must be revised—our enormous and destructive expenditures must be reduced, or inevitable ruin awaits us. Every candid and reflecting citizen knows and feels that this is true. . . .” —N. Y. Ev. Post, Ap 25, 1821.

1827. Ralph Bulkeley offers to the common council, under certain conditions, an invention of his called the “Fire Shield,” by means of which persons may approach within a few feet of a burning building with safety.—M. C. C. (1874-1831), XII: 591.

1828. The finance committee reports to the common council that the advantages derived by the public from working the convicts at the penitentiary appear to be much less than the cost incurred. It is a question whether “as a punishment, the Working of these Men, has the effect expected to be derived from it,” and the fact “that a large proportion of the convictions at the Sessions Court, and Old Offenders,” shown “the System is wrong, in some of its essential parts.” The chief evil in the present system appears to be the promiscuous confinement of all grades of prisoners, by which first offenders come under the bad influence of hardened convicts. To remedy this, the committee suggests the erection, as soon as possible, of “an addition to the present building, so constructed as to contain such number of cells, as will be at least sufficient to place into separate rooms all offenders of the same habits as are hardened as to require it.” —M. C. C. (1874-1831), XII: 606-8. See N 8, 1824.

1829. The suburban hotel at 61st St. and the East River, formerly called Mount Vernon (see Ap 11, and S 15, 1805), is reopened by Wm. Niblo, under the name of Kennington. It was a popular resort for several years.—Howell, Reminiscences, 124. See, further, Mr 26, 1836.

1830. Napoleon dies at St. Helena.—Shawe, Life of Napoleon Bonaparte, IV: 234-35. See also N. Y. Ev. Post, Ag 20 and 21, 1821.

1831. “We think we may safely challenge any part in the United States, to shew off with the city of Gotham, in point of filthy, dangerous, dusty, dirty streets, gutters and alleys. In all these pleasant particulars we venture to present an example to ourselves, (and that is saying not a little) the present season. The black regiment of sweepers is dismissed, and our eyes, furniture and clothes will be all the better for it. But that is not enough. The evil is a grievous one, and requires to be reformed altogether.”
THE ICONOGRAPHY OF MANHATTAN ISLAND

1821 But this will never be the case, so long as our corporation persist in maligning the whole of the dirt in our streets a source of revenue. 9 Never did a more mistaken notion of economy enter the heads of a grave body. When they are content to appropriate the whole profits arising from the manure of the streets, to pay for the labor of removing it, then will the streets of New York be as well cleaned and kept so, as those of our neighbors, Philadelphia and Boston, and not before. The first thing you hear from strangers arriving here in the summer months, is complaints and reproaches against the state of our streets. The practice of cooling some of the principal ones by water-carts is excellent, but to derive the full benefit of this practice it should be preceded by cleaning and sweeping. —N. Y. Ev. Post, My 9, 1821.

14 Messrs. Price & Simpson have obtained a lease of the Park Theatre for seven years, which will be completed by the end of September. Mr. Price left this city yesterday in the James Monroe for London, with a view of reinforcing his company, and bringing out such talent and novelty as cannot fail to secure the managers a rich harvest of patronage. When their exertions for many years are considered, together with their late losses, it is but justice to say, that they merit public protection.

18 The proprietors of the Park Theatre, have made considerable improvements in re-building it. It has a light and elegant roof, covered with zinc, and the accommodations of the interior are in every respect improved. It will be more comfortable in winter, and equally as cool in summer; and if the front of the Theatre is rough cast and painted, and a light iron balcony from the second story, it will be a great ornament to the city. —N. Y. Ev. Post, My 19, 1821.

The common council is informed that four Indians of the Cherokee Tribe have applied to the almshouse for pecuniary relief. The committee on charity is authorised to grant any necessary aid. —M. C. C. (1784-1831), XI: 635.

The collectors of taxes of the several wards inform the common council that on account of the stagnation of business they have not been able to collect with that facility they formerly experienced. —M. C. C. (1784-1831), XI: 626.

20 There are ten markets in the city, and these contain 206 stalls. —M. C. C. (1784-1831), XI: 618.

29 Junia Curtis, of Albany, presents a petition to the common council stating that for several years past he has been exploring various parts of the country in search of "Pet Coal." He is now satisfied that quantities of it may be found adjacent to the waters of the Hudson River, and he proposes that the board, as an inducement for searching for that useful article should offer a bounty for its discovery. This is referred to the committee on arts and sciences. —M. C. C. (1784-1831), XI: 634.

The common council authorizes the street committee to have the brick in Hudson St. re-numbered. —M. C. C. (1784-1831), XI: 634. See Ja 5, 1822.

The superintendent of repairs is directed to purchase a bell for $65 and to place it in the steeple of Centre Market to sound the alarm in case of fire. —M. C. C. (1784-1831), XI: 657; De Voe, Market Book, 461-62. See Ji 8, 1822.

The common council resolves to buy 50 ft. of imported "French Flax Hose" in order to give it a trial. The cost of said hose is $6.41, about half the price of good leather hose. —M. C. C. (1784-1831), XI: 657-58. See Ji 21, 1823.

The common council grants a petition of the justices of the marine court for a razing over their windows, and orders that a razing be erected "around the East end of the Hall similar to the one around the Grand Jury Room." —M. C. C. (1784-1831), XI: 660.

The governors of the New York Hospital announce to the public that the Bloomingdale Asylum for the Insane (see My 7, 1818) has been completed and will be opened on June 1. "This Asylum is situated on the Bloomingdale road, about seven miles from the City Hall of the city of New York, and about 300 yards from the Hudson river. The building is of hewn free stone, 21 ft. in length and 60 feet deep, and is calculated for the accommodation of about two hundred patients. Its site is elevated, commanding an extensive and delightful view of the Hudson, the East river, and the harbor of New York, and the adjacent country, and is one of the most beautiful and healthy spots on New York Island. Attached to the building are about seventy acres of land, a great part of which has been laid out in walks, ornamental grounds, and extensive gardens." —N. Y. Ev. Post, My 30, 1821; L. M. R. K., III: 973.

For further description, see Goodrich, Picture of N. Y. (1828), 312; Man. Com. Coun. (1845), 264; History of N. Y. in 1846, 44. The asylum is shown in N. Y. Mirror, XII: 241, and in the Peabody Views. In 1820 (q. v, F 18), Columbia College acquired the grounds, and in 1824 (q. v, Ag) — the Asylum moved to White Plains in Westchester County.

June 4 The corner-stone of St. Luke's Church is laid, at Greenwich, by Bishop Hobart. —N. Y. Ev. Post, Je 5, 1821. See also L. M. R. K., III: 973. It was dedicated on May 16, 1822 (q. v., and is still standing (1926).

"We are informed that Mr. [Edmund] Kean, previous to his departure from this country [on June 6], put into effect his original intention when he first arrived among us, and erected a splendid monument [in St. Paul's Churchyard, London, to the memory of the celebrated Cooke." —N. Y. Ev. Post, Je 5 and 7, 1821. The monument is shown on PL 90, Vol. III.

The common council resolves to accept from the Second Regiment, First Brigade, New York State Artillery, the "Standard which was displayed at the first inauguration of George Washington, as President of the United States." The regiment feels that, in placing this thing connected with our illustrious Citizen, "there is a particular interest," this standard possesses "a species of Sanctity," and is "worthy of being preserved to after times," and that the "most proper place of Deposite would be in the hands of the Fathers of our City." —M. C. C. (1784-1831), XI: 673-74. The letter to the common council offering the flag to the city is preserved in the Archives of the City, and is dated June 19, 1821. The presentation took place on June 25 (q. v.). See also N. Y. City. (1825).

The common council grants to Jeremiah Thompson, representative of an association of merchants and shipwreckers for establishing a telegraphic communication at New York, permission to establish an answering signal at the flagstaff to connect with Staten Island. —M. C. C. (1784-1831), XI: 674.

The General Society of Mechanics and Tradesmen (see N. Y. State. Art. 1820) lays the corner-stone of a Mechanics' School and Apprentices' Library at No. 21 Chambers St. (see Ap 9). The building was opened Nov. 26, 1821, and continued to be used until 1828, when a building on Crosby St. was purchased for larger accommodations. —Annals of the Society (1822), 67-68; M. C. C. (1784-1831), XI: 674; N. Y. Ev. Post, Je 14, 1821. The letter of invitation to the mayor and corporation to attend this ceremony is in file No. 76 of city credit-room. See Fe 16, 1822.

On this and the two days following, delegates to the constitutional convention were elected as provided for in the legislative act of March 13 (q. v.). —N. Y. Ev. Post, Je 23, 1821; Jour. N. Y. Const. Convention, 3-6. The convention assembled at Albany on August 25 (q. v.).

The "Telegraph at Staten Island, recently erected by the merchants of this city, under the direction of Capt. Smail. C. Reid," is tested by a committee of merchants, and there is "scarce a single misunderstanding" of the messages by a boy stationed at the Battery flagstaff. "The simplicity of this machine, and the ease with which it is conducted, exceeds, perhaps any thing of the kind that has been got up in this or any other country. It consists of an upright and a centre, which may be managed by a boy 12 years of age. The alphabet is divided into four parts, with a distinct representation for each division so that only six motions are required to exhibit the 24 characters made use of. The alphabet is devoted to three distinct purposes—first, substituting Letters for private signals which are much easier exhibited. 2d, references to arbitrary significations; and 3d, Telegraphing in the usual manner by spelling and making sentences." —N. Y. Ev. Post, Je 26, Ji 3, 1821.

The flag which was used at the inauguration of George Washington as first president of the U. S. is formally received by the city from the Second Regiment of State Artillery (see Je 11). The regiment parades in front of the city hall, and its commander, Col. Manley, makes the presentation. An address of thanks is returned by Mr. Peck, 26, 1821. The flag is still (1926) in the possession of the city, preserved in the Metropolitan Museum of Art. See Ann. Rep. of the Art Commission (1921), 11-17.

The common council passes a resolution extending the eastern line of the park fence agreeable to a map proposed by the committee on public lands and places. —M. C. C. (1784-1831), XII:
CHRONOLOGY: INVENTION AND PROSPERITY: 1815–1841

On July 9, the board ordered that it be connected with the iron fence on the upper park.—Ibid., XI: 717–18. On Aug. 20, the fence was being erected around the park in front of the city hall.

—Ibid., XI: 768. The issue of the iron fence (see F. G. 5) included the erection of four marble columns which support the iron fence; these are said to be an expansion of the former framework.—N. Y. Mirror, V: 213. See also Man. Com. Coun. (1588), 621. See, further, II, Jg, Ag 29, and D 31.

The project of erecting a market's exchange is brought before the Chamber of Commerce and referred to a committee.

On Sept. 4, the committee reported that they considered the project expedient and had petitioned the legislature for an act of incorporation with a capital of $500,000. This act was approved.

Bishop, A Chron. of 150 Years, etc., 53–54. See J. 27, 1825.

"Yesterday we were all in a bustle celebrating the 4th July. Every native American was quite delighted with the numerous orations, harangues, feu[al] de joie &c which had been preparing for weeks for this patriot's day. Business has, however, suffered, but not entirely; for this city the different merchants & storekeepers have formed societies for preventing Sales by Auction pleading themselves not to purchase anything at them for a certain time, What the Auctioneers will do I know not."—From a letter written by George N. Gracie, of New York, to his uncle, July 5, 1821, in Tomlinson collection of N. Y. P. L.

Peter Jay writes to his father: "There is now so much idle capital in the City that upon pledges of stock money can be borrowed at 5% per. Ct. Stock of all kinds is enormously high; even 5% per. Ct. Stock sells at 7% per. Ct. above par. . . . There is generally a fashion in the money market as elsewhere. Some years ago it was the fashion to employ capital in Manufactures; nobody does so now."—Corresp. and Pub. Papers of John Jay, IV: 452.

The "Black House on Mill Rock, Hall Gate," built in 1814 (q. v., J1 153), is consumed by fire.—National Advocate, J 7, 1821.

Several inhabitants having petitioned for the erection of a new market on the "Canal Street Basin," the finance committee reports unfavourably on the project. It states that the city has recently taken measures for the removal of the Fly Market at an expense of $200,000, the reason assigned being that the Fly Market "stood up, in a busy world," and that the Mammoth Sewer of Canal Street" should be a valid objection against building a market on the site alluded to. The committee feels that a compliance with the petition would be a "wanton waste of public Treasure," and that "individual speculations ought not to be encouraged by mis-applications of public Money." The common council is therefore resolved to deny the request.—M. C. C. (1784–1831), XI: 714. See Mr 12 and Ag 20.

A law concerning the imprisonment of slaves is presented by the mayor to the common council, and is passed.—M. C. C. (1784–1831), XI: 725.

The city pays Tucker & Woodruff $1,000 on account for building the Park fence (see J. 35).—Journal G, 153, comptroller's office; M. C. C. (1784–1831), XI: 727. On Oct. 15, they received $2,500 for mason work for the fence.—Ibid., XII: 70. See also Ag 20.

A recommendation is presented to the common council that, in the construction of wharves, spaces he left between the planks, in such a way as to enable persons who might accidentally fall from them into the river to regain the top of the wharf.—M. C. C. (1784–1831), XI: 732.

The common council resolves that the engine and hose-cart buildings be kept near the bridgewell removed; and that the superintendent of repairs be authorized to contract for building a one-storey brick house for Engine No. 25 on the piece of ground opposite the Rotunda.—M. C. C. (1784–1831), XI: 736–37.

The board grants engine No. 28 to the inhabitants of Manhattenville, and passes a resolution to build an engine-house there. July

The common council empowers the watch committee to devise a painted plate which the city watchmen may wear while on duty, if they prefer, on the front of their own hats, instead of wearing the caps now in use.—M. C. C. (1784–1831), XII: 70. The caps had been worn by the members of the watch for over a century.

A public meeting at the city hall having been called by certain clergymen for "the purpose of devising measures to prevent the profanation of the Lord's day," a proceeding which many New Yorkers consider "an attempt to encroach upon the liberties of the citizen," a great number of people assembled at the appointed time and place, vote donations to the amount of $10,000 for a new building. "Most of the citizens of New York deem it inexpedient, that the Clergy should interfere with the local concerns of the city, or the Police thereof, and that such interference is highly improper."—N. Y. Eckle Post, J1 24, 25, and 26, 1821. See also ibid., Ag 4, 1821, and Haswell's Reminiscences, 144.

The independence of Peru is proclaimed.—Winson, VIII: 374.

The cornerstone of the Eighth Presbyterian Church is to be laid at Greenwich on this day.—N. Y. Eckle Post, J1 30, 1821. See also L. M. R. K, III: 911.

André's remains are disinterred at Tappan, under the personal direction of James Buchanan, British consul at New York, placed in a costly coffin, and borne to New York to be placed on board the "Phaeton" frigate for transportation to England.—Sargent, Life and Career of Major André, 409–10. See also N. Y. Eckle Post, Ag 1, 6, 9, 11, and 13, 1821.

Certain inhabitants of the southern part of the city inform the common council that "when the intended Removal of the Fly Market shall take place, they will be put to great inconvenience unless accommodated with another market nearer to them." They ask that a market be erected at Old Slip.—M. C. C. (1784–1831), XI: 765–66. See O 1.

The board passes a resolution to open 34th St. from the easterly side of Second Ave. to Third Ave.—M. C. C. (1784–1831), XI: 776.

A committee reports to the common council that John C. Stevens and Robert L. Stevens agree to put on the ferry from Barclay St. to Hoboken, in place of the two team boats now in use, a "very superior steam Boat from 90 to 100 feet on deck, and 42 feet beam," to be built of the best cedar and oak. The committee believes that, among other advantages, the "Steam Boat will make the passage in less than half the time taken by the Team Boats."—M. C. C. (1784–1831), XI: 777–79. See Ap 24.

The city pays B. Birdall $4,000 on account for the "Iron Fence at the Park."—M. C. C. (1784–1831), XI: 782. On Oct. 15, he received an additional $2,000.—Ibid., XII: 70. On Dec. 10, $2,500 more.—Ibid., XII: 143. See also Journal C, 173, comptroller's office; and J9. See, further, Ap 15, 1821.

"The Board appointed to select an address for the opening of the new [Paris] Theatre. They agreed to award the prize to the author of the value of $590) to Charles Sprague, of the State Bank, Boston. There were upwards of 60 competitors for the premium . . . .—N. Y. Eckle Post, Ag 23, 1821. The rejected addresses and the prize address were printed in New York in this year. A first edition of the volume was sold at Anderson's, Nov. 20–22, 1822.

A convention of delegates to revise the state constitution (see J 19) assembles at Albany, and "every thing wears an auspicious appearance," writes Ogden Edwards, counsel to the corporation and one of the delegates, to Mayor Allen. Daniel D. Tompkins is chosen as presiding officer.—From the original letter, filed in city clerk's record-rooms, Journ. N. Y. Const. Convention, 3–7; N. Y. Eckle Post, Ag 28, 1821. The sessions of the convention continued until Nov. 10 (r. t.).

The rebuilt Park Theatre is opened with a performance of the comedy "Wives as they were, and Masts as they are" and the melodrama "Tereze, or the Orphan of Geneva." The prize address, written by Charles Sprague of Boston (see Ag 23), is spoken by Mr. Simpson.—N. Y. Eckle Post, 5 and 2, 1821. Hugh Reinaige was the architect of the new theatre, which accommodated 2,500 persons.—Ibid, 5, 1821. A 5-go interior view engraved by Lannon, a brief history of early theatres in N. Y., and a detailed description of the new Park, appeared in ibid. See also "Communication" in ibid., S 5, 1821; a description of the building, it was in 1828, in Goodrich, Picture of N. T., 378–79; and descrip. of Pl. 91, III: 577.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1821 A "Tremendous gale" strikes New York causing much damage. "When the gale was at its height it presented a most awful spectacle. The falling of slate from the roofs of the buildings, and broken glass from the windows, made it unsafe for any one to venture into the streets. . . . The tide, although low when the gale commenced, rose to an unusual height, overflowing all the wharves and filling the cellars of all the stores on the margin of the East and North rivers. Great quantities of lumber, and other property on the wharves, have either been floated off or been damaged."

"The wharves on the North river are all injured, the frame work being generally started from the foundation. . . . The Steam Boat dock at Market street is destroyed. The Battery is partly inundated, the earth washed away as far as the first row of trees, and the lamps in front of the Flag staff, together with the benches, all carried away. . . . The wharves on the East river were very much injured, some entirely destroyed—all so much that its dangerous for carts to venture on them. . . . Some houses were unroofed and blown over, in the upper part of the city. One in Broadway, near the Lead Factory was blown down and killed ten cows. . . . A number of trees were prostrated in the Park. . . . The brick bats, tile, slates, lead, etc. from the tops of houses, and limbs of trees, were flying in every direction. One brick yard was struck by a board in the Bowery, and had his arm broken—The Bloomingdale Road we understand is almost impassable by the falling of trees." Besides this, five boats were destroyed and eight injured in the wharves of the city, about ten chimes were blown down, and many ships in the harbour were damaged.—N. Y. Ev. Post, S 4 and 5, 1821.

19 The corner-stone of the Central Presbyterian Church is to be laid in Broome St. on this day.—N. Y. Ev. Post, S 18, 1821; M. C. C. (1874-1891), XII: 16. See also L. M. K., III: 950.

19 The title of the semi-weekly edition of The American (see Mr. 5, 1825, 1826) is changed to New-York American.—Letter of Clarence S. Brigham to the author.

20 Gas-lights are tried at the Park Theatre, and found to be very satisfactory. "The color of the light is whiter than that of oil & more brilliant. We understand that the proprietor proposes to the owners of the theatre, to furnish ample light for the house at a much less expense than it is done at present, and will warrant it would be economical for the house, free of smell, but what is of more consequence, free of that degree of smoke which is not only injurious and offensive to the eyes, but proceeding from lamps, is nearly ruinous to the light skilful dress of the ladies."—N. Y. Ev. Post, O 1, 1821.

20 During the year ending 00 this date, there were 4,028 arrivals at the port of New York.—Arrivals of Alien Passenger and Immigrants (1891), table 7, p. 64.

20 Oct. 1821. A letter directed from Michael Fagg, teodering to the common council a large medallion of the late Gen. Washington, to be placed in the scroll or filigree work of the centre gate at the south end of the park. Referred to a committee.—M. C. C. (1784-1813), XII: 37.

20 A memorial is received by the common council stating that a desire has been expressed by several citizens "to adorn the Columns at the South End of the Park, with the Busts of the Four late Presidents of the United States" also to place in the centre of the park a statue of the "Great Washington." Referred to a committee.—M. C. C. (1784-1813), XII: 37. See Mr 6 and 18, 1822. A list of articles deposited in the corner-stone was published in N. Y. Com. Ady., O 2, 1821. When the columns were removed, this account was reprinted in the same paper, for Dec. 17, 1847, and a discrepancy noted between the articles enumerated in 1821 and those found.

20 The common council passes the following resolutions: "Resolved that whenever the Corporation shall deem it expedient to Remove Fly Market, that part thereof known as the Fish Market be carefully taken down and the Materials removed to the Old Slip."

20 Resolved, that a Market be built at Old Slip [see Ag 20] between Water and Front Streets, under the direction of the Market Committee, and that such part of the above materials as are suitable used in the construction thereof."—M. C. C. (1784-1813), XII: 47-48. This was the beginning of Franklin Market.—L. M. R. K., III: 958. See Je 10 and 24, 1822.

"The new stone Shot-Tower, erecting by Mr. G. Yule [see Jl 14], at Bellevue between the New Alms House and Kensington House, and which had attained the height of about 110 feet," falls, "breaking off about 16 to 20 feet above its base."—N. Y. Ev. Post, O 8, 1821; descrip. of Pl. 102-2, III: 601. The cause of the occurrence is assigned to the "repeated heavy blasts among the rocks in the neighborhood, jarring the wall while gone."—N. Y. Gen. & Gen. Adv., O 8, 1821. See Mr 14, 1823.

In a letter to his father, Peter Jay says that, at the convention for revising the state constitution, "The discussion regarding the appointment of justices of the peace has produced violent animosity between the followers of Mr. V. Beuren and the N. York delegation, and the latter seem to me to be alarmed and to be acting freely."—Corres. and Pub. Papers of John Jay, IV: 453. See N 15.

The stationers and bookellers of the city complains to the common council of "Peddlers vending Quills in the Streets to the Injury of established Traders."—M. C. C. (1784-1813), XII: 56.

A committee is authorized by the common council to plant trees, and to plant them in the Park and on the Battery during the ensuing winter.—M. C. C. (1784-1813), XII: 68.

The cornerstone of an English Lutheran Church is to be laid to Walker St. near Broadway on this day.—N. Y. Ev. Post, O 20, 1821; M. C. C. (1784-1813), XII: 55. This became St. Matthew's—L. M. R. K., III: 929. The church was opened on Dec. 22, 1822 (q. v.).

Joseph Cowell, the comedian, arrives in New York. In 1844, he wrote the following impressions of his first visit to the Park Theatre. "The exterior of the theatre is more magnificent than any other looking place I had ever seen appropriated to such a purpose. . . . The house was excessively dark; oil, of course, then was used, in common brass Liverpool lamps, ten or twelve of which were placed in a large sheet-iron hoop, painted green, hanging from the ceiling in the centre, and one, half the size, on each side of the stage. The fronts of the boxes, were decorated, if it could be so called, with some continuous American ensign, a splendid subject, but very difficult to handle properly, but this was designed in the taste of an upholsterer and executed without any taste at all; the seats were covered with green baize, and the back of the boxes with whitewash, and the iron columns which supported them covered with burnished gold and looking as if they had no business there, but had made their escape from the Cow. The audience came evidently to see the play, not to be pleased, if they possibly could, with everything; the men, generally, wore their hats; at all events, they consulted only their own opinion and comfort in the matter; and the ladies, I observed, very sensibly all came in bonnets, but usually disposed themselves of them, and tied them, in large bunches, high up to the gold columns; and as there is nothing a woman can touch that she does not instinctively adorn, the varied colours of the ribbands and materials of which they were made, were in my opinion a vast improvement to the unfurnished appearance of the house."—Cowell, Thirty Years passed among the Players in Eng. and Am. (N. Y., 1844), Part II, p. 57. See O 31, 1822.

As a result of a resolution on the subject adopted on July 1 (M. C. G., 1784-1851), XI: 726, an ordinance is presented to the common council prohibiting the practice of "Washing Horses at the Public Pumps in the City, and of Dyers and Scourers washing articles of their trade at the Pumps." This is passed by the board under the title of a "Law respecting the Public Pumps and to prevent the Drying of Cloth in the Streets."—Ibid., XII: 92.

The state constitutional convention, which began its session on Aug. 28 (q. n.), ends its labours, and 98 out of 106 delegates append their names to the amended constitution. The engrossed document is deposited with the secretary of state, together with an "address to the people," a part of which reads: "Probably, the amended constitution, now submitted, is not, in all its provisions, in exact accordance with the desires of any individual member of the con-
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

1821
Nov. 10

Invention; but in the spirit of mutual concession and compromise, we have come to a result which we hope the people, actuated by
the same spirit, will approve and ratify." By a resolution of the
convention, a special election was fixed for the three days beginning
"on the third Tuesday of January next," at which time ballots for or against the constitution were to be held.

The following are some of the significant changes embodied in the new constitution: The long preamble of the former document (see My 8, 1777) is entirely omitted. The senate is to consist of 32 members, who must be freeholders. The assembly is to number 128. Members of the legislature are prohibited from receiving any appointment, or salary, from the governor or senate during their term, and members of congress and persons holding judicial or military offices under the U.S. are declared ineligible. Compensation of members shall not exceed $7 per day. The governor's term is shortened from three years to two. The present governor, as well as the members of the present legislature, shall continue in office until Jan. 1, 1823, and thereafter the political year shall begin on Jan. 1 instead of July 1. Whereas the first constitution made no distinction between blacks and whites in qualifications for suffrage, the "person of colour" must now meet a more rigid test as to residence and property holding. The council of appointment is abolished. Judges are to be named by the governor with the consent of the senate; other state officers, in general, are chosen by the legislature; members of the supreme court of York, are selected by the common council, and it is provided particularly that the common council in New York shall appoint justices, assistant justices, and their clerks. The provision of the old constitution making clergymen ineligible for any civil or military office, after being a subject of much debate, is continued. Lotteries are prohibited. A census is to be taken once in ten years instead of once in seven, and a new article is introduced (Art. VIII) providing for amendments.—Jour. N. Y. Const. Convention, 523-60; Lincoln, Const. Hist. N. Y., I: 192-221, 637-347. For a comment on the amended constitution, see Peter Jay, one of the delegates from Westchester Co., see N 15. The document was ratified by the people, Jan. 15, 1822 (g.o.).

Mayor Allen sends a communication to the common council stating that the great number of tavern licenses issued gives a "facility to the procurement of Ardent Spirits which was of no

calculable injury to the Morals, the property and the Happiness of Society," and recommending an application to the legislature for permission to lay a higher duty upon such licenses and thereby

restrict the number. —M. C. G. (1784-1831), XII: 96; N. Y. Conv. Jour., N 16, 1821. On Dec. 24, the board directed the

tax to be levied on the highest price for a license from $55 to $100, increasing the lowest price from $10 to $15, and providing that licenses should be granted by a board of commissioners instead of by one person. —Ibid., XII: 161-65.

Peter Jay writes from New York to his father: "The Convention

adjourned on Saturday [Nov. 10, 1821], and I immediately

withdrew from the steamboat and arrived here on Sunday Morning.

You will see the new Convention [constitution] in the newspapers.

Many of the Democratic members were dissatisfied with it, but did not dare to separate from their party. I think its chief defects are making the right of suffrage universal, rendering the judges of the Supreme Court dependent, and vesting the power of appointment in almost all instances in the legislature. There seems to be a passion for universal suffrage pervading the Union. There remain only two States in which a qualification in respect of property is retained. When those who possess no property shall be more numerous than those who have it the consequence of this alteration will, I fear, be severely felt. . . .

The builders are now roofing the new houses in Walker Street. The Lutheran Church in that Street is begun, and the founda-

22

This day, at 12 o'clock, will be added, to the American Mu-

seum (where it will remain a few days only) Williams' Patent Rai-

way and Fancly Coach. The persons sitting in the coach can move themselves forward very rapidly, with a slight exertion. There is one now in the Boston Museum, which shall be admired, particu-

larly by the ladies, being a pleasant exercise. (This also shows how steam will drive carriages.) Also, a carriage, similar to one the Hon.

Wm. Gray has on his wharf in Boston on which one man drew 4,500 lbs. This Railway, the patentee considers far cheaper than any other (good) one ever offered to the public, in Europe or America; he will attend, to give further information on the subject; he

believes that a Railway, on this cheap plan from New Brunswick to Trenton, &c. to carry passengers, &c. by steam, would be very

useful and profitable."—N. Y. Eve. Post, N 22, 1821.

Dec. 10

A memorial is received by the common council from the direc-

tors of the New York Eye Infirmary stating that the institution

had been founded in this city for the cure of indigent persons

afflicted with blindness and other diseases of the eye. The institu-

tion is now in complete operation, and the number of cases pre-

sented to it far exceeds any expectation. Eleven hundred persons

have been treated in the last two years. The funds for the pay-

ment of the salary of the superintendents and the small voluntary contributions of individuals are wholly inade-

quate, and therefore the patronage and aid of the corporation are

requested. This was referred to the committee on charities.—

M. C. G. (1784-1831), XII: 134-35.
The common council agrees that the stands in Fulton Market ... a great variety of handsome appendages. No part of the United States has such a numerous collection of villas within so small a compass; nor is any ride in this country made so cheerful by the hand of art, as the first six miles on the Bowery road; and, indeed, the whole distance to Haerlem Bridge. Between Haerlem heights, and the bridge, is built the village of Haerlem on both sides of a small creek. It contains about seventy or eighty houses; and among them several country seats, belonging to citizens of New York; together with a church, of the Dutch communion. The appearance of this village is cheerful and pleasant. On a plain at a small distance from this village are the New York race-grounds.—*Travels*, by Timothy Dwight, 448-84.

In this year, the congregation of the First German Reformed Church sold its building at 64-66 Nassau St. to the South Baptist Church and moved to 31 East St.—*New Deeds*, CLIX: 405.

In this year, Scottish weavers built their homes and workshops in West 17th St., between Sixth and Seventh Aves., and named the locality "Paisley Place." Forty years later, these buildings were still standing.—See view and description in *Man. Com. Coun.* (1853), 617-33. See also Ap 26, 1815.

This year, Isaac T. Ludlam, city surveyor, made a map of the Common Lands, to show how the old lots laid down by Goerck's map of March 1, 1796 (p. 2) were affected by the laying out of avenues and streets under the commissioners appointed in 1807. Ludlam's map is filed as Map No. 135, in bureau of topography, borough president's office. See also F 15, 1817 and descrip. of A B, No. 18, Feb. 6 (on Ludlam) in real estate bureau of comptroller's office, Municipal Bldg.

For view of Murray St., in 1822, showing Dr. Mason's church, see A. Pl. 17, Vol. III.

For view of the city hall, Park Theatre, Broadway and Chatham St., 1822, see *Man. Com. Coun.* (1857), 24.

"It will be admitted by every one that as a measure of general convenience nothing can be so advantageous as the incorporation of the corporation, more urgent than the numbering of our houses or lots. The suggestion has often been made, sometimes so far attended to by the Board as to induce them to appoint a person to undertake it, but it has never been accomplished. Last year a formal petition was presented in favor of one particular street and granted [see My 28, 1821]; but it was found out that it was too late in the season, as the city directory was made up to square with the old numbers. But it was proposed by a Committee that the numbering of all our houses should be postponed to the present year, and that the work should then be begun in sufficient season, to extend it to the whole city. The time has arrived; and we humbly hope that one or two competent persons will be specially appointed to enter upon the business and to proceed with it, without which it will all be finished."—*N. Y. Ev. Post*, Ja 5, 1822. See Mr 4.

Evan Lewis, vice-president of the American Convention for the Abolition of Slavery, informs the common council by letter of a resolution passed by the convention on Nov. 29 thanking the board for the use of the common council chamber for this meeting. He also wrote at some length of the objects and the vast importance of the cause in which the convention was engaged.—*M. C. C.* (1784-1812), XII: 174-75.

The common council resolves that "Cross Lane" be received by the corporation as a public street agreeable to a map filed in the street commissioner's office by Samuel Jones in 1806.—*M. C. C.* (1784-1812), XII: 180. Cross Lane was east of Broadway, between Bleeker and Jane Sts. It is now known as Great Jones Alley, and as Shinbone Alley.

At a special election held on this and the two following days, the new constitution, adopted by the convention of 1821 (p. 2), Gal 28 and N 10, was approved by the voters of the state.—*Lincoln, Const. Hist. of N. Y.* 1 192, 752, 754. Several of the most important provisions took effect on the last day of February, 1822, the legislature having been extended for that purpose. The meetings of the Board in March, elections under it were held on the first Monday in November, and the whole went into effect on Dec. 31.—Ibid. See also Mr 4, 1822, and Ja 6, 1823.

"The revenue arising from Fulton Market is much greater than the most sanguine of its friends ever calculated upon.—That part of it which has already been rented, amounts to nearly $9,000 per annum, and when it is completed and the whole under
1822. The stepping-mill was gratified petition.

CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

The stepping-mill was gratified petition.

The Massachusetts legislature passes an act establishing the city of Boston. This is known as its first city charter, and by it the municipal government of Boston was changed from the town form to that of a city. The charter was approved by the people on March 4, and the new city government was organized in Faneuil Hall on May 1 with John Phillips as mayor. -Winson, Mem. Hist. of Boston, II: 215-25.

The adoption of the new constitution (see JL 15) is celebrated as a "jubilee" in New York City. Flags are displayed on the forts, the building, and the public squares; church bells are rung, and salutes are fired from 52 pieces of cannon (representing the 52 counties in the state). Gen. Morton's corps of artillery parades from the Battery to the city hall. At 2 p.m., the corporation received the congratulations of the citizens and the military. In the evening, the city hall, the Park Theatre, and other public places were illuminated.

The adoption of a resolution to number the houses in Forth, Hudson, Harman, Cherry, and Greenwich Sts.-M. C. C. (1784-1831), XII: 236.

At a general meeting at Washington Hall, it is resolved "That an equestrian statue of bronze, with appropriate ornaments and inscription, be erected in some conspicuous part of this city, to the memory of George Washington, the illustrious Father of his country, in a style commensurate with his fame, and corresponding with the dignity and character of the metropolis of this important state." A committee of 18 prominent persons is appointed to carry the resolution into effect and to confer with the corporation on the subject.-N. T. Eve. Post, May 7, 1822; descrip. of Pl. 100, III: 592. See Mr 18 and Ap 4. For earlier unsuccessful attempts toward this end, see D 15, 1802, and Mar 4.

The common council appoints a committee to confer with a 18 committee already appointed by a meeting of the citizens of New York City on March 6 (q. v.), for the purpose of adopting measures for erecting a statue of General Washington.-M. C. C. (1784-1831), XII: 265. On Dec. 9, the board was informed that the cost of erecting this statue would be $50,000. -Ibid., XII: 594-85. See O 1, 1821, and Ap 14, 1823.

The legislature authorizes the common council, if necessary, "to cause public markets to be erected and kept over the waters of the East and North rivers adjoining to any of their docks or wharves in the city of New York." - Laws of N. Y. (1822), cap. 51.

The legislature grants a charter to the New York Mechanic and Scientific Institution and Laws of N. Y. (1822), chap. 88. Its charter, constitution and by-laws were printed in a pamphlet in 1823. One of these is in the N. Y. P. L.

The "property on Wall-street owned by Judge Verplanck, occupied at present by Mr. Morewood, comprising three lots, or about 74 feet front, by 120 feet deep," is purchased by the directors of the U. S. Branch Bank. "It is an excellent site for a superb edifice." -N. T. Eve. Post, Mar 25, 1821. The deed was dated March 27, and recorded on April 11 in Liber Deeds, CLIX: 315. The property was at the present 30-32 Wall St. The Verplanck mansion was demolished in this year, but the epidemic of yellow fever delayed the erection of the bank building, the corner-stone of which was laid not until May 23, 1821 (q. v.)-Fay, Times of N. T., ii; 52; L. M. R. K., II: 924, 975; See Ap 23, 1821. The history of this property, the names of which is inscribed in the grant from Gov. Kief to Jan Jansen Damen on April 25, 1644 (q. v.), see 22nd Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1917), 591-620. See also descrips. of Pl. 166, III: 345, and A. Pl. 12b, III: 872.
Mill Brook about one and three quarters of a mile in a South- west direction then to cross a rough piece of ground by excavating a hill which is said to be 52 and a half feet high, to Morrisania creek and through the aforesaid Creek to near its junction with the Harlem River, and from thence to Macombs's Bridge. At the bridge it is proposed to raise the water with the power created by damming the river and the aid of Pumps to a reservoir to be erected on an eminence a short distance from the bridge on this Island, and from thence to be brought to the city through the means of Pipes or aqueducts.

The committee proposes that $500 "be appropriated for the purpose of obtaining a survey and profile of the whole line of country between this city and the main Source of the River Bronx, together with an estimate of the probable cost of completing the project of supplying this city with good and wholesome water." This is adopted.—M. C. C. (1784-1831), XII: 299-11. See N 25, 1822 and Mr 10, 1823.

The common council adopts a resolution that Maiden Lane be enlarged and improved from William St. to Pearl St., so that it shall be about 35 feet wide.—M. C. C. (1784-1831), XII: 316. See J 30, 1822.

Acting upon complaints as to impositions, high charges, and delays in the operation of the Fulton ferry, a select committee of the state senate reports that the company, in open violation of that clause in the contract whereby it is bound to keep "both of their ferry boats constantly employed on the said ferry," frequently uses its steamboats "for the purpose of towing ships up as far as the harbor of New York, and in consequence of which, passengers are subject to detention." They "persuaded that the ferry boats employed at the public ferry, where the crossing is so immensely great as that between New-York and Long Island, ought not to be employed in other business, except from ferry stairs to ferry stairs."—Senate Jour., 45th sess. (1822), 250-51.

This led to the enactment of a law (see Ap 17).

The proceedings of the last discussion of the American Forum this season, which is to be held on this evening, are to be presented to "the General Committee appointed to take measures respecting the erection of an equestrian statue to the memory of Gen. George Washington."—N. Y. Eq. Post, Ap 1, 1822.

The General Theological Seminary is incorporated.—Laws of N. Y. (1822), chap. 150. See F 15, 1822, and Jl 23, 1825.

The Turks defeat the Greeks at Chloros and massacre about 40,000 inhabitants.—Hayden's Dict. of States, 310, 453.

The common council receives from John Randel, Jr., a letter enclosing a pamphlet containing observations concerning the course of the Erie Canal at its eastern termination. This is referred to the committee on bringing water to the city.—M. C. C. (1784-1831), XII: 324.

The material for a common wall walk on the park fence $683 is expended, and for additional labour on the marble pillars $55.—Journal C, 253, comptroller's office. See J 25, Jl 9, Ag 20, 1821.

In "An Act for regulating Elections," the legislature provides that in New York City (and throughout the state as well elections) shall be held during a three-day period beginning the first Monday in November.—Laws of N. Y. (1822), chap. 210. Elections had begun on the last Tuesday in April (see Ap 11, 1821). On Apr. 7, 1820 (q. v.), the time was changed again—to the second Tuesday in April.

The legislature passes an "Act to regulate the Public Ferries between the City of New-York and the Island of Nassau" (see Ap 2). The law makes "ferrymasters or the owners of ferry boats liable to a penalty of $5 for a longer detention of passengers, than is now allowed by law" except in case "the wind, weather, or sea, shall render the crossing dangerous," or in case of "detention by accidents or casualties." The penalty is increased ten-fold if the boats are "employed in any other business than from ferry stairs to ferry stairs, except to relieve vessels in distress."—Laws of N. Y. (1822), chap. 241.

The material for a common wall walk on the park fence $683 is expended, and for additional labour on the marble pillars $55.—Journal C, 253, comptroller's office. See J 25, Jl 9, Ag 20, 1821.

The accommodations of Fulton Market may be estimated from the statement that rents were received from 19 butchers' stalls, 24 hucksters' and three sausage stands, one butcher's cellar, and the room in the west wing of the market.—*Journal C.*, 261, commissary's office.

John Eveldoth calls the attention of the common council to his new invention, a dredging-machine used in cleaning channels of rivers.—*M. C. C.* (1784-1831), XII: 406-7. On July 8, the board authorized a committee to treat with Mr. Eveldoth for the exclusive right for New York City of his patent, and also of his services in superintending its construction. The total cost had been estimated at $7,750.—Ibid., XII: 467-68. At the next meeting the board directed an agreement with Mr. Eveldoth to be executed.—*Ibid.*, XII: 486-89. On Oct. 14, a resolution that the mud machine, now building, be coppered before launching was adopted.—*Ibid.*, XII: 527.

The common council grants the request of a number of inhabitants "of the vicinity of the Market about to be erected at Old Slip" (see O 1, 1824) that a cupola for a fire bell be erected on the market.—*M. C. C.* (1784-1831), XII: 419. See Je 24.

The *Abibon* begins publication at No. 37 William St. It is a weekly paper devoted to British, colonial and foreign news.—Pasko's Old N. T., II: 232, citing Cowman's Western Memorabilia.

The legislature grants a resolution to build a wall and fence along the east end of the Battery on a line commencing six feet westerly from the southeastern corner of the Battery and extending on a parallel line in a direction that will meet the present line about 150 ft. below State St.—*M. C. G.* (1784-1831), XII: 365-66. See also Ja 10, 1820, and F 26, 1821.

The common council grants a resolution to remove the liberty-pole at present standing in the Fifth Ward, corner of Church and Leonard Sts., to the triangular plot at the junction of Chapel and Provost Sts.—*M. C. G.* (1784-1831), XII: 382.

St. Luke's Church (see Je 4, 1821) on Hudson St. near Christ St. is to be consecrated on this day.—*N. T. Ev. Post*, My 15, 1822; L. M. R. K., III: 931. See also Greenleaf, 83.

Elwood Walter, a youth of 18 from Philadelphia, writes in his diary in the morning of this day that he had pegged at a room in Broadway, where some singular pieces of Mechanism are exhibited—made by Maillardet of Switzerland. The most wonderful of these was called the 'American Magician.' The machine being wound up, and set in motion, a printed question, pasted on Copper plate, is placed in a little drawer provided for the purpose—a figure representing the Magician, would then rise, wave a rod which it held in one hand, and after looking over a book, in the other, strike a small door, which immediately opens, and exposes an answer suitable to the question proposed—I offered several different questions and received a correct answer in every instance.

The dwelling ground where Hamilton was killed by Burr was also visited. "A handsome marble monument erected to the memory of the assassins on this spot a few years ago by direction of the legislature of New Jersey—" from a belief that the honour thus paid to him would tend to encourage the dreadful practice, by which he came to an untimely end."

On the last day of his visit, Pearl Street Meeting was attended—the house, quite small and old (destroyed in 1824). The preacher was Elias Hicks, father of the Hicksite Quakers. "The 'snows of long years,'" says the visitor, "have whitened the head of this great and good man—and Time seems to be fast undermining a strong and robust constitution; but he still possesses the same energy of voice and manner—the same powerful eloquence, that touches the heart, and convinces the judgement."—*A Journal of Travels by Sea and Land, to the Island of Manhattan (MS.)* by John Jacob Uderdahn (pseudonym for Elwood Walter). Mr. Walter subsequently became headmaster of the "Westchester Boarding School for Boys" (see Peterson, *Landmarks of New York, 137*). The *Journal* is owned [1926] by his granddaughter, Mrs. Von Hofh, 456 W. 24th St.

27 Alderman Mann presents the following resolution to the common council "Resolved that a journal of the Proceedings of the Common Council be printed for the use of the members and that it commence with the minutes of the Present Board." This is referred to a committee.—*M. C. C.*, XII: 401. On June 24, the committee reported that because of the expense they believed it to be inexpedient at present to cause the journal of the board to be printed. The resolution was lost.—*Ibid.*, XII: 446.
The Iconography of Manhattan Island

The proposed area of the Battery between lower Broadway and the East River was surveyed by Wm. T. Wood, 2nd Lieut. U.S. Topographic Engineers, under the direction of Maj. Gen. A. H. Boardman, in the fall of 1820. It was sold to the city of New York by private contract on the 21st of March, 1821, for the sum of $1,200,000. The improvements of this tract of land, which are the subject of the present article, have been so extensive and rapid that a more complete account of them would be found in another work.

The site of the battery is bounded on the north by the east river; on the south by the street extending from the southern end of the Battery to the southern boundary of the city; on the east by a line drawn from the southern extremity of the Battery to the northern boundary of the city; and on the west by a line drawn from the southern extremity of the Battery to the northern boundary of the city.

The Battery was originally occupied by the fortifications of the city, and was afterward laid out as a public park. It was subsequently used as a military post, and was afterward again occupied by the federal government.

The Battery is divided into two parts, the northern and the southern.

The northern part is bounded on the north by the east river, on the south by a line drawn from the southern extremity of the Battery to the southern boundary of the city, on the east by a line drawn from the southern extremity of the Battery to the northern boundary of the city, and on the west by a line drawn from the southern extremity of the Battery to the northern boundary of the city. This part of the battery is divided into two parts, the northern and the southern.

The northern part is bounded on the north by the east river, on the south by a line drawn from the southern extremity of the Battery to the southern boundary of the city, on the east by a line drawn from the southern extremity of the Battery to the northern boundary of the city, and on the west by a line drawn from the southern extremity of the Battery to the northern boundary of the city.

The southern part is bounded on the north by the street extending from the southern end of the Battery to the southern boundary of the city, on the south by a line drawn from the southern extremity of the Battery to the northern boundary of the city, on the east by a line drawn from the southern extremity of the Battery to the northern boundary of the city, and on the west by a line drawn from the southern extremity of the Battery to the northern boundary of the city.

The Battery is divided into two parts, the northern and the southern.

The northern part is bounded on the north by the east river, on the south by a line drawn from the southern extremity of the Battery to the southern boundary of the city, on the east by a line drawn from the southern extremity of the Battery to the northern boundary of the city, and on the west by a line drawn from the southern extremity of the Battery to the northern boundary of the city.

The southern part is bounded on the north by the street extending from the southern end of the Battery to the southern boundary of the city, on the south by a line drawn from the southern extremity of the Battery to the northern boundary of the city, on the east by a line drawn from the southern extremity of the Battery to the northern boundary of the city, and on the west by a line drawn from the southern extremity of the Battery to the northern boundary of the city.
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

Yorks during the epidemic of 1822, and thus described conditions: "... We remained at anchor all night, and next morning proceeded up the river, passing the city on our right, which truly presented a picture of desolation, the numerous wharfs being entirely bare of vessels, not a soul to be seen stirring about, the streets which were lined with lime and charred wood, and guarded at every point by a high fence, and the doors and windows of every habitation and store closely shut. We cast anchor opposite to a part of the town deemed sufficiently healthy, nearly three miles above the point which forms the Southern boundary of the city. On going ashore, the bustle that prevailed was beyond description, nearly the whole of the business-part of the city being removed out to the fields which were surrounded by the parts of huts, wooden buildings... were speedily erected for the accommodation of the citizens; and the business transacted here during two months was prodigious; some of these buildings were fitted up as hotels, where 190 or 300 people were boarded, but the accommodation for beds, &c. at such a time, may easily be conceived to have been none of the best. For such accommodation, however, people were very happy to pay an extravagant price; and in many instances, in the first hurry of the business, until a sufficiency of beds were erected, respectable persons were obliged for nights to bivouac in the fields. This may give an idea of what formidable fires the first appearance of the yellow fever creates..."

"In this irregular and temporary city in the field, you might find in one group, banking-shops, till nearly the end of October, when a slight black frost appeared, which instantly dissipated all fears on account of yellow fever, and the consequent numerous removals back to the city, resembled the breaking up of the camp of some great army."—Nelson, Recollections of Six Years Residence in the U. S. A. (Glasgow, 1830), 476.

The "favourable state of the weather, the advanced season of the year, and the reduced number of cases reported to the Board for several days past" induce the board of health to announce that the citizens may return to all parts of the city with safety except that which was the seat of the infection. The board recommends, however, that all houses be cleaned and aired before being occupied. Up to this time there have been 401 cases of yellow fever in the city, 230 of which were fatal.—N. Y. Ev. Post, Oct. 26, 1822. See O 29.

The mayor presents the following communication to the common council: "On the 18th day of February last [p. 41] the Mayor had the honour of presenting to the Board a report recommending the erection of a Discipline Mill at the Penitentiary, and he has now the pleasure to inform them that the necessary buildings & machinery was completed on the 7th day of September last, and on the 23d of that month was put in full operation..." "The building is of Stone thirty feet by Sixty and two Stories high That part occupied by the Wheels on which the Prisoners work is separated from the Mill by a Strong Stone Wall so that no communication is had with those who feed and tend the Mill and those who perform the labour on the wheels... two wheels [are] now in operation..."

"Each wheel is calculated to give employment to 32 Prisoners sixteen on each wheel at once and a bell is so arranged as to Strike every ½ minute when one of the Prisoners on the wheel comes off and another goes on by which each man works eight minutes and rests the same time. The Average quantity of Grain ground per day is from 40 to 50 bushels which it is presumed may be increased to 60 or 70, should it be found on further experience that the prisoners can be made to perform a severer task without injury to their health..."

There are always a numerous class of Prisoners in the Penitentiary & Gelman consisting of female, Pennsylvania, and absentees, for whom little or no employment could be provided but it has been found by late experience that the operation of women on the tread wheel in proportion to their weight is equally useful as that of the men, there is then this additional advantage arising from the erection of the Mill that this class of Prisoners will now be made to earn their bread by the sweat of their brow.

"In carrying into effect our penitentiary System much difficulty has always been experienced in finding suitable employment for the Prisoners but it is hoped that the introduction of the Disciplinary Mill will in a great measure supply the deficiency and that the effects of the labour of the prisoners will greatly add to the advantage of the Public but the reformation and benefit of the Convicts; Should the advantages arising from the experiment be equal to the expectations of the Common Council it is hoped that additional Mills will be erected at the Penitentiary and one at least at the Bridewell in order that the time now employed in plotting mischief may be profitably disposed of. [See F 18, 1824, and J 20, 1823.] This is however one essential improvement in our Penitentiary System in addition to the Mill which appears to be absolutely necessary for the introduction of a proper discipline in our prisons and that is the provision of a sufficient number of cells for solitary confinement and as retiring places for the Prisoners after the labour of the day has been performed by which means they will have an opportunity for reflection free from the baneful influence resulting from the present method of confining 15 or 20 of them in a single room. [See Ap 10, 1821, and O 15, 1824]... The prevalence of the Calamity [yellow fever], with which our City has been afflicted for the last three months has prevented the presentation of..."—M. C. G. (1824-1825), 1: 539-45; N. Y. Ev. Post, O 5, 1822. See also Hardie, History of the Tread-mill (1842), which contains a plate showing the mill in operation.

The common council agrees that the east wing of Fulton Market "be appropriated for the use of the Sellers of Fish and such other part of said market as may not be occupied by licensed Butchers..."—M. C. G. (1824-1825), 1: 539-45; De Voe, Market Book, 499-500.

"Already Broadway presents a scene of happy confusion. Every one is anxious to return to his own house and fireside. And few are willing to wait to use the solitary precautions recommended by the Board of Health and by Dr. Hoack."—N. Y. Ev. Post, O 29, 1822.

The public is respectfully informed that the Park Theatre will open, on Monday next, with the comedy of the Soldier's Daughter..." During the recess, the Theatre has been entirely repainted and ornamented, from a design of Mr. Cowell's and executed by Mr. Cowell and assistants. "Various engagements have been made and every exertion used to render the Theatre worthy of public support. In the course of a few weeks the Managers will have the honour of offering to the public, Mr. Matthews, the most distinguished Actor of the present day..."—N. Y. Ev. Post, O 31, 1822. See N 7...

"We observe that a Lithographic Press has been established at Washington, by Mr. Henry Stone, who is spoken of as being well acquainted with that beautiful art. We wish him every success; but we are much afraid he will not find patrons sufficient in this country. A trial was lately made in this city, and the most beautiful and accurate plates imaginable produced; but the person engaged in the business was compelled to abandon it from the want of public support."—N. Y. Spectator, N 19, 1822. See also descript. of Pl. 55-1 and A. Pl. 12-3, III: 584 and 871-72.

The mayor, Stephen Allen, presents to the common council a number of suggestions which have come to him "during the late calamitous season," of the epidemic. He says, "Although there is a great diversity of opinion among medical men on the subject of the origin of the Yellow fever, it is nevertheless pretty generally agreed that our quarantine regulations ought to be strictly enforced, and... that the most scrupulous attention should be
THE ICONOGRAPHY OF MANHATTAN ISLAND

1823

In this year, John Pintard predicted that the population of New York would amount to 260,000 by 1824, 920,000 by 1861, and more than 2,000,000 by 1875. He also estimated that "before the close of the century the population of this city will equal, if not outvie London, the most populous metropolis of Europe, and excel in numbers, New Orleans possibly only excepted, any city in the New World."—Man. Com. Coun. (1860), 625.

In this year, Isaac Holmes, an English traveller, wrote concerning New York: "The harbour of this city is sufficiently capacious to contain all the vessels in the world. . . . when those canals which are projected . . . which will unite the Hudson river to the Lakes and the great western waters, are completed, New York will at some future period become a rival for the commerce of the world. At present, about one thousand vessels arrive there annually from foreign ports, besides two thousand and five hundred coastal vessels. . . ."—Ibid., XII: 672.

In this year, John Lozier certified that the Manhattan Company had laid only 23 miles of pipes.—Wegmann, N. T. City's Water Supply, 1698-1895. 12.

In this year, the Rose Street meeting-house of the Society of Friends was built, as better accommodations were required for the women's yearly meeting.—Onderdonk, Annals of Hempstead (1899), 62. See also Grew, history of the interior of the church as it was in 1835 appeared in Illus. News, I: 381.

In this year, an organ was placed in St. Mark's Church at a cost of $1,150.—Memorial St. Mark's Church (1899), 54.

In this year, the congregation Shearith Israel sold an unused portion of its cemetery on Chatham Square, 45 x 88 feet, to the Tradesmen's Bank.—Pubis, Am. Jewish Hist. Soc., No. 6, p. 131.

"About 20 feet of the steple of the Brick Meeting in Bowdoin-street, has been cut down, and to great advantage. It is safer and looks better, and the whole has been painted and the ball and vane newly gilt. The scaffolding erected to the very summit of the steple, was much admired for its symmetry and boldness. The whole church has been repaired, and the Pastor, Mr. Spring, is ready to resume his functions."—National Advocate, J, 3, 1833.

Since April, 1821, 36 ships, exclusive of brigs, schooners, sloops, steam vessels, etc., have been launched at New York.—N. Y. Eve. Post, J, 4, 1823.

The members of the common council take the oath prescribed by the new state constitution, and, in accordance with the powers delegated to them (see N. Y., 1821), proceed to the election of a mayor. Stephen Allen is chosen.—M. C. C. (1824-1831), XII: 631-34; N. Y. Eve. Post, J, 3, 1823.

The Tammany Society issues the following address to the public: "The citizens of New York, will specially reollect, that, in the year 1808, when my tomb was constructed by Tammany Society, at the Wallabout, opposite to the city of New York, and that, after thirty years neglect, a portion of the remains, were then collected, of the eleven thousand five

Invention and Prosperity: 1815-1841

1827

28, 1822, and Ag 18, 1824. See also Harte, Hist. of the Tread-mill (1824), which contains an illustration of the mill.

The Merchants' Exchange Co. is incorporated.—Laws of N. Y. (1823), chap. 15. See Ap 29, 1824. The capital stock was increased by an act of May 7, 1827.—Ibid., 1847, chap. 221. The company changed bankruptcy and became Merchant's Bank.—N. Y. Gaz., vol. X, 1845.

The Chamber of Commerce appropriates $200 for the benefit of the Merchants Library Association (see N. 9, 1820, and F 12, 1821), and appoints a standing committee to visit the library from time to time and to report on its condition.—Bishop, A Chronicle of 150 Years, etc., 54.

Thus are glad to see the progress already made for the improvement of the Battery. Most of the cut-stone is finished, and drawn to the spot where it is to be used. It is hoped the whole improvement will be completed by the end of the ensuing autumn.—N. Y. Gaz. & Gen. Ado., F 1, 1823. See, further, Je 19.

Ebenizer Storer, the lessee, writes to the committee in charge of the affairs of the Tontine Coffee House that his rent is so high as to prevent him from saving a reasonable profit, and asks that it be reduced. He says that "such has been the improvement of the City, and the multiplication of Hotels and private boarding houses, since the Tontine Coffee House was considered a principal one, and such is its local situation, that it cannot offer those inducements to Gentlemen & families to reside in it, to insure anything like a compensation to the incumbent for the expense and care requisite to effect such an object. From the nature this building is incapable of being made a desirable residence, without extensive and costly repairs... A number less than 40 or 50 boarders would afford no profit; and when I found that I had to provide daily an expensive table, for the probable number of 30 to 50, and had but 7 or 10 to partake you may well suppose that I found it necessary to dispense with this branch of my business, to save myself from a heavy daily loss... It has enabled me to get along better and to pay my rent punctually. That it has not been disagreeable to the merchants, I have their testimony. For two seasons, the last summer particularly, I suffered severely from the necessity of shutting up the House, in consequence of the fever [see O 29, 1819], which deprived me of two months business... I now offer to keep the house on the same terms for the next year, as the present year ending 1 May... making every exertion for the convenience & accommodation of the merchants who assemble at the Exchange..."

From the original letter, in vol. lettered N. Y. Tontine Coffee House, in N. Y. H. S. See My 2.

The minister, elders, and deacons of the Reformed Protestant Dutch Church remonstrate with the common council against the passage of a law forbidding the interment of the dead south of Canal St. except in private vaults.—M. C. (1784-1811), XIII: 694. Later several other churches made a similar protest.—Ibid., XII: 709. See Mr 31.

The common council accepts petitions sent by Benjamin Rosmane, entitled "Observations Reasons & Facts disproving importation & all Specific personal contagion in Yellow Fever from any local origin except that which arises from the common Changes of the Atmosphere".—M. C. (1784-1811), XIII: 695.

The salary of the "Crier of the Court" is fixed by the common council at $100, instead of all fees.—M. C. (1784-1811), XIV: 728.

The common council resolves to ask the legislature for authority to pass such ordinances as they may from time to time deem necessary for the purpose of regulating "all theatrical and Equestrian Exhibitions all exhibitions of Rope & Wire dancing or performance of Slight of hand; all public gardens and generally all shows and exhibitions for gain at which any music shall be performed excepting such exhibitions of science or mechanical ingenuity or natural Curiosity or exhibition for Charitable purposes or improvements in any arts or science as the Common Council may prescribe." Also that such amusements must be licensed by the mayor of the city.—M. C. (1784-1811), XIII: 730. See Mr 13.

Theatre there is exhibited at the Park Theatre this evening "the most novel, splendid, and brilliant object ever displayed in an American Theatre, A Looking-Glass Curtain, equal in size to the Drop Curtain. For extent of machinery, cost in the production and brilliant magnificence of effect, the Managers have no hesitation in asserting, that this splendid spectacle is unequalled by any..."
other in any Theatre. It reflects in one lucid sea of glass, the entire 1824. Feb.

Audience, and every object in front of the Stage.—The elegance 19 and richness of its frame work renders this superb ornament com-plete. It will be shown at the end of the Play, and at no other period 24. of the evening.—N. Y. Ev. Post, F 19, 1824.

The common council is informed by letter from the secretary of 34. state that Castle Clinton is no longer required as a military position 1824. for the defence of the harbour and city of New York, and that orders 20. have been given for dismantling and evacuation thereof.—M. C. G. 1784-1831, XII: 733.

The common council is appointed by the "County of Dutchess Putnam Western and 35. the Western Part of Connecticut adjoining those Counties to ask of the Legislature an Act of Incorporation to make a Canal in Sharon in Connecticut, to New York or the tide water of the Hudson River near Croton." They say in part: "The Object 10 is to go to the City of New York in preference of the north river near the Mouth of the Croton and for this purpose we are instructed to consult & Concert with New York gentlemen how this object can be effected. We have conversed with several of the New York delegation & other gentlemen from your City here who unite with us in opinion that it is practicable to unite the two branches of the river by combining the double object of navigation and supplying the City with water. At the request of several gentlemen from your city we have agreed to suspend our application to the Legislature until you may have the opportunity of taking this subject into consideration. . . . It may not be improper to state that we have this day seen Col Young the Canal Commissioner who unhesitatingly gave us his opinion that the Canal will be good for City use by settling and filtering in a Reservoir." The special committee on supplying the city with good and wholesome water reports on this subject that they believe the plan is feasible, and that the contemplated canal would add to the business as well as to the comfort of the inhabitants of the city by supplying them with an abundance of wholesome water. They say: "To have brought to the City a Stream of Pure Water 20 feet wide by 4 feet deep that shall discharge more than 20 millions of gallons each day in the Year. Calculated for drink and culinary purposes for extinguishing Fires for cleansing our Streets and yards washing our clothes for supplying our extensive marine with this necessary element in its purity and for every other object connected with Health cleanliness & Comfort besides the great advantages in a Commercial point of View, and that it may justly be considered as one of the most 24. fertile Country is certainly of sufficient importance to induce the Common Council to embrace the opportunity of securing the privilege offered them even should they never make use of it. A memorial is sent to the legislature praying that a charter may be granted for the canal.—M. C. G. 1784-1831, XII: 766-71. See Ap 1, 1824, and J 14, 1823.

Mr. George Youle has erected a new shot-tower on the spot (see O 6, 1824) where the first was started, and though it is not yet completed he has begun the manufacture of shot.—N. Y. Ev. Post, Mr 14, 1824. The tower was north of 53d St., west of First Ave.—L. M. R. K., XII: 965-64. It is shown on Pl. 102-4, Vol. III.

The sub-structure is visible to-day (1924).—Peterson, Landmarks of N. Y. (1923), 77.

The mayor, as president of the board of health, reports to the common council that he has been directed by the board of health to issue early in May a circular to be left at each house in the city appealing to the good sense of the inhabitants as to the propriety of their removing from their premises every species of filth on the days designated for the purpose; and of adopting other precau-tionary measures for the preservation of health, in order that "no act may be neglected which may appear calculated to insure to our citizens this inestimable blessing."—M. C. G. 1784-1831, XII: 777-79.

The legislature passes an act providing for the erection of a fever hospital in New York City, and authorizes the common council to lend therefor $2,000.00. It is then to be run by the county and used for the reception and care of consumptions, and the effect of the act is to provide a hospital for the poor at the rate of $20 a head per year (1825).—Laws of N. Y. 1825, chap. 89.; M. C. G. 1784-1831, XII: 766-70. See J 14, 1824.

Samuel Leggett, Moses Cunningham, George Youle, Thomas Morris, Wm. S. Coo, and others, are incorporated as the "New York Gas Light Company," with a capital of $1,000,000.—Laws of N. Y. (1825), chap. 85. This was the first gas company chartered in New York. Its charter was unlimited in duration.—M. C. G. 1784-1831, XIX: 315. See, however, My 12.

Christ Church in Anthony St. (see Mr 30, 1824) is consecrated.

N. Y. Ev. Post, Mr 16, 1824. There is a view in it in Onderdonk's Hist. of the Post. Epis. Ch. (1844). The "most furious snow storm that has been experienced in this quarter for more than twenty years" starts early this morning and continues throughout the day. Several houses are blown down, windows are broken, and some of the trees in the Park are "prostrated." About 40 ships in the vicinity of the city are injured and about 15 sunk.—N. Y. Ev. Post, Mr 16, 1824.

The Pennsylvania legislature incorporates the Pennsylvania Railroad Co., with power to construct a railroad from Philadelphia to Columbia, in Lancaster Co. The road is to be laid out under the superintendence of, and according to the plans of, John Stevens.—Scharf & Westcott, Hist. of Phila., 1: 606. For a brief history of this railroad, the oldest on the American continent, see N. Y. Times, F 22, 1825.

It is resolved by the common council that the name of Grand St. be substituted for Desbrosses St. from Thompson St. to Varick Sts.—M. C. G. 1784-1831, XII: 808.

The common council passes a law respecting the interment of the dead. It imposes a fine of $250 for opening, after June 1, and grave "whatsoever" a Canal to the Southward of a line commencing at the centre of Canal Street on the North River and running through the centre of Canal Street to Sullivan Street thence through Sullivan st. to Grand Street thence through Grand St. to the East river. Neither shall it be lawful to inter in any vault or tomb south of the aforesaid line.—M. C. G. 1784-1831, XII: 811. See F 4, 1824, and Je 6, 1824.

A special committee is appointed by the common council to "Select a Suitable Site for a public Burial Place to be called the City Burying ground."—M. C. G. 1784-1831, XII: 812. See Je 9.

The "greatest concourse of people, of all descriptions, that has been witnessed on a similar occasion for many years" assembles at the city hall in response to a call by Mayor Allen, and adopts resolutions renouncing against a tax bill which has passed the assembly and is pending in the senate. Among the resolutions are the following:

Resolved, That the provision of the proposed law, which levies upon the capitals of incorporated companies for State pur-poses fifty per cent, or one half, more than upon any other personal property, is a partial and unjust legislation against a particular Section of the State; that description of property being princi-pally confined to the commercial interests of New York.

Resolved, That to impose a tax on the capital of non-residents, vested in the stock of incorporated companies, or in credits to individ-uals; and to include in the assessments, all personal property under the control and custody of Agents, whether consigned to the commission merchant for sale; transportation to a sister State or exportation to a foreign country, is unwise & impolitic; that it must drive away capital and commerce from this to other cities; destroy our navigation, injure agriculture, and impoverish all classes of citizens.

Resolved, That the proposed law adopts a system of policy in regard to the city and county of New York, ruinous to the landed interest, and intolerably burdensome to the Mechanic, and other labouring classes of the community, as it leaves for city and county purposes, fifteen cents only on a hundred dollars of the tax on the stock; when fifty cents on the hundred dollars must be imposed for the like purposes on every other description of per-sonal property and real estate.

Resolved, That the proposed law will not only operate as a partial tax upon this city, but proceeds upon the unwarrantable presumption, that its citizens are unwilling to bear their just propor-tions of the burdens necessary for the support of government; a presumption as odious as it is unjust, as unjuicious as it is un-founded in fact, and which our principles and honour, equally call upon us to repel." A committee of prominent citizens is appointed to present the resolutions to the senate.—N. Y. Ev. Post, Ap 2 and 3, 1824. A memorial against the tax bill was adopted by the common council Dec. 14, 1823. A joint committee however, was passed by the senate on April 18 by a vote of 18 to 8. —Ibid., Ap 21 and 23, 1824. It received the signature of the governor and became a law.—Ibid., Ap 25, 1824.
Trinity vortex adopts the following resolution in regard to
1913.
28
The legislature authorises the mayor and common council,
whenever they shall think it necessary to determine the future
permanent regulation of any streets or avenues below 34th St.
which were laid out under the act of 1807, to appoint three com-
missioners whose duty it shall be to cause surveys, maps, profiles,
etc. of the ground to be made and to mark thereon what in their
opinion ought to be the future permanent regulation. These shall
be deposited in the office of the street commissioner and notice
thereof published in the papers. The common council may con-
firm, reject, or refer the same to new commissioners. When ac-
cepted, the levels delineated on the maps shall be permanently
fixed and established, and assessors shall be appointed for appor-
tioning the expense of the regulation.

Resolved:—Laws of N. Y. (1829), chap. 128. The application of this statute to the grounds lying
between North and 47th Sts., the Bowery and East River, caused a serious problem in grading and in determining the proper method
of disposing of surface waters. This extended to 1826, and in
that year was published in a pamphlet, containing the action of the
common council, committees, city surveyors, counsel, etc.,
etched with Report of the Street Committee on the subject of Regu-
ulating the Gas Lamps, and Eleventh Streets, the Bowery & East River (1826). On Nov. 27, 1826, a
common council resolved to ask for the repeal of the act.

The special committee on the subject of erecting a statue
to the memory of George Washington (see Mr 18, 1822) brings
the following resolution before the common council:
"Resolved
the election by Ballot be held in the Several Wards,
for the purpose of receiving the votes of all persons assessed for
taxes . . . on the question . . . whether a sum not exceeding
$50,000 Shall or Shall not be raised by tax on the Real & Personal
Estate in this city in such annual Amounts as will Sink such sum to
be raised with interest in Ten years the money thus to be raised to be
applied to the erecting of a Statue . . . in this City to the
memory of the late George Washington.
Whereupon Mr. Cowdray presents this resolution in reply:
"The Common Council reciprocating and applauding the patriotic
feelings and motives of their fellow Citizens who have presented
their memorial having for its object the erection of a monument
emblematical of the Illustrious Character of George Washington . . .
believing that any undertaking of the kind referred to . . .
would disappoint rather than gratify public Expectations with
regard to the Commemoration of him who was 'First in War
First in peace First in the hearts of his Countr ymen.'
"Therefore Resolved that the said Memorial . . . be placed on
the files of the Common Council." This is adopted.—M. G. C. (1784-1831), XIII: 20–21. See O 13.

We are informed that the window frames and sashes of the
new and elegant building now erecting in Wall Street as the U. S.
Branch Bank (see Mr 23, 1822), are to be of solid brass, and im-
ported from England. This valuable and safe improvement has
superceded the material of wood in all the new banking establish-
ments in London. We trust our brass founders will take the hint,
and not suffer Birmingham to supply what they can so easily
make. We rejoice to see in The New York Evening Post, May 22, 1825. The corner-stone of the bank was laid on May 23 (p.v).
"Whereas it is desirable that a channel should be opened, through
which the city of New York, and other parts of this state, may
receive a supply of stone [anthracite coal], which is found in the
interior of the state of Pennsylvania," the Delaware and Hudson
Canal Company is incorporated to connect these two rivers by a
canal.—Laws of N. Y. (1829), chap. 258. On Nov. 19, 1824, the
Apr. company was authorised to employ $500,000 of its capital in
banking, the bank to be situated in New York City, and the in-
itiation was opened at 15 Wall St. For the further history of the
company and its trial of the first locomotive brought to the
U. S., see N. Y. Times Mag., Ap 22, 1825. See also My 1829.

The steamboat "Chancellor Kent" is to be launched on this
day from the ship-yard of Messrs. Blossom, Smith & Damon.—
N. Y. Ecc. Post, Ap 26, 1825. For description of the boat, see ibid.,
Ag 15, 1825.

Samuel Davis, having invented a machine for raising sunken
ships, has formed a company to raise the frigate "Husar" and
the sloop "Mercury," which sank, with a large amount of specie,
in the East and Hudson Rivers respectively during the Revolu-
tionary War, and is about to commence operations. A drawing
of his machine is being exhibited at the Tontine Coffee House.—

When Bethuel Bunker took a lease of the Tontine Coffee
May House on this day (N. Y. Ecc. Post, My 2, Je 10, 1823 and
see Ap 2, 1811), John McCombe made a pencil drawing of proposed
alterations at the end of the coffee-room, estimated at $755. This
is preserved in the vol. lettered N. Y. Tontine Coffee House,
at N. Y. H. S. Future humorous account of the entertainment pro-
vided by Bunker, when these improvements were completed, see

The Commercial Hotel, at 119 Pearl St., formerly the residence
of Gen. Moreau, where meals are "dressed in the French and
English style," and where English, French, and Italian are spoken,
was one of the smaller hotels of note at this period.—N. Y. Ecc.
Post, My 2, 1825.

The corner-stone of the Houston Street Reformed Dutch
Church is to be laid on this day at the south-west corner of Greene
and Houston Sts.—N. Y. Ecc. Post, My 3, 1823; L. M. R. K.,
III: 935. See also Corwin's Man. of the Ref. Ch. in Am., 1905.
"Home Sweet Home," composed by John Howard Payne,
is sung for the first time, at the Theatre Royal, Covent Garden,
London, by Maria Tree, and that of this in the first performance of "Clariss, the
Maid of Milan."—Kobbe, Famous Am. Songs, 3; Brainard, John
Howard Payne (1835), 27–30.

The first franchise to supply the city with gas is granted by
the common council on this day, when it gives the New York
Gas Light Company, on certain conditions, the sole and exclusive
privilege and right of laying pipes under ground for conducting
gas to the public lamps and the houses and buildings through-
out that part of the city south of line running from East River
through Grand St., Sullivan St., and Canal St. to the Hudson
River. The conditions of this grant (which the company was to hold
for 30 years—that is, until the 12th of May, 1859) were:
That before the 12th of May, 1829, they should erect and
complete good and sufficient buildings, necessary to the
preparation and manufacture of gas; cause the necessary
pipes to be made of cast iron, and to be laid; and manufac-
ture and supply in the most approved manner sufficient quantities
of the best quality gas, commonly called inflammable gas, for
lighting Broadway from Grand St. to the Battery. The uncer-
tainty of the term "best quality of gas" was settled between the
parties by making the London gas a standard. The contract
stipulated that the light of the lamps should be of a quality,
brilliance, or intensity, equal to the gas in use for the public lamps
in the city of London. The gas company also stipulated that
failure to comply with these conditions would be sufficient cause
for the common council to annul their contract.—M. G. C. (1784-
1831), XII: 792; XIII: 69–62, 75; XIX: 315. The conditions
were performed within the time limited (see My 11, 1825). See
also Je 11, 1824.

The common council amends the law relative to the establish-
ment of a board of health so that the board shall hereafter consist
of the mayor, recorder, and aldermen.—M. G. C. (1784–
1831), XIII: 73; See O 9, 1826.

The first performance in the Washington Theatre, corner
of Broadway and Prince St., occurs.—N. Y. Ecc. Post, My 19, 1825.

The corner-stone of the U. S. Branch Bank (see Mr 23, 1822,
and Ap 22, 1825) is laid at Nos. 15–17 Wall St. (These numbers
were changed in 1845 to Nos. 30 and 32 Wall St.) The stone and
a bottle which was deposited by the proprietors of the N. Y.
Gazette, containing a City Directory, Stranger's Guide, etc., were
1832

in 1832 when one of the vaults was repaired.—Mag.
(later the U. S. Assay Office) was ready for occupancy on April
14, 1824 (q.t.c.).

Mr. Heiderwick, a Glasgow printer, gives the following un-
favourable account of New York and other parts of America on
his turn to Scotland: "As a whole, New York can scarcely be
said to be more than an overgrown sea-port village in a state of
progressive transmission towards the order and rank of a civili-
cized city. The streets of New York are not to be preambulated
with impunity by either the Ime, or the blind, or the exquisitely
sensitive in their olfactory nerves; to use an American phrase, a
person must be "wide awake," not to dilate his nostrils by the
inequalities and gaps in the side-pavements, or break his legs by
running foul of the numberless moveable and immovable incum-
brances with which they are occupied.

"Both New York and Philadelphia have what are called slips
formed in their harbours, which are indentations cut into the land
for the accommodation of a greater quantity of shipping than
could be contained in the same space if only ranged along wharves
facing the water. In N. York, the slips, run up a considerable way
in the centre of buildings, as it were in the middle of streets; and
being built or faced up with logs of trees cut to the requisite length,
allow free ingress and egress to the water, and being completely
out of the current of the stream or tide, are little else than stagnant
receptacles of city filth; while the tops of the wharves exhibits a
continual mass of eluded nuisance, composed of dust, tar, oil,
noodles, &c. where revel countless swarms of offensive flies.

"So far as I am able to judge, the English language is universally
spoken in greater purity than it is in Britain. . . . Drinking
spirits and water is the usual practice of both sexes. . . . It is
reclaimed quite indelusory in an American to get drunk, and in-
stances of drunkenness are certainly more rare than in Britain.

"The Erie Canal, in the state of New York, is deservedly cele-
brated for its length; but its width and depth does not surpass the
small Canal between Glasgow and Paisley; it is un navigable for
nearly one half of the year, and were it not for the precaution of
drawing off the water at the commencement of winter, the Canal
would be so thoroughly frozen as to require a great proportion of
the other half to thaw it."—N. Y. Exe. Pet., Jl 15, 1823,
citing Glasgow Chrest., My 24.

The common council accepts an invitation from John Vanderly

1833

to visit his panoramic painting of the "Garden of Versailles" at
the Rotunda.—M. C. G. (1784-1831), XIII: 80. Another invita-
tion, to visit the painting of the "Palace and Garden of Versailles,"
was invited on July 1, 1824.—Ibid., XIII: 781.

The committee on the almshouse and penitentiary makes an
interesting report to the common council: " . . . Poverty and
Criminality are the necessary attendants upon social life. And the
duty of mollerating and reforming where it is possible is largely
devolved upon this Corporation who are charged with the interests
of more than 150,000 inhabitants of various pursuits & Calling
occupying a point of land easily accessible and holding out tempta-
tions & allurement so little to the danger the profligate and the
needy adventurer than to the enterprising the industrious or the
oppressed inhabitant of the Civilised World.

"We are Consequently not behind other Cities of equal numbers
and in Circumstances otherwise similar in the Catalogue of mend-
dicity & Crime. And while we have to boast of our admirable Situation and Commerce & public spirit of our Citizens and a State of general prosperity the reverse of the picture may be
seen in the destitute and abandoned situation of many of the houses
of relief and punishment that have become necessary the Constant accumulations of these arising Chiefly from indolence &
profligacy and the heavy demands that are consequently made upon
the industrious the prudent and the exemplary portions of our In-
habitants in the "Support." In an address to the corporation the
alms house committee says, "It was a subject of remark that
the Old and infirm spend much of their time in reading their
Bible.

"The children also receive a full share of the attention of the
officers having charge of this Institution There are four schools in
which the most urgent need for instructing reading writing & the fundamental rules of Arithmetic . . .

When they arrive at suitable ages they are bound out as apprentices
pursuant to the Act of Legislature.

"The attention of the Commissioners and Superintendent May
appear to be indefatigably engaged to produce the greatest sum of
utility and advantage to the public and to the paupers under
their Care, and one Law seems to prevail the Law of Kindness." In
regard to the penitentiary they say: " All will agree that as yet no sufficient rule has been discovered or applied for the refor-

1834

mation of offenders or to deter others by the force of example.
Long periods of confinement had Labour Hard Labour as it is called infamous & even Capital Punishments have not effected the desired object. Crimes have still been perpetrated and torrents of human blood have rolled in vain in Countries where the penal Code has been
Saugusional and vindictive And in our favored Country where the
oppressive System has prevailed and the reformation of offenders
has been proposed to be sought by milder methods it is not yet
found that better Consequences have been produced. . . . The
Corrective that remains to be attempted . . . in Cases not
Capital is solitary Confinement under proper and judicial limi-
tations. . . . In . . . cells secluded from the light of Day
shut from the face of any living [being] except of the
keeper and doomed not even to hear him speak the voice of Con-
science that inward and universal monitor would be heard by the
Convict in tones not loud but deep and after it had excited a
position and determination to reform & while the subject of this
operation should be overwhelmed with Contrition if at the same
Time it should be said to him or her 'Go and Sin no more lest a
worse thing than treachery might be some probability that the
stings of Conscience would be continued and its pangs felt at
least for some space of time after the Imprisonment should have
ceased.

"The Committee Cannot Conclude without especially Con-
commending the Stepping Mill as an Instrument of Punishment.
The subjects condemned to it become exhausted and Spiritless and
humiliated under its operation . . . If solitary confinement can-
not be thoroughly adopted perhaps more stepping mills would
be found to answer the invaluable purpose of preventing the Com-
mision of Crimes by the influence of fear and dread of this whole-

1835

some but severe corrective whatever may be said of the Personal
reformation of offenders."—M. C. G. (1784-1831), XIII: 89-95.
See Jl 2, 1823, and Ag 18, 1824.

In accordance with the report of its special committee (see
Mr 31), the common council resolves that the land lying between
Fifth and Sixth Aven., 40th and 45th Sts, be appropriated for a
public burying-ground or potters' field. This land "contains up-
wards of twenty six acres and is at the distance of three miles and
a quarter from the City Hall. Its situation is high and pleasant and
was begot of the Purposes to purchase for the public. The Common
also recommends that "so much of it as shall be deemed necessary
be immediately enclosed by a permanent wall properly secured at
the top to prevent all intrusions, with two gates one on the fifth
Avenue the other on the cross road leading from the Bloominglege
to the Middle road. . . . The whole to be surrounded and inter-
sected with rows of trees of a proper description."—M. C. G. (1784-
The site was later reduced to include only the land now covered by
the N. Y. Public Library and Bryant Park (see D 29, 1824).

Proposals are published for erecting in New York a new theatre
to be called the "American Opera House."—N. T. Exe. Pet., Jl
12, 1823.

Gen. Winfield Scott informs Mayor Allen by letter that "Castle
Clinton has been vacated," and that he is prepared "to turn over
the work & its appurtenances to the Corporation of the City of
New York according to the terms of the Act of Congress on that
Subject" (see Mr 30, 1822). He adds that "Captain Bender of the
U S Quartermasters department" has his instructions regarding it.
The letter was written to the mayor on June 16 (under which date
the correspondence was entered in the minutes), that Gen. Scott
did direct him to sign an enrolling of the 150 soldiers designated by
the common council; and that "Boys and evil disposed persons are . . . constantly employed in a wanton de-
struction of the buildings." The board directs that the committee
on lands and places receive the cession, and take the premises under
their care.—M. C. G. (1784-1831), XIII: 131-32; N. T. Exe. Pet.,
Jl 12, 1823.

Gen. Morton's division of artillery is reviewed by Gov. Yates
"in the Park in front of the City Hall." Previous to the review
the common council presented the second regiment of N. Y. State
Artillery with a "most splendid standard of colours."—*N. Y. Eve. Post*, Je 14, 1823.

The board orders that changes in Elm St, from Broome to Spring St, are to be as follows:—M. C. G. (1784-1817). XIII: 132.

"We observe, with pleasure, the rapid progress of the work now in full operation on the Battery. The wall is in great forwardness, and in two months will be completed. The filling in goes on well, and we are gratified in observing, that the pools of water which were left, and which had become offensive, are to be filled forthwith with clean gravel. The Castle, we hope will not be demolished, but be restored to its use of which it is susceptible, from its prominent location. As a fortress of defence, it is of no consequence to the city; but as an ornament, and as a place of resort to an overgrown and crowded population, with some improvement, it presents advantages which cannot be too highly appreciated."—*N. Y. Gen. & Gen. Adv.*, Je 19, 1823. "An Old Citizen," writing in *N. Y. J.*, agreed that Castle Clinton ought not to be demolished, but should be "converted into a productive source of income to the city." He added: "The removal of the present flagstaff to the centre of the ground within the castle, in connexion with the Telegraphic establishment, is very properly in contemplation; and if the corporation sees fit to extend the improvements, one of the most delightful walks in the world can be made on the wall, and going through the burgh in the hottest weather, would be most agreeably cool and refreshing. Such an enviable, cheap, and convenient retreat, with passage ways or galleries from the circle to the different stories of the castle building, would command universal patronage of citizens and strangers; and a respectable keeper of such an establishment could well afford to pay to the Corporation a liberal annual rent."—*Ibid.*, Je 20, 1823. See also *N. Y. J.*, S. 5, B. 19, 1823. For the leasing of Castle Garden, see *Ibid.*, Je 21, 1824.

"A" writes to one of the papers: I am sorry to hear it suggested, that the citizens are unwilling the surrounding prospect of the city but also of the whole of our beautiful harbor, with all the islands, &c. The pictures may be seen at Megarey's Bookstore, Broadway; and the work is so far advanced that one of the plates is completed."—*Ibid.*, Ji 2, 1823.

"The views will be ready for delivery about the month of August"—*Com. Adv.*, Je 26, 1823.

A writer, commenting on this advertisement on July 2, said that Wall was the "gentleman to whose magic pencil the public are indebted for those elegantly executed landscapes which compose the 'Hudson River Port Fols'" publishing by Mr. Megarey (see 1821), and added: "The views taken by Mr. Wall are the most accurate descriptions that we have seen. One of them is taken from Brooklyn Heights, near the Distillery of the Messrs. Pierponts, and the other from the Mountain at Weehaw. Mr. W. at first made a drawing from the high land back of Hoboken; but the view from Weehaw is far preferable, as it not only affords a grand prospect of the city but also of the whole of our beautiful harbor, with all the islands, &c." The pictures may be seen at Megarey's Bookstore, Broadway; and the work is so far advanced that one of the plates is completed."—*Ibid.*, Ji 2, 1823.

The Wall views are reproduced as Pls. 92 and 93, Vol. III, and described in III: 577-580, where the date depicted is given as 1820-3. The original water-colours are in the collection of Edward W. Arnold.

James Gallatin having returned to New York on June 2, July 20 after many years spent in Europe, writes in his diary: "A horrible day here; the noise of the July 4 celebration intolerable . . . only about three private coaches in New York—no means of getting about. The streets absolutely filthy and the heat horrible. I have been nearly every night for a long walk. No one takes any notice that the absolutely unfinished state of the American cities until I returned. The horrible churning of tobacco—the spitting: all too awful. We have had a charming and hospitable reception, but all is so crude."—*A Great Peace Maker*. The *Diary of James Gallatin*, 244.

A New York paper suggests that Castle Clinton be converted into public baths. "It would yield a greater revenue to the city than any other plan that has been proposed respecting it. Bathing might easily be rendered a fashionable as well as a healthy amusement."—*N. Y. Eve. Post*, Ji 12, 1823.

The Sharon Canal Company applies to the common council for aid in making a survey for the purpose of ascertaining the practicability of bringing into the city the waters of the Croton River. Referred to the water committee.—*M. C. G.* (1784-1817). XIII: 168. See Mr. 10, and N. 24.

Chief Engineer Thomas Franklin reports to the common council that he is about to make the experiment of substituting hemp hose for the leather hose now in use. This, if successful, will cut the cost in half.—*M. C. G.* (1784-1817). XIII: 173-74. See also, Mr. 22, 1821.

The board of health reports to the common council that it is about to issue a recommendation to the citizens to discontinue the unhealthful practice of sprinkling the streets with water from the slips.—*M. C. G.* (1784-1831). XIII: 177. It was published in *N. Y. Eve. Post*, Ji 23, 1823.

The common council grants to John C. and Robert L. Stevens responsibility to the state for the payment of the $40,000 mentioned in the act of March 24, 1823, and from all responsibility of the lottery and payment of its prizes; indeed, "All responsibility whatsoever for the purchase of the building of Said Hospital."—*M. C. G.* (1784-1817). XIII: 145. On July 7, the board decided to dispose of John B. Yates of all rights to raising this money by lottery.—*Ibid.*, XIII: 165, 167-68. See *O. 21.*

Wm. G. Wall announces that he is about to issue two views of New York. His advertisement states: "Correct views of the City of New-York, have long been a desideratum, and it has been a subject of surprize, that no attempt has been made to exhibit to the public, the leading features of a city, which possesses so great an interest from its political and commercial importance, as well as from the natural beauties of its situation. Mr. Wall has been induced by these considerations, to offer to the patronage of the public, two aqua tinta engravings of this City, from drawings taken, one from Weehaw, the other from Brooklyn Heights; in the choice of which points of view, he has been determined by their affording the most favorable view of the city, and conveying the most correct impression of the beauties of the Bay, and the surrounding scenery.

Every exertion will be made to obtain the best possible execution of these engravings, an artist of known and approved skill having been engaged for the purpose.

"The views will be ready for delivery about the month of August"—*Com. Adv.*, Je 26, 1823.
1632 THE ICONOGRAPHY OF MANHATTAN ISLAND

1823 the right to put on the ferry to Hoboken, about to be established July at Canal St., a substantial steamboat similar to the one now in use at Barclay St. The lease to be given provides for a term of 15 years at the following rentals: for the first five years, the yearly rental of one cent "if lawfully demanded;" for the next five years, $50 a year; and for the residue, $200 each year. The boat must make a trip at least once every hour from sunrise to sunset.

See April 22, 1823.

20 The question of whether Sir Walter Scott is the author of the anonymous Waverly Novels is causing "considerable excitement" in New York.—N. Y. Ev. Post, Jl 21, 24, 26, 28, 30, 31, Ag 1, and 2, 1823.

21 Trinity vestry resolves to build a new house for the rector on Hudson Square "so soon as they can get a good offer for the house and lot on Vesey Street." Hudson Square was at this time "one of the finest, if not the finest, in the city. It contained specimens of almost every American tree, with others of foreign sorts."

Aug. Lord Byron lives in Greece to devote himself to the Greek cause. He died at Missolonghi on April 19, 1822.—Haydn's Dict. of Dates, 1843.

2 The first issue of the N. Y. Mirror appears under the full title The New-York Mirror, and Ladies' Literary Gazette. This title was reduced to the shorter form in 1831. It was first edited by Samuel Woodworth (author of "The Old Oaken Bucket"), and continued by Geo. F. Morris, N. R. William, and Theo. Pay. With the issue of April 14, 1827 (Vol. IV), full-page engraved views began to appear. New York City views first made their appearance with that of the "Lafayette Theatre," in the issue of Oct. 26, 1827 (Vol. V). Many of the engravings in this journal were the work of Asher B. Durand and James Smith, from drawings by A. J. Davis, architect. These illustrations average about 9 x 6 in. A complete set, taken from William Loring Andrews' The Journey of the Immaculates around New York in search of the historical and picturesque (1897), 41, and arranged alphabetically, follows (those marked "S" being small vignettes, printed six on a page):

The Mirror came to an end with Vol. XX, Dec. 24, 1842.

The regular dramatic season at the Park Theatre having terminated, as usual, on July 4, the "Pavilion Theatre, Chatham Garden, is the present centre-point of attraction for beauty, taste, and fashion; being the most tasteful, elegant, and convenient establishment of the kind, in the United States." This is described in detail.

"The City Theatre [see Jl 2, 1823] is about to be re-opened...."

"The Circus, in Broadway, has also a dramatic corps attached to it, for the performance of Melo-Dramas, Pantomimes, Ballads, and other kinds of entertainment belong to the legitimate drama, they cannot properly be noticed in this department. The same remark will apply to the Amphitheatre and Circus, in Richmond-Hill Garden."—N. Y. Mirror, I: 5-6. See also Mr 6, 1824.

The common council resolves to relinquish its right to the irregular pieces of land formed by the junction of First and Second Sts. for the benefit of the "Children of necessity."—M. C. C. (1784-1831), XIII: 202. On Nov. 10, the council referred to a committee a draft of a bill to the legislature praying that the map or plan of the commissioners be further altered "so that the Piece of Land laid out as a Market place & those Irregular Pieces called Children of Necessity may be abolished & Discontinued."—Ibid., XIII: 356.

The board agrees to reduce Avenue A to 80 ft. in width, and Avenue B, C, and D to 60 ft.—M. C. C. (1784-1831), XIII: 202-3.

The common council grants to the trustees of the New York Free School Society permission to establish a free school at Bellevue, the schoolroom in the almshouse there to be used for this purpose. —M. C. C. (1784-1831), XIII: 205. See O 25, 1824.

"We are disposed to believe that New-York, at the present period, stands unrivalled, (in this country at least) for rapid growth, and public improvement. But of all the corrections lately made, or resolved upon, we know of none more important than the widening and improving of Maiden-lane. This Herculean task is now nearly completed. The Gas Company, we understand, will be ready to throw a new and brilliant light on this subject, before the commencement of winter."

"The Battery—The improvements now making to this delightful promenade, will be all completed the present season, when we may challenge every section of the United States for its equal in prospect, salubrity, and beauty. Its form is semi-circular, defended by a formidable stone parapet, against which the waves may spend their fury in vain. This wall is surrounded with posts of hewn stone, which are to be connected with iron railings and pickets."

—N. Y. Mirror, Ag 9, 1832.

In a report to the common council the "unparalleled growth" of the city is mentioned, and the statement is made that the "duties required to be performed by the Street Commissioner and his Assistant are at least four fold to what they were ten years ago."—M. C. C. (1784-1831), XIII: 216.

The Walton house, built in 1725 (n.), is turned into a boarding-house.—N. Y. Daily Advertiser, Ag 25, 1823. See also L. M. R. K., III: 935. The item of 1752 contains three typographical errors: "Dunlop" should be Dunlap; "Netherland," Netherlands; and "1781," 1881.

A. T. Stewart opens his first store, on the west side of Broadway, and advertises it thus:

"No. 283 Broadway, Opposite Washington Hall."

"A. T. Stewart informs his friends and the public, that he has taken the above above, store, where he offers for sale, wholesale and retail, a general assortment of fresh and seasonable Dry Goods; a choice assortment of:

"Irish Linens, Lawns, French Cambrics, Damasks, Diapers, &c."

"N. B. The above goods have been carefully selected and

25 New Dry Goods Store

Sept 2
CHRONOLOGY : INVENTION AND PROSPERITY : 1815-1841

Bought for cash, and will be sold on reasonable terms to those who will please to favour him with their commands."—N. Y. T. Daily Argus, S 2, 1823. For the beginning of the Stewart building of the cast which see Oct. 9, 1824.

An "original portrait of Columbus," which was obtained by Mr. Barrell, the American consul at Malaga, Spain, from a convent lately suppressed at Seville, and presented by him to the U. S. government, is placed for a short time on exhibition in the gallery of the Am. Acad. of the Fine Arts. It will be permanently placed in Washington.—N. Y. Daily Adv., S 7 and 8, 1823.

A twenty-foot cross, bearing the inscription "Sacred to the cause of the Greeks," is erected on Brooklyn Heights and dedicated by the "ladies of New York."—N. Y. Evac. Post, S 6, 1823.

A resolution is passed to extend and improve Houston and North Sts. "in such manner that they may form a junction between Broadway and the Bowery road. ..."—M. C. C. (1784-1871), XIII: 264-69.

Artists who may be desirous to contract with the Tammany Society for erecting a monument to the prison ship martyrs (see J 9) are invited to send in their proposals to Benjamin Romaine, 27 Hudson St., on or before Sept. 29. "The design of that portion of the Monument now under consideration to be erected, is about eight feet high. A slightly curved line from the base-stem to the top of the face that rests on the cornice—the diameter at the bottom step, fourteen feet; the basement, or pedestal, twelve feet diameter, being a figure of thirteen sides, intersected by thirteen rusticated pilasters, to be connected by arches over the thirteen inscription tables alternately inserted between the said pilasters. [A footnote states: "The tables, each representing one of the old thirteen states, are to be thus inscribed, (example): State of New York. Beneath this Mausoleum are entombed the remains of 1200 of her Revolutionary Sons, Martyrs to Liberty.]" See the design No 27. Hudson street. The pedestals rest on a cavetto sima-recta, or inverted ogive, and plinth. The pedestal will be four feet six inches high, and surmounted by a proportinate sima-recta (or inverted ogive), and a plain facade four inches thick; the last mottled marble, the surface consisting of thirteen right feet high, including caps and bases; diameter of the columns one foot at the bottom of the shaft. The columns extend to a circle of about thirty-three feet, having the appearance of an open temple accessible on all sides. The columns support a cornice of due proportion, on which rests a facia ten inches thick, intended to bind the cornice and columns into one solid structure. It is intended that the monument be supported by a substantial foundation wall of the best mason worstone, and raised four feet above the surface of the earth. It is required that the whole work be made, during the coming winter, and erected and completed by the 4th day of July next, of the best American White Marble."—N. Y. Evac. Post, S 18, 1823.

The time for sending in proposals was later extended to Oct. 12.—B. C. (1822-1845), I. 427.

It is resolved by the common council that the committee on lands and places be authorised to plant in the Park and on the Battery 100 ornamental trees of large size, not less than 12 inches diameter at the butt.—M. C. C. (1784-1831), XIII: 283.

From Sept. 30, 1822 (q.v.), until this date, 4,247 passengers arrived at New York.—Arrivals of Alien Passenger and Immigrants (1824), published by the New York Immigration Society.

At a public meeting at the Tontine Coffee House the following 6 resolutions are passed:

"1st. Resolved, That we consider the union of the Western waters with the Hudson, by means of the Grand Canal, an event that imparts glory to the state and honor to the nation.

"2d. Resolved, That we consider that this event calls for expressions of public congratulation."

"3d. Resolved, That the city of New York has a deep and lively interest in the completion of the Grand Western Canal.

"4th. Resolved, That in consequence of the foregoing considerations, this meeting deem it proper and expedient to send a delegation to the city of Albany, to communicate to the meeting to be held on Wednesday next [Oct. 8], the congratulations of the city of New York on the introduction of the canal waters into the Hudson."

"5th. Resolved, That such delegation consist of seventy-two citizens of the city of New York, to be nominated by the chairman of this meeting."—N. Y. Evac. Post, O 6, 1823.

The "entrance of the first boat from the Great Western Canal of this state into the Hudson" is elaborately celebrated at Albany. Oct. 8, Dr. Samuel L. Mitchill of New York pours into the canal a bottle of water from the Pacific Ocean and another from the Atlantic Ocean and then delivers a complimentary address. When to this, chairman of the New York delegation (see O 6), also speak.

"The only Mummy ever brought to America" is on exhibition in the "first room of the passage leading to the Academy of Arts, New York Institution."—N. Y. Evac. Post, O 10, 1823. The mummy came from "the catacombs of ancient Thesos."—Ibid., O 14, 1823. See also ibid., O 25, 1823, which contains an illustration of the top of the mummy case and an explanation of the Egyptian characters thereon. Another mummy was brought to New York in 1824.—Ibid., Ag 10, 1824.

The common council proceeds to the ground selected and appropriated by them for a city burial-ground (see J 9), to witness the laying of the corner-stone of the wall which is to surround the cemetery.—Com. Adv., O 14, 1823. See also L. M. R. K., III: 927. Work on the ground was almost finished on Dec. 20, 1824 (q.v.).

A lengthy and important communication from the mayor is read before the common council. The first subject to which he requests attention is the application for an act to lay a duty on "Strong and Spirituous liquors and to regulate admissions to them."

He says: "In most of our Sister Cities the tavern keeper is a distinct calling from the Grocer and unless he is able to furnish his house with the necessary beds and bedding for the accommodation of travellers or boarders, he is not permitted to receive a license; and the Sum charged for the privilege in some Cities is in proportion to the rent of the house he occupies, and in others varies in amount from Sixteen to Sixty dollars. Tipping Shops are therefore unknown and the number of houses where liquor may be obtained to be drank on the Premise are very few when compared with this City where every person who can raise ten dollars for his licenses and as much more as will purchase a few gallons of liquor is enabled to establish What is usually termed a grocery."

That there are many respectable Citizens who take License to sell liquor to be drank in their own houses and are thus relieved from the trouble of applying to the officers or the Board of Aldermen, and it is presumed that could a measure be adopted, that would separate the tavern keeper from the Grocer they would cheerfully acquiesce in it. ... And although the use of the Article can neither be prohibited or prevented altogether it may nevertheless be lessened by an increase of the price for the license which would ... tend to reduce the number of places at which it is to be obtained." Mayor Allen also recommends that application be made for laws "to prevent the improper introduction of Alien passengers into this City," to increase the fees for the privilege of running a huckey coach, to authorise the corporation to regulate theatrical amusements by license, and to amend the health law so that the board may permit "vessels from healthy Ports with Healthy Crews to land their having been discharged in the Stream and properly cleansed and ventilated under the Inspection of an officer to come to any wharf east of Rutgers Street on the East River or north of Hubert Street on the North river between the 1st day of June and October in any year."

The "Washington Museum," at No. 253 Broadway, opposite the Park, is open.—N. Y. Evac. Post, O 14, 1823. On Dec. 30, it was advertised to open permanently.—Ibid., D 50, 1823. De Voe states his Index (MS.) to newspapers, now in N. Y. H. S., that this afterwards became Peale's Museum; see, however, 1832.

The common council authorizes a committee to purchase sundry lots of Mrs. Ann Rogers near Bellevue for the purpose of erecting a fever hospital (see Mr 24 and Je 23).—M. C. C. (1784-1831), XIII: 311-22. The land was between 213 and 249 Sts., east of First Ave.—L. M. R. K., III: 957. See D 10, Oct. 8, 1823.

"A model in plaster of the Egyptian State in Washington, is now exhibiting at the City Theatre, Warren-street, executed by Signor Canova (see O 1 3), an Italian artists and pupil of Canova, which is considered by good judges to be as fine a piece of statuary as any to be seen in Europe. Signor C. was induced to devote his attention to the production of this specimen of the arts, in consequence of understanding that the citizens of New York were de-
THE ICONOGRAPHY OF MANHATTAN ISLAND

The common council, having examined the free schools of the city, pronounced an invitation from the Free School Society, passes a resolution praising "the great improvement made by the Children in the different branches of useful Knowledge," the "nearness and Cleanliness in the Apartments and regularity in the Department and habits of the Children," the zeal of the teachers, and the "benevolence and public spirit" of the trustees.—M. C. G. (1874-1831), XIII: 344.

1634

Oct. 27.

1823.

The consistory statue of Causici was authorized to erect a temporary building in which to place the model.—Ibid., XIII: 364. See My 10, 1824.

Chiefs of the early days, he was obliged to remove the statue from Warren St., and asking the help of the corporation in this regard. A committee was resolved to erect a temporary building in which to place the model. See ibid., XIII: 364. See My 10, 1824...

25. Chief, that he has modelled is about 13 feet in height, and is remarkable for its correct likeness of Washington, and the spirit displayed throughout the whole. The fiery steed on which the hero is mounted, bears as close a resemblance to life as any Equestrian Statue we ever beheld. . . . We are informed that the Corporation on Saturday last (Oct. 18) visited the exhibition, and were highly pleased with the spirit, taste, and effect which the artist had infused into the execution, and that they have since intimated to Signor Caucici their intention to patronize his efforts, by calling on the public to furnish the means of rearing a marble, or bronze statue, after the model he has constructed. The expense of the former will be about $80,000 of the latter $60,000. — The current has decidedly the preference over marble, and we hope the latter is extremely subject to decay, especially by exposure. Meanwhile it has been thought advisable that the Corporation should cause the model to be removed to the Park, in front of the City Hall, and placed on a pedestal elevated to a proper height. . . .—N. Y. Ev. Post, O 25, 1823. The statue was criticized by "On Fronts" in ibid., O 29, 1823. See also ibid., O 30 and N 11, 1823. See O 27.

27. Residents of the vicinity of the North Battery petition the common council that the bridge to this fort may be converted into a public pier for the landing of wood and other articles.—M. C. G. (1784-1831), XIII: 322-3. On Dec. 8, the board resolved that a correspondence be opened with the Secretary of War to obtain this request.—Ibid., XIII: 334. On March 15, 1824, with regard to the use of the bridge as a public landing place for vessels bringing country produce to the city was granted to the corporation upon the condition that the bridge be kept in repair by the board, and that the United States have free passage over it at all times.—Ibid., XIII: 570. On March 18, the council resolved to accept the bridge under the given conditions, and to cause repairs to be begun as soon as the necessary possession thereof should be obtained by the corporation.—Ibid., XIII: 604-5. See N 25, 1822, and Ag 29, 1824.

"In a report to the common council the statement is made that the city hall is entirely fireproof, and that it is in the centre of the city.—M. C. G. (1784-1831), XIII: 334. The upbuilding of the city north of Chambers St. is thus indicated.

The change in the city charter that was effected on April 7, 1830 (p. n.), had its origin in a report presented on this day to the common council favouring the "reorganization of the City government." It is "laid on the table," but the board directs that it be published in the newspapers and printed for the use of the members. The essential feature of the report is a bicameral council in accordance with "the general and all the state governments of the Union, and with the governments of most of the large cities in the different states." It is claimed that "the additional checks and guards . . . thereby produced . . . would be of the greatest advantage to the interest of all concerned; and the owners of property would receive an additional security in relation to expenditures and plans of improvements that would be of every way desirable to them." One branch would be called the "Select Council," to consist of the mayor (who would preside), recorder, and ten aldermen elected from the ten wards, these aldermen to have a three year term and not all to retire at the same time. The other branch, to be designated "Common Council," would consist of 20 members, two elected from each ward annually, and would choose one of their number to preside. Each branch would "possess concurrent powers, . . . but a negative on each other's proceedings." Each branch would "nominate candidates for office, and if they disagree, the choice to be determined by joint ballot."—M. C. G. (1784-1831), XIII: 335; N. Y. Ev. Post, O 28 and 29, 1823. See D 15.

The common council, having attended the exhibition of the model of an equestrian statue of Washington in Broadway City Hall, and the committee on invitation from the Free School Society, passed a resolution praising "the great improvement made by the Children in the different branches of useful Knowledge," the "nearness and Cleanliness in the Apartments and regularity in the Department and habits of the Children," the zeal of the teachers, and the "benevolence and public spirit" of the trustees.—M. C. G. (1784-1831), XIII: 344.

24. For a report on Cousins White, the engineer employed by the common council to survey ground through which water to supply the city might be brought from the Bronx and other sources, the board decides to invite Judge (Benjamin) Wright, one of the canal engineers, to accompany him in his examination of these routes.—M. C. G. (1784-1831), XIII: 364. See Ap 12, 1824.

The common council resolves that "Brigades of Flat Stones" be placed across some of the streets in the third ward.—M. C. G. (1784-1831), XIII: 389.

"At a public meeting at the Tooting Coffee House the following resolution is passed: "Resolved, That this meeting gateth highly becoming the people of the United States, to sympathize with the Greeks in their present struggle for liberty, and as far as can be done without interfering with the prerogatives of Government, to render them every possible aid towards the promotion of their emancipation. A committee of 70 is appointed to receive subscriptions in aid of the Greeks and to memorialize congress to recognize their independence."—N. Y. Ev. Post, D 5, 1823. For the activities of various societies and wards in raising money, see ibid., N 21, D 6, 15, 16, 17, 19, 20, 22, 26, 27, 30, and 31, 1823; M. C. G. (1784-1831), XIII: 393; 434; N. Y. Mirror, I: 59, 167, 182. See also Ja 1, 5, and My 6, 1824.

St. Thomas's Episcopal Church has its inception, at a meeting, in a residence at Hester and Broome Sts. (a good residential section of the city), which was called to consider building an Episcopal church "above Canal street," at this time out in the country.—N. Y. Times, N 25, 1823. The building was commenced immediately, in this year, at the north-west corner of Broadway and Broome St.—Goodrich, Picture of N. Y. (1828), 216. For laying of corner-stone, see Jl 27, 1824. See, further, L. M. R. K., III: 934.

A committee reports to the common council that the dry measures hitherto used in this city have not been in conformity with the state standard, and that those used on one side of the city have varied from those used on the other. Deeming it a matter of vital importance to the commerce of the state to have a uniform standard, they have procured a complete set of copper measures from...
The common council unanimously agrees that the corporation of this city ought to consist of two branches (see O 7), "each having a negative on the proceedings of the other."—M. C. C. (1784–1811), XIII: 384.

The streets are not so cleanly swept as they should be; the reason for which is, that it is left to each housekeeper to sweep before his own door, instead of sweepers being appointed for this purpose. Pigs are suffered to run at large, a thing of which many of the inhabitants are ashamed, but which the greater part contend for as contributory to the healthiness of the city! The animal and vegetable matter thrown into the streets would, it is contended, putrify and taint the air, were it not for the pigs.

**24 Dec.**

In this year, the United States of Mexico was established, with Guadalupe Victoria as president.—Winor, VIII: 227.

In this year was published in New York *The Hist. of the Treadmill,* by James Hardie. This mode of punishment, in operation at the almshouse, is described, with "a general view of the penitentiary system." Among important timely observations, there is a chapter on "measures to be enforced to lessen the number of crimes." See Ag 18.

In this year, the first New York City directory to give a list of the streets was published by Thomas Longworth.—See copy in *N. Y. L.*

In New York viewed from a distance at which the eye can take in its full length, from Hoboken for instance, or the heights of Brooklyn, has the air of a metropolis. The long line of shipping before the wharfs, the numerous lofty spires and turrets, the steam-boats incessantly moving; all these manifest it to be a place of vast importance. A walk through it, however, dissipates much of the glory by the jarring excitement and noise. With the exception of Broadway, Hudson Street, and Greenwich Street, there are few streets deserving particular notice. Most of the steeples are of wood, appearing mean to those accustomed to the sight of stone ones. Of the public buildings, the City Hall and St. Paul's church, are the only two of tasteful architecture. The Catholic cathedral is large but not beautiful. There is no exchange for the merchants, and the shops are less splendid than the size of the city would lead one to expect. But when the feelings of disappointment have subsided, and the pedestrian knows what to regard, he may find enough to gratify. Broadway extends the whole length of the city, dividing it into two nearly equal parts. It is wide, and in several parts planted with trees. The houses are built of red brick, and are lofty and spacious. . . .

"The streets are not so cleanly swept as they should be; the reason for which is, that it is left to each housekeeper to sweep before his own door, instead of sweepers being appointed for this purpose. Pigs are suffered to run at large, a thing of which many of the inhabitants are ashamed, but which the greater part contend for as contributory to the healthiness of the city! The animal and vegetable matter thrown into the streets would, it is contended, putrify and taint the air, were it not for the pigs."

A Genus of the New Buildings erected in 1824, arranged according to materials and number of stories; documents, interesting to the Christian, the Merchant, the Man of Inquiry, and the Public in General, is the title of an 8vo volume by James Hardie, published in New York in 1825.

During this year, there were erected in the city, principally in its central districts, 8th, 9th, 10th, and 11th Streets, more than 1,000 houses, "720 of brick or stone, 503 brick fronts, 491 gable fronts; one story, 1,293 two stories, 228 three stories, 49 four stories or upwards. A corresponding and great increase took place in the value of real estate, especially in the northern parts of the city, and in the environs, particularly at Brooklyn. Also, a great enlargement of population."—*Goodrich, Picture of N.Y.* (1826), 119, 120. During this year, the Second Unitarian Society in the city was started, and its church built at the corner of Prince and Green Sts. This was burned in 1827. In 1827, this society united with the Chambers St. Unitarian Church to found a burial-ground on 2d St.—*Bellows, The First Congregational Church, &c.* (1859). See also L. M. R. K., III: 937.

The Friends meeting-house on Pearl St., erected in 1775 (8 v.), between Franklin Square and Oak St., is taken down, and its place supplied by stores and dwellings.—*Greenleaf, 116–117 Onderdonk, Annals of Hempstead,* 102; L. M. R. K., III: 928.

Cauvas White (see Ap 1, 1822) presents to the common council a report of his investigations of the feasibility of obtaining a water supply from the Bronx River. He thinks favourably of the idea and states that the supply from the Bronx will be sufficient for many years, and when necessary it can be supplemented by conducting water from Byram River to Rye Pond or from Sawkill River to the Bronx. In his opinion, the only way in which the Croton River can be utilized is by building an aqueduct along the Hudson.

While outlines four plans by which water may be conducted from Bronx River to New York. Two of these provide for a dam across the river near Williamsbridge and a canal thence to a small reservoir at Macom's Dam, from which the water may be pumped, by utilizing the action of the tides, to a receiving reservoir on Manhattan Island. Thence it is to be conducted through a line of 30-inch cast-iron pipes to a distributing reservoir near the city. Plans 3 and 4 are for a gravity supply; the water being taken from the Bronx at the pond of the Westchester Cotton Factory, which by means of a dam is to be raised six feet, to an elevation of 62 feet above the Park, thence to the Harlem River and the city as in Plans 1 and 2. The estimates vary, according to the plan, from $921,711.00 to $9,494,542.65.

Benjamin Wright (see N 24, 1822) submits a report at the same time, in which he agrees with White.—*Weigmann, N. Y. City's Water Supply, 1828–1895, 14–15; Man. Com. Coun. (1854), 217.

No action on the reports was taken by the common council, according to the minutes. See, however, Ap 12.

On this day there were 326 vessels in New York harbour.

—*N. Y. Eev. Eost,* 8 1824;

"The Bachelor's Bill" is held in aid of the Greeks (see D 2, 1821), and the sum of $266.44 is raised.—*N. Y. Eev. Eost,* 12 1824; *N. Y. Mirror,* 1: 183. See Ja 8.
A grand military ball is held at the Park Theatre for the benefit of the Greeks and in honour of Jackson's victory at New Orleans. About 2,000 people are present. "The interior of the theatre presented a most brilliant appearance. The pit and stage were covered with a new flooring, and marked out for twenty cottillions. The stage represented a most magnificent grotto, inlaid with glittering gems and nearly shells, illuminated with a thousand lamps."

"A prominent New York editor observes: "...there is not a city in the world which, in all respects, has advanced with greater rapidity, than the city of New-York, within these ten years. Whichever way we turn, new buildings present themselves to our notice. Formerly, upper wards particularly, entire streets of elegant brick buildings have been formed on streets which only a few years ago were either covered with marshes, or occupied by a few straggling frame huts of little or no value.—The improvements in the vicinity of Canal street are, perhaps, the most extraordinary. Almost a city of itself has sprung up there, and on what, only two or three years ago, was a stagnant pool, prejudicial to health, and entirely unsuipductive, we now behold at least 250 good substantial dwelling houses, many of them occupied by people of fashion; and such is the spirit for building in the neighborhood of this street, that present appearances indicate an equal number of new houses before the end of the present year. In Greenwich, too, and along the Bowery, the number of houses is fast increasing. In the former, property has considerably risen in value, and the opening of streets and avenues which have recently taken place must gradually promote that rise. Nor can it be doubted that the trade consequent on the Navigation of the Grand Canal and the branches connected with it, will in a few years cause the whole of the shores of the North river in this direction, to be covered with stores and yards for receiving, packing, and shipping the products to foreign ports. Already is our coasting trade univalued, and the amount of duties on imports and tonnage greater than the whole of Boston, Philadelphia, Baltimore, Norfolk and Savannah, put together. ... We have likewise a greater number of packet ships than all the ports of the Union collectively,..."—N. Y. Ev. Post, Ja 8, 1824.

Gen. William Pudding is elected mayor by the common council. He took the oath of office on Jan. 26.—M. G. C. (1784-1817), XIII: 593, 599-10; N. Y. Ev. Post, Ja 20, 1824. He succeeds Stephen Allen (see Mr 5, 1821) and was himself succeeded by Philip Hone on Jan. 3, 1826 (q.v.).

In his annual statement to the common council of the fiscal concerns of the city, the mayor reports that the "City debt in 1816 amounted only to $900,000, but owing principally, to the heavy demands upon the Treasury for improvements projected by the Common Council of 1814 and 1815, amounting to nearly half a Million of dollars, and the want of a regular system in making the calculations of the probable receipts and disbursements...the debt has been increased to $1,300,000."—M. G. C. (1784-1831), XIII: 425.

The city inspector reports to the common council that during the previous year the "Deaths by Consumption were Six Hundred and eighty three, ...The Yellow Fever menaced our City during the Summer months, but, owing to the vigilance of our public authorities, under the protection of Providence, its progress was soon arrested, one fatal case was only reported as such, which was brought here from Havana, by the Ship Diana. ...It is announced that the Small Pox, that has caused so much destruction to the City, has made its appearance in our City, and still continues, eighteen persons died of this complaint in November and December. Its return after its having disappeared in this City, since July 1818, should urge with increased energy the practice of vaccination."—M. G. C. (1784-1831), XIII: 492-95. On April 26, the trustees of the city dispensary reported that 2,844 persons had recovered of the Plague, and lying principally, to the health and safety of the City, and still continues, eighteen persons died of this complaint in November and December. Its return after its having disappeared in this City, since July 1818, should urge with increased energy the practice of vaccination."—Ibid., XIII: 692. See Ja 17, 1825.

The common council resolves that the side walks around the Park shall be flagged.—M. G. C. (1784-1813), XIII: 438.

The "Market Place," reduced in size in 1815, ceases to be a market-place, is no longer reserved for public use, and streets and avenues are to be continued through it.—Laws of N. Y. (1824), chap. 10. See the Randle Survey, Ap 1, 1811.

M. M. Noah writes to the mayor: "A new invention for boring the earth for pure water, has been in successful operation in England for the last three years. In a late journey through one of the Southern States, I saw one of the machines in operation, formed from a plan or drawing, and became at once convinced that a similar apparatus would facilitate us in ascertaining beyond any doubt, the quality of water on this island, and the probable quantity which can be conveyed to the city.

"I have great pleasure in acquainting you, and through you the Common Council, that I have not only furnished myself with the necessary drawings of the machinery but have made several improvements upon them, and feel perfectly assured, that a depth of 400 feet can be bored with this apparatus; and from its portable nature, it can be conveyed to any spot where a probability exists of striking upon a vein of pure rock water.

"There appears to be no doubt that a number of Springs can be found in a line from the North to the East River, commencing above the junction of Bowery and Broadway, and continuing the survey to Harlem Heights, and water of a soft and pure quality be found in sufficient quantity to supply all our wants, which, being raised and conveyed into reservoirs, can with ease, be piped throughout the city.

"I have lately been exploring the ground over which that fine sheet of water called the Collect formerly flowed, and which has been so improvidently filled in. Had it been merely one spring, its recovery would have been doubtful; but as there were several, which, in the aggregate, would amount to something like three or four acres, and was always considered exceedingly deep, I am impressed with the belief that by boring with this apparatus, through about thirty feet of earth filled in, and pursuing it through mud and gravel, to the depth of from 70 to 100 feet, we shall probably arrive at the water as it was formerly used, and if found to be pure, measures may then be adopted to recover this invaluable gift, by sinking the proper basins and reservoirs.

"If the improvements in the neighborhood of the collection shall have impaired the quality of the water, we have still the opportunity left of making the experiment, within a few miles of the city, where the hills have not been levelled.

"The Manhattan Company, I learn, have been lately furnished with a similar apparatus, and will also commence boring for water on this plan. That company is very zealous in efforts to improve the character of the water, and make discoveries of new and pure sources, and therefore will promptly co-operate in any experiment, for the attainment of this laudable object.

"I make this communication to the Common Council, in order that any contemplated measure, by which the funds of the city may be applied to this object, may for the present, be suspended, and I shall be happy to confer with any Committee which the Common Council may deem proper to appoint, feeling assured that a deep interest will be felt by our citizens in any attempt that may be made to furnish more pure and wholesome water, than that which we are now under the necessity of using."—N. Y. Ev. Post, Ja 29, 1824. This is referred to the water committee.—M. G. C. (1784-1831), XIII: 511. See N 24, 1823, and Ja 17, 1824.

It is resolved to open Eighth St. from the Bowery to Sixth Ave; also, to open Fifth Ave. from its commencement to 13th St; and to extend Thompson St. from the southerly line of Amity Lane (between Bleeker and Amity Sts.) to Fifth Ave.—M. G. C. (1784-1831), XIII: 152-156. Regarding Fifth Ave, see also Fifth Ave. and the Park (1825). At a distance of a few miles from the beginning of this avenue's history, the centennial of which was celebrated in Nov., 1924. See the June, 1924, bulletin of the Fifth Ave. Assn.; N. Y. Times, N 15 et seq, 1924. See also, S 27.

It is resolved that the thanks of the common council be presented to the Hon. Stephen Allen, late mayor, for the able and faithful manner in which he discharged the arduous duties of that office, and that be be permitted to sit in the gallery of paintings in the city hall.—M. G. C. (1784-1831), XIII: 517.

The trustees of the city dispensary petition the common council for permission to purchase the lease granted by the corporation to John Vanderlyn of the land on which the "Rotunda" is built. They do use it for the sick and infirm and as a place to receive the poor applying for Medicines and Attendance."—M. G. C. (1784-1831), XIII: 519. A year later
theinvention launched 102.

William B. Astor, president pro temp. of the American Fur Co., and others, petitioned the common council to make application to the legislature for an alteration of the health law prohibiting bringing furs from the interior of the United States during the summer.—M. C. G. (1874-1875), XIII: 520. On March 1, the board decided to act on this request.—Ibid., XIII: 582-83.

The steamboat "Oliver Ellsworth" is launched from the shipyard of Messrs. Isaac Webb & Co.—N. Y. Ev. Post, F 5, 1824. See also ibid., My 7, 1824.

The new Dutch Reformed Church at the corner of Broome and Green Sts. is to be opened on this day.—N. Y. Ev. Post, F 6, 1824. See also L. M. R. K., III: 954.

The steamboat "Lioness," to ply between New York and Flushing, is launched from the yard of Messrs. Lawrence & Sneed.—N. Y. Ev. Post, F 9, 1824.

The General Society of Mechanics and Tradesmen of New York City asks the common council that the annual rent of $135 reserved on their lease may be remitted because their resources are not sufficient to extend their library as they wish.—M. C. G. (1874-1875), XIII: 590. On Dec. 18, 1825, the "Apprentices Library" presented the board with the catalogue of the 242 volumes purchased with money donated by the corporation.—Ibid., XV: 101. See Ap 9, 1821.

The committee to whom was referred the subject of the propriety of digging out Henry St., reports to the common council that the present seems to be the proper time, as much earth is wanted for filling the Battery and "the meadows at Manhattan Island."—M. C. G. (1874-1875), XIII: 541. For the "Manhattan Island" here referred to, see L. M. R. K., III: 666.

A benefit performance is given at a circus on Canal St., between Broadway and Elm St.—N. Y. Daily Adv., F 28, 1824. On March 5, a "New Circus, Canal Street," was advertised.—Ibid., Mr 5, 1824.

A new brick, fire-proof building, of a capacity for 150 hundred auditors, has been erected in Chatham Gardens [see Ag 2, 1824], for theatrical representations, and will be opened about the first of May.—N. Y. Mirror, I: 255, 256. See My 17.

"Isaac Wright and Sons" and others petition the common council for a lease of the flagstaff (on the Battery) for the ensuing year, for they find the "telegraphic Establishment at the Flag Staff is of great utility to the Merchants and Ship Owners of the City."—M. C. G. (1874-1875), XIII: 595.

John C. and Robert L. Stevens obtain a lease for a ferry "from a point on Hudson River to a point on the City Street or West of Washington St. At the termination of an intended St. 30 ft. wide, between ground of the site of the late Canal Basin on the north and ground of Alexander L. Stewart on the South to Hoboken on the Jersey Shore."—M. C. G. (1874-1875), XIII: 626. See "Hoboken Ferry" in L. M. R. K., III: 945.

The Society for the reformation of Juvenile Delinquents in the City of New York" (see Mr 1) is incorporated.—Laws of N. Y. (1824), chap. 120; Man. Com. Coun. (1828), 627-8. Its charter was amended in 1826.—Laws of N. Y. (1826), chap. 24.

The common council resolves that it will "afford to the Corporation & to their fellow Citizens very great Satisfaction if the Legislature will be pleased to meet in this City, at their autumnal session," and that suitable apartments will be provided.—M. C. G. (1874-1875), XIII: 644. On April 26, word was received that the speaker of the assembly wished to make "known to the Corporation the high sense which the Assembly Entertain of the Public Spirit and liberal offer" of the common council.—Ibid., XIII: 680-81.

The legislature passes a law "to alter the organization of the Common Council of the City of New York." The law also, by a few amendments, the features of a report submitted to the common council on Oct. 27, 1823 (p. 5), and agreed to unanimously by that body, Dec. 15, 1823 (p. 9). The act is not to become effective unless ratified by a majority of the electors.—Laws of N. Y. (1824), chap. 155. It failed of ratification. See My 31.

David Hosack and other physicians and private citizens testify to the injurious quality of the water supplied by the Manhattan Company.—Certificates, relative to Manhattan Water in N. Y. (1824).

The legislature authorizes the corporation of New York City to "cause to be erected and built, or to appropriate any building..."
THE ICONOGRAPHY OF MANHATTAN ISLAND

1824 or buildings already built, at one or more places within the said city and county of New York, as the goal of the said city, for the confinement of persons on civil process, also one or more places "as the city prison or bridewell. — Laws of N. Y. (1824), chap. 213.

See Mr 9, 1829; II 12 and Ag 23, 1833.

Tammanny Hall "has been taken by the U. S. Circuit & District Courts, at a rent of $1,500 per annum, for the purpose of its regular sittings; the Tammany Society to be allowed, as formerly, to meet for the election of their officers, and the transaction of their ordinary business, but no public meetings are allowed to be held there while it is occupied as a court room." — N. Y. Eve. Post, Ap 10, 1824. See S 13.

The legislature authorizes the canal commissioners to borrow $1,000,000 for the completion of the Erie and Champlain Canals. — Laws of N. Y. (1824), chap. 255.

The committee on supplying the city with water reports to the common council that Canvas White (see Ap 1, 1824, and N 24, 1824) "has examined the practicability and Estimated the Ex pense of furnishing this City with a Sufficiency of wholesome water, that he has also examined "Several routes and plans by which it Seems practicable to accomplish this desirable object," and that "These routes & Plans are delineated on a Map and noticed in a Report of Mr White [see Jan, now in the possession of your Committee]. The board thereupon pays White $1,100.15 for his services.—M. C. C. (1784-1831), XII: 657, with "guarantee in writing of Mr. White, dated 26th February, 1824, to furnish the city with water to the amount of two hundred thousand dollars per annum, the first payment to be made on eyewig the completion of the work, and the balance in six equal portions during the third and succeeding years." See also ibid., XII: 657, and Committee of Public Health, March 27, 1824.

The city, on the 23rd April, 1824, has been visited by the American Association for the Advancement of Science. — N. Y. Eve. Post, Ap 23, 1824.

The first public exhibition of Gas lights manufactured by Mr. Timothy Dewey, agent of the Gas Light Company in this city, takes place in a house at 268 Water St., the first house in New York to be lighted by gas. "All doubt as to its practicability was at once removed. In point of economy, safety, and cleanliness, it appeared perfectly obvious that this mode of lighting our streets, public buildings, manufactories, and dwelling houses, surpasses every thing of the kind that has hitherto been attempted by oil or candles." — N. Y. Eve. Post, Ap 23, 1824. See also Ibid., Ap 24 and My 12, 1824. See also De Voe’s Market Book, 1797-1824.

The name of Fly Market St. is changed to Maiden Lane.—M. C. C. (1784-1831), XII: 694. See also De Voe’s Market Book, 1797-1824.

It should appear that our citizens are at last to be accommodated with an Exchange; the Directors of the Merchants’ Exchange Company (see Ja 27, 1823) having purchased the Buchanan property in Wall street, as a suitable place for erecting a building. It cost about $1000,000, has a front of 114 feet, including Wall street House; and extends backwards to Sloat Lane. — N. Y. Eve. Post, Ap 29, 1824. See also L. M. R. K., XII: 925.

The sum of $595,952.23 has been "collected and transmitted by the members of the committee of the citizens of "the city of New York" to Baring, Brothers & Co, London, to aid the Greeks in their struggle for liberty." — N. Y. Eve. Post, F 13 and My 3, 1824.

Signor Causici (see O 13, 25, and 27, 1823) informs the common council that "the Model of the Equestrian Statue of Gen Washington will be completed next Monday," and that Mr "Versico," an Italian artist, has assisted him in finishing it. The board refers the subject to the committee of public building, to view the statue and to report. See also ibid., VIII: 733, and description of Pl. 100, III: 592. This was evidently a new model. See, further, J I and 3.

Three members of the common council who attended the examination of the children of the African Free Schools, at the schoolhouse, No. 5 Mott St. near Prince St. (M. C. C., 1784-1831, XIII: 681), report highly satisfactory work done by these pupils. "The whole together furnished a clear and striking proof of the value of the Monitory System of Education and of the Public Spirit & useful labours of those of our fellow citizens who by their Zeal and perseverance & for no other reward than the pleasure of doing good have been able to produce such Specimens of improvement in the lutherno neglected and despised descendants of the black race." This mental and religious training enables them to "look forward to the time when through their instrumentality in part the degradation that belongs to their Colour and their name shall be wiped off & Ethiopia shall Stretch forth her hands unshackled by Slavery and unstained by the pollutions of Ignorance and Idolatry." — Ibid., XIII: 714-15.

The city allows $600 for the vaccine department of its dispensary. — Journal G, 318, comptroller’s office. This step is probably taken to prevent the recurrence of the epidemic of 1822.

The Chatham Garden Theatre (see Mr 6) is opened.—N. Y. Eve. Post, My 17, 18, and 19, 1824. It is on the north side of Chatham St., between Duane and Pearl Sts., running through to Augustus St. (now City Hall Pl.). A temporary structure had been erected here in 1822.—Brown, J: 84; L. M. R. K., III: 593. See My 9, 1824.

The common council receives a report from a committee of the grand jury which has visited the lunatics’ apartments at the almshouse. It states that these rooms are totally insufficient for the safe keeping of sane persons, much less of lunatics.—M. C. C. (1784-1831), XIII: 732-33.

At a special election, the law providing for a division of the common council into branches falls of ratification by a small majority. A newspaper comments: "The apathy that has prevailed on this occasion is astonishing. There are fifteen thousand voters in this city, and only about four thousand votes have been taken. While the friends of the bill have individually remained at home, in the full assurance that everybody else would go and vote 'Yes,' its opponents, by raising the ridiculous cry of 'Lords and Commons,' have rallied out enough to put an end to the matter." — N. Y. Spectator, Je 4, 1824.

The N. Y. Gas Light Co. having erected in Franklin Square "an iron Lamp post, of the kind in use in London, for the purpose of shewing the corporation and citizens of New York the superiority of this description of light over any other," it is lighted this evening "to the gratification of hundreds." — N. Y. Eve. Post, Je 12, 1824. On June 21, the common council accepted an invitation to visit the lamp post on June 23 (p. 636), —M. C. C. (1784-1831), XIII: 774, containing facsimile of letter to Mayor Paulding from the manager of the company.

The corner-stone of St. Mary’s Church at Manhattanville (see F 4) is laid on this day.—N. Y. Eve. Post, Je 12, 1824.

The recorder presents the following preamble and resolution to the common council: "Whereas the Senate and House of Representatives have lately by a concurrent resolution requested the President of the United States to give to the Marquis De Lafayette, an invitation to Visit this Country, and to Communicate to him the Assurances of grateful and affectionate attachment still cherished towards him by the Government and the People; Whereas I have received as a further determination of this purpose a note, signed by a National Ship of the line [Cadmus], should be offered to the Marquis for the purpose of Conveying him to the U States. And it being understood that the invitation has been given
and accepted, and that our distinguished Visitor may probably, shortly arrive at our City, Influenced as this Board is by a respectful deference to the Constituted authorities of the General Government and animated by the highest esteem for the public and private virtues of the Marquis De Lafayette, it is therefore resolved, That the Corporation of the City of New York, acting in behalf of their fellow Citizens will receive and treat, the Marquis De La Fayette, as a Guest of the Nation."—M. C. C. (1784-1781), XIII: 734-75. See Jl 19.

The common council is petitioned by people living near the 9th-stone "to have the 10th Avenue opened from the front of Mrs Hamilton to that of Mr. Junell." Referred to road committee.—M. C. C. (1784-1781), XIII: 757.

The common council rules that booths may be erected around the Park, and let to individuals for Independence Day, as a convenience to the large number of people who crowd into the city for this celebration.—M. C. C. (1784-1781), XIII: 769-70.

The common council resolves that, since disorder and confusion are introduced into the fire department by admitting occasional volunteers to assist the various fire companies and to discharge the duty of firemen, hereafter they will dispense with the services of such volunteers.—M. C. C. (1784-1781), XIII: 774.

The committee on lands and places reports to the common council that Castle Clinton has been leased for 5 years to Francis B. Fitch, Arthur Roorbach, and J. Rathbone, at the annual rent of $1,400. The counsel of the board is authorised to prepare the lease.—M. C. C. (1784-1781), XIII: 733, 775-76. On July 19, in petitioning the corporation for a lease for 10 years, the lessees stated that they had already expended over $5,000 in improving Castle Clinton, and that they were contemplating other improvements, even more extensive; also that the same had not been changed to Castle Garden.—Ibid., XIII: 791. On Nov. 23, the common council resolved to execute the lease of Castle Garden under certain conditions, among which were that no billiards or gaming of any kind should take place on the premises, neither should dancing be allowed without the mayor's permission.—Ibid., XIII: 798. See Jl 16, 1823, and Jl 3, 1824. See also L. M. R. K., III: 983.

25. "The building for manufacturing gas from oil, is going on rapidly under the immediate inspection of Timothy Dewey, Esq., the agent and manager of the company. The pipes having now arrived, and all arrangements completed, the laying of them will be commenced immediately, and there is no reason to doubt that a part of Broadway, and probably, of Pearl-st. will be lighted with gas the ensuing winter. This evening the corporation visit the establishment in Water Street [see Ap 22] and also the Lamp, in Franklin square [see Jc 14], which will be brilliantly illuminated.—There is now only one opinion as to the great advantages which our city will derive from this improved mode of lighting our streets, manufactures, public buildings and dwelling houses."—N. Y. Post, Jl 16, 1824. See also Chancellor Kenyon, the Chancellor's work on the s. c. cor. of Centre and Alexander Sts.—L. M. R. K., III: 962. See, further, Jl 16.

A letter to the editor of the Post complains of the need of a watch-house in the First Ward. It states: "A few years ago, the corporation sold the old watch house at the corner of Broad and Wall-streets [see Jl 5, 1793, regarding its original], and purchased a lot in Beekman street, for the purpose of building a watch-house there, which was erected and then let out, and the watch sent to the City Hall. There has been a watch-house in this part of the city from its first settlement, till within a few years."—N. Y. Post, Jl 23, 1824.

27. The "New Church on the corner of Prince and Orange [Marion] streets" is to be opened on this day.—N. Y. Ev. Post, Jl 16, 1824. This was the Prince Church Universalist Church.—L. M. R. K., III: 937.

A request of Messrs. Causici and Persico (see My 10) for permission to exhibit in the public, in the building where it is now placed, the new model of an equestrian statue of Washington is referred to the committee on arts and sciences.—M. C. C. (1784-1813), XIII: 949.

The watch committee reports to the common council that they have "learnt with great Concern, that the lower part of the City is infested by a gang of Robbers, who have recently entered by Night several Warehouses. . . . Our City has been so long exempt from the horrors of midnight Robbery that it is feared the Citizens have relaxed in those precautions necessary for the preservation of their property."—M. C. C. (1784-1813), XIII: 782.

The following announcement is issued: "The Committee appointed two years ago [see Mr 6, 1824] to devise measures for erecting an equestrian statue of General Washington, though delayed in their progress, have never lost sight of the object of their appointment, and they have now arrived at the conclusions which are herewith submitted."

"It has been ascertained that an equestrian statue in bronze, of colossal size, may be erected and completed for the sum of $49,000—a sum much less than had heretofore been estimated as necessary, . . . They [the committee] propose then, that meetings shall be held in every ward, for the purpose of organizing a large committee, which shall go round the ward and receive from every individual whatever sum, however trifling, his means may enable him to contribute. . . . The Committee suggest Monday, 18th July, as a proper time for meeting. . . ."—Com. Adv., Jl 3, 1824. See O 11 and N 18.

Messrs. Rathbone & Fitch, who have leased of the Corporation the Castle at the Battery [see Je 21], have nearly completed their improvements, and this splendid place of resort will be open to the public this evening. Under the inner arcade, are erecting fifty boxes, ventilated by the port holes of the Castle. Each box contains a table and seats for eight persons. The circular walk on the top, covered with an awning, is upwards of 500 feet in length, and 14 feet in width. On this platform or walk are on both sides benches extending the whole 500 feet, and across the ends. From this walk, the waters of our Bay, the Hudson, and interesting landscapes, &c. are in full view, with all the bustle of our floating commerce. . . . In addition to the improvements above mentioned, there are several apartments, such as a commodious bar room, sitting-rooms, kitchen, &c. and we understand if the proprietors can obtain an extension of their lease, they will erect commodious ball and dining rooms. It is estimated, that about two thousand persons may occupy the comfortable seats on and within the walls of this Castle. With that discretion so important in establishments of this magnitude, the Castle Garden must become the most fashionable and healthy place of resort in this country; and as the price of admittance will be but a mere trifle, and within the reach of all, we hope that the honorable Corporation will see the propriety of extending the lease so far as to induce the occupants to continue their improvements, which have already cost them upwards of $5000."—N. Y. Gaz. & Gen. Adv., Jl 3, 1824.

15. The citizens connected with the various New York literary societies hold a dinner at Washington Hall in honour of "the venerable Judge Trumbull of Connecticut, the author of N'Fingal, one of the earliest and most deservedly popular of American ballads," says Chancellor Kent, the Chancellor's work on the s. c. cor. of Centre and Hester Sts.—L. M. R. K., III: 962. See, further, Jl 16.

"We observe with pleasure that the works of the Gas Light Company are rapidly progressing. The building [see Je 23] is considerably advanced, and the main pipes have been laid in Canal st. as far as Broadway, where the ground was opened this morning to continue them to the Battery. The pipes imported, have been found on trial, to be perfectly tight. All is bustle and activity, under the immediate superintendence of Mr. Dewey."—N. Y. Ev. Post, Jl 16, 1824. See, further, D 7.

The committee on making arrangements for the reception in this country of the Marquis de Lafayette, composed of Recorder Richard Riker, Aldermen Philip House, Avo Main, and George Zabriskie, reports to the common council. They have taken spacious apartments for the marquis, his family, and suite, at the City Hotel, and an equipage has been provided which shall be constantly at his service; they have endeavored to avoid all unmeaning pomp or parade, for "Vain and ostentatious ceremonies would be equally unacceptable to our illustrious visitor, as opposed republican habits. There are occasions, however, where the American people choose to pour forth their feelings in acts of unrestrained hospitality, munificence and even profusion. Such will be the case when the Marquis arrives in our City."—M. C. C. (1784-1813), XIII: 793; Post, Jl 20, 1824. See Ag 15.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1824 The common council accepts from Capt. Henry Robinson July the gift of an engraved likeness of the Marquis de Lafayette which direct shall be framed and hung in the gallery of portraits in the city hall. — M. C. C., XII: 793; N. Y. Ec. Post, JI 20, 1824.

27 The corner-stone of St. Thomas's P. E. Church is laid at the northeast corner of Broadway and Houston Sts.— N. Y. Ec. Post, JI 24, 1824; N. Y. Mirror, Je 20, 1829; L. M. R. K., III: 934. Permission was given on Aug. 18, 1824, by the common council, to place a railing in front of the building. — M. C. C. (1784-1831), XIV: 34. The church was finished and opened Feb. 23, 1826 (p. v.).

29 The naval officers hold a dinner at the City Hotel in honour of James Fenimore Cooper. — N. Y. Ec. Post, Ag 7, 1824.

Aug. The common council agrees to take the triangular piece of ground included between Grand, Harman (East Broadway), and Scammdel Sts. for a public place.— M. C. C. (1784-1831), XIV: 21. This became Grand Street Park.— L. M. R. K., III: 966.

7 ... The want of a regular and abundant supply of pure and wholesome water, acknowledged on all hands to be essential to public health, has been long felt among us, and a remedy for the evil long talked of, but without the least prospect of its being accomplished. ... Sometimes we are told that the Corporation has seriously resolved on taking measures to bring in water; at other times we are informed that this is to be done by a company, who have applied to the legislature for a charter of incorporation, but amount all the chances, year after year is allowed to pass without a single step being taken to obtain the necessary supply, which, we expect, might be obtained at a comparatively small expense, and within a reasonable period, if proper measures were adopted. — N. Y. Ec. Post, Ag 7, 1824.

13 Arthur Burris writes to the board of health that, on this day, he has "closed the Pest House at Kips bay," which, he says, "was opened on the 9th day of November 1824." He reports on the number of small-pox patients received there (324), of whom 60 died. He has spent over $2,000 for its support.— From the original MS. in metal file marked "Filed Papers 1700-1800," etc., in city clerk's record-room.

Lafayette, accompanied by his son, M. Auguste Le Vaseur, and one servant, arrives on this day (Sunday) in the ship "Cadmus." He landed at Staten Island and passed the day at the home of Vice-Prez. Tompkins. There he was visited by the common council and "crowd of our citizens." — N. Y. Ec. Post, Ag 16, 1824. Josiah Quincy, writing in 1823, said: "The intelligence of the arrival of Lafayette in the harbor of New York, on the morning of the 15th of August, 1824, spread through that city with a rapidity which our modern means of communication cannot approach. ... Ere we saw his arrival, the multitude had filled the streets and the streets were crowded with people who could not be seen, but were felt, and the streets themselves were quivering under the pressure of so many persons."—

Lafayette, on board the "Chancellor Livingston," is escorted from Staten Island to the Battery by the "Robert Fulton" and other steamboats and merchant vessels. Amid salutes from the harbors and from the islands and outposts of the city, he landed at Castle Garden. "The ringing of bells, the roar of cannon, the display of the national standard at all the public places, the decorations of the steam boats and shipping with the flags of every nation, the martial strains of music, and the shouts of the multitude, proclaimed that it was a jubilee which could not fail to be enjoyed by every true friend of liberty." Escortd by the militia and the Cincinnati, the marquis proceeded to the city hall where he was welcomed by Mayor Paulding and introduced to the members of the common council. The portrait-room was placed at his disposal during his residence in the city. After this reception he retired to his apartments in the City Hotel, and dined there with the corporation. In the evening, buildings were illuminated and the theatres, public gardens, etc., were decorated in the most sumptuous manner, with music, fireworks, etc.—N. Y. Ec. Post, Ag 17 and 18, 1824; M. C. C. (1784-1831), XIV: 24-26; Goodrich, Picture of N. Y. (1828). See also Butler, The Tour of Gen. La Fayette, Aug. 16 (1825), 223-230; Nations of the Americans: Picked up by a Travelling Bachelor (London, 1828), I: 29 et seq.; and Memoirs of the Life and Character of the Rev. Matthias Brien (N. Y., 1811), 182-84; Mag. Am. Hist. (1881), VI: 321 et seq. For views showing Lafayette's landing at Castle Garden, see Pls. 94-a and b, Vol. III. The New York Historical Society owns a large punch bowl which bears the same view of this scene. On Oct. 11, the common council thanked the various steamboat owners, the navy, the troops, etc., for their part in the reception.— M. C. C. (1784-1831), XIV: 97-98.

Sometime before this date, the octagonal pavilion around the flagstaff (see 1819) was removed, as there was no trace of it in the views showing the landing of Lafayette at Castle Garden on this day (see Pls. 94-a and b, Vol. III). See also descrip. of Pl. 59, I: 425.

Gen. Lafayette makes a tour of the Brooklyn Navy Yard, and on his return is waited upon at the city hall by the Cincinnati and other societies, the clergy, and a number of private citizens.— N. Y. Ec. Post, Ag 19, 1824. He and his son were also made members of the Historical Society at the New York Institution. In the evening, he gave a dinner to Capt. Rodgers and the naval officers here.— Butler, The Tour of Gen. La Fayette (1825), 232-35; N. Y. Ec. Post, Ag 31, 1824.

The common council accepts a portrait of Marquis de Lafayette from Capt. Francis Allyn, commander of the ship "Cadmus."— M. C. C. (1784-1831), XIV: 21.

The common council requests the Marquis de Lafayette to sit for his portrait, and votes the freedom of the city in a gold box to George Washington de Lafayette, his son. It also resolves that "the proceedings of this Board in relation to Gen. De La Fayette, together with the address of the Mayor to him, and his Answer with his signature in his own proper hand writing, and the signatures of the Mayor, Recorder, and the Members of the Common Council, be handsomely engrossed on vellum, One Copy thereof to be presented to the General, and One Copy to be placed among the Archives of the Common Council."— M. C. C. (1784-1831), XIV: 38-39. See Ag 16 and O 11. The latter is now in the archives of the N. Y. Hist. Soc.

It is reported that 500 or 600 new mercantile establishments have been opened in New York this season, and that more than 5,000 buildings have been commenced and are nearly completed within the limits of the city. — Com. Adv., Ag 21, 1824. See also N. Y. Ec. Post, Ag 25, 1824.

At Shakespeare Tavern, on the south-west corner of Fulton and Nassau Sts., officers of the infantry battalion of the 11th Regiment form an independent organization, which they call the "National Guard," the name being prompted by Lafayette's pronounced favor of the National Guard of Paris.— Losing, Hist. of N. Y. City, I: 211-22. The name "National Guard" was applied at first only to this new organization, which was subsequently named the 27th and later the 7th Regiment. On April 23, 1862 (p. v.), the legislature of New York adopted the name "National Guard" as a suitable title for the entire militia of this state.— Clark, Hist. of the Seventh Regt. (1890), I: 105.
of travellers—in the American sense of that term, but was a place of resort of some of the better class of city residents. It was a sort of club-house, where choice wines and quiet, excellent suppers might be obtained. It was originally built after the model of an English alehouse...—"Lossing, op. cit., I: 322, footnote. See, further.

27 We understand that the company who have been employed for several weeks in raising the British frigate Hussar, which ran on the rocks in Hurl Gate, and sunk, during the revolutionary war, have succeeded in raising about forty feet of the stern of the ship,—after placing the chains under her and moving her from her bed, she broke in two from the keel up through the quarter-decks, and therefore part of the ship slipped from the slings and settled down again on the rocks. The timber of such part of the ship as was embedded in the mud is perfectly sound. The remainder is completely worm-eaten and rotten. A number of cannon and shot were brought up with the hull, but nothing more valuable that we can learn.—N. Y. Evoc. Post, Aug 27, 1824. See Aug 29, 1825.

Rembrandt Peale's portrait of Washington is being exhibited at the New York Institution before its removal to Independence Hall in Philadelphia.—N. Y. Evoc. Post, Aug 27, 1824. See also ibid, Ag 28, for numerous favourable comments on the picture.

28 We are much pleased to learn that the enterprising managers of the Park Theatre have, during the recess, been actively engaged in revising, embellishing, and improving their splendid Theatre, and in making such additions to the theatrical corps as will render it a place of general attraction...—"N. Y. Evoc. Post, Aug 27, 1824. The theatre opened for the season on Aug 30.—Ibid., S 1, 1824; N. Y. Mirror, II: 39, 46.

29 A committee of militia officers and citizens petitions the common council "that, in order to give a fitting tribute to Gen. Lafayette at the Castle Garden they requested permission for Carriages on that Occasion to drive on the Battery to the Bridge leading to the Castle." Referred to a committee with power.—M. C. C. (1784-1831), XIV: 44. See S 4 and 14.

30 Both John Vanderlyn and J. W. Jarvis petition the common council to be employed to paint the portrait of Gen. Lafayette. Referred to committee of arrangements with power.—M. C. C. (1784-1831), XIV: 53. On Nov. 8, James Herring made a similar petition.—Ibid., XIV: 123. All these petitions were evidently rejected; for the portrait of Lafayette, made for the city in 1824 and now in the city hall, was painted by Samuel F. B. Morse.

31 At this time, James Fenimore Cooper wrote from New York to Baron von Kempfelter: "The time has not yet come for the formation of massive, permanent quays in the harbour of New York. Wood is still too cheap, and labour too dear, for so heavy an investment of capital. All the wharves of New York are of very simple construction.—A frame-work of hewn logs is filled with loose stone, and covered with a surface of trodden earth. The Americans...are daily constructing great ranges of these wooden piers, in order to meet the increasing demands of their trade, while the whole of the miles of water which fronts the city, is lined with similar constructions, if we except the public mall, called 'the Battery,' which is protected from the waves of the bay by a wall of stone..." The wharfs of New York form a succession of little basins, which are sometimes large enough to admit thirty or forty sail, though often much smaller. These irregular docks have obtained the name of 'slips.'

In construction, New York embraces every variety of house, between that of the second-rate English town residence, and those temporary wooden tenements that are seen in the skirts of most large cities. I do not think, however, that these absolutely miserable, filthy shacks which are often seen in Europe, abound here. I have been told, and I think it probable, that there are not five hundred buildings in New York, that can date further back than the peace of '83. A few old Dutch dwellings yet remain, and can easily be distinguished by their little bricks, their gables to the street, and those steps on their battlement walls, which our countrymen are said to have invented, in order to ascend to regulate the iron weathercocks at every variation of the breeze.

The principal edifice is the City Hall, a building in which the courts are held, the city authorities assemble, and the public offices are kept. This building is oddly enough composed of two sorts of stone, which impairs its simplicity, and gives it apatched and party-coloured appearance. Neither is its façade in good taste,—being too much in detail...Notwithstanding these glaring defects, by aid of its material, a clear white marble, and the admirable atmosphere, it at first strikes one more agreeably than a public edifice. Its rear is of a deep red, dullish free-stone, and in a far better taste.

"New York is rich in churches, if number alone be considered. I saw more than a dozen in the process of construction, and there is scarce a street of any magnitude that does not possess one. There must be at least a hundred, and there may be many more. Most of the churches in New York are of brick, and constructed internally, with direct reference to the comfort of the congregations. There are, however, some churches in this city that would make a creditable appearance any where among similar modern constructions; but it is the number, rather than in the elegance of these buildings, that the Americans have reason to pride themselves."

"Notions of the Americans: Picked up by a Travelling Bachelor" (London, 1828), I: 147-78.

"Great preparations are making for the splendid fete at Castle Garden [see Ag 30], which, judging from present appearances, will be crowded to overflaw. We have just seen the head of La Fayette, in miniature, engraved by Durand, and an admirable likeness, stamped on watch ribbons, ladies' belts, gloves, &c, which, it is understood, will be worn by most of the company.—N. Y. Evoc. Post, S 4, 1824. The fete was held on Sept. 14 (q.v.).

Lafayette returns to New York in the ship "Oliver Ellsworth" from his eastern tour.—N. Y. Evoc. Post, S 6, 1824; Butler, The Tour of Gen. La Fayette (1825), 317. See S 6.

The Society of the Cincinnati entertains Gen. Lafayette on his sixty-seventh birthday with a dinner at Washington Hall "The decorations of the room surpassed anything of the kind got up in this city, and the illuminations were splendid."—N. Y. Evoc. Post, S 7, 8 and 9, 1824.

Lafayette visits the fortifications at the Narrows, dinner at Fort Lafayette, and in the evening attends the Park Theatre. The latter was elaborately decorated in his honour.—N. Y. Evoc. Post, S 9, 1824.

Gen. Lafayette is the guest of honour at a grand oratorio given by the New York Choral Society in St. Paul's Chapel. In addition to sacred music the choir sang "See the Conquering Hero Comes" and "La Marsellaise." After the oratorio he reviewed a parade of the fire department in the Park and inspected the engines and other apparatus.—M. C. C. (1784-1831), XIV: 53-54; N. Y. Evoc. Post, S 9 and 10, 1824; Butler, The Tour of Gen. La Fayette (1825), 321; Kemp, Old St. Paul's Chapel, 18; Dix, Hist. Recollections of St. Paul's, 37-40.

This afternoon, Lafayette was presented with an "elegant sword" by the Ninth Regiment, and in the evening he went to Van Buren Gardens.—N. Y. Evoc. Post, S 9, 11, and 13, 1824; Butler, The Tour of Gen. La Fayette, 322.

Lafayette receives "the several degrees of masonry" at St. John's Hall, and an elaborate dinner is held at Washington Hall in his honour by the French residents of the city.—N. Y. Evoc. Post, S 11 and 13, 1824.

The common council receives a letter from Hon. Smith Thompson, son of the judges of the U. S. supreme court, saying that a "very extraordinary attempt having been lately made to change the place of holding the Circuit Court of the United States from the City Hall to Tammany Hall" (see Ap 10), he wishes to inquire whether there ever has been, or is now, any objection to the sitting of the court in the city hall.—M. C. C. (1784-1831), XIV: 58-59. On Oct. 25, the committee appointed on the subject reported that, if the court had been incomming in holding sessions in the city hall, it had been done without the order or knowledge of the common council. The room which had been set apart for this purpose since 1811, when the city hall was completed, was still at the disposal of the court and ready for occupation.—Ibid., XIV: 110-12. See also N. Y. Evoc. Post, S 28, 1824.

After two postponements on account of bad weather, the grand popular reception and subscription hall planned in honour of Gen. Lafayette takes place at Castle Garden. James Fenimore Cooper, writing of the affair, describes in detail the decorations of the
THE ICONOGRAPHY OF MANHATTAN ISLAND

1824

The area within the walls of the structure was covered with
a vast aspiring "of the tails of a ship-of-the-line," and this
was draped with flags "in such a manner as to give a soft airy
finish to the wide vault." Mr. Cooper was much impressed by the
orderliness of the assemblage, writing that "there were six thou-
sand guests, a number that is rarely exceeded at any European
entertainment," citing this as proof that established orders in
society are not at all necessary at least, for the tranquility of
its ordinary intercourse." He tells of the arrival of Lafayette on
the scene. "The music changed to a national air, the gay sets
dissolved as by a charm and the dancers . . . formed a lane
whose sides were composed of masses that might have contained
two thousand eager faces each. Through this gay multitude the
old man slowly passed, giving and receiving the most cordial and
affectionate salutations at every step. To me he appeared
some venerable and much respected head of a vast family who had
come to pass an hour amid their innocent and gay revels. He was
like a father among his children."—Nations of the Americans:

At two o’clock in the morning of the 15th, Lafayette, his son, and
his suite retired from the ball, went immediately on board the steamboat "Memorial Krout," and sailed for the Hudson to visit Albany
and other towns along the river.—Butler, The Tour of Gen. La
Fayette (1825), 333–6. See also N. Y. Evet. Post, S 11, 13, and
15, 1824; N. Y. Mirror, II: 71; and Goodrich, Picture of N. Y.
(1828). The general returned to New York on Sept. 20 (g.v.).

16

Louis XVIII dies and is succeeded by his brother, Charles X.

1824

Public buildings and dwelling houses, which he sells at Oct.
about $40. One of these has been placed in the Society of Arts,
and is highly spoken of by judges of sculptural art. . . . It will
be sufficiently humiliating that another city shall have the honor
of possessing a work executed by a disciple of Canova, expressly
as a public ornament, and under the sanction of those to whom
the management of our affairs are entrusted, without having occasion
to lament that we allowed him to carry it away unidentified,
for his great labour and expense."—N. Y. Evet. Post, O 11, 1824.
See N 18.

The common council refers to a committee the resolution that
"a place he set apart for a Pond to impound the Catskill tre-

The common council recommends that the President designate to the
Orphan Asylum Society.—M. C. C. (1784–1831), XIV: 100–1.

The provisional government of Greece is set up.—Hayden’s
Dict. of Dates, 453.

The common council refers to a committee a letter from Richard
Wilcox stating that he has invented an "Analytical Airmeter
which is susceptible of encraturing with the greatest precision the
State of the Air we breathe announcing the approach of Contagious
diseases."—M. C. C. (1784–1831), XIV: 164.

The common council refers to a committee a proposal from
"Monseur Dupin Delarue" (cf. S 27) to establish an institution
for the instruction of the blind upon the plan of the one at Paris.—
The need was supplied in 1833 (6, V, 3) by the N. Y. Institution
for the Blind, which was founded in 1817.

At the presidential election held on this day, there are four
candidates for president: Andrew Jackson, Democrat; J. Quincy
Adams, Coalition; Wm. H. Crawford, Democrat; Henry Clay,
Republican; there was only one candidate for vice-president,
John C. Calhoun. Jackson received the largest popular vote, but
when the electoral votes were counted on Feb. 9, 1825, neither he nor
any other candidate had a majority, and the election was
thrown into the house of representatives. On the first ballot,
Adams received the votes of 13 states, Jackson those of seven,
and Crawford those of four. Adams was therefore declared elected.

The gift of a plaster of Paris bust of Marquis de Lafayette
done by N. Gevelot is presented to the common council by
the artist. The board accepts this with thanks, and directs that it be
placed in a conspicuous situation in the gallery of paintings.—
M. C. C. (1784–1831), XIV: 123; N. Y. Evet. Post, N 9, 1824. See
also ibid., N 25, 1824.

The common council resolves that there shall be constructed in the
penitentiary 60 cells—12 cells in a tier; 5 tiers high—in order
that the prisoners may be lodged separately. The cost is estimated
at $17,000.00. (M. C. C. (1784–1831), XIV: 126–7. See AP 30, 1821,
and F 11, 1828.

"While in this city, our guest [Lafayette], at the solicitation
of the Academy of Fine Arts, permitted Mr. Frazee, our distinguished
sculptor, to take a cast in plaster from his face, from which Mr.
Frazee has prepared a model that is really admirable for the perfect
fidelity with which it renders the features and expression of La

Mr. Stevens, "the celebrated Dwarf, only 37 inches high,"
12

makes his first appearance on the stage at the Park Theatre, in the
burletta "Tom Thumb."—N. Y. Evet. Post, N 12, 1824.

Announcement is made that committees will start taking up
collections in the various wards on Nov. 20 for erecting a public
statue of Washington.—N. Y. Evet. Post, N 19, 1824.

It is provided by act of legislature that the "commissioners of
school money" (see Mr 12, 1814) shall hereafter be ten in number,
one from each ward, "who shall hold their offices for three years."
The institutions or schools to which moneys shall be distributed in
the future are to be designated by the common council "from time
to time, and once at least in three years."

—Laws of N. Y. (1824), ch. 251. See also S 27.

to Hudson River, bears this date.—See original filed as map No.
323 in topographical bureau, borough president’s office.
John Vanderlyn, and others who subscribed to the erection of
the Rotunda, petition the common council to extend the lease of
that building to Mr. Vanderlyn (M. C. C., 1784–1831, XIV: 163);
but the board decides that it is inexpedient to do so at present.—Ibid., XIV: 195. For further petitions in reference to the Rotunda and Vanderlyn's financial difficulties therewith, see ibid., XV: 154-55, 216.

It is not improbable that the Gas Light Company in this city will be able to furnish a supply of gas early in January. Besides having laid about 6 miles of pipes in the principal streets, the apparatus at the manufactory is in that advanced state which gives assurance that light will be furnished at the period mentioned. A tank and gasometer have been completed, which will contain ten thousand barrels, or 500,000 gallons, and every other part of the establishment is now ready for extension on a large scale. Upwards of 500 dwelling houses, stores, &c. have engaged the light; among which is the Chatham Garden Theatre; all of which is calculated will be supplied in the month of January. We also learn, that the Trustees of the Merchants Exchange have decided on illuminating that building with gas, and that they are to place a splendid light on the top of the cupola, sufficiently large to serve as a beacon to vessels coming into our port. Castle Garden, likewise, is to be fitted up against its opening in the spring.”—N. Y. Ev. Post, D 7, 1824.

A four-mile rowing-match for $1,000, between boatmen of the British frigate "Hussar" and Whitehall boatmen, is held over a course between the Battery and North Battery. The British boat, the "Dart," is defeated by the "American Star."—N. Y. Ev. Post, D 9 and 10, 1824. See also Hist. Mag., 3d ser., III: 172.

The Manhattan Company, of which Mr. James Crone is one of the incorporators, and the proprietors of the Exchange of Rear-street erected a trunk bridge at 17th St., on the site of the old one, a new and elegant establishment. It is to be used for the purpose of connecting the two cities with a dry land bridge. The company have obtained a charter from the Legislature for the purpose of building bridges across the river, and it is hoped that the construction will be commenced before long.—N. Y. Ev. Post, D 12, 1823.

An extract from a letter written by Washington Irving to Henry Brevoort, speaking of New-York, says: "... there is a charm about that little spot of earth, that beautiful city and its environs, that has a perfect spell over my imagination. The bay, the rivers and their wild and woody shores; the haunts of my boyhood, both on land and water, absolutely have a witchery over my mind. ..."—Holman, Letters of Washington Irving to Henry Brevoort, 1826-1833.

A news item reads: "For the first time in twenty-seven years, the debtor's prison in this city is entirely empty. Not one solitary prisoner is now confined within the dreary walls—to the eternal honour of New-York be it mentioned."—N. Y. Mirror, D 11, 1824.

The New York Athenaeum is inaugurated, its first public meeting being at the City Hotel. Its object is to furnish opportunities for culture, and improve the fine arts, science, art, and literature. It consists of resident and honorary members, the former being associates, patrons, governors or subscribers; the funds are to be derived from the contributions of these four classes, $200 constituting a patron, $100 a governor, and lesser sums associates and subscribers. Its library is to comprise, when complete, all the standard elementary works of science and literature of every nation.—N. Y. Ev. Post, D 15 and 18, 1824. M. C. G. (1784-1831), XIV: 164. A pamphlet containing the address delivered by Henry Wheaton is in N. Y. P. L. The Athenaeum, after performing a work of immense value in the growing city, was merged, in 1838, into the New York Society Library.—Keen, Hist. of the Society Library, 311-64; Lamb, Hist. City of N. Y., II: 705-6. See also L. M. R. K., III: 957.

In conformity with a recommendation of the market committee, the common council directs the superintendent of repairs to erect "a Suitable fish market over the head of the Slip, in the rear of the Washington Country Market."—M. C. G. (1784-1831), XIV: 196-97; De Voe, Market Book, 427. See JII 24, 1822.

The committee on the city burial-ground reports to the common council that the ground selected is most eligible, being on the Middle Road or Fifth Ave., between 40th and 42d Sts. (cf. Je 9, 1823), about 3 miles from the city hall; that it is a part of the Common Lands belonging to the corporation, and comprises about 10 acres, nearly square. The work is almost completed. So far, the expense has been $8,449.91, of which the cost of the "handsome fence" (see Je 7, 1823) has been no inconsiderable part. The whole has been constructed of a stone wall topped with a strong mortised fence of locust posts and best Georgia pine. Much money has been saved by employing convicts in blasting and digging. Fifth Ave. has been improved by the removal of rocks. The whole ground is to be surrounded by two rows of weeping willows and elms.—M. C. G. (1784-1831), XIV: 209-12; N. Y. Ev. Post, D 22, 1824. The buried-ground was in use until the Croton reservoir was built on the site.

The common council appoints a committee to cause a "trunk of Timber and plank of sufficient dimensions to convey the waters of the Minetto Brook" to be constructed from the present tunnel at 4th St. to Fifth Ave. at 6th St.—M. C. G. (1784-1831), XIV: 219.

The committee on the jail and bridewell submits to the common council outlines of a plan to erect a new city prison, to enlarge the public promenade grounds of the Park, to remove the present jail and bridewell from the places which they now occupy, and to sell certain real property to pay the expenses. The present jail has become old, is in a state of decay (see O 25), and is unnecessarily large for the small number of debtors usually confined there; generally there are not more than 6 or 8, and at present there is but 1; while, for the past two days, the prison has been entirely empty, "a circumstance which perhaps has never occurred before." From the present policy of the legislature on the subject of imprisonment for debt, it is probable that the number of debtors confined in the jail will diminish, and consequently a few rooms in the wing of the city prison to be erected will answer every purpose. It would be well to place the prison somewhere on the edge of the North or East River. The common council resolves, when such site has been found, to have the present jail taken down and the materials conveyed into the building of a new city prison.—M. C. G. (1784-1831), XIV: 219-23. See Mr. 1, 1824, and Mr. 2, 1826.

The common council adopts a resolution to straightline the line and widen Chatham St. on the westerly side, and orders that a line be run from "the north end of the iron railing or fence in front of the Jail to the corner of Tryon Row and Chatham Street.—Performing at the Free School and the strip of ground contained between said line, and the street be thrown into Chatham St. in order to widen and straightline the same."—M. C. G. (1784-1831), XIV: 223. For the removal of Free School No. 1, see 1831.

A petition of Jacobus Dyckman and others respecting the bridge over "Harleam Creek," called the "Free Bridge," is reported upon by the road committee to the common council: "The bridge which the petitioners pray to be repaired connects the island of New York with that part of West Chester County lying on Harlem river called the 'Manor of Fordam,' and is a short distance from the Mouth of 'Spyt den Duyvel' creek, through which the waters of said river flow into the Hudson. This bridge was erected about Sixty years ago by individual subscription, to avoid the unjust exactions of the ferry man of Kings Bridge—But during our struggle for independence it was destroyed by the enemy, to prevent the passage of the American Army across the river, the passage of the other bridge being defended by a redoubt. Ten or twelve years since however, the inhabitants in its vicinity raised another subscription and rebuilt it, at an expense...—of about One thousand dollars, and have kept it in repair at their own cost. It is in such a state of decay that it cannot be passed without great danger. It is virtually the property of the Corporation, as the sovereignty of that Body over Harlem river to low water mark on the Northern or west Chester side of it, has never been disputed. There is considerable travelling over this bridge... with produce for our Market. Last... This bridge is the only outlet which the citizeans can pass from the Island without paying tribute to the monopolizers of Legislative...[liberality]." The bridge agrees to appropriate $280 toward rebuilding and keeping the bridge in repair.—M. C. G. (1784-1831), XIV: 227-29. See also L. M. R. K., III: 925.

1825

Dr. Hans Birch Gram, a native of Boston educated in Denmark, introduced Hahnemann's principles of homoeopathy in America in this year, when he settled in New York.—Gray, Early Annals of Homoeopathy in N. Y., 7-12; Bradford, Pioneers of Homoeopathy, 288-300; Encyclop. Brit., XIII: 647.

About 1825, baled hay was introduced in New York. It was stored under Duane St. Market.—De Voe, Market Book, 392.
The census of this year shows New York City's population to have been 66,058. For fuller details, see Harris, Descrip. of the City of N. Y. (1817), 151-157; Goodrich, The Picture of New York (1833). This census cost the city $2,610.—Journal D, 24, in comptroller's office. Cf. D 19.

In this year, the value of the real and personal estate in New York County was $101,609,046. Albany County was next highest in the state with $10,609,315—N. Y. Rev. Post, Ja 23, 1826.

In this year, the Princeton Review, a bi-monthly, was established in New York City.—North, The Newspaper and Periodical Press, (1884), 62.

In this year, a second reprint (see 1818) of Blunt's guide (see 1817), was made by A. T. Goodrich. There is a copy in the N. Y. Pub. Library. It contains a view of the city, engraved by Hooker, with marginal views below.

In this year, a military officer in the service of the king of the Netherlands visited New York in a private capacity, and published in this country the story of his travels. His observations respecting New York include the following:

... West of the battery, in the Hudson river, is a fort, called Castle Clinton, communicating with the battery by a wooden bridge, ninety paces long. This fort forms a semicircle; on the east are the former barracks, and behind them, which form the semicircle, a battery of twenty-four guns, under casemates. North of this fort, on the same shore, in front of the city, are two other forts of the same description, called North Battery and Fort Gansevoort; being of no use they are abandoned. Castle Clinton is now a public pleasure house. In the barrack is a coffee-house; boxes for parties are arranged within the battery, and the large room are amphitheatrical seats, because the yard of the fort is used for fireworks, and other exhibitions.

He refers to "the numerous stores, which are kept open till a late hour, and are very splendidly lighted with gas."

Speaking of a visit to the "newly-erected lunatic asylum," the author says: "This is five miles from the city, on a hill, in a very healthy situation, not far from the Hudson River: The road lies between country-seats and handsome gardens, and it is one of the most pleasant places I have seen in America.

The asylum is built of sand-stone, is three stories high, and surrounded by a garden; it was built mostly by subscription, but is likewise supported by the state government. ... they were about to enlarge it by two other wings. ... On the roof of the house is a platform, from which we had a very pleasant and extensive view...."

"It is a difficult matter to ride in a carriage through the streets on Sunday, because there are chains stretched across in front of the churches, to prevent their passage during service. The land of liberty has also its chains!"

Commenting on the conditions of the New Yorkers, the author says: "I am told that the families I visited were richly furnished with silver, China, and glass; the fine arts also contributed to the ornament of their apartments. At the evening parties we commonly had music and dancing. ... Livery's are not to be seen; the male servants wear frock coats. ... There are public schools established for the instruction of coloured children, and I was told that these little ape-like creatures do sometimes learn very well...."

"... On one of the wharves there was a frigate on the stocks, of sixty-four guns, intended for the Greeks; ... At another wharf lay a frigate of sixty-eight guns, with an elliptic stern; she was built for the republic of Colombia, and is nearly ready for sea; ... There were also two other men of war on the stocks, of smaller dimensions, which are also said to be intended for Colombia.

... The population has so rapidly increased, that Greenwich is united with New York, and three sides of the prison are surrounded with rows of houses; the fourth faces the Hudson river. [See also Ja 18.]"

Ladies of the first fashion do not go out to the theatre. In the pit persons pulled off their coats, in order to be cool. The visitors of the theatre are entirely unrestrained; the gentlemen keep on their hats in the boxes, and in the pit they make themselves in every respect comfortable.

"On the afternoon of the third of October, there was a great procession of negroes, some of them well dressed, parading through the streets, two by two, preceded by music and a flag. An African club, called the Wilberforce Society, thus celebrated the anniversary of the abolition of slavery in New York, and concluded the day by a dinner and ball. The coloured people of New York, belonging to this society, have a fund of their own, raised by weekly subscription, which is employed in assisting sick and unfortunate blacks. This fund, contained in a sky-blue box, was carried in the procession; the treasurer holding in his band a large gilt key; the rest of the officers wore ribands of several colours, and badges like the officers of the forces; marshals with long staves walked outside of the procession. During a quarter of an hour, scarcely any but black faces were to be seen in Broadway...

Travels through N. Am., during the Years 1825 and 1826, by Bernhard, Duke of Saxe-Weimar Eisenach (Phila., 1828), I: 119-73. See, further, Je 9, 1826.

In this year, a Friends' meeting-house, of wood, 25 by 35 ft., was built in Manhattanville.—Goodrich, op. cit. (1828), 2:27.

In this year, the Roman Catholic Orphan Asylum was founded, the outgrowth of the older Roman Catholic Benevolent Society, which received its charter in 1817, and had its home in Prince St.—King's Handbook (1893), 450. See, further, No. 20, 1826; Ag 1, 1846.

In this year, the National Hotel, at 122 Broadway, cor. of Cedar St., was finished.—Man. Com. Coun. (1865), 544.

In 1826-6, N. Prime erected in Wall St., opposite the exchange, a marble business building to house the private bank of Prime, Ward, King & Co.—Goodrich, op. cit. (1828), 259.

In this year, an assessment was levied to build a sewer in Canal St. from Collect St. to the Hudson River.—Index to Assessments Rolls, 1826, Vol. II, N. Y. C. 1826.

In this year was published, in Paris, A Series of Picturesque Views in North America, drawn on stone by J. Milbert, and lithographed by Melle Formentin. Fourteen in number, these views, all of which are of places in or near New York, are listed in the descrip. of Pl. 874-b, Vol. III: 568.

In this year, L. W. Bridges made a map of The Battery, Marketfield St., and Whitehall St. to Hudson River. The original map (No. 239) is in bureau of topography, borough president's office, Municipal Bldg.

The Branch of the Bank of the U. S., on the north side of Wall St. (see My 23, 1823; Ap 14, 1824), is shown, at the time of its completion, in a drawing by A. J. Davis, reproduced from a lithograph, in Vol. II, A. Pl. 12-b. See also Item No. 11274, Emmet collection, N. Y. P. L.

For view of the American Museum and north end of the Park, in this year, see Pl. 95-b, Vol. III.

For view of the reservoir of the Manhattan water works, Chambers St., 1825, see Man. Com. Coun. (1853), 220.

For view of Wall St., at William St., looking west, 1825, see ibid. (1853), 520.

For view of the Elgin Botanic Garden, bet. Fifth and Sixth Aves., 90th and 91st Sts., 1825, see ibid. (1859), 204.
the production of Lithographic drawings for Colden's 'Memoir
- presented . . . at the completion of the New York
Canals' published in that year. — Dunlap, Hist. of the Arts of
Design, III: 179. See No. 1

— In the spring of this year, Thomas Cole came to New York
from Philadelphia. Here, the merit of his work was discerned by
Col. Trumbull, who introduced him to Dunlap and Durand, all of
whom bought his canvases. For the development of his career as
an artist, see Lamb's Hist. of Am. Painting (1903), 218-231.

Washington Irving, a 22-year-old, a well-to-do New York
resident, went to Europe in 1803 and became a successful career as
a painter. His painting of "Red Jacket" was made when this famous Indian chief was in this city in

De Witt Clinton is inaugurated as governor. — N. Y. Eve.
Post, Jul 4, 1815.

The managers of the Soc. for the Reformation of Juvenile
Delinquents (appointed Dec. 19, 1823), have raised about $15,500
by subscription and donation, and having secured from the city
the "ground and buildings held by the general government as an
Arsenal, near the head of Broadway and the Bowery," and obtained
the government's relinquishment of them, the arsenal building is
opened as a "House of Refuge." There is a high wall around the
premises, and there is sufficient ground space for an extension of
the building. Nine juvenile convicts compose the inmates—
M. C. G. (1874-1831), XIV: 238; N. Y. Spectator, Ja 7, 1825;
of Refuge, instituted by the Soc. for the Rel. of Juvenile Delinquents

The common council receives a report from Rev. John Stanford
(see Jo, 1812) on "Religious Services Performed at the Almshouse,
Penitentiary, Debtor's Prison and Bridewell." — M. C. G. (1874-
1831), XIV: 242. A printed copy of the report is preserved in the
N. Y. P. L.

In his annual report, the comptroller suggests to the common
council that the annual tax of $25,000 for the Battery might be
diminished, if not wholly dispensed with, "unless some further
improvements embracing a large expenditure are contemplated."
Among items of expense is one of $7,950.49 for "Castle Clinton,
repairing foundation and making reef around it;" another of
$25,610.35 for "Battery, making Wall & reef & filling in, paving
Walks, fencing etc.;" and another of $4,504 for enclosing the city
burring-ground. Exclusive of payments on bonds, the largest item
of expense is $191,864.31 for opening, widening, improving, regu-
lating, and paving streets, including sewers. — M. C. G. (1874-
1831), XIV: 245-50.

The common council refers to the street com'rt a resolution that
posts be placed "near the Curb Stone on the East side of the park
for the use of Carriages on the road to fasten their Horses to." — M. C. G. (1874-1831), XIV: 253.

Books are opened at the Tontine Coffee House for subscription
to the stock of the Delaware & Hudson Canal Co. (see Ap 23, 1823).
The authorised capital stock is $1,500,000. — N. Y. Eve. Post, Ja 8,

The board adopts a resolution to widen Pearl St. at Counties
Lane. — M. C. G. (1874-1831), XIV: 271. See, further, My 5, 1826.

The common council rejects a petition that street names be
printed on the glass of the public lamps, because "the Letters
would cover nearly the whole of the Glass," and darken the streets.

The city inspector reports to the common council that the
smarts, which commenced its ravage in Nov., 1823, has not yet
been arrested; that 194 persons have died during the past year,
of whom 117 were coloured. — M. C. G. (1874-1831), XIV: 283-84.

See Jo, 19, 1824.

The common council directs the water committee to inquire into
the expediency of vesting in the corporation the exclusive
right of introducing into the city pure and wholesome water.
— M. C. G. (1874-1831), XIV: 238-39. On Apr 9, 1824, the com-
mittee reported that an application was before the legislature to incorporate a private company for this purpose. Where great and vital interests of the city may be affected by powers conferred on private cor-
porations, the committee believed that too much caution could not be employed, and recommended that the request be sent to the legislature to adopt such measures only as would most effectually

The buildings already commenced and going up in this city, and the preparations which are making to commence pulling down on May-day, old decayed wooden tenements and to erect in their places stately brick buildings, are far greater than in any former year. Real estate and rents have advanced in price beyond all cal-
culations and many a good speculation has been made by many of our friends. So great is the demand for brick now, that they readily command ten dollars a thousand." — N. Y. Eve. Post, F 10, 1825.

The board adopts the recommendation, and orders "that all
interments shall cease to be made in the present Pottersfield from
and after the first day of May next," and "that the grounds now
occupied as a Pottersfield be filled up and regulated as soon as
interments shall cease to be made therein." — Ibid., XIV: 506-7.

The following description of Wall St. appears under the title,
Feb. 1825. "A visit from a resident of Broadway and Bowery:" &c.
Trumbull's Statue is taken away, the old city hall is pulled down .
the Ludlows, Verplancks and Jaucyces are all bought out there; .
every house is a bank or insurance company, and the cellars filled with brokers instead of masonry. The streets and the
buildings, statues... and will require no further preparation for
its immediate occupancy than that of a small tenant as a
residence for the Keeper."
1825 The common council passes a resolution to open Sixth St. from Broadway to Christopher St.; and to close that part of Art St. and Greenwich Lane lying between Broadway and Sixth Ave.—M. G. C. (1825-1826), XIV: 393-94.

1825 In pursuance of a royal order of this date, A. E. Tromp, "sub-contractor" of the Royal Marine in the Dept. of the Schelde (Holland), made a voyage to the United States, and in his report (in Dutch) described steamboat navigation on the Hudson, N. Y. City horse-boats, ferries, etc.—See extracts from this report, in the N. Y. P. L. ( MSS., Dir.).

The city acquires, by condemnation proceedings, the land comprised in Grand St. Park, at Grand and Scammel Sts. and East Broadway (6.61 acre).—Prendergast, Record of Real Estate; L. M. R. K., III: 969.

1825 The common council resolves that the court for the trial of impeachments and correction of errors, of the state of New York, be invited to hold its next session in this city.—M. G. C. (1784-1831), XIV: 341-42. On March 28, a committee was appointed to select a suitable room for the court of errors, "which will hold its Session in this City on the first Monday of June."—Ibid., XIV: 417.

1825 The common council adopts a plan, as submitted in the form of a map, for laying out the streets, as well as the permanent line of the East River, from Corlears Hook to 14th St.—M. G. C. (1784-1831), XIV: 343-45. The proceedings of the board, regarding the opening of that section of the city from the Bowery to the East River, bet. North and 14th St., was published as a separate pamphlet in 1826.—See copy at the N. Y. Hist. Soc.

1825 The common council authorizes the superintendent of the almshouse "to procure the likeness of the Revd. Mr. Stubble, planter on House at Bellevue,"—M. G. C. (1784-1831), XIV: 350. The portrait of the venerable chaplain was executed by Samuel F. B. Morse, and "deposited in the dining-room at Bellevue."—Sommers, Memoir of John Stanford, 268. The expense of portrait and frame was $250.—M. G. C. (1784-1831), XV: 142. Morse exhibited it in 1826.—Ibid., XV: 390. The portrait still hangs, one hundred years later (Feb. 1825), in the main office and reception-room at Bellevue.

Mar. 4 The first private high-school for boys, combining instruction for all grades from the youngest to college preparatory, is opened by John Griscom, L. L. D., and David H. Barnes, A. M., with more than 200 pupils, in a brick building, 50 by 75 feet, three storeys high, costing $17,000, and just completed for the purpose on four lots on Crosby St., above Grand St. The "Trustees of the High School for Boys, of the City of New York," were incorporated by Act of April 4, 1825 (Law of N. Y., 1825, chap. 75; ibid., 1826, chap. 32). In May the attendance had increased to 650.

A high-school for girls was soon organized by the trustees, who purchased a lot, 72 by 100 feet, in Crosby St., near Spring St., on which they erected a brick building, 44 by 60 feet, three storeys high, at a cost of $18,000, including ground, building, and furniture. The Female High-School was to open Feb. 1, 1826. The "Boys High-School" and the "Female High-School" were together known as "The New York High School." They soon had about 1,000 pupils.—First Ann. Report of the Trustees of the High-School Society (Nov., 1825). 4, 10; Griscom, Memoir of John Griscom; Goodrich, Picture of N. Y. (1828), 334-35.

The boys' building was sold early in 1825 to the Society of Mechanics and Tradesmen, and the girls' school property was soon after sold at considerable loss.—Griscom, Memoir; Annals of the Gen. Soc. of Mechanics and Tradesmen (1825), 2, 82-83, with view of boys' building, 30 to 36 Crosby St., on p. 79.

4 John Quincy Adams is inaugurated president. His followers constituted the National Republican party, and those of Andrew Jackson the Democratic Republican party.—Winson, Nat. & Crit. Hist. of Am., VII: 282, 346; N. Y. Spectator, Mar. 8, 1825.

5 As the ordinance against flying kites is not observed, and the safety of the inhabitants is endangered, the common council orders that the streetできる sisters cause all violations to be reported for prosecution.—M. G. C. (1784-1831), XIV: 361.

6 The "property belonging to the estate of the late Henry A. Coster, Esq. situated on William st. and Slope lane, in the rear of the Court Record, XIX, is sold at auction to Joel Post for $95,000. The property has a front on William street of fifty two feet six inches; a front on Slope lane of seventy six feet—the rear of most of this ground is open to the Exchange."—N. Y. Eco. Post, Mr 12, 1825, citing N. Y. Gaz.

7 The common council refers to a committee a resolution to prohibit the continuation of cow-stables in the settled parts of the city.—M. G. C. (1784-1825), XIV: 388, 714.

21 A public dinner is held at the City Hotel to celebrate the victory of Bolivar on the plains of Guamanquilla, and the "final triumph of the Patriot arms in South America; a triumph which has restored to liberty and independence the brave people of that country." Gen. Swift, Judge Van Ness, Judge Deur, Commodore Chauncey, and other Americans, are present, besides representatives from Great Britain, Mexico, and Guamanquilla. Letters from Gen. Jackson and John C. Calhoun are read.—N. Y. Eco. Post, Mr 22 and 23, 1825.

24 "Yesterday [March 21], there was a Turn Out, for higher wages of the class of workmen employed at the wharves in loading and discharging vessels, including the riggers, humpers, and other laborers, on both East River and other wharves. The turn out was pretty general along the East River, wharf from about noon to about 3 o'clock, the number of 800 to 1000 had assembled. In their march they forced many quiet persons to join them, and committed some other excesses. The police officers were soon on the alert, and after they had arrested a few of the ringleaders, the remainder dispersed."—N. Y. Eco. Post, Mr 22, 1825, citing Merc. Adv.

25 The common council approves the resolution of the owners of the sale of game in the public markets at improper seasons of the year.—M. G. C. (1784-1831), XIV: 397-98. This action was praised in the N. Y. Eco. Post of March 25.
and convenience."—N. Y. Mirror, II: 287. The foundation stone was laid in this month.—Goodrich, Picture of N. Y. (1828), 206.

2 The building was occupied on May 1, 1827 (q. v.). See also descrip. of Pls. 115 and 116, III: 618 and 623.

"The editor of the Mirror calls attention to the crumbling condition of the Cuyahoga. We understand that the churchyard, a bright spot once erected by the common council, and supposed that a new monument should be erected.—N. Y. Mirror, II: 287. See J4, 20, and Ap. 10, 1826.

An act is passed to incorporate the "High School of New York."—Laws of N. Y. (1825), chap. 75. See summary under Mr. 1.

"The common council refers to the committee on lands and places a petition from the lessees of Castle Garden "for permission to erect a Telegraph room at that place," as recommended by a committee of merchants.—M. C. G. (1784-1831), XIV: 419.

The common council resolves to send a remonstrance to the legislature against the removal of the sessions of the supreme court from this city to Albany.—M. C. G. (1784-1834), XIV: 419-20. A public meeting to protest against the removal was held at the Tentole Coffee House on April 5—N. Y. Evw. Post, Ap 5, 1825.

See F 28, 1828.

"We observe a project in the American of last evening for erecting a Rail Road from New York to Albany, accompanied with a request that the editors of the newspapers in this city would copy an extract made of an advertisement; we really on better thoughts, we feel inclined to wait and see if the project will not itself relinquish the plan as visionary and impracticable."—N. Y. Evw. Post, Ap 5, 1825.

"Equestrian Statue of Washington.—We have received a letter from Mr. Caucici, dated at Washington, March 28th, in which this ingenious and celebrated sculptor, states that he has bestowed two years of constant and unweary exertions on this statue, by the advice and encouragement of gentlemen of wealth and influence in this city; that the expense of living all this time upon his own means, has at length exhausted them, and left him in a state of pecuniary embarrassment; that subscriptions were opened to raise a fund to remunerate him for his labor, and to enable to complete the work he has begun and almost completed, but of which he has heard nothing for a long time, and that thus situated he hopes it will not be thought unreasonable or presumptuous by any generous or honourable minded man, that he should appeal to his humane and just consideration, and pray him to reflect upon the case of a stranger in a strange land, and extend to him the hand of benevolent relief, by adding his name to the subscription list."—N. Y. Evw. Post, J4, 1825.

The legislature incorporates the New York Dry Dock Co. (see D 10, 1824), with power and authority to construct "dry and wet docks" anywhere in the city and county of New York or the county of Kings. This is not an exclusive privilege, however.—Laws of N. Y. (1825), chap. 114. See My 5, and 1826. On April 29, 1829, the act of incorporation was amended.—Ibid. (1829), chap. 235.

"We are pained to learn that there are now upwards of 300 dwelling houses and stores, lighted up in this city with gas, and that in every instance where it has been fairly tested, it has given the utmost satisfaction."—N. Y. Evw. Post, Ap 13, 1825.

See, further, S 3.

"The common council secures the passage of an act permitting them, on account of a severe epidemic of fever in the petitioner, to remove to the fever hospital such persons as can be securely kept there.—M. C. G. (1784-1831), XIV: 451-52; XV: 50; Laws of N. Y. (1825), chap. 179.

By act of legislature, the Eleventh and Twelfth Wards are created, and added to the ten existing wards. The two new wards are separated by 14th St., the Twelfth comprising "all the residue of the said city" north of 14th St.

It is further provided in the act that "after the last Monday in December next, not less than the mayor or recorder of the said city, and seven aldermen and seven assistants, shall be a quorum of the common council."—Laws of N. Y. (1825), chap. 195; M. C. C. (1784-1831), XIV: 193-95; 425. For description of the several wards, see The Metropolitan City of Am. (1833), 215.

We have no reason to understand that the commissioners appointed to locate a site for the new State Prison, have fixed it in the town of Mount Pleasant, Westchester co. on the banks of the Hudson, intermediate between the villages of Sing Sing and Sparta, about a mile from each."—Com. Adv., Ap 18, 1825, citing the "Alb. Adv." It was completed in 1825 (q. v., D 16).

The subscription books of the N. Y. Water Works Co. (see Mr. 24) are opened at the Frankha Bank. By 3 o'clock, more than $600,000 are subscribed. The capital of the company is only $5,000,000.—N. Y. Mirror, II: 310. See also N. Y. Evw. Post, Ap 10 and 20, 1825.

Mrs. Banyer, writing from New York to her father, John Jay, says: "Mr. P. Stuyvesant has long wished to dispose of his place and has lately sold it to a Company who are to give him $10,000 for the Mansion house, 200 house lots and the water right, still leaving him a large estate... Mr. Rutherford took us yesterday to see Deale's likeness of General Washington, said by many of the General's old friends to be the best ever taken."—Corresp. and Pub. Papers of John Jay, IV: 474.

The Delaware & Hudson Canal Co. (see J 7) is chartered for the purpose of making a canal from the Hudson River to Honesdale, Pa., and with banking privileges.—Laws of N. Y. (1825), chap. 210; N. Y. As. It LS, In 1823, 93.

The legislature passes an act "to provide for the Survey of a Land Communication between Lake Erie and the Hudson River."—Laws of N. Y. (1825), chap. 219. This led eventually to the building of the N. Y., Lake Erie & Western R. —See J 2 and Ap 24, 1824.

The legislature passes a militia act requiring, among other things, "that the infantry of the city and county of New-York shall parade three times in each year, once by companies, and twice by regiments; that one of the said parades shall be ordered by the brigadier-general for review and inspection, and the remaining parades by the commandants of the respective regiments, at such times as they may think proper."—Laws of N. Y. (1825), chap. 290.

The corner-stone of the Presbyterian Church in Bleecker St. near Broadway (see J 19) is laid.—N. Y. Spectator, Ap 29; N. Y. Evw. Post, Ap 27, 1825. The building was completed in 1826.—Greenleaf, Hist. of the Churches, 157. With "brown-stone pillars, of the Corinthian order, and a handsome pediment, it had a very classical front."—Goodrich, 1826, 221; L. M. R. K., III: 390. A majority voted against them by act of legislature (see N 19, 1824), the common council designates the Free School Society, the Mechanics Society, the Orphan Asylum Society, and the African Free School, as the institutions to which school moneys shall be distributed.—M. C. G. (1784-1831), XIV: 498-99. Three of these were institutions that had been designated previously by the state (see Mr. 12, 1813). In rendering such a decision petitions for a share of the moneys from the trustees of St. Patrick's Cathedral and St. Peter's Church were refused, and an amendment was defeated decisively, providing shares for "incorporated religious societies" which "support or shall establish Charity Schools."—Ibid., XIV: 468, 498, 499.

In this decision the common council virtually accepted the recommendation of its "Committee on Laws," which had submitted that 300 copies were ordered to be printed "for the use of the Members;" the committee confessed its predisposition "that the well-organized churches and religious societies in our city, might be permitted to continue in the reception of a part of this fund as heretofore. But the weight of the argument, as urged before them, and the established constitutional and political doctrines which have a bearing on this question, and the habits and modes of thinking of the constituents at large of this board, require, in the opinion of your Committee, that the Common School Fund should be distributed for civil purposes only, as costra-distiguished from those of a religious or sectarian description."—Ibid., XIV: 424; Report of the Committee on Laws on the Distribution of the Common School Fund (1825), in N. Y. P. L.

In this month, the operations of a "Society for the Encouragement of Faithful Domestic Servants" began. Later (see J 20, 1825; Je 5, 1826), it obtained the use of the room in the basement of the N. Y. Institution formerly occupied by the Bank for Savings. It aided gratuitously in finding employment for servants out of doors. The number of servants employed in New York at this time was supposed to be about 30,000.—Goodrich, Picture of N. Y. (1818), 56-66. Cf. Je 20. See also N. Y. Evw. Post, My 16 and 17, 1825.

THE ICONOGRAPHY OF MANHATTAN ISLAND

1825 and Garden Sts. to No. 11 Garden St., directly opposite the Church.

The anniversary of the first commencement at Columbia College is celebrated by the alumni with exercises in the college chapel. Clement C. Moore delivers the address. In the afternoon, a dinner was held at Washington Hall.—N. Y. Eve. Post, My 6, 1825. The first commencement of King's College was held on June 21, 1786.

The first commencement of the college under its new name was held on April 11, 1825.—Hist. of Columbia Univ. (1904), 23, 66.

"The common council resolves to cause all the wood-work around the old flagstaff on the Battery to be taken down.—M. C. C. (1829-1831), XIV: 415. On May 11, the "N. Y. Nautical Institution and Shipmasters Society" recommended that the flagstaff be used as an observatory.—Ibid., XIV: 516. On Jan. 3, 1826, the board received a petition that the "Stone Building on the Battery called the Flag Staff" may be removed (ibid., XV: 131), and, on Jan. 16 (p. v.), resolved to take it down.—Ibid., XV: 156.

The first meeting of the directors of the "Dry Dock Co. in the City of New York" is held at Washington Hall.—See the original notes taken by Noah Scovell, secretary, filed with Scovell Papers, MSS. Div., N. Y. P. L.

The American Tract Society is founded.—Goodrich, Picture of N. Y. (1829), 323; Mac. C. (1829-1830), 626. For other tract societies of this time, including the N. Y. Religious Tract Society, the Methodist Tract Society, the Female Tract Society, etc., see Goodrich, 324-25.

"New York never saw such days as the present since it was a city—All kinds of active business prosperous, except law business, which, if we may believe the loud and general complaint of the profession, with scarcely a dissentient, languishes. Such has been the tide of population, which has, during the past and the present year, set towards this city, that habitations cannot be had; shops and stores command double rents to what they did last season, and still the demand cannot be supplied; the streets are so obstructed by the great number of buildings going up and pulling down, that they have become almost impassable, and a scene of bustle, noise and confusion prevails that no pen can describe, nor any imagination imagine."—T. Goodrich, Post, My 16, 1825.

The common council adopts a resolution of patriotic praise for Gen. Lafayette, and the draft of an invitation for him to join with the corporation of the city in celebrating the 4th of July (p. v.), and partaking of a public dinner with them in the city hall. The resolution invites him, further, to be the city's guest whenever "he can dispense himself from the cares of our Fellow Citizens in other parts of the Union."—M. C. C. (1784-1821), XIV: 530-31. See O 11, 1824: D 5, 1825.

Samuel Leggett, president of the N. Y. Gas Light Co., reports to the common council that "the Pipes for conducting the Gas light are laid and the Company are ready to supply and light the Public Lamps in Broadway from the Battery to Grand Street according to the terms of the Agreements of the 12th May 1825." The communication is referred to the Board of Joint Tract, Gas, and P. T. Tract Society, the Female Tract Society, etc., see Goodrich, 324-25.

The common council adopts a resolution of patriotic praise for Gen. Lafayette, and the draft of an invitation for him to join with the corporation of the city in celebrating the 4th of July (p. v.), and partaking of a public dinner with them in the city hall. The resolution invites him, further, to be the city's guest whenever "he can dispense himself from the cares of our Fellow Citizens in other parts of the Union."—M. C. C. (1784-1821), XIV: 530-31. See O 11, 1824: D 5, 1825.

The common council adopts a resolution to open a new street, 100 ft. wide, from Jones to Art St., to be called Lafayette Place.—M. C. C. (1784-1831), XIV: 520, 528; see also descrip. of Pl. 1946, III: 605. On April 18, 1831, the street commissioner, "in honor was referred the petition of Seth Green and others for permission to inclose a Court of fifteen feet wide in front of the Buildings to be erected fronting on Lafayette Place," reported that this would be in keeping with the "understanding of all the owners of the ground through which that Street was opened in 1826 with the then Corporation and was the principal inducement in opening the 100 feet wide, that they might have elegant and spacious Courts in front of their buildings leaving the unobstructed width of the Street 70 feet."—Ibid., XIX: 654. In 1826, Lafayette Place was opened, 100 ft. wide, through Vauxhall Garden.—Goodrich, Picture of N. Y. and Strangers Guide (1828), 134. For the later history of this street, see "A Neglected Corner of the Metropolis," by Mrs. Lamb, in Mag. of Am. Hist. (1866), XV: 115. See M. K. 5756; June 6.

"Mr. Scudder, of the Museum, is preparing a large building near the square, in Chatham-street, to open an establishment, that he has had some time in contemplation, the title of which will be the New York Spectaculum. . . . The subject is entirely new, having no specimens of natural history, but simply such things as will have a tendency to please. We also understand, that Mr. Scudder has a large upright piano, an additional keyed finger organ, both of which are to be placed in the halls for the gratification of the visitors."—N. Y. Gen. & Gen. Adv., My 13, 1825; N. Y. Eve. Post, My 17, 1825. See also ibid., My 30, 1825. The Spectaculum opened on July 1.—Ibid., I, 1825.

The Colombian frigate "Venezuela" arrives at New York, "having on board Dr. Francisco Lopez, bearer of a treaty of commerce with the United States, and an arrangement for the gratification of the visitors."—N. Y. Gen. & Gen. Adv., My 13, 14, 1825.

The New York Hotel, at 162 Greenwich St, is opened.—N. Y. Eve. Post, My 21, 1825, citing N. Y. Gen. The common council passes a law to prohibit the use of "flying horses" and "the like dangerous and improper devices for public amusement" in this city.—M. C. C. (1784-1831), XVI: 564.

Following a very voluminous committee report (of 57 printed pages), the common council recommends to the churches in the city that they extend their places of interment as far as possible beyond the Big Dam.—M. C. C. (1793-1831), XIV: 576-736; N. Y. Eve. Post, My 7, 18, 23, and 30, 1825. The report was published by Mathion Day. See also Ap 3, 1825.

Lafayette is present at the laying of the corner-stone of the Bunker Hill monument, on the site of the battle. The monument was built by voluntary subscription, and completed on July 23, 1824 (p. v).—N. Y. Eve. Post, Je 17, 18, and 21, 1825; Mem. Hist. 67, 145, 146, 157. The Water Works Company [see Mr 24 and Ap 18] are adopting the most efficient measures to supply the city with an abundance of pure and wholesome water. They have engaged two of the most experienced engineers in the country, Messrs. [Benjamin] Wright, and [Canvass] White, to complete the surveys, and to superintend the work. . . .—N. Y. Eve. Post, Je 26, 1825. See N 6.

The executors of John C. Van Zandt petition the common council for a 10-years extension of the lease of the American Museum in the N. Y. Institution.—M. C. C. (1784-1831), XIV: 639. On July 1, the finance committee reported against so long an extension, "because the board may hereafter consider it expedient to remove the building in question, together with the Bridewell and Goal." An extension was allowed until May 1, 1827.—Ibid., XIV: 639; N. Y. Eve. Post, Mr 18, 1826.

The common council grants to the "Society for improving the character & usefulness of Domestic Servants" (see My 1825) the use of a room in the New York Institution.—M. C. C. (1784-1831), XIV: 646-47. Cfr. ibid., XV: 449.

A Marylander," who is visiting New York, writes to Editor 22 Coleman regarding the city: "I was passing down Broadway on Sunday last, at 10 o'clock in the morning . . . when suddenly I heard the sound of the hammer and the axe. I stopped and found myself against a very large building now erecting, and which is directly opposite to your splendid City Hall: . . . I soon found that there were actually masons engaged in laying brick, and carpenters in setting up partitions and putting down floors. While attentively observing this, my ears were saluted with the soft dulcet sounds of the Kent Bugle, which proceeded from the apartments of a house close in the vicinity. On expressing my surprise at this to some of the by-standers, . . . they informed me that the good people of Broadway were regularly serenaded every Sunday morning from the same quarter on their way to church. These things . . . have staggered me very much."—N. Y. Eve. Post, My 18, 1826.

"A large Shark eight or nine feet long, was seen off Coffee House slip this morning."—N. Y. Eve. Post, Je 24, 1825.

Prince Murat arrives from New York to Gibraltar.—N. Y. Eve. Post, Je 27, 1825. See also Hornes Diary, II: 305.
The steamboat "Commerce" and the barge "Lady Clinton" have just been completed and are intended for the navigation of the North River.—*N. Y. Evoc. Post*, Je 30, 1825.

Eugene Robertson, the aeronaut, ascends in a balloon from the Battery, the cord being cut by Lafayette.—*N. Y. Spectator*, Jl 12, 1825. He made another ascent on Sept. 5.—Ibid., 5, 1825.

"So numerous of late have become the amusements throughout our city, the greater part of which are of the most trifling nature; and so filled are our public papers with puffings, magnifying their importance, and thus gulping the public, that the scene has become absolutely disgusting. To distant readers, it would appear that a relish for egregious puérilities had taken the lead, and that we are no longer a bury, industrious, and enterprising people.—Such, however, is not the fact; for the truth is, if a monkey, or an elephant, or a mummy, is brought to town for a show, or a man under the influence of a rush of swimming across either of our rivers, due care is taken to have it announced a day or two before hand, in a neat editorial paragraph, as something wonderful and new under the sun. Near by where these same sights are to be seen, or these miraculous performances are to take place, you will be sure to find some public Hotel or Garden in the vicinity, affording oases of Brandy and water and every thing palatable, may be had at a moment's notice. We mean not to discourage spectators or amusements which are calculated to improve the mind, or even to afford innocent recreation, but to protest against the paltry artifices which are made use of to play Jeremy Diddler with our citizens, and draw off apprentices, journeymen, and laborers from their work, to witness mountebank shows and tumbler's tricks, at the expense of the pockets of the star-gazing multitude, & particularly of strangers who always at this season of the year, fill our Boarding-Houses to overflow, and who are eager to witness everything bordering on the marvellous, in this our marvellous city of Gotham."—*N. Y. Evoc. Post*, Jl 9, 1825.

Lafayette leaves New York by way of New Jersey for a Southern tour.—*N. Y. Spectator*, Jl 15, 1825.

"There arises a sensation from an inhabitant of Second Ave. complaining of the running of large at swine in his neighborhood as highly dangerous because, being fed on garbage from the slaughter-house there, they become "extremely fercious and dangerous to children."—M. C. G. (1824-1831), XIV: 674.

The common council accepts an invitation from John Vanderlyn to see the panoramic painting of the city of Athens at the Rotunda. July 18

The common council passes a resolution to extend Ludlow, Essex, Norfolk, Suffolk, and Westchester counties from the line of "De-Lancys farm" to North St.—M. C. G. (1784-1831), XIV: 681.

A resolution is referred to the committee on repairs "to place a row of seats for the accommodation of the Public around the outside Walls of the Battery."—M. C. G. (1784-1831), XIV: 690.

"George Washington Lafayette left here this morning for Philadelphia, in the steam boat Thistle, belonging to the Union Line.—*N. Y. Evoc. Post*, Jl 15, 1825.

The corner-stone of the General Theological Seminary at Greenwich is laid. The ground was presented by Prof. Clement C. Moore, and consisted of a lot of about five acres fronting between Ninth and Tenth Aves., and running back to North River, below 21st St.—*Daily Ady*, Jl 30, 1825. The first building was completed in the spring of 1827.—Goodrich, *Picture of N. Y.* (1828), 235; Perry, *Hist. of the Am. Episcopal Church*, II: 506-534; L. M. R. K., III: 940. See My 1, 1918.

Editor Coleman writes: "Is it not a reproach to the public authorities of New York, that neither are the great majority of houses, designated by numbers, nor one in ten of the streets pointed out by name, to the passing stranger? Scarcdy there is to be found a single number upon a house in the whole length of Broadway. Really, we are inclined to think the good people of this city, would be quite as much pleased at seeing a vote that these two measures of convenience be adopted, as the one lately for turning what ought to be a part of the Park, into a public pound for cows and calves. As to hogs they are permitted to roam at large, particularly on Sundays."—*N. Y. Evoc. Post*, Jl 30, 1825.

The common council orders that the lower market house at Catharine Slip, a mere shed in a ruinous condition, be removed and a new one erected. Catharine Market supplies a large proportion of the inhabitants of the eastern and northern sections of the city, and pays the city more, in proportion to its cost, than any other market.—*M. C. G. (1784-1831), XIV: 704; De Vos, *Market Book*, 1828, 95; L. M. R. K., III: 1157.

"Joseph Bonaparte, and Prince Murat and suite, left here this forenoon, in the steam boat Bellone, for Philadelphia."—*N. Y. Evoc. Post*, Ag 3, 1825.

"A work has just been published in this city, entitled "View and description of the City of New Orange, (now New York,)" as it was in the year 1673; with explanatory notes, by Joseph W. Moulton, Esq. This curious and interesting pamphlet, has an engraved view of our city at that period."—*N. Y. Evoc. Post*, Ag 6, 1825. The second volume of Moulton's work appeared, in book form, in 1826.

The common council permits John Sears to establish a "Covered Circus for a Flying Horse Establishment."—*M. C. G. (1784-1831), XIV: 693, 716.

The mayor presents to the board a report of the proceedings of the common council from Jan. 30, 1786, to Feb. 28, 1825, in regard to bringing pure and wholesome water into the city, and the board orders that it be placed on file in the clerk's office.—*M. C. G. (1784-1831), XIV: 719.

"In addition to the efforts making by the enterprising managers of the Park Theatre, to render the performances of tragedy and comedy acceptable, they have made arrangements to appropriate two nights a week, Tuesdays and Fridays, during the ensuing season, to Operas."—*N. Y. Evoc. Post*, Ag 26, 1825. See N 17.

The common council orders that 20th St. be opened from Third Ave. to the Bloomingdale Road.—*M. C. G. (1784-1831), XIV: 738.

About this time, hog-carts were introduced to rid the streets of a nuisance through the employment of negro hog-catchers.—De Vos, *Market Book*, 1828, 82, citing the *Evoc. Post* of Sept. 1825.

"The city is endangered almost every night, by boys sending up paper balloons in almost every direction. After ascending in the air some distance, they take fire and down they tumble on to the roofs of houses and stables. . . . Is there no remedy for this alarming practice? Let us pray the Corporation to interfere, and put a stop to it!"—*N. Y. Evoc. Post*, Sept. 1825.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1825

every prospect of our streets being lighted up with gas, before the
long and dark nights set in—"N. Y. Evening Post," S 3, 1825.

7

The rights of Washington on board the frigate "Brandywine" for France. He receives an address of farewell from President
Adams, to which he replies.—N. T. Spectator, S 13, 16, 20, 1825.

See also D 5.

2

The common council receives a communication from William
Bayard, Cadwalader D. Colden, and John Finlort, stating that,
at a meeting of merchants and citizens in the Chamber of Com-
cerce at the Tontine Coffee House, it was resolved that it would
be proper to celebrate the completion of the Erie Canal, by which
"benefits of immense importance" would be "secured to this
State and especially to the City of New York.".stating also that
a committee of fifteen had been appointed "to take measures in
Relation thereto;" that this committee met on Sept. 9, and the
memorialists were delegated to request the common
council to appoint a committee to confer with the citizens' com-
mittee. The board at once appoints such committee.—M. C. G.
(1784-1831), XIV: 765.

This committee reported on Sept. 26 that it had held its first
conference with the citizens' committee, who desired that they
request that the common council appoint a committee, "with
powers," so that "an event so great and so memorable as the
Connecting the Waters of the Great Lakes with the Ocean, may
be commemorated under the Auspices and Direction of the Cor-
poration and in a manner suited to the Character of our City."
The same committee, of which the recorder, Richard Riker, was
chairman, was so empowered.—Ibid., XIV: 797-98. See O 4.

For readings in relation to the canal, from 1823 to 1825, see
Com. Adv., Je 14, 1825. For current newspaper references
relating to the celebration, see ibid., S 8, 9, 27, 29, 50; O 3, 4, 7,
15, 18, 24, 26; N 5, 8, 9, 18; N. Y. Gaz. & Gen. Adv., S 8, 30;
O 3; N. Y. Evening Post, O 3, 15, 22, 24, 26; N 3, 5; N. Y. Daily
Adv., O 24; N. 3, 4, 5, 7, 17.

In a petition to the common council the statement is made
that, by an act of the legislature, trustees had been appointed
to sell and dispose of the "Trust of Land known as the Harlem
Common," and to see that the proceeds are appropriated to the
Harlem Library, and to certain schools.—M. C. G. (1784-1831),
XIV: 751.

The Society of Friends is permitted by the common council to
remove the remains of bodies now in the graveyard in Liberty
St. to its present cemetery before March 1, 1826.—M. C. G.
(1784-1831), XIV: 752.

The common council authorizes the purchase, from John P.
Roome, of the portrait of Charles Thompson, who was secretary
to the first congress, at not over $75, and directs that it be "lifted
up and placed in the Gallery of Portraits."—M. C. G. (1784-
1831), XIV: 760.

A weekly publication, entitled The New York Literary Gazette
and Phi Beta Kappa Repository and conducted by James G.
Brooks, "has just made its debut in this city."—N. T. Even-
ing Post, S 14, 1825.

The new Harlem Reformed Dutch Church is to be opened on
this day.—N. T. Evening Post, S 15, 1825. It was on the north
side of 121 St., west of Third Ave., and was the third building
erected by the congregation.—L. M. R. K., III: 935.

The common council receives a petition from John L. Norton,
who states that he is owner in fee simple of an estate known as the
"Hermitage," which he has divided into building lots on 19th,
30th, 31st, 32d, 43d, 44th, 45th, 46th, and 47th Sts, Seventeenth,
Sixteenth, Ninth, Tenth, and Eleventh Ave. He means to dispose
of the lots, but the title to the streets and avenues will still be
his, and he begs the corporation to accept them, with the excep-
tion of 47th St. to Eleventh Ave.—M. C. G. (1784-1831), XIV:
768-69. On Nov. 21, the deed of cession was presented, and
accepted by the board.—Ibid., XV 37.

President Adams arrives at New York from Philadelphia,
and is to visit Quincy, Mass. N. Y. Evening Post, S 27, 1825.

For the weather ending on this day, 7,666 passengers arrived
at the port of New York.—Arrivals of Alien Passengers and Immi-
grants (1891), table 7, p. 64.

A small ship, the "Restoration," with 53 persons on board,
arrives at New York from Norway. This was the beginning of
Norwegian immigration into the United States. For full ac-
counts of the event, and its significance, see The American Scandi-
navian Review, June, 1925. In 1925, the post-office department
issued a memorial postage-stamp, and congress authorized a silver
dollar in commemoration of this event.

A society called "The Column," is founded, the outgrowth of a
literary and social association called the "Chi Kappa Gamma,"
formed in Dec., 1824, by undergraduates and recent graduates
of Columbia College. In 1902, it was merged in the Century
Assn.—Pine, Hist. of Columbia Univ. (1904), 111.

"Rapid Travelling.—The distance between Detroit and
New-York city may now be travelled in five days and twelve
hours, and is at least nine hundred miles."—N. Y. Evening Post,
O 10, 1825.

The common council refers to the committee of lands
and places a resolution "respecting laying out the Lots
belonging to the Corporation at the Collect and the adjoining Block occupied
as a State Arsenal for a Public Square."—M. C. G. (1784-1831),
XIV: 803-3.

It is stated that "servant's wages are in New York, higher
than anywhere else, and plenty of demand."—N. Y. Evening Post,
O 11, 1825.

"A more scandalous disregard of the laws and ordinances
of any city in the world is not to be named, than is daily witnessed
in the public streets of New York. I mean the often repeated fact,
so often, that one is ashamed to mention it again, of swine of
swine running amok, without the least restriction, throughout the
most frequented parts of our city, at all times of day, not only
to the great disgust, but to the extreme inconvenience and real
danger of its inhabitants. . . . It is a fact that may be seriously
stated to the world, that the public streets of the city of New
York have become dangerous to horses and carriages, by the
multitudes of large and overgrown hogs that are permitted to
roam at large in all directions. We have laws, good laws, but
we have no magistrates with independence enough to see them
executed. It is in Boston only that they can boast of magistrates
who fearlessly dare to do their duty, regardless of consequences."
—N. Y. Evening Post, O 11, 1825.

President John Quincy Adams arrives in town from Quincy
on the steamboat "Tullio," and takes lodgings in the City Hotel.

A woman, Madame Johnson, ascends in a balloon from Castle
Garden.—N. Y. Spectator, O 25, 1825.

The "estate known by the name of the old Bull-Hole, in
the Bowery," is sold for $100,000. "There are sixteen lots, eight
fronting on the Bowery and eight on Elizabeth street, each 25
feet deep, by 75 feet broad. It was purchased by an heir of
General Gouverneur, for the purpose of erecting a splendid Theatre thereon with
an entrance from each street."—N. Y. Evening Post, O 22, 1825; N. Y.
Mirror, III: 111. See D 17.

The mayor appoints a committee to wait on President Adams.
—M. C. G. (1784-1831), XIV: 807. President Adams received
the visits of the citizens at the city hall, in the governor's room.
—Goodrich (1819), 132; N. Y. Spectator, O 25, 1825. In the
evening he attended the performance at the Park Theatre.—N. Y.
Evening Post, O 22, 1825. He left the city on Oct. 21.—Ibid.

The committee on lands and places is directed to lay out the
24 grounds in the rear of the city hall into walks and spaces and to
plant trees there.—M. C. G. (1784-1831), XIV: 820.

The common council orders that the Bowling Green be "laid
down in grass."—M. C. G. (1784-1831), XIV: 821.

The committee on laws reports to the common council "That
the distribution of the Common School Fund in this City, is at
present confined to those only, who are the subjects of a gratuitous
education. The necessary operation of this limitation, is, the rejec-
tion from the Free Schools, and other institutions participating
in this fund, of the children of those who can pay for schooling;
and the division among the children of the remainder of the
amount, is, that the children of poverty and want, are left to form a com-
community by themselves, and that the classes above them in point of
circumstances but whose parents or guardians are not of sufficient
ability, amply to provide for them, are omitted as objects of the
public care and bounty, in the invaluable objects of Literary and
elementary instruction." The following are some of the suggestions
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

1825
Oct. 24

for a general plan to break down the "distinctions that now divide these portions of the rising generation, and to promote their mutual benefit, by instructing them together, as children of the free citizen, in an enlightened and growing republic."

1. The title of the "Free School Society" to be changed to that of "The New York Public School Society," and its charter to be so amended that children of all classes may be admitted to the schools, and required to pay for their instruction, according to the branches they may learn, but not more than one dollar per quarter; the trustees to have power to remit the charge in such cases as they may deem proper.

2. The real estate of the Free School Society, and of the Public Schools, to be conveyed to the corporation.

3. The whole amount of the school fund to be distributed to the Public School Society and such auxiliary institutions as shall be sanctioned by the common council.

Some of the advantages to be gained are:

a. Experienced teachers, doubly compensated for their time and talent.

b. Convenient, light, airy school-houses.

c. Uniformity in instruction.

d. Harmony among religious sects.

e. An increased interest on the part of parents in the education of their children.

The common council resolves to approve of the establishment of "Public Schools" instead of "Free Schools," and to recommend that a memorial on the subject be submitted to the legislature.—M. C. C. (1874-1875), XIV: 921-25. For this memorial vide ibid., XV: 56-58.

A three-column description is published of the book (see Ag 18, 1824), beautifully engraved and bound, presented to Lafayette by the common council of New York at the president's house in Washington on Sept. 6, 1825, a duplicate copy being retained in the city archives. This volume commemorates Lafayette's visit to America, and is printed particularly to this city. It contains portraits "executed by those distinguished young artists, Messrs. Inman and Cummings, of this city;" also drawings by Charles Burton, of Washington, besides a variety of plain and ornamental penmanship by Isaac F. Bragg and Charles Hunt. It is believed to be "the most superb specimen of binding that has ever been exhibited in this city." The book is enclosed in a "mahogany box, lined with purple silk velvet, and stuffed, to preserve the leather and guarding from injury."—N. Y. Spectator, O 25, 1825. The duplicate, owned by the city, is in the N. Y. Hist. Soc. It is a complete record of the resolutions, addresses, etc. which commemorate Lafayette's visit to New York. His signature, and that of President John Quincy Adams, and others connected with the events recorded, are included as their attestation of the record.

26. The "Seaca Chief" leaves Buffalo over the Erie Canal, thus opening the events of the celebration, which continued for more than a week along the route to New York and in the harbor of this city.—Colden's Memoir, 148-49, citing the Com. Ado.; N. Y. Mirror, III: 111 et seq.; Goodrich, Picture of N. Y. (1832), 132. The Mirror reports the daily events accompanying the progress of the "Seaca Chief" from Buffalo. See N 4.

Castle Garden is advertised to be open every fair day and evening. In the evening, it is to be "brilliantly lighted with gas and variegated lamps, and decorated with a number of transparent paintings (by Mr. Boudet). A few rockets may also be expected. Admissions 5 cents."—Com. Ado.

A fleet of canal-boats and steamboats, which had joined the "Seaca Chief" (see O 26) on its voyage to New York, comes to anchor off Fort Gansevoort, just above the state prison, at 6 a.m. They soon again "got under weigh, and came to, off the Battery when the splendid steamboat Washington, . . . having on board a committee of the Corporation and the Officers of the Governor's Guard, came off alongside the Chancellor, in which were the Governor and the several Committees from the North, and tendered them congratulations on the safe arrival of the boats from Lake Erie." Aldrich Cowdrey delivered the formal address, and Gov. Clinton replied, in part as follows:

"The gratifications naturally associated with the celebration of this event, are greatly enhanced by its intimate connection with the prosperity of the city of New York.

Standing near the confines of the ocean, and now connected by navigable communications with the Great Lakes of the North and the West, there will be no limit to your lucrative transactions of trade and commerce. The valley of the Mississippi will soon pour its treasures into this great empire through the channels now formed and forming, and wherever wealth is to be acquired or enterprise can be attempted the power and capacity of your city will be felt, and its propitious influence on human happiness will be acknowledged."

The cooperation of the city having assembled at the city hall, received their guests soon after this, and about a quarter before 9 o'clock proceeded to Whitehall, and embarked on board the boats prepared for their reception. The whole fleet then proceeded up the East River as far as the Navy Yard, from which a salute was fired. The officers of the Navy were then received on board the Washington, when the boats returned, and on approaching Governor's Island were saluted by Castle Williams, . . .

"The whole fleet then proceeded down the Bay . . .

"On reaching the Narrows the leading boats fell out of the line to the right and left, and stopped until the ship Hamlet and the pilot boats came up and took stations in front. The line was then re-formed, and the boats proceeded to the U. S. schooner Porpoise, at anchor between Rowan & Sandy Hook, around which the flotilla formed, the circle presenting a most beautiful and interesting scene, and occupying a space of about three miles.

"The ceremony of uniting the waters of lake Erie and the Atlantic was then performed by Governor Clinton, who delivered an appropriate address."

"Mr. Mitchell then poured the contents of several vials, which he stated contained the waters of the Erie, and many other rivers, and delivered a long address. The honourable Mr. Colten presented to the Mayor, a memoir which contained a brief history of the Canal from its commencement to the present day. [This memoir is the leading feature of a printed report of the celebration.]

"Shutes were then fired from the Revenue Cutter, the pilot boats, . . .

"The flotilla returned to the city a little after 3 o'clock, when the parties landed and joined in the procession. . . ."—N. Y. Mirror, III: 126-27. For another full account of the events of the day, see Narrative of the Festivities . . ., by Wm. L. Stone (1825) N. Y. Spectator, N 6, 11, 15 et seq.; D 6, 1825.

The naval fête was most appropriately entertained by Chaas. Rhind, whose description of it is found in a report to Richard Riker, chairman of the committee of arrangements, and published in Colden's Memoir, 189 et seq. See also description of Pl. 95-a, Vol. III, which is a reproduction of Archibald Robertson's illustration for this report. The original drawing of this view is owned by Mrs. J. Wray Cleveland of New York, author of "Archibald Robertson" in Century Mag., May, 1890.

On this day also, an extensive and varied civic procession on land was held, consisting principally of societies representing the numerous trades, the firemen, and other organizations. This, and the illuminations and fireworks, are described, with illustrations, in Colden's Memoir. See also John Watts de Peyster, by Frank Allaben (N. Y., 1908), I: 95-97, which contains reminiscences of the events of the day.

A "Grand Canal Ball" is held. A committee, which met late in October at the Shakespeare Hotel, arranged to connect the Lafayette Circus (see JI 4) with the building back of it, which together formed a hall about 180 ft. long.—N. Y. Mirror, III: 111, 127. The circus building, or riding-school, was situated on what is now West Broadway, and was later known as Lafayette Theatre. It was fitted up for this occasion "with great splendour."—Goodrich, Picture of N. Y. (1838), 383; L. M. R. K., 984; Colden's Memoir, 346. See Mr 14, 1826.

A meeting of artists is held in the rooms of the N. Y. Hist. Soc. for the purpose of forming a society for improvement in drawing.
THE ICONOGRAPHY OF MANHATTAN ISLAND

The corner-stone of the “Second Congregational Unitarian Church” is to be laid on this day at the corner of Prince and Mercer Sts. The dedication will be on Nov. 23, 1825. This was the Church of the Messiah.—L. M. K., III: ii., 937.

Benjamin Wright, president of the N. Y. Water Works Co. (see Mr 24), announces that the company has “contracted for a number of valuable Water rights, and the shores of Byram and Rye ponds with their outlets, have been secured on terms favorable to the company. Surveys and levels have been made under the direction of Charles White, Esq., their engineer.”

“Plans and estimates are preparing by him, but are not yet fully completed. They are, however, so far done as to justify the assurance that no unforeseen or unexpected difficulty exists, and that a supply of water of the best quality, equal to six millions of gallons every 24 hours in the driest season, can be obtained and brought into this city, and distributed upon a good and permanent plan at an expense within the amount of capital specified in the charter.”—N. Y. Exec. Pst, N 26, 1825. See also ibid., N 28, D 2, 1825. See, further, D 17.

The body of the late Commodore Macdonough, who died at sea on Nov. 10, arrives at New York. Appropriate resolutions were adopted by the common council the next day.—N. Y. Spec- tator N 29, D 2, 1825. Commodore C. Macdonough, by Rodney Macdonough, 175. Elaborate funeral ceremonies were held on Dec. 1, after which the body was placed on a steamboat to be taken to Connecticut.—N. Y. Exec. Pst, D 2, 1825.

Grand opera is presented in America for the first time, at the Park Theatre, by the Italian troupe brought over by Signor Garcia (see N 17). The performance is Rossini’s “Il Barbier di Siviglia.”

“Our house was open at half past 11 o’clock, and we never heard such enthusiastic remarks, on any similar occasion, as were made in the lobby after its close. We consider the question whether the American taste will bear the Italian Opera as now settled, a question of commencing, it was quite and entirely filled. An assemblage of ladies so fashionable, so numerous & so elegantly dressed, was probably never witnessed in our theatre. . . . The Opera lasted from 8 until half past 11 o’clock, and we never heard such enthusiastic remarks, on any similar occasion, as were made in the lobby after its close. We consider the question whether the American taste will bear the Italian Opera as now settled, a question of commencing, it was quite and entirely filled. The Free School Society is erecting, on Charlatt St., its seventh school building.—N. Y. Exec. Pst, D 3, 1825.

The city recorder, Richard Riker, presents to the common council a letter he has received from Gen. Lafayette, dated at his home, “La Grange,” France, Oct. 12. The letter renuers La- Fayette’s thanks to the corporation of the city for their attentions to him, and makes reference to receiving “a Copy of the Splendid work” (an engrossed copy of an account of the receptions and complimentary speeches of the French people, Vol. III, pp. 58-81.) The board resolves that the letter “be engrossed in the Book in now the archives of the Common Council and that the original be put upon the files of the Board.” The original letter is still preserved in metal file No. 97, city clerk’s record-room, and has been reproduced in the M. C. C. (1874-1831), XV: 64-65.

The board also passes a resolution of thanks to the two heroes of the gift to Lafayette, “for the very handsome manner in which they executed the wishes of this Board in presenting to General La Fayette the duplicate tribute of respect confided to their care.”

The committee on reception and entertainment of Lafayette “having officially announced his safe return to his native Country in the Frigate Brandywine dispatched by the President for his accommodation . . .” (see S 7), the board also passes a resolution of thanks to them.—Ibid., XV: 69-69.

In the course of Lafayette’s visit to New York, the common council authorised the issuing of the following warrants on the treasurer for the expense of receptions, etc.: In 1824. Sept. 27, $1,000; in 1825. Jan. 31, $250; April 11, $159.94; Aug. 1, $759; Dec. 5, $1,239; total, $4,080.35.—Ibid., XIV, 86, 314, 441, 710, XV, 314.
The common council accepted, on Dec. 19, an invitation to attend, on this Christmas Day, the opening of the new home for the Society for the Reformation of Juvenile Delinquents (see Ja 1).

The council adopted a resolution to plant a line of "flower trees" in Duane Park.—M. C. C. (1833-1834), XV: 67.

A fire starting in Thompson St., between Broome and Spring Sts., destroys about 40 houses. —N. Y. Evac. Post, D 15, 1825.

On Dec. 16, a meeting was held at the Broadway House to aid the sufferers.—Ibid., D 17, 1825.

Plans for the proposed new theatre on the Bowery (see O 20) are published. "The size of the building will be one hundred by two hundred feet. It will have two fronts, one on the Bowery, and the other on Elizabeth street. That on the Bowery will have the entire length, and the other will be a mezzanine on Elizabeth street and gallery. ... The fronts of the building are to be built of marble, or free stone, the proprietor not having yet determined which to use. ..." The interior of the building is described in detail. "The stage is to be one hundred feet square, and to have a large entrance from Elizabeth-street, to admit cavalry, infantry, and artillery, whose use is to be determined hereafter and other purposes. In addition to this will be tubes to admit water upon the stage for aquatic spectacles, fountains, &c. The building is to have a balcony seventy feet by ten, supported by marble pillars. ... A view of the front on the Bowery is completed, and is deposited for the present at Mr. Gibbon's the keeper of the Bull's head..."—N. T. Mirror, III: 626-63, 907. See, further, Je 17, 1826.

The common council resolves to apply to the legislature for a new law repealing the one which takes away the city's right to transport paupers back to their last residence, or else that a sufficient sum may be provided for their maintenance. Since the passage of the law complained of, the poor from all parts of the state have come to this city, so that the allowance of $10,000 for their support is wholly inadequate; $50,000 is necessary.—M. C. (1826), XIV: 101.

As it is manifest that the Bells of many Churches do not ring on the Alarm of Fire (M. C. C., 1784-1831, XV: 103), an inquiry is made and it develops that the "Bell ringers had entered into an association not to ring the Bells unless paid therefor the sum of $25 per annum."—Ibid., XV: 119.

The common council resolves that the name Sloane Lane be changed to Exchange St.—M. C. C. (1784-1831), XV: 111. See Ap 10, 1826, and 1827.

The ferry committee makes a report to the common council on a petition from various inhabitants of Brooklyn and New-York who want a ferry established south of Fulton Slip to a point in Brooklyn near the Pierpoint residence. The committee studied the question in two aspects: First, "Whether it be expedient to establish a new Ferry at the place desired by the petitioners;" and, if it is, then secondly, "Whether the Common Council have power to establish such ferry consistent with the grant heretofore made to the Leesees of the Fulton Slip Ferry." The committee report, which is full and explicit, closes with a proposed resolution that it is inexpedient to grant the petition. The board approves the resolution.—M. C. C. (1784-1831), XV: 272; and N. Y. Evac. Post, A 17, 1825.

The proceedings and arguments thus begun continued for ten years before the South Ferry to Brooklyn received its charter.—See Ap 9, 1835; also All the Proceedings in Relation to the New South Ferry between the Cities of New-York and Brooklyn on December 30th, 1825 to Jan. 3rd, 1835 (N. Y., 1835). Gf. Ferry Leases and Railroad Grants (1866).

The common council, on Dec. 19, issued an invitation to a Christmas Day opening of the new home for the Society for the Reformation of Juvenile Delinquents (see Jan 1).

M. C. C. (1784-1831), XV: 70-71; N. Y. Spectator, D 30, 1825.

For a description of the "Leaves of Dance," see Docs. Relating to the House of Refuge (1812), 98, with frontispiece view, or see the same description as republished, with a reproduction of the view, in Man. Com. Couns. (1846), 751. See also L. M. R. K., III: 954. There were two buildings of stone, one for boys, the other for girls, on a lot of ground 320 by 300 ft., enclosed by a three feet high.—3d Ann. Rep. of Managers of the Soc. for the Reformation of Juvenile Delinquents (1828); Goodrich, Picture of N. T. (1838), 447. This was the first house of refuge in the United States. Its principal originator, advocate and promoter was John Griscom, whose aim was to separate boys and girls from hardened criminals, and give them moral and moral training in trade schools.—Griscom, Memoir of John Griscom. See 1828.

This was a year of great commercial embarrassment and distress, caused by the failure of several spurious banks, chartered by the state of New-Jersey, and located at Powles Hook, but circulating their paper principally in the city of New-York. Their failure caused a temporary panic for the fate of all banking institutions in the city; they all, however, sustained their reputation at that time. But soon after, a scene of iniquity was unfolded by the crash of several Insurance Companies, and other events that transpired, and in the building of several ships of war for foreign governments, which, in its effects abroad, shook the commercial character of this city to its deepest foundations. —Cf. Friedrich, Picture of N. T. (1818), 177.

In this year, the first volume of James Kent's Commentaries on American Law appeared. The last of the four volumes was published in 1830. There were eleven editions before 1867, those after the seventh, inclusive, being edited by William Kent.—Sabin, IX: 445. See, further, Ja 24, 1841.

In this year, the N. Y. Law Institute was organized, in the house of James W. Gerard, on Broadway near Bowing Green. It then had two members, Mr. Gerard and George Sullivan (its founder), a nephew of Gen. Sullivan of the Revolutionary Army. The first meeting of the society proper was held at the American Hotel, cor. Broadway and Barclay St., Fe 5, 1828. There was no permanent meeting-place at that time, sessions being held either in the U. S. court-room, the "tea room," or the janitor's "parlor," in the city hall.—Cat. of the Library of the N. Y. Law Institute (1874), xvii, xviii, xxi. For the Institute's incorporation, see F 22, 1830.

In this year, "marine railways" were built by the N. Y. Dry Dock Company (see Ap 12, 1825) at Burnt Mill Point, near Ave. D and 40th St. For detailed description of the dry docks, see Goodrich's Picture of N. T. (1828), 411-14. Cf. Ap 16, 1827. See also N. Y. Evac. Post, Mr 17, 1826.

In this year, Philip Hone began a diary, later portions of which, commencing May 18, 1828, were printed in two volumes, with an introduction by Bayard Tuckerman, in 1889. The original manuscript is in the N. Y. Hist. Soc. One of the earliest entries of special interest in the unpublished manuscript is his address delivered at Rome, N. Y., on the occasion of the commencement of the Delaware & Hudson Canal.

On his arrival at New York, Lieut. De Roos, of the Royal Navy, wrote, in a narrative of his travels: "We lodged at the City hotel, which is the principal inn at New York. The house is immense and was full of company; but what a wretched place the rooms were! Without curtain the beds without curtains; there was neither glass, mug, nor cup, and a miserable little rag was dignified with the name of towel. The entrance to the house is constantly obstructed by crowds of people passing to and from the bar-room, where a person resides at a buffet formed upon the plan of a cage. This individual is engaged, 'from morn to dewy eve,' in preparing and issuing forth punch and spirits to the non-paying men, who 'come in the hour' to read the newspapers and talk politics. In this place, may be seen in turn most of the respectable inhabitants of the town..."

"New York is situated on the Peninsula which separates the Hudson and the East River: Though the situation is low and the streets are irregular, it is certainly a very beautiful city. The
trees, which were in luxuriant bloom, are planted regularly along the foot pavement; the numerous fine churches, and the magnificent central street called the Broadway, are among its most prominent features. The houses are generally of brick, and in the Broadway are very regularly built. The streets are remarkably clean and, as a protection from the heat of the summer sun, each shop has a awning before it, which affords an agreeable shade to the passenger. The wharfs for shipping extend nearly all round the town.

In this year, Bellevue Hospital (called at first the "Fever Hospital"), began in 1823 (q. v., D 39), was completed. It was situated "a few rods southwest from the Alms House, on an elevation immediately adjoining the East River in front." For further details of construction, see Dickens, "picture of New York" (1850), 310–11. It is four stories high, of which the 2 lowest are fitted up for the reception of the insane poor, and contain 24 rooms and 32 cells. The 3d. story has 6 large rooms, and 4 apartments for the keepers, &c. and the upper story has 2 large wards 50 by 65 each, for the reception of fever patients, and 4 lodging rooms. On the 1st of June, 1826, there were in this hospital 177 insane poor."—Hardie, Descrip. of the City of N. Y. (1847), 269. In 1826, the hospital and almshouse were separated.

—Lossing, Hist. of N. Y. City, I: 115. See, further, 1848.

In this year, the steeple of St. Mark's Church was designed. The steeple was completed in 1829 at a cost of $5,000. Mears, Thomson & Town were the architects.—Memorial St. Mark's Church, 1765–1865 (see also 174–32), p. 46. The building was dedicated about a year because of uncertainty as to the ultimate fate of Stuyvesant St., which had not been provided for on the commissioners' plan. "It was ... originally finished with a quadrangular tower rising from the roof, and terminating at the belfry, without a spire. But in the year 1827, Martin E. Thompson, Esq., our well-known architect, suggested the idea of raising a spire of brick-work, from the summit of the tower, to an elevation of eighty-four feet. This idea was approved and adopted."—N. Y. Mirror, My 15, 1810. Cf. Pl. 119, and p. 624, Vol. III.

In this year, the church edifice of the Greenwich Reformed Dutch Church, which stood midway between Amos and Charles Sts., was purchased by the Reformed Presbyterians, who removed it bodily to Waverly Place near Grove St. The public clock in the spire was kept running, and a sermon was preached to a congregation in the church during its removal.

The congregation of the Dutch Church built a new church building for themselves at the corner of Amos and Bleeker Sts. This was opened during the year 1826.—Greenleaf, Hist. of the Churches, 29–30; M. C. C. (MS.), LV: 177. See, further, 1845.

In this year, the Swamp Church congregation acquired St. Matthew's Church (Lutheran), which had been erected in 1837 in Walker St., and thus possessed two houses of worship. About 1839, the Swamp Church was sold, and the German congregation removed to St. Matthew's.—Greenleaf, Hist. of the Churches, 53–77.

Sieker, The Oldest Lutheran Church in Am. (1914), 24, 27.

In this year, the African Presbyterian Church in Elm St., erected in 1814 north of Canal St., was purchased by German and Polish Jews, and converted into a synagogue for the Congregation B'nai Jeshurun.—Greenleaf, Hist. of the Churches of N. Y., I, 122, 124, 125–251; Daly, The Settlement of the Jews in N. Am., p. 571; A Familiar Conversational Hist. of the Evangelical Churches of N. Y. (1837), 461; L. M. R. K., III: 928–29. For description and view of the building in 1829, see N. Y. Mirror, VII: 90 (S 26, 1829).

In this year, there was erected in the rear of St. Paul's churchyard "a neat edifice of brick, as a vestry room, library, and safe depository for records."—Richer, Picture of N. T. (1828), 215.

In this year, St. Mary's Church (Protestant Episcopal), organized, in 1823, was erected, on Lawrence St., in Manhattanville.—Greenleaf, Hist. of the Churches, 75–76; Bikes, Hist. of Harlem, 408.

In this year, the brick meeting-house of the Quakers, on Liberty St., was sold to Grant Thorburn; it was used by him as a seedstore until its demolition in 1836.—Greenleaf, 117; Annals of Hempstead, by Henry Onderdonk, Jr. (1895).

Until this year, "Peterfield" was occupied by Peter Gerard Stuyvesant. The mansion stood near the East River shore, on the block bounded by Ave. A and First Ave., 15th and 16th Sts. It was approached by a winding lane, commencing at the present junction of Fourth Ave. and 12th St., and passing the old Stuyvesant pear-tree on the cor. of Third Ave. and 15th St.—Man. Com. Coun. (1853), 427. See also map of Stuyvesant properties in ibid. (1862), 686. For genealogy of the Stuyvesant family, see N. Y. H. S. Collections (1844), 453; Man. Com. Coun. (1853), 417.

"In 1826 and 1827 the Tontine Coffee-house was in the hands of John Morse, who had formerly kept the old Stage-house at the corner of Church and Crown Streets, New Haven. He turned the entire house into a tavern, and it so remained for several years. The first floor was in one room, running the full length of the house, and fronting Wall Street. At the back of the room, extending nearly its whole length, was the old-fashioned bar. Jutting out from the counter were curious arms of brass supporting the thick, round, and mast-like timber on which the heavy dealers leaned while ordering refreshments. About the room were numerous small tables, and after supper, in fair weather, around the tables could be seen many of the wealthy city men diminishing the contents of their pewter mugs, or planning, amid the cutting smell of the room, their operations for the next day. Morse was not successful in the Tontine, and was finally sold out for the benefit of 'whom it might concern' ..."—Stone, Hist. of N. Y. City (1872), 322, citing Jour. of Com., II 25, 1871. See 1832.

In opening 6th St., a portion is taken of Potter's field, or the public burying-ground; the new street ran also through the cemetery of the Cedar St. Presbyterian Church.—Doc. 76, Ed. of Ald., F 4, 1833.

In and after 1826, extensive assessments were levied for the opening and paving of streets throughout the city (see Index to Assessment Rolls, in comptroller's office), following the plan of the commissioners of 1807, as amended from time to time by the legislature.—Gerard, Treatise on the Title of the Corporation, 99–104.

From 1826 to 1828, Anthony Imbert, lithographer, published in New York a series of "Views of The Public Buildings in the City of New-York." For a list of these, see, of pl. 102–8, Ill.: 503. See also, of pl. 95–9, Ill.: 382.

Bowling Green, as it appeared in or about 1826, was pictured in one of the Megray street views, published in 1834.—See Pl. 98, Vol. III.

In the city directory for this year was published a full-page descriptive advertisement of "Paley's New-York Museum, and Gallery of the Fine Arts, in the Parthenon, Broadway, opposite the City-Hall" (see O 26, 1825).

In this year, the firm of Lord & Taylor was founded by Samuel Lord and John Taylor, cousins, their first store being at 47 Catharine St. The firm was incorporated at 697–99 Catharine St., the firm occupied from 1838 to 1866, with a branch store at 255–261 Grand St. from 1853 to 1892, both sites being extensively enlarged at various times (see, for example, Ag 29, 1879). In 1872, the firm removed to the new store at the south-west corner of Broadway and 20th St., built in the latest form of iron fronts. This building was extended in later years by the addition of the adjoining property at 129–131 Fifth Ave. and the intervening lots on 19th St. In 1914, the firm moved into the present building on the west side of Fifth Ave. between 38th and 39th Sts.—From information supplied by the firm's executive offices. For views of the first three stores, see King's Handbook (1893), 484–499; and the sales catalogue of the Pyne collection.

In this year, James Frothingham, portrait painter, moved to New York from Boston, and pursued his calling here until his death in 1864.—Dunlap, Hist. of the Arts of Design (Goodspeed ed.), II: 364–69.

By vote of the common council, Philip Hone succeeds William Paulding as mayor. He is elected on the eighth ballot with thirteen votes, after receiving but one vote on the first ballot.—J. C. (1815), XV, 146–47. For a later sketch of his life, see Man. Com. Coun. (1853), 427. He was succeeded by Paulding, who was again chosen mayor on Dec. 25, 1826 (q. s.). The original MS. of Hone's address on assuming office, dated Jan. 16, is found in metal file No. 98, city clerk's record-room.

Canvas White, engineer, makes a long report to the directors of the N. Y. Water Works Co., in which he states that it is prac-
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

The American Seaman's Friend Society is organized at the City Hotel. Its object is "to provide Boarding Houses, Intelligence Office, Saving's Banks and Libraries for the use and improvement of sailors."—N. Y. Econ. Post, Ja 14, 1826. Done entered in his MS. diary (now at the N. Y. H. S.), the constitution, list of officers, etc., of this society. See also Goodrich's Picture of N. Y. (1828), 344.

The public is informed that the American Museum in the N. Y. Institution "has lately undergone a thorough alteration and improvement, and many new and interesting additions, both mental and artistic, have been made in every department during the last season, and amongst the latest, there has been added one entire story, appropriated for a Grand Cosmographic department." The Cosmorama consists of 47 Optic glasses and as many distinctive views of all the most renowned ancient and modern cities, harbors and landscapes in the known world. The Museum is daily open to visitors, and brilliantly lighted with gas light in the evenings. The rooms are comfortably warmed.

—N. Y. Econ. Post, Ja 13, 1826. See also Hardie, Description of the City of N. Y. (1827), 343-44.

A former petition presented on Mar. 15, 1825, which had been referred to a committee, is again presented to the common council, praying that the board apply to the legislature for a reorganization of the marine court. Referred to another committee.

—M. C. C. (1874-1831), XV: 158.

The N. Y. Drawing Assn. becomes the National Academy of Design, "the first institution in the country established by and under the direct control and management of the professional artists."—Howe, Hist. of the Metropolitan Museum of Art (1837), 49, citing Cumings' Historic Annals of the Nat. Acad. of Design, Vol. I, 1826.

The trustees of the High School Society of New York announce "that the spacious building lately erected for a Female High School, in Crosby street, between Broom and Spring streets, near Broadway, will be opened for the reception of scholars on Wednesday the 1st of Feb. next, at 9 o'clock, A.M."—N. Y. Econ. Post, Ja 24, 1826. See also ibid., Ja 30 and Mr 17, 1826.

The common council, refusing to permit "the building on the Battery called the Flag Staff" to be leased for private business, as an observatory or otherwise, orders that it be taken down under the direction of the committee on lands and places.—M. C. C. (1816-1820), XVI: 638, 655; XV: 150. For views of this landmark, see PIs. 59, Vol. I, and 92-3, Vol. III. See also L. M. R. K., III: 962.

The name of the "Free School Society" is changed to the "Public School Society of New York." The society is required to instruct, for a moderate compensation, all children in the city not otherwise provided for, without regard to religion. The society is authorized to convey its school buildings to the corporation of the city, taking back a perpetual lease.—Laws of N. Y. (1826), chap. 25; see also ibid., chap. 32 and 117, and N. Y. Econ. Post, F 4, 1826. See Mr 15.

The New York Institution for the Instruction of the Deaf and Dumb petitions the common council for a donation of land or money to erect buildings, "wherein the Pupils may be taught the Trades &c to make them more useful members of Society."—M. C. C. (1874-1831), XV: 170. On Feb. 13, the board decided that it would be unjust to make to this institution an exclusive donation; for "to give to all similarly situated would have a tendency to exhaust the treasury."—Ibid., XV: 199.

The common council resolves to open 17th St. from Greenwich Lane to Old Dock Road, and to pay damages to those whose lands lie to the northerly line of 17th St.; to close that part of Greenwich Lane lying between 115th St. and Eighth Ave., and that part of the Old Kill Road lying between 13th St. and Eighth Ave.—M. C. C. (1874-1831), XV: 182-83.

The common council refers to the committee on applications to the legislature a resolution "to enquire into the expediency of a Law to provide that Aliens carrying on business in this City do pay a certain sum as an equivalent for Militia and Jury duty from which they are now exempt."—M. C. C. (1874-1831), XV: 120.

The common council takes action to repair the Lawrence Monument in Trinity churchyard.—M. C. C. (1874-1831), XV: 192. See Ap 2, 1826; Ap 10, 1826.

The Mercantile Library (see N. Y., 1826) moves from its limited quarters in Fulton St., where it has been since F 12, 1826 (q. v.), to a large room in Cliff St.—See Hist. Rep. of the Assn. (1826-7).

This was in the Cliff St. building of Harper & Bros. In 1875, a course of ten lectures on commercial law proved so successful that a lecture department was added, and until 1875 ten or twelve lectures were given each winter under the auspices of the library.—Man. Com. Curr. (1856), 545; see also the history of the library, pub. in the Times, N 7, 1920, at the time of its centenary. See N 2, 1876.

"The new novel of Mr. Cooper, The Last of the Mohicans is published to day in this city."—N. Y. Econ. Post, F 6, 1826.

The Italian opera "Otello" is presented in America for the first time, at the Park Theatre.—N. Y. Econ. Post, F 7 and 9, 1826.

The common council passes an ordinance directing hackney carriages at night to have lighted lamps with glass fronts and sides, and the carriage number painted on them.—M. C. C. (1874-1831), XV: 192, 198.

The New York Gas Co. asks the common council for permission to light the council chamber with gas. Referred to the committee on public offices.—M. C. C. (1874-1831), XV: 197. See N 21, 1825, and O 30, 1826.

At the same time, the board appointed a special committee, to which was referred "the contract between the Corporation of this City and the New York Gas Light Company for lighting the City," with copies of all proceedings of former boards on the subject; and with instructions "to ascertain the expense necessary to incur in order to prepare for the introduction of the Gas light in our Public Lamps," and also to report a comparative estimate of the cost of lighting the city with oil, "Having due regard to producing the same quantum of Light by either method."—Ibid., XV: 211. This report was presented on June 29, laid on the table, and the board ordered it printed.—Ibid., XV: 492.

The common council refers to the police committee the following resolution: "Resolved that Peddlers and all others be prohibited from unnecessarily hallowing aloud in the Streets of our City after the hour of 9 o'clock in the Evening and before the break of day in the morning.—And that the Council of the Board be directed to prepare a Law accordingly."—M. C. C. (1874-1831), XV: 211-12.

Unsuccessful efforts are again made (see My 31, 1824) to reorganize the common council by act of the legislature.—M. C. C. (1816-1820), XVI: 223-25, 227; further, F 7, 1826.

St. Thomas's Church, at Broadway and Houston St. (see Ja 27, 1824), is finished and consecrated.—Greenleaf, 85; L. M. R. K., HI: 935; Goodrich, Picture of N. Y. (1828), 216; N. Y. Econ. Post, F 22, 27, 1826. It was erected from drawings by Josiah R. Brady, architect.—N. Y. Mirror, Je 20, 1829. A sepia drawing of the interior of the church, by A. J. Davis, 1827, is in the N. Y. H. S. (in box of MSS. relating to N. Y. churches). A view of the exterior of the church, by the same artist, is in Emmet coll., No. 11251; see also engraving in Fay's Views of N. T. (1831). In 1851 (q. v., Mr 2), the church was destroyed by fire.

The legislature passes an act "relative to Improvements in the City of New-York." It makes it lawful for the commissioners of the land office to issue letters patent to the corporation of the city, and their successors forever, to convey to the city the state's right and title to water lots along the Hudson river shore of Manhattan Island, from a point four miles north of Bestavers Killie to Spuyten Duyvil Creek (otherwise known as Kingsbridge Creek or Harlem River), and extending 400 ft. into the river beyond low-water mark; also the water lots along the East River or Sound, extending 400 ft. Inland on the river shore and north half of a point from a point two miles north of Corlack's Hook to Spuyten Duyvil Creek, such water lots on both rivers being "contiguous to and adjoining" the lands already owned by the city.

The act declares that "Tomkin's street," along the East River, shall be the permanent exterior street on the East River,
Henry Wallock announces that he has leased "the Chatham Theatre, Garden, and all that immediate property," and that the theatre will reopen under his direction on March 20.—N. T. Eve. Post, Mr 17, 1826. For other incidents in the history of this theatre at this period, see N. T. Eve. Post, My 9, 1825; Mr 16, 1826; D 3, 1827; Je 16, 1828; Brown, II 86-89.

The editor of the Mirror publishes a plan for beautifying the Battery and adding trees to its scenery, adding: "The committee of the common council acts unfavourably on a proposal to "make the office of mayor elective by the people." The present method of electing the mayor by the common council, adopted by the constitutional convention Nov. 10, 1821 (p. 9) is believed to cause "no inconvenience" nor "evils which require correction."

M. C. C. (1784-1831), XV: 237-38. See F 14, 1826. The new idea was later written into the state constitution and ratified by the New York State, see N. Y. Mirror, III: 270, 294.

A committee reports to the common council that the old Potter's field is now being regulated by the board; and that, as it is not likely to be used for private purposes for some years, it seems wise to use it as a military parade-ground. This is approved by the board.—M. C. C. (1784-1831), XV: 254. On June 19, a resolution is adopted that this ground be called the "Washington Military Parade Ground."—Ibid., XV: 454. See also Ag 30, 1824; D 18, 1826.

The finance committee reports to the common council on a petition from E. R. Furman, daughter of the late Richard Furman, manufacturer of pins at the penitentiary, for a relinquishment of a part of the sum due from her father's estate to the corporation. Shortly after the close of the war, the corporation, being in the condition of being perfectly free from manufactoring the manufacture at Belleville which would employ the children, thus separating them from the old offenders, and which would at the same time afford profit to the city, determined upon a pin factory. This proved profitable; but for years has languished owing to foreign competition. Miss Furman now gives notice that it must be abandoned on May 1. The board resolves that she be discharged of the city's claim.—M. C. C. (1784-1831), XV: 243-44; and see ibid., XII: 135.

Mar.

An account of the special sphere of action of the Lafayette amphitheatre is published. As "the legitimate drama, the opera, and melo-dramatic spectacles . . . ought never to be exhibited in the same edifice, nor on the same stage, . . . an enterprising and tasteful individual of our city, erected a spacious amphitheatre . . . with the name of . . . Lafayette. . . . Here, independent of the ring, is a stage of sufficient capacity to display and manoeuvre a small army of cavalry, being nearly two hundred feet in depth, and about the same number in width. This is fitted up with scenery, machinery, and decorations, expressly adapted to melo-dramatic and equestrian spectacles; and those who have witnessed the representation of El Hydra, Blue Beard, etc. have been delighted and astonished at the enchanting effects produced by this improvement. . . . The horses (a beautiful stud) are finely trained, and evince the greatest sagacity, docility, and courage, both in parade, and in battle. . . ."—N. Y. Mirror, III: 263. This amphitheatre was first opened on July 4, 1825 (p. 2).—Ibid., III: 271. Advertised for sale on March 27, 1826 (ibid., III: 279), the sale was stopped, the proprietor deciding to continue (ibid., III: 287). See further, July 14.

The common council refers to the police com't a petition "that the Horse Market may be removed to 25th Street between 3rd & 4th Avenues near the Bulls Head."—M. C. C. (1784-1831), XV: 255. Although this site was apparently not then approved (see Ap 10), this neighborhood later became, and still is, the headquarters for the sale of horses in New York.

A committee reports to the common council that the old wooden fence around the Battery is in a state of decay; and that, as this public walk is "much resorted to," it should be enclosed by a substantial and ornamental iron railing. The board authorizes its construction.—M. C. C. (1784-1831), XV: 258-59; N. T. Eve. Post, Mr 15, 1826. The cost was estimated at $15,000 to $16,000. See N. Y. Govt. Adm., Mr 15, also Mr 18.

The legislature incorporates the "New York House Carpenters' Architectural and Benevolent Association," for the purpose of "instituting and maintaining practical lectures applicable to architecture, and for collecting and forming a repository of apparatus, books, drawings, and generally for enlarging the knowledge and improving the condition of house carpenters in the city of New-York,"—Laws of N. Y. (1826), chap. 77.

The common council directs a committee on the jail and bridewell to visit the state prison and report as to its value and the expediency of purchasing it; also an estimate of the expense of constructing a debtor's jail, bridewell, and penitentiary, on land owned by the corporation.—M. C. C. (1784-1831), XV: 250, 281. On March 23, the committee reported that the main building of the state prison was "in excellent condition, perfectly substantial and so constructed as to be easily converted to all the purposes" desired by the board; that the workshops with the fixtures, machines, tools, and working apparatus of various kinds, would be an acquisition of "immense importance" to the city; that the value of the grounds and buildings probably exceeded $100,000, and that the extent of the grounds and what was later known as March 30, 1826. It had been occupied as a school.—N. T. Daily Adv., Mr 28, 1826. This house, a stone one, still stands, at No. 421 E. 61st St., one of the oldest houses on Manhattan Island. In Sept., 1824, it was acquired by the Colonial Dames of America by purchase from the Standard Gas Co., for $1,000, in order that it might be erected as an old colonial house, under the direction of the society. For outline of its history, see N. Y. Times, S 7, 1824.

"The common council instructs the water committee to inquire whether water of the best quality, and in sufficient quantity to supply the wants of this city, cannot be obtained from wells now sunk, or to be sunk, on Harlem Heights.—M. C. C. (1784-1831), XV: 301. See also May 17, 1825.

The legislature authorizes the city to raise $196,000 by a tax on real and personal property within this city to defray contingent expenses, and a further sum for the support of the common schools.—Laws of N. Y. (1826), chap. 92.

The city buys for $100,000 the state prison at Greenwich, its buildings and grounds, covering six acres, for the purpose of converting it into a bridewell and penitentiary.—M. C. C. (1784-1831), XV: 310. See also Ap 12, 1820; Mr 21, 1826; Ja 14 and Je 30, 1828.

"The Monitory Free Schools of the city, under their new name of Public Schools, will be opened, we understand, for the reception of pupils of all classes, whether rich or poor, agreeably to the provisions of the late act of the legislature, on the 15th of May next. Also the salary now given to the teachers will be of superior qualifications, and the instruction much more perfect than in the ordinary private schools, yet it is intended by the Board of trustees, under whose charge the institution is placed, to fix the terms of tuition so low as to be within the reach of all. This will they be enabled to do by the aid of the large revenues which they derive from other sources, amounting to upwards of $12,000 per annum. Arrangements are also making for the erection of several new edifices.
The friends of Italian opera, meeting at the City Hotel, organized "The New-York Opera Company," as a means of permanent employment for the members. This company was to be the nucleus of what was to become the New York City Opera. —N. Y. Ex. Post, Ap 1, 1826. See also ibid., Apr 6, 1826.

The common council, on March 14, resolved to abandon the contract system for clearing the streets, and to take this work under its own immediate charge at the expiration of the present contract; also, to purchase a sufficient number of horses and carts, not exceeding 40, to remove the street manure. A resolution that sweeping the streets be done by the corporation was, however, negatived. —M. C. C. (1784-1831), XV: 270. The board now passes a law in conformity with the resolutions thus adopted. —Ibid., XV: 399. On Sept. 11, the board was informed that the system, "so far as it extended," meets the most sanguine expectations. —Ibid., XV: 483.

Henry Clay and John Randolph fought a duel with pistols, on the banks of the Potomac. Neither was wounded. —N. Y. Ex. Post, Ap 11, 1826. Randolph had characterized the alliance of Adams and Clay as "the coalition of Bliffid and Black George." The combination, unheard of till then, of the Puritan with the blackleg," —Schurz, Henry Clay, I: 277-74; Adams, John Randolph, 288-89. See also McMaster, Hist. of the People of the U. S., V: 500.

The common council adopts a resolution that the horse market be located on Second Ave. between 15th and 24th Sts.—M. C. C. (1784-1831), XV: 239.

The common council is informed that the monument to the late Capt. Lawrence in Trinity churchyard is in such a state of decay (see Ap 2, 1825) that it cannot be repaired. The board appoints a committee to attend to the erection of a new monument at a cost of not more than $2,000, unless the widow should proceed. —Ibid., Apr 22, 1826.

An advertisement reads: "M. Maelzel, Proprietor of the celebrated and only Automaton Chess-player in the world, informs the public that the first exhibition will take place on Thursday the 15th inst., in the assembly room at the National Hotel, No. 112 Broadway, opposite the City Hotel. The order of exhibition will be as follows:"

1st. The Automaton Chess-player, who will play a number of games, giving the choice of pieces to any opponent that offers. These ends of games are played in preference to whole games, as they exhibit the powers of the machine equally well, and do not fatigue the attention of the company.

2d. The Automaton Trumpeter, invented by Mr. Maelzel. He will play a number of marches composed expressly for him by the first masters.

3d. The Automaton Slack Rope Dancers, also invented by Mr. Maelzel, and the only ones ever exhibited on a slack rope. . . .

"N. B. Amateurs wishing to engage the Chess-player at whole games, can be accommodated with private meetings on application to the proprietor." —N. Y. Ex. Post, Ap 11, 1826. The first exhibition took place on April 13, and it was stated that "nothing of a similar nature has ever been seen in this city, that will bear the smallest comparison with it." —Ibid., Apr 14, 1826. See also ibid., Ap 21, 24, 27, 28, My 9, 27, 30, Je 1, 1826.

The legislature designates Tompkins St. between Rivington and 27th Sts., and East St. between Grand and Rivington Sts., as principal street fronts on the East River.—Law of N. Y. (1826), chap. 166.

The legislature passes an act to secure the safety of passengers in steamboats and stage-coaches. It directs boats how to pass each other, and how to land passengers. It forbids a stage-coach driver to run his horses in an attempt to pass another vehicle going in the same direction, or to prevent another vehicle from passing him. When passengers are in the stage-coach, it requires that horses be fastened by rope or chain when standing. Racing on highways is prohibited after next July first. The law does not affect laws relating to horses and carriages in any city.—Laws of N. Y. (1826), chap. 222. This was amended by the addition of new details on April 5, 1828.—Ibid. (1828), chap. 175.

The St. Andrews Soc. was mentioned as early as 1751 (q. v.), and was organized Nov. 19, 1756 (q. v.), with Philip Livingston as the first president. It is still in existence.—King's Handbook (1893), 447-48.

The Hudson and Mohawk Railroad, between Albany and Schenectady, is incorporated.—Laws of N. Y. (1826), chap. 253.

The legislature incorporates the New York Athenaeum, "for the better cultivation of literature, science and the arts," and for no other purpose. It may hold real estate not exceeding $50,000 in value, independent of improvements, and this shall be tax-free.—Laws of N. Y. (1826), chap. 285.

The legislature incorporates the "New-York Harlem Spring Water Company." The incorporators are Anson G. Phelps, James Lenox and their associates. The company's purpose is to supply the city with pure water. Its capital stock is limited to $500,000, at $50 a share. The company shall not conduct a banking business or other specified financial operations. It shall commence operations in good faith before March 1, 1827, or the act will be void.—Laws of N. Y. (1826), chap. 290.

The legislature incorporates the "Harlem Canal Co." It gives the power to cut a canal, communicating "at or near the entrance of Harlem creek, in the twelfth ward of the city of New-York, and to construct any number of basins in connection therewith, upon the land of said company, for the purpose of opening water communication, on and across the island of New-York, to the North River," at any point between 95th and 155th Sts., and "for the purpose of supplying water for the manufacturing establishments which may be erected." The company is given authority to purchase, build or hire, for the use and in the name of the said corporation, houses, factories, ware-houses, wharves and other necessary buildings, boats or water craft, and to sell or lease them. The consent of land owners shall be obtained before taking land, as well as that of the common council before the company begins to dig. The act does not give an exclusive privilege, however, and the canal must be built within two years from this date or the act will be void.—Laws of N. Y. (1826), chap. 317. On April 13, 1827, the time was extended four years from that date.—Ibid. (1827), chap. 225.

The wind-mill in Rivington St. catches fire, and the wood work of the building is entirely destroyed.—N. Y. Ex. Post, Ap 22, 1826. The wooden ship, built for the Colombian government, is launched from the ship-yard of Mr. Eckford.—N. Y. Ex. Post, Ap 22, 1826.

A resolution is passed to open 21st St. from Third Ave. to the Hudson River, and to close such part of Love Lane not lying within the bounds of 21st St.—M. G. C. (1784-1831), XV: 376; L. M. R. K., III: 1004. See also S 20.

The common council adopts a resolution that Avenues A, B, and C, from North to 14th St., be opened.—M. C. C. (1784-1831), XV: 376.

G. S. Silliman begins the publication of a new morning paper called The Times.—N. Y. Ex. Post, Ap 24, 1826. This was not the present Times that was begun in 1851 (q. v.).

The "New Exchange Buildings at the corner of Garden and William streets, owned by Messrs. Loeb and Deubler, are destroyed by fire. The building (or buildings) is described as an immense four story brick edifice covering eleven lots of ground." The post-office occupies "a wooden building in the immediate vicinity of the fire."—N. Y. Ex. Post, Ap 28 and 29, 1826.

The postmaster publishes a notice the same day that on Saturday, April 29, the post-office will be closed at 2 p. m., "in order to afford him an opportunity to remove to the new Exchange Garden St. where it will be opened on Sunday at 9 A. M."—Ibid.

"Mr. Rembrandt Peale has opened a room No. 34 Park next the corner of Beekman street, for the exhibition of the portraits recently painted by him."—N. Y. Ex. Post, Ap 29, 1826.

At a public meeting held at the City Hotel, called together by Mr. 17
THE ICONOGRAPHY OF MANHATTAN ISLAND

1826 Mayor Hone, resolutions are adopted that contributions be obtained, as a public concern, in behalf of Thomas Jefferson, who finds his patrimonial estate, and other property incumbered, and in danger of being alienated by the just claims of creditors. A committee is appointed to receive contributions, and with power to appoint a sub-committee to correspond throughout the state for the purpose.—N. T. Eve. Post, My 1, 1826.

A. C. Flagg, superintendent of common schools, reports to the common council that the apportionment to the city of money allowed by law for schools is $10,274.66.—M. C. G. (1784–1831), XV: 387.

The subject of appropriating ground at Corlears Hook for a park is again brought before the common council.—M. C. G. (1784–1831), XV: 387. See ibid., XIV: 244.

Castle Garden reopens after a short recess, during which “extensive additions, alterations, and improvements have been made. The interior of Corlear’s Slip is now a fanciful maze, tastefully ornamented with shrubs and flowers; the lower promenade exhibits a beautiful panoramic view, painted by celebrated artists, decorated with marble pedestals and busts, representing the four seasons of the year and the different quarters of the globe. The busts have been lately imported from Italy, and are works of celebrated sculptors. Elegant entrances have also been made into the saloon which will be opened for the convenience of the company.”—N. T. Eve. Post, My 1, 1826. See also ibid., My 18, 1825.

The city acquires by condemnation proceedings the land comprised in Jackson Square, at Horatio St., Eighth and Greenwich Aves. (6.227 acres)—Prendergast, Record of Real Estate. It was reserved as a public place about 1862.—L. M. K. III, 970.

Pearl St. is being widened and straightened. The removal of the ancient Knickerbocker edifice which has for nearly a century and a half obstructed itself far too much into the street.” The newspaper states editorially that this building was called the city hall about 100 years before.—Com. Adv., My 5, 1826. It will be seen, by reference to the item of March 14, 1700, in the Chronology, Vol. IV, that this building was erected upon the foundation of the former city hall. The upper portion of the original foundation still exists. Cf. Watson’s Annals of N. T. (1846), 370–51. Goodrich places the date of the widening of Pearl St., at Corneys Slip, in 1825.—Picture of N. T. (1828), 131. He refers, doubtless, to the order of Jan. 17, 1825 (p. 4), which required that the work be done.

Old buildings in Nassau St., opposite the “law building,” and a number of the wooden shops on Broadway, between Warren and Chambers Sts., are also being torn down.—Com. Adv., My 5, 1826.

The common council refers to the finance committee a petition of the Nat. Academy of the Arts for Design of a lease of the Rotunda.—M. C. G. (1784–1831), XV: 390. Organized on Jan. 19 (p. 5), it had opened its first exhibition on May 13 in a private room in Broadway, cor. of Reade St.; but by 1826 had secured “a splendid and beautiful exhibition room on the main building of the new building in Chambers-street, directly opposite the Academy of Arts, and over the Arcade Baths.”—Goodrich, Picture of N. T. (1828), 73–73; N. T. Eve. Post, My 15, 1826. For description of the Arcade Baths, see Goodrich, 425. Here a public exhibition was held yearly on May 1.—Ibid.; and see My 4, 1829.

The common council is informed that the portrait of William Paulding, late mayor, ordered on Jan. 16 to be painted by Samuel F. B. Morse and to be hung in the picture gallery in the city hall, is finished. It cost $122.—M. C. G. (1784–1831), XV: 152, 179, 391.

The common council orders that maps and drawings of all city property, with necessary explanations, be bound in atlas form, with key, and presented to each member of the board. The estimated cost is about $1,000.—M. C. G. (1784–1831), XV: 409.

The common council orders that the maps, plans, and surveys of the city and harbour now in the office of the street commissioner, be framed “in a substantial manner and properly varnished.”—M. C. G. (1784–1831), XV: 407.

Steam Carriage.—Mr. Stevens has at length put his steam carriage in motion. It travelled around the circle at the Paine Hotel yesterday, at the rate of about six miles an hour. . . . His engine and carriage weigh less than a ton, whereas those now in use in England weigh from eight to ten tons.—N. T. Eve. Post, My 12, 1826. Cf. Report on Steam Carriages, Doc. No. 101, Ho. of Reps. (1832). For first automobile in Am., see D 15, 1812.

The Roman Catholics open St. Mary’s Church on Sheffield St., May 14, the building having been purchased from the Presbyterians and fitted up for the Catholic liturgy. It was enlarged in 1829.—Shea, History of the Catholic Church in the U. S., III: 190. See 251.

National Academy of the Arts of Design.—The Artists of the City of New York having associated under the above title and established a School for the study of the antique [see Ja 19], will on Monday the 15th of May, open an exhibition of the Works of Living Artists, at the corner of Reede street and Broadway, opposite the Washington hall, in the room lately occupied by M. Boisieux as a dancing school. Entrance the 3d door of the front in Reed st.—N. T. Eve. Post, My 9, 1826; Cummings, Historic Annals of the Nat. Acad. of Design (1863), 1, 34. See Ap 5, 1828; O 8, 1830.

Some of the early annual catalogues of the Academy contain the titles of painting of N. Y. City views. These have been included in the Supplementary List of Prints, in Vol. III, pp. 973–18.

A very elegant model of a statue of General Hamilton, intended to be submitted to the committee of merchants of the New-York Exchange, is at present exhibited at the Coffee House in this city [Phil.]. It is pronounced by those who were acquainted with this illustrious man, an excellent likeness. The model is in miniature. The statue is intended to be eight feet high, and to be erected in a pedestal of porphyry. Hamilton is described by Mr. G. A. Gevetol, is advantageously known, from his works in the Capitol at Washington, and in the United States Bank Philadelphia.—N. T. Gan. & Gen. Adv., My 18, 1826, citing the Phila. Gan. Cf. Ap 20, and O 24, 1835.

A full description is published of “the arcade” to be erected on the north side of the block between 120 and 121 on Broadway, and extending through the block to John St.—N. T. Adv., III: 339; see also N. T. Eve. Post, My 16, 1826; and F 27, 1827.

The common council refers to the committee of arts and sciences, “with powers,” a letter of John J. Browere offering to prepare for the city a statue of Thomas Jefferson for the 45th of July next.—M. C. G. (1784–1831), XV: 418. He states that he possesses the “Stadt Hoff” portrait, the original letter, in metal file No. 100, city clerk’s record-room. See Adv. May 22.

Mozart’s opera “Don Giovanni” is produced in America for the first time, at the Park Theatre.—N. T. Eve. Post, My 22 and 23, 1826.

A meeting of citizens from various parts of the state is held at Washington Hall to consider “the subject of the establishment of Infant Schools for the children of the poor.” De Witt Clinton, chairman, explains “the valuable objects to be attained by the proposed charity.” And John Griscom reads an informal report “containing an account of the origin and success of Infant Schools as they exist in England, together with the result of a detailed examination into the state of the poor in the city of New York.” A committee is then appointed to report a suitable place for the establishment.—N. T. Eve. Post, Je 1, 1826.

The first parade of the National Guards as the Twenty-seventh [later known as the Seventh] Regiment” takes place, to receive the regimental standards from Mayor Hone.—Clark, Hist. of the Seventh Regt., I: 138, passim; Mrs. Lamb, Hist. of the City of N. Y., II: 752. Mayor Hone includes in his manuscript diary the “Address to be delivered at the Ceremony of the presentation of a new Standard to the Regiment of National Guards. May 31, 1826.” He says of this standard: “The Arms of the United States, of the State, and of the City are emblazoned on its rich, silken folds.”—Hone’s Diary (MS.), at N. Y. H. S.

In this month, E. W. Bridges made a map of Broadway from the Battery to Canal St. See the original (map No. 270) in bureau of topography, borough president’s office, municipal bldg.

The chief engineer, H. S. Cox, reports that the fire dept. is equipped with 46 fire-engines, 5 hook-and-ladder trucks, 1 hose-wagon, 10,566 feet of hose (good and bad), 255 fire-buckets, 28 ladders, and 30 hooks. There are 1,174 firemen, engineers, and fire-wardens, when the companies are recruited to full strength.—Hardie, Descrip. of the City of N. Y. (1827), 307–8.
The postmaster petitions the common council for a special watchman for the post-office under the "new Exchange" (the merchants exchange on Wall St.).—M. C. C. (1784-1831), XV: 448.

The superintendent of repairs is directed to have Bond St. numbered.—M. C. C. (1784-1831), XV: 448.

Chas. Bernhardt, Duke of Saxe-Weimar Eisenach, returns to New York (see 1825) after a tour of the United States. In his account of his visit here, he refers to visiting Aaron Burr, now a lawyer, whom he finds to be "a little old man, with very lively eyes, who spoke very well."

He describes an alarm of fire: "I had scarcely nominated the fire when the bells were rung, and fire cried in all the streets. In less than five minutes engines arrived, each drawn by about thirty people, by means of two long ropes. In New York numerous fire companies exist, among whom the different engines are divided. The members of these companies have voluntarily engaged themselves for this laborious service, and are relieved, in consequence from jury and military service. They wear a short frock at a fire, of coarse linen with a leathern belt, and a leathern hat with a number. As in many English cities, there are water pipes laid in the streets, with an inscription at the corner, how many feet distant is the opening. This has an iron cover to which each engine has a key, is brought near, and the water conveyed into it through a leathern hose."

"I went one evening to the Italian opera in the Park Theatre. This opera was established here last autumn, and is an attempt to transplant this exotic fruit to American ground. It does not, however, appear adapted to the taste of the public here; at least the speculation of the Italian theatre is not so profitable as was expected."

"As I heard that Governor Clinton was in the city, I hastened to pay him my respects, but did not find him at home; on this occasion I again saw how large the city was. The house where the governor lived is nearly two miles distant from the City Hotel, without being out of the city. I remarked that since last autumn three new churches have been built here, of which one, a presbyterian, was very tasteful; since this time also several houses had been erected in this quarter. The number of the inhabitants of the city increases exceedingly, it is now supposed to amount to one hundred and seventy thousand."

"To Castle-garden, on the battery, I went about seven o'clock in the evening. The tasteful illumination is effected by gas. A handsome and large saloon is also arranged here, where various refreshments may be obtained. A good orchestra played the whole evening, and rockets ascended from time to time. I was particularly pleased with the walk on the upper gallery, whence there is to be seen a beautiful view of Hudson river and bay. It was a moonlight evening; the water was calm, and a gentle wind from the sea, refreshed the sultry atmosphere in a very agreeable manner."

"The large building, the Exchange, to the left of the street, is 22 ft. high, and 150 ft. wide. A range of stone battlements terminates the front at the roof.—From Fay's Views in New York (1831), 44, 45, where a full description is given, citing the N. T. Mirror (4. v. S 26. 1829). See also Man. Com. Coun. (1836), 584. An engraving of the front elevation appears in Fay's work (pub. by Peabody & Co.), opp. p. 41. There is another, by A. J. Davis, in the Engrav. coll., item 11466; for references to other views, see L. M. R. K., III: 925 (and see illus. III: 954). See further, Ap 20, 1836."

The common council resolves that Gov. De Witt Clinton and former governor Jos. C. Yates he requested to sit for their portraits "at full length to be taken by American Artists at the selection of their Excellencies," to be placed in the galleries of portraits in the city hall, and that this be done under the direction of the committee on arts and sciences.—M. C. C. (1784-1831), XV: 498.

The common council grants a petition of Mr. Silliman, editor of the Times, that his paper may be published in the "Corporation Papers.—M. C. C. (1784-1831), XV: 491.

"Eliza Gellatly, newly appointed minister to the Court of St. James, sails with her wife and daughter from New York for London.—N. T. Eve. Post, Jl 1, 1826."

Caucius's statue of Washington is moved "from its former position in Elm street, through Broadway to the Park.—N. Y. Adv., Jl 7, 1826; and see June 22. On the following day it was raised highly.—N. Y. Gen. & Gen. Adv., Jl 3, 1826. See Pl. 100.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1826 Vol. III, showing the statue in position. See also O 27, 1825.
2 This statue was "but two thirds the size proposed to be executed in bronze."—N. Y. Evc. Post, Jl 7, 1826. The public was urged to erect a permanent statue to Washington in the Park.—Com. Adv., Jl 7, 1826.
4 This being the fiftieth anniversary of the Declaration of Independence, "extraordinary preparations" are made to celebrate it. "Hone's Diary (MS.)," at N. Y. Hist. Soc., containing certain addresses on this occasion. The festivities included elaborate civil and military parades, the formal dedication of the "Washington Military Parade Ground," a public feast to about 10,000 people, and celebrations at the various theatres, gardens, etc.—N. Y. Evc. Post, Jl 5-7, 1826; M. C. C. (1784-1831), XV: 440.

6 On the same day, the son of Robert Fulton was presented with a gold medal commemorating Fulton and Mayor Hone delivering the address. "There were but four of these medals struck; three have been sent to the surviving signers of the Declaration of Independence, and the fourth reserved for the son of him whose genius has added immense value to the benefits of internal navigation, and in effect united the Great Lakes to the city of New York."—Ibid., Jl 6, 1826; Callen's Memoir, 341. The mayor's MS. address to Fulton's family was sold with other Fulton MSS. and documents at Anderson's, April 26-27, 1821, by order of Mrs. A. T. Sutcliffe (item 129). Its substance is included in Hone's Diary (MS.), at N. Y. H. S.

By a remarkable coincidence, John Adams and Thomas Jefferson die on this day, the fiftieth anniversary of American independence; George Washington, Nassau Censure, 1826, 4.

10 The Lafayette Circus, in Laurens St. near Canal (see Jl 4, 1825), after "extensive alterations and repairs," reopens as a "regular Melo Dramatic Theatre," with the name Lafayette Theatre.

"A large and commodious Pit has been constructed (upon the site of the former Ring) with an elevation sufficient to command a perfect view of the largest Stage in this country."—N. Y. Evc. Post, Jl 3, 1826. See also Goodrich, Picture of N. Y., 181, and L. M. R. K., III: 584. The theatre was entirely rebuilt in 1827 (q.v., Aug 25).

"A stronger instance of the miscellaneous effects of monoply can hardly be conceived than that of the ferry between this city and Brooklyn. The prices of transportation of individuals, carriages and produce to market are four times as high as they would be, if other ways were permitted between the two places. The latter do not mean by this, however, to censure the proprietors; the prices are fixed by the legislature, and no more is demanded than the law allows. The whole blame rests upon the selfish spirit of the public authorities, who, for the sake of squeezing out of the lessees, and through them, out of the people, the highest possible revenue, executed a lease of the right of ferryage between the village of Brooklyn and the city of New York, south of Catherine street, about twelve years ago, to Robert Fulton, for the yearly rent of 4,000 dollars, for a period of twenty-five years. We are happy to hear, that, notwithstanding the sweeping terms of the lease, some flaw has been discovered by legal ingenuity, and that another ferry will probably be established between Pierpoint's dock and a convenient spot in this city."—N. Y. Evc. Post, Jl 7, 1826.

T. D. published in New York of the death of Thomas Jefferson on July 4, at the age of 83 years, three months, and two days. An editorial observes: "It was only yesterday that we were called upon to record the death of John Adams, on the same day, at the advanced age of ninety-two. The circumstances attending the death of these two venerable old men, both formerly Presidents of the United States, both signers of the Declaration of Independence, is called away on the same day, and that the fiftieth anniversary of the day when that instrument was signed— all form a coincidence, of which the world scarcely produces a parallel..."—N. Y. Evc. Post, Jl 8, 1826.

The common council holds a special meeting to make arrangements for honouring the memory of Adams and Jefferson. The following resolutions are adopted:

"Resolved, that the Common Council Chamber be put in mourning and that the members of the Common Council were grape on the left arm for the term of one Month.

"Resolved that the persons having charge of several Churches be requested to cause the bells to [be] tolled on Wednesday next [July 12] from 8 to 9 O Clock A.M. from 12 to 1 and from 6 to 7 P.M.

"Resolved that the flag upon the City Hall be hoisted half-mast on that day, and the owners and masters of Vessels in the harbour and the proprietors of public buildings he requested to have their colours hoisted at half-mast from sun rise to sun set on the same day.

"Resolved that Major General Morton be requested to give orders that minute guns be fired during the day at such place as he may appoint.

"Resolved that his Honor the Mayor request the United States Military and Naval commandants on this station to cooperate with this Board in their expression of respect for the memory of the deceased.

"Resolved, that the Rev'd Doc' Rowan be requested to deliver an address suited to the occasion in the Middle Dutch Church in Nassau street on the morning of Wednesday next, and that the members of the Common Council will assemble at the Common Council Chamber at half past nine O Clock in the morning of that day and walk in procession to the said Church and that the following persons be invited to assemble at the City Hall for the purpose of accompanying the Common Council Vis.

"The Reverend Clergy

"The Cinematists

"The Governor Lieutenant Governor and other State Officers

"The Judges of the United States, State and City Courts

"Members of the Senate and House of Representatives U.S.

"Members of the Senate and Assembly of the State

"Ministers and Consuls of Foreign Courts

"Officers of the Army and Navy of the United States

"Officers of the Militia

"Trustees and Faculty of Columbia College

"Citizens.

"Resolved, that it be respectfully recommended to our fellow citizens to abstain from business during the solemnities of the day.

"Resolved, that the Rev'd the Clergy of our City who have charge of Churches, be respectfully requested to notice in a solemn and appropriate manner in their respective Churches on the morning of Sunday the 16th Ins the remarkable dispensation of Divine Providence, which we experienced in the death of two of the Illustrious signers of the Declaration of our Independence on the Fiftieth Anniversary.

"Resolved that his Honor the Mayor be requested to communicate the preceding Resolutions to the families of the late Hon: John Adams and the Hon: Thomas Jefferson and to express the deep sense entertained by the Common Council of the exalted worth and eminent services of these illustrious individuals and that we sincerely sympathize on this melancholy occasion in the loss which they and our country have sustained.

"The first five Resolutions were adopted the remaining Resolutions were referred to the Committee appointed under the following Resolution

"Resolved that a Committee of Six be appointed to carry into effect the foregoing Resolutions and to adopt such other measures as they may deem expedient." Such committee was then appointed.—M. C. C. (1784-1831), XV: 507-57; Jl 8, 1826. See Jl 12, when the obsequies occurred. For replies sent by representatives of the families of the deceased, see Jl 5. See also Jl 14, 1828.

In accordance with the common council's resolutions, a procession and other ceremonies take place as a tribute to the memory of Adams and Jefferson. For the military orders, etc., see N. Y. Evc. Post, Jl 11; N. Y. Adv., Jl 14, 1828. See also Jl 4 and 8, and M. C. C. (1784-1831), XV: 524, 525-29. On the Sunday following (July 18) Rev. John Stanford, chaplain at Bellevue, gave a "Discourse upon the Death of Thomas Jefferson and John Adams" in the chapel of that institution; it was subsequently published and a copy is preserved in N. Y. P. L. At the request of the New York Lyceum of Natural History, Prof. Samuel L. Mitchill, on Oct 11, delivered "A Discourse on the Character and Services of Thomas Jefferson, more especially as a Promoter of Natural and Physical Science," also printed and preserved in N. Y. P. L.
The directors of the New York Water Works Co. hold a meeting and resolve that, "the application to the Legislature for additional powers for a prosecution of the works of the company having failed, the company determined therefore to dispose of the property they work at any time at this meeting; & having reason to believe that the stockholders desire a return of the monies paid on the shares held by them [see D 13, 1825]; and this Board having ascertained that the funds of the company will warrant a return of $8 to 99 per cent., books shall be opened at the Franklin Bank from July 17 to 27, when stockholders may signify their assent to a return of the money."—N. T. Econ. Post, J1 15, 1826. See also ibid., Ag 1, 10, 11, 1826. The company was dissolved in 1827 and its charter surrendered.—Man. Com. Coun. (1844), 218; Wegman, op. cit., 15.

The corporation counsel, to whom was referred the subject of the obstruction to navigation in the North and East Rivers during the spring and summer, caused by the great number of fish poles, reports that "nothing short of an efficient armed force" would be sufficient to remove them. The fishermen always have resisted any interference with their fishing preparations, and as it is impracticable to arrest and punish them, it becomes necessary to provide a vessel, with a sufficient number of hands, possibly armed, to remove these obstructions, and to prevent their being replaced.—M. C. (1824–1831), XV: 513–14. On Feb. 1, 1827, the board resolved to solicit the extension of the legislation to this evil.—Ibid., XVI: 71. On March 26, the counsel and the police committee were empowered to take any measures they might deem necessary to remove these harasses.—Ibid., XVI: 199. On April 9, the board referred to the law committee a resolution that the mayor present these grievances to the attention of the governor, and, if necessary, having the power to the governor and others of competent to remove the obstructions and restore the uninterrupted navigation of the Hudson River.—Ibid., XVI: 222–23.

The common council appoints a committee to "enquire into the expediency and necessity of connecting the Waters of the Hudson & East Rivers by a Canal across the Island and that if deemed expedient and necessary that they report . . . a suitable design of the proper size and General which would best comport for the public good and least expensive to those concerned."—M. C. (1824–1831), XV: 520.

The governors of the New York Hospital "are fitting up the old Lunatic Asylum as a Marine Hospital, and are furnishing it with every convenience and accommodation which can contribute to this object. The old Lunatic Asylum has not been occupied for its original purposes since the erection of the new one at Bloomingdale."—N. T. Econ. Post, J1 25, 1826. The old lunatic asylum was erected in 1806–8 on the southern part of the hospital grounds.—Account of N. T. Hospital, 6, 10. See 1828.

Mayor Hone lays before the common council the letters addressed to (see JI 8) and replies received from "the representatives of the various Art Societies and Theatres" the board orders that they be entered in the minutes and published in the newspapers. They are entered in full under this date, the former being written by the mayor himself. It appears that Adams and Jefferson, before their death, were two of only three survivors of the signers of the Declaration of Independence. The reply on behalf of the Adams family is signed by John Quincy Adams, the original MS. is preserved in file No. 101, city clerk's record room, and has been reproduced in the printed minutes cited below. Hone's letter to the Jefferson family is addressed to Thomas Mann Randolph. It points out that Jefferson (the "venerable author" who "penned" the Declaration) died on the fiftieth anniversary of the day when it was signed, and at the very time when the American people were engaged in repeating it with enthusiasm. His letter also contains this paragraph:

"In a letter written by Mr Jefferson shortly before his decease, to the Committee of Arrangements for the 4th of July (and which will be preserved as a precious relic) he expressed his thanks to Providence for the preservation of the lives of the three surviving signers of the Declaration "a favor (to use his own words) so much the more valuable in that it has enabled him to enjoy the pleasant prospect of seeing the object of his life accomplished." He added: 'I have always been careful to witness the wisdom of the choice then made, between submission and resistance. His pious wish was accomplished, he lived to see the return of that auspicious day; . . ."

Randolph’s long reply is a remarkable description of Jefferson’s personality and character. He says, in part: "I cannot refrain from congratulating the Common Council on their being the first to call the attention of the instructors of the people in religion, to the miraculous Euthanasia of these two venerable Patriots—Few of the miracles recorded in the sacred writings are more gratifying. He who can thus speak of describing Jefferson’s vitality. An eminent doctor, at 8 p.m. on July 3, pronounced that he might be expected to cease to live, every quarter of an hour from that time Yet he lived seventeen hours longer without any evident pain . . . His desire to live and see the midday of the fourth of July, was wonderfully fulfilled contrary to the expectation of almost all around him . . ."—M. C. (1824–1831), XV: 525–29. Also see A Selection of Eulogies in Honor of John Adams and Jefferson (Hartford, 1826).

Broadway is being repaved, and a law is passed extending the sidewalks to 19 ft. in width.—M. C. (1824–1831), XV: 538–39. See also N. T. Econ. Post, Ag 24, 1826.

The common council adopts resolutions to open 10th St. from Broadway to Sixth Ave., and 14th St. from the Bowery to the East River.—M. C. (1824–1831), XV: 542.

The market-house at Gouverneur St. (south-west of Corliss’s Hall)—L. R. K., III: 995, 1001—is closed and unfit for use. The common council orders that a new market be erected at Gouverneur Slip under the direction of the market committee.—M. C. (1824–1831), XV: 545. It was finished in Jan., 1827.—De Voe, 405; L. R. K., III: 990. See 1827.

"The shaft of one of the four marble columns intended for the new building now erected in this city, has arrived and is lying in Wall street. It is twenty eight feet and a half in length, and eleven feet two inches and a half in circumference at one end, and ten feet seven inches and a half at the other. It is estimated to weigh twenty or six tons, and was hewn in the quarries at East Chester out of an entire piece of rock. When raised, these columns will be, we believe, the largest that ornament any building in the United States."—N. T. Econ. Post, Ag 3, 1826. See also ibid., O to and 11, 1826.

The common council requests a committee to inquire into the expediency of placing in the city hall a clock, or chronometer, by means of the clocks in the various public and other public places shall be regulated.—M. C. (1824–1831), XV: 561. See My 9, 1828.

"Between Aug. 6 and 11, a Virginia lady, visiting New York, recorded in her diary her observations and impressions regarding various points of interest, including the city hall, museum, Academy of Fine Arts, Rotunda (where the panorama of Athens was on display), Castle Garden, Grant Thornbur’s store, the Italian opera, and Robertson’s attempted balloon ascent at Castle Garden on Aug. 10. See Am. Mag. of Art, IX: 65–68 (Dec., 1817). As the proprietors of the Park Theatre are about to have the interior repainted, refitted, and repaired, it is much to be wished, that for their cracked and dingy old lamps, they would substitute the brilliant, pure, and ethereal gas-lights . . . There may be some objection to the use of Alkali in this regard; but we are ignorant: the Lafayette Theatre, however, is lighted with it, and we have never heard of its occasioning any difficulty or inconvenience."—N. T. Econ. Post, Ag 8, 1826. The interior of the theatre was "entirely repainted and ornamented, by Messrs. Reingale, Evers, T. Remable, Serra, and a new Drop Curtain painted by J. H. Wilkins."—Ibid., Ag 24, 1826. See also ibid., S, 1826.

"The New York Historical Society have just completed the publication of the continuation of the History of New York, by the late Chief Justice Smith; and the work, as we are informed, will be offered to the reading community within a few days. The first part of this work has been long known; it constitutes a valuable portion of our colonial story; the sequel being the narrative of events down to 1826; and, in it, the author makes no inconceivable figure in many transactions."—N. T. Econ. Post, Ag 12, 1826. See 1829.

An ornamental iron railing is being erected around the Battery.—N. T. Mirror, IV: 23, 87. See O 7.

Nearly the whole edition of C. D. Colman’s Memoir of the Canal Celebrations has been presented by the Corporation to their invited guests."—Ibid.

The statue of "Justice" on top of the cupola of the city hall, which has stood for 16 years (see My 26, 1803), is being repaired and beautified (see Ag 4). A writer recommends that "the ponderous steelyards which the artist put into her hands by mistake, be exchanged for her legitimate instrument—the balance."—
Com. Adv., Ag 17, 1826; and descrip. of Pl. 97, Illus.: 87. This description of the figure seems to accord with the original design (as shown in the New N. Y. Hist. Soc.) in which a steeple is shown. Cfr. the design of the figure shown in the view of the city hall during the display of fireworks on Nov. 4, 1825, in Colton’s Memoir (of the Canal celebration), opp. p. 269; and see an article by Wilde in the Century Mag. for May, 1884, together with the description of Pl. 55, Vol. I.

17. William Morgan, this city, has invented a new Printing Press, which will cast two thousand sheets per hour.”—N. Y. Eve. Post, Sept. 19, 1826.

In this month, The Christian Advocate, the official organ of the—Methodist Episcopal Church, was established in this city; it still survives.—King’s Handbook of N. Y. (1861), 695; North, Newspaper & Periodical Press, 54. So much is abjected at Canandaigua, presumably by freemasons whose secrets he threatened to publish. On Sept. 14, he is said to have been placed in Fort Niagara, but after that no trace of him ever appeared. This episode caused intense and widespread excitement and resulted in strong anti-Masonic feeling. —McMaster, Hist. of the People of the U. S., V: 109 et seq.

We received this morning the first number of a new paper established at Yorkville, on Harlem Heights, about five miles from the City Hall. The 3rd Avenue passes through the village. Twelve months ago there were not more than two or three buildings on the barren rock, where there are now upwards of sixty, some of them built in a good substantial manner of brick. . . . There are already several extensive factories established in the village, which company has been erected, and spacious church is going up, which, when finished, will be an ornament to the place. . . . A fire company is formed at Yorkville, and yesterday the Corporation delivered to their charge a very elegant engine. And it gives us pleasure to find that the Harlem Spring Water Company have commenced their operations in that village.”—N. Y. Eve. Post, S 13, 1826.

An assessment is levied for opening 21st St. from Third Ave. to the North River; and for closing that part of Love Lane or Abingdon Road from the Bloomingdale Road to the Fitzroy Road, not required for opening 21st St.—N. Y. Gaz. & Gen. Adv., S 21, 1826. See Ap 24.

25. William Charles Macready, the actor, arrives from London. He records in his diary: “. . . a very neat carriage, that might have put to shame the hackney-coaches of London, came to take us to our new residence, a well-furnished and comfortable suite in an hotel looking on the park, an open space of some extent planted with trees, having the City Hall, the Park Theatre, and some good houses on the different sides of it . . . the line of Broadway had its utmost limit in Canal Street. . . .”

Capit. public building at that time was the City Hall, in which the courts of justice were held. A trial of great interest, the State’s prosecution of some bubble companies, gave occasion to Thomas Addis Emmett, who was retained in the defence, . . . and it was with admiration and rapt delight I listened to the energetic accents of “the old man eloquent.” On leaving the court we passed through the vaulted passages underneath. A solitary figure was slowly dragging his steps along, close to the wall; he was below the middle size, dressed in a light grey-coloured suit, which, with his pale complexion, gave him in his loneliness somewhat of a ghostly appearance. When we had passed him, one of my friends in a significant whisper asked me if I knew who that was. On my replying in the negative, he told me he was Colonel Birrell, who shot Hamilton the Secretary of State (sic), and who had been under prosecution for high treason. He looked a mysterious shadow of unrepented evil . . .

“Having to wait the ferry-boat’s return to cross the Hudson, we occupied the half hour’s delay in visiting the new streets at the rear of the Exchange, and in admiring the structure of that marble building. On our return, in passing down William Street, we were stopped by an apparatus of heavy framework of timber with large screeches laid across the street. Our inquiries were soon satisfied in learning that these preparations were for pushing from their original site, to a foundation built for their reception ten yards behind, two large brick houses. They had been moved part of the way along the soaped beams the previous night, and with so little agitation or disturbance that a cup of milk on the dining-room chimney-piece of one did not spill a drop in its journey! The whole distance was completed in a few days . . . Our wonder was not participated in by the citizens of New York, to whom a more extraordinary removal of a brick house some time before had familiarised the present experiment. That building was not only moved from the foundation on which it originally stood, but was actually let down upon another some feet below its original basement . . . A new theatre in the Bowery, a low quarter of the city, was opened during my sojourn in New York. It was handsome and commodious; but its location was an objection inapplicable to the fashion of the place.” Here Macready describes the personal appearance and acting of Edwin Forrest, then only about twenty-one years old, and a favourite of the “Bowery lads.”—Macready’s Reminiscences (N. Y., 1875), 239-41. Regarding Macready, see also N. Y. Eve. Post, S 30, 1826.

The iron railing (see Ag 12) which will soon be completed around the Battery, will have a large ornamental gate at the entrance from Broadway. It was “found necessary to cut down the row of trees which stood near the wooden fence.”—N. Y. Mirror, Ag 12 and O 7, 1826; N. Y. Gen. & Gen. Adv., Mr 14, 1826. See N 20.

The “New Circus,” a building 75 by 100 ft., is nearly roofed. It stands at the end of East Broadway near the East River. “When finished, it will comprise a capacious ring, large pit, two circles of boxes, and a commodious gallery; besides a stage and scenery for the performance of farces, ballets, &c. It is a substantial building, will be of brick,” and is expected to hold 7,000 persons.—N. T. Mirror, O 7, 1826. See also N Y. Eve. Post, S 56, 1826. See N 8.

“A petition of the Merchants Exchange Company to occupy a part of Wall Street during the time necessary to erect the columns in front of the Building was read and referred to the Alderman and Assistant of the first Ward and the street commissioner with power.”—M. C. C. (1826-1831), XV: 618.

A committee reports to the common council that, by a law passed March 21, 1823, a board of health was appointed, but “our Ordinances, as such, expire in three years, And the Question is presented—Whether there is any Board of Health since the 12th of May 1826” (q. v.). The board therefore resolves that the persons holding the offices of mayor, recorder, and aldermen of the city of New York, for the time being, and their successors in office, respectively, shall constitute the board of health.—M. C. C. (1824-1831), XVI: 6-8-29.

Robertson, the balloonist, accompanied by a woman, makes his last ascension from Castle Garden previous to his departure for Mexico. The balloon is surrounded by four smaller ones, and is watched by about 50,000 people. They landed at Union, a small village near Elizabethown, N. J. After being removed, 1826, May 16.

See also Essais sur les voyages aeriens d’Eugene Robertson en Europe, aux Etats-Unis d’Amérique et aux Antilles, suivis d’Observations sur les courses de chevaux libres dts Barberi, by Eugène Roch (Paris, 1831), containing a view of Robertson’s ascent from Castle Garden. As described (with reproduction of the view) in Cat. No. 357 of Maggs Bros., London (item 2683), this plate, a lithograph by Eugène also, was unknown to Tissandier, the French authority on aeronautics.

“The Tompkins’ Blues,” a corps of citizen soldiers, is forming. —N. Y. Mirror, IV: 105. It was afterwards called the “Light Guard.”—Witmore, Hist. of the 71st Regt. (1886), 1; Chas. S. Clark in The Eve. Post, P 26, 1916. Cf. 1819, Feb. 15, to the Secretary of State (see Je 17), opens with “The Road to Ruin and Raising the Wind.” The prize poem, written by Grenville Mellen of Portland, Me., is spoken by Mr. Barrett. The theatre “is fitted up with a good deal of elegance and taste, and with great attention to convenience. There are four rows of boxes, and the seats in the pit are provided with backs. It is thought the building will accommodate nearly 3000 spectators.”—The New York Times, and see also ibid., O 6, 1826.

The common council orders that the name of Banker St. be changed to Madison St.—M. C. C. (1824-1831), XV: 642.

The common council directs the police committee to report on the propriety of discontinuing the use of the tread-mill in certain cases, and resolves that until such report is made no female be placed upon it under any pretence whatever.—M. C. C. (1824-1831), XV: 662. See also 1824, and Aug 18, 1824.
CHARTER OF NEW YORK UNIVERSITY; DATED APRIL 18, 1831. SEE P. 1701.
The common council refers to a committee the subject of a Nov.

20 change in the method of caring for the poor of the city and county
of New York; by substituting for the present almshouse the
place of a public farm, bordering on the shores of one of the rivers,
in which the labour of the paupers may be made productive, if
not wholly to support the establishment: also by connecting with
this a small steamboat and a number of scows to carry the
garbage of the city to the farm, take stray animals found roaming
our streets to designated places, and bring back to the city markets
any surplus produce.—M. C. G. (1784-1831), XV: 700.

27 The common council resolves to apply to the legislature to
repeal the act passed on April 10, 1823 (§ 5), which provided
for the permanent regulation of certain streets in the city, including
the section lying between North and 14th St., the Bowery,
and East River, and to apply for the passage of a substitute act to
regulate that section of the city in accordance with a report,
received on this day, from City Surveyor Edw. Doughty. The
whole subject is referred to a committee.—M. C. G. (1784-1831),
XV: 705-7. See, further, F 12, 1827.

Mrs. Knight, formerly Miss Povey, appears at the Park Theatre
as Foretta in the English opera "Cabinet."—N. Y. Eve. Post,
N 28 and D 1, 1826.

1 The common council resolves to cause a monument to be

4 Dec. placed over the Peckskill grave of John Paulding, one of the

3 of the British army. The cost is not to exceed $100.—M. C. G. (1784-1831), XV: 722.

2 The board passed a law to this effect.—Ibid., XVI: 745. Cf. Ibid., XVI: 31-32.

The common council orders that the name of Arundel St. be

17 changed to Clinton St.—M. C. G. (1784-1831), XV: 720.

A second Unitarian Church is opened, Rev. Dr. Channing, of

18 Boston, preaching the sermon. This church stood on Prince St.,

23 a little west of Broadway. For description and view of it, see N. Y. Mirror, VII: 90 (Feb. 22, 1829). It was a brick edifice,

28 covered with white cement in imitation of marble, in the "Doric Style," etc.—Ibid., XVII: 9, 13, 15. Another view of it is in the

24 Natural History of New York, II, 1821, 1821, 116, 117, 118, 119, 120, 121 [sic].

29 The congregation was a colony which came from the Unitarian

30 Church in Chambers St. The edifice was destroyed by fire on

34 Nov. 26, 1837 (p. 4).—Greenleaf, Hist. of the Churches, 376; N. Y.

36 Eve. Post, D 4, 1826. The next edifice was called "The Church of the

39 Messiah," a name that is still retained.—See My 1, 1839.

The common council refers to the finance committee a petition

5 from N. Bangs and I. Emory stating that "the building No. 14

6 Crosby street is a public Institution of the Methodist Episcopal

7 Church used for the publication of Religious Books and as such

18 in their opinion not liable to taxation;" that it has lately been

33 assessed, and they seek relief.—M. C. G. (1784-1831), XV: 738.

28 This publishing-house appears to have been the Methodist

18 Concern of to-day, which began business in 1779.—See also King's

18 Handbook of N. Y. (1853), 408.

The common council orders that Washington Parade Ground

18 shall include the whole block bounded by 6th, 4th, Wooster,

31 and McDougall Sts., and that the whole square shall "be and remain

36 a Public square or Park, called and known as "Washington's

20 Parade." It is resolved to take necessary steps to effect this object

18 at the earliest possible moment, at an expense not to exceed

30 $2,000.—M. C. G. (1784-1831), XV: 748-49. See F 27, 1826.

This is the copyright date of the Wall view of the city hall,

20 the most important and beautiful engraved view of the city hall

known. For reproduction and description, see Pl. 97, III: 356-59.
1826

Gen. William Paulding is again chosen mayor by the common council, succeeding Philip Hone. He was inducted into office on Jan. 25. See Vol. C. (1875-81), XV: 770-71; XVI: 1.

Paulding served until Dec. 29, 1828 (q.v.), when he was succeeded by Walter Bowne. For brief sketch of Paulding's life, see Man. Com. Coun. (1853), 421.

1827

— According to Harrison, in his Hist. of Photography, 15-16, and the Encyc. Brit., XXI: 486, Nicéphore Niepce, in this year, made the first permanent photograph. He had been experimenting for many years, and some of the best authorities is said to have been successful as early as 1822.—N. Y. Times, Je 27, Jl 19, 1925.

Owing to disagreement as to the real date of its origin, the centennial of this science and art was celebrated in 1855. See, further, A. G. 1819, and Scientific American, Je 5, 1915.

— From this year until 1836, an anti-Masonic movement spread throughout the United States, from which there sprang a very extensive literature, embodied in the reports of conventions, and other works.—See the card-index, N. Y. P. L., under the title "Freemasonry."

— In this year was published Laws of the state of New-York, relating particularly to the city of New-York, published by the authority of the corporation of the said city.—See copy in the N. Y. P. L.

The number of deaths in New York in this year was 5,181, the largest number recorded up to this time, due to the increase in population. For comparative annual statistics on this subject, see Goodrich, Picture of N. Y. (1818), 176.

— At this time, there existed in New York a gentlemen's social club called "The Lunch," of which J. Fenimore Cooper was a member.—Correspondence of J. Fenimore-Cooper, by his grandson (1822), I: 50, 56, 58, 105-9, 118, 132, 133, 166, 655.

— The first hardware store to deal mainly in American goods is said to have been opened at New York in this year. "At this time a very large part of the tools and builders' hardware used in this country came from Great Britain."—Clark, Hist. of Manufactures in the U. S. 1607-1860, 324.

— In this year, was found, in Jacob St., a mineral spring of a depth of 128 ft., when boring for pure water where there was formerly a swamp or pond. It was given the name of "Jacob's Well."—Goodrich, Picture of N. Y. (1828), 135. See S 10.

— In this year was published A Description of the American Marine Railway, as constructed at New York, by Mr. John Thomas. To which is annexed, the report of the Committee of Inventions of the Franklin Institute (Phila., 1827). This work, which contains engraved plates, is now extremely scarce.

— In this year was published The Description of the City of New-York; containing its population, institutions, commerce, manufactures, charities, libraries, churches, hospitals, courts of justice, places of amusement, &c. To which is prefixed, a brief account of its first settlement by the Dutch, in the year 1625; and of the most remarkable events which have occurred in its history, from that to the present period, by James Hardie, A. M. (printed and pub'd by Samuel Marks). It was a posthumous work, the name of the "Finisher" who signed the preface being withheld.

The remarks and statistics on New York's population, the extensive account of the churches, the markets, and prisons; an alphabetical list of streets, each briefly described; the college library and others; the public schools; the art, literary, historical, and scientific societies; the institutions which conserve the health of the city; the benevolent and religious societies; the city's government, and its trade, commerce and manufactures are all quite fully treated by history, description, and statistics.

— In this year, "Delmonico opened his capacious and splendid establishment on the corner of South William and Beaver streets." This building was destroyed in the great conflagration of 1835 (q.v.), and came very near being again destroyed during the fire of July 1835 (q.v.). In 1846 it was called "a very fashionable restaurant to French and Germans."—A Picture of New-York in 1846, St. Philip Hone described it in 1819—Hone's Diary, I: 25. See also L. M. R. K., III: 977-78.

— In this year, the Adelphi Hotel, cor. Broadway and Beaver St., was erected.—Man. Com. Coun. (1865), 523. It was described as a "brick edifice, stuccoed, of six stories in height, possessing elegant and spacious accommodations."—Goodrich Picture of N. Y. (1828), 397.

In this year, the Northern Dispensary, at the corner of Chris-
topher St. and Wateravy Place, was founded.—N. Y. T. As It Is, 1839, p. 63. See Mr 22 and O 18, 1830.

About this year, the old Tea Water Pump (L. M. R. K., III: 976) was filled up.—Thornburn, Reminiscences (1845). See also descript. of P. 14-14, III: 873. See, further, 1846.

— In this year, a house at the corner of Pearl St. and Old Slip, marked "1802," was taken down. It was one of the very few houses of Dutch architecture, having stepped gable ends to the street, which still remained in New York. At about the same time, another, marked "1701," on the north-east side of Coenties Slip, was taken down. On the opposite corner was one marked "1689."—Watson's Annals of N. Y. (1846), 350-51; cf., however, N. Y. 5, 1825.

One of the houses here referred to as taken down in 1827 again appeared in the map and directory of 1829 and 1830, on the corner of Pearl St. and Coenties Slip. In the Leisler rebellion, a shot fired from the fort at the city hall, at the head of Coenties Slip, lodged in Queen's house. The ball was found in the wall when the house was demolished.—Reminiscences of Grant Thorburn, 213; also the recollections of one Jacob Tabele, cited in Watson's Annals, 176.

— In this year, "Numerous valuable stores and offices were erected in Garden-street and Exchange-street, and the names of Sloat-lane [see D 23, 1825] and Garden-street [see S 24] abolished."—Goodrich, Picture of N. Y. (1828), 134.

— In this year, the post-office was removed to the basement of the new merchants exchange, and occupied two-thirds of the south-east portion of the building on the Garden St. side, which is now Exchange Place.—Man. Com. Coun. (1865), 659; Goodrich, Picture of N. Y. (1828), 208; Hist. of Manufactures (1828).

In this year, the vestry of Trinity Church stipulated with the owners of the 64 lots of land adjacent to Hudson Square (St. John's Park), on its four sides, that the park should remain forever open for the recreation and resort of those owners; reserving, however, the right to the Church, with the consent of the owners of two-thirds of the lots, to sell and dispose of the lands constituting the parks.—N. Y. T. As It Is, 1833, p. 179. See also descript. of Pl. 106-6, Vol. III; L. M. R. K., III: 971; Hist. of Trinity Ch., IV: 525-37; Goodrich's Picture of N. Y. (1828), 459. See, further, Je 7.

Since 1812, the Elgin Botanic Garden has been "almost entirely neglected." When it belonged to Dr. Hosach, prior to that year (in which it was sold to the state), it was considered "by far the best botanical garden in the United States."—Hardie, Description of the City of N. Y. (1827), 146.

In this year, the name Le Roy Place was given to that part of Bleecker St. lying between Mercer and Greene Sts.—See descript. of Pl. 102-3, III: 604; and account of the Peabody Views, 1831.

In widening Nassau St., six vaults, which were part of the former Dutch, German, and French, were discovered, places of amusement, &c. These were removed, in the same year, Liberty St. was opened and the church and private vaults of this church were cut through and the remains of the dead removed.—Doc. 76, Bd. of Ald., F 4, 1833.

In this year, surveys were made of the water front of the Hudson River as far north as 42d St. and of the East River to 145th St. From these, six volumes of manuscript maps were made by Daniel Ewen, and two volumes by Shaw. These maps or surveys show also, on alternate pages, for a portion of the distance, the names of old owners compiled from original deeds, etc.—See these volumes in bureau of topography, borough president's office.

For view and descript. of the Park and its surroundings in 1827, see Pl. 100, III: 501-3.

For a view of the Lafayette Theatre, 1827, see lithograph, drawn by A. J. Davis, in Eno collection, in N. Y. P. L.

For view of Five Points, 1827, see Man. Com. Coun. (1853), 112.

In this year, the Fulton Ferry boat "WM Cutting" was built. For view of it, see ibid. (1853), 605. See also 1836 and 1840.

The dry-goods house of Arnold Constable & Co. was founded in this year by A. Arnold on Canal St., just west of Mercer St. For the development of the business, changes in location, etc., see King's Handbook (1893), 847-48. The firm occupied its up-town place of business, at the s. w. cor. of Broadway and 19th St, in 1869, and soon afterward acquired the north half of the block, including the Fifth Ave. front. See view in King, 845. In 1915, it occupied its new building on the site of the Vanderbilt residence, at the s. e. cor. of Fifth Ave. and 40th St.

Hone enters in this diary the text of his "Address delivered to
The common council requests ex-Mayor Hope to sit for his portrait "to be placed in the Gallery of Portraits of the Common Council."—M. C. C. (1784-1831), XVI: 3. See J1 16.

A visitor in America writes to an acquaintance in Dublin: "...The beauty of Broadway is marred by the air of gothic heaviness, which prevails like darkness visible, in the details of the edifices. Though the walls are generally composed of a very neat small brick, yet the windows, doors, and roofs, are not in uniformity with the fineness of the material, for they exhibit a clumsy plainness; and what appears still more tasteless and awkward, all the houses have dormitory windows in a long roof. Broadway opens a grand thorough-fare through the city..."

The Episcopalian church of St. John, situated in one of the most beautiful squares in the city, must be admitted as a chaste specimen of Ionic architecture. St. John's square is a miniature picture of Merrion square in Dublin. It is the most fashionable residence in the city."

The N. Y. Society Library, the "most ancient public library in the State," is the "third for size and value in the United States; being inferior only to those of Cambridge and Philadelphia."

It now possesses above 18,000 volumes, many of which are of the most rare and valuable description."—N. Y. Evc. Post, J1 13, 1827.

The smallest has so spread that the common council directs the physicians of the city dispensary to call at every house in the city and vaccinate every person who will submit to the operation.—M. C. C. (1784-1831), XVI: 21; and see ibid., XVI: 738; XV: 10. See also N. Y. Evc. Post, J1 20, F1 13, 1827.

The legislature incorporates the "Neptune Co. of New York," the purpose of which is to raise sunk vessels, to assist stranded vessels, and to remove obstructions in the East or Hudson Rivers or elsewhere.—Laws of N. T. (1827), chap. 19.

A bill having been introduced in the state legislature by Gen. McClure "to take off the tax upon dogs, and to lay it upon bachelors," several thousand bachelors meet at the National Hotel and adopt resolutions protesting against it.—N. Y. Evc. Post, J1 27, 1827.

The common council approves a resolution that the ground bounded by 6th St. on the north-east, Wooster St. on the south-east, 4th St. on the south-west, and "McDougal" St. on the north-west, be appropriated for a public place (the present Washington Square); and that application be made to the supreme court to have Thompson St. from 4th to 6th St. and so much of 5th St. as is opened between "McDougal" and Wooster Sts. (the extension of the present Washington Place through the Square) discontinued.—M. C. C. (1784-1831), XVI: 48-50; L. M. R. K., III: 972. See N 5.

The common council appropriates the triangular piece of ground between Spring, West, Washington, and Canal Sts. for a public park, to be used as a cemetery and for a public market. The present market, the old market in Spring St. (see My 4, 1829) between Greenwich and Washington Sts. be discontinued.—M. C. C. (1784-1831), XVI: 52-54. See Ap 11; D 8, 1828.

The common council resolves that Lafayette Place be extended to 8th St.—M. C. C. (1784-1831), XVI: 55. See Ap 14.

The common council orders that a street 50 ft. wide be opened through the grounds of Mrs. Bethune and Mrs. Ludlow, commencing at Greenwich St. and extending to West St., and that it be known as Bethune St.; also that a street 60 ft. wide be opened and extended through the grounds of Mrs. Ludlow, parallel to Bethune St. and 170 ft. north from Greenwich St. and extending to West St., and that this street be known as Troy St.—M. C. C. (1784-1831), XVI: 56-57; L. M. R. K., III: 994, 1010.

A committee reports to the common council that both the committee and grand jury unite in reprobating Lotteries as having "a pernicious effect upon Society" and that it is greatly to be desired that the time should arrive when the provisions of the Constitution, on this point shall have full effect and there shall be no more Lotteries in this State."—M. C. C. (1784-1831), XVI: 70.

The common council decides to have two gas lamps made and suspended over the columns of the Park gates at the junction of Broadway and Chatham St about the north and south of the Bowling Green.—M. C. C. (1784-1831), XVI: 79.

In a report to the common council, the committee of Nov. 27, 1826 (p. v.), states that, by the city charter, the common council possesses power to direct the making and laying out of streets, lanes, and alleys, to alter and repair them; and that the legislature limited this power by statute on April 10, 1823. At the present time, this law seems neither fair, nor satisfactory. The board resolves to apply to the legislature for a repeal of this law, but at the same time to legalize the proceedings concerning the regulating of streets south of 14th St. and west of The Bowery under the act of 1823, as that work has already been begun.—M. C. C. (1784-1831), XVI: 106-8. The proceedings on this subject were published in a separate pamphlet, a copy of which is owned by the N. Y. H. S.

The Chamber of Commerce resolves to address a memorial to congress protesting against a tariff bill now before the senate, which "does, under the guise of merely altering duties on imports, establish a prohibition of the importation of many articles of woolen goods, which are essential in this climate to the health and comfort of great numbers of our citizens."—N. Y. Evc. Post, F1 14, 1827. See also ibid., F1 15, 1827. The memorial was printed in ibid., F1 16, 1827.

"There have been built in the different ship yards in this city, the last twelve months—23 ships, 3 brigs, 49 schooners, 68 sloops, 12 steam boats, 15 tow boats, and 19 canal boats making 29,137 tons."—N. Y. Evc. Post, F1 17, 1827.

A public hall is held at the Park Theatre in aid of the Greeks.—N. Y. Evc. Post, F1 23, 1827.

The old watch-house and lot at Chatham Square are sold by the corporation.—Com. Ady., F1 23, 1827. They brought $8,025. The dimensions of the lot were 26 ft. 4 in. on Chatham St., 14 ft. 2 in. on the Bowery, 20 ft. 1 in. on Catherine St., and 31 ft. 11 in. on the rear.—Goodrich, Picture of N. Y. (1826), 135; N. Y. Evc. Post, F1 23, 1827.

The common council grants a petition that a street 30 ft. wide between Duane and Jay Sts., and between Washington and West Sts., which was reserved as a street or way by an agreement entered into between the corporation of New York City and that of Trinity Church in 1794, and which has been used as a public street for nearly 30 years, be left open and remain as at present; and the board passes a resolution for regulating and paving it.—M. C. C. (1784-1831), XVI: 129-21.

The common council resolves to open 14th St. from The Bowery to the East River.—M. C. C. (1784-1831), XVI: 128.

The common council instructs a committee to look into the practicability of building, around the wings of the city hall, a wide area enclosed by a light iron railing.—M. C. C. (1784-1831), XVI: 130. The present area and railing seem to answer this description.

A resolution is passed by the common council for numbering the houses in Elizabeth St.—M. C. C. (1784-1831), XVI: 130.

The public gravity of the quarry of granite at the quarries not superior to the granite of this island, of beauty and quality to the Boston granite, has recently been discovered on this island, on land belonging to John J. Astor, about two and a half miles from the City Hall. Specimens have been broken out and subjected to the operation of the tool, and found to work well. The quarry is extensive and will afford any quantity that may be required for building uses."—N. Y. Evc. Post, F1 27, 1827.

"The Arcade [see My 20, 1826].—The workmen are about
... as the walks and cross-walks with which the park has long been surrounded and intersected, were not enough in all conscience, some new diagonal walks have been cut, and a huge turnpike constructed leading direct from the lower gates to the steps of the City Hall. The bed of this road is made of lime and sand and broken brick bats, covered with a coarse gravel. . . .

—Com. Adv., Mr. 25, 1827.

The legislature passes an act "to provide for the building an Asylum for the Deaf and Dumb in the City of New-York." It appropriates $10,000 for the erection of the asylum in New York or Brooklyn, provided the directors of the Institution for the Deaf and Dumb raise the same amount for the same purpose.—Laws of N. Y. (1827), chap. 97. See J. 4.

The common council reserves, for a public market-place, the ground bounded by Goerck, Kivlington, Stanton, and Mianing Sts., and authorizes the market committee to erect a market-house there, at an expense not exceeding $2,000.—M. C. C. (1784-1831), XVI: 172-73. See S. 10.

The common council resolves "that it be referred to the Committee on the Jail and Bridewell to enquire into the expediency and propriety of removing the Jail and Bridewell and clearing the Park and circum-adjacent grounds of the existing incumbrances."—Laws of N. Y. (1827), chap. 186; ibid., chap. 149. See D. 7.

The legislature incorporates the "Manhattanville Free School" in the Twelfth Ward.—Laws of N. Y. (1827), chap. 132.

The legislature incorporates the trustees of the "Yorkville School," in the Twelfth Ward. This is a village school in the section formerly known as the Harlem Common Lands.—Laws of N. Y. (1827), chap. 144; ibid. (1849), chap. 147.

It also incorporates another village school called the "Harlem School."—Ibid. (1827), chap. 149.

The legislature passes an act for the erection of the Thirteenth Ward from the Tenth Ward, and the erection of the Fourteenth Ward from the Sixth and Eighth Wards.—Laws of N. Y. (1827), chap. 163.

The common council accepts from George Rapeley a deed of certain lots for so much of 16th, 17th, and 18th Sts. as pass through his premises between Fitroy Road and the Hudson River.—M. C. C. (1784-1831), XVI: 219.

The city's tax bill this year, authorised this day by the legislature, is $224,000, plus a further sum for the support of the common schools, etc., and also $76,000 for other specified purposes.—Laws of N. Y. (1827), chap. 220.

The legislature passes an act authorising the extension of Lafayette Place northward "from Art-street through the plot of ground made by the intersection of Broadway, Art-street and Eighth-street, to the southwesterly side of Eighth-street," thus modifying the Commissioners' Plan of 1807.—Laws of N. Y. (1827), chap. 268. An assessment was made accordingly (Index to Assessments, Vol. I), after approval by the common council on Dec. 17 (M. C. C. 1784-1831, XVI: 636).

The legislature appoints commissioners to meet commissioners named by the state of New Jersey, to agree upon the territorial limits and the consequent jurisdiction of the two states.—Laws of N. Y. (1827), chap. 299. See F. 5, 1834.

The legislature incorporates the "Harlaem River Canal Co.," a stock company,now they are thereby authorised to make a canal in the Twelfth Ward, from Spiten desuel creek to Harlaem river, from and to such points and places as the said directors shall deem most expedient and advantageous; and such number of basins, connected therewith, as may be necessary; and to improve the navigation of Harlaem river, so as to afford to vessels, boats and other freighting craft, which shall traverse the land canal and river, a secure and easy navigation from the said Spiten desuel creek to and along the Harlaem river into the East river; . . .—Laws of N. Y. (1827), chap. 319; amended by ibid. (1836), chap. 333. See J. 16.

This is the copyright date of the Goodrich Plan of the city, which is reproduced and described as Pl. 99, Vol. III.

The common council accepts from John Ireland and others a concession of two hundred acres of land in Greenwich Village: Horatio St. from Greenwich St. to its termination at Greenwich Lane at 13th St.; Jane Street from Greenwich Lane to high-water mark of the Hudson River; Asylum Street from the Great Kill Road to Jane St.; and so much of Bank St. as passes through their grounds.—M. C. C. (1784-1831), XVI: 420-421.
From 1836 to 1842, the “Board” occupied the second floor of one of the Jaunayce buildings on the site of the present 43 Wall St. These buildings were removed in 1849, and Jaunayce Court was constructed on the site.

From 1842 to 1854 the “Board” occupied “the large hall over the Reading Room in the New Merchants Exchange building, which covered the block bounded by Wall, Hanover, and William Streets and Exchange Place.”

From 1854 to 1856, it occupied the top floor of the old Corn Exchange Bank building, at the corner of William and Beaver Sts., on the site of the present building of the same name.

In 1856, the “Board” moved into a room in what was known as Lord’s Court, which had its main approach at 25 William St., another at 53 Beaver St., and a third at 50 Exchange Place; and remained there until 1865, when it moved into its own building on Broad St.

On Jan. 29, 1863, the title of the “New York Stock and Exchange Board” was changed to the “New York Stock Exchange.” —The New York Stock Exchange, by Francis L. Eames, president (1864), 27-91 and see 1860 and 1901.

The American Hotel is opened at 229 Broadway, fronting the Park—Com. Adv., My 1, 1823; and descrip. of Pl. 170, III: 392. See also Duer’s Reminiscences, 40.

The Nat. Acad. of Design holds its first anniversary celebration, an address being delivered by Sam'l F. B. Morse, its president. For the text of this, see Cumming’s Historic Annals of the Academy 45 et seq.

Mayor Paulding lays before the common council a letter from Philip Hone regarding four granite cannon balls sent by Capt. John B. Nicollos, of the U.S. “Ontario,” for “the use of the Corporation.” Hone’s letter, dated April 24, says he has received the shot from Nicollos, who suggests that they “will form a handsome and appropriate Ornament for the square Columns at the lower entrance of the Park,” adding: “They were shipped from the Archipelgo in the Month of February last and have now arrived here via Boston.” Hone says he intends “to get them from on board the vessel tomorrow [April 25] and to present them to the Corporation, in order that Capt Nicollos wish may be gratified as to their future destination.” He quotes from a letter from Nicollos, dated at Rhodes: “I have brought from the Island of Rhodes, four Granite shot or Balls made from what is supposed to be the ruins of Troy,” and adds: “As Rhodes was once the most celebrated Commercial City in the World from which emanated the first Commercial Code, I think these memorials of a place so renowned, worthy of being placed in the first Commercial City in America . . .”

Mayor Paulding states that the shot are “in possession of Mr. late Superintendent of Repairs.” The subject is therefore referred to the Committee on Lands & Places with authority. —M. C. C. (1784–1814), XVI: 264. For a chronological history of the Park fence, see descriptive catalogue of the Eno prints, pub. by the N. Y. P. L. See, further, N 17, 1847.

A report is made to the common council that there are 60 wharves and piers, belonging entirely or in part to the city, between the state prison and the Battery on the North River, and between the Battery and North St. on the East River; and that the value of this property, including the builkheads connected with them, exceeds $1,000,000. This brings about a need for a superintendent of wharves. Accordingly, the council takes measures to create such an office. —M. C. C. (1784–1814), XVI: 284–95.

A map of Wall St. from Broadway to Front St., by E. W. Bridges, bears this date. See map No. 334 in bureau of topography, borough president’s office.

Street Garden, between William St. and Pearl St., is to be called Exchange Place henceforth; and houses thereon are to be numbered. —M. C. C. (1784–1814), XVI: 291.

The common council orders that the name of Cheapside St. be changed to Hamilton St.—M. C. C. (1784–1814), XVI: 298.

It is ordered that the houses in Fulton St. be remodeled. —M. C. C. (1784–1814), XVI: 313.

The common council adopts a resolution to remove the horse-market to the corner of Fourth Ave. and 86th St.—M. C. C. (1784–1814), XVI: 314.

Announcement is made that the “Theatre Broadway—Late Circuit” will be opened on May 31. “The appearance of the house will be entirely changed—an airy and convenient pit will be thrown...
across the circle, which may be, from its elevation, styled the most commodious in New York."—"N. Y. Eve. Post, My 29, 1827. See also L. M. R. K., III: 983, under "City Assembly Rooms." See, further, Ap 22, 1829.

June

The common council orders that the corporation counsel make out an estimate of the house built by the United States, commonly called the boat-house, on the west pier at Whitehall, for the use of the United States during the pleasure of the board.—M. C. C. (1784-1831), XVI: 319-20.

The common council resolves to lease for 21 years to the N. Y. Institution for the Instruction of the Deaf and Dumb lot No. 59 of the common lands, covering about 4 acres, bounded by Fourth and Fifth Aves., 49th and 50th Sts., on which to erect the building for which the legislature appropriated $10,000 provided the directors raise an equal sum for that purpose (see Mr 23). The lease is to be dated May 1, 1827.—M. C. C. (1784-1831), XVI: 320-21. See, however, Ji 16.

The common council accepts from Nicholas Stuyvesant and others a deed of cession of 12th St. from Stuyvesant St. to Avenue C, and of 10th St. from Stuyvesant St. to Avenue D.—M. C. C. (1784-1831), XVI: 321.

"The owners of property facing St. John's Park, with a praiseworthy liberality, have subscribed to have the Park enclosed within an iron railing and the walk flagged, and the Park itself put in order. This will make it altogether one of the finest squares in the Union."—N. Y. T. Gen. & Reg. Adv., Je 7, 1827. While it is stated in Vol. III, p. 608, that Hudson Sq. was called St. John's Park after 1840, it appears here bearing that name as early as 1827. See, further, Je 27, 1828.

The common council is informed that the portrait of Gov. Clinton, by George Catlin, is finished; also that the portrait of Gov. Yates, by John Vanderlyn, is nearly finished.—M. C. C. (1784-1831), XVI: 379. See Ji 16.

The new synagogue in Elm St. built by the German and Polish Jews is dedicated.—N. Y. T. Eve. Post, Ji 21, 1827.

July

The first number of a Spanish weekly paper, El Redactor Español, printed here.—N. Y. T. Eve. Post, Ji 1, 1827.

The act passed by the New York legislature in 1817 to abolish slavery, that state goes into effect.—McMaster, Hist. of the People of the U. S., V: 192; Annals of N. Ams., 558.

The supreme court room in the city hall is appropriated for the meeting of the N. Y. State Society of the Cincinnati.—M. C. C. (1784-1831), XVI: 357.

The second Trinity Church, which was consecrated in 1790 (p. 59), was thus described as it appeared in 1827, when a window was abolished. This building is inferior in size to the old one, bring one hundred and four feet long, and seventy-two wide. The steeple is about the same height as the old one; but stands on the east, instead of the west end, as was the case with the former church, and is still the case with St. Paul's Chapel; this method having been adopted with the view of bringing the chancel, and the great altar-window, agreeably to ancient ideas of propriety, on the east end. The style of the building is Italian Gothic. It has galleries on the two sides and on the east end,—a part of the last of which forms the organ loft, in which is placed a fine organ, built in London, soon after the church was finished. The galleries are surrounded by square, panelled columns, directly over each of which rises a clustered Gothic column to the roof. The ceiling consists of three arches over the nave, and one over each gallery. From the centre and arc suspended three large and elegant cut glass chandeliers, and four smaller ones under each gallery. The windows are long, finished at the top with the pointed Gothic arch, and glazed with very small panes. The Communion Table is placed against the western wall of the church, and above it is one of the largest windows in the United States. It is Gothic, with three compartments, and contains one thousand and thirty-nine panes of glass. The desk and pulpit are directly in front of the chancel, without the rails. The church is ornamented with a number of handsome marble monuments, among which are one to the memory of General Alexander Hamilton, and one to that of the late Jacob Sherred, Esq. the munificent patron of the Episcopal Theological Seminary.

The cemetery in which the church is erected, is one of the most ancient in this city, having been the resting place of successive generations for upwards of one hundred and thirty years. The steeple contains a ring of eight fine bells."—N. Y. Mirror JI 14, 1827. See also descrip. of PI. 112, III: 629; and L. M. R. K., July 14, 1827.

A lease of land in the Twelfth Ward having been given to the N. Y. Institution for the Instruction of the Deaf and Dumb (see Je 4), the finance committee now offers a resolution, which the board adopts, "that the Counsel draw a deed of Release to the Directors" of the institution "of one acre of the aforesaid Leased Lot, in fee, for the consideration of One dollar . . . "—M. C. C. (1784-1831), XVI: 371-72. Such deed was given on Sept. 24.—Goodrich, Picture of N. Y. (1828), 343; Man. Com. Coun. (1870), 761. For the corner-stone, see O 19; see also Ji 30. The common council reports to the common council that a bust of the late Pierre C. Van Wyck, a former recorder of the city, has been procured at a cost of $250.—M. C. C. (1784-1831), XVI: 382. This may be the bust, described as of "white plaster," "life-size," "artist unknown," which, in 1909, was in the governor's room.—Cat. of Works of Art belonging to the City of N. Y. (1909), 112. The payment was made on July 30, when payment of $250 was also made for the portrait of Gov. Yates and its frame (see Ji 18), and $150 for the portrait of Philip Home (see Ji 2)—Journal D, 102, in comptroller's office; Cat. of Works of Art, etc., 17.

The common council adopts a resolution granting the Harlem Canal Co. the right to construct a canal from Harlem Creek to Mt. Vernon, provided the company comply with certain conditions, one of which is that "$30,000 with the corporation as security."—M. C. C. (1784-1831), XVI: 387; XVII: 43-44, 110-11. For the commencement of excavations, see My 8, 1828.

Chester Bailey, proprietor of Washington Hall, a hotel on the s.e. cor. of Broadway and Reade St., announces extensive alterations in the house, and its intended opening on Aug. 5—Com. Adv., Ji 16, 1827.

Extensive alterations are also made in the City Hotel, including the addition of two more stories. For description of these improvements, see Com. Adv., Ji 20, 1827. See, further, My 1, 1828.

Workers discover at the intersection of William and William Sts. the well-eriing of old well on the spot, the city, 1770 which was filled up that the statue of the elder Pitt [see S 7, 1770] might be erected on the spot. In order that the pedestal might not be displaced by the sinking of the earth, a strong arch of brick was turned over the mouth of the well and on this the pedestal was placed.—N. Y. T. Eve. Post, Ji 24 and 25, 1827. For an early mention of this well, see My 24, 1791.

The act of the council resolves that Nassau St. be widened between Cedar St. and Maiden Lane, and that Liberty St. be widened between Broadway and the north-east corner of premises near William St.—M. C. C. (1784-1831), XVI: 417.

The common council adopts a resolution to open Vestry St. between Hudson and Greenwich Sts.—M. C. C. (1784-1831), XVI: 421.

The common council orders that Commerce St. be opened and so augmented as to form a junction with Barrow St. at its east end.—M. C. C. (1784-1831), XVI: 440.

The common council resolves to change to Cliff St. the name of the remaining portion of Skinner St., between Franklin St. and its easterly termination.—M. C. C. (1784-1831), XVI: 442. Skinner St. was the name of the northern end of the present Cliff St. between Perry and Hague Sts.—L. M. R. K., III: 1209.

The common council resolves that a "Iron tube" be sunk in the park in the rear of the city hall for the purpose of obtaining good water for use in that building.—M. C. C. (1784-1831), XVI: 456.

"Whilst the papers are speaking lavishly of the enterprise, taste, and solidity of other projects, it is but justice to say something in praise of the spirit, activity and boldness of Mr. Sandford. Since the close of last season, he has levelled the old Lafayette [see JI 4, 1826] to the ground, and re-erected it on the most extensive scale. It is now the largest and most capacious Theatre.
1827 in the city. Though not entirely finished, yet the interior may challenge any comparison for neatness convenience and architectural arrangement. The lobbies are unusually wide and commodious. The stage is not only the largest in this country, but it exceeds any one we know, unless perhaps the Italian Opera House in London, be excepted. In touching upon this house, we ought on larger grounds, to point out the immense obligations which this quarter of the city owes to Mr. Sandford. His spirit and adventure has vastly increased the value of property, and added to the respectability of the locality. What, with his numerous private buildings and the influence of his Theatre, he has done more for the Canal-street district, than almost any individual we could name."—N. Y. Ev. Post, Ag 29, 1827, citing Enquirer. See also Ibid., S 28 and 29, 1827. The rebuilt theatre was opened on Sept. 29.—Ibid., O 2, 1827. A view of it is shown in an engraving by A. J. Davis, in Emmet collection, item No. 11894. See, further, Ap 8, 1828. The Journal of Commerce, daily and semi-weekly, is established.

—Goodrich, Picture of N. Y. (1828), 593. It is now (1826) the only survivor of the morning newspapers in existence in New York at that time.—North, The Newspaper and Periodical Press, 62, 99.

"Miss Livermore, the female preacher, who preached in the House of Representatives some time since, is now in this city."—N. Y. Ev. Post, S 4, 1827.

The store of Mr. Dumb on Rivington St. (see Mr 26), now completed, is named Manhattan Market by the common council.—M. C. C. (1784-1813), XVI: 466; L.M. R. K., III: 925. The name of this market, according to Thos. F. De Voe, was taken from that of a knoll at this place called "Manhattan Island," which was surrounded by salt marshes, and, at very high tides, partly covered with sea-water. This was between Houston and 3d Sts., and Lewis St., ran through the centre of it.—Market-Book, 524; L. M. R. K., III: 959, 966.

The common council passes a resolution that all that part of the old Boston Post Road extending from 12th St. to Harlem Bridge be abandoned by the city as a public highway.—M. C. C. (1784-1813), XVI: 469-70.

The council accepts from Nicholas W. Stuyvesant a portion of 9th St. between Stuyvesant St. and Second Ave., and that part of 5th St. lying between First Ave. and the East River which belongs to him; also from other owners the part of 9th St. between First Ave. and Ave. D.—M. C. C. (1784-1813), XVI: 477-78.

The common council resolves to confer with owners of property in Jacob St. (see L. M. R. K., III: 2007) as to terms upon which their claims to some supposed mineral waters in that swampy section may be adjusted, so that boring may be begun (see 1827).—N. Y. Ev. Post, Ag 29, 1827; M. C. C. (1784-1813), XVI: 485-89; Pl. 174, and pp. 99-115, Vol. III. On Oct. 8, it was resolved that Jacob St. be enclosed at both ends with an iron railing, and taken for public purposes.—Ibid., XVI: 544. On Feb. 22, 1829, the erection of the new Exchange was offered to sell to the corporation. Referred to finance committee.—Ibid., XVI: 737. The board found it inexpedient to make the purchase.—Ibid., XVI: 765-66.

The common council accepts from Gen. Philip Van Cortlandt a bust he has made of his father, the late Pierre Van Cortlandt, former lieutenant-governor, and adopts a resolution reciting the patriotic services of each.—M. C. C. (1784-1813), XVI: 489-91. The bust is not included in the Cat. of Works of Art Belonging to the City of N.Y. (1900); its whereabouts is unknown.

Canal Street Park, the title to which was acquired by the city through the Dongan and Montgomerie charters, is enlarged by purchases made on this date and on Nov. 22.—Prendergast, Record of Real Estates, 69, citing Liber Deeds, CCXXII: 3355, CCXXVIII: 265; and see L. M. R. K., III: 968-69.

During the session of the legislature commencing on this day, the state statutes were extensively revised. On Dec. 10, the secretary of state deposited, in accordance with the copyright law, the title of the book: Part of the Revised Statutes ..., consisting of Chapters 6, 8, 9, 10, 13, 14, 15, 16, 17 and 18. This is printed in Law Tracts, 1822, 32.

The common council permits the erection of a liberty-pole at the cor. of Sixth Ave. and 5th St.—M. C. C. (1784-1814), XVI: 900.

The common council resolves that so much of Garden St. as lies between William and Broad Sts. be named Exchange Place, as the newly opened street at the rear of the merchants' exchange is named.—M. C. C. (1784-1831), XVI: 402, 505.

The common council resolves that Green St. be opened and extended to the grounds of the Sailors' Snug Harbor.—M. C. C. (1784-1814), XVI: 706.

The common council orders that 9th St. from Broadway to Sixth Ave. be opened.—M. C. C. (1784-1831), XVI: 597.

The committee on gas is instructed by the common council to have the two large lamps in front of the merchants' exchange lighted with gas at the public expense.—M. C. C. (1784-1831), XVI: 517.

The common council investigates the expediency of providing a place of security for the few debtors in close confinement and of erecting a fireproof building as a depository of all the records which are evidence of title and property in this city, the records in the record office, the supreme council, register of chancery cases, etc., being in constant danger of fire in the city hall.—M. C. C. (1784-1831), XVI: 518. See, further, Mr 9, 1829; Ji 12, 1830.

"For some time past, the workmen have been busily employed in taking down the old fence, on Broadway, in front of the New York Hospital, lowering the ground, and putting up a new fence based with Boston granite. The improvement which is about being made, will enable the public to have a perfect view of this splendid edifice, which has been obscured by the high ground and small buildings, which have been for a long time suffered to remain in that part of Broadway."—Com. Adv., S 28, 1827.

A number of gentlemen meeting at the French Church in Pine St. decide to found a new P. E. church to be called the "Church of the Avenue."—N. Y. Ev. Post, O 1, 1827.

The common council resolves to open Fifth Ave. from 90th to 106th Sts; 86th St. between East River and Eighth Ave.; and Sixth Ave. from 21st St. to the Bloomingdale Road.—M. C. C. (1784-1831), XVI: 538.

"Workmen are now employed in demolishing the wooden fence around the Middle Dutch Church. In its stead will be erected a substantial iron railing. Nassau Street is to be widened from Cedar Street to Maiden-lane."—N. Y. Mirror, O 13, 1827.

The legislature provides for the publication of a map and atlas of the state, to be compiled by David H. Burr, and approved by the surveyor-general and comptroller. Burr is to be compensated by a gift of the engraved plates after he has supplied 50 copies of the map to the state and a copy to each town.—Laws of N. Y. (1827), chapter 4, chap. 42, S 53, 470, 489.

The cornerstone of the building of the N. Y. Institution for the Instruction of the Deaf and Dumb (see Ap 15, 1817) is laid on the south side of 30th St., between Fourth and Fifth Aves.—N. Y. Ev. Post, O 20, 1827; N. Y. Gaz. & Gen. Adv., O 22, 1827; Goodrich, Picture of N. Y. (1828), 343. For the dedication of the building, see S 30, 1829 (p. 5); see also L. M. R. K., III: 959.

"New York Gallery of Fine Arts, No. 100 Broadway. It has long been manifest to all the patrons of the Fine Arts that some suitable building is requisite for the purpose of displaying the works of the ancient as well as modern masters, and for the general encouragement of science. To facilitate so desirable an object, Mr. Michael Henry has... commenced a building as above, which will be finished in a few days, and which we are convinced, will prove well adapted for this purpose. He has, we understand, concluded to devote a room 90 feet long by 20 wide, with an opaque back, which will show to just advantage the works of those masters whose productions have heretofore been shown to every disadvantage—thus producing the desirable purpose for both purchaser and disposer, the want of which has been so long and generally complained of."—N. Y. Ev. Post, O 25, 1827, citing Enquirer.

Masonic Hall, on Broadway (see Je 24, 1826), is dedicated. —N. Y. Spy, N 3, 1827. It was later known as Gothic Hall.—L. M. R. K., III: 983. See Ap 20, 1836; My 26, 1836.

The common council receives a copy of a resolution of the state senate “That the Clerk of the Senate cause the Portrait of Christopher Columbus presented to the Senate by Mrs Maria Farmer in 1784 to be removed from the City of New York, and put in some suitable place in the Senate Chamber.” This is referred to the committee on repairs.—M. C. (1784-1831), XVI: 576. There is also entered in the minutes under this date the text of the entry in the senate journal of March 12, 1784 (q-e.), including the senate’s acceptance of the gift at that time.—Ibid., XVI: 586-87. For the committee’s report, see Nov. 19.

The common council resolves to procure for each member of the board a map of the city lately published by Goodrich.—M. C. (1784-1831), XVI: 577.

The corporation council informs the common council that the superintendents, on Oct. 16, confirmed the report of the commissioners relative to forming a public place in the Ninth Ward (Washington Parade Ground), bounded by 6th St. on the north-east, Wooster St. on the south-east, 4th St. on the south-west, and McDougall St. on the north-west; and closing Thompson St. from 4th St. to 6th St., and so much of 5th St. as is opened between McDougall and Wooster Sts.—M. C. (1784-1831), XVI: 578. See N 20.

The common council orders that awning-posts must be made conformable to a plan approved by the street commissioner.—M. C. (1784-1831), XVI: 584.

A friend in a distant part of New England writes to Editor Coleman of the Post, “I am waiting with anxiety the result of your decision. The course which may be taken by New-York will have a prodigious effect elsewhere. If the city gives a luce and decided majority against Adams, even New-England will be shaken. Boston will be aghast, and many will be preparing for a shelter from the coming storm. I must repeat the hope, that you may have succeeded in the city by an overwhelming majority, for, be assured, if such is the result, the effect will be felt far beyond your limits. Never was there such folly as Ebony and Topaz; and the people, yes, the Adams people themselves perceive the ridicule of it.”—N. Y. Ev. Post, N 13, 1827. The election, for senators and assemblymen, took place on Nov. 2, 6, and 7, and the Jackson ticket won by a majority of 5,000.—Ibid., N 6-9, 1827. See N 11.

The New Yorker writes concerning the New York election (see Ev.), “I cannot sleep without congratulating the citizens of our unparallel'd victory in your city. You must know that the effect of this election travels far beyond your limits. It was not so much eleven assemblymen and two senators gained to the legislature of New York, (although that is important,) as this decided demonstration of popular opinion in the greatest city of the union — a city which may well be called its heart, and if wisdom be the type, its head. The effect can not be concealed that public opinion will run clear and transparent at last, although the waters of the fountain head may be defiled. The city of New York produces the same effect on political opinion, as her merchants do on the general market, or her capitalists in establishing the price of stock. Your city operates on the whole confederacy, and even the election of charter officers produces some effect abroad. Your success is all important; it puts the battle in our power. Yet even the Jacksonians in New England, who maintain their lonely posts in the heart of the enemy's country, may now march under the banner of the great city, (and, I hope, of the great state,) with Jackson for commander, to a victory as certain, as overwhelming, and as glorious as that of New Orleans.”—N. Y. Ev. Post, Nov. 3, (1826), N 13.

St. Patrick’s trustees, at a meeting held Nov. 13, 1827, invited the trustees of St. Peter’s and St. Mary’s to a joint meeting, to consider the propriety of purchasing a new burying-ground. Accordingly, on May 14, 1828, a committee of the members from each of these boards was appointed to examine Mr. Dennis Doyle’s place on the Middle Road [now occupied by St. Patrick’s Cathedr

THE ICONOGRAPHY OF MANHATTAN ISLAND

The proceedings of the Court Martial which found Andre guilty.

The board also ordered that a warrant for $1,000 be issued in favor of the chairman of the committee to cover the board's expenses in attending the dedication. — M. C. C. (1784–1831), XVI: 618–23, 626–27. The builders' account for erecting the monument is given on p. 31, 80—ibid., XVI: 762; XVI: 14, 71.

William G. Graham, associate editor of the N. Y. Courier & Enquirer, is shot and killed at Weehawken in a duel with Mr. Barton, son of Dr. Barton of Philadelphia.—Winfield, Hist. of the County of Hudson, N. J. (1874), 225–29. See, further, D. 19.

"The public Law Library, which has been so long talked of and so much longer neglected, is put on a fair way at last of being established. It probably will be placed in the City Hall, in the room appropriated to the United States' Court."—N. Y. Eve. Post, N 28, 1827. See F 11, 1828.

The Mirror says of the jail and bridewell: "These two beautiful specimens of architecture, constituting such elegant accommodations to the City-Hall, still maintain their pride of place. We wonder when they will take unto themselves wings and fly."—N. Y. Mirror, D 1, 1827. See J 19, 1828.

The council resolves to present a gold medal to Gen. Andrew Jackson to commemorate the completion of the "Grand Canal" (the Erie Canal), and their appreciation of his services.—M. C. C. (1784–1831), XVI: 626. For Jackson's letter of thanks, see ibid., XII: 170.

The common council resolves to extend Lafayette Place to 8th St.—M. C. C. (1784–1831), XVI: 676.

A disposition to dueling seems to have possessed the men of New York at this time. Henry Brevoort, in a letter to Washington Irving of this date, says: "The pugnacious character of our citizens still continues. Lately, a Mr. Barton of Philadelphia [killed] a Mr. Graham at Hoboken in a duel, provoked by the latter—Graham was assistant editor to Noah & had made himself very obnoxious by his satire upon what Charles King foolishly called "good society". Since then Dr. [David] Hosack sent Cadwallader Colden with a challenge to Dr. Watts—which produced an apology. Yesterday—a challenge was sent by Mr. Henry Edcford to Maxwell (the Dsfr Att) the cause of which grew out of the late indentures for conspires.—Maxwell very properly handed the challenge to the Police. Whether the Ship-builder intended to use the Broadaxe or the pistol I know not."—Letters of Henry Brevoort to Washington Irving, ed. by Geo. S. Hellman (N. Y., 1916), II: 16.

For the comptroller's annual report of the city's finances, see Goodrich, Picture of N. Y. (1823), 188–94.

1828

In this year, the first edition of Webster's Dictionary was published. Noah Webster, its author, began writing it in 1807, and was in his seventieth year at the time of its completion.

In this year, Timothy Pitkin published his Political and Civil History of the United States, the first political history of the country. —N. Y., VI: 175.

In this year, the U. S. government built, at New York, the ship "Peacock" (18 guns).—The Navy of the U. S. (Wash., 1851).

The character of the typical court cases coming daily before police magistrates in 1828 and 1829 were described in humorous vein in Skillman's New-York Police Reports, by John B. Skillman (1829). By reason of its scarcity and serious title, doubtless, this work has not found its way into anthologies or bibliographies of early American humour, where it should have a prominent place.

In The Talisman for 1828 and 1829, reminiscences of New York by Gullan C. Verplanck were published. They were reprinted in the Man. Com. Coun. (1870), 904–21. For his description of "Richmond Hill," see S 27, 1796. The Talisman was a literary annual (1828–30). It was edited by "Francis Herbert," a non-de plume which concealed the identity of its three authors, Gullan C. Verplanck, William Cullen Bryant, and Robert C. Sands. The three volumes—all that were published—were reprinted in New York in 1831 under the name Miscellaneous, with the names of the authors on the title-pages.—See Literary Annuals and Gift Books by Frederick Winthrop Faxon (Boston, 1912), 52, 69.

In this year, the first descriptive guide-book for New York was published, the former ones being Mitchell's in 1807 (q.v.), and Blunt's in 1817 (q.v.), 1818 (q.v.), and 1825 (q.v.). Published and copyrighted by Andrew T. Goodrich, he presumably, was its principal author. It is entitled, The Picture of New-York and Stranger's Guide to the Commercial Metropolis of the United States. —Of the plan of the city and island which the work contains, the preface says it "was drawn and engraved expressly for the purpose, . . . is considered as the most correct ever issued in this size comprising, at one view, the whole limits of the island, and the encroachments since made on the surrounding waters." The Goodrich plan is reproduced and described as Pl. 99, Vol. III. Commencing on p. 136, the text is a reprint of Blunt's 1817 guide (q.v., p. 30 et seq.), but soon becomes original and contemporary.

The book begins with an "Historical and Chronological Account of the City of New-York," and was therefore one of the earliest attempts to present the city's record of events in chronological sequence, without, however, the citation of authorities. A 16mo of 492 pages, it contains descriptions and statistics of timely interest, too numerous to mention all in a brief review. The city hall with its many offices and galleries is described in detail, as well as all the city departments, and all other public buildings. The Exchange, on Wall St., recently completed; the "telegraph," the churches, colleges, public schools, and semi-naries, societies, markets, banks and insurance companies; the commerce of the port, the packet lines, custom-house, and chamber of commerce; prisons and institutions; theatres and public gardens; newspapers, hotels, ferries, gas and water works, fortifications; docks and streets, are all given a much more interesting and historical and statistical details. The lottery, auctions, book-sellers, trade, tred-mill, and many other special features of the city's life, are given attention, and the book contains several copper-plates showing important buildings and street scenes. See also descrip. of Pl. 99, III: 391. The following extracts will serve as a record of some of the new and contemporary facts presented:

"There are about 73 blocks of made ground on the East River side, from Whitehall to the Dry Dock, and about 50 on the west side of the city, from the Battery to State Prison. The area of the Battery is entirely made ground from State-street; at least, the loose rocks and reefs that originally projected out at this spot, have been deeply buried beneath the earth and when to the foregoing is added the vast quantity of earth that has been thrown into the Collect, and the adjacent low and marshy grounds, it is apparent that no inconsiderable portion of the city has been redeemed from the water by the persevering industry of man. . . . the exterior and permanent line, facing the water, around the city, and the piers, should be constructed of solid masonry, similar to the face of the Battery, in lieu of the present unsightly constructions of wood."—Ibid., 141. See also 174.

Referring to the alterations and improvements that have taken place in the city in the past, Goodrich says in part: "The widening of the old streets has caused the greatest alteration in the external aspect of the city, particularly in Maiden-lane, at the corner of Broadway, where the Oswego Market and a group of old wooden buildings stood, on the south side and also at the intersection of Pearl-street and the west side, where until 1823, it was hardly wide enough for two carts to pass. . . . "Another improvement of great importance was the cutting and widening of Fair-street, now Fulton-street, from Cliff-street through to Pearl-street, and thus creating a new thoroughfare from the Hudson to the East River; also the entire demolition of a triangular block of unsightly old brick buildings, called Han- slip, or William-street, and Stone-street, which then extended to Stone-lane (now Exchange Place). . . . "The most tedious and expensive undertaking of a public nature has been the filling up of the great ponds and bodies of fresh water, that formerly covered many acres of what is now the very centre of the city, from Orange-street to Elm-street, and Pearl-street to Grand-street, and on the west side of Broadway, in the rear of St. John's Church, and several blocks on each side of Canal-street, leading from Collect-street to the Hudson River; all this space was formerly covered with water, which in some places was of very considerable depth, and communicated with the East River through Roosevelt-street, and by the present Canal-street with the Hudson, draining a surface of about 129 acres of land. Several large hills or mounds of earth that environed this pond, under various names, such as Bayard's Mount, which elevated itself on the site of Grand and Rhynder streets, have all been levelled, and the ground thrown into the ponds. . . ."
Goodrich describes the New York Hospital buildings as occupying an area bounded by Broadway, Church St., Anthony (Worth) St., and Duane St., 465 ft. long and 400 ft. in width. The grounds were surrounded by a brick wall 10 ft. high. At this time, the buildings stood on a considerable elevation. In front was "an extensive lawn, sloping towards Broadway, with a paved walk and venerable elms on each side." A handsome iron railing and granite columns separated it from the busy street in front. The main edifice was "situated in the centre of the lot, about 200 ft. from Broadway," and was "constructed of gray stone, with a slated roof." It was 124 ft. long in front, its depth was 50 ft. in the centre, and at the wings, which projected on each side, 86 ft. It had three stories (52 ft.) high besides the basement, with a cupola, which commanded an extensive panoramic view of the entire city. Adjacent to the hospital on the south was a large stone building, formerly occupied as an asylum for the insane; but in 1827 (error for 1826, p. 359) a hospital for seamen was erected, and in 1828, 1829, was exclusively appropriated to their use.—Goodrich, Picture of N. Y. (1828), 299-305. The hospital was enlarged in 1834, 1836, and 1841.—Account N. T. Hosp. (1811); Wilson, Mem. Hist. of N. T., IV: 407-408. The main building was demolished in 1869 (p. v). See Pls. 88 and A. 27-29, and pp. 570-71, Vol. III; L. M. R. K., III: 534-535.

Many private enterprises in art at this period, worthy of note, were Browere's "Gallery of Busts and Statues," soon to be established in New York, and the "Architectural Room" of Ithiel Town and M. E. Thompson, in the Exchange. The latter was described as containing "the most valuable and extensive collection of books and prints, relative to that noble art and science;" while of the architects it was said: They "stand at the head of their profession in this city, and have produced the best specimens of architecture."—Goodrich, 375-376. The name of the sculptor was John Henry Isaac Browere.—See Browere's Life Masks of Great Americans, by Chas. Henry Hart (Dubleday and McBee Co., 1890).

Regarding the Town collection, see Cat. of Ancient & Modern Books in the library of the late I. Town . . . sold at auction, June 28, 1847 (in N. Y. P. L.).

The principal hotels in this time, were numerous and most of them on Broadway. They were: the Adelphi, erected in 1827 (p. v.); the Mansion House, at 39 Broadway, kept by W. J. Bunker, which was "large and commodious," and possessed "much of the retirement and quiet of an elegant private residence;" the City Hotel, which occupied the entire block on the west side of Broadway between Thames and Cedar Sts., and was the "loftiest" hotel in the city, containing "more than one hundred large and small parlours and lodging-rooms, besides the City Assembly Room, chiefly used for Concerts and Balls;" the National Hotel, finished in 1825, at 112 Broadway, opposite the City Hotel; the Franklin House, on Broadway, cor. Dey St.; the American Hotel, on Broadway, opposite the Park, a new hotel, five storeys high, extending on Barclay St. as far west as the College of Physicians and Surgeons; Washington Hall, on Broadway, cor. of Reade St., which, in 1828, was altered, repaired, and newly furnished; and the Park Place House, cor. of Broadway and Park Place, opposite the Park, and in the street that leads to Columbia College. The several other hotels included Niblo's Bank Coffee House, at the cor. of William and Pine Sts.; the Tontine Coffee House, cor. Wall and Water Sts., and the New York Hotel, 1844 Greenwich St., between Duane and Cortlandt Sts.; the Walton House, 328 Pearl St., between Peek Slip and Dover St., in Franklin Sq; and Tammany Hall, cor. Nassau and Franklin Sts., "generally known as head quarters of the Republican party, and the arena of frequent political strife."

—Goodrich, Picture of N. Y. (1828), 397-99.
In no place on this island has the destroying hand of man done more to alter the face of nature, than in the vicinity of Corlears Hook, where hills of great magnitude have been entirely levelled, or cutoff and sold up down along the shore, so that the foundation has taken the place of what was, a bleak and unfrequented spot.”—Ibid., 412.

The “new burying ground” was described in this year, as “situated on the 4th avenue, near the three mile stone [on present site of Bryant Park]—see D 20, 1824—and the N. Y. Pub. Library, and embraces 10 acres of ground, which is suitably laid out, and contains a large burying ground.”

The old Potter’s Field is now levelled, and is formed into a beautiful public square, called Washington Square, which is also used as a military parade ground.

There are three large burying grounds in North-street, east of the Bowery, viz. one for the Friends, one for the Dutch, and one for the Presbyterian Churches; another for the Episcopalians in Clarkson-street, between Varick and Hudson-streets; for the Baptists and Scotch Churches in Wooster-street, near the old Potters Field, now the Washington Square.”—Ibid., 420-21.

The gas works, in this year, were described as “one of the largest edifices in the city, . . . situated in Rhynder-street, corner of Hester-street, near the East part of Canal-street.” The buildings are described in some detail. The gas is manufactured by a gunpowder machine called a meter, and passes out into all the principal streets south of Grand-street, through pipes of cast iron, of various sizes, from six inches to two inches bore; and by lateral pipes into the private houses, where the company pipes end, and the whole interior fitting is done at the expense of the person using the gas.

The gas company which was granted a charter in 1823.

“The gas company have thus far, laid 15 miles in length of cast iron pipes in the principal business streets. The pipes were, in the first place, imported from England . . .”—Ibid., 421-23. See also descrip. of Pl. 99, III: 591.

In this year, Hudson Square (St. John’s Park) was described as constituting “the fairest interior portion of this city.” . . .

The region of the Eleventh Ward is the handiest street, and is bordered on the north by the choice trees and shrubbery, and the costly and much admired metropolis Church of St. John’s, with its lofty and beautiful spire, places this square as the most desirable residence, and the most judiciously embellished spot contained in the city.

“IT is not open to the public at large, at present; it has recently, at the expense of the surrounding proprietors, been endowed with an iron railing, combined with granite pillars.”—Ibid., 439.

By 1828, “many handsome private dwellings” had been erected around Washington Square, and this vicinity, like Hudson Square, had become “a most fashionable residence section,” although “remote from the centre of business.”—Ibid., 439.

The following topographical description of the city’s streets is found in Goodrich’s guide: “The streets of New-York, south of Canal-street, or Greenwich-street, are fluted, with the choice trees and shrubbery, and the costly and much admired metropolis Church of St. John’s, with its lofty and beautiful spire, places this square as the most desirable residence, and the most judiciously embellished spot contained in the city.

It is not open to the public at large, at present; it has recently, at the expense of the surrounding proprietors, been endowed with an iron railing, combined with granite pillars.”—Ibid., 439.

There are some trades so concentrated, that they are mostly contained in one neighbourhood, such as the tanners and curriers in Ferry-street, Jacob-street, and the vicinity; also furriers in Water-street, cabinet and chair makers in Broad-street. Other trades and occupations are so diffused over the city, that no one particular spot could be designated as appropriated to them. Pine, Wall, and Nassau streets, contain many of the offices of law practitioners.”—Ibid., 459-62.

In 1850, Peter Nelson published in Glasgow his observations made during a residence of six years in the United States, from 1822 to 1828. From these he have been selected a few relating to New York (see also 1822):

“ . . . In most of the genteel dwelling-houses, the door steps and lintels, and window sills, are made of fine free-stone, or white marble; the plates and other ornaments on the principal doors of some of these houses in the lower part of the town, are made of pure silver. This is very unlike republican simplicity. A few of the side pavements are of broad flag stones; the rest are of brick, and the middle of the streets of good whitestone, with which the island abounds.

“In 1826, the 103rd place of worship was erected within
THE ICONOGRAPHY OF MANHATTAN ISLAND.

1828 the city, so that there is no want of visible religion in this quarter.  

"In New York, there are many manufactories of iron, brass and crystal. Very excellent hats are also made, The cotton weavers and dyers are a considerable body. In 1814, there were only 2 looms in the city, now they may reckon near 1000."  

"In cut glass and crystal," he says, "the Americans have exhibited great proficiency, since it can be seen in the morning making glasses, he says, by the market), and carrying home their bargains in their hand. People in the same rank in Scotland would imagine themselves degraded by carrying a leg of mutton, or a junk of raw beef along the streets; custom sanctions the practice here.

The museum in New York is private collection, and contains many good specimens of natural history. There are no manuscripts or rare books, and the coins are hardly worthy mentioning."—Recollections of Six Years Residence in the U. S. A. (Glasgow, 1839), 4-16, 19, 32, 33, 34, 40, 42, 46-52. Cf. Bangs, Bro. & Co. catalogues, in N. Y. P. L., of large private collections of coins sold by this firm of auctioneers in 1835 and later years.  

At some time after 1828, the Boulevard Club-House, erected in 1792 (p. 349), at the corner of Cherry and Montgomery Sts., was taken down, and the elevation on which it stood was graded to the level of the adjacent streets.—See L. M. R. K., III: 976; see also Man. Com. Coun. (1837), 451; and Pl. 60-a, Vol. I.

At this time, the Walton house (see L. M. R. K., III: 953), had a garden in the rear, which extended "quite down to the river."—Recollections of Daniel J. Ebbets, in Watson's Annals, 350.  

In this year, the residence of former Governor Jay, at 52 Broadway, was a boarding-house kept by a Mrs. Keese. Similarly, other residences on lower Broadway had become boarding-places. For their addresses, see Man. Com. Coun. (1869), 523.

In this year, the "Separation" occurred throughout the Society of Friends in New York City, one branch calling itself "Orthodox" and the other sometimes calling itself "Hicksite."—See John Cox, Jr.'s MS. Catalogue of Records and History of the two Yearly Meetings.

In this year, the common council designated, as the permanent exterior street on the North River, that portion of West St. from "its northerly termination to its intersection with a continuation of the Great Kill road [Gansevoort St.]." For an outline history of the development of West St., see Vol. I, p. 456; also L. M. R. K., III: 953.

In this year and the next, the Isthmus de Fleurieu Hudson, by J. Milbert, consisting of two folio volumes of text and two of lithographed plates, was published in Paris. These plates, 53 in number, are admirable views of places in the regions traversed by the artist,—among them a "View of New-York, taken from Weehawken" (cf. descript. of Pl. 92, Vol. III): "Interior of New-York, Prevoast Street and Chapel;" "Perrytown, where Major André was captured;" "Sing Sing;" "West Point;" "Town of Hudson;" "View of Albany;" "View of Albany, with the house of the first Dutch Governor;" "Saratoga Springs;" "Falls of the Hudson;" "Lake George;" "Niagara Falls;" "View of Boston and the South Boston bridge;" etc. See also 1825:

A painting by D. O. Brower, showing the junction of the Bowery and Broadway in 1828, is shown and described in Vol. III, A. Pl. 18-a.

For view of Columbia College, 1828, see N. T. Mirror (1828), and Emmet collection, No. 11953.

For view of the United States Hotel in this year, see lithograph, drawn by A. J. Davis, in Enio collection, N. Y. P. L.

The 1828 view of Valentine's Mallards are: Broadway from Bowery to Corlears Hook Green Coun. (1854), 12; South St. from Maiden Lane, in ibid., 60; and Fulton St. and Market, in ibid., 200. For the originals of these views, see Pls. 98, 104-a, and 104-b, Vol. III, respectively.

Jan.

In this month, "the American Institute for the City of New York" was organized.—See N. T. As It Is, 1833, p. 79. Its first "fair" was held on Oct. 24 (p. 79). For its incorporation, see My 2, 1829. See also King's Handbook (1843), 321.

The anniversary of the Battle of New Orleans is celebrated with a dinner at Masonic Hall, fireworks, illuminations, etc. The festivities are more elaborate than usual because of Jackson's prominence as a presidential candidate.—N. Y. Evet. Post, Ja 9 and 10, 1828.

"At a late meeting of the Trustees of Columbia College, the plan of establishing a Grammar School to be connected with the institution and being in some degree supported by their school is to be under the direction and regulation of the Board of the College, who are to appoint a master and assistants, define their duties, and prescribe the course of studies. The usual branches of English education will be taught, and at least so much of the classics and mathematics, as shall be necessary to qualify the scholars at the College. At the same time, it is ascertained that forty scholars will be sent to the school & will pay for tuition at the rate of $12.50 per quarter, the school will be opened. . . .

"The Trustees seem to have been impressed with the opinion that the course of education in many of the various private seminaries established in this city, has not been such as to prepare the pupils in the best manner for the course of study pursued at Columbia College, and have adopted this plan to supply the deficiency."—N. Y. Evet. Post, Ja 8, 1828. On April 19, the board of the college authorised the establishment of the grammar school and appointed John D. Ogilby master.—Ibid., Ap 23, 1828. The Columbia Grammar school is still (1926) among the leading private schools of the city.

At this time, David T. Valenzano served as marshal of the marine court, being paid in fees.—Journal D, 165, in commissor's office.

The common council refers to the committee on applications to the legislature a report of the committee on the jail and bridewell, recommending application for the passage of a law authorising the removal of male convicts from the state prison at Greenwich to the new state prison in Westchester (Sing Sing), and declaring the Greenwich prison to be the city prison; also for authority to raise, by loan, the $100,000 to be paid to the state for the Greenwich prison.—M. C. G. (1784-1831), XVI: 662-65. See Mr 21 and 18, Ja 26, 1828.

The common council accepts from William De Peyster a deed of severance of those parts of the streets and avenues which pass through his grounds at Bloomingdale.—M. C. G. (1784-1831), XVI: 663.

The common council grants to the city dispensary (see O, 1799) a lot, 50 x 89 ft., out of the state ordnance-yard, on the north-west cor. of Collect (Centre) and White Sts.—M. C. G. (1784-1831), XVI: 663-64. (See also ibid., XVI: 91-92, 231; XVI: 16, 326, 359.) After the state sold the lot to the city by act of the legislature on April 16 (Laws of N.Y., 1828, chap. 232), the conveyance was made the same day by the city to the dispensary at a consideration of one dollar. On this site was erected a brick building three stories high, which was first occupied in 1829 (p. 91, Ja 11)—Lossing, Hist. of N. Y. City (1884), 1: 117. See also L. M. R. K., III: 934. In 1837, 20 ft. additional on White St. were conveyed to the dispensary.—Laws of N.Y. (1837), chap. 436; Man. Com. Coun. (1870), 761.

The common council refers to the committee on applications to the legislature a resolution that this committee examine the expediency of establishing by law a poll-list, or register of voters, to regulate the elections hereafter to be held in this city.—M. C. G. (1784-1831), XVI: 664.

The Mirror again comments on the jail and bridewell: "Hopes are entertained that these intolerable nuisances will be removed—but when, it is left entirely to conjecture—at the last regular meeting of the corporation, the committee on this subject reported in favour of raising one hundred thousand dollars, for purchasing the Greenwich state prison, for the use of a jail and bridewell. Beck dick, gardiner, and others, have adhered to this about."

The common council refers to the committee on arts and sciences a memorial of William Dunlap, the portrait painter, "proposing to paint and present to the Common Council an Historical painting of the Inauguration of General Washington."—M. C. G. (1754-1831), XVI: 696.

The common council is informed by Senator Waterman that a senate committee of which he is chairman has under consideration "the subject of the erection of a State Prison for female
The common council adopts a resolution offered by the committee on public offices "that the small room in the Attic at the head of the Stair Case [in the city hall], & which is now unoccupied, be appropriated to], use of the Clerk of the City and County for such purposes as may be by him deemed necessary for the preservation of the papers and documents entrusted to his care, and that the Committee on Repairs be empowered to carry this resolution into effect provided that the expense for the same does not exceed Twenty Dollars."—M. C. C. (1784-1831), XVI: 709-10.

The council resolves that ninth Ave. be dug out and regulated from the Great Kill Road at 12th St. to above 21st St. — M. C. C. (1784-1831), XVI: 712.

The city pays $200 for boring for water at the rear of the city hall—Journal D, 168, in comptroller's office.

"An association of the members of this bar, of so long wanted, has at length we are told, been formed, under the title of the New York Law Institute."—N. Y. Etc. Post, F 11, 1828.

The objects of this association are "to advance the jurisprudence of the state, to promote an efficient administration of justice, and to regulate the practice of the profession on principles beneficial to their fellow citizens and honorable to themselves. . . . Preparations, we understand, have already been commenced in the United States Court Room in the City Hall, for the accommodation of the Library. . . ."—Ibid., F 14, 1828. Goodrich says: "There are standing Committees on the Library, Jurisprudence, and Ceremonies, Solicitors, and Attorneys of the Supreme Court and Court of Chancery in this state, are eligible to the society, by the ballots of three-fourths of the members, present at two successive meetings. James Kent (former Chancellor of this state) is President; and Smith Thompson (one of the Judges of the Supreme Court of the United States), Peter A. Jay, and Beverly Robinson, Vice-Presidents."—Picture of N. Y. (1828), 441. The Institute had its inception in a meeting at the residence of Judge McCoun. It was incorporated in 1830 (q. v.). For a brief account of its initial development, see Man., Com. Coun. (1826), 556-58. In April, 1825, it removed to No. 45 Chambers St.—Ibid. 557. It is still a flourishing organization.

Changes in the city charter are still (see F 20, 1826) in the minds of the common council. After much discussion, an act to be submitted to the legislature is agreed to. The creation of a bicameral council is the intent of the act, and the machinery for such an organization is virtually the same as that of Oct. 27, 1823 (q. v.). Provision is made as before for the act to be "submitted to the decision of the voters" before going into effect.—M. C. C. (1784-1831), XVI: 747-60. See also N. Y. Etc. Post, F 2 and 4, 1828. See also N. Y. Etc. Post, F 15, 18, 20, 1828.

The common council is informed of the death in Albany of De Witt Clinton, the long governor, on Feb. 10, 1828. Resolutions of sorrow and sympathy are passed, and one to adopt the usual mode of mourning.—M. C. C. (1784-1831), XVI: 761; N. Y. Etc. Post, F 15, 16, 18, 20, 1828. See F 21.

Philip Hone records in his diary his "Address delivered at a meeting of Citizens on Monday Feb" 21, 1828, preparatory to my presenting the Resolutions which were adopted by the meeting on the occasion of the Death of the Governor. . . ."—Hone's Diary (MS.), in N. Y. Hist. Soc. See also N. Y. Evc. Post, F 22, 1828.

A letter to the press, signed "A Whip," calls the common council's attention to the condition of Third Ave., which is in "a most frightful state, as well for foot passengers as riders." He recommends "McAdamizing" the avenue. John London McAdam (1756-1836), whose name is applied to this system of road-making, published, in 1819, a Practical Essay on the Scientific Repair and Preservation of Roads, followed in 1820 by the Present State of Road-making.—See Ency. Brit., 11th ed., XVII: 190.

Circumlocutions of a plan of the Clinton Hall Association are to be issued on this day. "The object of this association is, to place upon a firm and respectable footing the Mercantile Library Association of New-York. While it will afford entire security and a full equivalent to subscribers, it will also give to their clerks an opportunity of improving in knowledge and virtue, in some degree commensurate with their numbers and usefulness, and suited to the intimate relation which they bear to the business and the families of the merchants of New-York."—N. Y. Etc. Post, F 25, 1828. See also Hone's Diary (MS.), in N. Y. H. S.

The common council resolves to express to the legislature the regret which this board has on account of the passage of a law removing to Albany the only term of the supreme court now granted to this city.—M. C. C. (1784-1831), XVI: 785. See Apr 4, 1825.

The Courrier des Etats-Unis appears. It was first a weekly; in 1826, it became a semi-weekly; in 1829, a tri-weekly; and in 1831, a daily.—North, The Newspaper and Periodical Press, 128. It is still published.

Dr. Mitchell delivers, in the city hall, an address on the late Thos. Addis Emmet.—See A discourse on the life and character of Thomas Addis Emmet, in N. Y. P. L.

The common council resolves to accept the cession of all the streets between 21st and 30th Sts; also First and Fourth Aves., on the usual terms and condition.—M. C. C. (1784-1831), XVII: 22.

The common council approves a resolution that West St. be extended across Spring St. Slip.—M. C. C. (1784-1831), XVII: 27-28.

The common councils accept from Samuel Boyd, and orders recorded, a deed of cession of 15th St. from Eighth Ave. to Hudson River.—M. C. C. (1784-1831), XVII: 32.

The following newspaper comment appears: "With pleasure we perceive, that within one or two years our fashionable houses, especially those newly erected in our principal streets, have assumed a more beautiful look, resembling those which distinguish Philadelphia, both as respects their uniformity in height, and the neat and more convenient and becoming appearance of our outer doors, which are now painted a white or straw color, with suitable and useful plated ornaments to match—of which a very good specimen may be seen on the door of a new four story house in Chamber street, between Church and Chapel streets, on the north side, and just below the Unitarian Church, with the name of the engraver. But, in another respect, our streets, too, have of late improved still more, namely, in the greater uniformity in the height of our buildings. To judge of our principal street, Broadway, you would think that the first object with every person about to build, had been to measure with his eye the houses adjacent and take care to order his to be several inches higher or lower than his neighbor's. A specimen of this peculiar taste may be seen by casting your eyes at the houses on the corner of the block between the 55th and 56th Sts., Broadway, from Cedar to Liberty-street; where you will see no two buildings of a similar height. But in those now erecting, or lately erected, this old, ugly, and absurd custom is avoided; so that in the course of a few years, we shall be able to boast that New York resembles in appearance the elegance of Philadelphia; besides is all
The resolution this is the holy boat. memorandum plan duel Davis?), adjudged that shall be The city of New York, or in the vicinity thereof, and it shall be lawful to build thereon a marine hospital to be called and forever known as the Sailors' Snug Harbor.—Law of N. Y. (1828), chap. 266. See, further, My, 1831.

The legislature passes the annual tax budget for the city.—

The legislature incorporates the "New-York and Boston Steam-Boat Co." to operate a regular line of boats through Long Island Sound between the two cities, the boats to be constructed with two engines on a plan of the principal incorporator, Elishu S. Bunker. The company is now building such a boat.—Law of N. Y. (1828), chap. 293.

The legislature passes an act to suppress duelling. A person causing the death of another in a duel in this state shall be adjudged guilty of a felony and subject to imprisonment for seven years or less.—Law of N. Y. (1828), chap. 290.

The common council receives, and accepts with thanks, from Rev. John Stanford "a letter from the City of New York drawn from Actual Survey by Wm Bradford in the year 1757."—M. C. (1784–1831), XVI: 124. In June, 1822, this map was reported missing from the files of the topographical bureau of the board of the president's office. This office was formerly called the bureau of design and survey, and prior to that it was the street commissioner's office. The lithographic copies of this map showed to have been "in the possession of G. B. Smith, Street Commissioner."—Andrews, James Lyne's Survey or the Bradford Map (1900), 32–33. See also descript. of Pl. 27, Vol. I.

The common council appoints Reuben Spencer a city surveyor.—M. C. (1784–1831), XVI: 126.

The common council authorizes the street commissioner to advertise for and enter into contracts for building a market at the foot of Spring and Canal Sts. under the direction of the market committee.—M. C. (1784–1831), XVI: 117, 127–28; Laws of N. Y. (1827), chap. 214. See D 8.

The street commissioner conveys to the corporation a deed of cession from Peter G. Stuyvesant for parts of 5th, 10th, 12th, 15th, 16th, 17th, 18th, 19th, 20th, 21st and 22nd Sts.—M. C. (1784–1831), XVI: 697; XVII: 136.

Russia declares war on Turkey because of the sultan's violent manifesto calling for a holy war and naming Russia as the cause of the Greek insurrection.—Hazen, Europe since 1815 (enlarged ed.), I: 559. See S 14, 1829.

John Jacob Astor buys of Ezra Weeks and others the City May Hotel, 115 Broadway (see Ja 24, 1751; N 20, 1801).—Liber Deeds, CCXXVII: 46 and 48. This is the date of Astor's deed, the sale took place at public auction at the merchants' exchange on April 8, the price being paid $513,000.—N. Y. Ev. Post, Ap 5 and 8, 1828. See also L. M. R. K., III: 977; and Fay's Views of N. Y. (1831), 21. See, further, Ap 25, 1835.

Philip Hone records in his diary: "... went to Manhattan- ville, to view the Commencement of the Excavation for the Har- laen Canal" (see Jl 16, 1827).—Hone's Diary (MS.), at N. Y. Hist.

"Washington Military Parade Ground."—Workmen are busily employed in putting a handsome fence around this spacious public square, by far the largest of any in this city. And laborers are busy in levelling and preparing the ground to be laid down to green turf, with neat grassed foot walks around the margin and across it from each extremity. When this work is completed and

17 The common council passes a resolution to open parts of 10th, 11th, 12th, and 13th Sts. east of the Bowery and Third Ave.; and Seventh Ave., between Greenwich Lane and 21st St.—M. C. C. (1784–1831), XVII: 47–48.

18 The changes in the city charter proposed by the common council on Feb. 14 (q. v.) are enacted into law by the legislature.—Laws of N. Y. (1828), chap. 149. The law failed of ratification at a city election on May 28 (q. v.).
A law providing for a bicameral council (see F 14) fails of ratification in a special election by a vote of 5,427 to 1,753. A newspaper explanation is: "The framers of that law, which were the Corporation themselves, did not mean to have any salutary check placed upon their hasty summary mode of doing business. And rather than such a law should go into effect, the people prefer the old system; until they can procure such a change in the mode of transacting the affairs of the city as will promise an effectual restraint upon improper and ruinous legislation. Meetings should be called in each ward and delegates appointed to frame a law to be submitted to a general assembly of the citizens; for their consideration and approval. Application should then be made to the Legislature to give their official sanction to it."—N. Y. Evc. Post, My 31, 1828.

May

It may be observed that the charter changes were finally obtained through the procedure thus recommended by the Post. See My 11, 1829.

The Franklin Bank suspends payment.—N. Y. Evc. Post, My 29, 31, Je 2, 4, 6, 10, 12. See also The explanation and indication of Samuel Legget, late president of the Franklin Bank (N. Y., 1831), at N. Y. H. S. ; and, for other references to Legget, see The Old Merchants of N. T. City, by Walter Barrett (1862), I: 241, 244, 247, 248, 249.

All Saints' P. E. Church, which was organized on May 27, 1824, and the corner-stone of which was laid on Oct. 3, 1827, is opened for public worship. It is a substantial stone building on the southwest corner of Henry and Seamdall Sts. The land was conveyed to the church by Moses and Esther Leon on Sept. 28, 1827.—N. Y. Evc. Post, My 29, 1824; O 2, 1827; Liber Deeds, CXXVII: 441 Greenleaf, 85-86. See also Supp. L. M. R. K., in Vol. VI; and Pl. LIV, Vol. III. See also My 18.

Hunter Works.—The Manhattan Company are substituting iron pipes, for logs, through which water may be conveyed in sufficient quantities to all who wish to be supplied, within the sphere of their operations. A great improvement has also been made, by the construction of secondary reservoirs, near the grand one, which, in case of fires can throw the whole volume of water in the requisite direction.—Corn. Adw., Je 5, 1828. See Je 7.

Hone's records. The "Manhattan Company are laying down large Iron Pipes in Broadway, opposite to my House."—Hone's Diary (MS.), at N. Y. H. S. His residence was at 235 Broadway. See also N. Y. Evc. Post, Je 4, 1828.

James Monroe, "late President of the United States," visits New York, and the common council tends to him the hospitality of the city.—M. C. G. (1784-1811), XVII: 231. See also N. Y. Evc. Post, Je 6, 23, and 26, 1828.

The packet ship "Pacific" arrives at New York from Liverpool bringing news of war between Russia and Turkey.—N. Y. Evc. Post, Je 16, 1828.

The common council adopts a resolution to open and continue Cedar St. to the width of 35 feet from William to Pearl St.—M. C. G. (1784-1811), XVII: 247-48.

The common council requests the Committee on public offices to report to the board "the different Tenants who occupy the Building usually called the Scientific Institution [the N. Y. Institution, formerly the almshouse], the tenure of their Leases, and whether all or any of them ought to be required to provide accommodation for themselves elsewhere."—M. C. G. (1784-1811), XVII: 252. This was the first step towards transforming the building for occupation by the courts. See, further, Mr 23, 1829.

"The Corporation and their numerous guests set out this morning in the steam boat Sun, on their jouketing party to the Sing Sing State Prison. What right they have to expend the public money in this way, we have yet to learn. They might just as well get up a party at the public expense to go to Saratoga Springs, or to view the Aurora State Prison, or Niagara Falls. It appears by the proceedings of the Corporation that the committee of arrangements were unwilling to be limited in the expense to $1000, and how much will be expended for turtle soup, nabo wine, and Champagne, no one can tell. It is certainly time that there should be some check upon this irresponsible body in the disbursement of the public moneys."—N. Y. Evc. Post, Je 18 and 19, 1828; M. C. G. (1784-1811), XVII: 231-32. See, further, Mr 16.

An ornamental iron fence is being constructed around St. John's Park at a cost of $15,000.—N. T. Mirror, Je 27, 1828. See also 1833, and descrip. of Pl. 106-a, Vol. III.

The common council orders that the comptroller be authorised
1828 to borrow (under the direction of the finance committee and on such June terms as they may prescribe) the sum of $100,000 "for the purpose of July 30 paying to the State of New York the purchase money for the State Prison at Greenwich at an interest not exceeding Six per Cent."—M. C. C. (1784-1851), XVII: 275. See Mr. 28, 1826; Jl 25, 1828.

July

"To-day that unhallowed act, the tariff, commences to operate, and we are pleased to learn that all the gentlemen connected with the revenue department, manifest a very proper solicitude for the shipping and commercial interest. ..."—N. Y. Eve. Post, Jl 1, 1828.

3. The French Coffee House at Broadway and Fulton St. is offered for sale.—N. Y. Eve. Post, Jl 3, 1828.

4. Wm. Niblo removes from the Bank Coffee House (see 1814), and opens a hotel, garden, and theatre, at the n. e. cor. of Broadway and Prince St. He calls the theatre "Sans Souci." The famous "Nibo's prison house," which was rented on the opening night, was summerhouses, etc., and was considered somewhat remote from town. The theatre or entertainment saloon was in the centre. This subsequently gave place to a complete, permanent theatre, and the garden vanished."—Haswell, Reminiscences, 230; L. M. R. K., III: 985. For a view and an outline of the history of this property after 1812, see Man. Com. Coun. (1863), 631, 655. For view in 1836, see Niblo's Theatre, destruction by fire, 1828, by ibid. (1865), 632. Soon afterward the Metropolitan Hotel was erected on part of the same site.—Ibid., 635; L. M. R. K., III: 979, 985; and see S 13, 1851, and 1852.

The Sans Souci Theatre was "situated in the extensive garden of Mr. Niblo, in Broadway," and was "erected in the incredible short period of fifteen days." A descriptive and complimentary address in verse, which was rented on the opening night, was published in The N. Y. Mirror, VI: 7 (Jl 13). The Post said the theatre was "in the new Vauxhall Garden of Mr. Niblo, at the corner of Broadway and Prince streets. The situation is airy, healthy, and delightful for summer amusements, within the mile stone." It was to be occupied by the "Bowery company, under the management of Mr. Gilford, until the New-York house is complete to that of last year," and that it was the "first theatre in the United States; consisting of a theatre, 230; and rooms for 30 guests; and has deposited the amount to the state's credit in the Manhattan Bank.—M. C. C. (1784-1831), XVII: 309. Regarding the disposal of the property, see ibid., N 17, 1828; and see further, Mr. 9, 1829.

5. "We understand the Corporation of this City have recently purchased Blackwell's Island [see Jl 14, 1828], at the price of 32,500 dollars as a site for a new Penitentiary. The Island contains about 100 acres of land, and a great quantity of building stone. This location for a prison is considered judicious. The old state prison at Greenwich, which was purchased by the Corporation [see Mr. 28, 1826], will be used as a Penitentiary, until the contemplated new one at Blackwell's Island is erected "—N. Y. Eve. Post, Jl 5, 1828. See S 10.

6. The common council receives from the Rev. Stephen N. Rowan a copy of the Declaration of Independence engrossed on vellum, with him addressed to Mayor Weatherhead and that he presents it: "in the name of the contributors to the work," for use "at the successive Anniversaries of our great National Festival." It is accompanied by "a Certificate of the venerable Charles Carroll the last surviving signer of the Original Instrument." Rowan states that this copy was made "as the result of a suggestion made by me in an address delivered at the request of the Common Council, on occasion of the almost simultaneous death of John Adams and Thomas Jefferson" (see Jl 4 and 5, 1826).

"It is the most splendid Copy of the Declaration extant and the Certificate accompanying it, was written, without any recollection of the exact fifty [52] years after the Original signature." He adds:

"I trust, that the same Common Council, who were the first to render Elegiac Honours, to the memory of the man who wrote the Declaration, and of him, who eloquently plead for its adoption, will cheerfully take measures to give perpetuity, and publicity to the patriotic sentiments contained in a Document, written with his own hand and in his Ninetieth year by its last surviving Signer." The board accepts the gift and directs that the letter be "filed.—M. C. C. (1784-1851), XVIII: 283.

7. The following resolutions were offered by the committee on the almshouse and adopted: "Resolved that the Comptroller be authorized ... to issue a Warrant to James Blackwell for such sum as your Committee may direct not exceeding 15,000 Dollars; and a Bond of the Corporation upon the conditions agreed on for the balance [15,750] of the purchase money of July Blackwell's Island."

"Resolved that the Commissioners of the Alms House be authorized to take possession of said Island forthwith."

"Resolved that a Special Committee consisting of Seven members he authorized to cause a Map of said Island to be made, with the lines of High and Low water mark, and with the elevations; and to report the plan of a suitable building for a prison, together with the best mode of building and a proper site for the same."

8. James Blackwell's deed of his island to the city of New York (see Jl 14) bears this date.—Liber Deeds, CXXVIII: 287. Blackwell had previously deeded the island to Jas. L. Bell (see Ap 9, 1823). Bell died there on Jan. 12, 1825, and, by foreclosure of a mortgage which Blackwell held, the island came back into his possession.—Hoffman, Title on the Estate and Rights of the Corporation of the City of N. Y., I: 147. For the final disposition of the Bell interests, see Paige's Chancery Rep., X: 499; N. Y. H. S. Bull., Jl, 1921, pp. 40-41. On Sept. 11, 1844, the city paid $20,000 more to acquire the interest held by the Widow Bell.—Liber Deeds, CDL: 409. The city made this purchase of Blackwell's Island as the site for a penitentiary.—See Ap 11.

9. "While I am writing, I have, for a long time, been anxiously looking out for the demolition of the Jail and Bridewell, those carbuncular excrecences on the fair surface of the Park. We again call attention to this subject, because the foul condition of these buildings renders them actual pest-houses to all those confined within their walls. ... Down with the filthy receptacles!"—N. Y. Mirror, VI: 15 (Jl 19). For earlier paragraphs, see the D. R. of 1827, Jl 19, 1828. See, further, Ap 19, 1828.

10. The "Minnie house at the corner of North and Forsyth streets, erected by the liberality of a few individuals" is to be dedicated on this day.—N. Y. Eve. Post, Jl 26, 1828.

The comptroller reports that, agreeable to the authority 28 given by him to the common council on June 30 (p. 19), he borrowed, on July 19, $100,000 from the Bank for Savings to pay the state for the state prison and the state penitentiary, and has deposited the amount to the state's credit in the Manhattan Bank.—M. C. C. (1784-1831), XVII: 309. Regarding the disposal of the property, see ibid., N 17, 1828; and see further, Mr. 9, 1829.

11. The following distinguished persons have recently arrived in this city, and are present at the City Hotel, Broadway.—Count Survilliers and suite; Mr. Barbou, Minister of the United States to the Court of St. James; Don Joaquin Campino, Chilian Minister to the United States; the Right Reverend Bishop Inglis of Nova Scotia; Counta Saliaki and Dalverne; Beaufort T. Watts, Esq. Secretary of Legation to the Court of St. Petersberg; and Mr. Robert Owen, the celebrated Philanthropist."—N. T. Eve. Post, Jl 30, 1828.

12. The common council by an order of the Board of Aldermen orders the removal of the old market at the foot of Grand St., and that a new market, 75 ft. long and 27 ft. wide, he erected in this vicinity.—M. C. C. (1784-1851), XVII: 320-21; De Veg, 458-59. Cf. near by Manhattan Market, Mr. 26, S 10, 1827. The new Grand St. Market was finished the next year.—Ibid., XVII: 542. On the completion of the Monroe Market in 1816 (p. 83), into which the occupants of the Grand St. Market were transferred, the Grand St. market-house disappeared.

"De Veg, 459-60; L. M. R. K., III: 599.

13. The special committee on the survey of Blackwell's Island (see Jl 14), recommends to the common council that for the new penitentiary be about the centre of the island which is about 1,500 ft. from the south-western extremity, 20 ft. above high-water mark, and where the island is about 450 ft. wide. A stone building for 300 prisoners, modelled after Sing Sing prison, which shall be from 150 to 200 ft. long and 150 ft. wide, is advised. It is hoped to complete it by Jan. 1, 1829. The estimated cost is from $16,000 to $20,000. The committee is authorized to proceed with the building.—M. C. C. (1784-1851), XVII: 325. See further, S 10.

14. The special committee on gas is required by the board to cause the platform in front of the city hall and the walk between the large gates on the east and west side of the Park to be lighted with gas.—M. C. C. (1784-1851), XVII: 331.

15. The steamship "Curacao," constructed by a company of 12 merchants from Amsterdam and Rotterdam, sails from Antwerp.
Constitution
and
By-Laws
of the
New York Union Society
of Journeymen House Carpenters

Adopted Nov. 19, 1833

Convinced to publish but not to injure.

Initiated April 1834

TITLE-PAGE OF CONSTITUTION AND BY-LAWS OF "NEW YORK UNION SOCIETY OF JOURNEYMAN HOUSE CARPENTERS"
—AN EARLY EXAMPLE OF TRADE UNIONISM; DATED NOV. 19, 1833. SEE ADDENDA, VOL. VI.
The original text is not legible due to the quality of the image. It appears to be a document written in English, possibly a letter or a formal report, with multiple paragraphs and structured text. The content is not decipherable from the image provided.
The common council resolves to open 14th St. between The Bowery and North River.—M. C. G. (1784-1811), XVII: 405.

The common council resolves to cut down two hills, between Yorkville and Harlem, on the line of Third Ave.—M. C. G. (1784-1811), XVII: 428.

The common council refers to the committee on lands and places to resolution to place trees on the Washington Parade Ground.—M. C. G. (1784-1811), XVII: 473. According to the view of this ground, etc., which was published as the frontispiece of N. T. Ai Hs, In 1817, the committee acted favorably on the resolution.

The first "Manufacturers' Fair" is held under the auspices of the Am. Institute (see Ja), at Masonic Hall.—N. T. Ecc. Post, O, 1838. N. T. Ai Hs, In, 1833; 1834. See also My 2, 1829.

At a crowded meeting held at Tammany Hall, Andrew Jackson is endorsed for president, John C. Calhoun for vice-president, and Martin Van Buren for governor.—N. T. Ecc. Post, N 1, 1828. This ticket won in the city and state.—Ibid., N 5, 6, 7, 8, 10, 11, and 12, 1828.

Andrew Jackson and John C. Calhoun, Democrats, are elected president and vice-president. The National Republican candidates were John Quincy Adams and Richard Rush.—McKee, National Conventions and Platforms, 24-26.

The common council refers to the committee on arts and sciences a petition of Chas. B. Shaw, city surveyor, asking for the loan of "the Drawing of the City Hall for the purpose of having on the site of the old Engraving made of the same."—M. C. G. (1784-1811), XVII: 449.

The common council grants a permit to a contractor to cut through the bulkhead on the south side of Stanton Slip so that his scows may pass through to fill up the basin at this place.—M. C. G. (1784-1811), XVII: 454.

The common council adopts a report and resolution which requires the committee on wharves, piers and slips to cause West St. to be extended across the slip or basin at Washington Market between Fulton and Vesey Sts. The report contains, in part, the following facts:

West St. is "a great leading Street along the Margin of the North River, and a principal Channel of communication for the very extensive trade of the West part of the City (which will be greatly increased by the recent establishment of a Line of Tow Boats between Courtland and Fulton streets and the erection of an extensive range of Stores between those Streets along the Easterly side of West Street) . . ."

"The said street now extends from the Albany Basin (across which it has been ordered to be continued) and at Washington Market Basin, and it will shortly be extended from the State Prison so as to unite with the Tenth Avenue above Fort Gansevoort, when that shall be done, and the street continued across the Washington Market Basin, and the Tenth Avenue be opened it will form a direct and uninterrupted communication from the Albany Basin to Kings Bridge at which place the said Avenue terminates."

Washington Market Basin, in its present state, is a great impediment to trade to the free intercourse which ought to be between the upper and lower parts of the City along the North River as all persons passing from one to the other along West street, are under the necessity of going round Washington Market into Washington street which, during the business hours of the day, is so much obstructed by Market Carts and Wagons as to render the passage of other Carriages almost impracticable. . . ."—M. C. G. (1784-1811), XVII: 467-69. See also Je 10, 1794, and description of Pl 71, I: 456.

The common council refers to the committee on gas a resolution to light Wall St. with gas; and another to purchase 590 iron posts for gas lamps when this "can be done to most advantage."—M. C. G. (1784-1811), XVII: 469.

The common council resolves to apply to the legislature for the passage of an act requiring electors to register annually some time before the day of election.—M. C. G. (1784-1817), XVII: 470.

"We believe that the time is now arrived when public opinion has become almost, if not quite, unanimous respecting the illegibility of the President, tho' not respecting the length of time for which he shall be chosen; it may, therefore, be expedient to make it a special subject of discussion in the Committee of Council; and to the proposed amendments of the Constitution. Taught by experience, we would throw out for consideration several amendments respecting the Chief Magistrate. First, that he be chosen by a plurality, instead of a
A cargo of coal, "the first fruits of the Delaware & Hudson Canal," arrives from Kingston.—Memorandum by Hone's daughter, on inside of cover of Diary of Philip Hone (MS.), Vol. I. See also 682.

10

The common council authorizes the finance committee to contract for the purchase of land for a market on the east side of Third Ave., nearly opposite its intersection with the Bowery Road, and bounded "in front by the Avenue, on the north by Seventh, and on the south by Sixth Street." It comprises 8 lots of 22 ft. 3 in. each, making a front on Third Ave. of 181 ft. 8 in., and 100 ft. in depth along 6th and 7th Sts.—M. C. G. (1874-1875), XVII: 517-19; Market Book, 590. See law of Apr 25, 1875—Lease of N. Y. (1879), chap. 267. See, further, 5, 7.

15

The new state prison at Sing Sing (see Apr 18, 1825) has been completed. It cost $138,500.—N. Y. Ev. Post, D, 17, 1828, citing West Chester Herald, D, 18, 1829.

The common council accepts an invitation from Wm. A. Coleman to visit the "Literary Emporium" at "Park Place House."—M. C. G. (1874-1875), XVII: 535. A view of "Coleman Literary Rooms, Broadway, New York," was published in Hinton's Hist. of the General Soc. of Mechanics and Tradesmen, called originally Mechanics' Hall, at the n. w. cor. of Broadway and Park Place.—L. M. R. K., III: 958.

The common council resolves to widen Ann St. on both sides between Broadway and Nassau St.—M. C. G. (1874-1875), XVII: 538.

The city buys land of Charles Henry Hall (0.229 acre) at Third Ave. and E. 27th St.—Prendegast, Record of Real Estates, 49, citing L. M. R. K. Here the present Cooper Park was afterwards laid out.—L. M. R. K., III: 960.

The "Delaware and Hudson Canal."—This great work has been completed, and an immense quantity of coal and wood has already been transported to our wharves and yards. . . .

—N. Y. T. Mirror, VI: 199 (D 27, 1828).

James Kent, president of The New York Historical Society, delivers before that body the "Anniversary Discourse," in which he traces the history of the colony of New York from its discovery by Hudson to the establishment of an independent state, and lauds especially Director General Stuyvesant and Gen. Philip Schuyler.

8

The common council resolves to open and continue Fifth Ave. from 12th to 21st St.; to open 15th St. from the Bowery to the Hudson River; and to open 17th St. from Bloomingdale Road to Sixth Ave.—M. C. G. (1874-1875), XVII: 544. The same resolution was again passed on Feb. 5, 1829.—Ibid., XVII: 614. Regarding 17th St., see also ibid., XVII: 654-55.

1829

In this year was published, under the direction of the N. Y. Hist. Soc., The History of the Late Province of New-York, from its discovery to the appointment of Governor Golden, in 1762. By the Hon. William Smith, Formerly of New York, and late Chief Justice of Lower Canada, in 2 vols. This is the continuation of Smith's history of this province, which was first published in London in 1759 (q. v.), and which carried the provincial history only to 1772. A second edition of this continuation was printed in 1790. The original manuscript volume, in Smith's autograph, is owned by the N. Y. Pub. Library. See reproduction of a specimen page in Vol. IV, Pl. 35-b. Smith "arranged" this continuation of his history "at the Manor of Livingston in 2 Months before the 20 March 1777."—See Je 3, 1777. For bibliographical notes respecting his diaries, etc., now in the N. Y. Pub. Library, see My 6 and Ag 26, 1778.

Apparently, it was in this year that Sam'l F. B. Morse began to work on his electric telegraph. He wrote to J. Fenimore Cooper under date of "Irving House, New York, Sept. 5th, 1829," thus:

"I was agreeably surprized this morning in conversing with Prof. Renwick to find that he corroborates the fact you have mentioned in your Sea Letters, that Morse had previously questioned as implying too early a date, respecting the earlier conception of my Telegraph by me, than the date I had given, and which goes only so far back in my own recollection as 1832. Prof. Renwick insists that immediately after Prof. Dana's Lectures at the N. Y. Athenaeum, I consulted with him on the subject of the
1829

velocity of electricity, and in such a way as to indicate to him that

— I was contriving an Electric Telegraph. The consultation I re-
member, but I did not recollect the time. He would depose that it was
before 1829; this makes it almost certain that the impression you and Mrs.
Cooper and your daughter had that I conversed with you on the
subject in 1831 after my return from Italy is correct.

"If you are still persuaded that this is so, your deposition before the
Commission in this city to that fact will render me an incalculable
service. I will cheerfully defray your expenses, and you from
the city will meet me here this week or beginning of next.

—Correspondence of James Fenimore Cooper (1829), II: 633-34;
see also 620. This inquiry had an important bearing on the ques-
tion of priority of invention, claimed for Joseph Henry. See 1830
(p. 1688). Morse perfected his invention in the N. Y. University,
Washington Square—Chamberlain, N. Y. University (1901),
I: 568-81. Appendix, Ibid.

In this year, Louis Braille, a French teacher, devised his point
system of writing for the blind.—International Ency., III: 661.

In this year, Henry Clay became the leader of the Republican
party.—Winston, VII: 281.

In this year, the first volume of the Revised Statutes of the State
of New York was published, to be followed soon by the rest of the
work. The "changes necessary by it were far reaching, and radically
altered a large portion of the previous law, especially that relating
to uses and trusts and powers. It substituted a simple and precise
code as to the creation and alienation of estates, and simplified
and reduced to more of certainty the practice of the courts."—Personal
recollections of the Hon. Benj. D. Silliman, in Hist. of the Bench
and Bar of N. Y. (1777), I: 91.

In this year, the prisoners in the state prison at Greenwich were
removed to Sing Sing—Eddy, Account of the State Prison, 16-20;

In this year, the manufacture of bricks by machinery was be-

In this year, a bridge was projected, to be built from the foot
of Maiden Lane to the high enough to allow the large ships
to pass under it; its estimated cost being $600,000.—N. Y.

In this year, the "Old Sketch Club or The XXI" was estab-
lished. For an outline of its career, see Howe's Hist. of the Met-
ropolitan Museum of Art, 84-85; citing John Durand's Life and Times
of A. B. Durand, 90, 97. The "Sketch Club" was formed as a
fraternity of artists. It soon welcomed members of other professions
interested in art, among them being Bryant, Verplanck, and Sands.
—Lamb, Hist. City of N. Y., II: 707; Wilson, Mem. Hist. of N. Y.,
IV: 556. From this club was evolved the Century Club, in 1847
(9:7, Ja 17).

According to De Voe, the first meat-shop, not in a public market-
house, was opened in this year by Henry Cornell. This was due to
the men who were in a state of bankruptcy, and compelled to
serve the old Spring St. Market, when it was about to close, to take
stands in the new Clinton Market by competitive bidding. "Those butchers "who bad
money" were obliged to buy their new stalls at very high prices,—
so high that Cornell, unable to purchase, established himself in
a meat-shop. He was supported by many citizens who thought
the corporation should have given the butchers who had stands in
the Spring St. Market the choice of stands in the Clinton Market; and,
although often covertly, yet "his friends assisted him to baffle
the Corporation, and, in fact, to make it appear that our public
markets," as then conducted, were a monopoly. This led on others
to open "shops"; although some were fined and imprisoned, yet
they succeeded, and a law was established in favor in 1834.

An English traveler, visiting this country, writes of New York: "The main street, called Broadway, is two miles and a half
long, in a straight line, and proportionably wide, with broad flagged
trottoirs or side-walks, some parts of which are shaded by poplars
and other lofty trees; but in the quarter devoted to business,
canvas blinds are stretched from the shops to permanent wooden
railing... . The buildings, however, do not at all correspond with
the magnificent scale of the street, the greatest irregularity prevailing:
handsome edifices of brick, and even marble, of four and five
stories, being side by side with those of two or three, and in some
parts actually intermixed with miserable wooden cottages. . . .

1829

"Of the edifices dedicated to commercial purposes, the Mer-
chants' Exchange, and the Bank of the United States, are the
most considerable. The façades of both these structures are of
white marble, and in a good style of architecture... .

"Underneath the Exchange is the Post Office.

"In the immediate vicinity are concentrated almost all the principal
banks, insurance offices, newspaper offices... ."—
Boardman, America and the Americans (London, 1835), 22, 47-48.
New York, and the avenues leading to the ocean, are strongly
fortified, with beacons to guide the vessels to and from the
city."

—Castle William and Fort Columbus stand on Governor's
Island, . . .

—Fort Wood is on Bedloe's Island, and Crown Fort on Ellis's
Island, . . .

—Castle Clinton, on the west battery, is situated at the south-
western angle of Manhattan island. The latter, with forts William
and Columbus, command the head of the bay, and the mouths
of East and Hudson rivers.

"North Fort is on the Hudson, a mile and a half north of fort
Clinton."

—Fort Gansevort is still higher up.

"Besides these there is a fort at Hurl Gate, eight miles northeast
of the city, which secures the entrance on the side of the sound.
"Fort Fayette is within the narrows. Forts Richmond and
Tompkins are on Staten Island, over against fort Fayette. The
Narrows are seventeen hundred and sixty yards broad.
"The possession of Long Island and Staten Island, in time of war,
is of vital importance to New York, since he who possesses them
can dictate laws to the city."—Hist. of the State of N. Y., by James
McGaw (1855), II: 88-89.

In this year, New York had eleven public schools, under the
direction of the Public School Society.—24th Ann. Rep. of the
Trustees of the Pub. Sch. Soc. (1829).

The opening of 12th St., in this year, and later the opening
of 11th St., cut off a part of St. Mark's churchyard.—Memorial
St. Mark's Church (1839), 135.

Brooklyn, this year, Richard Patten published a map, from a survey
by E. W. Bridges, city surveyor, showing the entire island
of Manhattan, and including parts of Brooklyn, Jersey City, Hob-
oken, &c.—See map No. 340, filed in bureau of topography,
brother president's office, dept. of public works, Municipal Bldg.
See also descrip. of Pl. 80-b, III: 549.

The Raritan Canal, connecting the Hudson and Delaware
Rivers, was under construction at this time.—M. G. C. (1874-
1875), XVII: 570-77.

The "anniversary of the glorious victory of New-Orleans,
and the election of General Jackson to the presidency of the
United States," are celebrated "in a manner corresponding with
the grateful feelings of a free people." The festivities include a "great
dinner" at Tammany Hall, a military ball at the Bowery Theatre,
and other affairs to the various wards, gardens, etc.—N. Y. Eve.
Post, Ja 8-13, 1829.

The new building of the N. Y. City dispensary, at the north-
west cor. of Centre and White Sts., is completed and opened.—
N. Y. Mirror, VII: 223 (Ja 11, 1829).

The Clinton Hall Association purchases the "plot of ground
100 feet square, fronting the Brick Church, in Bedeman street,
... that for the erection of a building in conjunction with the New-
York Athenaeum."—N. Y. Eve. Post, Ja 22, 1829. The lots frosted
on Bedeman St. between Nassau St. and Theatre Alley.—Ibid.,
Ja 29, 1829. See, further, Mr 26 and Ji 11.

"The editor of the Post writes "Park Theatre.—We perceive
with utter astonishment, and no less astonishment, that the
letters of this theatre have agreed to let it for six nights
all the pleasures of the people? Suppose the singular spectacle of a female,
publicly and ostentatiously proclaiming doctrines of Atheistical
fanaticism, and even the most abandoned lewdness, should draw
down the crowd from a pure and virtuous curiosity, and that a riot should ensue,
what should end in the demolition of the interior of the building
or even in burning it down, on whom would the loss fall? Would the
policy of insurance against fire, which describes it as a building
devoted to theatrical exhibitions, extend to exhibitions of a very
different description, and which must attract a very different
order of people? This is a question for the Insurance Offices
THE ICONOGRAPHY OF MANHATTAN ISLAND

1829 seriously to consider as well as the proprietors and lessees. It is also a question for the public authorities to reflect upon. Is there no danger of collecting an unruly mob which nothing perhaps can restrain short of public force and bloodshed itself?—"N. Y. Evc. Post, Ja 26, 1829. The next day he added: "We are sorry to perceive . . . that Frances Wright means to persist in her determination to appear this evening at the theatre. We hope nothing will happen of a dangerous or even of an unpleasant nature. We presume that no modest woman will be seen there."

Feb., 1829. Miss Wright delivered her first lecture on "Knowledge," on Jan. 27, and there was apparently no disturbance.—Ibid., Ja 27, 1829. The other lectures were delivered on Jan. 29, 31, Feb. 3, 5, and 7—ibid., Ja 29, 31, F 3, 4, 7, 1829.

The common council changes to Barrow St. (see S S, 1825) the name of that part of 4th St. which lies west of Washington Parade. It also changes the name of Pump St. to Walker St.—M. C. (1784-1817), XVII: 598.

Feb. 1829. The architectural firm of Ithiel Town and A. J. Davis was formed in this month, with offices in the merchants' exchange. For a list of their more important works, see Dunlap's Hist. of the Arts of Design (Goodspeed ed.), III: 212.

The "Chatham Theatre with its appurtenances, which have undergone so many changes since the death of the late Mr. Barrere, has at length been taken on by one of our native citizens, Mr. [James H.] Hackett, for the purpose of converting it into an Opera House. . ."—N. Y. Evc. Post, F 2, 1829. See also advertisement in ibid, F 3, 1829. See, further, My 20.

Mar. "A Soup House is established at the corner of Mercer and Houston-streets, where the poor will be gratuitously supplied with soup this afternoon. This establishment was got up by and is under the direction of Moses Field, Esq."—N. Y. Evc. Post, Mr 1, 1829.

An elaborate masquerade ball is held at the Park Theatre.—N. Y. Evc. Post, Mr 5, 1829. Another one was held there on March 19.—Ibid., Mr 20, 1829.

Andrew Jackson's administration as president begins.—Winson, VII: 283, 348. His inauguration is celebrated in New York by the firing of salutes from Whitehall, Forts Stoddard and Ganneroort, Governor's Island, the Navy Yard, and the Narrows, and by a military parade, and a display of flags.—N. Y. Evc. Post, Mr 4, 1829.

Mar 1829. "A public meeting will be held at Masonic Hall this evening at 7 o'clock, to take into consideration the propriety of forming a Society for the Promotion of Temperance."—N. Y. Evc. Post, Mr 9, 1829.

The following report on the subject of providing a fire-proof building for the preservation of the city records is presented to the common council by the joint committee to which was referred a memorial of the register of the city respecting the necessity of securing the records of his office from danger by fire, in consequence of the accumulation of books, and requiring the committee to make further arrangements for more room; to which com., was likewise referred the resolution of Sept. 24, 1827 (9.5). The committee finds "that the records of the Courts, which are evidences of the titles of property to the amount of many Millions of Dollars; The great importance of your Registrars Office, as respects real estate, likewise your Comptrollers Office and your Street Commissioners Office, which has already been on fire, and was very near being destroyed, And further, that in consequence of the necessity of having fire and light at all times of night, in all parts of the building [the city hall]; and the necessity of allowing free access to every part of it, to all classes of Citizens, and the Records Books Maps &c being of a combustible nature, do consequently greatly endanger this valuable building. The Committee are therefore of opinion that a suitable fire proof building should be provided as soon as possible. And the Committee beseech farther to state, that they have carefully examined the Deobars Guild, which is soon to be vacated, and find that it will answer every purpose, for the fire proof building proposed. Its walls are of the best quality, and built in the most substantial manner, the interior is divided in a suitable manner with Stone Partition walls to every Room 22 inches thick, and consequently will only require the wooden floors taken out, and the arches in the basement cut in the same manner as are made of Iron, and the outside finished in a handsome manner, its roof to represent marble; a flat Copper or Stone roof, with a neat balustrade all round thus giving you at a comparatively small expense a handsome building of 60 by 75 feet containing 14 fireproof rooms, ten of which are 18 by 19 and four are 19 by 26 feet, the said rooms being sufficiently spacious for all the purposes required. And further, the advantages of making use of the said walls, are as follows: The age of the Walls has made them permanent to receive the pressure of the arches, which if you were to build a new one would require the outside walls to be double the thickness to be of equal strength—the present walls are perfectly dry, and can be made ready to receive your Records &c in nine months, Whereas a new building could not be used for several years without destroying your papers in consequence of the dampness of your Walls. The probable cost, according to a rough estimate made by your Committee, for the alteration of said building as above proposed (the minute description of which is not inserted here) will be from 15 to 20,000 Dollars and your Committee are of opinion that the cost of erecting a new building of the same dimensions from 30 to 40,000 Dollars making as having by using the walls of the present Jail of one half the expense, independent of the advantages of having the use of the building for the purposes for which it is required much sooner than if you were to build a new one." The committee therefore offers a resolution that a committee be directed "to procure a plan representing the proposed alteration of the present Jail, and in the usual manner its cost estimated. This report was not entered of record until July 26, 1829.—M. C. (1784-1817), XIX: 185-87. See, further, J1 12, 1829.

The common council adopts a resolution to continue Charles and Amos Sts. from the state prison grounds to West St; and to authorise the finance committee "to have the said Ground laid out in parcels and Lots and and advertise and sell the same at Public Auction in such Lots and parcels as such Lot and parcels may think proper reserving the buildings and materials upon the said premises to be afterwards disposed of and sold as the said Committee shall think most advantageous for the interests of the City."—M. C. (1784-1831), XVII: 689. See, further, Mr 27, Ap 22 and 28.

The special and finance committees, to which were referred memorials from the trustees of the public schools and from others on the subject of extending the system of public schools, report to the common council statistics regarding the diffusion of elementary education in New York City. It is resolved that application be made to the legislature for the passage of a law authorising the common council annually to lay a special tax of one-eighth of one percent to be applied exclusively to the support of common schools in the city of New-York.—M. C. (1784-1831), XVII: 606-702. See Laws of N. T. (1829), chap. 265.

The common council adopts a resolution to open 13th St. between the Bloomingdale Road and the Fitz Roy Road.—M. C. (1784-1831), XVII: 704.

The common council refers to the committee on repairs and public offices a resolution to examine and report on "the propriety and expediency of fitting up in a proper & Convenient manner the Building in Chamber street belonging to the City called the Rotunda for the occupation of the Court of Sessions—And also their opinion as to the propriety of erecting a convenient Edifice adjoining the said Rotunda on Chamber street for the accommodation of the Police Office and Grand and Petit Juries."—M. C. (1784-1831), XVII: 705. For the report of the joint committees, see Mr 16.

The joint committee on the Rotunda (see Mr 9) makes a preliminary report, which states that "it will be a great accommodation to the Public and relief to the City Hall that the said Rotunda be repaired and properly fitted up, for the use of the Court of Sessions and other Courts for the Trial of Criminals—The walls on examined are of sufficient solidity & Strength and that the said building is of ample capacity, to be converted into a convenient and elegant Sessions Room or Hall." The board accepts this report and refers it to the committee on repairs "to take proper measures to obtain possession of the Building . . . in behalf of the Corporation," and to "proceed to cause [it] to be fitted up and repaired
Invention and Prosperity: 1815-1841

... for the purpose mentioned in their Report without any further action of the Common Council."—M. C. C. (1784-1831), XVII: 712-13. This purpose prevented further exhibitions of panoramic paintings there.—Ibid., XVI: 715, 744. Friends of Mr. Vanderlyn, who erected the Rotunda in 1817, protested against the corporation's action.—N. Y. E. P. Rec., Mr. 21, 1829.

San migration to New York. Mr. Stevens, esq., made a report to the common council in favour of establishing a well and reservoir in 14th St., whence water for extinguishing fires may be distributed in iron pipes. The report is approved, and the committee is directed to carry it into effect.—M. C. C. (1784-1831), XVII: 712-26. On April 29, the board approved a contract made by the committee with Mark Richard, a printer, for printing and conveying Water into the City."—M. C. C. (1784-1831), XVIII: 254. See further, My 4.

Crimes and outrages are committed "almost daily" in the neighbourhood of the Five Points, "which has become the most dangerous place in our city."—N. T. E. P. Rec., Mr 19, 1829.

Gov. Martin Van Buren arrives in New York on his way to Washington to take up his duties as secretary of state, to which office he has recently been appointed by Pres. Jackson. He left on March 24. A public dinner was planned for him, but lack of time forced him to decline the honour.—N. T. E. P. Rec., Mr 25, 1829.

The common council adopts a complimentary resolution, tendering the freedom of the city to Martin Van Buren, the secretary of state (1784-1821).—M. C. C. (1784-1831), XVII: 474-76. N. Y. H. S. Coll. (1855), 414-17. On April 4, he wrote his acceptance and thanks.—Ibid., XVIII: 2. See further, Je 8, 1821.

As Fourth, Fifth, and Eighth Aves., and 125th and 129th Sts., in Harlem, "are opened and worked into good Roads by the proprietor of the Grounds through which they pass," the "Old Road" is no longer required by the public as a passage-way. The owners of all the grounds between the Third and Eighth Aves. and 125th and 129th Sts. are prepared tocede to this Corporation all the remaining Streets and Avenues not yet opened, and work the same at their individual expense." The common council therefore adopts a resolution "that the proprietors of the Grounds, lying on and adjoining the Old Road or Lane between the 125th and 129th Streets be permitted to close the same on the conditions expressed."—M. C. C. (1784-1831), XVII: 732.

The committee on public offices finds "it is necessary to make farther provisions for Juries and Courts of Justice and other public objects," and the common council orders "that the Clerk give notice to all the occupants of apartments in the buildings in Chamber street, that the Rooms occupied by them are wanted for the use of the City, and that they will be vacated before the first day of August next."—M. C. C. (1784-1831), XVII: 733. Reference here is to the N. Y. Institution (formerly the almshouse) and the Rotunda. The order led to requests for extension of time, etc., on the part of the Lyceum of Natural History, the Am. Academy of Fine Arts, and the N. Y. Literary and Philosophical Soc.—Ibid., XVIII: 33-34, 34, 76. See further, My 31, 1830.

The common council passes an ordinance that the council of the board take the usual measures for opening McDougal St. from 6th to 8th Sts.—M. C. C. (1784-1831), XVII: 715.

The common council approves a resolution that 6th St. be opened from Broadway to the Bowery. This will open a direct communication from the East to the North River along the market to be built near Third Ave., and also along the Washington Parade.—M. C. C. (1784-1831), XVII: 716.

The common council adopts the following resolutions: (1) To reserve the front ground on West St. between Christopher and Ams Sts. to the depth of 50 ft. for the purpose of erecting a public market-house thereon; (2) to open a street, to be called "Wehauken Street," in the rear of said market ground, to be 50 ft. wide and to extend from Christopher to Ams St.; (3) to sell the grounds belonging to the corporation on Christopher, West, and Barrow Sts. with the state prison grounds.—M. C. C. (1784-1831), XVII: 750; De Voe, Market Bond, 576. See Ja, 1834.

The Clinton Hall Association offers a medal worth $254 for the "most approved plan" for their projected building at Beckman and Nassau Sts.—N. Y. E. P. Rec., Mr 26, 1829. See Ji 11.

The common council resolve that the common council's resolution for tearing down the state prison (cf. Mr 9), the Post says: "This may be well; but we would ask with all deference whether to have commenced with the City Prison would not certainly have been better? But perhaps some honorable members of the board, being particularly gifted in the article of taste, look upon this latter establishment (the same not being in the ninth ward) as a very ornamental sort of concern. The rear of it, covered with sundry nameless, though by no means smell-less architectural structures, is preserved, we presume, as a forecourt to the City Hall, and as a sort of snuff box to those of its honors. It is the duty of a body corporate to keep up a high character for taste, and possibly the saying may be equally true of the oligarchy of a body corporate.

"Quere—Has not the Bridewell been once indicted by the Grand Jury as a nuisance? If so, we should like to see it tried and sentenced to be transported to the "Five Points," or some other place out of sight."—N. T. E. P. Rec., Mr 19, 1829.

The common council resolves to number the houses in Vesey St. from Canal St. to the Hudson River, and likewise the houses in Desbrosses St. from Hudson St. to the river.—M. C. C. (1784-1831), XVII: 736.

Privileges to "the Firemen of the City of New-York" are granted by the legislature. A service of eight years (in some cases, seven) as fireman shall exempt the person "from serving as a juror in any of the courts of this state, and from all militia duty, except in cases where the militia are ordered into actual service."—Laws of N. Y. (1829), chap. 100.

The apothecaries of New York have formed an association under the title of the College of Pharmacy, for the purpose of improving the sale of drugs and elevating the character of those engaged in this business.—N. T. M. Rec., Apr 4, 1829.

The editor of the Mirror discusses the subject of a junction to be made of Broadway with Fourth Ave., saying in part that it has been suggested to him that "... after a junction between [Broadway] and the avenue shall have been effected—which can now easily be done, and at so small an expense—the name, which is at once so appropriate and significant, should designate the whole line from the Battery to Harlem river, and that it should be known and distinguished by no other appellation than that of Broadway. In this we heartily concur; nor are we without the conviction that the great body of the citizens would give it their cordial assent...."—N. T. M. Rec., VI: 311 (Ap 4, 1829).

The common council adopts a resolution "that Martin Van Buren late Governor of this State be requested to sit for his portrait to be placed in the City Hall."—M. C. C. (1784-1831), XVII: 777. In his letter of appreciation, dated Washington, April 15, he says: "I shall select the Artist and enable him to perform the work at the first leisure moment."—Ibid., XVIII: 3 (where the original of this letter, now in the city clerk's record-room, is reproduced). The portrait is by Inman, 34, 76, for this portrait.—Ibid., XVIII: 147, 256, 515. The frame cost $100.—Ibid., XVII. See also Cat. of Works of Art Belonging to the City of N. Y., 18. The portrait is reproduced in The N. T. Atlas Mag. (1834).

The common council, by resolution, changes the name of Beaver Lane to Morris St.—M. C. C. (1784-1831), XVII: 766-67. It also changes the name of Herring to Bleeker St.—Ibid., 768.

The common council resolves that on May 1 work begin on opening and continuing Cedar, 8th, 9th, 10th, 11th, and 12th Sts.—M. C. C. (1784-1831), XVII: 767.

The Lafayette Theatre (see Ap 8, 1833) on Laurens St. is destroyed by fire. Four adjoining houses in Laurens St. and several back buildings, three in Thompson St. and four in Canal St., are also consumed.—N. T. E. P. Rec., Ap 10, 1839. The site of the theatre is now occupied by St. Alphonsus Church.—L. M. R. K., III: 924.

Clinton Market at the foot of Canal and Spring Sts. is opened.—N. T. E. P. Rec., Ap 16 and 20, 1829. See also ibid., Ap 21.

The police and the jail and bridewell committees, to whom jointly was referred a petition "for taking the Triangular block called the Five Points & building thereon a Bridewell & Watch House," report to the common council that it is inexpedient to erect a bridewell there, and are sustained by vote of the board. The report, referring to this neighbourhood, says that "the Five Points is a place of great disorder and crime, and that it would be particularly desirable to rid the City of the Nuisance complained..."
1829 of, and were it a suitable place for a Bridewell, they would be
willing to see the Corporation make some sacrifices for the im-
provement of the part of the City referred to . . .

"Your Committee know of no public use which this block if
taken could be put to, and it would probably be valued high to
the Corporation as it produces a great rent on account of its
being a good location for small retailers of liquor, who have ex-
tensively located themselves in this vicinity. What may be con-
sidered as the Nuisance has in reality increased the Value of the
property . . .

"Your Committee know of no instance (and the precedent
would be a bad one) of the Corporation buying ground to convert
the same into a Square . . ."—M. C. C. (1784-1831), XVIII: 11-12.

Five Points is the intersection of Baxter, Park, and Worth Sts.
—L. M. R. K., III: 1500. For views of this locality at various
periods, see Man. Cen. Curr. (1853), 180; (1852), 112; (1850),
378, 396; (1868), 377, 435; (1869), 367, 369; (1870), 499, 517.

The state prison grounds at Greenwich are sold at auction.

"They were divided into 100 lots, 9a. of which were sold for $17,000
—averaging $14,000 per lot. The remaining eight lots were reserved
by the Corporation. The buildings were not sold. This property
was purchased by the state of the corporation of this city some time
ago for $100,000 dollars."—N. T. Env. Post, Ap 23, 1829. See also Ap
18.

The old Circus on Broadway (see My 29, 1827) is converted
into a repository for the sale of horses, carriages, etc., a riding
school and livery-stable, and is named Tattersall's after the one in
shown in Horner's view (see Pl. 113, Vol. III); and see also the history
of the site under "City Assembly Rooms," in L. M. R. K., III: 987.

The public square designated the "Parade" on the map of the
commonal of 1827, which was altered and reduced in size by
the act of April 15, 1814 (q.v.), is now discontinued by a new act of
the legislature. Fifth Ave. is continued northward through this
land, uniting with itself (its northern section) at 31st St.; and 24th,
25th, 26th, 27th, 28th, 29th, and 30th Sts. are extended westward
from Fourth Ave. through this land as far as Sixth Ave.—Laws of
N. Y. (1829), chap. 269. This was the result of action taken by the
common council on Feb. 28, 1826; March 31, 1828, and March 16,
1829.—M. C. C. (1784-1831), XVI: 217; XVII: 82-83, 726. See,

The legislature passes an act "for the Prevention of Masque-
raades" in any public hall, theatre, public garden, etc., to which
admission fees are aadmitted.—Laws of N. Y. (1829), chap. 270; M. C. C.
(1784-1831), XIX: 32. See, however, as regards the buildings in
Greenwich formerly occupied as a state prison for $4,827, "with the exception of the centre building, which is supposed to be worth a larger sum." The lots reserved by the
Corporation are to be used for a market to be called "Greenwich Market."—N. T. Env. Post, Ap 30, 1829, citing Jour. of Commerce.
See also Ap 22. See, further, My 17.

To create a fund in aid of "the Society for the Reformation of
Juvenile Delinquents, in the City of New York," the legislature
passes an act requiring excise collectors (provided for in the act
of Ap 10, 1824) to demand $1.50, in addition to the sum already
required by law, upon issuing a license to a "tavern-keeper, grocer
or keeper of an ordinary or victualling house or public garden," and
the additional sums so collected shall be turned over to the
Society. Likewise the manager or proprietor of every theatre or circus is now required to take out a license, to be
granted by the mayor for one year, and pay a fee of $500 if a
theatre or $250 if a circus. These fees shall be given to the
Society. The act also requires that the commissioners of health shall
render an annual statement to the comptroller of all "Hospital
monies" received and disbursed for the Marine Hospital, and for
official expenses.—Laws of N. Y. (1829), chap. 302. See also
M. C. C. (1784-1831), XVIII: 32.

A meeting of citizens is held at Masonic Hall, after notice in
the daily papers, "to take into consideration the subject of providing
for a salutary and prompt amendment to the city charter."

It is resolved that the present organization of our local govern-
ment is not adapted to the altered exigencies of the city, but
is essentially defective in those checks, balances and securities against
abuses, the necessity and efficacy of which have been declared by
our wisest statesmen, and demonstrated not only in the general
government, but in every state in the Union."

It is the opinion of the meeting that the calling of a city conv-
enion is the proper mode of revising the charter and discussing the
measures of the proposed amendment. The meeting approves the ordinance now before the common
council making provision for calling such convention, and passes a
resolution that a copy of the proceedings of this meeting be
presented to the mayor with request that he lay them before the common
council at its next meeting.—N. T. Env. Post, My 1, 1829.

In this month, the locomotive called the "Stourbridge Lion." Mr.
arrived from England on the ship "John Jay," for the Delaware
and Hudson Canal and Railroad Co. It was landed at the wharf
of the West Point Foundry works, foot of Beach St., and was the
first steam locomotive in the city. It was sent to Honesdale, Pa.,
where it was tested on Aug. 8,—the first locomotive to be run upon
a railroad in America.—Hist. of the First Locomotives in Am., by
Wm. H. Brown (N. Y., 1874), 75-93; The Stourbridge Lion. The
First Locomotive to turn a Wheel on the Western Hemisphere, by
Edw. A. Penniman (Honesdale, 1902). See also My 27, 1829; 1830;
and 1831.

The legislature incorporates the "New-York Sacred Music
Society," to cultivate sacred music, and for charitable purposes.—
Laws of N. Y. (1829), chap. 345.

The common council designates the "Penitentiary at Bellevue"
as a proper place of confinement for "the female convicts now
confined in the Prison formerly known as the State Prison at
Greenwich," and those who hereafter may be "received for the
purpose of confinement" by the city according to "An Act relative
to the improvement within the City and County of New York of
female convicts adjudged to be confined in the State Prison,"
passed April 23, 1829.

It is also resolved that as soon as the penitentiary at Bellevue
shall be approved "by the Commissioners for building a New
State Prison at Mount Pleasant," it shall be so used "under the
direction of the Commissioners of the Alms House." It is ordered
that "the Council of the Board be instructed to proceed forthwith
to Albany to obtain the approbation of the Commissioners," or to
procure the passage of a law authorising the common council to
appropriate "any prison now erected or to be hereafter erected
within the said City and County for the confinement of the Female
Convicts."—M. C. C. (1784-1831), XVIII: 31-32. On May 4, the
council reported that he had obtained the commissioners' approval.—Ibid., XVIII: 39-39.

Legislation passes the "American Institute in the City of New
York" (see Ja, 1828), to encourage and promote domestic industry in the United States, in agriculture, commerce,
manufactures, and the arts.—Laws of N. Y. (1829), chap. 348; N. Y. As Its Is, In 1833, 799 and see M. C. C. (1784-1831), XVIII:
274.

The common council accepts an invitation of the N. Y. Nat.
Acad. of Arts and Design to visit its fourth annual exhibition, at
its new location, the "Arcade Baths," on May 9 at 12 o'clock.—M. C. C. (1784-1831), XVIII: 34. For the first exhibition (in the
Rotunda), see My 8, 1826.

The Spring St. Market is sold.—M. C. C. (1784-1831), XVIII:
49-54; De Voe, Market Book, 382; L. M. R. K., III: 959.

The name of Burrows St. is changed to Grove St.—M. C. C.
(1784-1831), XVIII: 46.

The common council authorises the committee to purchase cer-
tain described property at the corner of the Bowery and 13th St.
for a "fountain" (reservoir) of water to be used in extinguishing
fires. The purchase price is $10,000.—M. C. C. (1784-1831), XVIII:
50-51. The reservoir was erected on the purchased ground and
was "the first public reservoir and the beginning of the public
water-works of the city of New York."—N. Y. H. S. Bulletin
(Oct., 1917), 70. See Mr 16, Je 1, and N 16, 1829; Ap 19, 1830.

The common council appoints a committee to contract for a
site for a new bridewell.—M. C. C. (1784-1831), XVIII: 51.
It lays on the table a resolution directing the committee to public
office "to submit a plan for Alterations in the Buildings in Cham-
ber and Britton Streets," to be presented to the common council
for its approval. See Mr 16, 1829; April 1830.
May 11

chosen in each ward by ballot on May 20. The delegates so chosen shall meet on June 10 in the city hall, in the room occupied by the court of sessions. When the convention has agreed upon amendments, it may make application to the legislature for the passage of an act to sanction and give effect to them. Various amendments to these resolutions are referred, with the whole subject, to a special committee.—M. G. C. (1784-1811), XVIII: 68-72. See also N. Y. Eva. Post, My 12, 14, and 16, 1829. See My 18.

The common council passes a resolution to renumber Bud St.—M. G. C. (1784-1831), XVIII: 60.

The female convicts are removed from the state prison at Green- wich to the temporary jail at Bellevue.—N. Y. Eva. Post, My 18, 1829. See My 20. N. Y. Eva. Post, My 17, 1829.

John Jay dies at his country-seat in Westchester Co., at the age of 84 years. The news reached New York and was published on May 19.—N. Y. Eva. Post, My 19, 1829. On that day, the members of the New York State Bar, meeting at the city hall, drew up resolutions regretting "the recent decease of the late venerable John Jay."—Corresp. and Pub. Papers of John Jay, IV: 516-18; N. Y. Mirror, VI: 175 (My 19).

The common council adopts a report of a special committee which has examined the recommendations of the law committee in relation to an amendment to the city charter to effect a re-organization of the common council. This report, as well as the resolution which is adopted, states that it is the sense of this common council "that the present organization of our City Government, is not adapted to the extent importance and Comple- xity of our public business, but is deficient in not providing proper securities against improvident expenditure and hasty Legislation." It is agreed that such reorganization should take place; and a plan is adopted for a meeting of the electors of the city and county of New York in their respective wards, at the specified places, on the evenings of the second Tuesday in June at 8 p.m., there to choose by ballot five delegates from each ward to meet in conventiion at the "Sessions Room" (court of sessions) on the fourth Tuesday in June at 10 a.m., "for the purpose of suggesting to the Board such alterations in the Organization of our City Government as they may deem advisable."—M. G. C. (1784-1831), XVIII: 93-95. The time of meeting of the electors was later changed from June 9 at 8 p.m. to June 9, from 9 a.m. until sundown.—Ibid., 98. See further, ibid., 143, 144, 145, 145-46; N. Y. Eva. Post, My 19, 25, 27, 29, 30, Je 1, 2, 3, 4, 6, 1829. Also Je 9 and S 28.

"Morgan's Newly Invented Rail Road Carriage" is illustrated and described in the N. Y. Eva. Post of this day.

"Several alterations in the fronts of houses [on Broadway] are going on. Granite pillars are taking the place of brick, and..." The materials for such a job are strewn about in every direction. The builders, or rather those who undertake the work, seem to think that every other kind of business should stand still till they have completed their job. . . ."—N. Y. Eva. Post, My 20, 1829.

Sir John Ross, with the steamer "Victory," sails from Wool- wich on his first voyage to the Arctic. He returned on Oct. 12, 1833. The most important fruit of the voyage was the discovery of the true position of the north magnetic pole.—Winson, VIII: 118-119.

"Trinity Church.—The wooden paling which has so long dis- figured this venerable edifice, has been removed some passes back, and is to have its place supplied by a light and graceful iron railing. Availing ourselves of a suggestion made by the editor of the Americain, we recommend the still farther removal of the new enclosure, so that it shall range with the front of the body of the church, and throw forward the portico, in bold relief, upon the pavement, which will then form a noble sidewalk and promenade, fit for the most commanding site in the most elegant highway in the United States."—N. Y. Mirror, VI: 367 (My 23, 1829). See also N. Y. Eva. Post, My 22 and Jl 25, 1829.

The Church of the Ascension on Canal St. is to be consecrated on this day by Bishop Hobart.—N. Y. Eva. Post, My 21, 1829. For consecration of the new church, see My 21, 1828. Ten years later it was destroyed by fire.—See Je 30, 1839.

Philip Hone goes to Abell & Dunscomb's foundry in Water St. to see one of the new locomotives in operation, which was recently imported from England for the use of the railroad belonging to the Delaware and Hudson Canal Co. (see May, supra). The second locomotive was set in operation the following day at the works of the Messrs. Kemble.—Hone's Diary, I: 10.

See also May of Am. Hist., XXV: 437.

In the number of establishments which are in contem- plation in our city, none strike us as more of utility & convenience than the plan of opening a direct communication from the centre of the Park to the East river. It is proposed to widen Spruce street, commencing at the corner opposite the Tract Society building, and carry it through, in a straight line, until it strikes Ferry street, and from thence to Peck-street—Barclay and Murray streets on the north river side of the city were carried to Spruce street, and it will therefore in fact, open an almost uninterrupted view of both rivers from the City-Hall. . . .

"Another improvement is also in contemplation, but meets with great opposition. It is to widen William street from Pine street to Maiden lane. . . ."—N. Y. Eva. Post, My 29, 1829.

The common council votes to appropriate $2,000 for the purchase of ground to equalize the depth of lots bought from Mr. Coedington, and which form a part of the tract for the new reservoir. This may be made to face 5th St. leaving the valuable lots on the Bowery undisturbed. There may also be some lots left on 13th St. which can be sold later.—M. G. C. (1784-1811), XVIII: 112. See Mr 16, My 4, Jl 13, and N 16, 1829; Ap 19, 1830.

The common council records the following account of the opening of Eighth Ave.: About 1811, the opening of the avenue was started, "from Greenwich upwards and from McCoomb's bridge downwards." A middle section of about three miles in a rocky part of the island remained unfinished until about 1826, when the penitentiary convicts were employed on the work and finished about two miles. As the convicts are to be moved to Blackwell's Island, the board now decides to have the remaining portion, "from Astorph's lane to the foot of Clendlingson Hill," completed by contract.—M. G. C. (1784-1811), XVIII: 116-17.

The steam frigate "Fulton the First" is completely demolished by the explosion of her powder magazine, while lying at the Navy Yard. Nearly all on board are killed.—N. Y. Eva. Post, Je 5, 1829, cited in descript. of Pl. 83-a, Vol. III.

The following general order is issued from the adjutant-general's office in Albany: "The Sixth Brigade of New York State Artillery is hereby reorganized, and will hereafter consist of the 5th Regi- ment of Artillery, under command of Colonel Sanford; the 4th Regiment, under command of Colonel Ming; and the First Squad- ron of Clinton Horse Guards, under command of Major Cowan. The said Brigade is placed under command of Brigadier-General Spencer, and will remain attached to the First Division of Artillery."—Grand Opening of the New Armory of the Eighth Regiment (1830), 12.

"The Penitentiary now building under the direction of the Corporation of this city on Blackwell's Island, on the model of the State Prison at Sing Sing, is nearly finished. The roof is on; the cells are completed, the floor between the great interior mass of masonry containing the cells and the outer wall of the prison, is nearly laid, and the windows are glazed. The number of cells is two hundred and forty. . . . Each of them is opposite to one of the outer windows of the building. There is no part of the interior susceptible of combustion but the slight wooden galleries that pass along the outside of the three upper stories of cells, . . ."—N. Y. Eva. Post, Je 8, 1829. See S 10, 1828.

At a special election called by the common council (see My 18), five delegates from each ward are chosen to meet in a city con- vention and consider alterations in the city government.—N. Y. Eva. Post, Je 12, 1829. The delegates convened on June 21 (ibid.).

The common council adopts the following resolutions: (1) to open 14th St. from the Bowery to the Hudson River on Oct. 1 next, and to remove all buildings therefrom; (2) to open Lewis St. from North St. to Eighth St.; (3) to open Exchange Place and remove all the buildings therefrom; (4) to open Seventh Ave. and remove all the buildings therefrom.—M. G. C. (1784-1831), XVIII: 131.

The common council orders that Sixth Ave. be worked into
a "passable Road" from 21st St. to Bloomingdale Road.—M.C.C.

"Next year employed in cutting down the hill at 86th St. to secure connection with Hell Gate ferry.—M.C.C. (1784-1831), XVIII: 135.

"The common council orders that William St. be widened from Pine St. to Maiden Lane. "Owing to the extreme narrowness of that part of William street, it is often with much difficulty that Citizens can pass without being jostled from the side walks, and besides, the line of the present buildings being so irregular as almost wholly to obstruct the view between John and Pine Streets."—M.C.C. (1784-1831), XVIII: 138-39.

"As a "compensation for their faithful services," the common council orders "that the perquisites arising from the permission to erect Booths around the Park on the ensuing celebration of American Independence" be equally divided between the high constable, the first marshal, the messenger, and the clerk of the common council.—M.C.C. (1784-1831), XVIII: 144-45. Vide infra.

The common council resolves "that it be referred to the Celebration Committee to permit Booths to be erected around the Bowling Green and Battery to accommodate the People visiting the City and at Washington Parade Ground."—M.C.C. (1784-1831), XVIII: 146. The editor of the Mirror wrote on June 20th: "Let us hope that no more booths will be erected around the Park and Battery,—let them be transported to the regions of Washington-square. . . ."—N.T. Mirror, VI: 399 (Je 20, 1829). See also N.T. Evet Post, Jl 3, 1829.

The Friendly Sons of St. Patrick hold an elaborate dinner at Nikko's Saloon in Broadway to celebrate the Catholic Emancipation Act, signed by George IV on April 13.—N.T. Evet Post, Je 16 and 18, 1829.

The editor of the Mirror again attacks the jail and bridewell: "We have lately received several communications on the endless subject of the removal of these foul excrescences; but we most respectfully decline their publication. It is in vain. Go and ask the Emperor of China to abolish the throne he has inherited from European monarchs. Autocrat of Russia to give up his throne—on St. Sophia's steel—"the Pope of Rome to cut off his whiskers—Judge Miller to relinquish 'the luxury of his tenth sager'—but not the corporation of the city of New-York to give up their two darlings—twins in beauty—the Jail and Bridewell."—N.T. Mirror, Je 20, 1829. See O 24.

N.Am. 1829.

"Among the 14 wards of the city convene in the city hall "for the purpose of suggesting to the Board [of Aldermen] such alterations in the Organization of our City Government as they may deem advisable" (see My 18).—N.T. Evet Post, Je 23, 1829. The convention held sessions at irregular times for several weeks, entrusting to a committee of fourteen the work of drawing up the amendments. The last session was held on Sept. 28 (q.v.).—Ibid., Jl 14, 28; Ag 4, 12, 21, 23, 24, 25, 18, 1829.

The Cheesepack and Delaware Canal is opened.—Annals of July 1829.

The Mirror publishes a descriptive account of the places of amusement and entertainment for the guidance of visitors in New York, and a reference to the features usually to be seen on this day.—N.T. Mirror, VI: 414 (Jl 4, 1829). See also N.T. Evet Post, Jl 5, 1829.

A "nest of rookeries" has been taken down near Theatre Alley, to make way for Clinton Hall which is about to be erected on a plot of ground 100 ft. square at the south-west corner of Beekman and Nassau Sts. The National Academy of Design, it is announced, will occupy part of the building.—N.T. Mirror, VII: 7 (Jl 11, 1829).

By Oct. 24, the building was described when partly erected.—Ibid., VIII: 137. See, further, F 15, 1829.

N.Am. 1829.

The common council appoints John Ewen, Jr., a city surveyor.—M.C.C. (1784-1831), XVIII: 178.

The common council requires that the captains of each watch district cause the watchmen under their direction to cry aloud in case of fire the name of the street or part of the city where the fire is.—M.C.C. (1784-1831), XVIII: 197-98.

The common council pays $248.88 in expenses of a committee which went to Phila., for the purpose of making a contract for the erection of a public reservoir, and $500 to Thos. Howe toward building the reservoir.—M.C.C. (1784-1831), XVIII: 191. On July 27, the board paid Howe $788.13 "for work & Materials Public Reservoir Balance."—Ibid., XVIII: 212.

Trinity vestry votes that it would be inexpedient to comply with an application from fire company No. 34 "for Ground within the Hudson Street Cemetery on which to erect an Engine house."—Trin. Mis. See also descript. of Pl. 96, III: 586.

The cornerstone of Clinton Hall is laid, at Beekman and Nassau Sts. Philip Ilone delivers the address, giving a brief history of the Mercantile Library Association.—N. T. Evet Post, Jl 20 and 21, 1829; M.C.C. (1784-1831), XVIII: 186.

The common council resolves that 11th St. be opened from Broadway to Greenwich Lane, "insomuch as this is the only street remaining unopened below 14th Street."—M.C.C. (1784-1831), XVIII: 201.

The governors of the N.Y. Hospital resolve to make some alterations in the main building. "The design is to carry out a projecting front and pediment on the north and south sides of the present main hospital building, to contain excellent and spacious baths, nurses apartments, and other offices communicating with each ward throughout the edifice. . . . It is also intended to connect this improvement with a system of ventilating and warming the building in winter, by the Walkefield or Belfi stores, introducing fresh warm air into every apartment. Another great improvement in the Asylum for the Insane at Bloomingdale is in progress and nearly completed. . . . It is the erection of an exceedingly commodious building at some distance from the present edifice and wholly separate from it, for the reception of the insane, idiotic and violent patients, leaving the present structure to be occupied by those of another class, undisturbed by anything that will bring in their minds the idea of a mad-house."—N.T. Evet Post, Ag 5, 1829. See also ibid., D 4, 1829, and Man. Conn. Curr. (1845-6), 257 et seq.

The old frame edifice of the First Moravian Church, at 106-108 Fulton St., built in 1751-2 (see My 23, 1750: Je 16, 1751), having been torn down during the past summer to give up the vestry house on the same site, to be 40 ft. wide and 60 ft. long.—N.T. Evet Post, Ag 15, 1829. The new building was dedicated by Bishop Andrews on Nov. 29. On the widening of Fulton St in 1826, 8 ft. were cut off from this building; it was taken down and the ground sold in 1843 (q.v.).—Greenlees, Hist. of the Churches, 278; L. M. R., III: 930. See also Vol. I, p. 257.

Mark Richards (see Mr 16) is paid $2,125.87 for "Iron pipes for Public Reservoir."—M.C.C. (1784-1831), XVIII: 228.

The common council resolves that Tenth Ave. be opened and extended from 14th to 28th St.—M.C.C. (1784-1831), XVIII: 257-58.

First Ave., from Streetyest St. to the fever hospital and almshouse "has become dangerous and almost impossible for carriage, owing to the large pits and gulleys, which have been occasioned by unlicensed dirt carmen digging up the earth in the middle of the road, and carting it away, to fill in the sunken grounds in that neighborhood. . . ."—N.T. Evet Post, Ag 31, 1829.

The common council empowers the market committee to erect a Sept a marketable structure, not over 100 ft. long and 35 ft. wide on the ground intended for that purpose, on Third Ave. between 6th and 7th Sts. (see D 15, 1828)—M.C.C. (1784-1831), XVIII: 249. The new market-house was finished early in 1829, and opened on May 8 (q.v.).—De Voe, Market Book, 551.

The Treaty of Adrianople, Turkey makes peace with Russia (see Ap 26, 1828) and acknowledges the independence of Greece.—Hacen, Europe since 1815 (enlarged ed.), I: 559-60.

Announcement is made that "The Siamese Twin Brothers will be exhibited at the Grand Saloon, Masonic Hall, every day (Sundays excepted) from 9 till 2 in the morning and from 6 to 9 in the evening. These Lads were lately brought to this country in the ship Sachem. . . . They have been pronounced by the first medical men to be the greatest curiosity of nature ever known."—N.T. Evet Post, S 16, 1829. See also Ibid., S 21, 1829.

The common council authorizes the alderman and assistant of the First Ward "to cause a Fountain to be constructed in the Bowling Green at the private expense of such of the Citizens as may agree to contribute to the same."—M.C.C. (1784-1831), XVIII: 268. Of N. 30.

The city convention, which assembled for its first session on 28 July
The plan for removing the location of the Criminal Courts, from the City Hall to the Rotunda, is about to be carried into effect... the necessary alterations of the Rotunda are in active progress, in order to the consummation of the design... It is intended, among other things, that a part of the Institution (formerly the old Alms-House) may be prepared and set apart for the reception of persons committed for trial... At the present time, all who are imprisoned for trial, whether for great or small offences, are committed to the Bridewell, in common with murderers, thieves, and wretches of every description. The plan now before the Corporation, not only provides for the committal of accused individuals to a different place from the convicted offender, but it proposes, also, to erect a walled passage from the Rotunda, or Criminal Court, to the House of Detention, (the title to be given to the new receptacle) through which persons committed for trial may be conducted without being exposed to the ragged rubble that now invariably crowd and rout around the heels of a supposed offender...—N. Y. Ev. Post, O 15, 1829.

The building for the reception of the students of the Grammar School, connected with Columbia College" being completed, it is formally opened.—N. Y. Ev. Post, O 17, 1829. Fine erroneously gives the date as "September" in his Hist. of Columbia Univ. (1904), 109. Its connection with the college ceased in 1864—Ibid., 110.

In 1829, the community about the walled hospital affording, 1829, and 1827, the corporation of the New-York Instructing Institution of the Deaf and Dumb, on the east side of Fifth Avenue, between 49th and 50th Sts. (see O 19, 1827), is dedicated.—N. Y. Ev. Post, S 29 and O 1, 1829. Hist. of the N. Y. Inst. for the Instruction of the Deaf and Dumb (1832). In 1831, its situation was described as "on the Fifth Avenue, adjacent to the line of the N. Y. and Harlem Railroad, and within a short distance of the great post road leading from New York to New Haven." It was "110 feet long and 60 feet wide, built of brick, covered with stucco, resembling marble," and, including a basement, was four stories high. It contained "rooms sufficient to accommodate, with board, lodging and tuition, 150 Mutes, together with the requisite number of instructors." It cost $11,000. It was "ornamented in front with a beautiful colonnade, 50 feet long, occupying the centre of the building." The area of ground occupied was 2 acres from the corporation of the city (see Jc 15, 1829), who, in addition, leased to the directors, for a term of years, nine acres which were "handsomely laid out into lawns and gardens, planted with trees and shrubbery, affording, to such desire, the opportunity of becoming acquainted with horticulture.

Workshops had been erected by that year. Gardening, tailoring, shoemaking, and all the usual trades were the useful tasks taught. Girls were instructed in needlework, and other domestic occupations, and in drawing and painting. There were 28 pupils in 1831, and it was intended to establish courses of lectures in physics, chemistry, natural history, geography, general history, political economy, etc. The government was described as "parental." The principal was Prof. H. P. Peet, who had associated with him five professors.—Pay, Firms of N. Y., containing view of the institution by Dakin (pub. by Peabody, 1831). By the end of 1832, there were 87 pupils, of whom 55 were supported by the state, 11 by the city of New York, and the remainder by friends and charitable institutions.—N. Y. At I It Is, In 1833, 68. In 1844, there were 168 pupils, 96 males, 72 females.—Picture of N. Y. (1846), 47. Necessary amendments were made to the building in 1854, 1858, 1864, and 1870.—Belden, 94; Man. Com. Coun. (1870). Furthermore, in L. M. R. K., III: 955. Regarding lease of a lot from the city for the institution's use, see M. G. C. (1874-1831), XVII: 116.

A meeting, called by Russell Comstock, "Ciderist," is held on the steps of the city hall, by those who are in favour of establishing national schools in which the blacks shall be taught with the whites, of "putting the wife on a par with the husband," and of abolishing imprisonment for debt. Resolutions are adopted favouring the election of only such legislators as agree to these amendments. Comstock is nominated for president, senator, and finally as assemblyman. Constable Hays broke up the meeting by arresting the "Ciderist" for disturbing the peace.—N. Y. Ev. Post, O 3 and 5, 1829. See also ibid., O 15, 1829. Regarding Comstock, see also ibid., S 14, 1829. The common council authorizes an appropriation of $2,500 towards the building now nearing completion for the N. Y. Dispensary.—M. C. (1874-1831), XVIII: 283, 359.
one candidate.—N. Y. Evex. Post, N 2-11, 1829. Regarding
the election, see McMaster, Hist. of the People of the U. S., Nv, 1829.

4. In the charter election, the amended charter (see Ap 7, 1830) is
approved by the voters by a large majority.—N. Y. Evex. Post, N 6, 1829.
After several days, the result of separate balloting, as to whether the voters preferred that the term of the aldermen should be extended to two years, was reported as a majority in the negative.—Ibid., N 11, 1829. The common council took action see Dec. 28, 29, 1829.

It is reported to the common council that an excavation of
only 50 ft. in depth on 13th St. gives a well which promises to
supply the reservoir and pipes with water for extinguishing fires.
It is proposed to enclose the cast-iron tank with either a brick
or a wooden building, and the board voted for the wooden one,
the estimated cost of which is $2,500.—M. C. C. (1784-1831), XVIII:
357. See Dec. 14, 1829 and Jan. 11, 1830.

The common council refers to the committee on hands
and places a petition of Jacooco Raggi for permission to erect a fountain in
the Bowling Green at his own expense, but depending upon
the inhabitants in the vicinity for remuneration.—M. C. C. (1784-
1831), XVIII: 357. See also L. M. R. K., III. 97.

In his first annual message to congress, Pres. Jackson attack
the Bank of the United States and urges against a renewal of its charter.—Macdonald, Select Docs., etc., 238-39.

The common council adopts the following resolution, as pre-

sented by Mayor Bowes: “Resolved that a Competent practical man be appointed
employed to Act as a Commissioner or Agent for the Common
Counsel to procure information and to make plans and Estimates
for supplying the City (abundantly) with pure and wholesome water said Commissioner or his successor to be continued as Super-
intendent of this highly important public business.”—M. C. C. (1784-1831), XVIII: 357. See Dec. 14, 1829 and Jan. 11, 1830.

New York University has its inception in the first of a series
of meetings held by nine citizens of New York, called to consider
organizing a university in this city.—N. Y. Univ. Bulletin, Je 30,
1911. The original call for this meeting is preserved in the library
museum of the university. It was held, by invitation of Rev. J. M.
Mathews, D. D., at his house. For his account, as chancellor, of
the origin and early history of the new university, see Recollections
of Persons and Events, Chiefly in the City of N. Y. (1865), 192-95
passim. For the dates of the subsequent meetings, see Chamber-
lain’s N. Y. University (Boston, 1901), 1: 58. See also 1: 6, 1829.

Part of the wooden fence enclosing the lot adjoining Potter’s
field having been stolen, the whole line on the Bloomingdale Road
is ordered replaced with a stone fence.—Min. of the Comrs. of the
Almshouse (MS), in secretary’s office, dept. of charities.

The common council changes the name of Market Street St. lying between Broadway and the Hudson River.—M. C. C. (1784-1831), XVIII: 470.

The common council resolves “that in compliance with the
wishes of the people, expressed at the late Election (see N 4) a
Memorial be presented to the Legislature, submitting to
that Body the amendments so proposed to the City Charter.”—
In this year, John Wesley Jarvis, still pursuing his calling in New York, was at the height of his career as a painter. -For accounts of his work see Dunlap, Hist. of the Arts of Design; Tuckerman, Book of the Artists (1867); Imam, Hist. of Am. Painting (1905).

In this year, the city receipts amounted to about $261,000, the largest revenues coming from the rents of public wharves ($4,000,000), marine rents ($15,000), and taverns ($150,000). The general expenses were about $500,000, one-quarter of which was for the almshouse. -Man. Com. Coun. (1859), 197-198.

The following views of buildings, etc., as they appeared in 1839, were published in later years in Valentine’s Manuals, as cited: Contoilet’s Garden, Broadway (Man. Com. Coun., 1853, p. 112); Manhattan Hall, Broadway (ibid., 1835, p. 196); St. Thomas Hall (ibid., 1858, p. 372); and 1865, p. 549); Livingston sugar-house, and Middle Dutch Church, Liberty St. (ibid., 1858, p. 488). In this connection, it should be observed that the view of the Broadway House, at the corner of Broadway and Grand St., which was published in the Manual of 1833 (p. 90) and assigned to 1816, and that in the Manual for 1865 (p. 617), where it is assigned to 1826, are both in error. The date depicted is 1831. The original painting, by the artist R. Bond, in the author’s collection, bears this date.

The New York Magdalen Society is organized. From it grew the New York Magdalen Benevolent Society, which issued its first report in Jan., 1834. Its first directoress, Mrs. Thomas Hastings, contested in charge of its affairs for over 40 years. The society purchased 12 city lots and an old frame building at Fifth Ave. and 86th St., for $4,000. It continued there in later years, occupying the wooden building for 20 years. For histories of this society, accounts of its work, and descriptions of its buildings, see Man. Com. Coun. (1870), 477-479; Richmond, N. T. and Its Institutions (1871), 117-118.

A call having been issued, on Jan. 4, for a meeting to discuss the establishment of a University in New York (see Dec. 16, 1829), “on a liberal and extensive foundation,” such meeting is held, at which Gen. Lewis presides. A resolution is adopted declaring it to be “highly desirable and expedient to establish in the City of New York a University, on a liberal foundation, which shall correspond with the spirit and wants of our country, which shall be commensurate with our great and growing population and which shall enlarge the opportunities of education for such of our youth as shall be found qualified and inclined to improve them.”

This resolution was passed after hearing a communication read on the subject of the “Expediency and the Means of Establishing a University.” Another resolution was passed requiring that this communication be printed and distributed “as exhibiting the views of the meeting and as preparatory to a more general call of the citizens of New York.” This was published in a pamphlet, a copy of which is preserved in the N. Y. Hist. Soc. For reproduction of its title-page, and digest of contents, see N. T. University: Its history, influence, equipment and characteristics, ed. by Gen. Joshua L. Chamberlain, L.L.D. (Boston, 1902), I: 49-51. See O 15. On Jan. 9, an address to the public was issued, and by Jan. 12 the matter was “a subject of general conversation.” -N. T. Ev. Post, Ja 13, 1830. See also ibid., Ja 13, 14, 15, 19, 22, F 2, 4, 6, 1830.

The building for the New York Dispensary, on the corner of White and Centre Sts., has been completed. -N. T. Ev. Post, Ja 9, 1830. It was formally opened on Jan. 11. -Ibid., Ja 12, 1830. In the address to the company by Gen. M. C. (1784-1833), XVIII: 465-466. See N 16 and D 14, 1829; Ap 19, 1829.

The legislature provides for laying out West St., from Albany Basin to Battery Place (late Marketfield St.), parallel with Washington St. (see 1825).-Laws of N. T. (1830), chap. 8. See also I: 457.

The theatre is but a short time opened before the Chatham Garden Theatre, known for a time as the American Opera House (see May 20, 1829), opens as Blanchard’s Amphi-theatre. Equestrian performances, with rope-dancing and the like, were offered. -Ireland, I: 633; Haswell’s Reminiscences,
1830 244: L. M. R. K., III: 983. On March 11, 1831, it was reopened
Jan 18 as a theatre.—Haswell, 254-55. See 1832.

27 Webster makes reply to Hayne, in a debate between Benton, Hayne, and Webster, extending over several days, which turned on the question of upholding the Constitution and the system against sectionalism.—McMaster, Hist. of the People of the U. S., VI: 11-50; Winsor, VIII: 254, 265, 286. See also Mr 24, 1831.

Feb. Although the legislature has prohibited masquerades (see Ap 25, 1830), "subscriptions are opened for the purpose of producing a most splendid one, at the Park theatre, on . . . [Feb. 17].

This fashion, of course, intends to pay the fine [$1,000] and pocket of the surplus. Four hundred tickets are to be issued at five dollars each [Perhaps the first prophetic reference to "the 400"] . . . . The company of course will be select, and the same rules and regulations will be adopted which gave such universal satisfaction on similar occasions last winter."—N. Y. Mirror, VII: 255 (F 13, 1830).

"Statute of Clinton."—The directors of Clinton-hall association, some time since, applied to Mr. [Ball] Hughes, the sculptor, for the model of a projected statue of our late governor, intended for the front of Clinton-hall [see JI 11, 1829]. This model has been completed, and the exquisite accuracy of its execution has so fully satisfied the directors that they have ordered one of marble, larger than life, for the embellishment of the front of that magnificent structure. Mr. H. was the pupil of the celebrated Flaxman . . . . Although Mr. Hughes never saw De Witt Clinton, he has still, by the aid of prints and portraits, produced the most perfect and accurate delineation of the imposing features which distinguished that profound statesman that we have ever seen . . . .

—N. Y. Mirror, VIII: 251 (F 13, 1830).

26 The New York Law Institute is incorporated, "for literary purposes, the cultivation of legal science, the advancement of jurisprudence, the providing of a seminary of learning in the law, and the formation of a law library."—Laws of N. Y. (1830), chap. 48.

The common council authorizes the establishment of a standing committee on common schools. The administration of school funds appears to be the fourteenth "considerations of School money," appointed by the common council. Their duties are "to require certain returns from the Officers of the several schools," to apportion and pay school money to the designated institutions, to visit and examine the schools at least twice a year, and to make to the board annually a full report of their doings. Over $42,000 are handled by them yearly. There is no subject in which our City has a deeper interest than in the elementary education of the people, and none, therefore, it would seem, in regard to which the action and supervision of the City Government should be more perfect."—M. C. C. (1784-1831), XVIII: 528-53.

23 The Clinton Hall Association is incorporated "for the cultivation and promotion of literature, science, and the arts."—Laws of N. Y. (1830), chap. 52. See N 2.

21 The meeting is held in Masonic Hall in favour of abolishing imprisonment for debt.—N. Y. Ecc. Post, F 24, 1830. See Ap 26, 1831.

26 The Manhattan Gas Light Co. (see F, 1827) is incorporated. Its charter permits this company to make and sell illuminating gas and various by-products, and to lay gas-pipes under specified regulations, without interfering with any exclusive right heretofore granted. Its real estate holdings shall not exceed $100,000 in value, nor its capital stock $500,000. Before the act shall take effect, the "Am. Gas Light Co." shall surrender, within 60 days from this date, the privileges which it acquired by act of incorporation dated March 17, 1827.—Laws of N. Y. (1830), chap. 59. See D 31, 1832.

Mar. 9 The legislature incorporates the "New-York Life Insurance and Trust Co."—Laws of N. Y. (1830), chap. 75. This appears to have been the first life insurance company in New York City, none being mentioned in the Goodrich guide for 1828, and this being the only one mentioned in N. Y. At its It Is, In 1833. Life insurance was introduced in the U. S. in 1812 (p. 4).

19 The editor of the Mirror calls attention to the dilapidated monument of Capt. Lawrence, recommending that it be "repaired by a new one to be the symbol of his fame, and consistent with the dignity of the city which entombs his remains."—N. Y. Mirror, VII: 287. See also N. T. Ecc. Post, Mr 6, 1830. A public meeting to adopt measures for erecting a new monument was held at the city hall on March 16—Ibid, Mr 17, 1830. An application to the legislature for aid was rejected by the assembly.—Ibid, Ap 7, 1830. See also ibid, Ap 17, 1830.

22 The legislature passes the Northern Dispensary a tri- angular piece of ground bounded by Christopher, Factory, Grove, and old Sixth Sts., so long as it is used for a dispensary.—M. C. C. (1784-1831), XVIII: 626. For an historical sketch of this institution, which had its inception in 1826 (cf. 1829), and was the second dispensary in the city, being preceded by the New York or City Dispensary (cor. Centre and White Sts.), see Man. Gem. Curr. (1870), 348. This conveyance was dated March 26.—Ibid. (1830), 761. See, further, O 18; N 15. Both dispensaries are still in operation, the former at 165 Waverly Pl., the latter at 34-36 Spring St.—Directory of Social Agencies (1943), 218, 233.

27 The new City Dispensary, Clinton-hall, the Retunda, converted into a sessions court [see JI 24, 1831]—the opening and widening of Ann, Cedar, and Liberty streets, which formerly divided their institutions, is the result of the enlarged and graced by splendid rows of stores and dwellings-houses—the elevation of Justice on the cupola of the City-hall, making way for the introduction of a monitor of time [see Ap 19], which shall speak to the eye by night as well as day—and sundry other improvements . . . . attact the advancement of New-York in architectural decoration and beauty.—N. Y. Mirror, VII: 306.

Scudder's American Museum.—We learn that a lot of ground, at the corner of Ann street and Broadway, has been purchased, on which a building is to be erected which will be an ornament to the city, and to which the exhibition of the American Museum will be transferred. The edifice will extend 104 feet in depth on Ann street, and 77 in front on Broadway. The front will be circular. The building will be carried up to five stories, and will have several por- balconies, &c. and an observatory. Round the roof 18 colossal statues, from antique models, will be placed. It is to be finished by the first of November, and to be constructed of West Chester marble. Until it is ready for the reception of the collection of curiosities now exhibited in the old Alms House, the exhibition will continue open at the latter place as heretofore.—N. T. Ecc. Post, Mr 30, 1830. June 4. —See the new residence of the Commissioners of School money, appointed by the common council. Their duties are "to require certain returns from the Officers of the several schools," to apportion and pay school money to the designated institutions, to visit and examine the schools at least twice a year, and to make to the board annually a full report of their doings. Over $42,000 are handled by them yearly. There is no subject in which our City has a deeper interest than in the elementary education of the people, and none, therefore, it would seem, in regard to which the action and supervision of the City Government should be more perfect."—M. C. C. (1784-1831), XVIII: 528-53.

23 The Clinton Hall Association is incorporated "for the cultivation and promotion of literature, science, and the arts."—Laws of N. Y. (1830), chap. 52. See N 2.

21 The meeting is held in Masonic Hall in favour of abolishing imprisonment for debt.—N. Y. Ecc. Post, F 24, 1830. See Ap 26, 1831.
it up as a Museum in a truly splendid manner. The lower apartments are more particularly appropriated to Natural History. ...
tion to exclude the drawing of Lotteries, Your Committee would recommend such prohibition." As it is not, the committee decides that the lottery shall be drawn in the rear rather than in the front of the city hall.—M. C. C. (1784-1831), XIX: 23. See, however, N 17.

7. "At a public meeting held at the City Hotel, with Mayor Bowne in the chair, it is resolved to found a "House of Industry, for the relief of indigent females."—N. T. EcC. Post, My 8, 1830.

8. The new market opens on the east side of Third Ave., at the junction of Third Ave. and the Bowery, between 6th and 7th Sts. (see D 15, 1838; S 7, 1829). "It attracted but few country wagons, however, and the [Harlem] Railroad Company concluded to establish a market depot between 27th and 28 Streets, in the Fourth Avenue, where it was afterwards held many years."—De Voe, Market Book, 551. By 1836 (p. 5, Je 21, O 11), the market at the Bowery and Third Ave. junction was known as Tompkins Market.

13. Among the many valuable improvements recently made, there are few more important and extensive than that just commenced in Barclay and Chapel streets.—The whole range of buildings, on both sides of the latter, to Murray street, is nearly prostrated. The street is to be widened from Barclay to Murray, and a range of uniform and elegant three story private dwellings erected on the west side of the street is to be let open front and overlook the Bowery. A number of similar houses are building, adjoining, in Barclay street—making in all upwards of twenty, and on a spot which has, for a great number of years, been encompassed with the most miserable tenements in the city.—N. T. EcC. Post, My 13, 1830, citing Daily Adv.

Improvements at Five Points are urged upon the city committee.—N. T. EcC. Post, My 15, 1830.

14. Inaugural to the common council, Francis B. Phelps proposes: first, to bring water from Rye Pond in 2 1/2 inch iron pipes, second, to bring the Croton River by open canal or iron pipes; third, to bring the water of the Passaic River, from above the falls, at Paterson, N. J., and across the Hudson by iron pipes laid on the bottom of the river, to procure a new supply of water by a plan of his own, probably by wells and springs on Manhattan Island.—M. C. C. (1784-1831), XIX: 34; Man. Comm. Coun. (1834), 218. See F 28, 1831.

The committee on repairs, and that on arts and sciences, to whom was referred a report and resolution regarding an alteration in the cupola of the city hall to receive a public clock, report "that the work should be completed as proposed in the former report, with the exception of the fixtures and of lighting the Dial." The "bell made of glass will answer the several purposes of emitting light in the Cupola, and form a beautiful surface to show the time by day and be prepared for Illumination whenever the interest of the City calls for it to be done."

The common council therefore adopts the following resolutions: 1. Resolved that $650, be appropriated to add to the Clock the new front and to make it strike the Hour. 2. Resolved that $1000 be appropriated to furnish a Bell for that purpose. 3. Resolved that $1000, be appropriated to put in Dials of glass in Copper frames. 4. Resolved that $450 be appropriated for contingent expenses."—M. C. C. (1784-1831), XIX: 60-61. See also descrip. of Pl. 97, III: 586. For the expense account of Rosewell Graves, the street commissioner, for "raising Cupola of City Hall," including clock, dial, and bell, see Commissioner's Ledger of Disbursements, etc., for Public Improvements, etc., 1827-1843, p. 38 (in record-room, finance dept., Hall of Records). See, further, F 7, 1831.

The common council resolves to open Ninth Ave. from 28th St. to the grounds of John L. Norton, commonly called the "Hermitage."—M. C. C. (1784-1831), XIX: 63; Man. Comm. Coun. (1837), 579.

The Baltimore & Ohio Railroad is to be opened on this day from Baltimore to Ellicott's mills, a distance of 13 miles.—N. T. EcC. Post, My 22, 1830.

"In our walks through the city, we notice in every quarter that very extensive alterations and improvements are making, some of them of a character that will add very materially to the beauty and convenience of the city... The opening of Cedar street is one of these. By this measure, not only a couple of miserable rookeries have been removed, but the value of surrounding property has been much increased, and a new street, occupied on both sides with large, airy and substantial stores, has been suddenly created in the very heart of business. The widening of William street, from Maiden-lane, is another improvement which was much required, and the advantages of which will be very great. The alterations now in progress on the west side of Columbia College, are also very important, and will add much to the beauty and value of that neighborhood."—N. T. EcC. Post, My 26, 1830.

For the purpose of securing a fund to give support to the widow and heirs of Robert Fulton, arrangements are being made to place a "Fulton box" on board of every steam-boat to the United States for the reception of a single cent from every passenger. The plan was started in Virginia by a few public-spirited and magnanimous persons.—N. T. Mirror, VII: 735. See also Nat'l Gaz. & Literary Reg., Apr 24, 1830; N. T. EcC. Post, Jl 8, 1830; N. T. Gaz. & Gen. Adv., T 9, 1831.

The common council takes up a report (see M. C. C., 1784-1831, XVIII: 266, 367) which the joint committee of repairs and public offices made on Nov. 30 last, on the subject of accomodations for courts, etc., in "the Building on Chamber street" (the "N. Y. Institution," which was formerly the almshouse). The report says that the entire building is needed for public purposes,—for the police office, house of detention, grand jury, first district watch, commissioners of the almshouse, and ("where the Museum now is") for a courtroom, 42 by 93 ft., with judges' chamber, clerk's office, and jury rooms connected with it, also for the committee of assessment, the public administrator's office and court, and the marine court. The several apartments remaining may be appropriated later.

The committee further proposes "that the Iron railing of the Park be extended on the Chamber street front, and that the ground be laid out in an Ornamental manner... that the whole building be new painted white, as a method of the scenery of the revolting attributes of a common prison." The council therefore suggests "that part of the Institution [the east end] lying nearest to your future Court of Sessions [the Rotunda], be occupied for the accommodation of persons charged with crime, to be called the House of Detention, and to be prepared with the view of separation or such Judicial classification as may best comport with the health and safety of all the individuals confined therein. As that part of the Institution to be occupied as above stated will be separated from the Court of Sessions (now preparing) by a small space of ground it will be readily seen that by running high walls so as to include that space into a yard, as it is now occupied, the intercourse between the two places will be entirely concealed from the public eye; and thus one of the best, as it would be, and is, a woodshed for idle and curious spectators to witness the passage of the prisoners will be in a great measure done away;..." The following proposition closes the report: "The future improvements of the City will undoubtedly develop a more central location for all these Institutions; but until that period arrives, public accommodation as well as economy suggests the present is the most suitable situation." The estimated cost of the proposed alterations, except the iron fence, will not exceed $10,000. The joint committee offers a resolution that they be authorised to make the alterations within this limit of cost. This report of Nov. 30 last, now brought forward, is presented by the joint committee to the common council with a fresh report embodying additional observations. They say that "all the legal measures necessary to put the City authorities in possession of the building called the Institution have been taken, and the same is now in situation to be occupied for public purposes, as soon as the Common Council shall direct."

... When to this consideration is added the present crowded state of the City Hall and its utter inadequacy to the accommodation of the numerous Courts and public Offices, the Committee are persuaded that no other arrangement need be urged to induce the Common Council, without further delay, to adopt some plan for the occupation of the building in question."

Since the Nov. 30 report was written, proposing a house of
detention in the east wing of the building, "the Board have passed certain resolutions on the subject of a Location for a New Bride- well, the effect of which however, has been suspended by a notice of re-consideration. The Committee therefore have deemed it proper to postpone for the present that branch of the subject referred to them, reserving until the Bridewell location question shall have finally been settled by the Board.

"With respect to the Western portion of the building, there is no difficulty in the way of fitting it up immediately to meet such of the Public wants as are the most pressing." The following plan is proposed:

First. One large Court Room with its Judges Chambers, Clerks Office and Jury Rooms, for the use of one or more of the higher Courts.

Second. One smaller Court Room for the Surrogate, with an Office adjoined for the records of Wills and other documents relating to the estates of deceased persons.

Third. One Court Room for the Marine Court with a Clerk's Office and Jury Room, instead of the present subterranean abode of that tribunal.

Fourth. A more appropriate and commodious apartment for the Grand Jury with a Chamber for the witnesses and others in attendance.

The estimated cost for these alterations is $5,000. The board passes a resolution that this portion of the building be so fitted up, and an appropriation of this amount is made for the purpose.—

M. C. G. (1784-1831), XIX: 76-80. See, further, Ji 12; and description, of Pi 95-6, III: 35.

Thomas Kelah Wharton, a young artist, describes in his journal the appearance of New York upon his arrival from England. Among other things, he refers to "The weeping willows... in the church yards—and in the streets the light and elegant carriages, some showy equipages, and a constant stream of busy looking, fast walking people..."—From Wharton's original manuscript journal (in the N. Y. P. L.), containing charming views, only one of which, however, a view from the Battery, is of New York interest.

Among the season's improvements in Niblo's Garden, one of the "most elegant attempts to cover a street with beauty...and finish it in imitation of marble—and also to put up in front of it a chaste and beautiful Portico, to be supported by massive marble columns..."

"We also understand that the Vestry of Trinity Church intend making an improvement about St. Paul's, which has long been called for. In place of the heavy brick walls which now nearly surround this beautiful edifice, and the block which it occupies, it is intended to substitute a light iron railing similar to that in front of Trinity Church—terracing the ground on the inside, which is higher than the street. It is also intended to remove the present uneven flagging in front of the church, and supply its place with one which will do credit to the church."—N. Y. Eve. Post, Je 19, 1830.

An address of the general executive committee of the mechanics and other workingmen of the city (see D 29, 1839) is read at a public meeting at the West Chester House, Bowery, and unanimously approved. The address recounts the fact that 25 members of the executive committee have "denounced the principles which they once professed to entertain and vacated their seats in the Committee," and others have been elected to fill their places. The committee declares, "It is the destruction of religious opinions and prejudices in their great work of political reform." In addition to the principles previously enunciated the committee considers "dangerous" the practice of the legislature in incorporating companies "with privileges which are denied to individuals," enabling the rich "to combine and concentrate their power to oppress the poor and laboring classes of society." Especially dangerous do they consider the chartering of banks.

"The polar star to which our efforts point," the address continues, "is a more extensive general system of National Education. We believe that you have not yet at the bottom of your manhood, that virtue and happiness, vice and misery, are but cause and effect, and crime will cease. This can be done in no way, but by a proper training of the intellect, from infancy to manhood."

The committee recommends a general convention in September to nominate "suitable candidates to be supported by the Farmers, Mechanics, and other Working Men, for the offices of Governor and Lieutenant Governor."—An Address of the General Executive Committee of the Mechanics and other Working Men (1830), in N. Y. P. L.

George IV dies and is succeeded by his brother, William IV.—June 21

Hazen, Europe since 1815, 428.

Several hundred persons "opposed to the execution of the law of the Corporation relative to taking up hogs found running at large in the streets" cause a riot at First Ave. and North St., overturning the hog carts and covering them with mud.—N. Y. Eve. Post, Ji 21, 1830.

"The corner-stone of the Female Asylum for Lying-in Women is laid at Orange and Prince Sts. by Mayor Bowron.—N. Y. Eve. Post, Ji 1 and 3, 1830. It was dedicated in Jan., 1832.—Ibid., Ja 15, 1831.

Secretary of State Martin Van Buren arrives at New York and takes lodgings at the City Hotel.—N. Y. Eve. Post, Ji 18, 1830.

One of the old houses of the Dutch colonial period, bearing the date 1668 on its stepped-gable front, was still standing at this time at 41 Broad St., occupied by the grocery of H. N. Ferris. For description and wood-cut view, see N. Y. Mirror, VIII: 11; Man. Com. Coun. (1847), 371.

On March 19, 1831, the Mirror published a view of a similar old house in Pearl St., bearing the date 1697, and which, a description stated, "was pulled down about three years since" (1828).—N. Y. Mirror, VIII: 289; Man. Com. Coun. (1847), 246.

The joint committee on public offices and repairs, to which was referred a communication from the register of deeds, as well as a resolution offered by Mr. Roosevelt in regard to fireproof offices, and a report of a former committee on the same subject (see Mr. 9, 1829), makes a report to the common council. This states that "the City Hall, in which the Public Records are now deposited, is not secure against Fire;" and that the committee has examined the two suggestions submitted: "one of which proposes the fitting up of a portion of the building on Chamber street, and the other altering the old Gaol." Observations in detail are embodied in the report.

The board passes the resolution, proposed by this joint committee, "that it he referred to the Committees on Public Offices and Repairs to cause the building at present occupied as a Gaol to be fitted up in a Fire-proof manner for the reception of the Public Records as soon as the imprisoned debtors shall be removed," and $15,000 is appropriated to carry this into effect.—

A resolution is referred to the committee on public offices and to that on the jail and bridewell "that the Committee on Repairs be authorized to fit up part of the Old Alms House in such manner as to securely accommodate the Prisoners in our Jail."—Ibid., XIX: 143. For report of these joint committees, see Ag 23.

The common council refers to the committee on arts and sciences, "with Authority," a petition from M. Nash that he be employed without compensation in assisting to fit up the Observatory in the Cupola of the City Hall" (see My 19, 1828).—M. C. G. (1784-1831), XVI: 147.

The common council resolves to widen and improve Pine St. at the corner of William St.—M. C. G. (1784-1831), XII: 157; Man. Com. Coun. (1857), 529.

"The question respecting the jail appears to have been at length decided in a way directly contrary to the wishes of our constituents, it is to be fitted up in a fire-proof manner for the purpose of keeping the public records!" There seems to be a settled determination on the part of the Common Council totally to disregard the desires of their constituents. The public have long since voted the nuisance down, but we fear it will remain for their posterity to demolish, unless they take the law in their own hands,
1830 and tumble it about the ears of our city ages. We should be
July sorry to recommend such a course; but if a public meeting should
17 be called for the purpose, we would not answer for the conse-
quences."—N. Y. Mirror, Jl 17, 1830.
Aug., (n.), the old bridewell became the debtors' jail.
After this, the editor of the Mirror seems to have given up hope,
for a while, of having the jail and bridewell removed. His next
comment does not appear until July 5, 1834 (q.v.).

"The Mirror publishes a description and a small wood-cut view of the French Church du St. Esprit (on the north side of
Pine St., east of Nassau St.), drawn by Davis and engraved by
Mason. It is the oldest religious edifice in the city, having been
erected in 1704.—N. Y. Mirror, VIII: 8. See, however, the changes
in the structure, noted in L. M. R. K., III: 93. The Davis draw-
ing is in the author's collection.

Blanchard's equestrian company is now at Vauxhall Garden.—
N. Y. Gen. & Gen. Adv., Jl 21, 1830. After this, the resort began
to decline in popular favour, while Niklo's Garden, nearby, began
to win popularity.—See Je 12.

For an account of the various resorts in New York that bore the
name of "Vauxhall," see the Index of the present work, and
articles by Hopper Striker Mott in the N. Y. Sun, Mr 29 and 31,
1818. See, further D 27, 1833; 1837.

The Mirror publishes, with a description, a small wood-cut view
drawn by A. J. Davis and engraved by A. J. Mason, of a
tiled cottage, a hundred years old, at the north-east corner of
Broad and Beaver Sts.—N. Y. Mirror, VIII: 17. Redrawn to
represent its fancied appearance in Dutch times, and bearing the
date 1679, this view was published in the Man. Com. Coun. (1853),
378.

The "July Revolution" begins in France. It lasted for three
days, during which about 600 lives were lost. It resulted in the
overthrow of Charles X and the accession of Louis Philippe,
Duke of Orleans.—Hazen, Europe since 1815, 92-99. See S 2.

Ground is broken at Schenectady for the Mohawk and Hudson
R. R.—N. Y. Eve. Post, Ag 3, 1830.

The Mirror publishes a view of Park Row, with a long historical
and local description, the latter half of which is devoted to an
account of the landmarks seen in the picture. The occupants of the
houses on the east side of the street are named. In connection
with a mention of the Park Theatre, a resume of the history of
New York's early playhouses is presented.—N. Y. Mirror, VIII:
33-34.

The first number of The Christian Intelligence appears, succeed-
ing The Mag. of the Rf'd Dutch Church (see Ap, 1826). It is still
published.

Col. Marinus Willett, "the hero of Fort Stauwix," dies, more
than 90 years of age. His body was interred in Trinity church-

The common council adopts a resolution to enclose the potter's
field with a board fence, the cost not to exceed $500.—M. G. C.
(1788-1831), XIX: 514.

The standing committee on public offices and on the jail and
bridewell, acting jointly, report that, although six years have
depassed since the passage of the act of April 10, 1824 (q.v.), which
authorised the building of a new jail and bridewell, or the approp-
riation for this purpose of a building already erected, nothing
effectual has been done, owing to great diversity of opinion.
On July 12 (q.v.), a report was adopted directing the fitting
up of the present jail for the reception of the public records.
This required that other accommodation be provided for the
confinement of the debtors. The committee finds that "it would
be most advisable as a temporary arrangement, that the Bridewell
should be turned into a Debtors Prison, and that the Criminals
should be removed to the establishment at Bellevue. By adopting
this course no expense will be incurred, and the future changes
now in contemplation, may hereafter be made without loss.

A large portion of the Penitentiary [at Bellevue], owing to
the removal of the prisoners to Blackwells Island, is now vacant,
and the building (in everything except its name) is in fact a Bridewell
ready built. Its distance will no doubt be attended with some
inconvenience, as an evil however which the City Increases will
be duly deserving and which even now may be greatly mitigated
by holding there the Courts of Special Sessions, and also a branch
of the Post Office. And with respect to the present Bridewell its
occupation as a Goal would probably be of short duration, inasmuch
as the barbarous practice of imprisonment for debt, juggling from
Aug. 23, the strong indications of public sentiment will no doubt ere long
be abolished.

The joint committee therefore recommends, and the board
passes, the following resolution: "Resolved that the building in
this city at present known as the Bridewell be and the same is
hereby designated as the Gaol of this City for the confinement
of persons on civil process [debtors]."

"Resolved that the Building at Bellevue, in this City known
as the Penitentiary be and the same is hereby designated as the
City Prison or Bridewell of this City.

"Resolved that the Keeper of the City Prison for the time being, under his charge to be removed to the said Prison
at Bellevue and that the Debtors in actual confinement be there-
upon removed to the Goal or debtors Prison so newly designated."
—M. G. C. (1784-1831), XIX: 193-195 and descrip. of Pl 97,
III: 588. See further, O 4, N 15.

The common council adopts a resolution offered by the present
board of health that that board be composed of the mayor, recorder,
and aldermen, and that any seven members shall be competent
to transact business.—M. C. G. (1784-1831), XIX: 196.

The common council, on being informed of the death of ex-
Mayor Col. Marinus Willett (see Ag 22), passes resolutions of
respect, and arranges to attend his funeral.—M. C. G. (1784-
1831), XIV: 196.

"A plan is on foot for erecting in the Park a statue of Washing-
ton, by Causici, who executed the Baltimore monument with so
much credit to his talents as a sculptor. We understand that
several of our most wealthy and respectable citizens are engaged in
the undertaking."—N. Y. Eve. Post, Ag 21, 1830. See also ibid.,
S 2, 1830.

Charles Keen, son of the celebrated tragedian, makes his first
appearance in America, at the Park Theatre. He plays Richard
III—Hone's Diary, Jl 21; Haswell's Reminiscences, 245.

News of the revolution in France reaches New York.—N. Y.

"A New Yorker" writes to the press a letter urging that con-
struction be halted before the erection of the "new prison" of the
City (see Ag 31), to be designed by Causici (a pupil of Canova),
who is now in New York. "Several of our most respected and
wealthy citizens have already signified their intention of sub-
scribing to M. Causici's prospectus, which, it is understood,
will be published in a day or two."—N. Y. Eve. Post, S 2, 1830.

An establishment of a new cast has been recently got up in
this city. It consists of upwards of one hundred [wax] figures,
mostly intended to represent persons and events in important
eras of sacred history . . .

"The museum is situated at the corner of Broadway and
Howard street, and occupies the second and third stories of
that spacious building, Howard House."—N. Y. Eve. Post,
S 5, 1830.

The Mirror publishes a view, drawn by Davis and engraved by
Anderson, of the block on the west side of Nassau St., from Ann
to Beekman St., showing, at the Ann St. corner, the printing-house
in which the office of the Mirror is situated. All the buildings are
described, including Franklin Hall on Ann St., and the Am. Bible
Society building and Clinton Hall on Nassau St.—N. Y. Mirror,
XII: 65.

Charles E. Durant, the first American aeronaut, ascends in a
balloon from Castle Garden. He landed near South Amboy.
—N. Y. Eve. Post, S 8, 19, and 11, 1830.

The members of a committee on behalf of N. Y. University
write a letter to the president, vice-president, and directors of
the N. Y. Athenaenm, in which they say:

"Gentlemen, the establishment of a University in the City of New York has for some time occupied the attention of several of our most dis-
tinguished citizens; and an amount of means is now pledged to the
object, which will place the Institution at its commencement on a
liberal foundation.

"In contemplating the various plans by which the University
as well as other Seminaries of Learning might most effectually
promote their common cause it has been thought that a meeting of
Literary and Scientific gentlemen to confer on the general interests
of Letters and Liberal education would be attended with happy
results; and so far as it has been in our power to collect the sentiments
of those most competent to judge, the measure has been
There seems to be a universal impression that our Literary Men and Literary Institutions have been too much insulated and that more frequent intercourse and comparison of views would be a source of high gratification to individuals and a benefit to those interested in the welfare of Science & Literature.

With this view the undersigned have been appointed a Committee on behalf of the University of this City to invite such a meeting to be held in New York on the 20th of October next.

"We are happy to state that some of our most distinguished Scholars who have spent several years in the Universities of Europe will be present on the occasion, and give the result of their observations on the systems of education now pursued at home & abroad.

"Will you favor the meeting with your presence, and with such views as you may be pleased to lay before it"

"We have the honor to be

"Very Respectfully

"Your Obt. Srvts.

"To the President

"Vice Presidents & Directors

"of the New York Athenaeum.

"From the original, No. 1449 in the Everett collection, in the N. Y. P. L. This is one of the letters, regarding the proposed convention, which were sent by a sub-committee of the executive committee of the university (appointed on Aug. 31 for this purpose) to learned and literary men in the United States.—Chamberlain, N. Y. University (Boston, 1901), I: 59. See O 15 and 20.

The Liverpool and Manchester Railway, the first passenger railroad in England, is opened.—Haydn’s Dict. of Dates, 836, 614.

The committee on the subject to whom the question has been referred, reports in favour of “painting the Basement of the City Hall white in imitation of Marble.” They think “a great Error was committed by building any part of the outside of the Hall with Brown free stone, when Marble could have been procured of a much stronger and more durable nature, But from the experience of some of your Committee, and from the enquiry they have made of old experienced builders and Stone Cutters, they are satisfied that painting free Stone with Oil colours, tend more to harden and preserve that material, than any other thing they are acquainted with.” The common council therefore adopts a resolution “that the Superintendent of Repairs cause the Basement of the South, East and West fronts of the City Hall to be painted white under the direction of the Committee on Repairs”—M. C.C. (1784-1834), XLI: 249. This legislation was never carried out. See Ap 1, 1837. The north front, except the basement, was painted white in 1890 (p. 31, My 15).

The common council resolves that Beckman, Wall, Fulton, and Cortlandt Sts. be lighted with gas.—M. C. C. (1784-1831), XIX: 254.

During the year ending Sept. 30, 13,748 passengers arrived at the port of N. Y.—Arrivals of Alien Passengers and Immigrants (1891), table 7, p. 64.

The Belgians declare their independence of Holland. They decided in favour of a monarchy, adopted a liberal constitution, and elected Leopold of Coburg as king.—Hazen, Europe since 1815, 107.

The common council refers to the committees on public offices and repairs “to prepare suitable apartments in the Westerly end of the Old Alms House for the holding of the criminal Courts of the City, and for the accommodation of the Grand and Petit Juries, the District Attorney, the Clerk of the said Courts, The Police Office and others connected with the same,” and that $4,000 be appropriated for the purpose—M. C. C. (1784-1831), XLI: 360. See also Ap 12 and Aug 23. For the committee’s report, see O 18.

The school of the National Academy of Design moves into Clinton Hall, just completed at the south-west corner of Nassau and Beekman Sts.—Cummings, Historic Annals of the Natl. Acad. of Design, 119.

Shareholders having been obtained for a new university in New York (see Ja 6), they now choose a council from their own membership. Concerning the idea of having shareholders for an educational institution, see N. Y. University, ed. by Chamberlain (Boston, 1901), 52.

The joint committee, appointed on Oct. 4 (p. 11), on the subject of fitting up the western wing of the almshouse, reports on the plan and on the legal aspects of the proposed removal of the courts to this building, and a resolution is passed that the committee on applications to the legislature seek the passage of an act authorizing the removal.—M. C. C. (1784-1831), XIX: 297-99. See further, N 15. See also F 28, 1832.

The common council accepts an invitation to attend the laying of the corner-stone of the Northern Dispensary (see 1827, and Mr 22, 1830)—M. C. C. (1784-1831), XIX: 304; and see pp. 340-41.

From Oct. 20 to 25, a convention of literary and scientific men was held in the common council chamber in the city hall, in response to the invitations sent by a committee of the university to be established in New York, for which see the original MS. quoted under Sept. 10, supra. John Delafield, who acted as secretary of these sessions, copyrighted, on Nov. 23, a book of the proceedings, bearing the title, Journal of the Proceedings of a Convention of Literary and Scientific Gentlemen, held in the Common Council Chamber of the City of New York, October, 1830. New York: Jonathan Lewitt and G. & C. & H. Carroll. William A. Mercein, Printer, No. 240 Pearl-street, corner of Burling Slip. 1831. For reproduction of the title-page, and digest of the transactions, see N. Y. University, ed. by Chamberlain (Boston, 1901), 53-58. See further, Ja 31 and Ap 18, 1831.

A new committee reports to the common council on a memorial from the Manhattan Gas Light Co. (see F 26), which asks the board to annul the city’s contract with the N. Y. Gas Light Co. (see O 30, 1826; Mr 10, 1828), and to grant to the memorialists the right, in common with that company, “to use the Streets of the City, for laying Pipes and supplying Gas Light within the Limits prescribed for the old Company.” The committee lays before the board an historical resume of the origin and proceedings of the two companies. The Manhattan Co. claimed in its memorial that the concurrent rights applied for would create a “useful competition;” and alleged that the N. Y. Gas Light Co. had “wholly failed to comply with the stipulations and engagements which form the conditions of their contract with the Corporation.” The memorial offered to prove that the gas of the N. Y. Gas Light Co. was of poorer quality than that of London; that the gas factories of that company have been “nuisances since their erection;” and that their pipes “have been and are, in several streets so carelessly laid, as to be offensive to Citizens;” that the price has been “exorbitant;” and that pretended reductions have been “wholly nominal and deceptive,” although superior gas can be supplied at a cheaper rate.

The committee reports that it has held several meetings, and examined witnesses under oath, including “persons both scientifically and practically acquainted with the quality, manufacturing and furnishing of Gas in different cities in Europe, as well as at Baltimore and New York.” The facts embodied in the report. It is found that the N. Y. Gas Light Co.’s gas is inferior to that of London. Some witnesses testified that the factories were nuisances, but none that they were injurious to health. They are less offensive than that of London. It was proved that the company “used great care in testing each pipe by hydrostatic pressure, and also in joining, cementing and laying the same; and in all cases, endeavouring to discover and remedy every accidental escape of Gas as early as possible.” It also appears from the testimony that “the Gas delivered to customers is all measured with meters, made and tested with great care.” No proof was adduced to show “that better Gas could be furnished at less or even at the present rates;” it being found “that the company could not afford to reduce their price of gas, without an increase of custom from the public.” It was also proved “by the evidence of the manager of the company that the Company were losers to the amount of fifteen dollars per year, for every public lamp furnished by them with gas under their contract with the Corporation;” and it was shown “that the price per annum, for lighting each public lamp with coal gas, in Baltimore was Ten dollars, and in London about Twenty five dollars, while the Corporation here pay the company but Five dollars and twenty five cents per Lamp.”

Regarding the alleged benefits of competition, “it has been
THE ICONOGRAPHY OF MANHATTAN ISLAND

1820
shown by the result of an investigation made by Commissioners in the City of London, and instituted by the British Parliament that serious evils grew out of the operations of different Gas Companies in the same district, the breaking up of the pavement for two sets of mains [in] the place of one; the confusion and disorder produced by pipes crossing and intersecting each other, the disputes and delay in identifying leakages, altogether became so great an inconvenience that it proved absolutely necessary to separate and confine the different companies to different districts, which distinct separation was accordingly made of the different Companies; and all the latter grants made by Parliament for the manipulation to new Companies, have been confined to particular and exclusive sections of the City.

The law committee further reports that the N. Y. Gas Light Co.'s works "have now been in operation between five and six years, and during the whole of that period, by the judicious management and care of the persons in their employ, the difficult and somewhat dangerous process of preparing and distributing the gas, have been carried on without a single failure of any consequence, in supplying the necessary quantity of Gas, and without any accident affecting the slightest degree the person or property of any of the Citizens."

In conclusion, the committee states that it has not found any breach of contract on the part of the N. Y. Gas Light Co. to justify the common council in annulling or revoking the grant. The common council therefore offers a resolution that "it is inexpedient to grant the prayer of the petitioners." While the action of the board on this report is not recorded in the minutes in a very clear manner, it appears to have been agreed to.—M. C. C. (1874-1871), XIX: 315-21. See, however, D 31, 1873.

26
Ex-President Monroe arrives in New York to take up his residence.—N. Y. Ev. Post, O 27, 1870, citing "Civ. & Em."

29

Nov.

"Eight beautifully executed views of some of the most striking parts of our city, engraved by Smillie, from drawings by C. Burton, have just been published by Bourne. The subjects are Park Place, the American Hotel in Broadway, the Bowling Green, the Broadway, from the foot of the Cortlandt street, the Grace & Trinity Churches, Masonic Hall, and the Landing at the foot of Barclay street. The engravings are small, not quite five inches by four, but they are equal both in effect and delicacy of execution to the best views we have of the English cities."—N. Y. Ev. Post, N 11, 1870. The view of Grace and Trinity Churches is reproduced as Pl. 101-2, Vol. III, and the series is described in III: 594-98. See also Pl. 101-8, Vol. III, and S 28, 1871.

12
Ex-President Monroe presides at a meeting held at Tammany Hall to make arrangements for celebrating "the glorious results of the French Revolution."—N. Y. Ev. Post, N 13, 1870. See also Ibid., N 15, 16, 17, 18, 19, 20, 22, 23, 24, 1870. See N 26.

The grand jury makes a presentment against lottery tickets, showing that there are about 52 lotteries a year in this city, issuing 1,857,000 tickets, amounting to about $9,270,000. The usual profit of the vender is about $1 a ticket. Lottery tickets "create a spirit of gambling, which is productive of idleness, vicious pursuits and habits, which lead to the ruin of credit and character, and frequently to other crimes."—N. Y. Ev. Post, N 16, 1870. "Lotteries in Am. History" by A. R. Spofford, in Am. Rev., Am. Hist. Assn. for 1852, p. 181. See My 3, 1870, and D 31, 1873.

15
The common council adopts a report of its joint committee on public offices and repairs (see Ag 23) in relation to alterations they propose to make in the "Old Jail" for the purpose of converting it into fire-proof offices. This report recommends that, in addition to the alterations intended by the resolution of July 12 (1870), the last floor of the jail "ought to be made in such a manner as to correspond in appearance with that splendid building" (the city hall). The board appropriates $7,500 for the purpose, in addition to the $14,000 already allowed.—M. C. C. (1874-1871), XIX: 358-59. See also descript. of Pl. 97, III: 358. See, further, Nov., My 7, 1871.

It is estimated that 50,000 people from the city, the neighboring counties, and the adjoining States will unite in celebrating, on the 25th inst., the double jubilee, on occasion of the anniversary of the evacuation of this city by the British in 1813, and of the triumph of liberal principles in Paris the 27th, 28th and 29th July last, and throughout France immediately after those three memorable days. Our citizens of all conditions and parties are active in preparation for an imposing spectacle at the parade ground, Washington Square, which will be the Champs Elysees of the day. The Common Council, the various societies of New York and Brooklyn, the Trustees of the latter, and indeed almost every public and private civic body will be represented. . . .—N. Y. Ev. Post, N 20, 1870, citing Standard. See N 26.

The celebration in honour of the revolution in France is postponed to Nov. 26 on account of rain.—N. Y. Ev. Post, N 25, 1870.

The successful revolution of July, 1830, in France (q. v., Ji 28), is celebrated in New York on this day, having been postponed from the 29th on account of the weather. "Evacuation Day" was selected as an appropriate day for celebrating this event because that day restored our own citizens to their homes and to the enjoyment of their rights and liberties. A great civic and military pageant is held in the morning, the route of the procession being from the Park, by way of Chatham St. and The Bowery, to Washington Square, where the celebrants are met by the venerable ex-president, James Monroe, by the chairmen. An oration is delivered by Samuel L. Gourneau, Monroe's son-in-law; an ode, written by Samuel Woodworth, is sung by the Park Theatre choristers. A tri-colour flag is presented, on behalf of the natives of France, resident in New York, to the First Division of the N. Y. State Artillery, commanded by Maj.-Gen. Morton. The Marseilles Hymn is sung, and the proceedings in Washington Square close with a feu de joie. The remainder of the day is occupied with dinners, illuminations, and special performances at the theatres. For details of the events of the day, see N. Y. newspapers of Nov. 25-30; also "Full Account of the Celebration of the Revolution in France, in the City of New-York, on the 25th ultimo," which comprises the latter half of a work entitled Full Annals of the Revolution in France, 1870, by Myer Moses (N.Y., 1870). The most interesting features of the procession were the printing-press striking off the ode, written for the occasion by Woodworth and distributed to the crowd, to be sung to the air of the Marseilles Hymn; and a huge ox on a platform drawn by four oxen as large as himself, the butcher's ox, contributor to the meat of the printed ode, was sold in the H'Y Cady Sturges sale at The Anderson Galleries, Nov. 20-22, 1872; there is also one in the collection of the Grolier Club. The text of the ode, in Woodworth's handwriting, is in the N. Y. Pub. Library.

The common council orders that the triangular piece of ground known as Union Place be appropriated for public purposes.—M. C. C. (1784-1871), XIX: 356-70. On March 7, 1871, the aid of the legislature was sought.—Ibid., XIX: 544-40. For the resulting enactment, see Ap 23, 1871.

Special fast express are employed by rival New York newspapers to bring President Jackson's message from Washington to New York. The Courier & Enquirer and the Journal of Commerce had their own separate and independent arrangements. The other papers joined in a third express.—Boston Daily Ev. Transcript, D 11, 1870. See also Stoneman's Hist. of the Express Companies (1858); McMaster, Hist. of the People of the U. S., VI: 57.

The trustees of Columbia College convey to the city the part of 13 Chapel St. between Murray and Barclay Sts.—M. C. C. (1784-1871), XIX: 384.

Dec.

Delmonico begins to win favour with the social life of New York. Philip Hone records in his diary: "Moore, Giraud, and I went yesterday to dine at Delmonico's, a French restaurateur in William street, which I heard was upon the Parisian plan, and very good. . . ."—Hone's Diary, I: 25. See N 12, 1842; also L. M. R. K., III: 177.

"Re-opening of the largest museum in America. . . ." The American Museum formerly located in the Park, from whence it was removed (by the peremptory orders of the Common Coun-
The original picture, which was about six feet in length, was presented by the artist to the Connecticut Historical Society. There were five or six coaches, of the old-fashioned stage-coach pattern, with a driver's seat or box upon either end outside. See Brown's History, p. 178, passim, where, in a reproduction of the cut-out picture the train is presented in a folding plate, showing the engine, tender, and two of the passenger coaches. See, further, S. 26, 1811. The original engine was "scrapped" in 1855.—Stevens, The Beginnings of the N. Y. Cent. R. R. (1826), v. 43-45. A replica of the "De Witt Clinton," as described by a circular of the N. Y. Cent. & Hudson River R. R. (1823), under the title "The First Train Run in the State of New York," weighs, without its tender, 9,420 pounds; the tender weighs 5,340, and each of the three coaches (now connected with it) weighs 3,420 pounds. The "De Witt Clinton" is 12 ft. 10 in. long, and its height to the top of the steam dome is 8 ft. 5 in. The tender is 10 ft. 11 in. long. Each coach is 14 ft. long.

In 1821, this replica of the "De Witt" and its coaches were placed on exhibition in the east balcony of the cornerstone of the Grand Central Station [What a name!]. On July 17, 1821, the engine, under its own steam, was exhibited with the coaches on the rails on the track below Riverside Drive, from 96th to 116th St. It was then mounted on flat cars and taken to Chicago for the "Progress Pageant" held there from July 30 to Aug. 14.—N. Y. Times, X17 and 19, 1821. Afterwards, it was exhibited at several state fairs, and at a number of other places throughout the Eastern states. On its return to New York in 1824, it was again placed on exhibition in the Grand Central Station, where it still remains (1926). Mr. Stevens' book (vide supra) corrects for the first time the popular supposition that the replica, now shown, is the original engine.

In this year, The Spirit of the Times, the first sporting paper published in the U. S., appeared in N. Y. City. The publisher was Wm. T. Porter.—Annals of N. Am., 564.

In this year, the first steam-boat arrived at Chicago.—Preble, Hist. of Steam Navigation, 174.

Mrs. Toddole, who sailed from London on Nov. 4, 1827, and arrived "on Christmas-day at the mouth of the Mississippi," and thereafter spent three and a half years in the United States (principally in the Western and Southern portions), visited New York City for a period of seven weeks in 1831, before returning to England. Her observations, published in London in 1832 in Domestic Manners of the Americans, at once became famous; they contained the following (selected) references to this city:

"I have never seen the bay of Naples, I can therefore make no comparison, but imagine it receiving any thing of the kind more beautiful than the harbour of New York. . . . I doubt if even the pencil of Turner could do it justice, bright and glorious as it rose upon us. We seemed to enter the harbour of New York upon waves of liquid gold, and as we darted past the green isles which rise from its bosom, like guardian sentinels [sic] of the fair city, the setting sun stretched his horizontal beams farther and farther at each moment, as if to point out to us some new glory in the landscape.

"New York, indeed, appeared to us, even when we saw it by a soberer light, a lovely and a noble city. To us who had been so long travelling through half-cleared forests, and sojourning among an 'I'm-as-good-as-you' population, it seemed, perhaps, more beautiful, more splendid, and more refined than it might have done, had we arrived there directly from London, but making every allowance for this, I must still declare that I think New York one of the finest cities I ever saw, and as much superior to every other in the Union, (Philadelphia not excepted,) as London to Liverpool, or Paris to Rouen. Its advantages of position are, perhaps, unequalled anywhere. Situated on an island, which I think it will one day cover, it rises, like Venice, from the sea, and like that fairest of cities in the days of her glory, receives into its lap tribute of all the riches of the earth.

". . . . Broadway . . . may vie with any [street] I ever saw, for its length and breadth, its handsome shops, neat awnings, excellent taverns and well-dressed pedestrians. It has not the crowded glitter of Bond-street equipages, nor the gorgeous frontal palaces, but it is magnificent in its simple front, ornamented by several handsome buildings, some of them surrounded by grass and trees. The Park, which stands in the noble city-hall, is a very fine area . . .

"The dwelling houses of the higher classes are extremely hand-
THE ICONOGRAPHY OF MANHATTAN ISLAND

1831 some, and very richly furnished. Silk or satin furniture is as often, or oftener, seen than chintz; ... Every part of their houses is well carpeted, and the exterior finishing, such as steps, railings, and door-frames, are very superior. Almost every house has handsome green blinds on the outside; balconies are not very general, nor do the houses display, externally, so many flowers as those of Paris and London ... "Hudson Square and its neighbourhood is, I believe, the most fashionable part of the town; the square is beautiful, exceedingly well planted with a great variety of trees, and only wanting our frequent and careful mowing to make it equal to any square in London. The iron railing which surrounds this enclosure is as high and as handsome as that of the Tuileries, and it will give some idea of the care bestowed on its decoration, to know that the gravel for the walks was conveyed by barges from Boston, not as ballast, but as freight.

"The great defect in the houses is their extreme uniformity—when you have seen one, you have seen all ... "There are three theatres at New York ... The Park Theatre is the only one licensed by fashion, but the Bowery is infinitely superior in beauty; it is indeed as pretty a theatre as I ever entered, perfect as to size and proportion, elegantly decorated, and the scenery and machinery equal to any in London, but it is, not the fashion. The Chatham is so utterly condemned by bon ton, that it requires some courage to decide upon going there; ... "At the Park Theatre ... we saw many ‘yet unrazored lips’ polluted with the grim tinge of the hateful tobacco, and beard, without ceasing, the spitting, which of course is its consequence. Their theatres had the orchestra of the Feydeau, and a choir of angels to boot, I could find but little pleasure, so long as they were followed by this running accompaniment of thorough base. ... "The Exchange is very handsome, and ranks about midway between the heavy gloom that hangs over our London merchants, and the light and lofty elegance which decorates the Bourse at Paris. The Golden Treasury, however, the Bank of the City, and a choice of angels to boot, I could find but little pleasure, so long as they were followed by this running accompaniment of thorough base. ... "There are a great number of negroes in New York, all free; their emancipation having been completed in 1827. Not even in Philadelphia, where the anti-slavery opinions have been the most active and violent, do the blacks appear to wear an air of so much consequence as they do at New York. They have several chapels, in which negro ministers officiate; and a theatre in which none but negroes perform. At this theatre a gallery is appropriated to such whites as choose to visit it. ... "If it were not for the peculiar manner of walking, which distinguishes all American women, Broadway might be taken for a French street, where it was the fashion for very smart ladies to promenade. The dress is entirely French; not an article (except perhaps the cotton stockings) must be English, on pain of being stigmatized as out of the fashion. Everything English is decidedly Manuel's; ... "Most of the houses in New York are painted on the outside, but in a manner carefully to avoid disfiguring the material which it preserves; on the contrary, nothing can be neater. They are now using a great deal of a beautiful stone called Jersey freestone; it is of a warm rich brown, and extremely ornamental on the walls of houses it has been employed. They have also a grey granite of great beauty. The tatterpaving in most of the streets is extremely good, being of large flag stones, very superior to the bricks of Philadelphia.

"At night the shops, which are open till very late, are brilliantly illuminated with gas, and all the people seem as much alive as in London or Paris. ... "The hackney coaches are the best in the world, but abominably dear, and it is necessary to be on the surerue in making your bargain with the driver ... "The private carriages of New York are infinitely handsomer and better appointed than any I saw elsewhere; the want of smart liveries destroys much of the gay effect, but, on the whole, a New York summer equipage, with the pretty women and beautiful children it contains, looks extremely well in Broadway, and would not be much amiss anywhere. "The luxury of the New York aristocracy is not confined to the city; hardly an acre of Manhattan Island but shows some pretty villa or stately mansion. The most chosen of these are on the north and east rivers, to whose margins their lawns descend. Among these, perhaps, the loveliest is one situated in the beautiful village of Bloomingdale; here, within the space of sixty acres, almost every variety of garden scenery may be found. ... no spot I have ever seen dwells more freshly on my memory, ... than that of Woodlawn."—From Domestic Manners of the Americans (1st ed., 1832), II: 151-83. See also an introduction to a recent ed. of this work (N.Y., 1901), written by Harry Thornton Peck, quoting from the Autobiography of Anthony Trollope, Mrs. Trollope's son, in which Mr. Trollope describes the causes which induced his mother to write this famous book. Mr. Trollope states that Domestic Manners "was the first of a series of books of travels, of which it was probably the best and certainly the best known." He means, of course, the first written by his mother; but Mr. Peck erroneously interprets this statement when he says "Mr. Trollope was mistaken in thinking his mother's book the first of the travels series." In this year, owing to the great increase of equity business— ... for the first circuit.—Daly, Hist. Sketch of the Judicial Tribunals of N.Y. from 1625 to 1846 (1858), 57, cited Laws of N.Y. (1851), 12. Other changes were made in 1839 and 1840, which prevailed until the court of chancery was abolished by the constitution of 1846 (p.v.). "In the vaults and cellars of the buildings of the Brinkerhoffs,— ... the first city hall's "ruins may yet he easily traced."—Fay's Views of New York (1831), 135; R. De Forest, Old Time in N.Y. (1833), 38. See also Mr 14, 1700. The author examined the cellar walls in 1909, when they were (and presumably still are) distinctly discernible.

In this year, 23d St. was opened from Third Ave. to the East River.—Man. Com. Coun. (1857), 530.

In this year, Geo. M. Bourne published his series of small views of New York; they are listed by titles and fully described in Vol. III, pp. 594-98, of the present work, together with the original plates and the hand-drawn drawings by C. H. Stanley engraved by the N. Y. Hist. Soc. The "Washington Hotel, Broadway," shown in one of these views, is not the former Kennedy house, as stated in L. M. R. K., III: 950, but the former Washington Hall at the e. cor. of Broadway and Reade St.—See 1851. See also A. Pl. 215, Vol. III; and 1830.

In this year also, Peabody & Co., New York, published a thin quarto volume entitled Views in New York and Its Environs, from Accurate, Characteristic & Pictorial Drawings, Taken on the spot, expressly for this work, by Dakin, Architect; with historical, topographical & critical illustrations [text] by Theodore S. Fay (Co-Editor of the New York Mirror, Assisted by several Distin- guished Literary Gentlemen. It contains, besides, a folding map of the lower part of the city, by William Hooker. These views are listed and described in Vol. III, pp. 599-603, of the present work, two of the views, "Le Roy Place" and "La Grange Terrace" being reproduced on Pl. 103, Vol. III. In the description of the latter (see III: 605), it should be noted that Archibald Dick, not Alexander L. Dick as there stated, was the engraver. The Peabody views are also described in the N. Y. Mirror, Je 4, Ji 30, N 12 and 26, 1831; Mr 24, 1832. See also descrip. of Pl. 102-9, III: 359. See also descrip. of Pls. 103-7, III: 369.

The following views of buildings, etc., as they appeared in 1831, were published in later years in Valentine's Manuals, as cited: the custom-house, Wall St., built in 1831 on the site of the old city hall (Man. Com. Coun., 1835, p. 48); junction of Broadway and the Bowery (ibid., 1835, p. 160); Staten Island ferry, and U. S. large office, Whitehall St. (ibid., 1835, p. 288).
Chronology : Invention and Prosperity : 1815-1841

City Hotel, Trinity and Grace Churches, Broadway (ibid., 1824, p. 96; Navy Yard, Brooklyn (ibid., 1854, p. 76; shot tower, East River (ibid., 1854, p. 208); Park Place (ibid., 1855, p. 72; landing-place, foot of Cortlandt St. (ibid., 1855, p. 82); Exchange PL, looking toward Haasber St. (ibid., 1855, p. 120); Park Theatre, and part of Park Row (ibid., 1855, p. 152); St. George's Church, Beekman St. (ibid., 1855, p. 154); Battery's Mansions, House, Broadway St. of the Colonnade, Battery's store, Broadway to Franklin St. (ibid., 1857, p. 152); St. Paul's Church and Broadway stages (ibid., 1861, p. 116). Cf. these views with the original engravings published in this year (1831) by Peabody and by Bourne (vide supra).

In this year, the public reservoir, on the south side of 15th St. and West 3d Ave. (Colton Map, Pl. 124, Vol. III), which was begun in 1829, was in successful operation. Excavated to great depth in solid rock, and with pipes from it laid through some of the principal streets, it was used for extinguishing fires. See descrip. of Pl. 13 in Peabody's Fiestas in N. T. (1831); N. T. Mirror, XI: 71. Wegmann's Water-supply of the City of New York (1836), 16, states that this reservoir was "the beginning of the public water-works of the City of New York." Cf. "Reservoirs, Wells, and Water-works" in L. M. R. K., III: 757-76. See, farther, Mr 29, 1832.

Between 1831 and 1842, a series of American views was engraved by W. J. Bennett. They are listed in the description of Pl. 116, Vol. III. They form the finest early collection of folio views of American cities, etc., in existence.

New York in 1831 are found in Vol. III of the present work: Youle's shot-tower (Pl. 102-a); La Grange Terrace, Lafayette Place (Pl. 103-b); the Broadway stages (Pl. 105).

The joint committee (on finance and public offices) to which was referred a petition of Cadwalader D. Colden and others respecting the "Rotunda," reports to the common councils: "That this application comes from those gentlemen who originally patronized the undertaking of Mr. Van der Lyn to establish an Exhibition of Panoramic pictures in this City, and who still are desirous to aid him in another attempt to conduct such an Institution. The joint Committee have heard the statements of Mr. Vanderlyn and of other gentlemen who are interested in his behalf. It is proposed by them that the Rotunda should be appropriated to its original use under the direction of Trustees and that for this purpose a new Lease should be granted by the Corporation at a certain Rent and that such rent or a portion of it should be applied to extinguish the demands still remaining unsatisfied for work and materials for the Building. It is also urged that the construction of this building fits it peculiarly for such a purpose only, and that there is a prospect that under judicious management an exhibition of panoramas in it may be a profitable and regular source of income to the Corporation, and that the persons who have been benefited by it will still be desirous to assist the Corporation to continue such an institution." It will be recollected that the ground upon which this building is erected was leased by the Corporation to Mr. Vanderlyn for the term of nine years from the 1st day of May 1817. Mr. Vanderlyn was allowed to remain in possession for about three years after his term had expired and until it was determined by the Board that the premises were required for public purposes and since the surrender of the premises to the corporation alterations have been made in the building. Under all these circumstances the committee do not deem it expedient to grant the present application. It is well understood that Mr. Vanderlyn when he had no rent to pay was not successful there. and considering the present altered condition of the premises the Committee do not think it expedient to grant the Corporation its claim upon a second experiment to be tried there.

A motion being proposed and lost that the Rotunda "be leased jointly to Mr. Vanderlyn and the Mechanics who assisted in the erection of the building and whose claims are still unliquidated," the board adopts the report and its recommendation that it is inexpedient to grant Colden's petition.—M. C. C. (1784-1831), XIX: 128-129.

The name of Loxahatchee St. is changed to Monroe St.—M. C. C. (1831-1834), XIX: 435. The name of Harman St. is changed to East Broadway.—Ibid., XIX: 436.

Attention is called to "the insufficiency of the buildings employed by the Government for the purpose of a Custom-House. In the presence of the Collector's, Naval Officer's, Surveyor's and Auditor's rooms being all on one floor, near the ground, they are on different floors, rendering access to either, in the ordinary transac-

10 The ridiculous fashion of wearing mustachios, which quite lately seemed to be confined to a few boys and dandies, is on the increase in this city, and one now, in the course of a walk in Broadway of a pleasant afternoon, will meet quite a number of young men who, but for the hairy argument in the negative upon their upper lips, might be mistaken for rather sensible looking persons. We cannot account for this growing fashion, unless the dandies, tired of being called smooth-checked and effeminate, are determined, in compliance with Hamlet's advice, to 'assume a virtue if they have it not.'—"N. T. Post, F 10, 1831.

The contemplated improvements and embellishments of the Park, demand the removal of Public School No. 1." The board approves the draught of a law "for the further support and extension of Common Schools [Schools] in the City of New York."—M. C. C. (1784-1831), XIX: 488-89.

The burning of another church is recorded,—the Seventh Presbyterian Church, at the n. e. cor. of Broome and Ridge Sts. Only the walls are left standing.—N. T. Ev. Post, F 16, 1831. It was rebuilt, however, in this year.—L. M. R. K., III: 932.

"We regret that the alteration of the old jail made it necessary to remove the two noble trees, which for a century have shaded the front of that building. Even their venerable appearance could not save them. The axe was yesterday laid to their root, and the contrast since their removal has been such as to create a general regret that it was necessary to do so."—N. Y. Ev. Post, F 19, 1831.
THE ICONOGRAPHY OF MANHATTAN ISLAND

Daniel Webster's friends in New York give him a dinner at the City Hotel, in imitation of his "Defence of New York." During this debate in the senate with Hayne on questions of the tariff, internal improvements, the proper functions of the judiciary, and the reserved rights of the states (see 27, 1830).—N. T. Eve. Post, Mr 25, 1831.

Acting Secretary of War Randolph gives orders for delivering to the Corporation of New York the New battery (in conformity to an act of Congress passed at its last session) as soon as the Ordnance and Quartermasters Stores can be removed from the premises. (circular letter, signed "N. C. C.")—May 18, 1831, XV: 584-85, 662. See Ap 23. The city had conveyed this property to the U. S. on May 6, 1808 (q.v.).

A public dinner is given by the citizens of N. Y. to the Hon. Tristram Burgos, of Rhode Island, in the assembly-room of the City Hotel. The invitation to him to speak, signed by a committee, refers to his recent "able and eloquent exposition of the Logan Nations," and his "exposure of the corruption of the present administration [Gen. Jackson's], particularly as it appears in the appointment of the gentleman who yet holds the credentials of the President of the United States to the Court of St. Petersburg" (John Randolph). A toast to Henry Clay, of whom it was said: "The genius of America beckons him to the Capital," was received with "raptures" and repeated cheers. The speech, correspondence, etc., connected with the event, were published in a pamphlet. See one of these in the N. Y. P. L.

Among the distinguished visitors in our city we notice on the books at the Washington Hotel, the names of Joseph Bonaparte, Ex-King of Spain; Joan Mosquera, Ex-President of Columbia; Gen. F. C. de Mosquera, of Columbia; and Jorge Winkler, late Consul General from the Government of Great Britain to Mexico; Marquis P. Neri del Burrio, of Mexico. —N. T. Eve. Post, Mr 31, 1831.

In the spring of this year, several gentlemen of New York Apr. associated themselves in a plan to build a row of houses on the north side of Washington Square, which was then so far up town that, for all practical purposes, it was in the country. Plans were prepared (by A. J. Davis, Jr.), and all the houses were of brick. 18 houses in ten lots on Sixth and Fifth Ave. were contracted for together. The land belonged to the corporation of the Sailors' Snug Harbor, and from that corporation the building lots were leased.

"The original plan provided for lots about twenty seven feet front and this is the width of the first five houses," as described by a granddaughter of John Johnston, one of the associated owners, whose family has ever since occupied No. 7. "The other lots were thirty-foot front, and Mr Johnston built two houses, on two plots, one thirty-two and one-half feet, and the other twenty-seven and one-half feet front." At first, "the ground rents of the houses" were "$170 per annum for the narrower and $150 for the wider lots." The exteriors of the houses, and within, they differed only slightly, having for instance mantles carved from statuary marble in Italy and handsome gilt and bronze chandeliers. Writing in 1909, the author above referred to were a list of these houses, their original owners, and their later occupants.

John Johnston and his family moved into their house on Nov. 2, 1833. At that time these houses were "surrounded by green fields, very few dwellings having as yet been built so far uptown. . . . All had beautiful gardens in the rear about ninety feet deep, surrounded by high fences, with double rows of pointed wattle on top, lined with arches at intervals and lovely borders full of old-fashioned flowers. . . . The garden at No. 7 remained in very nearly its original condition until an addition to the house was built over it in 1894."—John Johnston, of New York, Merchant, by Emily Johnston de Forest (1909), 124-27, 148. See My 71, also 1833, and 1835.

The managers of the "N. Y. Female Asylum for Lying-in Women" have obtained from the common council a lot on the north side of White St., adjoining the City Dispensary, on which to erect a building similar to the dispensary. The Lying-in Hospital was incorporated in 1799, and was at first allied with the N. Y. Hospital. —M. C. C. (1784-1811), XIX: 492-95.

The common council resolves that a bill be presented to the legislature stating the city's need of an ample supply of pure water and asking that the rights of the Manhattan Water Company to take streams of water and other property and change the channels of water courses be repealed and the same be vested in the corporation of the city of New York.—M. C. C. (1784-1811), XIX: 459-60, 519-21. See Ap 18.

Mar. Lord John Russell introduces the First Reform Bill in the house of commons. After much debate, it was defeated on April 19, parliament was dissolved, and a new election ordered. The election took place amid the greatest excitement and was an overwhelming victory for the reformers.—Hazen, Europe since 1815, 430-35. See Je 24.

The common council resolves to apply to the legislature "to take the necessary steps to have the Constitution of the State so altered that the Mayor of this City may be elected hereafter by the People." —M. C. C. (1774-1811), XIX: 525. See Ap 25, 1833.

Stuyvesant St., running from the Bowery Road to Second Ave., is declared by law to be a public road.—Laws of N. Y. (1811), chap. 59 and 234; M. C. C. (1784-1811), XVIII: 492, XIX: 559. On March 21, the common council ordered that Stuyvesant St., between the Bowery and Second Ave. be opened.—Ibid.; XIX: 579. On April 18, the corporation council decided that the consent of the legislature was necessary.—Ibid.; XIX: 652. This was obtained.

The City Bank in Wall St. was robbed of nearly $500,000 in bank bills and 200 Spanish doubloons sometime between its closing on this Saturday evening and its opening on Monday, March 21. A reward of $5,000 was offered for the recovery of the property.—N. Y. Eve. Post, Mr 21, 1831. See also, Ibd., Mr 22, 1831. The reward was later increased to $10,000.—Ibid., Mr 24, 1831. This was the first successful attempt on record to rob a New York bank. The thief, Edward Smith, was finally captured, and $175,752 recovered.—Ibid., Mr 28, 29, 30, 1831. See also, Ibd., Ap 1, 4, 9, 30; My 12, Jl 9, 19, S 21, 22, 28; O 11, 1831.

The common council appoints Edwin Smith a city surveyor.—M. C. C. (1784-1811), XIX: 578. That survey of the interior of the city hall has not been done "since the Hall was finished." This neglect is remedied "for the preservation of the building."—M. C. C. (1784-1811), XIX: 578.

The finance committee, to whom was referred the subject of delaying the suit now pending for the recovery of Fort Gansevoort by the city, reports: That the premises in question are erected upon land formerly covered with water lying beyond High water mark in front of property belonging to John Jacob Astor, Esq., which was formerly part of the Clinton Farm.

"That in 1812 Mr Astor having what is termed the pre-emptive right to said premises, sold and conveyed the same by a Warrantee Deed to the United States for $10,000,—That the Government of the United States caused the Fort and other improvements to be erected there, and have been in possession ever since. That in February 1820 an application was made to the Corporation by Mr Astor for a grant of the land under water between the great Kill road & 12th Street embracing the whole of the premises in question, upon which application, the then Finance Committee reported on the 30th of November 1820 that in their opinion the premises so applied for would be required by the Corporation for public purposes." The resolution was thereupon adopted by the Board, "that it was not expedient to comply with the prayer of the said Petition." Then an action of ejectment was commenced by the corporation counsel against the U. S. officer in charge of the Fort, which action is now pending.—M. C. C. (1784-1811), XIX: 581-82. See also L. M. R. K., III: 944.
CHRONOLOGY : INVENTION AND PROSPERITY : 1815-1841

1831

Ap. 4

The common council accepts an invitation of the committee on arts and sciences "to view the New Bell prepared for the Cupola of the City Hall at Affairs Furnace."— M. C. G. (1874-1831), XIX: 556-56. See My 17, 1830; F. 7 and My 9, 1831.

A dilapidated room was found endless, and the Park on the Chambers St. property. The committee on lands, places, being "desirous of putting that ground in order, so as to get it in grass and set out the trees," finds that "the probable cost of erecting an Iron fence, to correspond with that of [wood] now on Chambers street with a large Gate in the centre corresponding with the Gate at the head of Murray street," will be about $2,000. The board authorizes the committee to spend $1,500 "in procuring Furniture and Drapery to correspond with that of the present Council Chamber," and this expense was not to exceed $1,500 for such purposes. The cost of architecture shall correspond with the Chamber at present occupied by the Council Chamber. The room is accordingly appropriated, and the $500 and $1,500 appropriations made. The proposed $5,000 appropriation for altering the architecture of the room was "Laid for further consideration."— M. C. G. (1874-1831), XIX: 591-594.

16

"The Building in the Park that is now occupied for an Oil House is in a very bad state of Repair, and is not large enough to accommodate the Lighters who are 50 in number ... and the Cisterns now used for storing oil will not hold more than 1000 Gallons."—The Council orders the removal of this building (which is deemed a nuisance in its present state and location), as soon as a new one can be erected adjoining Fireman's Hall, in Mercer St.— M. C. G. (1874-1831), XIX: 597-598. On May 2, a remonstrance against placing the oil-house in Mercer St. (ibid., 627) was overruled (ibid., 698).

BROADWAY STAGES.—These vehicles ... have so cut up the pavement as to render travelling in lighter carriages disagreeable. For we can suggest no remedy except slow and careful driving, but there are liable to another objection. That is, the use of only two horses to draw those immense and heavy conveyances, sometimes loaded with eighteen or twenty persons. Either four horses should be attached, or the stages themselves should be of less dimensions."—N. T. Mirror, VIII: 327.

The next issue of this paper contained the following: "Omnibus.—An accommodation coach, of uncommon dimensions, bearing two stages, was said in such manner that its style of Architecture should correspond with the Chamber at present occupied by the Common Council. The room is accordingly appropriated, and the $500 and $1,500 appropriations made. The proposed $5,000 appropriation for altering the architecture of the room was "Laid for further consideration."— M. C. G. (1874-1831), XIX: 625; Man. Com. Coun. (1837), 510.

Washington, D.C.

In the month of April, another Improvement to our city is the building of a new theatre on Broadway. Mr. Bryant's building was called "the City of Omnibuses."—N. T. Gaz. & Gen. Ad., Ag 5, 1834.

An act of legislature authorizes the common council "to cause the earth to be bored for the purpose of obtaining water, in any street, road or public highway ... and the expense thereof, and of pumps and other fixtures connected therewith, shall be estimated and assessed among the owners or occupants of the houses and lots of ground intended to be benefited thereby."— Laws of N. Y. (1831), chap. 158. See F 28.

The subscribers and shareholders of "The University of New York" are incorporated by the name of "The University of the City of New York." Its purpose is "promoting literature and science." It "shall not own real estate, at one time, yielding an annual income exceeding twenty thousand dollars." The government and estate of the university "shall be conducted and managed by a council composed of thirty-two shareholders, and the mayor and four members of the common council of the city of New-York, Apr. for the time being." The act gives the names of the members of the council of the university, elected by the shareholders at the last annual election. Among the members of the first council, named in the act, are Jonathan M. Wainwright, Spencer H. Cooe, Morgan Lewis, Albert Gallatin, Myndert Van Schrick, James Lenox, Valentine Mott, Edw. Delafie, John Delafie, with certain members of the common council, including Gideon Lee and the mayor. The act further provides that "No one religious sect shall ever have a majority of the board" (or council of managers).— Laws of N. Y. (1831), chap. 176. This was the college of New York, later changed to the University of New York, and now the New York University, which took its name in 1866. In the university's archives are the early minutes of meetings of the stockholders, the Subscription book of Myndert van Schrick, Treasurer, and other contemporary records. For a history of the university, see N. Y. University and her Sons, ed. by Chamberlain (Boston, 1901). See, further, S 26, 1832.

The common council accepts an invitation from Col. John Thurlow "to visit a Collection of Paintings done by himself descriptive of the Military and Civil scenes of the United States during the Revolutionary War."— M. C. G. (1874-1831), XIX: 644.

The street committee, to whom was referred, on April 4, a petition of Seth Over and others, who desired lots on Lafayette Place, requesting permission to inclose a Court of eighteen feet wide in front of all the Buildings to be erected on that Street or Place," reports to the common council that, as the request "is in accordance with an express understanding of all the owners of the grounds through which that street was opened in 1826 with the then Corporation ... And as the proposed plan of Buildings will be highly ornamental to our city ..." the committee proposes that the petition be granted and that an ordinance entitled "a Law relative to Lafayette Place" be passed. This is carried.— M. C. G. (1874-1831), XIX: 654.

This appears to have been one of the steps in the erection of "La Grange Terrace" or "Colonnade Row," of which Theodore S. Fay, one of the editors of the N. Y. Mirror, wrote in this year: "Of all the modern improvements which characterize our city, the sumptuous row of houses in Lafayette Place, called after the seat of the venerable Patriot, La Grange Terrace, and of which our publishers present an accurate engraving [reproduced as Pl. 103-b, Vol. III], is the most imposing and magnificent. These costly houses ... are built of white marble, the front supported by a rich colonnade of fluted Corinthian columns, resting on the basement story, which is of the Egyptian order of architecture. They were designed and built entirely by Mr. Geer, and all the stone work was executed by the State prisoners at Sing Sing. One of the houses was sold not long since, for 26,500 dollars, a sum greatly below its value."—Fay, Views of New York (1831), 46; Kriechbaiker Mag., Jl, 1835; XI: 71; Ladies' Companion, N. Y., 1834, cited in N. Y. Histo., XII: 124. The common council resolves that William St. be widened and improved between Exchange and Stone Sts.— M. C. G. (1874-1831), XIX: 655; Man. Com. Coun. (1837), 510.

The common council orders that Tenth Ave. be "worked into a convenient Road" between 51st and 70th Sts.—M. C. G. (1874-1831), XIX: 659.

Wm. Colleen Bryant thrashes Wm. L. Stone on Broadway with a "cowkick" because of insults published against him in Stone's paper, the Commercial Advertiser. Stone defends himself with a cane, and wrests the whip from Bryant. The antagonists are finally separated.— N. T. Emer. Post, Ap 21, 1831. Philip Howe sees the encounter from his house opposite, and describes it.—Howe's Diary, I: 193.

The N. Y. Institution for the Blind, which was founded in 1830, is incorporated.— Man. Com. Coun. (1838), 614-15; Laws of N. Y. (1831), chap. 214. See Mr 15, 1832.

The city acquires by condemnation proceedings the land now comprised in Abridge Square, at Eighth Ave. and W. 12th St. (5.02 acres).—Prendergast, Record of Real Estate (1914) L. M. R. K., III: 254.

The legislature passes an act "authorising certain Lands and Premises in the City of New-York to be opened as a Public Place, called Union Place."—Laws of N. Y. (1831), chap. 252. On April 25, the common council took steps for the appointment of comm-
THE ICONOGRAPHY OF MANHATTAN ISLAND

1831

missioners of estimate and assessment to carry the act into effect. Apr.
M. C. C. (1784–1831), XI: 676. This "place" was 1669
named Union Square—L. M. R. E., III: 971-72. See also Mr
2, 1831; N 7, 1831; and descrip. of Pl. 135, III: 702.

Maj. Henry Stanton, quartermaster of the U. S. Army, delivers the North Battery (see Mr 28) to Gen. J. Morton, clerk of the common council, in behall and for the use of the corporation of the city. The correspondence in this connection was entered in full in the minutes on April 25.—M. C. C. (1784–1831), XIX: 661-63. See also editor's note in ibid., 662; and L. M. R. E., III: 945; and view of this fort in Emmet collection, 11360.

Even prior to this transfer, the city began to receive petitions from persons desiring to lease the North Battery, or "Red Fort," from the city.—M. C. C. (1784–1831), XIX: 587, 645.

The legislature incorporates the N. Y. and Harlem R. R. Co. The incorporators (among whom are Benson McGown, Thos. Addis Emmet, and Gideon Lee) are given power to construct "a single or double railroad" from any point on the north bounds of 23rd St. to any point on the Harlem River between the east bounds of Third Ave. and the west bounds of Eighth Ave., with a branch to the Hudson River between 124th St. and the north bounds of 125th St. They may transport property and people by the railroad, and use for this purpose steam, animal, or other power.

This charter is to run for 90 years. If the company shall not locate its route and survey it within six months, filing a map thereof in the register's office, and shall not commence construction work within two years and finish it within four years, the corporation shall cease and this charter be void. The capital stock shall be $250,000, divided into shares of $50 each. The moment of the common council shall be obtained before the railroad shall be built across or along any of the city streets.—Laws of N. Y. (1831), chap. 263. The act was amended on April 6, 1832 (q. v.). See, further, My 30, 1831.

The College of Pharmacy is incorporated.—Laws of N. Y. (1831), chap. 264. Instruction was given at the N. Y. Dispensary at Whitehead and Centre Sts. In 1838, the college built its building on a site near Third Ave. The present building, at 115-119 West 68th St., was completed in 1894. On July 1, 1904, the College of Pharmacy was affiliated with Columbia University.—Hist. of Columbia Univ., 418-21.

The common council permits the owners of the steamboat "General Jackson" to have the exclusive use of the south side of the pier at the foot of Warren St. The owners of the Old Line of Liverpool packets and certain steamboats are permitted to use piers 22 and 23.—M. C. C. (1784-1831), XIX: 666-67. Also, The New York and Boston Steamboat Co. is assigned to the use of wharves and piers at the foot of Cortlandt and Liberty Sts.—Ibid., 669.

The common council adopts resolutions to open front St. from 5th to Colarss St., and to widen South St. from Clinton to Montgomery St.—M. C. C. (1784–1831), XIX: 678-79.

The common council resolves that the committee on public offices and repairs be empowered "to improve the building known as the Old Alms House (now part of the City Hall) so that the front on Chamber street correspond with the front on the Park."—M. C. C. (1784–1831), XIX: 683. This order was in addition to an appropriation of $1,400 on April 4 for painting and repairs to the building.—Ibid, XIX: 594-95.

The finance committee, to whom was referred a communication from Henry N. Western to the mayor claiming compensation for his client, Enrico Caussi, "for a colosal Statue of Washington," reports that the testimony taken shows "that in the years 1823 and 1824 Mr Caussi was engaged in making a Model of a Colossal Equestrian Statue of Washington which was for some time erected in the Park, and for the labor Materials and time bestowed upon this work Mr Caussi now prefers a claim against the Corporation amounting in the whole to $8944, as appears by his bill annexed hereto." The committee, after investigation, finds that no resolution was ever passed which could "be construed as an understanding by the city to pay anything to Mr Caussi." On the contrary, the proof is that "what was done by the Common Council respecting Mr Caussi's said work was done out of pure kindness to him, and that there is no ground either of Law or Equity upon which his present claim or any claim arising out of the said transactions can rest." It is therefore rejected.—M. C. C. (1784–1831), XIX: 668-69. See also descrip. of Pl. 100, III: 392. For the next effort to erect a statue in New York to the memory of Washington, see D 10 and 12, Apr. 1831.

Imprisonment for debt upon contract, except in cases where fraud has been committed or is intended, is abolished in N. Y. State.—Laws of N. Y. (1831), chap. 300. The other states followed in a measure the example of the New York. The act was amended in some particulars in later years.—See, for example, Ibid. (1840), chap. 163 and chap. 377.

The first exhibition of the National Academy in its new quarters in Clinton Hall (see 8, 1830) is held.—Cummings, Historic Annals of the Academy, 121. See also N. Y. Evet, Ap 17 and 28, 1831. On May 7, the Mirror published a list and description of the paintings and drawings shown. Among them are the "Design and front view for the Record-office. These show the proposed transformation in the old jail in the Park (see N 15, 1830). This was probably drawn by A. J. Davis (see 10 and 17)—N. Y. Mirror, VIII: 359, 358.

A public dinner in honour of Guelian C. Verplanck is held at the City Hall by "the friends of literature and the arts." Fitz-Greene Halleck, Wm. Dunlap, James K. Paulding, A. B. Durand, Wm. Cullen Bryant, and Judge Irving are among those present.—N. Y. Evet, Ap 15-16, 1831.

"The exhibition at the gallery of the American Academy of the Fine Arts, in Chambers-street, is rendered interesting by the fact that all the productions, including nine subjects of the American revolution, with near two hundred and fifty portraits of persons distinguished in that period, are painted from the life by a single individual" (Col. Trumbull).—N. Y. Mirror, VIII: 359.

The ship yards of this city have assumed a look of activity which has not been seen in them for five years past. One first rate ship was launched a day or two since, and contracts are already entered into for another. Two others, of which six are already on the stocks, and the others will be begun as soon as the ship yards can be made ready for them. This is a greater number than has been under contract at any time since the year 1826. Besides these large vessels, great numbers of small craft and steamboats are constructing along the shores, and vessels of every burden are undergoing repairs.

The reality and strength of this new impulse given to commerce, may be judged of from the remarkable fact, that within two months the value of shipping has risen in this port from twenty-five to thirty per cent. . . ."—N. Y. Evet, My 6, 1831.

"We notice in many parts of the city a great number of spacious new brick buildings, in various stages of erection . . . The growth of that part of the city which lies along the avenues on both sides of Broadway, is astonishingly rapid, and the new edifices for the most part are handsome permanent structures. In Houston, Bond, Bleeker, Fourth, and many other streets, large blocks of spacious and elegant houses are erecting or just completed, and, preparations for as many more are actively going forward. In Lafayette place, the marble, bricks, and other materials for a row of splendid fabrics are collecting, and we understand that contracts have been made, and preparations are immediately to be commenced, for a line of superb edifices, to front on the North side of Washington Square, and extend nearly the whole length of that beautiful enclosure. . . ."—N. Y. Evet, My 7, 1831; Howe's Diary, I: 31.

The common council grants a petition that that part of Chapel St. lying between Murray and Barclay Sts. be called College Place.—M. C. C. (1784–1831), XIX: 706.

The committee on arts and sciences reports to the common council "that the original appropriation of $500 for the Hall Bell [see My 17, 1830] has been found inadequate to the expense incurred, and leaves a balance due to James F. Allaire [see Ap 4, 1831] of $874.99." The price of the bell, by weight, came to $3,657, and the expense of "turning, raising, and other preparations" increased this to $3,754.99. This left the deficiency of $874.99. The board votes an appropriation to pay it.—M. C. C. (1784–1831), XIX: 710-11; and descrip. of Pl. 97, III: 856.

"The piece of ground now enclosed in the rear of the building now known as the Debtor's Hall in the Park," is established as a public pound.—M. C. C. (1784–1831), XIX: 722.

The first bicameral council in the history of the city, provided for the session of 1851 was held in the City Hall on Monday, July 16, and the oath being administered by Mayor Bow. Neither mayor nor recorder is any longer a member, and the two boards, of 14 members each, choose their own presidents. It required 29 ballots in the board of aldermen before Samuel Stevens received a majority of the votes and was elected.—Proc., Bd. of Ald. (1851), 1: 19-21; Proc., Bd. of Ass't. Ald. (1851), 3. The common council in this form, aldermen and assistant being added as the number of wards increased, until April 12, 1853 (v. 9).—

David T. Valentine is elected sergeant-at-arms in the board of assistant aldermen.—Com. Adv., My 11, 1851.

"The Trustees of the 'Sailors Snug Harbour' [see Je 1, 1851; F 6, 1856] have purchased Mr. Houseman's farm on Staten Island, consisting of about one hundred and thirty acres, intended as the location for a hospital for superannuated seamen, accommodation for fifty of whom are to be erected immediately. The farm is situated near the entrance of the Kills; and the site selected for the buildings commands a good view of this city and harbour, of the town of Brooklyn, and of whatever passes in or out of the port."—N. Y. Educ. Post, My 14, 1851.

The wharf was afterwards added. The income from the Manhattan property in 1856 was $4,000.—Man. Com. Coun. (1856), 469.

In 1856, the trustees reported to the legislature an income of $27,702.58 and expenses of $20,766.19. This increase resulted largely from the policy initiated in 1850 and 1851, when "the whole of the Sailor's Snug Harbor estate, from Broadway to the Fifth Avenue, and Washington Square, was leased out in house lots for two years."—See Disturnell's N. Y. As It Is, In 1857, 88.

On Oct. 31, the corner-stone of the first building of the Sailors' Snug Harbor on Staten Island was laid. For a brief history of the establishment, see Loshing's Hist. of N. Y. City, I: 129-30. See also Goodrich, Picture of N. Y. (1853).

The fondness for the cultivation of tulips, for which the Dutch founders of New Netherland were distinguished, is not yet extinct. The plantings of this splendid flower, however, have changed their location. Formerly tulips were cultivated on the soil which now covers the north part of Trinity Church Yard, when it was without the city—at present the finest beds are some miles to the northward and eastward of that place. Two successful cultivators of tulips, Mr. Kinne该er and Mr. Neale, have this season advertised their gardens for sale. Mr. Kinne该er situated on the Eighth Avenue, at the place formerly known as the seat of J. B. Murray, Esq. Here is a good situation and a congenial soil, under skilled and experienced tendance, fifteen hundred of these plants, embracing the finest varieties, are now in full bloom in a single bed. . . . Mr. Neale's garden is on Fifth-street. . . ."—N. Y. Edu. Post, My 17, 1851.

Jacob Lorillard has purchased the old state prison building and grounds at Ams and Greenwich Sts. and transformed them into a sanitarium. "The main building contains 29 rooms finished and the wings 60. . . . There are, besides baths either cold, warm or vapour, a refectory, apothecary shop, cistern and ice house within the premises. . . . The roof of the large front portico is formed into a promenade, or place for reclining, and commands a splendid prospect of the city, part of Staten Island—the Jersey shore, North River, and all the variety of life and being that animates that interesting scene. The building is surrounded by a beautiful garden, laid out in gravel walks and planted with shrubbery and evergreens.

"The establishment is opened for the accommodation of the sick, either residents of the city or strangers, who cannot elsewhere receive the attention of the medical faculty. It combines all the advantages of a hospital and a home; for every patient may call what physician he chooses, and receive such attention as he desires." It was opened for public inspection on May 17.—N. Y. Educ. Post, My 20, 1851, citing Courrier & Enquirer.

Vines in the city of New-York and its Environs. It is the title of a work, the first number of which has been published in this city, by Messrs. Peabody & Co. It is intended to comprise views of public buildings, private residences, dock-yards, &c. &c. from drawings by J. H. Dakin, to be engraved on steel by Messrs. Bernard & Dick. The letter-press descriptions and explanations are by Mr. Fay. The present number contains, besides an engraved title page, two well executed plates, each containing two views, viz:—New-York, from Governor's Island; Broadway, from the Park; the Bowling Green, and the American Hotel, with one or two of the adjoining houses."—N. Y. Educ. Post, My 25, 1851. The second number of this work was in course of preparation in July 16, and views of the city hall and Brooklyn Navy Yard, engraved by Dick from drawings by Dakin, were intended for insertion.—Ibid., Jl 16, 1851. See also 1851 (supra). Some of the Peabody views are reproduced as Pls. 102-2, 103-2, 103-5, Vol. III, and the series is described in III: 599-603. See, further, N 19.

"Burharn's Mansion House. . . . Mr. Burharn, of Bloomingsdale, has fitted up the country seat of the late John C. Vandenhevel, as a house of entertainment. . . . The house is commodious. . . . and the rear grounds and graved walk to the Hudson River, skirted on either side by forest trees, &c. make it fascinating. . . ."—N. Y. Gaz. & Gen. Adv., My 25, 1851.

Boots for subscriptions to the stock of the N. Y. & Harlem R. R. (see Ap 25) are opened at the merchants' exchange at 10 a. m. Before 2 p. m. about $1,500,000 had been subscribed.—N. Y. Educ. Post, My 30, 1851. See also ibid., Je 1, 2, 4, 10.

The "Duell ing Ground," where Hamilton fell, at Weehawken, June is described. The monument to his memory which formerly stood there (D 2, 1856) was removed (cf. Ag 3, 1856) to "a place where it was believed to have a bad moral effect, by encouraging others to go and expose their lives on the spot where so distinguished a man had fallen. . . . The fame of that great man requires no memorial of stone. . . . But if a monument is necessary, the Duell ing Ground was the last spot, which should have been thought of for its erection. . . ."—N. Y. Gaz. & Gen. Adv., Je 3, 1851, citing N. Y. Centennial, (sic).

Peter Maverick, son of Peter R. Maverick, dies in New York, of the city of his birth. Both were engravers of note.—Dundlap (Goodspeed ed.), II: 370.

An account for improvements at Hell Gate ferry bears this date.—See a comptroller's Ledger of Disbursements, etc. for Public Improvements, etc., 1847-1848, No. 298, in record-room, finance department, hall of records.

The Second Reform Bill (cf. Mr 1) is introduced in parliament by Lord John Russell. Though it met with much opposition in the house of commons, it was finally passed on Sept. 22 and sent to the house of lords. The lords, who were the greatest gainers by the existing system of nomination and "rotten boroughs," killed the bill on Oct. 8. This caused great indignation and led to numerous riots. Parliament was prorogued until Dec. 6—Hazen, Europe, since 1854, 455-56. See D 12.

The locomotive "De Witt Clinton" was taken from New York to Albany by boat on this day.—See summary at beginning of the year.

France and the United States sign at Paris a convention for July the settlement of claims arising from unlawful seizures, confiscations, etc. The former agrees to pay 25,000,000 francs and the latter 1,500,000 francs, to be distributed to claimants in the two countries.—U. S. Treaties, etc., I: 523-26.

James Monroe, the ex-president, dies in New York while temporarily residing with his daughter, Mrs. Samuel L. Gouverneur, at the Gouverneur residence, 63 Prince St., cor. of Elm (the later Lafayette) St. On July 7, the body was placed in the Gouverneur vault in the "Marble Cemetery" on Second Ave.—N. Y. Educ. Post, Jl 5, 1851. For full account of the obsequies, see ibid., Jl 7, 1851. For the removal of the remains from the Marble Cemetery, see Jl 2, 1858. John Adams, Jefferson, and Fisher Ames also died on the 4th of July (q.v., 1826).

In 1919, a movement was started to buy the house where he died.—Even. Sun, O 31, 1919. The effort was again made in 1921.—N. Y. Times, S 8, 1921. Again, in 1924, a "drive" was undertaken to raise a fund for this purpose (ibid., My 19; The Sun, My 17, 1924), but was not successful. In Oct., 1925, the house was removed to a near-by position at No. 95 Croby Street.—N. Y. Times, O 11, 1925.

A disastrous fire destroys 9 buildings on Charleston St., three on Varick St., and 13 on Van Dam St., including the Baptist Church.—N. Y. Educ. Post, Jl 5, 1851. Another fire, on July 17, in the vicinity of Rivington and Eldridge Sts., destroyed about 20 buildings.—Ibid., Jl 18, 1851.
Hone describes a tête champêtre "given by the Messrs Stevens at the Elysee Fields above Hoboken."—*Hone's Diary*, I: 32-33.

The old jail in the Park is "now nearly transformed into a handsome edifice, for the accommodation of several public municipal offices.*—*N. Y. Mirror*, IX: 73-74. This issue of the Mirror contains a small wood-cut view of the old jail before its transformation, engraved by Anderson from a drawing by Davis. See also, describe, of Pl. 97, III: 589; and L. M. R. K., III: 971. For the earliest view of the reconstructed building, see s 17.

An association of young men called the New York Debating Society has been formed in the city. Its meetings are held at Clinton Hall.—*N. Y. Ecq. Post*, S 4, 1831.

Several members of the common council and directors of the Harlem R. C. Co. arrive in Albany to examine the Mohawk & Hudson R. R. before laying rails on Fourth Ave., New York, to examine whether they would and in what the ordinary passage of the streets. As tested on "the Albany road," if the tracks may be crossed by vehicles of every description. "The travel and transportation, however, . . . must be confined to horse power. The use of the locomotive through business or traveller'd streets is undoubtedly impractical.*—*N. Y. Gaz. & Gen. Advo., S 21, 1831*, citing the *Albany Argus*, S 17, 1831.

This being the day appointed for paying a national tribute of respect to the memory of ex-Pres. Monroe, a salute of 13 guns is fired at daybreak from Governor's Island, followed by the discharge of a cannon at intervals of half an hour up to sunset.—*N. Y. Ecq. Post*, Jl 18, 1831.

Jewels, supposed to be the ones stolen from the Princess of Orange on Sept. 6, 1829, at Brussels, are seized by the U. S. marshal in a house in the upper part of Pearl St.—*N. Y. Ecq. Post*, Jl 29, 1831. See also ibid., Jl 30, Ag 1, 4, O 4. O 9, 1831.

Ex-Mayor Richard Varick dies in Jersey City.—*N. Y. Ecq. Post*, Ag 1, 1831. He was buried in the Marble Cemetery on Aug. 2.—*Ibid., Ag 2 and 3, 1831. See also *Hone's Diary*, I: 33.

The work of macadamizing the roads and avenues of the island is under way.—*N. Y. Com. Advo.*, Jl 30, 1831.

David Williams, the last of the captors of André, died at the age of 79.—*N. Y. Ecq. Post*, Ag 6, 1831.

The champagne spring, where Hone is a guest, is a favorite resort of the period.—*Hone's Diary*, I: 34.

The Houston & Mohawk R. R. has been completed from Lydus St. in Albany to "the brow of the hill in Schenectady."—*N. Y. Ecq. Post*, Ag 16, 1831.

A public meeting is held at Clinton Hall and resolutions are adopted expressing sympathy and admiration for the struggling Philadelphia and providing a committee to solicit donations to aid them.—*N. Y. Ecq. Post*, S 6, 1831. See also *ibid.*, S 8, 15, 17, 21, 24, O 15, 1831.

Samuel L. Mitchell dies. For an interesting account of his life and work, by Dr. Francis, see *Old New York* (1858), and *Man. Com. Coun.* (1899), 515-47.

The New Yorkers "friendly to free trade and to a revision and reduction of the present tariff" meet at the merchants' exchange and appointing a committee to negotiate with the merchants of Liverpool to be held at Philadelphia on Sept. 30.—*N. Y. Ecq. Post*, S 9, 1831. See also *ibid.*, S 7, 15, 1831.

"S." writes to one of the papers: "The great increase of population in the vicinity of Richmond Hill, as it appears, called for the erection of a new Theatre in that, now, important section of our city. A number of gentlemen accordingly associated themselves together for the purpose of erecting a substantial building, of sufficient capacity for the performance of the regular drama, and the unimproved ground of the Richmond Hill estate, have been chosen for that purpose. It would be difficult to find a situation combining greater advantages, and judging by the plan of improvements, we may expect an edifice, neat, sufficiently spacious, and well calculated to promote the comfort of the audience, as rooms in the Hotel will be fitted up and thrown open to visitors as drawing rooms, etc. . . ."—*N. Y. Ecq. Post*, S 8, 1831. From this it appears that the statement in L. M. R. K., III: 951, to the effect that the mansion itself was "opened as a theatre" is inaccurate, as well as the description of Pl. 55, A. 1: 417, which says that "a new wing was added to the rear of the house . . . and the whole was converted into a theatre." See also N 11, 1831, which definitely describes the theatre as a "new brick edifice." The "Hotel" above referred to was probably the mansion, which, in 1822, had been converted into a public resort.—See L. M. R. K., III: 921, citing Haswell's *Reminiscences*, 1:33.

CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

1. The pencil of Burton. — N. T. Type Post, S 28, 1831. The Bourne series is described under Pl. 101-3, III: 594-98.

2. The "great Free Trade Convention" meets at Philadelphia, and 163 delegates are present. — N. T. Type Post, O 1, 1831. Related newspapers are ibid, O 3, 4, 5, 6, 10, 11, 13, 1831.

3. The common council passes an ordinance "Creating a Fire and Building Department." Three commissioners are to be appointed who shall manage the department, and "shall be a Superintendent of Building, Chief Engineer and Commissioner of the Fire Department." Their respective duties are defined. — Proc., App'd by Mayor, I: 71-72.

4. "The block of marble, designed for the statue of Hamilton, has been brought to this city . . . from Lehigh, and it is the intention of Mr. Hughes . . . to commence the statue immediately. . . . The statue when completed is to be placed in the large room of the Merchants' Exchange." — N. T. Type Post, O 8, 1831.

5. The common council approves the map or maps presented by the N. Y. & Harlem R. Co. (see Ap 25) showing the route of the proposed road, "from the north side of twenty-third street, through the centre of the 4th avenue to Harlem river," and "the branch of the same through the centre of 15th street, from the 4th avenue to the Hudson river." Before building the railroad, the commissioners of the road shall be obtained. — Proc., App'd by Mayor, I: 79-80. See D 22.

6. A map of Union Place, from Third to Fifth Ave., and 10th to 21st St., showing streets and lots, bears this date — See map No. 358 in bureau of topography, borough president's office.

7. A riot occurs at the Park Theatre upon the first American appearance of Joshua Anderson, because of some indirect remarks against Americans made by him on his voyage from England. The disturbances continued on Oct. 15 and 16, and were so violent that Anderson was unable to perform. — Howe's Diary, I: 39-40; Haskell's Reminiscences, 260-61; Ireland, II: 4-5.

8. A national tariff convention opens its sessions in New York City. — N. T. Type Post, O 24 and 26, 1831. See also ibid, O 28, 29, 31, N 1, 1831.

9. The site of Sailors' Snug Harbor is laid on Staten Island. — "The building now to be erected will be the centre to which two wings are to be added. It is intended that the Retreat shall be finished next fall." — N. T. Type Post, O 29, 1831, citing Daily Advertiser, Howe's Diary, I: 41.

10. About 200 persons walk across East River on the ice. — Howe's Diary, I: 46.

11. "Mr. Ball Hughes, the sculptor, has completed the model in plaster of his full length statue, in aalto relievo, of the late Bishop Hobart. . . . The marble for this work has . . . been just received. When completed, it is to be placed under the great window in Trinity Church.

12. "A very fine marble bust of Gorvane John Jay has just been completed by John T. Lack, of this city. . . . It is intended to be placed in the United States Supreme Court Room in the Capitol at Washington." — N. T. Type Post, N 4, 1831. See Mr 21, 1832.

13. The board of assistant aldermen passes a resolution directing the street committee to report upon the expediency of applying to the legislature for permission to enlarge Union Place (see Ap 25) by taking the gore formed by the intersection of the Bowery, Fourth Ave. and 16th St., and also the gore between 13th and 14th Sts. and The Bowery and Bloomingdale Road. — Proc., Bd. of Ass't, I: 233, 243. On Dec. 19, the street committee made a lengthy report; this was ordered printed. — Ibid, 279. This report contains an argument in behalf of the proposed enlargement of Union Place upon a plan shown on a map deposited in the street commission's office, or otherwise. It makes reference to the state law of April 11, 1815, which first appropriated Union Place for public purposes, and states: Its shape is an irregular polygon, embracing the triangle bounded by the Bowery on the west, Bloomingdale Road on the east, and Fourteenth Street on the north, together with that part of the Fourth Avenue where it emerges from Bloomingdale Road, from Fourteenth to Thirteenth Streets, commencing at the 'Forks,' so called, at Seventeenth Street, where the Bowery and Bloomingdale Road unite, and terminating at Thirteenth Street.

In its present form, Union Place presents to the eye a shapeless and ill-looking place, devoid of symmetry, and is also of too limited dimensions for any purpose for which hereafter it may be not only expedient but necessary to devote it.

Statistics are given in this report to show the probable future growth of the city, "to prove the importance that it is to the present generation to locate, both for itself and posterity, on account of the great, squares and public places now, while they can be obtained at a price comparatively small, and so to locate them both with reference to the present and future importance of parterres, where great streets and avenues, the arteries of our body politic, diverge or unite, and where, now that the ground is unoccupied, the purchase can be effected, which, in the lapse of a few years, when valuable buildings are erected, will be impracticable, on account of the great expense; thus precluding to future generations, the advantages that would necessarily accrue to them from having such squares in various parts of the city, for purposes of military and civic parades, and festivities, and, what is perhaps of more importance, to serve as ventilators to a densely populated city.

It is worthy of remark, that almost every stranger who visits us, whether from our sister States or from Europe, speaks of the paucity of our Public Squares; and that in proportion to its size, New York contains a smaller number, and those few of comparatively less extent than perhaps any other town of importance.

Comparison is made with cities of Europe. The proposed enlargement of Union Place the committee deems desirable as a site for public buildings. They offer a resolution that the enlargement he made as shown in the plan. — Decree, Bd. of Ass'ts, I: 153-61.

The report was adopted by the assistants on Jan. 16, 1832. — Proc., Bd. of Ass'ts, I: 309. On Jan. 30, the committee on lands and places of the board of aldermen, to whom the subject was referred by the board of assistants for concurrence, reported in favour of the plan. They stated that this was the highest land on the island south of 21st St. — Proc., Bd. of Ald., II: 105-06.

St. Mary's Church (Roman Catholic), in Sheriff St. (see My 14, 1832) is destroyed by fire. — N. T. Type Post, N 9, 1832. "With the edifice perished the only church bell then possessed by the Catholics in New York. . . . A new and more advantageous site was selected on the corner of Grand and Ridge streets. . . . The corner-stone of the new church was laid. . . . on the 30th of April, 1832, and it was solemnly dedicated on the 9th of June, 1833." — Shea, Hist. of the Catholic Chk in the U. S., III: 495-500.

N. T. Type Post, N 9, 1832.

Richmond Hill Theatre (see S 8) is the name of a new Theatre which has been erected in this city, at the corner of Varick and Charlton streets. . . . The Theatre is a new brick edifice, the interior arrangements of which . . . are very commodious, and finished with much elegance and taste. . . . — N. T. Type Post, N 13, 1831.

The Richmond Hill Theatre (see N 11) opens for the first time with the comedy "The Road to Ruin." The poetical address on this occasion was written by Fitz-Greene Halleck and read by Mr. Langton, a member of the stock company. — N. T. Type Post, N 15, 1831; Haskell's Reminiscences, 262.

American Academy of Fine Arts. — A building has been erected on the former site of Dr. Hosack's stable, between Barclay and Vesey-streets, for the reception of the paintings and statuary belonging to the old Academy, and for its exhibitions. For such a building, which is an ornament to the city, the community is indebted to the public spirit of the owner of the property, who has leased it to the Academy on the most liberal terms. It has been constructed under the immediate direction and supervision of Colonel Trumbull, the President of the Institution. . . . The building and contents are described. — N. T. Com. Adv., N 14, 1831.

It was opened in May (q.v., 15), 1832.

The third number of Peabody's Fictus (see My 25) has just been published. It contains views of the following places: the Elysian Fields, Holobon; the City Hall, and the contiguous edifices; the Lunatic Asylum at Manhattanville and the large room in the Exchange. — N. T. Type Post, N 19, 1831. The series is described under Pl. 102-3, III: 599-603.

The common council yields a share of the school moneys to "the Orphan Asylum, in Prince street [opened in 1826—see N 20, 1826], under the direction of the New York Catholic Benevolent
1706

THE ICONOGRAPHY OF MANHATTAN ISLAND

1831 Society,"— Proc., Bd. of Ald. (1814), I: 459. This action reveals a change of attitude since April 28, 1815 (q. v.).

29 A plan is on foot for erecting in New York a statue of Washington by Mr. Greenough, a native artist.— N. Y. Eve. Post, N 29, 1831. See also ibid., D 2, 1831.

Dec. Samuel Stevens, reporting in behalf of the committee on fire and water of the board of aldermen, urges that the Bronx River be made the source of New York's water supply. Appended to the report is a letter signed by Cyrus Swan, president of the N. Y. and Sharon Canal Co., asserting that the Croton River could be carried into New York, and that a sufficient supply of water for the present and future wants of the city could not be obtained without it. The common council approved Stevens' report, and a bill embodying his proposal was sent to the legislature in 1832, which, however, failed to enact it into law.— Colden, Memoir Croton Aqueduct, 110-113; Man. Com. Coun. (1834), 218-19. See O 26, 1832.

9 It is resolved to open 42d St. from Third Ave. to the Bloomingdale Road.— Proc. App'd by Mayor, I: 101; Man. Com. Coun. (1837), 450.

10 Statue of Washington.— A project is on foot, . . . of employing the inimitable sculptor of the Chanting Cherubs [Greenough] at present exhibiting in this city, upon a statue of Washington. . . . It is purposed to raise the necessary sum of five thousand dollars by subscription. The proceeds of the exhibition of the above-mentioned exquisite group will also hereafter be devoted to that purpose.— N. T. Mirror, IX: 183. A cast of Greenough's Washington is now on exhibition at the 5th exhibition of the National Academy of Design the next year.— Ibid., IX: 382. This was for the city of Washington.— Ibid., X: 23. See, further, D 12 and 14.

12 Lord John Russell introduces, in the house of commons, the third Reform Bill, which was passed on March 23, 1832, and sent to the lords. They showed the same disposition to defeat it as before (see J 24), until finally William IV gave Earl Grey and Lord Brougham permission to create a sufficient number of peers to insure its passage in the upper house. This threat sufficed, and the bill passed on June 4 and was signed.— Hazen, Europe since 1815, 456-57.

4 The board of aldermen requests its committee on arts and sciences to examine and report upon the propriety of erecting a statue of General George Washington, in the City Hall.— Proc., Bd. of Ald., I: 455. See D 14, 1831; F 30, 1832.

14 "The Proposals for the purchase of a Marble Statue of Washington, to be erected in this city, being highly approved of, the exhibition of Greenough's Group of Chanting Cherubs, now open at the American Academy of the Fine Arts in Barclay-street, will continue a short time longer for the purpose of assisting in raising a fund for the subject. A subscription is already open at the Exhibition Hall. . . . Conditions of subscription for the purpose of a Statue of Washington, to be erected in the city of New-York," require "the work to be sculptured by Horatio Greenough, for the sum of $6000 the whole amount of subscription to be $6000, $1000 being reserved for contingent expenses. . . . The order for the work will be forward to the artist as soon as the price of the Statue is collected . . . The total proceeds of the exhibition of the Group of Cherubs . . . will be added to the subscription list. . . . "— N. Y. Com. Adv., D 14, 1831. See, however, F 20, 1832.

16 "Mr. Horner the artist who executed the view of London for the Colosseum in that city, has issued proposals for publishing a panoramic view of the city of New York and the surrounding country, taken from the highest accessible part of the spire of St. Paul's church in Broadway. It is to be published in two engravings, 36 inches by 20. One of these called the South View, comprises the bay of New York with its islands, and the coast scenery from the heights of Brooklyn to the Jersey shore. It also embraces the south part of the inland with Broadway in the centre of the view. The other a northern line that part of the Park northwards, and the distant scenery includes the shore of Hoboken on one side, and the Navy Yard and part of Brooklyn on the other. . . ."— N. Y. Eve. Post, D 16, 1831. The former of these views, if drawn, evidently was never engraved; the drawing of the latter is in the author's collection. Cf. the well-known view of Broadway (Pl. 117, Vol. III) and the view of New York (Pl. 120, Vol. III). These are both by Horner.

Samuel B. Ruggles having acquired by several conveyances, in this year, from the heirs of James Duane, the following described property, now conveys it to five trustees and their successors: 41 lots of land between Third and Fourth Aves., 20th and 21st Sts., being part of the Gramercy farm of the late James Duane, and the boundaries of which are fully defined in the deed. This conveyance requires that the trustees shall enclose not more than 21 acres of this tract with an iron fence, having ornamental gateways, by May 1, 1833, and lay out the grounds with roads and paths and plant trees before May 1, 1834. This park or square shall be maintained at the expense of the owners of the surrounding lots for their particular benefit.— Liber Deeds, CCLXXVIII: 528.

For Dunlap's views of the public buildings in this city, see above-mentioned (1857), 528-29. See also the plan of the city, with the names of streets and blocks, 1832, in the surveyor's office.
"I remember it well—a long, low, venerable, irregular, white, cottage-like brick and wood building, pleasant notwithstanding, with a number of small, low rooms and a very spacious parlor, delightfully situated on a steep bank, some fifty feet above the shore, on the west side of the bay adjoining and spotted. There was a fine orchard, too, and a garden on the north; but I suppose that if not gone, they are going, as they say in Pearl Street."

"Is Hamilton's house still standing?"

"Not that in which he labored as Secretary of the Treasury . . . That was in Wall Street; it has been pulled down, and its site is occupied by the Mechanic's Bank. His last favorite residence was the Grange, his country seat at Bloomingdale, which, when I last saw it, remained much as he left it . . ."—N. Y. Evve Post, D 17, 1831.

The street committee, to whom was referred a memorial of nearly 200 persons who are owners and occupants of property in the vicinity of the "Five Points," praying that part of Cross and Anthony Sts. might be widened, and that the triangle of ground bounded by Little Water, Cross, and Anthony Sts., might be appropriated to public purposes, make a report on the character of this neighborhood, which "has long been notorious in the annals of the Police Department." They state, among other things: "The name of 'Five Points' has been given to that section of the city which lies within a circle of much other, and from whence Anthony street diverges, making five corners or 'points'—three right and two acute angles.

The number of houses, their value, and the number of occupants, on the triangular block are stated. The committee offers the resolution: "That Cross street be widened ten feet from Anthony to Little Water Street, and that Anthony Street be widened ten feet from Cross to Little Water Street;" also "That the triangle of ground bounded on Little Water, Cross, and Anthony Streets, be opened and appropriated as a public Square—and that the buildings thereon be removed."—Doc. Ed. of Ass'ts, I, 161-68. For view of Five Points (in 1827), see Man. Com. Com. (1855), 112.

On July 25, 1832, the mayor approved a joint resolution that the Court of Aldermen put their own hands to the forecast of the city, and to the doctrine of the city, and the result of this bold resolution of the city is to be taken for opening at Five Points."—Proc. App'd by Mayor, I: 254. "Five Points" is now Paradise Park.—L. M. R. K., III: 971.

The common council passes "A Law To authorize the New York and Harlem Railroad Company to construct their Railway." This permits the company to lay its rails "along the 4th avenue, from 132d to 220th streets, and the 7th avenue to the Hudson River, together with a map now on file in the Register's office [see O 111], and a branch thereof along 125th street, from the 4th avenue to the Hudson River, provided that the width of such double road rail or way shall not exceed twenty-four feet.

If, after construction, it shall appear to the common council that the railroads or any part thereof "shall constitute an obstruction to the future regulation of the city, or to the ordinary use of any street or avenue" (of which the common council shall be the sole judge), the company shall provide a remedy, satisfactory to this board, or, failing to find a remedy, the company, within a month after requisition, shall remove the "railway, obstruction, or impediment," and "replace the street or avenue, in as good condition as it was before the said railroad was laid down." Failing to do so, the common council will cause the removal at the company's expense.

The common council reserves the right "of regulating the description of power to be used in propelling carriages on and along said railways, and the speed of the same," and other rights reserved by the city in the common council's act of incorporation (see Ap 33).

It is incumbent upon the company "to construct stone arches and bridges for all the cross streets, now or hereafter to be made, (which will be intersected by the embankments or excavations of the said rail road,) and which, in the opinion of the Common Council, the public convenience requires to be arched, or bridged; and also to make such embankments or excavations as (in the opinion of the Common Council) may be required to make the public highways passable for the remission of the intersected cross streets, easy and convenient for all the purposes for which streets and roads are usually put to; and also, that the said Company shall make, at their own like cost and charges, all such drains and sewers as their embankments and excavations may have the opinion of the Common Council) make necessary, . . ."

The company's powers and privileges granted by this ordinance shall be null and void if the company fails to build its railway within the time allowed by its charter.

There is a prohibition that any building on the strip of land taken for the railway. Railings or fences shall be erected by the company on the outer edges of embankments.

The ordinance shall be binding on the common council, and go into effect when the company shall execute an agreement embodying the terms of this ordinance.—Proc. App'd by Mayor, I: 108-11. See 1832.

The residence of Peter G. Stuyvesant (built prior to 1765, q.v., and known as "Petersfield House") was still standing at this time (c/L. M. R. K., III: 952). The earth around it has been removed to fill up surrounding hollows, it stood high on a pyramid of ground. The north-east corner, which had been undermined, had fallen. The building was oblong, of brick painted yellow, two storeys high, with a hipped or gabled roof. It had two fronts, one facing west, and the other overlooking the East River. Its location was a little east of where First Ave. crosses 15th St.—N. Y. Mirror, D 31, 1831. The reference to it in the Mirror as the country-seat of Gov. Peter Stuyvesant is of course erroneous; as is also the statement in this Chronology, under Jl, 1768, that this was the house which was destroyed by fire on Oct. 24, 1778 (q.v.). An error is also found in the streets in L. M. R. K., III: 942, where "Petersfield" is said to be the residence of N. W. Stuyvesant. It was Peter G. Stuyvesant's. Likewise, the "Bowery House" is there said to be Peter G. Stuyvesant's; it was N. W. Stuyvesant's. They are correctly designated on the Landmark Map, Pl. 173, Vol. III. See also O 24, 1778, Addenda.

1832

In this year, the first newspaper in the Welsh language in America, the Gwynn America, a semi-monthly, appeared in New York.—North, Newspaper and Periodical Press, 129.

In this year, Robert L. Stevens conceived the idea of the Stevens Battery. It was to be an iron-armed ship, 260 ft. long and 28 ft. beam. His brothers, J. C. and E. A. Stevens, assisted in the experiments.—Preble, Hist. of Steam Navigation, 135-36.

In this year, copies of all the ferry leases still in force were published in the Dutt, B. of Ass'ts, No. 26, p. 129 et seq.

In this year, Chas. Fredk. Grim published An essay towards an improved register of deeds. City and county of New-York, to Dec. 31, 1799. The compiler had planned a full and accurate guide to the deeds down to the year 1793, but was frustrated by the officiousness of the register of the county at the time. The arrangement is alphabetical by grantors and grantees named in county deeds, and there is a similar arrangement, on pp. 193-71, for the names found in deeds relating to the county of N. Y. on file in the office of the secretary of state, Albany.

In this year, it was reported: "It is proposed to unite the contemplated railroad from New-York to Albany (the present N. Y. Cent. & Hudson River R. R.—see Ap 17) with the Harlem railroad (see D 22, 1831) at the termination of the Fourth avenue."—Williams, N. Y. Ann. Register, 1832. See Ja 14.

An English traveller in America writes of this city as follows: ... . A contrast is exhibited in some houses built by the Dutch settlers with bricks brought from Holland, with high, sharp roofs; they are preserved on account of their antiquity. The modern houses have green lattices to the windows, and the rooms on the first floor communicate by folding doors.

"To obtain some idea of the commerce of New York, a stranger should view the Broadway, where the stores of the jewellers and mercers are situated. In Wall Street the bankers have their offices—and in South Street the wholesale merchants transact their business—in Pearl Street the dry-good merchants have their warehouses—the East River the yards for ship-building—the North River, where the steam-boats depart.

"The port of New York is crowded with vessels of all descriptions; the docks which sail on the North River, and those which carry on the coasting trade to the East and South, are very commodious. Twelve hundred and forty docks are employed on the Hudson. They are painted with the most brilliant colors, and their white sails, and variegated flags and streamers, present a beautiful addition to the scenerv of the river."

"The ship-yards are in a constant state of activity, and the..."
1832 merchant vessels sail very fast. Ships of war have been built at the private yards. A builder contracted with the Columbian government to build four frigates, of sixty-four guns each, in eighteen months; in that time they were completed and fully equipped for sea. . . .

There are four manufactories of steam engines, which make annually about thirty engines for boats on the Hudson and Mississippi. Some are ordered for South America. A new era seems commencing in this important instrument of power.

The conveyance of merchandise to the different warehouses employs two thousand carts. Their passing and repassing produces a continual noise. In the midst of this busy scene, there is one spot sacred from the intrusion of commerce, the Battery, situated at the south of New York, fronting the Bay. A sea wall has been erected, which has much enlarged its former boundary. It is one-third of a mile long, and two hundred yards wide. It has a broad flagged walk in front, and a row of seats extending the whole length of the promenade. Near the city is a grass-plot intersected with walks; on the sides are planted the plataneus occidentalis or occidental plane.

Among the literary institutions of New York the Athenaean holds a distinguished rank, on account of the influence it possesses in the general diffusion of knowledge. Rooms are opened in Broadway, where newspapers of the United States and of Europe are taken; also the reviews, journals, and magazines. . . .

"The Historical Society meet at the Institution [but see Ap 19, 1832], in the Park, near the City Hall, where a range of buildings has been prepared for the use of various societies. Their library is valuable and extensive . . ."

"The Literary and Philosophical Society meet in an adjoining room. . . ."

"In New York, the Partiomen, or Gallery of the Fine Arts, is in Broadway, opposite the Park. The Hall is one hundred feet long. . . ."

"The Broadway is the fashionable promenade. Between one and three o'clock, it is frequented by the beauty and fashion of the city. . . ."

"The chief disadvantage of New York is the want of good water. From the great value of the ground, there are few open squares left to promote a free circulation of air. . . ."—Travels in the U. S. A. and Canada, by L. Finch (London, 1833), 16-21, 23-28, 34-35.

In this year, the Downing St. meeting-house of the Society of Friends ("Hicksite"); called the Greenwich Meeting, was built. It was finished after 1836, where the meeting moved to the north side of 27th St., between Broadway and Sixth Ave.—Cox, Catalogue of Records of the Society of Friends (MS.).

In this year, a third French Protestant Episcopal Eglise du St. Esprit was erected, on the south-west cor. of Franklin and Church Sts. It was 100 ft. long, 50 ft. wide, and 50 ft. high.—Wittmeyer's Introduction in Vol. I of Collections of the Huguenot Soc. of Am., LXXVIII; Howe's Diary, I: 115. See N 29, 1834.

About this year, the old parsonage of St. Mark's Church, the gift of Petrus Stuyvesant, was removed by the opening of new streets.—Man. Com. Coun. (1862), 692.

In this year, the Chatham Theatre (see Ja 18, 1839) was converted into a church for the Second Free Presbyterian Congregation. It was known as the "Chatham Street Chapel."—Greenleaf, 1877; L. M. R. K., III: 687.

In this year, the street commissioners published Reports and documents [addressed to the common council] relative to the Stuyvesant meadows, from the year 1825 to 1831, inclusive.

In this year was published Historic Tales of Olden Time; concerning the Early Settlement and Advancement of New York City and State, by John F. Watson. See also 1846.

In this year, the following streets were widened: Ann St., between Nassau and William Sts.; Cedar St., between William St. and Broadway; Exchange Place, at William St.; Hanover St., at Exchange Place; William St., from Wall to Pine Sts.—Man. Com. Coun. (1857), 530.

In this year, the Tontine Coffee House "was kept as a hotel by Lorcejoy & Belcher, and was the scene of several brilliant Masonic dinners. The lodgers, in annual parade, would march from the City Hotel, on Broadway, down to Broad Street; through Broad to Pearl, and through Pearl Street to Wall and the Coffee-house—which they thought a long tramp. After the banquet, the march would be resumed along Pearl to Beekman Street, up Beekman to Chatham Street, down Chatham to Broadway and the City Hotel."—Stone, Hist. of N. Y. City (1872), 343, citing Jour. of Com., II 25, 1871. See, further, 1874.

This year, a "serious fire" occurred in the interior of Franches Tavern, after which a new roof was added.—Drowne, A Sketch of Franches Tavern (1910), 214; and see Vol. III, pp. 850 and 978. See, further, 1873.

In this year was published in Washington, by order of the house of representatives, as House Doc. No. 101 (1st sess., 22d cong.), a Report on the relative merits of canals and railroads, submitted by Mr. Howard, of Maryland, and appended by order of the committee on internal improvements of the house of representatives; the other is entitled Documents in relation to the comparative merits of canals and railroads. Published by order of the house of representatives of the 15th day of February, 1832, under the superintendence of the committee on internal improvement.

The first number of the Rail-Road Journal (New York) is issued (erroneously dated "1831"). This timely paper is the first railroad periodical published anywhere. It contains a list of nine railroads in the United States, now constructed, and a list of which are in part finished, and in successful operation. These are the Baltimore and Ohio (250 miles, 60 miles being completed and in use); Albany and Schenectady (16 miles, 12 miles in use); Charleston and Hamburg (153 miles, 20 miles completed on which the U. S. mail is carried); Mauch Chunk (9 miles, all in use); Quincy, near Boston (6 miles, all in use); Ithaca and Oswego (99 miles); Lexington and Ohio (92 miles); Cameron and Allegheny (90 miles), and Lackawaxen (16 miles). A list of 19 others is given which "are now making, or soon to be commenced," among which is the Harlem road. "Applications will be made to the Legislature of New York, at its ensuing session, for Railroads in different sections of the State, with an aggregate capital of over forty-two millions of dollars." These include one "from Lake Erie, through the Southern tier of counties, to the Hudson River, crossing a ferry, and then down on the East side to the city of New York—Capital $10,000,000." Another is "from New York to Albany, on the East side of the Hudson." Another is "from the city of New York to Manhattaville and Westchester, Putnam and Dutchess Counties—Capital $5,000,000 with privilege to increase the capital to $20,000,000."—another railroad is "from New York to Niagara Falls.

In the third issue of the Journal (Jan. 14, 1832), Col. J. Stevens, of Hoboken, who was still living, is credited as having been "the first American projector of Railroads," by reason of his views expressed in 1812, and the memorial addressed by him in "1818 or 1819" to the Legislature of Pennsylvania, recommending "a Railroad from Pittsburg to Philadelphia."—Ibid., I: 37. See also Doc. No. 101, House of Reps., entitled Report on Steam Carriages (1832), explaining their early use in England.

The "dial plate of the City Clock" is illuminated.—N. T. Eve. Past, Ja 13, 1832. This probably marks the completion of the new public clock in the cupola of the city hall. See My 2, 1831.

The "Harlaem Rail-road. . . . is now located by an ordinance of the Corporation of this City [see D 22, 1831]. It is to commence at 23rd street, and pass through the centre of the 4th, or Broadway avenue, to Harlaem River, at a point about 300 yards above the bridge. The distance is five miles. The contracts are all to be made by the 1st of February, when operations are to be commenced. It is intended that this road shall be constructed in the most permanent manner, with double track, and the cost to be about $5,000 per mile. Application will be made to the Legislature at its present session, for permission to continue the Rail-road down to 14th street, and to such other part of the city as the Corporation may permit. There is little doubt but this will prove a profitable investment to the stockholders, even if no other use should be made of it than for passengers. It is however so located as to meet the road now in contemplation from Albany to New York, on the east side of the Hudson river."—Rail-Road Journal, I: 53. See F 2.
John Stevens recommends that the Harlem Railroad be continued "through Broadway as far as Trinity Church, opposite Wall Street."—See a letter from him in the Rail-Road Journal, I: 52 (pub. Jan. 21).

In the issue of January 28, was published his elaboration of the idea, which he proposes to be the earliest suggestion for an elevated railroad. It is as follows: "My plan is to erect single posts on each side of the street in immediate contact with the curb stone.—These posts to rise ten or twelve feet high from the level of the pavement, and to be placed at such distances from each other as will ensure stability to the rails fixed thereon, which may be either single or double: I should, however, prefer double ones as being more adapted to the purpose. The posts, if thought necessary may be housed, but, I am inclined to believe, the pine from South Carolina or Georgia may be made sufficiently durable by burning and thereby charring the lower ends, and if thought necessary, by boring also. In passing through the lower part of Broadway, it will become necessary to elevate the rails in order to preserve the necessary approach to a level."—Rail-Road Journal, I: 68 (in the collection of William Barclay Parsons). See also, descr. Pl. 133-3, III: 699.

In the course of executive proceedings in the senate on this and the following day, Senator W. L. Marcy of New York used the expression "To the victor belong the spoils," declaring this to be a principle to which both political parties adhered and were expected to adhere in the future. The New York Mirror, July 18, 1856. Hone's Diary, II: 94; Alexander, Pol. Hist., State of N. Y., I: 380.

The common council directs a committee to buy $30,000—_the gory of land on Sixth Ave., at its junction with Greenwich Lane, as the site for a market. This was the result of resolutions, petitions, and remonstrances, beginning Oct. 3, 1829 (see M. C. C., 1784-1831, XVIII: 745).—Market Book, 588-92. See Nov. 24.

The common council authorizes the "New York and Harlem Rail Road Company" to "take possession of the ground owned by the Common Council, over which the line of said rail road is ordered to be constructed, and that they be permitted to use the same during the continuance of the present charter [see Ap 25, 1831], for the purpose of a rail road, and that only; and when the same so to use it, it shall revert to the Corporation; provided always that said land shall be so used as not to interfere with the use of the cross streets, and on condition, however, that if the said Corporation shall not commence the said railroad, and complete the same within the time limited by their charter, then the privilege hereby granted shall cease and be void."—Proc., App'd by Mayor, I: 128. See F 23.

In a speech before the U. S. senate on Feb. 2, 5, and 6, Henry Clay defended, with an array of historical data, the system of tariffs which he originated for the protection of American manufacturers.—See Speech in defence of the American System, against the British Colonial System, with an appendix of documents referred to in the Speech Delivered in the U. S. Senate Feb. 2, 5 & 6th, 1832 (Wash., 1832).

The board of aldermen resolves "That it be referred to the Committee on Arts and Sciences, to report to this Board a plan and the probable cost of a suitable monument to the memory of George Washington, surmounted with a statue of the Father of his Country, to be erected in the Park, in front of this Hall."—Proc., May 11, 1832, II: 180. The committee in favour of the proposal, and the board endorsed its recommendation that $200 be appropriated to procure plans, etc. The resolution was sent to the board of assistants for concurrence.—_Ibid., II: 333. On April 16, the assistants referred the subject to their committee on arts and sciences.—Proc., Bd. of Ass'ts, A'd, I: 406. For further steps in the efforts to procure a statute of Washington, see Ap 26, 1831.

The 190th anniversary of Washington's birth is elaborately celebrated.—_N. Y. Evc. Post, F 22 and 23, 1832; Hone's Diary, I: 46.

Ground is broken on Murray Hill for the Harlem Railroad. "Yesterday [Feb. 23], pursuant to invitation, several members of the corporation, together with visitors, engineers, contractors, &c. proceeded with the officers and directors of the Harlem Rail Road Company from their office in Chamber street in carriages to Murray Hill, on the fourth avenue, where the ceremony of breaking ground was to be performed. On their arrival at the elevated and commanding spot, a number of citizens and persons engaged on the work had already assembled, the rock had been bored and thirteen blasts were exploded, when John Mason, Esq. the Vice President of the company (Campbell F. White, Esq. the President being at his post in Congress) addressed the assembly... This address was received with great cheering, after which the company and guests repaired to Hinton's, at the [Youle's] Shot Tower Hotel, where a cold collation was spread and success to the Harlem Rail Road was drank in sparkling Champagnia, with great hilarity and good feeling.

Thus commences a single link in that great chain of internal improvement which is to reach from New York to the Atlantic, which, without fatigue and at moderate expense, will convey our citizens to Albany in a single day."—Carrier & Enquirer, F 24, 1832 (in Society Libr.); Rail-Road Journal, I: 129 (F 25, 1832); and see N. Y. Com. Adv., F 25, 1832. See, further, Ap 6.

There are numerous schools of all kinds in the city, in which all classes and colors may be accommodated... There are upwards of 100 churches in the city, of almost every denomination of believers. Of these, some are of a handsome order of architecture. The portico in front of the church of the Ascension, in Canal street, would do honor to any city. It is chaste and classical in the highest degree... Of all the churches of the U. States, Trinity Church is the best endowed. It is restricted by its Charter, which, annually revenue of $15,000, has been hitherto a vestry, and has been obliged to alienate a vast property in the city, in order to keep within bounds... Neither is New York behind her neighbors in the number of her literary and scientific institutions. The most ancient of these, it is believed, is the society library, founded in 1754, and containing upwards of 21,000 volumes, the historical society, incorporated in 1809... The Clinton hall association is an incorporation for the promotion of literature, science and the arts... There are two academies of the fine arts in New York—the American and the National—the former supported by amateurs, the latter composed of artists, with a few exceptions. In 1827, the returns made, according to law, to the comptroller of the state, made the total of banking capital in New York amount to $15,960,403. Since that period, several new banks have been chartered, adding largely to this sum. The number of insurance companies is upwards of forty."—_N. Y. Evc. Post, F 24, 1832.

A bust of Clinton by Caucici, a pupil of Canova, is on exhibition in the N. Y. Institution.—_N. Y. Mirror, IX: 271.

Money is appropriated for alterations and a new roof for the old almshouse, for the accommodation of the courts and other offices of the United States, by which a part of the building is occupied. On Jan. 13, 1831, a door was cut in the rear or Chambers St. side, leading into a garden; a portico and stoup were then erected, and a cistern was sunk there.—Proc., App'd by Mayor, I: 141, 150, 318, 568, 418.

The N. Y. Institution for the Blind (see Ap 21, 1831) opens a school in the almshouse. On May 19, in this year, the school was established at 47 Mercer St.—See First Ann. Rep. of the Institution (1836). See, further, O, 1837.

As usual, each year, the legislature passes an act to enable the common council to raise money by a tax to meet its contingent and other expenses.—_Laws of N. Y. (1832), chap. 43.

"The public schools of this City are no longer liable to the objection which has hitherto been made against them, namely, that they were not in the proper sense free schools. Open to the entire class in the community, inasmuch as a small sum was required to be paid for every scholar attending. This requimation is now abolished, and the public schools are in every signification of the word free."—_N. Y. Evc. Post, Mr 16, 1832.

The New York Traveller, a weekly, the Franklin Daily Advertiser, the Youth's Companion, a weekly, and the Antiquarian, have recently been established in New York.—_N. Y. Evc. Post, Mr 17, 1832.

The Walton mansion-house at 326 Pearl St., in Franklin Squ., is thus described: "... an antiquated, large three-story edifice, built in the English baronal style of the last century. The entrance-hall is in the centre of the building, with large old-fashioned parlors and drawing-rooms on each side. The portal is in fine keeping with the style of architecture, which then distinguished the English patriots from the plebeians.

"The portico is supported by two fluted columns, and surrounded with the armorial bearings of the Walton family, richly.
THE ICONOGRAPHY OF MANHATTAN ISLAND

Mr. 17

1832\- carried and ornamented; but like all insignia of nobility on this side the Atlantic, somewhat the worse for wear. . . .

"The Walton-house is . . . in the midst of a most dense population; but, when it was first erected [see 1772], there was but one building on that side of the street, between Peck-slip and the commencement of Cherry-street. The diagonal junction of the latter with Pearl-street, then created a thoroughfare, for the most part of Franklin-square. At the period to which we allude, there were not half-a-dozen buildings in Pearl-street north of Franklin-dun. For many years afterwards, that region, comprising at present the populous streets called Roosevelt, James, Oliver, Catharine, and Oak, together with Batavia-lane, was an impassable bog, denominated 'Swamp Meadow,' being almost wholly covered with stagnant water, holding communication with the Collect by a stream which crossed Chatham-street.

"That section, of the city which is still called the 'Swamp,' extending from Beekman to Frankfort-street, was then literally a swamp, being a wet, boggy waste, covered with trees and bushes, where wild birds built their nests and laid their eggs, as they fondly thought, far from the invasions of wicked school-boys, who learned their a, b, c, somewhere in Broad-street. Here, also, did sportsmen resort for game; here did whole herds of swine, not then employed as city scavengers, enjoy their own living by rooting up roots and ground-nuts; and here were hulcious blackberries, far more plentiful than satisfactory reasons for winning Pearl-street round the margin of this quagmire. The natural course of Pearl-street, from Peck-slip, is Cherry-street. But the whole city (modern improvements always excepted) is a labyrinth, a puzzle—a riddle—incaprehensible to philosophers of the present day.

"With these introductory remarks we publish the following description of the Walton-house, politely furnished by Mr. Pintard.

"This family dwelling-house was in its day—indeed still is—a noble specimen of English architecture a century ago. It is a brick edifice, fifty feet in front, and three stories high, built with Holland bricks, relieved by brown stone water-tables, lintels, and jambs, with walls as substantial as many modern churches, standing along the south side of Pearl-street, formerly called Queen-street. The superb staircase in its ample hall, with its mahogany handrails and bannisters, by age as dark as ebony, would not disgrace a nobleman's palace. It is the only relic of the kind that probably at this period remains in the city, the appearance of which affords an air of grandeur not to be seen in the lighter staircases of modern buildings.

". . . It was erected in 1754 [error for 1752] by William Walton, Esq. who lived and died a bachelor, and bequeathed by him to his nephew, the late Honorable William Walton [who died June 28, 1806], whose son, advanced in years, now occupies the premises.

"Mr. Walton was a merchant . . . He acquired an ample fortune by an advantageous contract with some Spaniards of St. Augustine, which enabled him to build by far the most expensive, capacious, and elegant house at that period in New York. When the foundation was laid, his fellow citizens all wondered that he should choose a site so far out of town, it being then almost at the eastern extremity of the city, but at the present time it is considerably west of the centre, between the Battery and Colossus-hook. . . ." Accompanying this description is a wood-cut view of the house, engraved by Mason from a drawing by Davis.—N. T. Mirror, IX: 289.

21 Frazier's bust of John Jay (see N. 4, 1831) is on exhibition at the merchants' exchange—N. T. Eco. Post, Mr 21, 1832. See also ibid., Mr 23.

23 By act of legislature, the Fifteenth Ward is created. The former Ninth Ward is divided, the eastern portion receiving the new name.—Laws of N. T. (1829), chap. 56.

29 "This city is every day putting forth new claims to the title sometimes bestowed upon it, of the London of America. The great metropolis of England seems to be a constant object of imitation with us. One of the evils of which the sober and religious part of the community of London have had much cause to complain—the violation of the Sabbath by the regular publication of newspapers on that day—has not hitherto been adopted in New York. Henceforward, however, we are to exhibit this as an additional feature of resemblance to 'the common sewer of Paris and Rome.' An evening paper, we are sorry to perceive, announces an intention of issuing regularly hereafter, beginning on the 1st inst. a Sunday newspaper. . . . We should be well pleased if the experi-

ment were to end in showing the persons who have undertaken the matter that there is too much moral sense in our community to allow of such a speculation proving profitable."—N. Y. Etc. Post, Mr 29, 1832.

The common council makes an appropriation for enlarging the public reservoir in 13th St. (see N 16, 1839; Ap 19, 1839; and 1841), to a point of land between Franklin-square and the west line of Eleventh, N., III: 976. See Weitkamp's check-list of New York views, by the N. Y. P. L., entitled The Ena Collection (1842), 425; see, further, Js, 1833.

The legislature passes an act to enlarge and alter Union Place, Apr. so as to include within its boundaries all the lands lying between 14th and 17th Sts., Fourth Avenue, and Bloomingdale Road. Fourth Avenue, by this act, was made one of the cardinal streets which crossed Chatham-street.

On April 19, the common council directed that Union Square be "opened" (enlarged as the act requires); and ordered that "the proceedings heretofore commenced for opening Union place, anterior to the passage of the said Act . . . be discontinued."—Proc., App'd by Mayor, I: 170. See, further, Ap 4, 1833.

Referring to the early development of Union Square, the following account was published by Valentine in 1857: . . . A few years since, and this now delightful spot was termed 'The Forks,' where the Bowery and the Bloomingdale road united. It then presented to the eye of the tourist and pedestrian a shapeless and ill-looking collection of lots, where garden sauce flourished—dwellings of charity, and around which were reared a miserable group of shanties. The Manhattan Bank, at that period, owned a good part of the property; and when the yellow fever ravaged the lower part of the city in 1822, a temporary banking house was erected until the plague was stayed. In the latter part of the year 1831, the Common Council, on the petition of owners of property in the vicinity, resolved to have Union Place enlarged to its present space—forming an irregular parallelogram, something after the plan of the Rue De La Paix and the Place Vendome, Paris. In the report on this subject, we find the committee making use of almost similar arguments as those recently urged in favor of the Central Park. After noticing the gradual increase in the population of the city, and its favorable location for commercial greatness at the confluence of two magnificent rivers the report states—"That it is of the utmost importance to the present generation to locate, both for themselves and for those succeeding us, squares and public squares, now, while they can be obtained at a price comparatively small, . . . The report in favor of the improvement was adopted, and the map of the city altered to conform thereto; but it was not until several years afterwards that the present 'stately edifice,' which now adorns the place was erected. The Manhattan Bank put their lots in the market about 1845, and in 1847-8 the mansions to the left and centre of our sketch were finished and ready for occupation. The large building, the Everett House, is of more recent date, and stands partly on lots purchased of Mr. William B. Moffat, whose house adjoins it. The other buildings on the upper side of the place were erected, and are owned by Mears, Miller, Henry Young, and the late Daniel Parish. . . ." . . . this improvement would perhaps have been delayed until it was too late, but for the energy and foresight of the majority of the committee of the then Board of Councillors, whose names are appended to the report which lies before us—William H. Holly and James R. Whiting . . . Both gentlemen may be satisfied to go down to posterity as the founder of the plan of the Union Place—for, strictly speaking, the term Square is a misnomer."—Man. Cons. Coun. (1837), 480-81. See also descrip. of Pl. 135, Illi: 704.

The legislature amends the act of April 25, 1821 (i.v.), which incorporated the N. Y. and Harlem R. R. Co., by authorizing the president and directors, with the permission of the common council, "to extend their railroad along the Fourth Avenue [southward] to Fourteenth-street, in the said city, and through such other streets in the said city as the mayor, aldermen and commonalty of said city may from time to time permit." After obtaining the consent of the common council, the company "shall not construct any road-way in any street . . . below Prince-street, until they have completed four miles of their road above said street." Other provisions of this act are:

"No carriage or vehicle shall be drawn or propelled by any
other than horse power through any street...south of Fourteenth Street." Every carriage on this railroad shall have suitable
"safeguards, projecting in a descending direction to bear the surface of the rails in front of each forward wheel, in such manner as to prevent any accident." The speed limit for vehicles below 14th St. is fixed at five miles an hour.—

_Laws of N. Y. (182), chap. 93. See My 1 and 10.

By concurrent resolution, the senate and assembly agree to furnish the N. Y. Society Library, and the N. Y. Law Library, as well as each incorporated athemum in the state and the Albany Institute, with copies of the documents, reports, and journals of the legislature; —_Laws of N. Y. (1832), 578.

The legislature introduces into the plan of the city a street 75 ft. wide running from 14th St. north to 50th St., nearly midway between Third and Fourth Aves. It is not named in the act.—

_Laws of N. Y. (1832), chap. 101. The section below 26th St. was named Irving Place on March 7, 1837 (q. v.). For the section above Gramercy Park (Leasington Ave.), see L. M. R. K., Ill: 1004.

In 1837, a memorial was presented to congress by about 75 prominent individuals and companies praying that an appropriation might be made for the construction of a ship canal through Hale's Point, in order to avoid the dangers of "Hurl Gate." No appropriation was made, but, on April 15, 1838, a state act was passed incorporating the Hallett-Cove Railway. This act is now (April 14, 1832) amended to permit the company to construct the "Hurlgate Canal." Later in the year, a report describing the proposed canal and its advantages, accompanied by an estimate showing that it could be constructed for about $5,000,000, was prepared by De Witt Clinton, C. E. See a pamphlet with map and key, entitled "Hurlgate and the proposed Canal (N. Y., 1832)."

The legislature provides for the appointment and government, of 14 pilots to conduct vessels through Hell Gate.—_Laws of N. Y. (1832), chap. 156.

The legislature incorporates the New York and Albany Railroad Co. It gives it power "to construct a single, double or triple railroad or way between the cities of New-York and Albany, commencing on the island of New-York where the Fourth avenue terminates at the Harlem river, and passing through the counties of Westchester, Putnam, Dutchess, Columbia and Rensselaer, and ending at some point on the said river Hudson opposite or near the city of Albany, with power to continue and extend the same to the city of Troy" and certain other localities. The corporation may build the road three years from this date, and shall spend at least $200,000 upon it, and, within ten years, shall put the road in operation, or nullify its charter.—_Laws of N. Y. (1832), chap. 161; ibid. (1833), chap. 275. On May 9, 1837 (q.v.), the time was extended two years in which to commence construction; and, again, on May 12, 1837 (q.v.), two years.

In the 25th Anniv. Hist. Soc. takes possession of the third floor of the new building erected by Peter Renssen, called the "Renssen Building," at the southwest cor. of Broadway and Chambers St. This was after a 16-years' tenancy of rooms in the N. Y. Institution, under a gratuitous lease from the city.—_N. Y. Ec. Post, Apr 18 and 19, 1812; Kelby, _The N. Y. Hist. Soc. 1818-1901_ (1904), 40, with view of the building opp. p. 50; N. Y. H. S. Coll. (1841); N. Y. H. S. Proc. (1848), 11. Here more of the former operations at which he presided as vice-president, as of April 1. This is evidently a typographical error for 19. He states that the society's library-room is "over the one occupied by the Athenæum."—

_Hone's Diary, I: 51-52. See S 1, 1817.

The legislature incorporates the N. Y. and Erie Railroad Co., authorizing it "to lay a single, double, or triple track from the city of New-York to Lake Erie, to transport property or persons by the power of steam, or of animals, or by any other power," or combination of them. The capital stock is limited to $50,000,000.—_Laws of N. Y. (1832), chap. 224; amended by ibid. (1833), chap. 183; ibid. (1834), chap. 311; ibid. (1835), chap. 277; ibid. (1844), chap. 151.

The work of constructing the road began on May 23, 1834, the survey of the whole route from Piermont on the Hudson to Dunkirk on Lake Erie, covering a distance of 483 miles (subsequently reduced to 446). On Sept. 23, 1841, the first section of 46 miles, from Piermont on the Hudson to Glenan, was put into operation. On Jan. 25, 1843, the road was opened to Middletown; on Jan. 6, 1848, to Port Jervis; Dec. 28, 1848, to Binghamport; Oct. 10, 1849, to Elmira; Sept. 3, 1850, to Hornellsville; and on April 22, 1851 (q.v.), the road was finally completed and opened to Dunkirk. The Erie was "the first trunk-line railroad to enter the city and to exert an approxicable influence on its commerce and prosperity."—_Wilson, Mem. Hist., III: 451-18; N. Y. Tribune, April 25, 1851. Connection with Manhattan Island was early made by ferry.

The legislature incorporates the "Eastern Dispensary of the City of New York."—_Laws of N. Y. (1832), chap. 392. It was organized for work in June, 1835. Situated on Division Ave. (see _N. Y. At II Is_, 1836, p. 64), it provided medical and surgical relief for the district bounded by the East River, E. 14th St., First Ave., Allen St., and Pike St. It 1844, it was described as situated at the corner of Essex Market Place.—_Picture of N. Y. in 1846, 46. In 1882, it was described as situated in the Essex Market building, at the n. e. cor. of Grand and Essex Sts.—_Loc. Cit. Hist. of N. Y. City (1884), II: 455-56. For a review of the various city dispensaries as they existed in later years, see _Man. Com. Coun. (1861), 727-89_.

"The New-York City Marble Cemetery" is incorporated. 25 This cemetery is described in the act as "the cemetery recently constructed in the interior of the block formed by the First and Second Streets, and Second and Third-streets in the eleventh ward."—_Laws of N. Y. (1832), chap. 319. It is therefore situated in the block opposite that still occupied by "The New-York Marble Cemetery" (see _F. 4_, 1831), and is east of Second Ave.—L. M. R. K., Ill: 927. The present city map shows it on the north side of 25 St. On March 13, 1843, the act of incorporation of this date was amended by an act permitting the trustees to purchase and add to the cemetery a parc of land fronting on 25 St. —_Laws of N. Y. (1834), chap. 46._

The legislature amends the charter of the College of Pharmacy so as to prohibit anyone from practicing the business of an apothecary in this city without attaining certain educational qualifications.—_Laws of N. Y. (1832), chap. 356._

A long memorial, regarding the canal, was presented to the common council, against granting a permit to the N. Y. & Harlem R. R. to extend its lines through the streets is published in full in the _N. Y. Com. Adv., My 1, 1832_. See My 10.

About two-thirds of the new brick building of Messrs. Phelps & Peck, at the corner of Fulton and Cliff Sts., falls to the ground, killing nine and injuring several others. Among the dead was Joshua Stokes, the junior member of the firm.—_N. Y. Ec. Post, May 5, 8, 1832. There is a rare loghepicting this accident, a copy of which is in the author's collection.

The common council passes an ordinance which permits the N. Y. & Harlem Railroad Co. to "extend their rails southerly, from the northern line of 23rd street, to Prince street," subject to the same conditions as heretofore imposed upon the company in respect to that part of the road above 23rd St. The company "may forthwith proceed to lay down a single track through the 4th avenue, south of 23rd street, Union Place, Bloomingdale road and Broadway, and another single track through the Bowery, both as far south as Prince street; and after two months use of a single track upon the whole distance, south of 23rd street, on both Broadway and the Bowery, with convenient turnings at the several terminations as above mentioned, they may, unless otherwise directed by the Common Council, lay down a second track on each of the above mentioned routes." The track is to be maintained by the company, subject to the regulations of the common council, which may also impose the obligation to remove them.

The rails "shall be laid down in such manner, and in such parts of the said streets, as shall be approved by the Street Commissioner, so as to cause no impediment to the common and ordinary use of the streets for all other purposes." The "watercourses of the streets" shall be left free and unobstructed, and the company "shall pave the streets in and about the rails in a satisfactory and permanent manner, and keep the width of twenty feet of said paving, including the rails, in good repair at all times, during the continuance of the use thereof." The company shall cause the pavement of the streets to be repaired in case the common council deems it necessary to require that the rails be taken up.

The company is required to "have their single rail tracks above mentioned completed on or before the 1st day of May, 1834;"
and is authorized "to charge and receive such tolls, rates, or fare, for the conveyance of passengers or effects upon the said rail tracks, south of 23rd street, as the said Common Council may prescribe."

To make the ordinance binding upon the common council, the company is required to execute an agreement, under seal, promising to abide by the terms of the ordinance.—Proc. App'd by Mayor, I: 207-9. See S 1.

The Acad. of the Fine Arts "has just been opened at the new rooms in Barclay street" (see N 14, 1831). Among many portraits shown is "a noble full length of Colonel Varick, by Henry Inman."—Henry's Diary, I: 53.

The first Democratic national convention assemblies at Baltimore and nominatesGen. Jackson and Martin Van Buren. It adopts the two-thirds and unit rules.—McMaster, Hist. of the People of the U. S., VII: 143-44.

One of the new fire hydrants, in Wall St., is tested by the chief engineer of the fire department. "The head of water is fully equal to the force of a fire engine; the stream rose as high as the roofs of the highest houses in Wall street, and could be turned in any direction by means of a pipe similar to those of a fire engine."—N. Y. Ev. Post, May 24, 1832.

A public reception and dinner are tendered to Washington Irving at the City Hotel by his friends and fellow-townsmen on his return from Europe after an absence of 17 years. For full report of the event, the speeches, etc., see N. Y. Ev. Post, Je 2, 1832; N. Y. Mirror, IX: 386-87, 390; Life and Letters of Washington Irving, by P. M. Irving, II: 488-91; Henry's Diary, I: 53, 54-55. The original letter to Irving, dated May 23, from a number of his "townsmen," addressed to him this mark of their favour, is in the Seligman collection, in the N. Y. P. L. There is a lithographic view of the Irving dinner in the Eno collection, N. Y. P. L.

Louis McLane, secretary of the treasury, writes to the chairman of the committee of commerce on the house of representatives, answering the latter's inquiries regarding the New York custom-house. He says "that the building [at the n. e. cor. of Wall and Nassau Sts.—see L. M. R. K.: 976.] is found insufficient, and being deemed unsafe, authority has been given for erecting other buildings for the temporary use of the custom-house. The removal is to take place at the beginning of the ensuing month of June; after which time the present buildings will be unoccupied."

"...It is ascertained that the present custom-house, in consequence of its having been formed by uniting two or more private houses, cannot, with safety, be altered so as to adapt it to the better transaction of business; and that, . . . the site is too small to admit of the buildings necessary. . ."

He recommends "that immediate provision be made for the erection of a new custom-house, and for the purchase of the requisite ground, and that authority be given to dispose of the present building. . . ."

"The cost of an edifice, suitable to a port at which about two-thirds of the whole import trade of the United States is carried on, will be considerable; but, for the present year, it is believed . . . two hundred thousand dollars will be sufficient."

On June 4, McLane transmitted to the same representative an extract from a letter of June 2, which he had received from S. Swartwout, the collector at New York, enclosing a petition from the principal merchants of New York for a new custom-house. Swartwout expressed the need of an appropriation of about $500,000. He said: "The buildings which we have leased for two years, are very dark, and the ceilings so low, as to afford but little chance for ventilation . . ." The site of the present building he considers the most suitable, and it is desirable to commence building as soon as possible after the appropriation is obtained. "Two lots, with the buildings thereon, belong to Government. Two dwellings, east of our building, must be purchased, and four in the rear of us, in order to procure area sufficient for a building large enough to accommodate the present and prospective trade of this place." He estimates the probable cost of acquiring these, of pulling down the buildings as necessary, and the whole from "Waste Exps. Dues," Vol. VI., Doc. No. 256, 252 cong., 1st sess., 1832. See Jl 13.

June

About 1,000 people "feel that an arrangement of the Tariff Question during the present session of Congress, on principles of mutual concession and embracing such modifications as may alloy discontent and restore harmony to the different sections of the country, is absolutely necessary for the preservation of Peace and Union," meet in the old almshouse in the rear of the city hall and adopt resolutions favorable to the revision of the tariff. Peter A. Jay makes the principal address. Several high tariff enthusiasts unsuccessfully attempt to break up the meeting.—"N. Y. Ev. Post, Je 8, 9 and 11, 1832; Henry's Diary, I: 55. A pro-tariff meeting was held in the Park on June 11.—Ibid, Je 12, 1832.

The mayor approves a resolution of the aldermen and assistants to carry into effect the resolution of the common council of March 23, 1832 (g. e.), which ordered that the freedom of the city be presented to Martin Van Buren.—Proc. App'd by Mayor, I: 221. But see Jl 5.

The city is visited by a scourage of cholera. R. K. Wharton, an Englishman who was studying art here, gives this description: "...More terrible than the landing of the fierce Dane—there the dread cholera has crossed the Atlantic and the Journals of today contain fearful accounts of its first ravages in Canada. The consternation of the city is universal—Wall street and the Exchange are crowded with eager groups waiting for the latest intelligence—The Courier and Enquirer has issued an extra with every detail—the event, in short, appears to engross the whole attention of the public—I have never seen so general and wide-spread an excitement."—Wharton's Diary (M.S.), in N. Y. P. L. See also Henry's Diary, I: 56-57, 58; N. Y. Ev. Post, Je 18, 1832. See, further, Je 22, Jl 1, Ag 11, and O, 1832; and descrip. of Pl. 102-III: 601.

The mayor informs the common council that the U. S. senate has passed a law "ceding to John Jacob Astor Fort Gangesvort." The communication is referred to the law committee and counsel of the board, "with power to act."—Proc. App'd by Mayor, I: 228. A public dinner was ordered "in honor of Mr. Astor, for the benefit of the Public Health." It relates to quarantines regulations, with particular reference to cholera.—Laws of N. Y. (1832), chap. 33.

The famous Perkins Institution has its inception when Dr. July Samuel Gridley Howe begins to teach a few blind children at his father's house in Pleasant St., Boston. In 1831, the Massachusetts legislature contributed $200 to be used for the work, and Col. Thos. H. Perkins, a prominent Bostonian, presented his mansion and grounds in Pearl St. for the school. This house was later sold, and the institution moved to a large building in South Boston; it was thenceforth known as the "Perkins Institution and Massachusetts Asylum for the Blind." Dr. Howe was the director. He opened a printing-office and organized a fund for printing for the blind—the first done in America. In 1837, he brought the famous blind deaf-mute, Laura Bridgman, to the school. The institution became one of the intellectual centres of American philanthropy.—Encyclo. Brit., XIII: 857.

The Asiatic or malignant cholera makes its appearance in Cherry St., near James St. It continued until the last of October, a period of nearly four months. Its principal ravages, however, were July and August. "No deaths were reported for the month of May for the daily record of interments reported by the city inspector, see N. Y. As It Is, In 1833, 164. See also N. Y. Ev. Post, Jl 1, 1832 et seq.

Myndert Van Schaick, later a treasurer of the board of health, writing of the cholera, said: "... The numerous temporary hospitals in the City and its suburbs—perhaps as far out as 14th Sts. and the new Hall of Records [the old provost jail], used as a hospital, in the Park, were suffering from a deficiency of water. There was none for our streets, little for the extinguishment of fires except from the rivers—and scarcely any that was suitable for domestic use, save a very small amount from teawater carriers." It was this condition that eventually brought about the establishment of the Croton Aqueduct.—Report of the Aqueduct Committee of 1830, 125. This and previous epidemics hastened the settlement of the northern part of Manhattan Island where citizens sought refuge from the plague.—Report of the city inspector, in Docs., Bd. of Ass'rs, (1832), Doc. No. 43, p. 261. See, further, Ag 11. The cholera again visited New York in 1834, 1849, and 1853.—Man. Com. Coun. (1838), 652.

The freedom of the city "in a gold box" is conferred upon Commodore Daniel T. Patterson at the city hall. For an account of the ceremony, with editorial comment, see Com. Adv., Jl 3; N. Y. Gaz. & Gen. Adv., Jl 3, 1832. This was due to action of the common council on June 27, when informed of the commodore's presence in the city, on his way to take command of the naval forces of the U. S. in the Mediterranean. The freedom is conferred "in token of his distinguished gallantry during the late
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

1832
war with Great Britain, and especially for the consequent part he bore in the glorious achievement at New Orleans.—Proc., July
Mr. Dunlap has opened two galleries for the display of his numerous paintings at the Picturesque Museum, corner of Broadway and Anthony street.—N. Y. Eve. Post, Jl 3, 1832.

"My Country, 'tis of thee," having been composed in February by Samuel Francis Smith, a divinity student at Andover, is sung for the first time, at the Park Street Church, Boston.—Kohls. P. M. 1831.

"The alarm about the choler a has prevented all the usual publication under the public authority. There are no booths in Broadway, the parade which was ordered has been countermanded, no corporation dinner, and no ringing of bells. . . ."—Hone's Diary, I. 57-58.

The "Merchants Exchange Telegraph" sends word from Staten Island that the packet ship "New York" has arrived with Hon. Martin Van Buren on board.—N. Y. Eve. Post, Jl 5. Coming to the city in the evening, he declines a public reception (as proposed on Jl 6, 9, v. 7 as a festivity incompatible with the prevailing cholera.—Ibid., Jl 6, 1832. His "freedom" was not conferred until Nov. 21 (q.v.).

The plan of Messrs. Sullivan and Disbrow proposes a single deep perforation for each ward, to be managed by a company in each, and incorporated for that purpose. The plan, from the experiment in Bleeker street, appears to be feasible.—N. Y. Eve. Post, Jl 27, 1832.

This is observed as a day of fasting, humiliation, and prayer on account of the cholera epidemic.—N. Y. Eve. Post, Ag 2, 1832.

The inhabitants and the authorities of the towns on the Eastern seaboard have rendered themselves contemptible in the eyes of the whole world, by the unfeeling and rude manner in which they have treated passengers in the steamboats from this city, that have dared, since the pestilence broke out here, to approach within gun shot of any of the usual landing places on the rivers over which they had jurisdiction. In some instances they have been driven off and refused a landing at all—in others they have been compelled to go a shore a long distance below the towns and travel back to the village with their baggage, through river and corn fields, until they could reach the public road leading into the country. . . .—N. Y. Eve. Post, Ag 3, 1832.

The appearance which New York presents to one who views it [at] the present time from the highest of the Hudson or from the opposite shore of New Jersey, a spectacle scarce less unusual and solemn than to one who visits what were two months since its crowded and noisy places of business. The number of persons who have left the city is estimated at upwards of one hundred thousand people, including persons of all classes and occupations. So many domestic fires have been put out, and the furnaces of so many manufactories have been extinguished, that the dense cloud of smoke which always lay over the city, inclining in the direction of the wind, is now so thin as often to be scarcely discernible, and the buildings of the great metropolis appear with unusual clearness and distinctness. On a fair afternoon, the corners of the houses, their eaves and roofs appear so sharply defined as if the spectator stood close by their sides, and from the walls you may count the dormer windows in any given block of buildings. The various colours of the edifices appear also with an astonishing vivacity, while the murmur from the streets is scarcely heard.—Ibid., Jl 24, 1832.

On or about this day, William Dunlap wrote to J. Fenimore Cooper, who is in France: "The cholera [see Jl 1] appears to be leaving us and we begin to be reconciled to being killed. The city has been very much deserted and a great many are yet absent and hundreds of shops are shut up . . ."

"The Cholera . . . having spread over all the Country and treated every other Cities pretty much as it treats us, our streets are assuming the usual appearance of dollar bunting.—Correspondence of James Fenimore Cooper, ed. by his grandson (1877), with a letter from Wm. Jy to Cooper, dated Dec. 11, regarding the passing of the disease through the country.—Ibid., I.: 308. See, further, Oct.

"The Board of Health have at length announced that the city corner of Wall and Nassau Sts. For a brief history of the site, see description of Pl. 166, III: 848; also "City Hall (second)," in L. M. R. K., III: 973. See, further, S, 16, 1831.

The famous Revays make their American debut at the Park Theatre.—Brown, I.: 41-42; Ireland, I: 12-14.

"The chief engineer has been authorised "to procure horses for the fire-department." Engineers in London are so drawn. "The present mode has demoralized very many boys, who make a frolic of a fire, acquire habits of idleness and vice, and raise false alarms."—N. Y. Com. Adv., Jl 24, 1832.

"A proposition has been made by John L. Sullivan and L. Disbrow to supply the city with Rock water, procured from the earth by boring. Mr. Disbrow has obtained a patent for boring places on the island by boring in earth and in rock. The greatest depth of the perforations in earth is one hundred feet, and the water is stated by Mr. Sullivan to be better than that obtained from the wells, though it cannot be expected always to remain so pure as at present. In rock the perforations have been carried much deeper, and have produced pure soft water. In Bleeker street near Broadway, Mr. Disbrow has bored 448 feet, of which 400 are in solid rock. The water obtained, as we understand from those who have visited the place, is of the finest quality; quite pure and as soft as rain water. A steam engine, of a six horse power, is employed to raise the water from this perforation into the depths of the earth, and brings up 14,000 gallons in 24 hours. The plan of Messrs. Sullivan and Disbrow proposes a single deep perforation for each ward, to be managed by a company in each, and incorporated for that purpose. The plan, from the experiment in Bleeker street, appears to be feasible."—N. Y. Eve. Post, Jl 27, 1832.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1832 may be safely visited by strangers, and that those who have left it
Aug. from fear of the disease may return without danger. The ravages of
22 the epidemic have been so far stayed, that this measure has been expected for some days past. . . . Our business streets are again beginning to be thronged, the shutters of shops and ware-houses are thrown open, the rattle of drays and wagons is again heard, private carriages make their appearance in the streets, Broadway resumes from its two day somnolency of its former appearance, a general air of cheerfulness and confidence has succeeded the aspect of gloom which lately prevailed. . . .—N. Y. Ev. Post, Aug 22, 1832.

See also Ibid., S 3, 1832.

Bianca.—Hone mentions riding (from Albany) to Schenectady on the
Mohawk and Hudson railroad (see Ja 2).—Hone's Diary, I: 59.

This is a “two-De Witt Clinton” engine and train.—See 1831.

The original construction work was begun on the Bowery by first removing the cobble stone pavement, when a trench about 18 in. wide and the same in depth was excavated. At intervals of about 8 ft., holes were dug to a depth of 3 ft., in which were laid stone foundations upon which rested the ends of granite stringers from 12 to 15 in. square, upon which flat rails one inch thick were laid. These were secured by means of bolts passing through holes drilled in the granite stringers, and were held in place by bands on the under side of the stringer. A channel three-fourths of an inch deep was cut in the granite stringer on the inside of the rail to admit the flange of the wheel which was one and a quarter inches deep. The line was double track from Prince St. to 15th St. As soon as the tracks were laid to 14th Street the cars, some of which were built by the company while others were of English make, were put in operation. Owing to the rigid construction of the road-bed, the cars made a great deal of noise, which would be heard two or three blocks from the Bowery. This construction soon proved unsuitable owing to its rigidity. The blocks were taken up, and stringers of Georgia pine substituted, the granite stringers being sold to the City for gutter stones.—From data supplied by the company.

The fifth number of Views of New York, with illustrations, by T. S. Fay, has been issued by Peabody and Co. It contains two neatly engraved views—one of Broad street, with the Custom House in the distance, and the other of Holt's new hotel at the corner of Fulton and Water-streets. Besides these, there is a map of the city, colored to show the boundaries of the different wards.—N. Y. Ev. Post, S 13, 1832. This series of views is described under Pl. 102, III. 1: 699-703.

Charles Kemble makes his first appearance in America, at the Park Theatre, as Hamlet.—Hone's Diary, 59-60, 61, 62; Haswell's Reminiscences, 268.

Fanny Kemble appears for the first time in America, at the Park Theatre, as Bianca in Milman's "Faizo."—Hone's Diary, 62-63; Haswell's Reminiscences, 268.

A "Citizen" writes to one of the papers that "another street of equal beauty and convenience to the citizens with that of Broadway" is much needed. He suggests a "plan of continuing the third avenue nearly in a direct line down to the City Hall. That is, start from the north corner of Bond street, cutting off the end of Bleeker street, passing south-easterly by St. Patrick's Cathedral, directly to the corner of Chamber street, and there unite with Chambers street, lowering the street where it crosses Orange street, and elevating it about the Five Points and where it crosses Pearl street. "Opening such a street from the City Hall to the third avenue, of a width equal to Broadway, nearly on an inclined plane from Chatham street to the Bowery, it would form in a short time one of the most noble streets in the world, reaching in almost a direct line from the City to Harlem. Nassau street may also be improved, so as to make it very direct down to Wall street, and thence down Broad street to the East river."—N. Y. Ev. Post, S 22, 1832.

Trinity vestry, being informed of a new project (see 1831) to extend Albany St. through the churchyard, adopts a resolution disapproving of "the opening of any street through the said Cemetery," and appoints a committee to remonstrate against it.—Dix, Hist. of Trinity Church, IV: 157, citing the church Records, III: 78. See further, Ja 28 and F 9, 1832.

The inauguration of N. Y. University's first chancellor, Rev. Jas. M. Mathews, D.D. (see Ja 31, 1831), and the instructors, takes place in Clinton Hall, at the s. w. cor. of Nassau and Beekman Sts. —Morning Courier and N. Y. Enquirer, S 27, 1832. For the records of attendance of students, see Chamberlin's N. Y. University (1831), I: 61. Among Williams's "American Antiquities" (Edinburgh, 1831), 71, and has Haswell's Reminiscences, 467-68.

A season of grand opera, sponsored by Lorenzo Da Ponte, opens at the Richmond Hill Theatre. The performance is "Cenerentola."—N. Y. Ev. Post, O 6 and 8, 1832.

The mayor approves a joint resolution that $1,000 be appropriated "toward an examination upon this island and elsewhere, for the means of bringing an ample supply of pure water into the City of New York, under the direction of the Joint Committee on Fire and Water."—Proc., App'd by Mayor, I: 129-12, 285-86. This was the beginning of the proceedings to build the Croton aqueduct, the complete account of which, up to 1862, was told by Myndert Van Schaick, one of the Croton board, to accompany the report of the celebration held on the completion of the new reservoirs in Central Park, Aug. 19, 1852. See, also, O 12, 1832.

"The Old Pearl Street House in this city has been established for twenty-five years, and is extensively known as the resort of merchants. . . . During the present summer it has been greatly extended by the erection of spacious additional buildings . . . Its dimensions are 53 feet on Pearl, and 75 on Water street, and 144 feet from street to street. This street is covered with four story buildings, except a small court yard and a two story edifice on the roof of which is a flower garden. It is said to be the largest commercial boarding house in the United States . . . not being intended for the accommodation of families or ladies. . . . It is now kept by Messrs. Brown, of Clinton Co., and Mahon, late commander of the steamboat New Philadelphia. . . .—Ev. Post, O 26, 1832.

It is resolved to close the Fitzy Row road, between 25th and 30th Sts., and between 31st and 42d Sts.—Proc., App'd by the Mayor, I: 288.

Four clergymen of the Protestant Episcopal Church are consecrated bishops at a single service in St. Paul's Church. All the bishops of the American Church are present except Dr. Moore of Virginia.—Ev. Post, N 1, 1832. This is the only time this has occurred in the "American Church."—N. Y. Ev. Post, N 1, 1832.

In this month a brick market-house was completed on the Nov. Sixth Ave. site (see F), and the common council named it Jefferson Market after the third president of the United States.—De Voe, Market Book, 559; N. Y. Times, O 10, 1920; L. M. R. K., III: 599. It opened for business on Jan. 5, 1833.—N. Y. Ev. Post, Ja 4, 1833.

Andrew Jackson and Martin Van Buren, Democrats, are elected president and vice-president, defeating Henry Clay and John Sergeant, National Republicans. At this election, for the first time, all presidential candidates were nominated by national conventions.—McKee, National Conventions and Plataform, 7-12.

Two beautiful cars were placed on the Rail-way [N. Y. & Harlem R. R.] in the Bowery last week. On Saturday [Nov. 10] we saw them, each containing from 25 to 50 passengers carried off in fine style, with two horses to the car, and drawn with great apparent ease.—N. Y. Gaz. & Gen. Adv., N 12, 1832. See also N 26, regarding the first street-car. See, further, N 14.

Charles Carroll of Carrollton, last surviving signer of the Declaration of Independence, dies at Baltimore.—N. Y. Ev. Post, N 18, 1832. See also Ibid., N 17, 19, 1832.

"Harlem Rail Road, Thursday, to be a ride of thirty or forty rods on the Harlem Rail Road to-day, in the pleasure of which the Corporation is to participate. After the fatigues of the excursion, which, we believe will be along the whole line that is completed, say from Spring street in the Bowery, up to the Reservoir—which, if the horses are fleet, it will take them nearly two minutes to pass—there is to be a grand Rail Road dinner. It is expected that the stock will rise with every fresh huemer—but will fall
In 1832, the Harlem Railroad was completed from Prince Street to 14th Street and would be open for trial with the cars. The company, together with the Mayor, Corporation, and strangers of distinction, left the City Hall in carriages to the place of depot near Union Square, where two splendid cars each with two horses were in waiting. These cars are made low with broad iron wheels, which fit the flanges of the road after an improved model from the Liverpool and Manchester cars. They resemble an omnibus or rather several omnibuses attached to each other, padded with fine cloths, and handsome glass windows, each capable of containing outside and inside full forty passengers. The company was soon seated, and the horses trotted off in handsome style, with great ease, at the rate of about 12 miles an hour, followed by a number of private barouches and horsemen. Groups of spectators greeted the passage of the cars with shouts, and every window in the Bowery was filled. The distance was not far from the old residence or farm of Gov. Stuyvesant, ... Those who made violent objections to laying down these tracks, and fancied a thousand dangers to the passing traveller, now look at the work with pleasure and surprise. Carriages of all kinds cross and recross the road without impediment, unless a single objection to bringing it down to the Park or Bowling Green, except the temporary inconvenience of breaking the paving and laying down the stone abutment—Several sections of the Harlem Railroad are complete, and it is supposed that the whole line will be finished early in ensuing summer. The comfort and convenience of this road to our citizens and guests is far in excess of expectation. Instead of being confined to a single lot of ground and a close atmosphere in the city, an acre or two will be purchased and a comfortable house built at a reduced expense, a garden, orchard, dairy, and other conveniences follow; and the train of rail-road carriages will start from Trinity Church at 5 o'clock, and convey passengers to Harlem and the intermediate stopping places, with as much facility and ease as they are now used to Greenwich Village. These are a few of the advantages which this small undertaking promises; and, in fact, it will make Harlem the suburbs of New York. For fishing excursions to Harlem River, and pleasant summer rides, it is presumed the cars will be kept in constant motion.

"After the experiment, the company and guests dined at the City Hotel and terminated in a very agreeable manner, the first essay of New Yorkers on a road-road in their own city."—Morning Courier and N. Y. Enq., N 15, 1832.

"We were highly gratified on Wednesday last [Nov. 14], as we were passing up the Bowery, with a view of the beautiful Cars of the Harlem Railroad Company. We understand they were made by Mr. Parker, coachmaker, of this city. They are spacious and commodious, divided into three compartments, each so amply large enough for eight, and can accommodate very conveniently ten passengers—twelve to twenty passengers inside; and, when we saw them, there were at least, we should think, an equal number upon, and hanging round the outside, the whole drawn by two fine horses abreast, at the rate of ten or twelve miles an hour...."—Rail-Road Jour., I 737, cited by Danbur in A Hist. of Travel in Am. 1844-5. See, further, N 18.

"A plan has been set on foot for erecting a statue of President Jackson in this city, and subscription papers have been circulated for the purpose. The sculptor is Mr. Cusacki."—N. Y. Evst. Post, N 15, 1832.

"Harlem Railroad—A section of the Harlem railroad having been completed [see N 14], the members of the Corporation and other gentlemen were invited to take an excursion upon it yesterday [Nov. 18]. The morning papers profess themselves highly pleased with the road and the ride, and with the viands of the dinner with which, of course, the business was consummated."—N. Y. Evst. Post, N 19, 1832. See, for example, the Morning Courier and New York Enquirer, N 19, 1832 (in Society Library). See, also, N Y Evst. Post.

A public meeting is held at the merchants' exchange, and resolutions are adopted declaring the recent death of Sir Walter Scott. A committee is appointed to solicit subscriptions for a monument to be erected to his memory.—N. Y. Evst. Post, N 20, 1832.

The N. Y. & Harlem R. Co. begins to advertise the running of its cars: "The cars will run upon the rails from Prince Street to Fourteenth Street, in the Bowery, from 9 o'clock A. M. each fair day except Sundays, for the purpose of affording evidence to the public of the expediency of using rail-roads within the City."—Morning Courier and N. Y. Enq., N 20, 1832. See N 26.

The freedom of the gold box has been awarded to Martin Van Buren.—N. Y. Jour. of Commerce, N 22, 1832.

South Carolina adopts an ordinance declaring that the tariff laws of 1828 and 1832 are null and void in the state and not binding on its citizens. It threatens to secede from the Union if force is used to reduce the state to obedience.—McMaster, Hist. of the People of the U. S., VI: 145-50. On Dec. 10, Jackson issued a proclamation against the nullifiers.—Ibid., VI: 157.

The N. Y. & Harlem R. L. line is opened to the public for travel from Prince to 14th St., the depot, ticket-office, and superintendent's office being at 241 Bowery.—From chronology supplied by the secretary's office.

"The introduction of a street railway into New York City in 1831-32 created a new mechanical business in the metropolis—the manufacture of tramscars, as the English call them, for the use of such roads. In that business John Stephenson was the pioneer. He had recently finished his apprenticeship to a coach-builder, and began manufacturing omnibuses for Abraham Brower on his own account, when he received an order from the New York and Harlem Railroad Company to build a car for them. Mr. Stephenson constructed it after a design of his own, and named it John Mason, in honor of the first president of the company and founder of the Chemical Bank.

"This was the first street-railway car ever built. It was made to hold thirty passengers, in three compartments. The driver's seat was on the roof, and it had passenger seats on the roof, which were reached by steps at each end. It was a sort of cross between an omnibus, a rockaway, and an English railway coach, and had four wheels. This was first put on the road between Prince and Fourteenth streets, on November 26, 1832 [see also N 10, 14, 18 and 20], carrying the president of the road and the mayor and common council of the city of New York. For this car Mr. Stephenson received a patent from the United States Government." Some of his later models are described...

"... In 1836 he built a spacious factory in Harlem, and in 1843 he bought the land on Twenty-seventh Street, near Fourth Avenue, where his present establishment [1864] now is...

"The street-railway car is a purely New York product. It was in successful operation in that city for twenty-five years before it appeared in any other city of the Union or elsewhere...."—Losing, Hist. of N. Y. City, I: 492-3. Cf. N 14.

John Howard Payne having returned to New York after an absence of 20 years, a benefit in his honour is held at the Park Theatre.—N. Y. Evst. Post, N 21 and 30, 1832. On Dec. 1, a dinner was given for him—Ibid., D 3, 1832.

"The 1841 election is a elected mayor by the common council.—N. Y. Dec. Evst. Post, D 6, 1832.

"The two houses west of the U. S. Branch Bank in this city, and four in Pine street, have been purchased with the view of erecting a new Custom House, which, with the adjoining lots already occupied for that purpose, will make the building 104 feet on Wall and Pine streets, and 150 feet in depth. The building will, in addition to the offices for the Collector, Naval Office, and Surveyor, contain the Post office, the offices of the District Court and Judge, the District Attorney, the Marshal, etc. The price paid for the house and lot contiguous to the U. S. Bank it is said was $52,000."—N. Y. Evst. Post, D 8, 1832; N. Y. Gaz. & Gen. Adv., D 18, 1832.

On Dec. 25, it was said, "The new Custom House for the city of New York which is to be erected partly on the site of the present one, will be a spacious and commodious building, differing from the one we now have by bearing some proportion to the trade of this great mart of the United States. The ground lately purchased is 104 feet on Wall and Pine streets, by 200. It is intended to open an alley for light and air on the side next the bank, and thus leave a front of 50 feet to the building. The Secretary of the Treasury is procuring plans of the edifice from two of the first architects of the country—probably Strickland and Town may be applied to. The Material will probably be marble, which is now one of the cheapest for solid structures. The building will probably have spacious and convenient porticoes on Wall and Pine streets."—Ibid., D 18, 1832. See also ibid., D 21, 1832.

"The 'present' custom-house on this site, referred to above, had been..."
in use since 1816 (q.v., D 2), and stood on the site of the old city D 8 hall.

A Emmet’s monument in St. Paul’s Church-yard is now nearly completed. It is an obelisk of white marble, thirty feet high, hewn out of an entire block. On the side next to Broadway the monument bears near the top a bar relief likeness of the deceased. . . .

—N. Y. Ecc. Post, D 11, 1832. The monument was designed by Ingham.—Ibid., D 24, 1832. See also Emmet Monument, by Macenere, pub. by the Merchants Library.

A large public meeting is held in the Park, and resolutions are adopted approving President Jackson’s proclamation against the South Carolina nullifiers (see N 24).—N. Y. Ecc. Post, D 17-20, 1832.

Various extensions and branches of the Harlem R. R. are suggested by “A Constant Reader,” “... to embrace the whole city and island, all coming in at the heart of the City . . .” This writer is “indignant at the use of the road by carts and wagons, without leave or license.”—N. Y. Gaz. & Gen. Adv., D 20, 1832.

Col. De Witt Clinton, Jr., who had been sent, at the suggestion of Mynder Van Schalk, by the joint committee on fire and water of the common council to examine into the practicability of bringing water to New York City from the Croton River, reports in favour of this project. He proposes an open aqueduct at an estimated cost of $2,500,000—Cullen, Memoir Croton Aqueduct, 111; Man. Com. Coun. (1854), 219; Croton Aqueduct Report (1862).

See F 26, 1837.

The city permits the Manhattan Gas Co. (see Feb. 26, 1830) to lay gas-pipes in any of the public streets north of Grand St.—Proc. App’d by Mayor; J 139, C.F. 355, 1832. The contracts’ contract with the city was extended 20 years further. See Contract of the Manhattan Gas Light Company, with the Corporation of New York, to continue for twenty years, from 5 May, 1848, to 5 May, 1868 (N. Y., 1848).

1833

In this year, Great Britain passed the Factory Act, which prohibited “the employment in spinning and weaving factories of children under nine, made a maximum eight hour day for those from nine to thirteen, and of twelve for those from thirteen to eighteen. The bill also provided for the sanitary conditions of the factories, for a certain amount of recreation, education, and, most important, it created a system of factory inspectors, whose duty it was to see that this law was enforced.”—Hazen, Europe since 1815, 440-42.

In this year, Obed Hussey of Cincinnati received a patent for a reaping-machine. Cyrus Hall McCormick patented his harvester in 1834.—Butterworth, The Growth of Industrial Art (1892), Pl. 15. McCormick’s was the first practical grain harvesting machine but it was not until 1845 that the reaper was really introduced.—Smith, American, 254.

“Great improvements have been made within a few years, in the compact part of the City, by widening, opening and straightening streets, to remedy in some degree, the irregular and inconvenient manner in which the ancient part of the City was built . . .

Most of the buildings are of brick; and many of the warehouses of the merchants are not surpassed for beauty, spaciousness, and convenience, by those of any other city. The style of building, with granite and marble fronts to the basements, has been recently introduced, and is now almost uniformly adopted in the erection of warehouses . . . Some of the rows of houses in La Fayette-place, Bond-street, Bleeker-street, &c. may vie, for beauty and taste, with European palaces.

“... Pearl-street . . . is the principal seat of the dry goods and hardware business. Front and Water streets, between Pearl-street and the East River, are occupied principally by the wholesale grocers, commission merchants, and mechanics connected with the shipping business. South-street, running along the East River, contains the warehouses and offices of most of the principal shipping merchants. Wall-street . . . is occupied by the Baus, Insurance Companies, Merchants’ Exchange, Newspapers, and Brokers’ offices, being the seat of heavier money transactions than any other place in America. Canal-street . . . is a spacious street, principally occupied by retail stores . . . The Third Avenue, extending from the Bowery to Harlem, is Macadamized [see F 23, 1829], and is the principal avenue to the City from the east . . .

The streets are generally well paved, with stone or brick side walls lighted at night by lamps, and some of them supplied with gas lights.—New-York As It Is, In 1833 (ed. by Edwin Williams, author of the N. Y. Annual Register, and pub. by J. Disturnell, 1833), 12-13.

The brick building in the rear of the city hall, formerly the almshouse and more recently the “N. Y. Institution,” was at this time known as the “New City Hall” or “City Hall No. 2,” and contained the following public offices: In the west end of the basement, the watch house for the police; in the first story of the building, the police office, office of the clerk of the court of sessions, and district attorney’s office; on second floor, the sessions court-room, grand jury room, witnesses’ room, and petty jury room; at the “centre door,” the office of the almshouse commissioners, committee rooms, etc.; at the east end, the U. S. court rooms, clerk’s office, marshall’s office, and judges’ chambers; on third floor, keeper’s room.—Ibid., 14. By 1837, some changes had been made in this government.—Cf. ibid. for that year. See also the Dripps Map, Pl. 138, Vol. III.

“The New-York and Harlem Rail Road Company are now constructing a Rail Road to extend from Prince-street, in the Bowery, along the line of the Fourth Avenue, 7½ miles, to Harlem. The work will soon be completed, and the ride will doubtless be a favourite recreation for citizens and strangers.”—Ibid., C. F. 14, 18, 26, 1832.

At this time, the reservoir in 11th St. near the Bowery was in successful operation. For detailed description of it, see ibid., 18-19.

At this time, the National Academy of Design was occupying rooms in Clinton Hall.—Ibid., 55. The N. Y. Hist. Soc. occupied “spacious rooms in the building lately erected by the General Society of Eleemosynary, Esq., corner of Broadway and Chambers-street.”—Ibid., 56.

Among the many benevolent and moral institutions in New York at this time was this “New-York City Temperance Society.”—Ibid., 77. Two weekly papers, the Genius of Temperance, and the Temperance Advocate, were both published by W. Goodell and S. P. Hines at 126 Nassau St.—Ibid., 147.

At this time the custom-house extended from Pine to Cedar St near Nassau St.—Ibid., 117. This was an apparently temporary arrangement while construction of the new custom-house was under way, the initial plans for which were laid as early as Aug. 5 (q.v.).

In this year, there were 43 licensed lottery offices in New York City, paying $20 each in license fees, amounting to $11,205, one-half of which was appropriated, by law, to the public schools, and one-half to the N. Y. Institution for the Instruction of the Deaf and Dumb. After Dec. 31 (q.v.), all lotteries in the state were to cease.—Ibid., 159. See the law of Apr. 30, 1833.

The markets in New York at this time were:

Fulton Market, bet. Fulton and Beekman Sts., East River.

Washington St., bet. Vesey Sts., North River.

Catamarin, bet. at Catamarin St, East River.

Clinton, bet. at Canal and Spring Sts., North River.

Greenwich, bet. at Christopher St., North River.

Centre, bet. at Grand and Elm Sts.

Franklin, bet. at Old Slip, East River.

Essex, bet. on Grand St.

Grand, bet. at Grand St.

Gouverneur, bet. at Gouverneur St.

Tompkins, bet. at Bowery and Third Ave.

Manhattan, bet. at Rivington and Stanton Sts., E. River.

An unnamed, bet. at Greenwich Lane and Sixth Ave.

Weehawken, bet. West and Christopher Sts., N. River.

Ibid., 170.

Since 1827 (q.v.), the owners of the lots surrounding St. John’s Park have enclosed the square with an iron fence (see J 27, 1828), at an expense of $26,000, and adorned the interior with ornamental walks and shrubbery. At this time, the square was surrounded with “costly and valuable private dwellings, having St. John’s Church on its eastern side.”—Ibid., 179-80. The church itself is described. See also descrip. of Pl. 106-a, Vol. III; and L. M. R. K., Ill., 933.

“During the present year, 1833, a range of superb private residences has been erected on the north side of the square [Washington Square], and the name of the street, on the petition of the owners of those buildings, changed from Sixth-street to Waverley-place, in honour of Sir Walter Scott. A street, 75 feet wide, called ‘Washington-place,’ (formerly Fifth-street), leads from Broadway to the middle of the square; at the termination of which bet. [edits]
Washington Pl. and Waverly Pl. the site of the University of the City of N. Y. has been fixed. ’—Ibid., 1853.

"The Bowery Place was at the former junction, or 'fork,' of the Bowery and Broadway, distant 1.5 miles north of the present City Hall, was originally laid out by the commissioners who devised the plan of the upper part of the City, in an oblique and irregular form, comprehending the narrow strip of land lying between Broadway and the Bowery, extending as far south as Tenth street; and subsequently reformed so as to include only the triangle or point of land lying north of Fourteenth-street. Upon the petition of the proprietors of lands in that vicinity, the Legislature, in the year 1832, passed an act greatly altering and enlarging the form and dimensions of this square; so that Union-place now forms a spacious rectangular square, embracing (in addition to its former limits, north of Fourteenth-street) a large triangle on the east, carried out of the Bowery Place, as the triangular line lying west of the present Broadway or Bloomingdale Road. The whole of the land was taken from individual proprietors, at an expense of $213,516, which was assessed upon and paid by the owners of lands in the immediate vicinity.

"Its length, N. to S., from Fourteenth to Seventeenth-street, is 677 feet; and its breadth, from the east line of the Fourth Avenue, westward, 503 feet. Its area is upwards of two acres, being as large as the whole of the Park, and nearly three times as large as Hudson square. The City Corporation have recently directed all the buildings to be removed, and the area of the square to be reduced to the City line. It has been lately connected with Washington square by the extension and widening of Wooster-street, from Waverly-place to Sixth-street, which is hereafter called "Jackson Avenue."—Ibid., 180-81. The name University Place was adopted instead.—L. M. R. K., III: 1011, 1012. See Ap 22.

"Clinton Square, Laid out by an act of the Legislature, in the year 1833, upon the tract of low land in the north-eastern section of the City, called Stubyesant's Meadows, is situated between Avenue A, and B, and between Seventh and Tenth streets." This became "Chatham Square."—See Ap 9. "The expense of forming this square is to be levied by assessment upon the lands in the vicinity. It is directly connected with the elegant range of buildings in Eighth-street, called 'St. Mark's place.'"—Ibid., 182.

In a description of the city, James Stuart says, in part: "The neatness, lightness, and cleanliness of the hackney-coaches, which are numerous, and the rapidity with which they are conveyed, and all, whether for the conveyance of passengers or effects, are driven, were new to us. We saw no heavy horses for wagons or carts; all are driven at a trot.

"The hackney-coaches are only constructed for four persons, very nice-looking without and within, generally driven by Irishmen, or men of colour, who are, we found, as apt to overcharge strangers as the carriages. The carrying of two passengers, together supported on light iron frames; attached to the tops are curtilas of silk as well as of leather, which may be rolled up and buttoned, or let down at pleasure, so that the passengers may either have the space from the top of the carriage down to its middle altogether open, or enclosed with curtains of silk or leather.

"The number of foreigners from all countries is great. One hears the French and Spanish languages almost in every street. Smoking cigars seems universal during the warm weather in the open air, the inhabitants being seated on the street, near the doors of their houses, or in their porticos or verandas. . .

"Iced soda water from the fountain is the liquid in universal use by all descriptions of persons, and is admirably prepared,—theattachment is of general use, as it appeared to me, had ever tasted in warm weather. It is frequently mixed with a small portion of lemon syrup; the price threepence standing for a tumbler. It is prepared and sold in almost every street. The demand at the fountains is so great, that very large sums of money have been made by the manufacturers."—*Three years in North America* (N. Y., 1833), I: 22-32.

"In the Annals of the Edinburgh bookseller, on visiting New York in this year, made the following comment on the treatment of emigrants then in vogue:—"I passed two . . . encampments of emigrants in Washington street; some of them were lying huddled together under carts, some within the recesses of doors, and some on the bare pavement. I acquired of a good looking elderly woman who was lying on the pavement—her head bare, and her long grey hair fluttering in the breeze—how long it was since she landed; and she answered in German that it was six nights, and that her party had lain all that time on the streets. . .

"Weston describes Grant Thorburn, the seedman, "the original of Galt's Lawrie Todd." The description accords with the well-known cartoon of Thorburn by the English artist, Daniel Maclise, published in London, in 1873, in a *Gallery of Illustrious Literary Characters* (1850-1858), . . . accompanied by notices . . . by H. M. Maginn (from Fraser's Mag.). Weston gives a full description (the best extant) of Thorburn's store.—*The U. S. and Canada in 1833* (Edinburgh, 1836), 53-56, 65-57, 69.

In a description of New York, E. T. Cole makes the following comment about the present condition of the Lawrence monument in Trinity churchyard: "It is a most shabby, economical structure, but has been brick and faced with white marble. The column, of the Corinthian order, is broken at the base of the pedestal, and is in a very bad state. The parapet on the cap of the capital lying at the base of the pedestal, emblematic of his premature death. Owing to the summit being exposed to the weather, the rain has gained admittance into the interior of the brick-work, and has given the column a considerable inclination to one side. Some of the marble from one to two sides of that of the pedestal, have fallen down and exposed the shabby interior. Surely such a man deserves a monument of more durable material . . . —*A Subaltern's Farleagh* (N. Y., 1833), I: 152-56. For over six years the monument has been in this condition.—See Ap 2, 1853; Ap 10, 1856. See, further, Ag 17, 1844; 1847.

In this year, Wm. Chapin made a map of the city from the Battery to 125th St., and from the Hudson to the East River, which is hereafter called *The Bowery* (since the Brooklyn shore). See map No. 55, in bureau of topography, borough president's office.

In this year, Fourth Ave. was opened from 17th to 28th St;—Irving Place was opened from 14th to 20th St: Liberty Street was widened from Broadway to Greenwich St; and Wooster St. was widened and extended to 14th St.—*Man. Com. Cen.* (1857), 520-21; *Ibid.* (1863), 544.

In this year, the Bowery Amphitheatre, occupying Nos. 17-19, Bowery, was built by the Zoological Institute.—*Brown, Hist. of the N. Y. Stage*, I: 276; L. M. R. K., III: 98.

In this year, the two so-called "Colonnade Houses" were erected at 714 and 716 Broadway, which backed upon "Colonnade Row" on Lafayette Place. One of these, occupied by Philip House in 1876-7, was demolished in 1899.—See descrip. of Pl. 109-10, III: 605.

The following notes indicate some of the recent transformations in the city's cemeteries: The burial-ground of the French Episcopal church (in Pine St.—see L. M. R. K., III: 931) was occupied at this time by stores.

The Presbyterian church and burial-ground in Nassau St., between John St. and Maiden Lane (since sold to the Baptists), has been converted into stores and dwellings, the dead having been removed.

On the former burying-ground of the Lutherans, at the corner of Broadway and Rector St., which was purchased by Trinity corporation, Grace Church has been built (L. M. R. K., III: 931) with a parsonage-house in the rear. "To accommodate these buildings, they carted the bones in open box carts promiscuously, and fragments of bones and coffins were dumped into the North River. This was done in 1805 or 1806."—*The Presbyterian church in Wall-street emptied the contents of several private vaults about ten years ago. The new offices on Nassau-street stand on part of this ground. The Quaker and Friends' burying ground was dug up, and bones and rubbish carried off in carts. It is now Thorburn's Garden.* [*Vide infra.*]

"Christ Church, in Ann-street, sold to the Roman Catholics [L. M. R. K., III: 932]: Repaired, altered, and dug up.

The Brick Church, (commonly called Dr. Spring's Church), vaulted and dug up two or three times, and lately that been down the wooden lecture room, with content of the Corporation, and rebuilt it with brick, much enlarged it, dug up the bones and rubbish, and carried them off in open box carts.

"The Jews' ground, in Oliver-street, has also been dug up, and is now covered with buildings."—*N. T. Gen. & Gen. Adv.,* F 25, 1853; citing transactions of the Bd. of Ald., F 4, 1853 (Doc. X. 76).

On Feb. 7, "Humanitas" replied, concerning the Society of Friends, that "The remains were taken from the ground now
occupied by Thorburn, and carefully put in boxes, not with the “requisite”; none were densely deposited in a vault, built expressly for the purpose, in the burial-ground belonging to the Society in North-street. Part of this old burial-ground was converted into "a common cat-way."—Ibid., F 27, 1833.

In this year, when the two boards of the common council failed to agree on the purchase of Rutgers Medical College by this city, the assistants published their reasons by a description of the situation of the property.—Doc. No. 25 and 41, Ed. of All. and Assts., III: 145, 427.

In this year, the "Washington Grays" and the "City Guard" were organized. Later, the former became the Eighth Regiment, and the latter the Twelfth Regiment.—Chas. S. Clark, in the Env. Post, F 26, 1936.

In this year, was published Laws of the state of New-York, relating particularly to the city of New-York.—See copy in the N. Y. P. L.

In this year, the second American Monthly Magazine was established, by Herbert and Patterson, and subsequently edited by Park Benjamin. It terminated its career in 1835.—North, Newspaper and Periodical Press, 117.

At this time, Wm. S. Mount was a successful portrait-painter in New-York.—Dunlap (Goodspeed ed.), III: 265.

Jan. 1. Secretary of the Treasury McLane advertises for plans for the new custom-house to be erected at Wall and Pine Sts., offering a premium for the best design. The building will front on three streets, viz.: 88 feet on Wall street, on the South, the like extent on Pine street, on the North, and 188 feet on Nassau street on the West. On the East it will be bounded by an alley of about ten feet. It is proposed to be built of marble. . . .

"It is to be observed that the level of Pine street is 8 feet 6 inches above that of Wall street."—N. Y. Ev. Post, Ja 8, 1833.

The first penny newspaper, the Morning Post, is established by Horatio David Shepard, with Horace Greeley and Francis V. Story as partners, printers, and publishers. It survived only about one month.—North, Newspaper and Periodical Press, 89. See S. 3.

The new mayor, Gideon Lee, is inducted into office, succeeding Walter Bowne (see D 9, 1825). In his address on this occasion, at the city hall, he recommends, among other things, substituting stone for the wooden dock of the city.—Env. Post, Ja 8, 1833.

Lee was re-elected Dec. 4, 1833.—Courier and Enquirer, D 5, 1833. For a sketch of his life, see Man. Com. Com. (1853), 425-26; Losing, Hist. N. T. City, II 312. He was succeeded by C. W. Lawrence.—See My 13, 1834.

Holt's Hotel, a marble building, six storeys high, which Stephen Holt began to build in May, 1831, on land which he had purchased in May, 1837, is opened. It extends 100 ft. on Fulton, 76 ft. on Pearl, and 85 ft. on Water St. The top of the dome, 334 ft. high, commands a panoramic view of the city. It is called "a wonder of New York."—N. Y. Gaz. & Gen. Adv., S 12, 1832; Ja 4 and 5, 1833.

The building is remembered by many from the fact that, through its long, marble-paved corridor, and up one of its stairways, lay a fanfare of music from the Fulton St. station of the elevated railroad. It was demolished in 1902 (p. v.).

The board of aldermen makes record of the fact that: "New York, with a population of 220,000, does not possess one building devoted to scientific purposes." It proposes that the common council petition the legislature to release to them two lots of ground adjoining the New York Dispensary, in the possession of the state, to erect a building to accommodate the Lyceum of Natural History, the Mechanics' Society, the Mechanics' Institute, and the College of Pharmacy.—Doc. No. 68, Bd. of Ald., Ja 21, 1837.

The legislature passes an act enabling the High School Soc. of N. Y. to sell its real estate or make application for dissolution, as the benefit of the stockholders may require.—Laws of N. Y: (1833), chap. 9. See Ap 44.

The board of assistant aldermen approves a resolution of the aldermen for widening Pine St. and extending it to the North River through Trinity churchyard. This caused much comment and opposition.—N. Y. Ev. Post, Ja 26, 29, 30, 31, F 2, 4, 1834. The resolution was approved by the mayor "in direct opposition to public sentiment."—Ibid., F 9, 1833.

It is not easy to say whether the project of extending Albany street through Trinity Churchyard is regarded by the disinterested portion of our fellow citizens with more of surprise or indignation. Beyond doubt the City Corporation betrays on this, as they have betrayed on many other occasions, a most reprehensible disregard of Moral right, and of the true meaning of the laws, and a deliberate intention to make the best use of their time for the accomplishment of local and private interests and enterprises."—N. Y. Mirror, X: 253 (F 9, 1835). See also Ibid., X: 262-63. The intended extension of Pine St. through the churchyard was not put into effect. Another attempt was undertaken in 1847 (pp. v.), this time for the extension of Albany St. eastward through the churchyard.

Samuel B. Ruggles, having petitioned the board of aldermen to open Fourth Ave. from 17th to 23rd St., the street committee, after it had been reported that extensive improvements were in progress there, that expensive houses are to be built during the coming summer, and that the construction of the railroad has already opened the avenue, and it should be legally opened in the usual formal manner as a matter of record.—Doc. R, Bd. of Assts., Ja 26, 1833.

An old Dutch house in New St., near Wall St., said to be the last of the Dutch houses, is about to be pulled down. For wood-cut view of it, engraved by Anderson from a drawing by Davis, see N. Y. Mirror, X: 211.

Mayor Gideon Lee informs the board of aldermen that he has signed the resolution providing that, "in the extension of Canal street, the gore formed by the intersection of said street with Orange and Centre street, be thrown into the public street."—Mayor's Messages (1837), 23. This gore became Harry Howard Square.—L. M. R. K., III: 970.

A petition is introduced in the legislature praying that the village of Brooklyn be incorporated as a city.—Assem. Jour. (1831), 264. The bill passed the assembly but failed in the senate. Brooklyn was made a city on April 8, 1834 (p. v.).

The city acquired by condemnation proceedings the land now comprised in Paradise Park, at Park and Worth Sts. and Mission Place (168.1 by 156.3 by 92 ft.).—Prendergast, Record of Real Estate; L. M. R. K., III: 971. This "Five Points Triangle" was fenced and sodded with grass in this year, and was then called "Mission Square." It is now known as Paradise Park.—L. M. R. K., III: 971.

Philip Hone presides at a public meeting, held in Tammany Hall, at which resolutions are adopted protesting against the franchise given to the N. Y. & Harlem R. R. Co. (see Ap 25, D 22, 1831; F 1 and My 10, 1832), and expressing opposition to "Railroads in the midst of our dense population as dangerous to the personal safety of our families and ourselves. . . ." The resolution asks that the legislature reject the bill now before it which grants further privileges to the company, and repeal the law of the last session. They "disapprove of the permission already extended by the Common Council to said Company, to make said Rail-Road from Twenty-Third to Prince street." A standing committee of three from each ward is appointed, with power "to call general meetings, and to take such measures as may be prudent and wise for the great interests of the state."—L. M. R. K., III: 971.

The committee is to meet at the same place on Feb. 19. The resolutions are to be printed and copies sent to the legislature and common council.—N. Y. Com. Adv., F 16, 1833. See, further, Je 10.

Commenting on an application to the common council for an appropriation of $500 "to carry on the working of 61st street," one of the newspapers says: "The same principle is at work here as in the case of the road made a year or two since from the Third
Avenue at Yorkville to Hellgate ferry, whereby a most beautiful visit to the county seat of a certain Alderman on the opposite side of the river is also possible at the public expense. The first street, not road, passes through that property formerly called Smith's Folly, a part of which was lately bought and is still owned, as we are informed, by a member of the Board of Assistant Aldermen. If this kind of legislation is to be gone on unchecked, there will be no safety for property in New York than in the most despotic country in the world. . . .—N. Y. Evc. Post, F 19, 1833. See also Ibid., F 25, 28, Ap 30, 1833.

The legislature passes an act for the appointment of five water commissioners for the city of New York. They shall examine and consider "all matters relative to supplying the city of New-York with a sufficient quantity of pure and wholesome water for the use of its inhabitants, and the amount of money necessary to effect that object." The act continues that they are required to report which, in their opinion, is the best plan for furnishing this city with the desired supply of water, and their estimate of the expense involved in carrying it out. They shall present a copy of this report to the common council on or before Nov. 1 in this year, and to the legislature on or before the second Monday in January, 1834. The act shall continue in force for one year. The expenses incurred under this act shall be paid by the common council. —Laws of N. Y. (1831), chap. 36.

The act was drafted by Myndert Van Schaick, member of the state senate from this city. The commissioners appointed by the governor were Stephen Allen, Wm. W. Fox, Saul Alley, Charles Dunnsberry, and Benjamin M. Brown. In the discharge of their duties, they employed George White and Maj. David B. Douglass to make the requisite surveys. White was prevented by sickness from performing his portion of the work, and it devolved on Maj. Douglass to make the necessary examinations. On June 5, the common council appropriated $5,000 for the work. —Doc. 12, Bd. of Ald., Ap 1, 1836; Colden, Memoir Croton Aqueduct, 115; Man. Com. Coun. (1844), 219. See N. Y. T., 1831.

A dramatic festival in honor of Wm. Dunlap, the artist and author, is held at the Park Theatre. —Eve. Post, F 28, Mr 1, 1833; The Knickerbocker (Mag.), I: 323–29.

President Jackson signs the Force Bill and the Compromise Tariff Bill. —McMaster, Hist. of the People of the U. S., VII: 163–68.

The legislature passes an act to terminate 9th and 10th Sts. at Sixth Ave., instead of continuing them west of Sixth Ave. as shown in the Commissioners' Map of 1811—Laws of N. Y. (1831), chap. 49.

The common council resolves that the street lying between, and parallel to, Third and Fourth Aves., extending from the north line on the south, be opened, regulated, and named Irving Place in honour of Washington Irving. —Proc., App'd by Mayor, I: 380; II: 206, 238.

The name of Sixth St., from Broadway to Christopher St., is changed to Waverly Place. —Proc., App'd by Mayor, I: 384–85.

The mayor signs a resolution that the commissioners of the almshouse cause to be prepared stone blocks and broken stone for the purpose of laying 400 ft. in Broadway, south of Canal St. —Mayor's Message (1831), 41.

Audubon is at work on his Birds of America. Howe describes it. —Howe's Diary, I: 73.

Alderman Manlove presents the following resolution to the board: "That the Superintendent of Repairs be directed to point out to the East River commissioners the more fully described side of this building [the city hall] white." The board adopts it, and directs that it be sent to the board of assistant aldermen for concurrence. —Proc., Bd. of Ald., IV: 349. The assistants laid the resolution on the table. —Proc., Bd. of Ald., IV: 403. The resolution was opposed by "Civis" who stated that the "north front of this building is allowed by good judges to be in better taste than any of the noble edifices in this city." —N. Y. Evc. Post, Ap 3, 1833; See Mr 15, 1830, when the work was actually contracted for and accomplished.

Wooster St. is continued north from 8th to 14th St., striking the southwest corner of Union Place, and is widen'd in part—Laws of N. Y. (1831), chap. 98; Ibid. (1834), chap. 174. This extension became University Place.—L. M. R. K., III: 1011, 1012.

The city acquires by condemnation proceedings, at a cost of $116,691, the 3.43 acres comprising Union Square (see Ap 5, Apr. 1832) —Prendergast, Record of Real Estate Owned by the City of N. Y. (1814), 49. See Ap 30, 1832.

From April 9 to 15, the annual election for aldermen and assistant aldermen took place in all the fifteen wards.—N. Y. Eve. Post, Ap 12, 1833.

The legislature passes an act creating a public square out of "all the land in the eleventh ward of the city of New-York, bounded northerly by Tenth-street, easterly by Avenue A, southerly by Seventh-street, and westerly by Avenue B," the name of which shall be given by the common council. —Laws of N. Y. (1833), chap. 150. This became Tompkins Square (see Jl 30).

"Steel pens have lately been brought to market in great variety. They are all patent, and some of them have the double patent. . . ." —N. Y. Eve. Post, Ap 11, 1833, citing Jour. of Com.

The Jewish synagogue in Mill St., rebuilt in 1814 (6½ ft.), is sold. A new synagogue is erected on the western side of Crosby St., between Spring and Broome Sts.; this was consecrated in 1834. After the great fire of 1835, Mill St. ceased to exist as such, but South William St., which is Mill St. widened and extended, took its place. —Publications of the American Jewish Hist. Soc., No. 6, 1835; Wilson, Mem. Hist. of N. Y., IV: 381. See further, Jl 1, 1835.

The common council orders "That Union place [see Ap 4] be opened on the 1st day of May next, and that the buildings and incumbrances thereon be removed thenceforth within thirty days thereafter, and that the same be graduated to the city line, under the direction of the Street Commissioner," for which purpose a collector is appointed. —Proc., App'd by Mayor, I: 406. The square was opened in this year.—L. M. R. K., III: 97–105.

The legislature incorporates the "Am. Seamen's Friends Society." —Laws of N. Y. (1833), chap. 195. The objects of this society were very similar to those of the Y. M. C. A. of to-day. Among the incorporators were Amos G. Phelps, Stephen Van Rensselaer, and other public-spirited citizens of New York.

The legislature incorporates the Greenwich Savings Bank (cf. Ap 17, 1830) —Laws of N. Y. (1833), chap. 215. This bank was first opened at No. 12 Carmine St., where it remained until 1839, when it removed to No. 11 Sixth Ave. It has continued on this avenue ever since, having moved successively to No. 41 in 1846, to No. 75 in 1854, to No. 246 in 1892, and to its present building, extending from Sixth Ave., to Broadway, in 1924.—See inscription on the architecture of present structure.

The "Mechanic's" Institute of the City of New York is incorporated by Alex. Masterton, Geo. Bruce, and others, with the object "to diffuse knowledge and information throughout the mechanical classes; to form lectures on natural, mechanical and chemical philosophy, and other scientific subjects; to create a library and museum, for the benefit of mechanics, and to establish schools for the education of their youth." —Laws of N. Y. (1833), chap. 209. This was not the General Society of Mechanics and Tradesmen, which survives to-day (see 1821, etc.), and which, in 1832, had a school in Crosby St.—See N. T. At It Is, in 1833 (pub. by Disturnell, 1833), 45; Annals of the Society (1882), 5 § 96, 105. The Mechanics Institute was founded in 1831, and its work—"The American School for Mechanics"—was continued in N. Y. At It Is, in 1833 (pub. by Disturnell, 1833), 10–11, in which latter year it occupied rooms in the basement of the city hall, where it was also in 1839 (see ibid. for 1839), 110.

The senate and the assembly, each by the two-thirds vote required by the constitution, propose to the people an amendment providing for a popular election of mayor hereafter in the city of New York.—Laws of N. Y. (1833), 514–15. This amendment was ratified by the electors, on Nov. 4–6 (9½).

The City Hotel, a "vast structure" on the west side of Broadway between Cedar and Thames Sts., a "splendid edifice, long known, and universally popular, as one of the best hotels in the country," is partly destroyed by fire. It is the scene of a thrilling rescue. The attic and top story are gutted, and the contents of the building ruined. The hotel contains "one of the most spacious
1832 and elegant apartments in the United States, chiefly used for public dining rooms, balls, and concerts.—N. Y. Com. Adv., Apr. 25, 1833; Costello, Our Firemen, 216. Enlarged and improved, it was reopened July 16, (See My. 15.

16 The legislature passes an act "in commemoration of the services and in honor of the memory of George Washington." A large number of ward delegates, together with the mayor, recorder, and presidents of the two boards of the common council, are made directors of a corporation entitled "The New-York Washington Monument Association." This body is to continue for a term of 30 years. Its capital shall be $500,000, collected by subscription, grant, devise, or otherwise. Until required for this object, the association shall invest the money so collected in "U. S. government or state or city stocks, or stocks of the city of New-York," or shall deposit it in, and make loans to, "any of the banks of this state, or to the life insurance and trust company of the city of New-York." As soon as $75,000 shall be collected, the association "may cause to be erected, in such part of the city of New-York as the contributors may by vote or otherwise direct, a monument in commemoration of the esteem and deep feeling of veneration entertained by the citizens of New-York, for the character and memory of George Washington." Other provisions of the act are: "Nothing in this act contained shall be construed to prohibit the disposing of moneys for models and drafts, and other necessary and preparatory measures, previous to the said amount of fifty thousand dollars being collected;" also "The said Washington monument shall not be placed or erected in any of the streets or public squares of the said city, without the consent or approbation of the corporation of the said city."—Laws of N. Y. (1833), chap. 413. See also 1830; and D. 51.

17 The legislature modifies the Commissioners' Plan by introducing two new avenues in the Twelfth Ward. These, as afterwards named, were Lexington Ave. (from 30th to 34th St.) and Madison Ave. (from 33rd to 42d St.)—Laws of N. Y. (1833), chap. 309. See 1838.

18 A fire at Bank and Hudson Sts. destroys about 70 buildings.—N. Y. Evac. Post, May 1, 2.

May We do not believe that the people of this city are prepared to see the beautiful park which has so long been the pride and ornament of New York broken up, its railings prostrated, its trees felled, and its spacious area covered with blocks of buildings. This is the scheme of some projectors, among the wild plans which the present rage for speculation has produced, but we venture to predict that it will not take. There is already deficiency of public squares in the lower part of the city for the purposes of health and refreshment. —N. Y. Evac. Post, May 9, 1833. It is proposed to remove the custom-house to the Brooklyn landing, and the city hall to Union Square.—ibid, My. 9 and 10, 1833.

10 A proposal to sell the city hall and the adjoining ground to the federal government for a custom-house for $500,000 is rejected by the board of assistant aldermen.—N. Y. Evac. Post, My. 11, 1833. See also ibid, My 13, 14, 15, 16, 17, 1833.

13 A traveller, writing of his tour through the U. S. in 1832-3, says of the trans-Atlantic packets: "The packets used for Liverpool, London, and Havre, are like floating palaces. The utmost ingenuity has been taxed to render the arrangements most perfect; the accommodations of every kind most admirable. ..." He describes the Astor House in detail; and refers to "the splendid range of mansions erecting called La Fayette terrace" (error for La Grande Terrace—see p. 102-1, Vol. III) which are "buildings like the terraces in Regent's Park."—A Brief Account together with Observations made during a visit in the West Indies, and a tour through the U. S. A. 1832-3, by Dr. Thomas Ralph (Dundas, Upper Canada, 1836), 79-83.

The delightful situation at the Shot Tower (the mansion of the late George Yarke), kept as a house of entertainment by Mr. Hilton" in 1831, and closed in 1832, is opened for the season of 1833.—Costello, Our Firemen, My. 14, 1832. The place is a manufacturers' shothouse, see L. M. R. K., III: 693; and Pl. 102-3, Vol. III.

15 The City Hotel, like a Phenix ... is rapidly rising from its ashes, and is assuming an appearance of greater beauty and soaring to a grander height, than before the late confagration. In planer prose, carpenters, masons, &c. are actively at work repairing that building, and adding another story to the lofty pile."—N. Y. Evac. Post, My. 15, 1832. See Ap 25.

The N. Y. & Harlem R. R. is completed from 14th to 24th St.—For chronology supplied by the company. See further, 1834; and June, 1834.

President Jackson visits New York. He reached Perth Amboy from New Brunswick by the steamboat "New York;" and was conducted with his suite on board the steamboat "North America," which went from this city to Perth Amboy to meet him. Arriving at Castle Garden at about five o'clock, the Garden was "filled to overflowing" when he was welcomed by the mayor "amid the shouts of spectators, and the roaring of artillery." He mounted a horse and reviewed the troops; then started in procession for the city hall. "Just after the President had crossed the bridge, which connects the garden with the Battery, being filled at the moment with the Procession, it gave way, and carrying with it the two ticket offices standing on each side, fell into the water below. Gen. Jackson mounted, had that moment cleared the bridge, and was but fifteen or twenty feet from it when the accident occurred."

The end of the bridge resting on the battery wall gave way and fell into the shallow water resting on the loose stones below. The procession was thus cut off, leaving only about twenty persons behind. Gen. Jackson, and a large number of people were upon the bridge at the moment, and were thrown in a mass, into the shallow water. How it happened that no lives were lost and no more injuries incurred, it is very difficult to imagine."

The president alighted at the city hall, and was conducted to the governor's room, where he was received by Gov. Marcy and his military suite. "Shortly afterwards he made his appearance at the custom house, and sauntered along the waterfront streets adjacent. About sunset he proceeded with the Vice President and Governor Marcey to the American Hotel where lodgings were provided for him. ...—N. Y. Com. Adv., Je. 15, 1833. See also Hone's Diary, I: 76-77. The repairs to the Castle Garden bridge cost $666,95.—Mayor's Message (1834), 146.

President Jackson receives several thousand ladies at the city hall, and visits the Brooklyn shore at the evening. He goes to Tammany Hall.—N. Y. Evac. Post, Je. 14, 1833.

After a short visit to New Jersey, President Jackson is waited upon at the merchants' exchange by the Chamber of Commerce. He later visited Castle Garden, rode through several streets of the city, and went to Niblo's Garden.—N. Y. Evac. Post, Je. 15, 1833.

The celebrated Indian chief, Black Hawk, and his companions, the prophet and his son, now occupy the place in the public curiosity which General Jackson filled during his recent visit here. They arrived yesterday [June 14], and witnessed the ascent of the balloon from the steamboat in which they arrived. They are in charge of Major Garland of the United States Army. The crowd was so great that they found it impossible to land and enter the garden as was expected. They were afterwards taken to their lodgings at the Exchange Hotel, in Broad street. ...—Hone's Diary, I: 77.

President Jackson leaves New York for Bridgeport.—N. Y. Evac. Post, Je. 15, 1833.

"A New-Yorker" writes to the editors: "There is no city in the United States, which, in my opinion, presents so many delightful and pleasant retreats, and so easy of access, as New York. We have our Hoboken, Weehawken, Bath, Coney Island, Flushing, &c. &c. But I know of none which combines more beautiful scenery than the Thatched House Garden at Jersey City. ..."—N. Y. Gm. & Adv., Je. 20, 1833.

The mayor signs a resolution to fence in the triangular piece of ground at the Five Points with paling, and that it be laid with grass. —Mayor's Message (1833), 82.

A board of health is established consisting of the mayor, aldermen, and assistant aldermen.—Proc. App'd by Mayor, II: 15.

"The celebrated Colonel Burr was married on Monday evening July 1 [1] to the equally celebrated Mrs. Jumel, widow of Stephen Jumel. He is benevolent in her to keep the old man in his latter days. One good turn deserves another."—Hone's Diary, I: 78. See also def. of 30, My. 18, 1833.

James Boorman gives to the N. Y. Institution for the Blind (see Ap 21, 1831; Mr. 15, 1832) a lease of the premises on the east side of Ninth Ave., between 33d and 34th Sts.—Libar Deeds, CCCIV: 202; Laws of N. Y. (1836), chap. 246, 399; L. M. R. K., III: 955. By October, the institution was established in buildings standing
chronology: invention and prosperity: 1815-1841

5

Advertisements for contracts will be issued and building operations commenced immediately.—Eve. Post, Ag 5, 1833. The original perspective water-colour view of this building, by A. J. Davis, to its partner, and one of the finest early American architectural drawings in existence, is now in the possession of Mr. J. Pierpont Morgan. It came from a splendid collection of several hundred drawings by Davis, acquired in 1924 by the Metropolitan Museum of Art from Mr. Jos. B. Davis, a grandson of A. J. Davis. See, further, S 2, 1833: Jl 4, 1834.

6

The improvement which has recently taken place in the domestic architecture of this city, as respects external form and symmetry, has been the subject of remark by strangers. A style less tawdry and more in consonance with the rules of good taste has been introduced. Those ugly projections from the roofs, called dormaunt [i] windows, which in many streets disfigure almost every private building, have been generally banished from the new edifices. No one can hesitate as to the fine result which results from a simpler construction of the roof, who gives a single glance at those noble blocks of buildings which have been erected around Washington Square and elsewhere within a short time.

7

There is still in many places too much disposition among those who put up houses to build in a different style from their neighbors. A modern dwelling of three stories in height, and of the ordinary width, out of all proportion for a single building. Standing by itself it is a steeple rather than a house, and should be connected in a block with two or three others of the same height and of a uniform architecture, in order to possess a proper symmetry. Another improvement which we should be glad to see carried into effect, is the employment of a material and more durable material in building. It is receded to the honor of Augustus that he found Rome of brick and left it of marble. There is scarcely any kind of stone, the effect of which in building, even when rudely hewn, is not superior to brick [i]. But to erect public buildings, intended for the use of successive generations, of such a frail and perishable material as brick [i], is decidedly in bad taste.—N. T. Eve. Post, Ag 7, 1833. See also 1831, supra.

8

The case of Bogardus vs. Trinity Church "has been decided by the Chancellor in favor of the Church—all the objections raised to the plea setting up the Church title under the title of Queen Ann, and the subsequent uninterrupted possession, being overruled. The complainants have a right to reply to the plea, by denying the facts contained in it, and unless this be done within thirty days, the bill is to be dismissed."—N. T. Eve. Post, Ag 9, 1833, citing American. The Trinity Church Pamphlet (collected for the corporation, 1827), relates to events of subsequent date in connection with Trinity's claim of title, which, from time to time, has been in dispute in the courts and legislature. See index under "Bogardus, Armetje Jane."

1833

July

5

The Red Rover—A magnificent new omnibus . . . has made its appearance recently in Wall-street, drawn by four beautiful and spirited corps. Its route and hue seem to justify its title; it is of rich crimson, tastefully gilded, and its course is through Chatham-street and the Bowery to Fourth-st., thence across the city to Military Hill, Sixth Avenue, and then down to 271 Bleeker-street . . . The route is performed every hour . . .”—N. T. Gaz. & Gen. Adv., Ag 30, 1831, citing the Standard. See also Ap 16, 1831.

10

Several meetings have been held in different wards of this city, at which resolutions have been passed in favor of altering the Custom House up town and widening Nassau street . . . The object of getting up these meetings is manifestly to make a show of public opinion in favor of the project. We protest, however, against their being taken as any evidence of public opinion . . . Those who are honest in favor of the removal of the Custom House are well known to be speculators, persons
who own property up town, the value of which they think will be
enhanced by having a Custom House in their neighborhood, and
men who will make themselves popular by their zeal in the
upper wards.

"Should the Custom House be removed, it is clear to us that
those who expect to be benefited by it will be disappointed. It
will not change the seat of business for the city, and of consequence
will not increase the value of property in the upper wards as it
is usually imagined. The merchants will not leave their old and con-
venient places of business in the neighborhood of the wharves and
of Wall street and the Exchange. . . . The place in which the
business of the city was transacted for years before the revolution is
the place in which it is transacted still, and is likely to be so for
half a century to come. . . ."—N. T. Evoc. Post, S. 2, 1833. See
also ibid., S. 4, 7, 10, 11, 12, 16, O 26, 25, N. 4, 27, 29, 1834.

The publication of The Sun begins. It was a daily, and the
first successfully established paper which sold for a cent. The
publisher was Benjamin H. Day.—See the first issue; also North,

16

The boundary-line between New York and New Jersey is
settled by treaty. Ellis and Bedloe's Islands were on the Jersey side
of the line, but New York retained jurisdiction.—Gerard, City of
Water Rights, 66-69. See F. 2, 1834.

18

The mayor transmits to the common council a letter from the
secretary of the treasury signifying the intention of the U. S.
government to adopt measures for erecting a custom-house at
the north-east corner of Wall and Nassau Sts.—Mayor's Message
(1833), 101. See, also descrip. of Pl. 166, III: 848. See, further,
F. 27, and 144, 1834.

The government added to the property, taken for this purpose,
two lots, Nos. 3 and 4, which had been acquired respectively
by the Delaware & Hudson Canal Co. in Dec., 1832 (Liber Deeds,
CCXC: 292), and from the National Bank, in Jan., 1833 (ibid.,
CCXC: 462).

18

President Jackson reads to his cabinet an elaborate paper,
drafted by Att'y Gen. Taney, setting forth his reasons for deciding
upon the removal of government deposits from the U. S. Bank
after Oct. 1. Secretary of the Treasury Duane refused to give
the order or to resign, and he was therefore dismissed, Taney
appointed in his place, and the deposits removed to certain state
("pet") banks. This caused great agitation throughout the
country, and Jackson was censured by congress.—Macaulay,
Select Docs., etc., 289-303, 306-17.

19

The "specification of the materials and mechanical execution
of the proposed new Custom House in this city" is described.—
N. T. Evoc. Post, S. 19, 1833.

20

"The pavement of that part of Broadway between Barclay and
Murray street is now taking up, under the direction of the city
authorities, for the purpose of trying the experiment of Macadam-
ised pavement in this place."—N. T. Evoc. Post, S. 20, 1833. "It is,
we believe, the first attempt in this city in macadamising . . ."—
N. Y. Mirror, XI: 119.

25

The Evening Star, published by Messrs. Noah and Gill, makes
its first appearance.—N. Y. Evoc. Post, S. 26, 1833.

26

Congress having failed to erect a monument to Washington in
accordance with its resolutions of Aug. 7, 1785 (q. v.) and Dec. 24,
1799, a public meeting is held in the city hall at Washington, D. C.,
to take up the matter and carry it into execution by means
of private subscriptions. This meeting resulted in the organization
of the Washington National Monument Society whose object was
the erection of a "great National Monument to the memory of
Washington at the seat of the Federal Government." Contributions
were at first limited to one dollar, but this restriction was afterwards
removed. The progress of the fund was very slow, and it was
not until 1848 (q. v., J. 31 and J. 4) that enough money was raised
by the society in commencing work.—Harvey, Hist. of
(1893), 12-41.

Oct.

2

An "Anti-Slavery Society of New York" is formed, and abolition
rises braving. The following are the principal incidents. On
Sunday, Sept. 29, the following notice was given from the pulpit of
the Presbyterian churches, and on Oct. 1 and 2 was published in most of the daily papers: "The friends of immediate abolition of slavery in the United States are requested to meet at Clinton Hall on Wednesday evening, 2d October, at half past
seven o'clock, to form a New York City Anti-Slavery Society.

Committee: Joshua Leavitt, John Rankin, William Goodell, Oct
William Green, Jr., Lewis Tappan.

2

The following placard is posted: "Notice to all persons from
the South.—All persons interested in the object of a meeting called
by J. Leavitt, W. Goodell, W. Green, Jr., J. Rankin, and L. Tappan,
at Clinton Hall, this evening at seven o'clock, are requested to
attend at the same hour and place. [signed] Many Southerners
are not. All persons who may feel disposed to manifest the true
feeling of the State on this subject are requested to attend."—

The trustees of Clinton Hall, becoming alarmed, refused to open
the hall (see Howe's Diary, 1: 79). The organizers of the society
therefore met, 53 in number, in the Chatham Street Chapel, of
which Rev. Chas. C. Finney was minister (which stood just east of
the present Broadway). The meeting ended in being called an
organized and adjourned. The crowd that had gathered at Clinton
Hall, hearing this, rushed to the chapel, but were just too late.
Garrison, then 28 years of age, was among the organizers.—See
William Lloyd Garrison, 1805-1879, by Wendell Phillips Garrison
and Francis Jackson Garrison (Boston, 1894), I: 382.

The next day, the Governor makes a call on the organizers of the
opposition meeting under the heading, "Great Public Meeting.
The Agitators Defeated! The Constitution Triumphant." Those
opposed to the anti-slavery movement, it appears, assembled on
the zd, organized, and adjourned to Tammany Hall, not less than
5,000 being present, who adopted the following resolution:

"Resolved, That our duty to the country, and our Southern
Brethren in particular, render it improper and inconsistent to
argue a question pregnant with peril and difficulty to the
common weal.

"Resolved, That it is our duty as citizens and Christians to
mitigate, not to increase the evils of slavery by an unjustifiable
interference, in a matter which requires the will and cordial
concourse of all to modify or remove.

"Resolved, That we take this opportunity to express to our
Southern brethren, our fixed and unalterable determination to
resist every attempt that may be made to interfere with the rela-
tion in which master and slave now stand, as guaranteed to them
by the Constitution of the United States."—Morn. Cour. and N. T.
Enquirer, O 3, and 0 4, 1835. See also Winsor, VIII: 287;
McMaster, VI: 180.

Mayor Lee sends a communication to the common council
recommending that the payment of the village of Brooklyn to become
a city. He recalls the fact that the application was not voted upon
favourably at the last session of the legislature (see F 8), but will
undoubtedly come up again at the next session. He questions if
"two commercial cities, under two distinct and separate govern-
ments, located on one harbour, may not prove to be mutually in-
jurious," and he recommends the subject be submitted to the con-
sideration of all, at Washington hall, at a special meeting to be
held on the 31st of this month, at which time the matter will
probably come up for discussion.—Dec., Bd. of Ald. (1834),
III, Doc. No. 30. A special committee was named and a report
submitted (see Ja 6, 1834).

Henry Clay arrives in New York. On Oct. 16, he was visited
at the city hall by the Chamber of Commerce and the merchants
and attended the performance at the Park Theatre. An offer of
a public dinner was declined.—N. T. Evoc. Post, O 17 and 17, 1835.

Leggings were prepared for him at the American Hotel—Howe's
Diary, 1: 80.

The common council resolves to use the triangular block
of ground, bounded by Canal, Hoboken, West, and Washington Sts.,
on which to build a market for country produce, as part of Clinton
Market (see D 8, 1828). This was made ground, a part of which
was used at this time as a place of deposit for fuel for the city's poor,
and another part for paving-stone.—Proc., App'd by Mayor, J: 57-
8; De Voe, 510. An aggregate of $4,455 was appropriated the
next year to carry the resolution into effect.—Ibid., II: 253, 270.

In the advertising columns of the Evening Post of this day and
several days following appears an "Address of the New York City
Anti-slavery Society [see O 2] to the People of the City of New
"The times are dreadfully hard. The supererogatory act of tyrannical which the President exercised in removing the deposits has produced a state of alarm and panic unprecedented in our city. The friends of the United States Bank on the one side, and the whole array of Jackson men, together with the friends of the Pet Banks, on the other, mutually accuse each other of being the cause of the pressure. . . ."—Hone's Diary, I, 84-85.

The ban against lotteries (see Ap 30) goes into effect. The Am. Art Union was one of the enterprises thus proscribed.—See Ja 29, 1844; D 15, 1853.

". . . Never in any year did the 31st of December fail so completely to redeem the pledges of the 1st of January."—Hone's Diary, I, 86.

1834

Early in this year, a meeting of artists and mechanics sent a delegation to President Jackson in Washington to petition him for relief from the hard times resulting from his policy towards the United States Bank.—McMaster, Hist. of the People of the U. S., VI: 202. For the results of separate petitions to the president by merchants and mechanics, see Courier and Enquirer, F 7, 17, and 25, 1834.

In this year, the first volume of The Congressional Globe, containing the debates and proceedings of congress, was published. The name was changed to The Congressional Record with the issue of March 4, 1837.

In this year, William Dunlap published, in two volumes, his History of the Rise and Progress of the Arts of Design in the United States, 1660-1815. A new, illustrated edition of this work, edited with additions by Frank W. Bayley and Chas. E. Goodspeed, was published in 1918, in three volumes, by C. E. Goodspeed & Co. of Boston.

Dunlap's concluding paragraphs are on the subject of American collections of paintings. He gives the lists of paintings owned by Rohn, Gilmor of Baltimore, and Philip Hone of New York. He mentions several other collections of his time, owned by New York citizens, notably those of Michael Palf, Miss Douglass, Dr. Hozack, Myndert Van Schaick, Jas. Renwick, and Luman Reed. Of collectors of prints, he refers to John Allen and Ithiel Town whose treasures in this line are "magnificent."—Hist. of the Arts of Design (Goodspeed ed.), III: 270-80. For later painters and private collections of paintings, see Tuckerman's Book of the Artists (1867).

At this time, Francis Alexander, of New York, was one of the most successful of American portrait-painters. For an account of his work, see Dunlap (Goodspeed ed.), III: 312-40.

In this year was shown in London, at The Panorama, Leicester Square, a view of New York, painted by Robert Burford from drawings made by him in the autumn of 1832. At the same time, a pamphlet was published describing the city and the landmarks shown in the Panorama, and containing two wood cuts of the view in outline. These two views are seen from the centre of Broadway opposite Ann St., looking respectively north and south. A copy of this pamphlet is in the author's collection. For a news report of the exhibition, see N. Y. Mirror, XII: 63 (Aug. 23), and N. Y. Eve. Post, Ji 25, 1834.

In this year, 183 new buildings were erected in New York.—Eve. Post, Ja 27, 1835, citing Jour. of Com.

In this year, the residence of Henry Brevoort, Jr., was erected at the north-west cor. of Fifth Ave. and 9th St. It was sold to Henry de Rham in 1850 (q.v., Ji 21) for $57,000, and by his family to Geo. F. Baker, Jr., in 1921 for $450,000, thus changing hands but twice in 99 years.—See N. Y. Tribune, Je 29, 1919. The house was still standing in May 1924, when Mr. Baker sold the property to Bing & Bing, Inc. who resold it in April to the Morris White Holding Co., whose purpose was to improve this corner at once with a 15-storey hotel. The Sun, Mr 18, 1925; N. Y. Times, Ap 28, 1925. It was demolished in the summer of 1925.—Ibid, O 25, 1925. See, further, F 24, 1840.

In this year, the restrictions governing the use of the Tontine Coffee House as a tavern or coffee house were removed by the Court of Chancery, and the building was leased for general business purposes (see description of Pl. 69, I: 455).

By 1835, the "balcony had been removed, and the interior of the building somewhat changed." During the fire in Dec. of that year, the cornice of the Tontine caught fire three times, but was extinguished.—Ibid, 322-24. See, further, 1856.

In this year, the "N. Y. Ophthalmic Dispensary" was founded.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1834

On May 15, 1837, it was incorporated.—Laws of N. Y. (1837), ch. 57.

In this year, the Murray homestead, from which Murray Hill takes its name, was burned. The country-seat of R. H. Murray was near Fourth Ave. and 37th St., "amid spacious grounds, the present Grand Central Station occupying what was then one of his corn-fields." The farm lay between the Bloomingdale and Boston Post Roads and as far as Kip's Bay.—Harwell, Reminiscences, 21—23, 29; Wilson, Mem. Hist. of N. Y., III: 295; L. M. R. K., III: 951.

In this year, the "Naturalization Office" was in the Rotunda. For an outline of this building's history, see Howe's Hist. of the Metropolitan Museum of Art (1913), 80—84.

In this year, Fulton St. was widened from Broadway to Ryder's Alkoven. In 1834, this road was widened from Broadway to Nassau St.; and 28th St. was opened from Third to Fourth Ave.—Man. Com. Coun. (1875), 521; ibid. (1865), 544.

Probably in this year was made the profile of 155th St. from the Hudson to the Harlem River, filed as Map No. 610 in a bureau of topography, borough president's office.

The following views, depicting New York in 1834, are found in Vol. III of the present work: the Garmerwyck view (Pl. 110); the Maverick view of Wall St. (Pl. 111); Manhattanville (Pl. 113); the Horner view of Broadway (Pl. 113); view of New York from the bay (the Chapman-Bennett view—Pl. 116); baptizing scene on the shore of the North River, below Fort Ganoecotte (Addenda Pl. 20-a); Park Hotel (the Astor House—A. Pl. 22-a).

In this year was published the first, and, so far as known, the only part of George C. Horner's Street Figures of the City of New-York. The three views in this issue are reproduced and described as Pls. 98 and 104 (a and b), Vol. III (not 103, as stated in the description of Pl. 98, III: 589). These views are: "Fulton St. & Market," "Broadway from the Bowling Green," and "South St. from Maiden Lane."

In this year, a new edition of the city's Laws and Ordinances was published.

In this year, the Staats-Zeitung was established as a German weekly newspaper. It became a tri-weekly in 1842, and a daily in 1845—North, Newspaper and Periodical Press, 127.

By this year, the "Harlem Railroad" had been completed from Prince St. to Yorkville, 5 miles. See F.—For several months cars drawn by horses have been in operation from Prince-street to Yorkville, and they now run as often as once in each half hour every day in the week. The fare for each passenger is 12½ cents, and the daily expenses of each car is computed at $2.75 exclusive of wear and tear. . . .

According to Lossing, steam was first introduced as a motive power on the N. Y. & Harlem R. R. in 1834, Wm. T. James, the machinist of the road, being the inventor of the first steam motor for city railways.—Lossing, Hist. of N. T. City, p. 402.

By this year, the Manhattan Gas Light Co., whose works were on the North River, foot of 18th St., had laid its main pipes through 18th St., Ninth Ave., Hudson St., Bleeker St., Sixth Ave., Waverly Place, Broadway, Bowery, Broome, Centre, and Grand Sts. It expected "to furnish the citizens in the upper parts of the City with a full supply of pure Gas within the current year."—N. T. As It Is, In 1834, 21—22.

By this year, the Stuyvesant Institute was organized.—N. T. As It Is, 1835, p. 69. For the erection of its building on Broadway, see Man. Com. Coun. (1859), III: 886, and 4, 185, 186; ibid. (1865), III: 951.

The common council adopts a report of the market committee favoring the demand of petitioners who have reminded the board of the latter's promise to erect a market-house on West St. between Christopher and Amos Sts., on which promise they relied when they bought lots near by. Some time later, a resolution was passed to build a house extending on Christopher St. 30 ft., on West St. 197 ft. 10 in., on Weehawken St. 197 ft. 10 in., and on Amos St. 30 ft. The board appropriated $54,75 for the purpose. This became known as the Weekhoms or Green Market. De Voe, Market Book, 576 et seq. See JL 6, 1835. Before the ground was filled in, however, the fire of 1835 (p. 16, D 16) destroyed the old wooden market-house.—De Voe, 520.

The grand jury calls the attention of the city authorities to the "filthy, dilapidated and comfortless" condition of the bridewell. This has been a theme of grand jury presentments for the last twenty years.—Curtier and Enquirer, Ja. 21, 1874. For view of the bridewell at this time, see Man. Com. Coun. (1859), 180.
The common council appropriates $4,794.95 "to defray the expenses of graduating Union Place to the city level."—Proc., App'd by Mayor, II: 106. See, further, N. 12.

Jan. 23

UTINION
1815-1841
graduatinglagstaff
1834.

The "Knickerbockers" of New York celebrate their first anniversary at a banquet in the "City Saloon, in Broadway." Among the toasts is one in Dutch, offered by Hermann A. Vedder, which, translated, reads: "To the memory and virtue of the true Hollander William the Third, Prince of Orange and King of Great Britain and Ireland; he triumphed over the House of Stuart, laid the foundation of the present Government of England, and also that of abolishing religious persecutions." A committee was appointed by the meeting to take measures for the formation of a "Knickerbocker Society" in this city, "with the avowed purpose of preserving some of the festive customs of our Dutch ancestors, and that the annual meeting be held hereafter on the 1st of St. Nicholas, (the 6th of December).”—Courier and Enquirer, F 1, 1834. Of the organization of the St. Nicholas Society, F 14, 1835 (p 3).

"New Custom House.—The workmen have broken ground, and the old buildings are about being removed."—N. T. Eve. Post, J 28, 1834.

A committee report of the N. Y. & Harlem R. R. shows that a single track was laid by this time, on granite sleepers, from Prince St. to Union Place, where a double track commences, similarly built, to 23d St., and on wooden sleepers from there to 84th St. or Yorkville, except that portion between 33d and 56th Sts., where there was as yet only one track.

The expense for building the road from Prince St. to Observatory Place (Yorkville), was $220,000; and for excavations, embankments, etc., between Observatory Place and Harlem, about $25,000. The real estate consisted of 6 lots at the corner of Fourth Ave. and 25th St., on which car-barns, stables, shops, etc., had been partly erected, and 10 acres at Observatory Place, where the company built an $8,000 hotel.

The road was in use in June, 1834, as far north as Murray Hill. The company owned five "pleasure cars," but only three were in use at a time. The total number of passengers carried up to this time was 89,094; fare, six cents for adults and three cents for children.—N. T. Ann. Register, 1834. See F 17, 1834 and My.

The New York State legislature ratifies an agreement entered into by commissioners appointed by this state and those appointed by New Jersey (see Ap 16, 1827) to settle the boundary-line between the two states in New York Bay and the Hudson River.—Laws of N. Y. 1834, chap. 8. See S 16, 1835.

Cadwallader D. Colden, grandson of the colonial governor, and formerly mayor of the city, dies at the age of 67.—N. T. Eve. Post, F 8, 1834. In December, a mural monument to his memory was erected in Grace Church, the inscription being written by Gulian C. Verplanck.—N. T. Mirror, D 20, 1834.

Jan. 24

A meeting of over 20,000 persons is held in the Park in front of the city hall, upholding the principle of a national bank, and declaring in favour of re-chartering the U. S. Bank, with such modifications and restrictions as congress may deem expedient. Philip Hone acts as president of the meeting.—Courier and Enquirer, F 10, 1834; Hone’s Diary, I: 91. See F 11.

A meeting of merchants and traders is held at the exchange, and resolutions passed for the purpose of combating mercantile influences for commercial, not party, ends.—Courier and Enquirer, F 12, 1834. Hone describes it.—Hone’s Diary, I: 92.

Jan. 25

"The common council permits the erection of a liberty-pole in the open space at the junction of Chapel (West Broadway) and Franklin Sts., in the Fifth Ward, to be surrounded with a circular wall, 10 ft. in diameter.—Proc. App’d by the Mayor, XI: 132. See also F 22.

The water commissioner makes a report to the common council showing the height of buildings in various parts of the city above tide-water.—N. T. Com. Adv., F 16, 1834 (with illustrations).

The common council resolves to erect a flagstaff at the Battery.—Proc. App’d by Mayor, II: 130; Mayor’s Message (1834), 164.

A. On March 31, a flag was raised on a flagstaff erected there by the city.—See Grand Opening of the New Armoury of the Eighth Regt. (1830), 12.

A liberty-pole called "Riley’s," 117 ft. high, is erected by the Democratic party on the south-west corner of West Broadway (formerly Chap P’t) and Franklin St. (see F 11). It was shattered by lightning the following year, and another immediately erected.

The common council appropriates $4,794.95 "to defray the expenses of graduating Union Place to the city level."—Proc., App’d by Mayor, II: 106. See, further, N. 12.

Jan. 24

The common council appropriates $4,794.95 "to defray the expenses of graduating Union Place to the city level."—Proc., App’d by Mayor, II: 106. See, further, N. 12.

20
THE ICONOGRAPHY OF MANHATTAN ISLAND

1726

The latter remained until 1858.—Costello, Our Firemen, 192-94.

27 The building on Wall St., erected in 1814 by Eastburn, Kirk & Downes as a store, and used since 1816 as the custom-house, is now demolished.—N. Y. Gaz. & Gen. Adv. Feb. 27, 1854; descrip. of Pl. 166, III: 848. For the new custom-house, on the same site, see My, and Jl 4, 1844.

Mar. The city charter is amended by act of the legislature so as to permit the election of the mayor (see N. 4, 1853) by voters qualified to vote for charter officers.—Laws of N. Y. (1854), chap. 25. See Mr. 19, 21; Ap 2, 8, 10, 11, 15.

19 The following memorandum by Philip Hone sketches briefly the political issues involved in the impending election for mayor—the first election of a mayor by the people since Delany's on Oct. 14, 1689 (q. c.), and the first fruits of the charter amendment of March 3, in this year (q. c.). Hone's observations also illustrate very strikingly the adherence of a party man to his convictions and his party irrespective of the merits of the candidate for office:

"The Committee of National Republicans appointed to nominate a mayor met last evening, and nominated for that office Gulian C. Verplanck. This gentleman was ousted from his seat in Congress by the Jackson party, because he would not go all lengths in his opposition to the United States Bank. That point of view he is a good candidate, and his success will be a triumph for the bank party; but I do not think him a popular man, or by any means well qualified for the office. He is not a practical man; he learned certainly is, and an able writer on subjects connected with belles-lettres and the fine arts; but he knows little of mankind, and his political course has been unsteady as the wind. Still he must be supported. The Tammany men have sent a delegation to Albany in aid of Mr. Charles L. Livingston's consent to run as their candidate for the mayoralty. He is more suited for the office, and if he had not committed himself against his judgment in the approval of the ruinous course of measures pursued by the administration in relation to the bank, I would have supported him with all my heart. As it is, I shall have to make some sacrifice of feeling in voting for Mr. Livingston against him. But I hold that the salvation of the country depends in a great measure upon the defeat of the Jackson party in the struggle which will come on next month, and personal predilections must give way to the public good."—Hone's Diary, II: 97. See, further, Mr. 21.

21 "Mr. Livingston [see Mr. 19] refuses, it is understood, to run as mayor. Mr. Coroebus W. Lawrence has been applied to, and consents to run as the candidate of the Jackson or Tammany party. This is a bold measure on the part of the Jackson men. Mr. Lawrence is now their congressman, and circumstances have placed him on prominent ground as an opponent of the bank and supporter of the measures of the administration (against his conscience, as I believe on mine). He has been vilified by the delegates of the merchants for refusing to present his memorial, and his name has been dismissed from consideration. If it occurred in their reports. He is most heartily sick of his present situation, but he is compelled by his party to accept the nomination of mayor. This will be a fair trial of the issue,—Mr. Lawrence, the man who has for the sake of party proved recreant to the interests of the merchants, of which profession he is a member, on the one side, and Mr. Verplanck, who lost his seat in Congress because he would not pursue the same course, on the other. The personal characters of both these gentlemen are irreproachable. Verplanck at first declined the nomination, but it is now understood that he consents to serve."—Hone's Diary, II: 98. See, further, Ap. 2.

29 The city acquires by condemnation proceedings the land now comprised in Tompkins Sq. Park (see II: 19, 38, 1853) from 7th to 10th St., Ave. A and B (10.56 acres).—Prendergast, Record of Real Estate. See Je 1.

29 The contract for excavating for the custom-house bears this date. It is for $750, and is signed by William Beard, the contractor, and the commissioners.—From the original document, sold with the Joline collection (Item No. 375), at Anderson Art Galleries, Feb. 25, 1911. See also 9th Ann. Rep., Am. Scien. and Hist. Proc. Soc. N. Y., 1865, p. 161, became the sub-treasury of the U. S. See, further, My and Jl 4, 1834.

Apr. Hone records in his diary a reception to Daniel Webster at Hone's house. Webster confirms a declaration which he had previously made to Hone in Washington, "that the hopes of our friends there to bring about a favourable change in the affairs of the country rely mainly upon the success of the great struggle which is to take place in New York next week."—Hone's Diary, I: 96. See further, Ap. 8.

2 The mayor approves a law to regulate the city prison and bridge. The eastern wing and basement of the jail, the cells connected with the first district watch-house, the basement of the building at the corner of Third St. and the Bowery, and also such portion of the House of Refuge as may be appropriated by the managers of that institution for the confinement of persons under the age of 15 accused of offenses, are designated as the "City Prison and Bridewell."—Laws and Ordinances of the City of N. Y. (1853), 217.

2 The town of Brooklyn is incorporated as a city by an act of the legislature defining its corporate powers and duties.—Laws of N. Y. (1854), chap. 29. As a village it had been incorporated on April 12, 1816 (q. c.).

2 Cornelius Lawrence (see Mr. 19), the Jackson and Tammany candidate, is chosen mayor of New York by a small majority over Gulian Verplanck. The election, which continued for three days beginning Tuesday, April 8, was accompanied by great excitement and by disturbances so serious that the militia had to be called out to restore order. The common council was carried by the Whigs.—Hone's Diary, I: 109-101; N. Y. Evet. Post, Ap 19, 1854. Cf. Losing Hist. of N. Y. City, II: 312 et seq.

212 The most wonderful of all the results of the election is that all New York, has been kept in a state of alarm; immense crowds have been collected at Masonic and Tammany Halls, but the greatest concourse was in front of the Exchange. The street was a dense mass of people. Partial returns were coming in every few minutes, and so close has been the vote that the Whigs at the Exchange have sent a delegation to Albany for Jackson in front of the office of the "Standard" opposite doubted alternately as the news was favourable to one or the other; and up to the last moment the result was doubtful, when, at the close of the canvass, the majority for Mr. Lawrence, the Jackson candidate, out of the immense number of votes—thirty-five thousand one hundred and forty-one—was found to be one hundred and seventy-nine. There is no doubt, however, that with the able aid of a majority of aldermen and assistants, the Common Council is reformed, and we shall succeed in the great full election. It is a signal triumph of good principles over violence, illegal voting, party discipline, and the influence of office-holders."—Hone's Diary, I: 100-1. See also N. Y. Evet. Post, Ap 11, 1854.

21 This day is one of celebration for the triumph of the Whig party in the recent charter election (see Ap 10), with a fête at Castle Garden and other notable events.—Hone's Diary, I: 101-2; N. Y. Evet. Post, Ap 16, 1854.

"Though the Democratic Mayor was elected, a Whig Common Council was chosen, and the Whigs deemed it a triumph, which they celebrated by a banquet at Castle Garden, . . . After the banquet a portion of the company was addressed by Daniel Webster from a window of Mrs. Edgar's house in Greenwich Street. After dinner there was a beauty election of this year that was last week. "Silk Stocking" party was applied by the Democrats to their opponents, arising from the circumstance that the excitement of the campaign was such as to draw many retired and hitherto non-partisans into it in opposition to the Democrats."—Howell's Reminiscences, 288-89.

The legislature passes an act to convey to the city by condemnation proceedings the title to two large parcels of land, one in the Seventh Ward, bounded on the north by Grand St., east by Corlear's St. south by Lombardy (Monroe) St., and west by part of the Geo. Lorillard estate; the other, in the Eleventh Ward, bounded north by 2d St., east by Avenue D., south by North (Houston) St., and west by the continuation of the easterly side of Sherill St.—Laws of N. Y. (1854), chap. 150. In the former, Monroe Market was afterwards built; and in the latter, Union Market.—See L. R. K., Ill: 959, 960.

21 In support of its opinion that investments for market purposes are advantageous to the city, it is stated that Fulton Market, which cost $200,000, produces an annual revenue of $19,077.10, or 93 percent on the investment.—De Voe, Market Book, 380-81. See Mr. 19, 1853.

2 The legislature incorporates the Long Island Railroad Co., giving it authority to construct its road.—Laws of N. Y. (1854), chap. 178. This is one of the few railroad corporations which has operated continuously under its original charter and name.—N. Y. Times, Ap 24, 1824.
The legislature passes an act "to provide for deepening the waters adjacent to the wharves, piers, docks, bulkheadss and shores in the city of New York."— Laws of N. Y. (1834), chap. 186, ibid., (1835), chap. 122.

In this month, construction of the new custom-house on Wall St. (see Ji 13, 1835; S 16, 1835; F 27, 1834) was commenced, on the site of the old house which had just been demolished.—N. Y. City Directory (1832-3), 738; ibid. (1841-2), 801. The new building was completed and occupied May 1, 1842 (q. v.).

The N. Y. & Harlem R. R. is opened as far as Yorkville.—From data supplied by the company. Cj. F— and see, further, Je—. Soon after, work was commenced on the cut at Snake Hill in Harlem from 11th to 12th Sts., which was nearly all rock, and on a wooden truss-bridge between 106th and 109th Sts. The bridge having been completed before the tunnel, the tracks were laid on the bridge, and over the Snake Hill section to 125th St., where a temporary station was built. In this construction the rails were laid on Georgia pine stringers, resting on chestnut ties, this being the origin of the wooden-tunnel construction, which has ever since been followed in building houses railway. Cars on this railway were transported on trucks from 42nd St. over Third Ave., and were run on the north end of the tunnel to the Harlem, the far being a sixpence, so that passengers from downtown in going to Harlem had to walk over the tunnel hill, the fare from Walker St. to Harlem being eighteen pence. The cars on this section, some of which were double deckers, continued to run by horse-power up to nearly the tunnel was completed. The tunnel, including the open cut, when completed, was 906 ft. long, and cost about $96,000.—Ibid.

Mr. Astor commenced this morning the demolition of the valuable buildings on the block fronting Broadway from Barclay to Vesey street, on which ground his great hotel is to be erected. The dust and rubbish will be almost intolerable; but the establishment will be a great public advantage, and the edifice an ornament to the city, and for centuries to come will serve, as it was probably intended, as a monument of its wealthy proprietor."—Hone's Diary, I: 103. For the landmark history of this site, where the Astor House was built, see L. M. R. K., III: 976; and N. Y. Times, My 11, 1913. The buildings which formerly occupied this block, and were destroyed at this time, are shown on Pl. 85, 105, 106, 107, 111. One of these, No. 227 Broadway, was occupied by Paff's gallery (see 1811).—Describe of Pl. 108, III: 611. See, further, My 15. The south half of the Astor House was demolished in 1913. The north half, unoccupied since that date, stood until 1926.—Son, My 30, 1913; N. Y. Tribune, S 3, 1913; 14th Ann. Rep., Am. Scen. & Hist. Proc. Soc. (1914), 145; 435; L. M. R. K., III: 976; descript. of Pl. 158-a, III: 841.

The legislature passes an act "for supplying the city of New-York with pure and wholesome water." It provides for the appointment of five "water commissioners of the city of New York," whose duty shall be to examine and consider all matters in this connection, with power to employ engineers, surveyors, etc., and who shall adopt the plan which they think most advantageous for procuring the cheapest, best water. They will report their contracts, etc., to the common council before Jan. 1, 1836. If the plan is approved by the common council, the commissioners shall provide for a referendum on it, to be determined at the time of the next general election of charter officers. If a majority of the electors favor it, it shall be lawful for the common council to raise by loan from the city, in such amounts as they think fit, a sum not exceeding $5,000,000, for the execution of the plan. The plan is called the "Water Stock of the city of New York." The money so raised shall be applied to carry out the plan.—Laws of N. Y. (1834), chap. 256; Colden, Memoir Croton Aqueduct, 120, 125.

Gov. Marcy re-appointed the same commissioners he had named under the act of Feb. 26, 1833 (q. v.), and they employed Davis & associates, the same engineers.—Man. Com. Coun. (1834), 219; Myrdert Van Schaijk, who drafted the act of 1834, described, in his report of 1832, the financial difficulties on the one hand and the great need on the other caused by the cholera epidemic of 1832.—Croton Aqueduct Report (1862). The act of 1834 was amended on Apr 27, 1840.—Laws of N. Y. (1840), chap. 175. Regarding the route and construction of the aqueduct outside of Manhattan Island, see ibid. (1836), chap. 293 and 468; and ibid. (1837), chap. 328.

The Senate and Assembly concur in a resolution to ask the governor to open negotiations with the New York Water Company for a view to an exchange of the present site and buildings occupied as the state arsenal [see L. M. R. K., III: 995; 994], for a more convenient and eligible location thereof; in the upper part of the city.—Laws of N. Y. (1834), 597-94.

Mayor-elect Lawrence is given a great reception upon his arrival in New York from South Amboy.—N. Y. Bee. Post, My 13, 1834; Hone's Diary, I: 104.

The following "Notice to Firemen" is published: "The large bell on the House of Burgesses, has, (under the direction of the Committee of Public Buildings, and Repairs,) been so fixed that it will rung for fires, and the city laid out, or divided into districts, for the purpose of informing Firemen the direction of fires . . . ." The notice defines the bell strokes and the respective districts to which they refer.—Com. Adv., My 10, 1834. Both the bell and the system of alarms are criticised in ibid., May 16, after a destructive fire. See also descript. of Pl. 143-a, III: 712, which appears to be in error in stating that a new bell was placed on the roof of the city hall in 1834.

Mayor C. W. Lawrence (see Ap 10) is inducted into office.—Com. and Enquirer, My 14, 1834.

The newly witted wooden rails in the park have been removed and chestnut posts erected in their place, from which iron chains are to be appended, which will improve the prospect from my house. Astor's buildings are nearly all removed [see My 1]; the dust from the immense mass of rubbish has been almost intolerable for the last fortnight . . . ."—Hone's Diary, I: 104-5. See My 31, Jl 4. 1834. Lafayette died at Paris, "in the house which is now No. 8, rue d'Anjou."—Tower, The Marquis de Lafayette (1835), III: 469. The news reached New York on June 19.—Com. and Enquirer, Je 20, 1834. See Je 26.

A map of the Union Place improvements bears this date.—See map No. 703 in bureau of topography, borough president's office. They have taken away those infamous whitewashed posts, and long strips of narrow planks with which the sides of the footways [in the Park] were decorated and put up in their stead neat locust posts, of uniform shape and size, connected by iron chains.—N. Y. Mirror, My 31, 1834. On March 21, 1835, the same paper reported: "The chains attached to the posts in the park have wholly disappeared." On April 4, 1835: "the chains have been replaced." See O 22, 1792.

"Harlem Railroad—One of the most interesting rides which both citizens and strangers can take in this city, is that on this railroad. For 12½ cents a ride of five miles to Yorkville is obtained. It is true that the route affords no beautiful view of cultivated fields and gardens, but conveys an idea of the great amount of labor bestowed in cutting the track through hills of solid rock from 20 to 60 feet high, affording a correct idea of the geological structure of the island. At the termination of the ride is a spacious hotel, on very elevated ground, affording one of the most extensive, varied and richest prospects to be seen in our country."—N. Y. Farmer, and Am. Gardener's Mag., VII: 173. The hotel was Noyes's Prospect Hall.—See Jl 15, 1835, N. Y. Sent. Post, Je 19, 1836.

Tompkins Square (see Jl 30, 1833, and Mr 21, 1834) is ordered to be opened on this day.—Proc., App'd by Mayor, II: 183. See also ibid., II: 235; and L. M. R. K., III: 971. See, further, Jl 25.

The N. Y. Mirror says of the jail (the old bridlewell—see Ag 23, 1830): "This abominable blemish upon the beauty of the Park, still 'canchers the ground,' although an almost universal desire for its removal has been expressed with more or less vigor again [see O 24, 1832]: actually dinned into the ears of the authorities [see N 2 and D 6, 1828]. Everything about it is bad and out of place; in appearance, it is hideous; in its purposes, ungracious and affecting; in its associations, a perfect nuisance. It rears its ugly front in the midst of beauty, and splendour, and cheerfulness, with an effect not unlike that produced by the sight of a gallows, surrounded by a smiling and verdant landscape."—N. Y. Mirror, Je 7, 1834. See Mr 21, 1835.
Ceremonies in honour of Lafayette, who died on May 20 1834, take place under the direction of a joint committee of the common council and the mayor. It was the last time that the Mayor of the city was the general of the Continental army, the hero of the American Revolution, the ardent apostle of liberty, the benevolent, the virtuous Lafayette. An urn, covered by the wings of the American eagle, well done in bronze plaster, was drawn by four white horses in the center of a hollow square, formed by the Lafayette Guards and followed by the pall bearers in barouches. These were members of the Cincinnati associates of Lafayette in the War of the Revolution.—Hone's Diary, I: 108. For full account of the pageant and ceremonies, see N. T. Eve. Post, Je 26 and 27, 1834, and Courier and Enquirer, Je 27, 1834.

Progress in building the new custom-house, at the north-east corner of Wall and Nassau Sts. (see JI 13, 1832; S 16, 1833), is in about the same stage of forwardness as that of the Astor House, the corner-stone of which is laid on this day.—Jour. of Com., Je 4, 1834. Regarding custom-houses, see Ag 21, 1834; Mr 14, 1835.

In laying the corner-stone of the Astor House, a box is deposited beneath the stone, "with a silver tablet in it, containing the following inscription, "Corner-stone of the Park Hotel, Laid the 4th of July 1834. The Hotel to be erected by John Jacob Astor. Builders, Philetus H. Woodruff, Peter Storms, Campbell & Adams; Superintendents, Isaiah Rogers and Wm. W. Burwick; Architect, Isaiah Rogers."—Eve. Post, JI 8, 1834. Another publication of the same date refers to it as "the celebrated Astor Hotel, so called from . . . John Jacob Astor, who at the age of about 80, is devoting a fraction of his immense wealth to the accomplishment of this enterprise. . . ."—El 4, 1834. Thereafter, in the name Astor House was used, probably from the frequent reference to "Astor’s hotel."—See My 31, 1836. For Wm. B. Astor's connection with the enterprise, see O 29, 1835. For outline of the landmark history of this site, see L. M. R. K., III: 976. See also descript. of P 9, III: 591, and P 220, III: 653. For a lithographic view of the "Park Hotel," drawn by Schmitt in 1834 from the architect's plans, and issued in this same year, see A. Pl. 22-5, Vol. III. See, further, D 6.

Isaiah Rogers must have come to New York to supervise the construction of the Astor House in this year, instead of in 1835, as stated in descript. of P 118, III: 625. He was later the architect of the Bank of America (in 1839), the Middle Dutch Church on Lafayette Pl. (in 1836), and the Astor Place Opera House (in 1845).

A race riot occurs at the Chatham St. Chapel, when a coloured congregation disputes with men of the N. Y. Sacred Music Soc. the right of the latter to use the building on this evening—N. T. Eve. Post, JI 8, 1834; Lossing, Hist. of N. T. City, I: 332. See also Haswell's Reminiscences, 283-90. See O 2.

From July 9 to 11, inclusive, riots against the abolitionists occurred. The following places were sacked or damaged: Chatham St. Church, Dr. S. H. Codman's Church, Zion's Church (coloured), Rev. Mr. Ludlow's church, St. Phillip's Church (coloured), African Baptist Church, and the residences of Arthur and Lewis Tappan.—Courier and Enquirer, JI 9, 10, 11, 12, 14, 15; N. Y. Spectator, JI 10; and Eve. Post, JI 12, 1834; Hone's Diary, I: 109. See also Lossing's Hist. of N. T. City, I: 325-40.

The following description of New York is published in Charleston: "From Philadelphia, our correspondent sends the following intelligence of life, business, bustle and pleasure, taking the steam boat to Borden- town, N. J. (near which we saw the fine mansion and grounds of Joseph Bonaparte) the road rail, 36 miles to Amboy, and the steam boat again through Staten Island Sound to this place, accomplishing the whole route in about 7 hours. Here we have been since Monday last, enjoying the various sights with which the vast metropolis charms the eye, and enshrines the wonder of the stranger. Here the world itself almost seems to be congregated for people of all nations, including the resident, the passing traveller, and the recent emigrant, meet the eye in every direction.—The shops in Broadway spread out their temporary stores in rich and varied profusion, and seem to concentrate the wealth of the world. . . . The Battery and Castle Gardens on the one hand, with the last breezes and brilliant spectacles, and Niblo's on the other, with enchanting concerts of vocal and instrumental music, and grand pyrotechnical pagents, invite enjoyment, after the labors of the day. . . . Omnibuses, exceeding a hundred in number, roll incessantly over the paved streets, administering equally to the purposes of business and pleasure, adding to noise and bustle, and forming an object of such prominent attraction, as to cause New York, not inaptly to be termed "The City of Omnibuses." The Bank of New York is a monument of enterprise, and the New York is commensurate with and on as grand a scale as their city. As an instance of this may be noticed, the great Hotel to be erected, on Broadway, by Mr. Astor, preparations for which, consisting, at present, in the pulling down of large and commodious houses, are now in active progress—for one of the corner lots and buildings (already demolished) Mr. Astor is said to have paid the enormous sum of $26,000. To show the grand scale of expense which prevails here, I state a few particulars, gleaned from good authority. The rent of City Hotel is $15,000 per annum; of the American Hotel $9,000, of the private boarding house in which I reside $8,000, and of a single room in Broadway, occupied as a Barber's shop, $300. How vast must be the rental of the whole city—"N. Y. Gaz. & Gen. Advertiser, Je 5, 1834, quoting a Charleston Courrier of Jl 17."

The first commencement of New York University takes place, in the Middle Dutch Church in Nassau St. The degree of A. B. is conferred on nine graduates.—N. T. Eve. Post, JI 18, 1834.

The mayor approves a resolution of the common council that "Tomkins square [see Je 1] be filled up to the city regulation, and enclosed with a good and sufficient fence," and that $200,000 be appropriated for the work.—Proc. App'd by Mayor, II: 211. See, further, O 3.

Geo. Nowlan's hotel, "Prospect Hall," at Observatory Place, on the line of the Harlem R. R. at 914 St., is described in a published notice.—Courier and Enquirer, JI 30, 1834.

Work on the N. Y. University building in Washington Square (see JI 16, 1835) is interrupted by a stone-throwers' riot, caused by the municipality in the street, known as the "stone-throwers' lane," was originally projected, as here described, to have its "great hall for business in the form of a cross, with a dome over the intersection. This dome appears in the view, rising high above the roof. The cost of the building, it was expected, would be "much less than $500,000," and the time required for its erection "nearly four years."—N. Y. Mirror, XII: 57.

As to Broadway, we will make no mention of that, for we doubt much if there is another street in the world which presents such a confused assemblage of high, low, broad, narrow, white, grey, red, brown, yellow, simple and florid. . . . The private houses, lately erected, particularly in the new parts of the city, are for the most part, spacious and elegant as for example, those in about 100 St. Mark's Place, and the Lafayette buildings."—N. Y. Mirror, XII: 57.

Delegates from trades' unions in Boston, Philadelphia, Poughkeepsie, Newark, Brooklyn, and New York meet in the city hall to perfect a national organization (see Ag 28). During the convention, a committee on resolutions, that was to be "expressive of the views" of the delegates "on the social civil and intellectual condition of the laboring classes," presented a noteworthy report. At the outset, the fundamental principle is declared, that "the actions and pursuits of man have for their object the possession of happiness, that this object is attained in proportion to the ratio of the intelligence and virtue of man individually and collectively, and whereas society is conducive to happiness, it being good for man to associate with his fellow man, moral justice of necessity
becomes the Keystone to the arch of social compact." It is maintained that the conditions of the laborers as classified at present are the most unequal and unjustifiable distribution of the produce of labor, thus operating to produce a humiliating, servile dependence, incompatible with the inherent natural equality of man.

Therefore, it is recommended that "such of the working classes . . . as have not already formed themselves into societies for the protection of their industry, do at once, by their voluntary consent, assign to their respective trades and arts, as well as their general interests as productive laborers.

The report also deprecates "the system of education now in operation" because of their "exclusive character in giving instruction to the wealthy few at the expense of the industrious many.)

The report also deprecates "the system now practised in the disposal of the Public Lands," because it debar the labouring class "from the occupation of any portion of the same, unless provided with an amount of capital which the greater portion of them . . . cannot hope to attain.

"Serious alarm" is felt at "the deplorable condition of the male and female children employed in the cotton and woolen manufactories . . . arising from the early age they are put to work . . . and the enormous length of time allotted for a day's labor.

It is suggested that "lawful security should be exacted from the proprietors of manufactories, for the education of every child employed.

Further, the report urges upon the consideration of every labouring man the repeal of laws existing in some states under which "Trade's Unions . . . are declared illegal Combinations." Such laws are avowed to be "a manifest violation of the Constitution . . . and an infringement of the lawful rights of every citizen.

The report concludes with the resolution that hereafter "it should be the first as well as the last duty of every laborer, to inform himself on the subject of his equal rights and labor to promote the good of the whole community, rather than to confer privileges on a favored few." The report was unanimously adopted.—A DocumentaryHist. of Am. Industrial Society (Cleveland, 1910), VI: 203-9. See Ag 28.

This was the first National Trades' Union in the United States.

"It continued through three years of remarkable success and disappeared only with the panic of 1837."—ibid., VI: 22-23.

The trades' unions' delegates, in convention assembled (see Ag 25), adopt a constitution as an association "styled the National Trades' Union of the United States." This Union is to be composed of delegates "from the several Trades Unions in the United States," and the delegates are limited to one from each Association or Society, and to be elected in such manner as the several Unions may direct, and to hold office for one year. Annual meetings are held. The objects of the organization are thus defined: "To recommend such measures to the various Unions represented herein as may tend to advance the moral and intellectual condition and pecuniary interests of the laboring classes; promote the establishment of Trades' Unions in every section of the United States and also to publish and disseminate such information as may be useful to Mechanics and Working Men generally, and to unite and harmonize the efforts of all the productive classes of our country."—A Doc. Hist. of Am. Indust., VI: 225-27, and authorities there cited.

The First Presbyterian Church, in Wall St., is destroyed by fire. The building occupies a corner lot of Park and Cedar streets, opposite the corner of cupola and bell fell into the church, only the thick walls of the building remaining.—Gazier & Enquirer, S 15; N. Y. Gaz. & Gen. Adv., S 15; N. Y. Com. Adv., S 15, 1834; and descrip. of Pl. 105, III: 607; and Pl. 113, III: 615. The church was rebuilt in 1835 (Greenleaf, Hist. of the Churches, 174), the new edifice having a spire. —See Pl. 109, III: 611, 723-47, Vol. III; L. M. R. K., III: 931. See, further, Ju 26, 1844.

The N. Y. University building is "now nearly at its height, and will be ready for occupation in May next." For detailed description of it, see N. Y. Mirror, XII: 81. Cf. D 31.

Some idea of the immense amount of labor required in the construction of the new Custom House, may be gathered from the fact that although some 30-40 hands have been employed upon it for six months past, it has not yet risen above the surface of the ground. Astor's great Hotel is somewhat more advanced, but the walls of the first story are not yet completed. A still larger number of hands we should think, are employed on this building, than on the Custom House."—N. Y. Etc. Post, S 25, 1834, citing Jour. of Com.

"On the East side of Cedar street, which has been recently widened by an act of the Corporation, a range of five story brick houses has been erected, or is erecting, almost the whole distance from Wall street to Broadway. . . . The improvements which have taken place in the lower part of the city within the last six or eight years, are truly astonishing. Almost all the old buildings have been torn down, and new ones erected in their stead, very few of which are less than four stories high, and many of them five, and even six stories."—N. Y. Etc. Post, S 9, 1834, citing Jour. of Com.

The sum of $60,000 is appropriated "for paving streets, sidewalks and awnings, and for grounds, taken in the opening of Tompkins square." —Proc., App'd by Mayor, XII: 241. See Je 1, 1834 and F 11, 1835.

A resolution is approved by the mayor that the wooden fence enclosing Duane Park be taken down, and that a stone coping, surmounted by an iron railing, be placed there, an appropriation of $1,820 being made for the purpose.—Mayor's Message (1834), 25.

The common council permits the erection of a liberty-pole in the Fourth Ward.—Proc., App'd by Mayor, XI: 247. For one in the Fifth Ward, see F 11.

The mayor signs an ordinance to fill in a pond at Manhattanville in the rear of St. Mary's Church, between Tenth and Eleventh Ave.—Mayor's Message (1834), 28.

The Whigs are raising liberty-poles in all the wards.—Hone's Diary, I: 116.

The common council resolves "That the Corporation of the City of New York are lawfully authorized to enclose, regulate, and improve all the lands lying within the limits of Union place, as defined by the statute of April 5, 1832, in like mode with other public squares of the city, and accordingly it is ordered, that so much of the area of the said square, as shall be comprehended within the elliptical figure laid down on the plan deposited in the Street Commissioner's Office, containing not more than 677 feet in length, and not more than 302 feet 9 inches in breadth, he enclosed with an iron fence and stone coping, with convenient and appropriate gates. That the surface of the enclosure be reduced to proper and sufficient levels, and prepared to receive grass and shrubbery, with convenient footwalks; that a flagged sidewalk be laid around the exterior of the enclosure, not exceeding 15 feet in width; but the flagging around the exterior of the enclosure shall not be laid until the further order of the Common Council; that in the meantime, and until the further order of the Common Council, in respect to the permanent paving of the carriage ways and the space lying beyond the exterior, such portion thereof, as may be necessary, be rendered passable for carriages and vehicles, That the Street Commissioner, under the direction of the Joint Committee on Wharves, Lands, and Places of the two Boards, carry this resolution into effect, and $15,000 is hereby appropriated for this purpose."—Proc., App'd by Mayor, II: 259-60. See, further, My 14, 1835.

A committee of the common council selects, as the site for a house of detention, debtors' prison, criminal court-room, etc., the block of made ground, embracing an area of about 200 by 250 ft., which has been redeemed out of the Collect Pond, and is bounded by Elm, Center, Leonard, and Franklin Sts. At this time it was occupied as a public yard. The plan proposed was to build the foundation of the new house of detention, etc. on piles driven into the ground. The boundaries and general character of this made ground are described in the committee's report.—Doc. No. 29, Ed. of Ass. Alds., N 24, 1834. See 1835; Ag, 1838.

The new French Protestant Episcopal church (L'Eglise du Saint Esprit), at the south-west corner of Franklin and Church Sts., built by the congregation that formerly worshipped in Fane St., and largely completed (see 1832), is described, with plans, in N. Y. J. Mirrors, XII: 169, 178, 185; L. M. R. K., III: 932. It is a white marble building, costing $60,000.—Man. Com. Coun. (1862), 757, and see view in ibid., 284. See also Vol. I, P. 244-45.

Pena Jackson, in his annual message to congress, announces the extinguishment of the national debt. The money for this purpose was produced from duties on imports and the sale of the public lands.— Messages and Papers of the Presidents, III: 1526-27; Annals of N. Am., 374.
“The foundation of the Custom-house [until recently the sub-
3
treasury building] is completed, with all its vaults, abutments, 6
e tc.; the huge blocks for the columns are ready, and the workmen 6 are now engaged in erecting them. ’’—The Treasury House “is in a still more forward condition. The granite slabs of the first and second stories are all in their places; the pillars all stationed, and the partitions of the first floor com-
6
pleted. …”—N. T. Mirror, XII: 185. See My 31, 1836.

A society, having for its object to collect and rescue from ob-
19
livion every unrecorded action and incident of the Revolutionary and late wars, is established, and named the “Am. Historical Society of Military and Naval events.” In 1837, its officers com-
19
prised some of the most distinguished men of the time in New York.—N. T. At II, In 1837, 74.

31 “The New University [see § 13] is a mountain of white marble and brick, with Italian details, more incongruous than those of Wren’s towers of Westminster. …”—The Architectural Mag-
31

1835

— The second Seminole War began in this year and continued until 1842.—Winsor, VII: 497, 498, 439.

— In this year, a patent for a revolving pistol was granted to Samuel Colt.—Encyclop. Brit, VII: 756; Annex of N. Am., 574.

— In this year, Audubon published his work on the Birds of America.

— The population of New York City in this year was 279,029.—
Disturnell, N. Y. A. II: 11, In 1837, 11.

— “The ideal of quiet and genial retirement in 1835 was found in Washington Square, where the Doctor [or Dutchman] built himself a handsomemodern, wide-fronted, house, with a big balcony before the drawing-room windows, and a flight of white marble steps ascending to a portal which was also faced with white marble. This structure, and many of its neighbors, which it exactly resembled, were supposed, forty years ago, to embody the last results of architectural science, and they remain to this day very solid and honorable dwellings. In front of this was the square containing a considerable quantity of in-
expensive vegetation, enclosed by a wooden palizing, which increased its rural and accessible appearance; and round the corner was the more august precinct of the Fifth Avenue, taking its origin at this point with a spacious and confident air which already marked it for high destinies. I know not whether it is owing to the tenacious early association of New York with Amsterdam, appears to many persons the most delectable. It has a kind of established repose which is not of frequent occurrence in other quarters of the long, shrill city; it has a ripper, richer, more honor-
able look than any of the upper ramifications of the great longitudi-
33
dinal thoroughfare—the look of having something of a social history.—Washington Square, by Henry James (N. Y., 1844), 274-274. See also 1831.

— The condition of the N. Y. & Harlem R. is thus described: “About 4 miles of the road are now in use, upon which pleasure cars constantly run, for the accommodation of those who desire to get out of the city for a short time. When completed, there will be a tunnel of some length through a rock, at Yorkville, after which there will be a gradual descent to Harlem river. …” At present horse power is used. A locomotive engine was provided and used for a short time, but the boiler burst, and the engine was laid aside.”—Williams, N. T. Ann. Register, 1835.

Above 14th St., at this time, there was open country. See, further, Ap 18 and O 3.

— In this year, instruction was commenced in the unfinished building at N. Y. University on Washington Square.—Chambers,
33
lin, N. T. University (1901), I: 677; Eve. Post, My 19, 1837; descript. of pl. 133, III: 708. For the dedication, see My 20, 1837.

— In this year, a vase and a cock were added to the steeple of St. Mark’s Church.—Memorial St. Mark’s Church (1893), 54-55.

— In this year, the First Presbyterian Church, on Wall St, which was burnt out in 1834 (q.v., S 13), was rebuilt.—Greenleaf, Hist. of the Churches of N. Y., 1834; see also Vol. I, p. 295; and descript. of pl. 105, III: 607.

In this year was erected the “Sixth Free Presbyterian Church,” on Broadway between Anthony St. and Catharine Lane. It opened for worship in April, 1836, possessing the largest auditorium in the city at that time. Its name was afterwards changed to “The Tabernacle.”—Greenleaf, 179; Man. Com. Coun. (1846), 591.

Both this church and another Presbyterian church called the “Tabernacle,” on Catharine near Madison St. (Greenleaf, 192), were of comparatively short duration.

The Bank of America erected, in this year, a handsome bank-
33
building, with two columns in front, at 30 Wall St. This remained until 1837, when it was torn down, and the present edifice erected in 1887-88, Clinton & Russell being the architects.—Information obtained at the bank, correcting L. M. R. K., III: 924; descript. of pl. 145, III: 718. Duer, in his Reminiscences (1847), 5, states that, in 1783, there stood on this site a large, 3-storeyed double house, the family mansion of the Marstons, which was at that time occupied by Van Bercle, minister from the States-General of Hol-
33

In this year, Anson G. Phelps bought the old Henry Coster house, cor. First Ave. and 30th St., for $7,500; dec. of pl. 155, III: 610; trip. of pl. 155, III: 737; Man. Com. Coun. (1866), 7-6.

In this year, Chatham St. was widened from Pearl to Mott St.; also Liberty St. from Nassau to William St.; Wall St. from Pearl to Merchant St.; and William St. between Wall St. and Maiden Lane. Ninth Ave. was opened from Bloomingdale Road to 45th St.; 116th St. from Fourth Avenue to Harlem River; Second Ave. from 129th to 131st St., and from 28th to 28th St.; and Seventh Ave. from 21st to 214th St.—Man. Com. Coun. (1837), 532.

Views of New York in this year, reproduced in the present work, include (besides those cited under specific dates): the Chapman-Bennett view of the city, “Taken from the Bay ne-
33
r Bedloes Island” (Pl. 110); and the Horner view from Brooklyn (P1. 152), both in Jan. 1835.

For view of Pearl St., bet. Franklin Sq. and Oak St., 1835—

For view of the Geo. Hazzard house, Third Ave. and 84th St., 1835, see ibid. (1839), 599. This house, named from its proprietor, was “for many years, and until the introduction of more ex-
33
peditious modes of conveyance, the first stopping-place, on the route of the 'Danbury Post-coaches,' the only mode of public conveyance between the upper and lower portion of the city, until about the year 1835.…” Third Ave. “was one of the most magnificent drives in the world, being macadamized from Twenty-eighth street to the Harlem Bridge; and, taken in connection with 'Cato's,' or the 'Old Post Road,' which intersected the Third avenue at Forty-fifth street, and also at Sixty-fifth street, was much used by the carriages of that period, as a drive …” About 1845, the "Hazzard House" was enlarged and entirely changed in appearance.—Ibid.

A "Map of Spring Valley in the Twelfth Ward of the City of Jan-
33
York belonging to the Estate of George Youle dec'd,” sur-
veyed by Thomas R. Ludlam, city surveyor, and signed by him, bears this date. It is owned by the Title Guarantee & Trust Co.

The mayor approves an ordinance for filling in Burling Slip.—
33
Mayor's Message (1837), 52.

Washington Irving has purchased about 10 acres on the bank of the Hudson, three miles south of Tarrytown. “On the premises … there is still standing an old stone house, built in the ancient Dutch style of architecture during the French war. … We also understand that it is the identical house at which the memo-
33
rable tea-party was assembled so faithfully and admirably de-
scribed in the inimitable Legend of Sleepy Hollow, on that disa-
33
strous night, when the ill-starred Ichabod was rejected by the fair Katrina and also encountered the fearful companionship of Brom Bones in the character of the headless Hessians. …” —Eve. Post, Ja 28, 1835, citing Westchester Hist. A. A., which the mayor signs a resolution to construct a public pier from the ft. of Beach St., 200 ft. long and 30 ft. wide.—Mayor's Mes-
33
sage (1835), 55.

The street commissioner is authorised to expend $500 for trees or ornamenting Tompkins Square.—Proc., App’d by May-
33
or, III: 331. See also L. M. R. K., III: 971.
The St. Nicholas Society is organized by "several gentlemen, residents and natives of New York," at a meeting held at Washington Hotel. —From "Extract from the Minutes" of the society, pub. in the 1897 ed. of its Charter, Constitution, By-Laws, and List of Members, 3. It was incorporated April 17, 1841 (q.v.). See also the "Chronicle" of the society's events in ibid, 7-19 and D 5, 1848. This society is now at 43 Cedar St. Cf. J 24, 1834.

The council concurred in the resolution of the bodies of New York City with water (see My 2, 1842), report to the common council in favour of building the Croton aqueduct. This was referred to a committee of the board, which approved the plan and recommended that the subject be voted upon by the electors at the next election. The common council concurred in the committee report. —Eve. Post, Mr 20, 1835; Com. Proc., "Report of the Croton Aqueduct," 124; Man. Com. Coun. (1834), 220-21. See Ap 14.

The completion of the bulkhead at Bellevue, and filling in, cost the city about $45,000. —Doc., Bd. of Afd., I: 316.

"The Merchants Room News, corner of Wall and Pearl street, is now in full operation. We understand that the proprietor receives two hundred and fifty different newspapers." —Eve Post, F 20, 1835.

A plan of Harlem, showing the Harlem Canal, and giving street layout, bears this date. —See map No. 711 in bureau of topography, borough president's office. Cf. a plan of the proposed Harlem Canal, made by Edw. Smith, and bearing date of Jan 22, 1836, filed as map No. 719 in same office.

The common council resolves to contract for the building of a market "on the ground lately taken for market purposes in the 11th Ward [see J 6, 1834] of the same dimensions as the Jefferson Market." In May, it was named Union Market. This, De Voe says, was "no doubt from the fact that the Corporation intended to unite the Manhattan Market [see Mr 26, S 10, 1837] with this, as that market-place had proved a failure." When the building was finished, the transfer of the butchers was made. —Market Book, 326, 580, 581; L. M. R. K., III: 960. See O 24, 1835.

Writing from New York, William Ross describes in detail the architecture of the custom-house, now in course of erection at the north-east corner of Wall and Nassau Sts. (see J 4, 1834), in which he gives an account of alterations in the plans of the interior design, which he has made for the commissioners. He says a description of the approved (original) design may be seen in the N. Y. Mirror (q.v., Ag 23, 1834) —The Architectural Mag., London, 1835, 252-33 (with wood-cut drawings of the architects' drawings). See, further 1877, My 21, 1842. A beautiful water-colour perspective drawing of this building by A. J. Davis is owned by J. P. Morgan, Esq.

The "Peep Show Club," which meets every other Thursday evening for supper at the Washington Hall. —Hone's Diary, I: 134 Rev. Dr. Wainwright was the founder. —Ibid., I: 141.

The mayor signs a resolution for filling in the bulkhead on the southerly line of South St., from Pine St. Slip to Rutgers Slip. —Mayor's Message (1835), 66.

"As for the Buidewell, that still remains in a high state of preservation. There is talk, now and then, of sweeping it off from the ground which it clumbers, but as yet it is talk only, and we are prepared, though by no means willing, to see it remain in all its unmatchable ugliness for the next ten or twelve years. By way of increasing its charms —making it a still more agreeable object of sight—a small wooden building has lately been stuck just behind it, for which, if we are not advised; it has some what the look of an engine-house. Altogether the Bridewell or Jail, with its grated windows, its dingy stone walls, its high fence, its contemptible little belfry, and its kitchen, or stable, or engine-house in the rear, is quite an attractive object, and gives to the Park a very distinguished appearance." —N. Y. Mirror, Mr 21, 1835. See Ap 28, for its final to investigate the possible large Exchange Room several weeks since and the finishing touches having been gone through with, the enclosure was removed on Saturday, and the statue is now exposed to public view. . . .

The statue is chiseled from a block of beautiful Carrara marble. The figure is represented in a standing posture, with the Roman toga suspended over the left shoulder, and falling in graceful folds down the back. In the right hand is a baton, presenting a parch ment certificate of membership of the Cincinnati, resting on a square pedestal. . . ."—N. Y. Gaz. & Gen. Adv., My 28, 1835. See Ap 20.

The South Ferry is established, to run from Whitehall to or near the foot of Atlantic St., Brooklyn. —Proc., App'd by Mayor, II: 377, 412, 413; Eve Post, Mr 24, Ap 4, 1835. This closed a contest which lasted ten years to secure a charter for a ferry to Brooklyn south of Fulton Street, the attempt to do which was then blocked by the owners of the Fulton Ferry Co. —See D 23, 1835.

Cornelius W. Lawrence is re-elected mayor, the Whigs presenting no candidate in opposition. —Man. Com. Coun. (1834), 487. Ex-Mayor Hone, an active Whig, comments in his diary: "The Jackson people have renominated Mr. Cornelius W. Lawrence as Mayor, and the Whigs will not oppose him. I am glad of it, for if we do not take him we shall have a worse man; indeed, I have been well pleased with his conduct during the last year of his mayorality, and he would have my cheerful support but for the circumstance of his having recently vetoed a resolution of the Common Council which recommended to the legislature the passage of a law to register the votes. This is a measure so obvious and proper to secure the purity of our elections, and so loudly called for, especially in this city, by all who desire to preserve the peace and good order which ought to prevail at such times, that nothing but a blind devotion to party could have influenced the Mayor in his opposition to a measure so salutary." —Hone's Diary, I: 176-7.

The legislature passes the Commissioners' Map by widening Ave C from 60 to 80 ft. between 3d and 15th Sts. —Laws of N. T. (1835), chap. 46.

In the election held on this day and the two succeeding days, the voters of New York City cast 17,530 ballots in favour of building the Croton aqueduct (see F 16) and 5,961 against it. —Coliten, Memoir Croton Aqueduct, 153; N. Y. Gazetteer, I: 511; In 1837, 17; Man. Com. Coun. (1834), 220-21. See My 7, 1838.

The common council orders that William St. be widened to 50 feet between Wall St. and Maiden Lane. —Proc., App'd by Mayor, I: 380.

Geo. Repelye and wife cede to the city the following parts of streets: 35th St. from Ninth to Tenth Ave; 37th St. from fitaroy Road to Ninth Ave. and from Ninth to Tenth Ave; 38th St. from Ninth to Tenth Ave; 39th St. from Fourth to Ninth Ave. —Tenth Ave. —Proc., App'd by Mayor, I: 381.

The legislature passes an act to extend the time two years from this date for completing the N. Y. & Harlem R. R. The company is authorised to increase its capital stock $250,000, and to borrow from time to time sums aggregating not over $400,000. Authority is given to alter or repeal the act of incorporation of April 25, 1821 (q.v.), or its amendment of April 6, 1822 (q.v.). —Laws of N. T. (1835), chap. 101. Time was again extended in 1837-1838, chap. 55. See, further, My 12, 1836.

"Statue of Hamilton. —We have just returned from a visit to the Exchange where a most attractive object is drawing together crowds of admiring citizens. It is the statue of Alexander Hamilton, for the execution of which a fund was raised some two or three years ago by subscription among the merchants of this city [see Mr 28]. They have reason to congratulate themselves upon the admirable manner in which their intention has been fulfilled. The statue is carved from a single block of Carrara marble, the upper and anterior portions of which are purely white, and the back slightly veined with clouds or shades of an exceedingly pale blue. This should, perhaps, be considered a defect, but that it has ingeniously contrived to hide by such an arrangement of the folds in the drapery as makes the coloring of the marble almost imperceptible. The figure is standing with one foot slightly advanced and the weight of the body resting upon the other, the head erect and turned a little to one side as in the act of speaking. The left arm hangs in the easy natural position by the side, while the other, scarce enough raised, the hand grasping a scroll, the end of which rests upon a table. The costume is that
THE ICONOGRAPHY OF MANHATTAN ISLAND

of the time in which Hamilton flourished as a statesman and public orator; a coat with upright collar, small clothes, silk stockings, and the persplicative oratorical mantle or toga, knotted upon the left shoulder and falling away behind to a rich mass of flowing drapery; thus obviating the trim formal appearance of the close-fitting garments peculiar to enlightened nations.—The resemblance is perfect—so pronounced by those who knew Hamilton well, and moreover identical with all the good portraits of him we have ever seen. The execution is in the highest style of art; the attitude natural and unconstrained yet full of dignity; and it is evident that an immensity of labor has been bestowed upon the details not only of the face and figure, but also of the drapery. It is a magnificent production, worthy of the man in whose honor it was formed, of the liberality to which the city of New York is indebted for its possession, and of the talents and high reputation of the sculptor, Mr. Hughes."—N. Y. Com. Adv., Ap 20, 1835. Cf. May 14, 1836.

On this day, the committee of inspection, "appointed by the original agreement between the building Committee of the Merchants' Exchange . . . and R. Ball Hughes, Esq., to examine, inspect and express an opinion upon the statue . . .," certify that they have done so, and that it meets their "unqualified approbation . . ." This is signed by John Trumbull, David Hosack, John D. Jacoby, and J. Delafield.—N. Y. Gaz. & Gen. Adv., Ap 20, 1835. The statue stood on a pedestal of gray granite—N. Y. Mirror, XII: 351. See O 24.

For map of "Randel's" (Randall's) Island, bearing this date, see Man. Com. Coun. (1835), 492.

Hone describes the increase in the valuation of lots in "the upper part of the city" on Second Ave. near St. Mark's Place.—Hist. Dict. I: 140 (also 138).

May 1

1. The first number of the New York Herald appears, James Gordon Bennett being the publisher. The second number was issued on May 11. Many of the features of the modern newspaper, and many of the methods of modern journalism, were first introduced by the Herald. Among these were: the financial articles; the system for gathering news; the publication of maps and illustrations (in 1838), and the arrangements made the same year for foreign correspondence; and the general spirit of enterprise which in 1835 led to the establishment of express from Texas to Mexico.—North, Newspaper and Periodical Press, 95; Annals of N. Am., 573. See also Pasko's Old N. Y., II: 234 and Haswell's Reminiscences, 295.

7. The common council passes a law instructing the water commissioners "to proceed with the work of supplying the City of New York with a sufficient quantity of pure and wholesome water, for the use of its inhabitants, according to the plan adopted by them" (see F 16), and providing for the creation of a public stock amounting to $2,500,000 to be called "The Water Stock of the City of New York."—Proc., App'd by Mayor, II: 401-5. See J 2.

11. The first number of the Evening Post also appears. It was the organ of the common council to alter the Commissioners' Plan of the city by fixing the permanent exterior street on East River between 13th and 23rd Sts.—Laws of N. Y. (1839), chap. 268.

12. "The fashionable end of town is now decidedly at Washington Square, and the surrounding neighborhood from Bleecker Street to Albion Place. The elegance and beauty of this section cannot be surpassed in the country,"—Morning Herald, My 12, 1835. See also descr. of Pl. 135, III: 701.

14. The common council passes an ordinance "To regulate and pave Union place, agreeably to a plan adopted by the Common Council, the 12th of November, 1834," and assessors are appointed.—Proc., App'd by Mayor, II: 410. See J 29.

23. The subscription to supply the common council with a map of Manhattan Island is opened.—Eve. Post, My 25, 1835, citing Gaz. Until 1849, the cafe was popular after which Palmo abandoned this occupation, and erected an opera house in Chambers St. This afterwards became Burton's Theatre, and, in 1865, was occupied by the United States Court.—Man. Com. Coun. (1865), 572.

30. There is published, with a detailed description, an engraving design by the "firm of colours worked to the National Guard by the corporation of the city of New York," which in a few days will be presented by the governor in the city's behalf.—N. Y. Mirror, My 30, 1835.

June

2. The water commissioners appoint David B. Douglass their chief engineer and direct him to organize a corps of assistants.

In accordance with his report, four additional engineers, five rodmen, and seven labourers and chimneymen were appointed.—Dec. 12, 1835, of Ald.; Ag 1, 1835, cited Adr. 1834-5, 46. The Society Library, in conjunction with the Athenæum, buys two lots on the east side of Broadway, bounded by Leonard St. and Catharine Lane. Here a building was later erected, which was first occupied by the library on April 30, 1840 (p. e.)—Keep, Hist. of the Society Lib., 341, 343, 381.

A fire breaks out in the rear of 200 Elizabeth St., in the centre of the block bounded by Prince, Elizabeth, Houston, and Mott Sts, opposite the Catholic cathedral. "About 20 houses were destroyed or badly damaged, including the whole block on Prince and about half that on Mott street. The buildings were almost all of wood and occupied by a great many families, together with taverns, 'penny-loaves,' grocers, etc."—Eve. Post, Je 8, 1835, citing Jew. of Com.; Costello, Our Firemen, 220.

The mayor approves a plan for widening Wall Street between Pearl and Hanover Sts.—Proc., App'd by Mayor, III: 12.

On board the U. S. frigate "Constitution," at sea, the "Commissioned and Warrant Officers" of the ship draw up resolutions, expressing the need of a military school, and outlining a method of establishing it. It was probably the first organized movement looking to the establishment of a naval academy in this country. The resolutions name a committee of ten "to take charge of the subject and conduct it to its final disposition," and require that the resolutions be printed; that the secretary of the navy be requested to lay a copy before the president of the United States; that copies be sent to the chairman of the committee on naval affairs in the senate, and in the house of representatives, to each naval station, squadron, and U. S. ship in commission; that a copy be furnished to the Hon. Edward Livingston, now on board the Constitution; and that one be sent "to the commander of this ship, inviting his aid in furtherance of the object of this meeting."—N. Y. Times, Ap 20, 1835, which gives the full text of the circular, contributed in a letter from Lieut.-Commander E. S. R. Brandy, U. S. N., in connection with the subject of raising a fund to preserve the frigate "Constitution." The Naval Academy at Annapolis was founded ten years later. See 1845.

A riot occurs in Chatham St. between a number of native citizens and Irishmen. About 20 or 30 are arrested.—Eve. Post, Je 12, 1835, citing Daily Adv. See also ibid., 30, 24, 1835. The dissensions were caused by an attempt to raise an Irish regiment to be called the O'Connell Guards.—Ibid., Je 25, 1835. See also ibid., Je 26, 27, and 30, 1835. Haswell says that Dr. McCaffrey was killed during the encounter and that this was known as "the Five Points Riot."—Haswell's Reminiscences, 298.

The committee on public lands and places, to whom was referred a memorial from a large number of the proprietors of lands at Harlem, asking the common council to lay out a public square (Mount Morris Square) between Fourth and Sixth Aves, 120th and 124th Sts, makes a report favouring the proposal. The rocky eminence here, 70 ft. high, is "crowned with various kinds of forest trees, many of them of great antiquity and possessing altogether a very peculiar and distinctive character." The place is unsuitable for building lots, because of the immense cost to level the height. It is, however, adaptable for the purpose proposed, on account of "its insular situation, its great height, its conical figure; the trees with which it is covered," and the possibility of converting it into a place of ornament and beauty. No public place has yet been laid out at Harlem, and this ground is not too large for the purpose. The whole cost will be $2,000,000 on the surrounding property. A resolution is therefore approved "that application be made to the Legislature . . . for the passage of a law authorizing such alteration in the map or plan of the City as will permit the forming and laying out of a Public Place between 120th and 124th Street and between 4th and 6th Avenues . . ."—Proc., Bk. of Ald., IX: 15, citing Doc. No. 10. On Nov. 5, the mayor signed a joint resolution that such application be made to the lady be authorized by Mayor, III: 96. This was reinforced by another joint resolution, approved by the mayor on Jan. 22, 1836, that such new square be laid out.—Ibid., III: 162. See also Mr 17, 1836. For the desired legislative act, see My 15, 1836.

The U. S. frigate "Constitution" ("Old Ironsides") arrives at New York with Edward Livingston, minister to France, on board. "An immense concourse of citizens was assembled on the Battery
to greet him on his arrival." On June 24, he received visitors in the governor's room of the city hall.—*Even. Post*, Je 23 and 24, 1835. On July 16, a public dinner in his honour was held at the City Hall.—*Ibid.*, Ji 17, 1835.

David B. Douglass and his assistants begin to survey the line of the Croton aqueduct. They continued with the field work until Jan. 8, 1836, and began again on April 11, 1836, resurveying the line.—*Doc.*, 12, *Ed. of A.I.*, Ag 1, 1836.

The mayor signs a resolution directing the sale of the old Greenwich Market in Christopher St., and the grounds which it stands was repaired and appropriated for a "Courthouses" market, as part of the Greenwich Market.—*Mayor's Message* (1836), 16; *De Voc.*, 403; L. M. R., III: 959. See the Weehawken Market, Ja, 1834.

"Trees in Wall Street.—The subscription for planting this street with a row of Allanthuses, or 'trees of heaven,' goes on swimmingly. The mode of subscribing is—for so many trees each,—already there are about 50 trees on the list,—but nearly twice that number will be required. ..."—*N. T. Gaz. & Gen. Adv.*, Ji 3, 1835.

The common council appropriates "a further sum of ten thousand dollars... to complete the necessary expenditures for granite coping, iron railing, and otherwise improving Union Place."—*Proc.* by Mayer, III: 45; *Doc.*, *Ed. of A.I.*, Ji: 73 (Doc. No. 19). See also descrip. of Pl. 155, III: 702.

The mayor approves a joint resolution for forming and opening the public square between 21st and 34th Sts., on both sides of Fourth Ave.—*Proc. App'd by Mayor*, III: 45.

The mayor signs resolutions as follows: For opening Ninth Ave. from 45th St. to the Bloomingdale Road; adopting the plan presented by the street commissioner for regulating the avenues and streets of Harem from 109th to 135th Sts., and from Ninth Ave. to Harlem River; and providing for an exterior line on the Harlem River; and directing the street commissioner and street committee to employ persons to prepare a plan for the grade of this island.—*Mayor's Message* (1836), 25.

A disastrous fire destroys 6 buildings in Fulton St., 13 in Ann St., including the Catholic Church, and 9 in Nassau St. Three people are killed.—*Even. Post*, Ag 12 and 13, 1835.

"Great excitement prevails in all parts of the country on the subject of the attempts made by the friends of immediate emancipation to excite the slaves of the South to resist the authority of their masters; at least, such is the alleged tendency of the indiscriminate measures taken by persons who have engaged to that cause."—*Hone's Diary*, Ji 155.

"One of the stones of the new Custom House weighs twenty-seven tons. It was drawn to this city from the quarry in Westchester County, on a carriage made for the purpose, by a team composed of two pair of horses and sixteen yokel of oxen."—*Even. Post*, Ag 15, 1835.

The Dutch frigate "Maria" and the brig-of-war "Succesd" arrive from Curacao. "In passing through the Narrows, they exchanged salutes with fort Lafayette. On board the frigate is His Royal Highness Prince Henry, son of H. R. H. the Prince of Orange."—*Even. Post*, Ag 25, 1835.

"The beginning of panic operations in this city. The evils which the abolitionists had been predicted began to be wreaked upon this devoted metropolis by the United States Bank. The New York Branch yesterday drew half a million of dollars in specie from the state banks. ... The transaction of yesterday may seem to some but like a little cloud on the verge of the horizon. Yet let them remember that it is in that way that the tornado makes its first threat, but soon after wraps the heavens in a pall and spreads the ocean with wreck."—*Even. Post*, Ag 25, 1835.

"The abolition question continues to agitate the public mind, and acquires hourly a most alarming interest. A great meeting is to be held to-morrow afternoon, in the Park, of those opposed to the incendiary proceedings of the abolitionists."—*Hone's Diary*, Ji: 156-57. See Ag 27.

At the meeting in the Park (see Ag 26), resolutions are adopted against the abolitionists, and against the interference of individuals between the masters and the slaves in the Southern States.

Hone records: "The plan for macadamizing the street before my house not having fully answered public expectation, the corporation have been trying a new experiment in Broad street in front of the block between Warren and Chambers streets, copied from a plan of paving in St. Petersburg, Russia. The street is excavated to the depth of about two feet; a layer of broken stone is placed, such as is used for macadamizing, on the top of which a regular pavement of round stones, the whole covered by a compact course of wooden blocks, hexagonal, one foot in length, and placed vertically. These are made to fit very neatly, the interstices (which of course are small) filled with liquid tar, and covered with a thin coat of gravel. The street was used yesterday for the first time, and the multidimensional train of omnibuses, carriages, carts, and wagons which infest Broadway appeared to pass over the new Aspian way 'pretty tolerably slick.' But it remains to be seen whether hemlock tallow is less destructible than black stone, and whether the tinct layers of road may not peradventure cost more than one."

In a series of letters to his brother Peter, who is at Havre, Washington Irving, writing on several occasions between Aug. 24, 1835, and Feb. 16, 1836, records his progress in writing *Aertisa*. This work was written at the residence of John Jacob Astor, which was situated at 88th St., near East River. See view in *Man. Fam. Com. (1864)*, 208. In a letter of Sept. 26, 1835, he thus describes the place:

... For upward of a month past I have been quartered at Hellgate, with Mr. Astor, and I have not had so quiet and delightful a nest since I have been in America. He has a spacious and well-built house, with a garden in front of it, and a garden plot rear. The lawn sweeps down to the water edge, and full in front of the house is the little strait of Hellgate, which forms a con-
THE ICONOGRAPHY OF MANHATTAN ISLAND

Stanley moving picture. Here the old gentleman keeps a kind of bachelor hall. Halleck, the poet, lives with him, but goes to town every day, and comes out to dinner. This only child and member of his family is one of his grandchildren, a very fine boy of fourteen years of age [Charles Astor Bristed]. . . . I cannot tell you how sweet and delightful I have found this retreat; pure air, agreeable scenery, a spacious house, profound quiet, and perfect command of my time and self. . . . Life and Letters of Washington Irving, by W. C. Brain, Pierre M. Hopping, III: 78. 30

In this month, a meeting of eight persons was held at the house of Knollen Thomas, in Bond St., and a movement started "to establish a theological seminary in this city," which eventually resulted in the founding of the Union Theological Seminary of to-day. A seminary fund was raised, amounting to $61,000 in Jan., 1836. — Lossing, Hist. of N. Y. City, III: 447-48. See, further, 31

The second convention (for the first, see Apr 25, 1834) of the "National Trades' Union of the United States" assembles at 15 Park Row, an application for the use of a room in city hall being refused. The sessions continued through Oct. 6. Among the reforms discussed by the delegates and concerning which resolutions were presented and adopted, were: A universal ten-hour day for government workers; abolishing the system of employing convict labour in competition with other labour; a salary for compensation for female labour; check on multiplication, for females, "of all description of labor." The last is deemed "a moral injury" to the "youthful female," in forcing her "to associate with the men of all descriptions," and thereby "acquire the ruder habits of the males;" further, the competition it creates with the males "tends inevitably to impoverish both." — A Doc. Hist. of Am. Indus. Soc., VI: 228-63, and authorities there cited. 32

On invitation of the directors of the N. Y. & Harlem R. R., a party is shown the new road from the city to Harlem. The members of the senate and common council are among them. They view, from Prospect Hill, the discharge of several hundred blasts for excavating the tunnel. The embankment, arched carriageways, etc. are described. — N. Y. Gaz. & Gen. Ado., O 5; Com. Ado., O 5, 1836. See 1837. 33

"An Old Citizen" writes to one of the papers: "The increase of our population, owing to the commercial prosperity of the last few years, has so far exceeded all expectation, that no adequate provision has been made to meet the future or even present demand for building lots. The graduation of streets, as established by the Corporation ordinances, does not extend beyond 33d street and the streets above have been opened by law, and several even below that line are not distinguishable from the adjacent pasture fields. It is computed, on the best authority, there are not more than 3,000 lots in a situation now to be built upon which are unoccupied. This does not exceed a single year's supply. . . . The effect of this state of things is that no lots, suitable for occupation, can be obtained under $1500 or $2,000, and that our enterprising and industrious young merchants and mechanics are expelled from the city in which their business is transacted, and compelled to remove to the neighboring shores of Long Island and New Jersey. . . .

"The only efficient means of retaining our citizens on the island is to graduate forthwith the city at least as far as Flarlam Bridges, as well as the intermediate space between 33d and 40th st. as that which lies within the village, and to open at once all the streets, as high as 44th street, and such other streets and avenues beyond that line, as may be applied for by the adjacent owners or are required by the general convenience. . . . Carpenters and masons can cover the three thousand lots now ready for occupation with magnificent edifices, long before the commissioners are prepared to report the survey of the streets and avenues, other owners opening these streets below 42d street; a Custom House and a new City Hall can be much more easily erected than, judging from the progress made in enclosing Union Square and paving the adjacent streets, the new avenues can be regulated. The prosperity of the city calls for an efficient organization of the Street Commissioner's department. The present Corporation, and particularly the able Chairman of the Street Committee of Oct. 3, the Board of Aldermen, and the Alderman and Assistant of the 12th Ward, have, by their prompt and judicious improvements are precisely situated, have done all that can be expected from them. Legislation is, however, of little avail without the co-operation of the executive officers, and the resignation of the present street commissioner will enable the Common Council to place that department on a footing commensurate with its importance, and the varying details entrusted to it." — Ev. Post, O 3, 1835. See 2. 34

Clinton Country Market at the foot of Canal St. is opened. — Ev. Post, O 27, 1835.

The Union Market (see Ja 6, 1834; Mr, 1835) opens for business. — De Voe, 582. See My 4, 1836.

A wood-cut view of the statue of Hamilton (see Mr 28, Ap 20), in the exchange, is published. Drawn and engraved by Adams, It is said to be "a correct representation of the statue." — N. Y. Mirror, XIII: 129; Emmet collection, 1174. See, however, D 17.

Houses, stores, churches, and other buildings, to the number of 848, are now being erected in New York below 23d St.; Ev. Post, O 27, 1835, citing Daily Adv. 35

The "large and elegant" country mansion of Jas. F. Depeyer, near Bloomingdale Asylum, is destroyed by fire. — Com. Ado., O 28, 1835.

A general meeting of Democrats takes place at Tammany Hall to determine party principles and nominations. The regulars are outnumbered by the "Anti-Bank" and "Anti-Monopoly" faction. When the former turned out the gas, "in the twinkling of an eye, hundreds of candles were pulled from the pockets of the people, while the aid of love face matches were immediately lighted." — Ev. Post, O 26, 1835. This incident represents his wing of the Democratic party the "Loco-Focos." — Cf. Byrdall, Hist. of Loco-Foco Party, 23-28; also Pl. 126-b, "The Times," and its description, 36: 690-91.

"We understand it is ascertained by actual survey, that this island comprises thirteen thousand acres, and it is estimated that one thousand acres will eventually be added to it by extending into the rivers and filling up of marshes. The fixed and unoccupied acre is comprised in the line below Grand street, from river to river—from Grand street to twenty-first street there are two thousand acres. In these three thousand acres, it is supposed there are yet vacant lots sufficient to accommodate not only the whole present population of the Island but enough more to make up the number of 600,000—or the number of 100,000 inhabitants to one thousand acres, allowing about the same density of population that now exists below Canal street. — It may be seen from this, that the whole Island is capable of accommodating nearly a million and a half of inhabitants—and if our population continues to increase in the same ratio it has done for the last thirty or forty years, the Island will be filled to its whole extent, in a period of less than half a century. — Ado., 23d, C 29, cit. of Advance. — Honc write: . . . . the Italian opera does not succeed, and the proprietors are about selling their opera-house (the nestest 37

Next and most beautiful theatre in the United States, and unsurpassed in Europe); but there are two reasons for this, both of which savour much of the John Bulliam which we have inherited from our forefathers. The first is, that we want to understand the language; we cannot even sit by and see the performers splitting their sides with laughter, and we not take the joke; . . .

The other is the private boxes, so elegantly fitted up, which occupy the whole of the second tier. They cost six thousand dollars each, to be sure, and the use of them is all that the proprietors get for their money; but it forms a sort of aristocratical distinction. Many people do not choose to occupy seats (more pleasant and commodious than they can find in any other theatre) while others recline upon satin cushions, and rest their elbows upon arm-chairs, albeit they are bought with their own money. . . . I like this spirit of independence which refuses its countenance to anything exclusive. . . . "— Honc's Diary, I: 170.

Home describes eccentric conduct exhibited by Booth, the 13th stagecoach. He was first the damages and opera theatre, which indicates a partial derangement of mind.—Honc's Diary, I: 171. This was Junius Brutus Booth, a lineal descendant of John Wilkes, and the father of Edwin Booth and John Wilkes Booth. "His irregular habits shortened his life." — Lossing, Harpers' Popular Cyclopaedia of U. S. Hist. (1893), I: 143.

"A vessel will depart to-day for Texas, with nearly two hundred 19
1835

Nov. 19

volunteers. She goes direct to New Orleans, which is to be the rendezvous for four other vessels also with volunteers—immediately after their arrival, not including the body for Texas—New Post, N. Y., Nov. 15, citing Merch. Adv. These volunteers were to help Texas in her struggle for independence.

A news item reads: "Astor's Hotel.—The exterior is nearly completed and the appearance far surpasses expectation, for size and solidly no building in the United States will compare with it. The building and the ground cost over half a million of dollars. The upper part, not including the ground floor, is projected for twenty thousand dollars per annum. Mr. Astor to furnish it; to do which he is to expend Eighty thousand dollars; the tenant is to pay an interest on this sum of six per cent. making four thousand eight hundred dollars, together with the taxes on the same, amounting to sixteen hundred dollars. The rent will therefore be twenty-five thousand four hundred dollars. There are eighteen stores on the basement, on Vesey and Barclay streets, and on Broadway. These will rent for at least five hundred dollars each—making in all a rent of thirty five thousand dollars in round numbers; yielding over six per cent. for the first lease. The interior of the house is in a rapid state of finish, the furniture is in contract, and every effort making to open the doors on the first of May next."—Eve. Post, N. Y., Dec. 15, citing Daily Adv.

Some surprising speculations are published concerning improvements in New York and elsewhere by the year 3000. Bridges over the two rivers; quays extending two miles up each river; gunpowder antiquated, and in its place a machine "by the breath of which an army of a million men may be destroyed in an hour," and which has decided for ever against all future attempts to the settlement of international differences; a tunnel from New York to Staten Island abandoned in favour of an aerial ship; New York City with a population of 10,500,000—there are some of the features of the prophecy.—N. Y. Mirror, XIX, Dec. 17-21.

"There appears to be a serious move in the City Councils, town, in layout streets and Avenues in the Twelfth Ward. A large portion of the owners of lots in that section of the city, reside in the lower part of the City. The great facilities offered to the inhabitants to reside at Brooklyn, Staten Island, Jersey City and Williamsburg, begins to alarm land owners, who at length see that unless equal facilities are afforded to reach the Twelfth Ward, that portion of the city will not be benefited by the great increase of population. The crowded state of Broadway is such, that Avenue must be opened to be relieved. Hudson street should be brought down in a straight line to the intersection of Courtland street and Broadway; this would be a great accommodation to persons residing on the west side of the city. William street should be widened and extended to Chatham street, Henry street opened into William street. The Third or Fourth Avenues should be opened into centres so that Rail Road cars could start from the rear of the City Hall. These improvements which have long been talked of, should be done without delay, they can be made at a less expense now, than any other time, and when done, would increase the value of Real Estate in the Twelfth Ward, twenty to fifty per cent."—Eve. Post, D 2, 1835, citing Daily Adv.

The St. Nicholas Society celebrates its first anniversary with a dinner at the City Hotel.—Eve. Post, D 7 and 8, 1835.

A fire, starting in a store on Merchant St. (later called Hanover St.), corner of Pearl, rages along Water, South, Front, Pearl, Stone, Beaver, Mill, Hanover, Merchant, William and Wall Sts., Hanover Square, Coventry Ship, Old Ship, Jones' Lane, Gouverneur Lane, Guyless Alley, and Exchange Place, and consumes nearly 700 houses in 17 blocks, chiefly large shipping and wholesale dry-goods and grocery houses. It is the section which contains the banks, the Stock Exchange, and the post-office, the very heart of the city. The merchants' exchange on Wall Street, built in 1825-1827, and the South Dutch Church in Garden St., are destroyed. With the latter is also destroyed the corner-stone of the old church in the fornt, unearthed in 1798 (6-8) by workmen digging up the foundation of what George, and the addition of the Garden St. church. (See further, F 15, 1835.) Certain buildings were blown up with gunpowder to stop the spread of the flames (see Mayor's Message, 1836, 71).

The white marble statue of Hamilton, which stood 15 ft. high with its pedestal, in the rotunda of the exchange, is lost. It had been erected "by the munificence of our merchants during the present year;" but now "is mixed with the ruins of the ill fated structure it was erected to adorn."—N. Y. Com. Adv., D 17, 1835.

A joint effort was made to erect the statue of Hamilton by a young officer from the navy yard with a party of four or five sailors. They had actually succeeded in removing it from the pedestal, when the danger from the approaching fall of the roof, compelled them to seek safety in flight."—Ibid., D 21, 1835. See also descrip. of Pl. 115, III: 619.

Bell Hughes retained possession of the original model of his Hamilton statue, the destruction of which left New York without any public statue.—N. Y. Mirror, XIII: 391, 377 (Mr 19, Ap 9, 1836).

During the progress of the fire, Alexander Robertson made a sketch of it. He "placed himself among the smoking ruins of the once magnificent City Hall [error for merchants' exchange], close to one of the great marble columns of its portico," and remained, until his drawing was finished.—The Art of Seeing, by an Artist [Andrew Robertson], ed. by his daughter, Emily Robertson, the title-page of the work being Elementary and Practical Hints as to the Perception and Enjoyment of the Beautiful in Nature.

The Chamber of Commerce, which was in the exchange, lost the manuscript of its charter. In this building were the board of brokers, the post-office, and several banks. The Franklin Market at Old Slip was also destroyed.

Proc., App'd by Mayor, III: 1125.

For all full accounts of the disaster, see the newspapers of the next few days,—for example, the N. T. Eve. Post, D 171; N. T. Herald, D 18, 1835; also Howe's Diary, I: 180-88; N. Y. H. S. Collections (1849), 419, 449; Costello, Our Pasts, 602; and MS. letters in the "Shoe and Boot", state, 1835, and the New Book, XICH: 1836. An 8vo pamphlet was published by C. Foster in 1835, and again in 1836, entitled An Account of the Conflagration of the Principal Part of the First Ward of the City of New York. With numerous etchings and a plan Showing the State of the Ruins, with a list of names of the persons burnt out, etc. (containing 4 views and plan). Other accounts are found in Stone's Hist. of N. Y. City, 471-86; Lossing, Hist. of N. Y. City, I: 345-455; Watson's Annals, 386-89.

Scenes during the fire are shown on Pls. 114 (a and b) and 115, Vol. III. See the descriptions of these (III: 617-19), and authorities there cited; and see references to the fire in the descriptions of Pl. 110, III: 614; Pl. 132-3, III: 685; and Pl. 146-3, III: 717. A view of the fire from Wechaw, "Drawn on Stone by A. Picken from a Sketch taken on the spot by Lieutenant Westbrook," is found in the N. Y. P. L. (Emmet 11512). Another lithographic view of the fire is in the Eco. connoisseur.

On Dec. 21, 1835, the Herald described the burned territory, with an account of the property destroyed, and a ground plan of the region devastated (Emmet 11515). See also the map published in the Eve. Post, D 22, 1835.

The members of the N. Y. Stock and Exchange Board, which had held its sessions in the merchants' exchange, meet at John Warren's office, and vote "to suspend all operations for the present week, and appoint a committee to secure rooms." On Dec. 19, the committee reported that they had engaged temporarily a room at Howard's Hotel, No. 8 Broad Street, at three dollars a day. A portion of the site of that hotel is included in the site of the Stock Exchange building as it stood in 1894. The records of the board were saved from the fire (see D 16) in an iron chest.

On Dec. 23, the committee reported that they had engaged "the back room of the basement store in John Warren's building, of Mr. Pepoon, at the rate of 750 Dollars per annum, for the use of the Board."—Eames, The N. Y. Stock Exchange, 29-30.

The common council requests the mayor to call a meeting of the citizens to devise measures "for remedying the effects of the serious calamity with which this city has been visited." A joint committee of the two boards is appointed to inquire into the causes of the fire.—Proc., App'd by Mayor, III: 125-27.

A large public meeting is held with Mayor Lawrence in the chair, and it is resolved that a committee consisting of the mayor and 25 citizens be appointed "to ascertain the extent and probable value of property destroyed, and how far the sufferers are protected by insurance: Also, with power to make application to Congress for relief by an extension of credit for debts due the United States, and a return or remission of duties on goods destroyed: And also to ask for such other aid from the General, State, and City Governments as may be deemed expedient: Also to ascertain the origin
THE ICONOGRAPHY OF MANHATTAN ISLAND

1835 and cause of the fire, and what change if any should be made, Dec. either in the regulations of streets, the erection of buildings, or the arrangement of the Fire Department, to prevent a recurrence of similar calamities, and to take such other measures as the emergency may demand. . . ."—Eve Post, D 19 and 21, 1835.

"The Merchants' Exchange is held at the Mechanics' Exchange in Broad Street; the post-office removed to the rotunda in Chambers street. The printing-offices, of which a large number are burned out, are distributed into different places, and it is amusing to see the holes and corners into which the merchants have stowed themselves."—Hone's Diary, I: 186. On Dec. 21, the Post said: "The Rotunda in the Park is fitting up for the Post Office, to which place it will probably be moved this day."—Eve Post, D 21, 1835. See D 28.

The common council requests the mayor, in connection with the president of the board of trade, and Chamber of Commerce, "to apply forthwith to the proper departments of the Government of the United States, . . . to extend every possible facility to all the Banks in this city, and especially by loaning to said Banks a large proportion of the surplus revenue of the United States, and of affording relief to the citizens who have sustained loss by the late fire . . ."—Proc. App'd by Mayor, III: 128.

It is "refused to the Committee on Fire and Water, of both houses, to confer with the Committee of the Citizens on the propriety of such effective measures as they may deem proper, to rescue the property now buried under the ruins of the late fire in the First Ward."—Ibid, III: 129.

The mayor signs a resolution that the lease of Castle Garden, held by H. Marsh, be renewed for five years, preserving the conditions of the old lease, excepting that the rent will be $1,000 per annum. The lease will be void in case the "Castle" should be wanted for the defence of the harbour.—Mayor's Message (1835), 61.

The mayor signs a resolution appropriating $3,000 for the purchase of a lot and erecting a justices' court-room and house of detention at Harlem in the Twelfth Ward.—Mayor's Message (1835), 65.

As the fire of Dec. 16 "was increased . . . by the narrow streets and high stores on each side thereof, and the total destruction of all the buildings in that section of the city renders it expedient and advisable to alter the route and width of the streets through the same," the common council therefore recommends "to the owners of lots in that section of the city, to meet together on Wednesday next at 12 o'clock, in the Superior Court Room of the City Hall, and take the necessary measures for the adoption of a practicable plan for altering the same before commencing any buildings."—Proc. App'd by Mayor, III: 129.

"We believe every citizen will rejoice that the Corporation have promptly come to the relief of the citizens. A plan was adopted last night by the Common Council for creating a stock of six millions of dollars, bearing an interest of five per cent, which shall be exchanged for Bonds and Mortgages held by the Insurance Companies. This will enable the Companies to pay promptly; and all the sufferers will be relieved. We believe the simple fact that the city will take these bonds and mortgages, will induce capitalists to come forward and take the mortgage at once; so that before the loan is even consummated, all the mortgages will be taken up, and the city saved from any expense or trouble."—Eve Post, D 22, 1835. citing Daily Adv.

Dr. Hossack dies.—Hone's Diary, I: 189-98.

The common council orders "That an iron railing be placed round the basement of the City Hall, similar to the one on the west side of the Hall of Records, with stone wall and coping [described in a filed report] . . . that the Superintendent of Building be directed to advertise for estimates for the same, and carry the same into effect, under the direction of the Building Committee."—Proc. App'd by Mayor, III: 136; Mayor's Message (1836), 69.

For the year ending on this day (of S 30, 1820; 1825; 1830), 32,715 passengers arrived at the port of N. Y.—Arrivals of Alien Passengers and Emigrants (1831), 64.

1836

In this year, John Ericsson patented the screw-propeller, which he had invented and operated in 1823-1835.—Map of Am. Hist. (1891), XXV: 11; Ibid (1892), XXVIII: 173-74; Church, Life of John Ericsson, I: 89 passion, 98-99.

A report, in 1835, presented the following concerning American 1836 manufactures "American Institute.— . . . "The late annual fair," says the writer, "was closed by an able and elegant dissertation on the rise, progress, and present prospects, of the various manufactures within our borders. . . . The single article of iron, manufactured and vended in this city in 1836, amounted to seven millions of dollars; and although a temporary stagnation of business has somewhat diminished the trade, the manufacture is still on the increase, some articles having even been largely required for the London market. . . . In 1838, the American Institute introduced the culture of silk within our borders, and by the exertions of its members, the question as to whether its growth was adapted to our climate, was speedily solved in the affirmative. The importations of this one article, for the last sixteen years, amount to one hundred and sixty-seven millions, and in the year 1856, to twenty millions. . . ."—Knickerscher Mag. (1838), XX: 54.

Joseph Henry, one of those who claimed to have invented the electro-magnetic telegraph—in Albany in 1830 (p. v.)—wrote, in 1836: "I think the first actual line of telegraph, using the earth as a conductor, was made in the beginning of 1836. A wire was extended across the front campus of the College grounds [Princeton] from the upper story of the Library building to the Philosophy Hall, on the west side, and we put in a line of chimes, comparing this with the apparatus of a telegraph, and measured the rise, decay, and transit of the current in the wires. Through this wire signals were sent from time to time from my house to my laboratory."—From Henry's letter to Rev. S. B. Dod, author of "Princeton and Science," in The Princeton Book (1839), 96.

In this year, Mrs. Ernestine L. Rose, a Polish lady, began lecturing through the United States, one of her subjects being "Equal Rights of Women." She sent a petition with five names to the New York legislature concerning property rights of women, and another later with 30 names; but the legislature took no notice of either of them.—Annals of N. Am. 575.

In this year, the city charter was published with annotations by James Kent, chancellor of the state, together with a treatise by him on the power, duties, and authority of the mayor, aldermen, and district aldermen.

In this year, the Manhattan Company extended its system of water-works northward along Broadway as far as Bleecker St., and it then had about 25 miles of mains and supplied about 2,000 houses. The company continued to operate its system until the introduction of the Croton water in 1842.—20th Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1915), 207-8.

In this year, 1826 buildings were erected in New-York.—Eve Post, 0 10, 1837.

In this year, the College of Physicians and Surgeons removed to the building of the Girls' Normal School, at 67 Crosby St.—See L. M. R. K., III: 940. See, further, 1855.

In this year, the erection of the edifice known as the "Halls of Justice," held later as "The Theatre," was commenced, on ground selected in 1834 (p. v., N 24) by the common council. It was finished in the summer of 1838 (p. v.).

In this year, St. Bartholomew's Church on Lafayette Place was opened. The site was later occupied by the Roman Catholic Mission of the Immaculate Virgin.—Mrs. Lamb in Mag of Am. Hist. (1896), XVI: 11.

In this year, a stone portico, clock, weather-vane, and other improvements, were added to St. Mark's Church.—See descrip. of Pl. 119, III: 624; Memorial of St. Mark's Church (1899), 55, 139.

In this year, the third church of the Scotch Presbyterians (see 1756) was erected, at the corner of Crosby and Grand Sts. Five lots were purchased there for $10,000. This edifice was larger than the Cedar St. building (see 1768), and was constructed of bluestone and Morrisania marble. The congregation occupied it only about 16 years. It was then sold, for $55,000, to a sister congregation, now known as the Fourth Presbyterian Church.—Wylie, Our Jubilee. The 150th Anniversary of the Scotch Presbyterian Church, New York 1756-1906, 15-17; Greenleaf, Hist. of Churches in City of N. Y., 205-6; see also L. M. R. K., III: 972. The Scotch Presbyterian Hote established themselves on 4th St. (see 1837).

In this year, the library of the Presbyterian Board of Foreign Missions was started.—Man. Com. Coun. (1896), 566. It is still in active operation, being situated in the Metropolitan Life Bldg.

In this year, the "Mulberry Street Church" (Baptist) went "under the hammer," and became the "Tabernacle Church" (Baptist).
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

1836
American art, "whose name is never mentioned in the annals of the time without respect and admiration." Inman, Mount, Morse, Durand, Cole, Flagg, and many other artists were aided by him.
In his lifetime, his paintings were displayed in his house in Green-
wich St. After his death, they were deposited with the N. Y.
Hist. Soc., in whose galleries they still remain.—Isham, Hist. of
Art. (1855), 208, 218.

In this month, plans for a new market were agreed upon (re-
ported by the market committee on Jan. 6, 1834) which should be in
the nature of an extension of the Grand Street Market, now become
an obstruction to traffic. The site selected was that bounded on the
north by Grand St., on the south by Monroe St., and on the East
by Cortland St., comprising the eastern section of the block, and
containing 140 ft. on Grand St., 115 ft. on Monroe St., 119 ft. on
Cortland St., and 225 ft. on a line running through the centre of
the block. In Sept., it was named Monroe Market.—De Voe, 285-87;

The new Presbyterian church at the corner of Duane and Chan-
che Sts. is opened for worship. The congregation had worshipped in the
"Cedar Street Church" until 1834 (q. v., Ja 8). The corporate name
of the new church had already been changed to "The Presbyterian
Church in Duane St."—Laws of N. Y. (1835), chap. 352 Greenleaf, 137-18.

The mayor approves a resolution suspending the operation of
every city ordinance, etc., which permits or directs omnibuses,
stages, or stage-coaches "to stand in any part of Wall-street."—

The mayor approves the following resolution, passed by both
boards of the common council: "Resolved, That it be referred to the
Committee on Public Offices and Repairs of both Boards, to
have a building erected adjoining the Rotunda, fronting on the
Park, on the site where the Soup House and Hook and Ladder
Company now are, to correspond with the front on Chamber street,
for the accommodation of the Post Office."—Proc., App'd by
Mayor, III: 140-41. See also descrip. of Pl 115, III: 618

The common council directs the street commissioner "to cause
surveys and profiles of the several streets in that part of the first
ward, which suffered by the late conflagration, to be made; also
the streets which intersect them, with a view to form a new grade
of said streets, as speedily as possible, so as to facilitate the rebuilding
upon the same."—Proc., App'd by Mayor, III: 142.

For plan of the Exchange Place extension, and the Merchant St. (Hanover St.)
widening, see maps No. 720 and 721 in topographical bureau,
borough president's office.

The common council passes resolutions of appreciation for the
sympathy and aid extended by the citizens of Philadelphia, Balti-
more, Boston, Lancaster, Albany, Utica, Troy, and Brooklyn on account of the late fire.—Proc., App'd by Mayor, III: 143.
Feb. 3, 1836, an account of the proceedings of the citizens of these
and various other cities in reference to the fire was printed by
order of the common council.—Eve. Post, F 3, 1836.

The common council empowers the committee on public offices
and repairs "to make all the necessary preparations and altera-
tions to render the Rotunda convenient for the use of the Post
Master, and commodious to the public."—Proc., App'd by Mayor,
III: 140.

A report of the secretary of state of the state of New York,
relating to a geological survey, gives an account of the stone and
marble quarries from which building-stone is derived for public
buildings in New York City.—Assemb. Docs., (Doc. No. 9) F 17:
12, 1835, joint committee of state and assembly to write to the
governor on his special message regarding the fire of Dec. 16-17,
1835, certain facts obtained from a committee delegated to repre-
sent the views of the citizens of New York to these officials of the
state government. These facts (condensed) are:

"The loss sustained in buildings, including several public
edifices, is supposed to be about 674. Immense ranges of capacious
and valuable stores and warehouses have been leveled, and nearly
1,000 mercantile firms disposed. These firms employed, it is
estimated, from 3,500 to 4,000 clerks, besides cartmen, porters
and labourers, many of whom depend for their support upon their
daily and monthly earnings. The total amount of property de-
stroyed is believed to be from $18,000,000 to $20,000,000." The
fire burned over an area of nearly two acres, comprising a densely built and
exclusively mercantile portion of the city, and destroyed all
within that compass, except three or four buildings.

896 with seats free.—Life of Wm. Wallace Everts, D.D., by his son
(Philis, 1891), 14, 18.

—In this year, the Shakespeare Tavern, at the s. w. cor. of Fulton
and Nassau Sts., was demolished, when Fulton St. was widened.
William L. Stone wrote in 1872: "It was originally a low, old-
ashioned, massive edifice, built of small, yellow bricks, two stories
high, with bow windows on the roof. The building was
erected many years before the Revolution, by John Leake, a com-
missary in the French war [L. M. R. K., III: 980] but, in 1822,
a modern extension on Fulton Street, three stories high, was added.

"On the second story there was a room for public meetings and
military drills, and on the third story there was another room,
arched, for concerts and balls, and for the accommodation of the
political, literary, and musical patrons of the house. It was kept in
its palmiest days by Thomas Hodgkinson ... and under his manage-
ment it became and long continued a great resort for the
wits of the day, and was celebrated for the superiority of its wines
and the quiet comfort and elegance of its private rooms.

"The Shakespeare Tavern, in fact, was to New York what the
Mermaid was to London in the days of Shakespeare and Queen
Beiss, or, later, the 'St. James Coffee-house' and the 'Tork's Head'
in the time of Reynolds, Garrick, and Goldenoth ..."—Stone, Hist.
of N.T. City, 487-92. For a view of it, see item No. 4944 in
Emmett collection, in N. Y. P. L.

On its site, the "Commercial Advertiser Building" was erected. This was destroyed by fire Sept. 15, 1831.—Harper's Weekly,
S 1839, Oct. 15, 1839.

—In this year, the widening of Fulton St. required cutting off
about 8 ft. from the front of the Moravian Church on the south side
of this street between William and Dutch Sts.—Greenleaf, Hist. of
the Churches, 278. See 1829.

—In this year, John St. was widened from Broadway to Pearl St.

—In this year, Astor Place was opened.—See L. M. R. K., III:
992. For description of the neighbourhood, see Man. Com. Coun.
(1835), 608.

At this period, there was unusual activity in opening and widen-
ing streets (see 1830). In 1836, the following were among the streets opened: Fifth Ave. from 21st and 42nd St., and from 42d to
125th St.; Lexington Ave. from 37th and 42d St.; Tenth Ave. from
71st St. to Kingsbridge Road; Madison Ave. from 23d to 42d St.;
42d St. from river to river; 125th St. from Third Ave. to Harlem
River; 130th St. from Third to Fifth Ave.; 116th St. from Fourth
to Tenth Ave.; 23d St. from Third to Eighth Ave.; and 33d St.
from river to river. Mt. Morris Square, Manhattan Square, and
the public place at Art and 8th Sts. and Lafayette Place were also
opened. The following are the list of the few large complete
maps of Manhattan Island, and one of the most useful and beauti-
ful.

In this year was printed, in part 2 of The Picturesque Beauties
of the Hudson River and Its Vicinity, illustrated in a series of
views (pub. by Distemper), 3, a small wood-cut vignette having in
the foreground a windmill, and in the distance a train of cars with loco-
motives. It is entitled "View from Jersey City, engraved on wood
by J. A. Adana." It is probably one of the earliest views of a loco-
motive and train in the neighbourhood of New York.

Between 1835 and 1839, the engraved Horner view of New York,
as seen from Brooklyn, was issued. It is reproduced and described
as Pl. 120, III: 625-28.

In this year, Edwin Smith made a survey of a proposed "Mur-
ray Hill," a park in the vicinity of Fourth Ave. and 12th St.—See
map No. 148 in real estate bureau of comptroller's office.

In this year, Luman Reed died; he had been a patron of
1836

1. The beginning of fire insurance companies in the city, nearly all prosperous. Their aggregate capital was $8,751,743, and on the 7th of January, 1860, they were believed to be insolvent; four have their capital very much impaired, and several of the others are losers to a heavy amount. The total loss (estimated) sustained by these companies is about $7,000,000 leaving a little over $1,000,000 of sound capital. The following bills are reported by the committee in the belief that their passage will enable the city to retrieve its losses in fire Insurance and retain its commercial relations in full activity: “First. An act to authorize the mayor, aldermen and commonalty of the city of New York to raise money by loan, &c. “Second. An act to enable the insolvent Fire Insurance companies more conveniently to adjust their affairs. Third. An act to enable the stockholders of the said companies, and others, to replenish their stock, revive and continue their charters. “Fourth. An act for the relief of the city of New-York. “The first of these comes from the common council.”—From Docs. of the Assembly (1836), Doc. No. 7. The text of the common council’s memorial, asking for the passage of an act authorizing the city corporation to raise moneys on loan, is found in ibid., Doc. No. 8. The following is also a memorial of Cornelius W. Lawrence, chairman of a committee of citizens asking for the passage of two bills relating to the fire insurance companies, and another memorial from Lawrence, as chairman, asking for the repeal of the law subjecting to taxation debts due to non-residents.—Ibid., Doc. No. 8. See J. A. 18.

18. At a meeting, held at the rooms of the Am. Tract Society, the New York Theological Seminary is organized by the choice of officers for the year. For the beginning of this work, see O. 1835.

30. The domestic architecture in the Bowling Green section of Broadway is for the first time varied by the introduction of tall stores.—N. Y. Mirror, XIII: 247. See also My 28.

Feb.

1. The mayor signs resolutions as follows: That the Twelfth Ward be divided by a line running through the centre of 40th St., forming a new ward to be called the Sixteenth Ward, the residue to be the Twelfth Ward; and that application be made to the legislature for a law to alter the title for public purposes the gore of land between Art St., Eighth St., Lafayette Place, and the Bowery.—Mayor’s Message (1836), 83. See, further, March 16.

7. The common council orders that Mill St. be opened between Broad and William Sts.—Proc. App’d by Mayor, III: 111.

3. The Chamber of Commerce, alter the fire of 1835, met on this day, and thereafter until 1856, in the Merchants’ Bank, on the north side of Wall St., the third house west of William St.—Bishop, A Chronicle of 150 Years. The Chamber of Com. of the State of N. Y. (1918), 60; and see Pl. 147, Vol. III.

6. The legislature authorizes the commissioners of the land-office to sell to the United States certain state lands on Staten Island, heretofore used for military purposes, to enable the federal government “to construct and maintain proper defences for the protection of the harbor of New York.”—Laws of N. Y. (1836), chap. 19. On May 4, 1844 (q. v.), the legislature appropriated the revenue from the sale of these lands to building a new arsenal in the city of New York.

18. “Business Extending.—We are glad to see a disposition to enlarge the circle of business. . . . Already the whole of Cedar St. between Broad and Broadway, is built upon. Following John street will come next. Several jobbers have commenced in Broadway, the south side of which, from Wall St., to the Bowling Green, will soon be changed. The Brinckhoff property, 40 feet front, running through to New St., is sold for $80,000. Gov. Jay’s house, sold long ago as Mrs. Keese’s boarding house, 50 feet front, sold for $100,000. These, with many others, are soon to be taken down to accommodate the mercantile community.”—N. Y. Com. Adv., F 10, 1836. The same paper adds that “the list of property purchased is so large and lot of the United States Branch Banks,” on Wall St.; the Society Library building and lot, at No. 33 Nassau St. (see F 13), and other parcels.

13. Philip Hone writes: “I think the merchants are wrong in opposing so strenuously the wishes of the up-town people to have the Post-Office in Broad or Wall Street. The Custom-House and the Exchange are properly located in Wall street, for they are exclusively devoted to the merchants, and their wishes should alone be consulted on the subject; but it is not so with the Post-Office. Many persons in the upper wards are in the habit of receiving letters,—not so many, certainly, as the Howlands and the Griswolds, but enough to give them a right to a say in the matter. But the strongest argument of policy, and in disregarding it the merchants are short-sighted; the numerical strength of the upper wards is so great that they control our elections, and have on all municipal questions a controlling voice. They have been boiled in one or two affairs of this kind, and are somewhat savage at this determination of the ‘monied aristocracy.’ . . . to keep the Post-Office to themselves; they would consent to a compromise which would place this establishment near the park (the site of the present Bridewell would be a grand place, and a building similar to the Record Office would make a splendid finish), and that location would be permanent; whereas there is danger that, if Wall street is now agreed upon, the pettyness of the people of the first ward would be punished by its removal, before five years, to the Bowery or Union Place.”—Hone’s Diary, I: 198-99.

15. The Society Library building on Nassau St. (see Apr, 1795) is sold to Wm. W. Townsend for $4,400.00.—Keep. Hist. of the N. Y. Society Lib., 381. See also J. 3, 1835.

18. At this time, it was not decided whether the South Dutch Church in Exchange St. would be rebuilt on the same site or moved uptown.—See letter of this date with “Sylvester” group, in N. Y. H. S. Its services were temporarily held in the chapels of the First Presbyterian Church on Wall St., and the Brick Presbyterian Church on Beekman St.—Hist. Sketch, 27. In 1837, the congregation divided into the Murray St. branch (1837-1848), and the Washington Sq. branch (1837-1876), occupying new churches in those localities.—Corwin’s Manual, 1849. In 1849, the former of these moved to its new church building at the south-west corner of Fifth Ave. and 21st St., after temporarily worshiping in the chapel of the Union Theological Seminary in University Pl.—Hist. Sketch, 27, 49, 31, 37. In 1850 (q. v.), the congregation bought Zion (Episcopal) Church, at the south-east corner of Madison Ave. and 38th St., the latter church then joining with the Church of St. Timothy. See J. 3, 1836. L. M.

1. A committee of the trustees of the merchants’ exchange announce, regarding the new exchange, that “It is proposed to occupy the whole space, between Exchange Place, Wall, Hanover and William streets, (if the land can be obtained upon reasonable terms) and to erect thereon a building, suitable in architectural design, and in appropriate accommodations, to the prosperous condition and growing wants of this mercantile community, provided that six thousand shares of one hundred dollars each, shall be subscribed within thirty days. It is intended that every room shall be vaulted and rest upon arches, and be made completely fire proof and has it been estimated, by competent judges, that the nett revenue from the proposed building, will make dividends of at least six per cent. per annum, and by some it is believed, that the dividends may amount to seven or eight per cent. per annum.” Half the subscriptions were obtained by Feb. 23, and books were opened on the three succeeding days to secure the remainder.—Ev. Post, F 23, 1836. See Mr 1.

23. The Methodist Book Concern’s printing and publishing establishment in Mulberry St. is destroyed by fire.—Ev. Post, F 18, and 19, 1836; Costello, Our Farmers, 223.

19. The post office, as provided for on this day (see also 1836), including all the streets from 28th to 9th inclusive, from river to river. The total cost for opening the entire length of 34th St. was $15,174.42.—Man. Com. Com. (1857) 34:3. The assessments for opening 34th St. were levied in 1835 (q. v.).

A serious labour riot occurs, due to strikes by trades unionists.—Hone’s Diary, I: 200-1.
The mayor approves a resolution ordering that Fifth Ave. be opened from 21st to 129th Sts., except such portions as are already occupied, and the portion between 120th and 124th Sts., which, as proposed on June 22, 1835 (P.L.), is to be made a public square.

—Proc., App'd by Mayor, III: 221. See Mr 6.

The legislature passes an act which makes such portion of the fifth and sixth brigades of artillery as reside in the city and county of New York subject to the order of the mayor, whenever their services shall be required by the civil authorities to quell riots, suppress insurrection, protect property, or preserve the peace.

—Laws of N.Y. (1836), chap. 66.

The New York branch of the Bank of the United States (see 1825), at Nos. 11-17 Wall St. (present Nos. 35-39 Wall), closes, this being the last day of discount. The removal of government deposits from the Bank of the United States had been the occasion for many public mass-meetings in a number of cities.—Hardenbrook, *Financial N. Y.*, 177-78. See, further, S. 9, and O 8.

The ruins of the merchants’ exchange had not been removed at this date, and were considered a menace to public safety.

—See N. T. Mirror, Mr 26, 1836.

The new edifice was commenced, however, in this year, on the same site, and was completed in 1841 (P.L.), although opened for use (Nov. 17, 1841, g.b.). See also descrip. of Pl. 118, III: 413; and descrip. of Pl. 152-2, III: 772.

During the period of construction, the business of the exchange was conducted in a building at the corner of New and Exchange Sts.—See “Classified Mercantile Directory,” 130, at back of Disturnell’s N.Y. A.T. It Is, 1837. See also descrip. of Pl. 99, III: 414.

Miss Harriet Martineau is in New York.—Hone’s Diary, I: Apr. 206.

"J. Disturnell, of this city, has published a Guide to the City of New York, containing an alphabetical list of streets, with the census, the division of the city into wards and fire districts, and other matters, accompanied with a map of the city."—Eve. Post, Ap 5, 1836.

The northward trend of the city’s growth is thus described:

...Broadway has ceased to be Broadway. It is nearly as much of a mere crowded thoroughfare as Fleet-street, London. During the winter, it has been almost blocked up with omnibuses, carts, sleighs, carriages, barrows, etc. etc. Most of the boarding-houses below Wall-street have been converted, or are about to be, to other purposes. It is said, that N. Prince’s house is to give place to a hotel; and that, in one year, there will be scarcely a private residence or a boarding-house below Wall-street. The rise in rents and the price of bread, there, have already driven many up town. Mr. Astor thinks, properly enough, that a great portion of the retail business, drygoods stores, etc., will soon reach as far as Prince-street. Lately, however, scarcely extend their promenades farther down than the Park; and what will become of the Battery, heaven only knows.

Referring to New York’s growth in population, this writer expatiates prophetically regarding the expected building extension. He even predicts "tunnels," and expects that this will become "one of the most wealthy, populous and splendid cities of the globe."

He compares New York of 50 years ago, when it had "contracted limits, its insignificant streets, its corn-fields about St. Paul’s, its swamps and ponds by Tammany-hall, its heaths where now stands West Broadway, the water washing against Trinity-church, and all the almost incredible characteristics of the city in seventeen hundred and eighty, and which have now so completely passed away before the broad and universal spirit of wealth and improvement." He expects that, in another 50 years, transformations more striking and important will be effected, with "new churches, squares and streets, coping with all the gorgeousness of London and Paris, where now spread only barren heath and unbroken solitude."—N. Y. Mirror, XIII: 327. See also descrip. of Pl. 98, Vol. III: 326.

Mayor Lawrence is re-elected a second time (see Ap 11, 1835).

Candidates of the Whig, Equal Rights, and Native American parties, were in the field, but the mayor’s majority was decisive. However, the Whigs elected half the members of the common council.—Man. Com. Coun. (1834), 459-91.

"The pressure in the money market is daily increasing. The rate of discount on the best paper is from thirty to forty per cent."
THE ICONOGRAPHY OF MANHATTAN ISLAND

per annum. Exchanges are far below par, but no importation of
136 species will take place until the rate of exchange is sufficiently in
14 our favour to cover not only the expense and risk of importation,
but also the interest of the money while it is necessarily living idle
15 on the voyage. . . ."—Eve. Post, Ap 14, 1836. See also ibid.,
16 Ap 15, 1836.
17 The legislature passes an act "to provide for a geological
18 survey of the state."—Laws of N. Y. (1836), chap. 142. Five
19 annual reports were made by the commissioners, the full report
20 comprising several volumes. See J. 6.
21 A plan has been formed in this city to collect in one building,
22 models, specimens, and drawings of all the important improve-
23 ments in the mechanic arts of which our country can claim the
24 honour. It will go into effect under the auspices of the American
25 Institute, who have taken a hall for the purpose in Broadway,
26 to be opened on the 1st of May. It is to be called the Repository
28 The legislature incorporates a company to build a macadamised
29 turnpike from Harlem to New Rochelle.—Laws of N. Y. (1836),
30 chap. 167.
31 The legislature authorises the dissolution of the "Masonic
32 Hall Association," which was formed under an act of April 18, 1825,
33 passed for the purpose of enabling masonic lodges to take
34 and hold real estate for their affairs. It also authorises this associa-
35 tion "to sell and convert into cash the lands and buildings of the
36 said association known as the masonic hall, situated on Broadway,
37 and in the rear on Pearl-street," a detailed description of which
38 is contained in the association's certificate of incorporation.—
39 Laws of N. Y. (1836), chap. 169. Some years later it became
40 Gothic Hall.—See descriptive catalogue of Enx prints, pub'd by
41 the N. Y. P. L., item 177. For the beginning of Masonic Hall,
42 see J. 14, 1836.
43 The Texans, under Samuel Houston, defeat the Mexicxns at
44 San Jacinto, killing 650 and wounding 208. Santa Anna was
45 captured the next day.—McMaster, Hist. of the People of the
47 The legislature passes an act "to expedite the construction of a
48 railroad from New-York to Lake Erie." It relates to the issue-
49 ance of stocks, and to other matters in this connection.—Laws
50 of N. Y. (1836), chap. 170; see also ibid., chap. 296.
51 The mayor signs an ordinance to pave 14th St. from Union
52 Place to the Hudson River.—Mayor's Message (1836), 113.
53 The legislature passes an act (amended on May 20) to aid the
54 Institution for the Blind to acquire full title to the grounds and
55 buildings of the institution (situated on the east side of Ninth
56 Ave., between 53rd and 54th Sts.).—Laws of N. Y. (1836), chap. 226, 399. See also J. 4, 1833. A brief report of the work done here
57 in 1836 is found in N. Y. At Its It, In 1837 (pub'd by Disturnell),
59 Mayor Aaron Clark, reporting to the common council on
60 May 22, 1837, said that in 1837 the Public School Society consisted
61 of 9 schools, containing 4,555 boys and girls; in May, 1836, there were
62 15 schools containing 9,182 scholars of both sexes, 26 primary schools
63 containing 9,496 children, and public primary schools for
64 1,171 coloured children.—Mayor's Message, 10.
65 The legislature amends a part of the Revised Statutes relating to
66 quarantine regulations.—Laws of N. Y. (1836), chap. 250.
67 The legislature passes an act directing the governor to ap-
68 point commissioners to settle differences as to boundaries with
69 persons who acquired title from the city to parts of the Common
70 Lands prior to April 1, 1811.—Laws of N. Y. (1836), chap. 244.
71 The legislature passes an act to alter the plan of the city in
72 respect to certain streets in Manhattanville. Old streets named
73 Manhattan St. and Lawrence St. are involved in this alteration.
74 Laws of N. Y. (1836), chap. 251; Doc. No. 109, Bd. of Ald.
75 Mayor's Message (1835), 102. See also Pl. 112, Vol. III.
76 The Union Market (see O 2, 1835) burns.—Eve. Post, My 5, 1836, citing Courier & Enquirer. It was rebuilt, and used until
77 a larger one was erected in 1853 (q. v.).—De Voe, Market Book,
79 Manhattan Square, bounded by 77th and 81st Sts. and Eight-
80 th and Ninth Aves., is directed to be opened.—Proc., App'd by
82 That part of the House of Refuge occupied by females is
83 entirely destroyed by fire.—Eve. Post, My 6, 1836. See 1838.
84 The legislature authorises the common council to raise by loan,
The ground belonging to the South Reformed Dutch Church in Exchange Place is sold for $24,500. The building was destroyed by fire in 1835.—*Expo. Post*, Je 15, 1836; L. M. K. N., III: 976.

The common council authorizes the "Water Purveyor" to issue proposals "for pipes to be laid down from Chatham-street to Nassau-street, through Nassau-street to Broad-street, through Broad-street to Pearl-street, agreeable to the size as adopted by the Water Commissioners."—*Proc., App'd by Mayor*, IV: S. See Ji 28.

"A new club is about being established, at the head of which are number of our most distinguished citizens, to consist of four hundred members, and to be similar in its plans and regulations to the great clubs of London, which give a tone and character to the Society of the British metropolis. A meeting was held this evening, at the Athenaeum, to organize the club."—*Hone's Diary*, I: 212.

The Atheneum was a hotel, kept by Edward Windust, at 557 Broadway, on the south-west corner of Leonard St.—*City Directory; "Classified Mercantile Directory" at back of N. Y. A. It Is 1, In 1837, 74, under "Windust;" and view in the Crouzekbank collection, N. Y. H. S. See Ap 26, 1837.

The New York Express appears, the publishers being James and Erastus Brooks. The Daily Advertiser was united with it this year. It was finally issued as the *New York Express.—Annals of N. Am.*, 1777; Havell's *Reminiscences*, 312.

The "Novelty" makes the first voyage ever made from New York to Albany by a steamboat propelled by atmospheric coal.—*Hone's Diary*, I: 213.

A subscription has been set on foot for erecting a free Episcopal Church for negroes.—*Expo. Post*, Je 7, 1836.

Ex-President James Madison dies.—*Expo. Post*, Ji 1, 1836. The common council adopted resolutions of regret on July 1.—*Ibid.*, Ji 2, 1836.

"The part of the city consumed last winter by fire, now presents a curious and animated spectacle. The bustle and activity of the labourers bringing in and adjusting to each other the materials of construction, the rapid erection of spacious buildings in different stages of progress, on each side of the numerous and irregular streets which run through this quarter, remind the spectator of what he has read concerning cities built up suddenly in waste places. . . . In another part of the city a different spectacle may be seen. Chapel street, demolished on each side, looks as Jericho or Troy might have done after their siege."—*Expo. Post*, Je 29, 1836. See also *Ibid.*, N 11, 1836.

The mayor signs resolutions that members of the board of aldermen be supplied with copies of "Colton's new map of the city" (Vol. III: Pl. 124), and that Manhattan Square (bounded by Eighth and Ninth Aves., 77th and 81st Sts.) be opened.—*Mayor's Message* (1836).

The mayor signs a resolution providing that ground shall be set apart for a public place, bounded on the south by 23rd St., north by 26th St., west by Fifth Ave., and east by a contemplated street mid-way between Fourth and Fifth Aves.; and that application be made to the legislature for the passage of a law to alter the map of the city so as to conform thereto.—*Mayor's Message* (1836). See, further, Ap 10, 1837. This was Madison Square.

The "Specie Circular" is issued upon an order of Pres. Jackson to the secretary of the treasury. It requires receivers of public money and deposit banks, after Aug. 15, "to receive in payment of the public lands nothing except what is directed by the existing laws, viz., gold and silver, and in the proper cases Virginia land scrip." Under some circumstances the time is extended to Dec. 15, "for actual settlers or bona fide residents."—*Messages & Papers of the Presidents*, X: 104-5; cf. *McMaster, Hist. of the people of U. S.*, VII: 352-65 also Shepard, *Martin Van Buren*, 260-61.

The four-storey brick building of the American Bible Society, at 115-117 Nassau St., burns.—*Expo. Post*, Ji 20, 1836; Costello, *Our Fireside*, 228.

The Vice President has arrived in our city and is at the Astor Hotel."—*Expo. Post*, Ji 21, 1836.

The common council empowers the committee on public offices and repairs "to provide a suitable bell and fixtures forthwith to be placed in the Hall in lieu of the present bell, which is so injured as to be unfit for use."—*Proc., App'd by Mayor*, IV: 205; and descript. of Pl. 142-4, III: 712. The old bell was hung in 1831 (q.v.). For the new city hall bell, see O 3, 1836.
The common council resolves "That a line of water pipes, be laid in Barclay street, from the intersection at Chapel street, down to 28 Barclay to Greenwich street, through Greenwich to Cedar street, up Cedar street to Broadway, agreeable to the site as adopted by the Water Commissioners, and that the Purveyor be instructed to advertise for estimates for furnishing pipes and fixtures for the same."—Proc. App'd by Mayor, IV: 31-32. See Ag 3.

The common council orders that the street commissioner "contract for an iron railing around Union Place," and appropriates $11,000 therefor, "in addition to appropriations heretofore made."—Proc. App'd by Mayor, IV: 41.

The common council directs the committee on public offices and repairs "to cause the Governor's room to be newly furnished."—Proc. App'd by Mayor, IV: 51. See also P. Pl. 31-a, Vol. III, showing the room as it was in 1850-1.

The Italian Opera House, at the corner of Leonard and Church Sts. (see N 18, 1833) becomes the National Theatre.—Brown, Hist. of the N. T. Stage, I: 241. See Nov. 23.

The "New York City Marble Cemetery" and the "New York Monumental Cemetery," which face each other on Second Ave. (the former bounded by 2d and 3d Sts., the Bowery, and Second Ave., and the latter by 2d and 3d Sts., First and Second Sts.), are described in the N. Y. Mirror, of this date. See also L. M. R. K., III: 927.

The building lately occupied as a branch of the United States Bank in this city is purchased by the Bank of the State of New York for $245,000, "an advance of sixty-six thousand dollars on the price it was sold for only three few months ago."—Even. Post, S 7, 1856. See also ibid., S 16, 1856.

Harvard College celebrates the 200th anniversary of its founding.—Even. Post, S 14, 1856, citing Boston Courier. See 1856.

The Williamsburg and Peck Slip Ferry is opened.—Even. Post, S 9, 1856. See also ibid., S 15, 1856.

The Bank of the U. S. conveys to the Bank of the State of N. Y. title to the old Verplanck property in Wall St., including alleyways, which was purchased in 1822 (p. v, Mr 23) for the U. S. Branch Bank.—Liber Deeds, CCCXLVII: 179 and ibid., CCCXXV: 579, 580. From 1837 to 1842 (p. v), the Bank of the State of N. Y. was at this address, 15 Wall St.—See City Directories. See also description and history of the Annex Office, II: 439; descrip. of Pl. 99, III: 5911; Rep. of Am. Socie. & Pres. Soc. (1918), 597-679; and L. M. R. K., III: 924, under "Branch of the Second Bank of the U. S. (the second site)," and 975.

Charlotte Cushman makes her first appearance in New York, at the Bowery Theatre as Lady Macbeth. —Brown, I: 114.

"The subterraneous passage in the rail road from this city to Harlem is now opened from end to end, and will shortly be completed. The last remaining part of the road was pierced yesterday morning. The rock is exceedingly hard, and the work difficult, but the promise by the undertakers of this enterprise to finish it before the 15th of September has been fulfilled."—Even. Post, S 13, 1856.

Aaron Burr dies at New Bristol, Staten Island.—Even. Post, S 14, 1856. See also ibid., S 16, 1856. He was buried at Princeton on Sept. 16.—Ibid., S 19, 1856.

The Bowery Theatre (see Ag 20, 1856) is burned for the second time.—Even. Post, S 24, 1856: Costello, Our Firemen, 225; N. Y. At II II, 2245: L. M. R. K., III: 682. It was immediately rebuilt.—Brown, Hist. of the N. T. Stage, I: 114.

Peter G. Stuyvesant and wife grant to the city the land comprised in the present Stuyvesant Park, at Second Ave, and East 14th St.—Prendergast, Record of Real Estate (1914), citing Liber Deeds, CCCXV: 350. See also L. M. R. K., III: 971.

The new bell on the city hall, weighing 5,000 lbs., is praised by the newspapers of the day.—Comm. Adv., O' 3, 1856. See Ji 22, 1856; S 12, 1857.

The Athenæum Hotel has just been opened in Broadway at the corner of Leonard St.—Even. Post, O 13, 1856.

The mayor signs a resolution that theupt. of repairs cause the building occupied as Essex Market to be taken down and rebuilt as a market for country people at Tompkins Market.—Mayor's Message (1856), 43. For the changes in Essex Market at this time, see De Voe's Market Book, 4th ed., L. M. R. K., III: 99-108. See Je 4, 1851.

The third annual convention of the National Trades' Union assemblies in Military Hall. Delegates are present for the first time from localities so far distant as Ohio. Subjects considered at the earlier conventions (see Ag 25, 1854, and O 1, 1855) such as education, state prison labour, the factory system, female labour, the ten-hour day, are presented before the convention in committee reports. An interesting recommendation is made that "a portion of the National Fund be set apart to supply members with means for the purpose of enabling them to remove to such places as are not overcrowded with numbers." The conservative character of the delegates is indicated by a resolution that "it is the opinion of this Convention, that if Trade's Unions and Trade Societies were to apply their funds to the establishment of Co-operation in Societies suffering against, instead of exhausting their funds by supporting strikes, a much more permanent benefit would be rendered." The report was "read and accepted."

The sessions of the convention continued through Oct. 28.—A Doc. Hist. (1856), 294; Even. Post, Ag 25, 24-26.

The mayor signs resolutions as follows: That the macadamizing on the Eighth Ave. between 42d and 59th Sts. be completed by covering the avenue with a layer of hard stone also that the street corn't be authorised to lay down a wooden pavement in Broadway as an experiment, not to exceed 200 ft. in length.—Mayor's Message (1856), 46. This experiment was made between Chappaqua and Saw Mill River, by the Commissioners of the Cent. Park (1866), 111. On Dec. 5, the mayor signed an ordinance for paving William St. with blocks of wood from Wall to Pine St.—Mayor's Message (1856), 46. The wooden pavement was tried again in 1858 in front of the hall of records (the old jail).—The 10th Ann. Rep., &c., 113.

The "Ladies of Brown University" are listed in the teaspoons of the present St. Peter's Church was laid on the southeast corner of Barclay and Church Sts. The first church of the same name which stood on this site (erected in 1857, p. v, O 5) was demolished earlier in the year. In September, 1857, worship was commenced in the basement. The principal auditorium was consecrated Feb. 25, 1858 (p. v).—Greenleaf, Hist. of the Churches, 335.

The mayor signs resolutions as follows: That 110th, 111th, 112th, and 113th Sts. be graded from the Old Road, west of Fourth Ave. to Second Ave.; that Fifth Ave. be graded, and the curb and gutter-stones be placed therein from 12th to 130th St; and that 116th St. be opened from Fourth Ave. to Tenth Ave., and regulated and worked from Third Ave. to the Harlem River.—Mayor's Message (1856), 47.

The Martin Van Buren and Richard M. Johnson are elected president and vice-president. The National Republicans or Whigs had three candidates for president—Wm. H. Harrison, Daniel Webster, and Willie P. Mangum; and three vice-president—John Tyler, Francis Granger, and John McLelan.—McKee, National Conventions and Platforms, 34-39. See Mr 4, 1857.

The Bowery Theatre (see S 22) is being rebuilt. "The workmen have already put on a part of the roof, and it is the intention of the proprietors to finish it by the first of January next. The project of extending Canal street through to the Bowery, by which the theatre would have been cut up, appears to be abandoned."—Even. Post, N 14, 1856.

The National Theatre (see Ag 29) is sold at auction for $75,000 to O. Mauan and James H. Hackett. They leased it to James W. Wallack.—Even. Post, N 5, 1856; Brown, I: 245. See S 23, 1859.

The first number of the Plain Dealer is issued.—Even. Post, D 3, 1856.

"The Corporation are mending the Macadamized portion of Broadway. They would be better to dig it up at once, and supply its place with the wooden pavement which wears so well and preserves itself in such admirable order in a neighboring part of the same street. The Macadamized portion is full of hillocks and hollows, it needs perpetual repair; it is very expensive and very dirty. It is even worse than the old method of paving with small round stones."—Even. Post, D 3, 1856.

The "American Institution of Architects," the second archi-
FIRST AND LAST PAGE OF CONTRACTORS' BILL FOR BUILDING THE DISTRIBUTING RESERVOIR IN CONNECTION WITH THE CROTON AQUEDUCT; DATED DEC. 16, 1843. SEE ADDENDA, VOL. VI.
CHRONOLOGY: INVENTION AND PROSPERITY: 1815–1841

In 1836, the British Society for the Diffusion of Useful Knowledge was established.

**Hone** dines "with the governing committee of the Union Club at Windust's." The committee numbers 35 out of the present membership of 259, "not a sufficient number to organize properly," he says, "but it was resolved to procure a house and committee immediate." A sub-committee of seven was appointed to carry the plan into effect and to admit members. — *Hone's Diary*, I: 17. For Windust's Hotel, see *Jeff* 17, and *Ibid.*, I: 269. See Apr. 25, 1837.

Ellen Tree makes her first appearance in America, at the Park Theatre, as Jezabel in "As You Like It." — *Harwell's Reminiscences*, 329; *Hone's Diary*, I: 258.

The finance committee of the consistory of the South Reformed Dutch Church, writing to Hon. Stephen Van Rensselaer to ask for a loan to enable them to rebuild the church, which was destroyed in the fire of 1835, states that "The pew-owners unanimously agreed that owing to the removal of families from that part of the City, it was inexpedient to rebuild there." Also that, on the site of their church property in Exchange Pl., an equal division of the proceeds would be made between the families which had removed to the vicinity of Washington Sq. and those that remained in the lower part of the city. The letter continues: "The means which would have been ample, to furnish each of these parties with a share, is a contribution from the public with regard to the power of the Church to give a charter of incorporation, and the state of our city affairs has gone into the Court of Chancery and may not be decided in a long time. In the mean time, a new arrangement has been made between the parties. The Consistory of the downtown Church is to retain all the present available funds of the Church, and five of the lots in Exchange Place are to be disposed of as follows—Three to be taken by the Church uptown and two that below.

"By individual subscription, money is to be raised, by each party for erecting stores on these five lots, which will thus be made to produce a considerable income. But this will not furnish either with a place of worship.

"Happily for the uptown enterprise, they have obtained the splendid Chapel of the University and will open it for public worship on New Year's day," while our Church below must continue as now, holding its sabbath services morning & afternoon in the Lecture room of the Brick Church at the Park and its evening services in the Session room of the Presbyterian Church in Wall Street. In this condition we must remain until after the termination of the suit respecting the old ground, unless relieved by a law.

"We have purchased a piece of ground at the corner of Murray & Church Streets—50 feet on Murray by 75 ft. on Church St. We wish to obtain one lot adjoining on Murray St. and then to proceed as early in the Spring as practicable to build "a House for the Lord." The committee asks Mr. Van Rensselaer for a loan of $20,000.—From the original MS. in the N. Y. H. S. See 1837.

The building in the central part of Washington, D. C., occupied by the general post-office, the patent-office, and the city post-office, is destroyed by fire. The entire contents of the two latter offices are lost, including the "curious maps and papers, comprising all the inventions of American ingenuity for half a century past." — *Dec. Post*, D 17, 1836.

"A new pavement of wood has been laid down in William street, between Pine and Wall streets. The progress of this work attracts considerable attention." — *Dec. Post*, D 16, 1836.

"The great number of fires that constantly happen in New York, shows the necessity of procuring a better supply of water than we now have. . . . It is useless to wait for the Croton or any other water, if it cannot be obtained immediately. It will take from three years to effect.

"Until the Croton water can be brought into the city, we propose that the Corporation erect Reservoirs in four different places, on the East and North Rivers, at points below Grand and Canal streets, and fill them with the waters of those rivers by means of steam engines. These Reservoirs, or receptacles of water should be equal in capacity to the one on Fourteenth street, and the water conducted through every part of the City, in pipes like those now laid by the water commissioners." — *Dec. Post*, D 19, 1836.

During 1836, 1,621 buildings were erected in New York City, an increase of 1,621 over 1835.—*N. Y. As: It Is*, In 1837, 20.

During this year, 2,285 merchant ships entered this port, an increase of 250 over 1835.— *Ibid.*, 162.

1837

In this year, rebellions broke out in Upper and Lower Canada, which lasted until 1838. They were caused by a demand for more representative government and an executive responsible to the colonial legislature, not to the king.— *Winson*, VIII: 150-52, 180-81; *Hazen, Europe since 1815*, 532-35.

In this year, publication of the American Archives, edited by Peter Force, was begun with the first volume of the fourth series. The six volumes which constitute this series were completed in 1846. In 1848, the first volume of the fifth series appeared, and the third was issued in 1853; then congress refused to make any further appropriation, and the work was suspended. It was originally intended to form six series: I, to 1688; II, to 1763; III, to 1774; IV, to 1776; V, to 1783; VI, to 1787. As published, the work consists of nine volumes, from March, 1774, to Dec., 1776.— *Winson*, VIII: 425-26; *Lossing, Cyclo. of U. S. Hist.*, I: 701.

In this year, the first successful introduction of the screw in steam navigation was made, by Captains Ericsson and F. P. Smith on the steamer "Thames." — *Annals of N. Am.*, 579.

In this year, the first steam-launch was designed by, and constructed under the direction of, Chaos. Haswell at the New York Navy Yard, and named the "Sweetheart." The engine was subsequently transferred to the U. S. Naval School at Philadelphia.— *Harwell's Reminiscences*, 349-50

An English traveller, writing of New York, comments: "A custom prevails, in the principal streets for shops, of having wooden pillars planted along the outer edge of the pavement, with horizontal beams reaching from pillar to pillar, not unlike the stanchions and cross pieces of a rope-run. On these pillars, usually painted white, are pasted large printed placards, announcing the articles sold in the shop before which they stand; and from the under side of the horizontal beam are suspended, by hooks or rings, show-boards with printed bills of every colour. This is especially the case opposite the bookstores. Another purpose which these pillars and beams serve, is that of suspending awnings from the houses to the end of the pavement in summer, . . . " He also observes: "A great defect in the municipal arrangement is the want of sufficient light in the street by night. The lamps are so far apart, and so scantily supplied with gas, that it is impossible to distinguish names or numbers on the doors from the carriages, or even on foot, without ascending the steps to examine; and as no uniform plan seems to be laid down for the order in which the numbering of the houses shall be made, the difficulties and delays are vexatious to the most patient." — J. S. Buckingham, *America, Historical, Statistical, and Descriptive* (London, no date), I: 44-50, 221-22.

J. Disturnell published, in this year, another New York City guide-book; calling it *New York As It Is*, In 1837. The title-page states that this was the "fourth year of publication." See 1833 for extracts from his guide for that year. The N. Y. Hist. Soc. owns copies of the work for 1833, 1834, 1835, 1837, and 1839. Some of the new features in the city's growth, mentioned in the 1837 edition, are as follows:

The "Introduction," dated May, 1837, remarks: "The sad reverse which the City of New-York, and the country at large has recently experienced, owing to the derangement of our currency, and a too anxious desire to accumulate wealth, ought to teach us a lesson of moderation. . . . Too long has the unfailing usurer, the greedy speculator, and the selfish politician had the ascendency in private.

"A Telegram is established on the heights of Staten Island, communicating by signals with one in the City on Holt's Hotel" (cf. 1838).— *Ibid.*, 11.

The Rotunda was now used as the post-office.— *Ibid.*, 13.

The works of the N. Y. Gas Light Co. were situated at the corner of Canal and Centre Sts. Already, 26 miles of iron gas-pipes had been laid in the principal streets. The price of gas was
1817, 70 cents per 100 cubic feet; or, for a store, having four lights, $60 a year.—Ibid., 12.

The account of the development of the New York and Harlem Railroad is as follows: "This company was incorporated in 1831 [5,5], and has since been so amended that its capital, originally $35,000, was increased to $1,150,000, in 1834.

"The route selected for its road is from Prince-street, in the Bowery, through the 4th Avenue, to Harlem River, with a branch through One hundred and Twenty-fifth-street to Ninth Avenue, and thence to the Hudson River at Manhattanville landing.

"The first running of the cars upon this road was in November, 1834, and they travelled no further than Fourteenth-street. In June, 1835, their route was extended to Murray Hill. In May, 1834, the route was further extended to Yorkville, where it has continued ever since." The number of passengers and the amount of fares received each year from 1834 to the end of 1836 is given.

"When the route shall be extended through the tunnel over the beautiful embankment and bridge constructed to Harlem, the number of passengers will, probably, greatly increase.

"The tunnel commences at the southerly side of Ninety-first-street, and terminates at the northerly side of Ninety-fourth-street, and will be, when completed, 844 feet in length, 24 feet wide, and 21 feet high in the centre. Each end of the tunnel will be finished with a handsome stone facing, so as to give it a conspicuous and pleasing aspect; the embankment commences at One hundred and fifth-street, and extends to One hundred and sixth-street. This will be a most substantial work, as the whole will be supported by slope walls of dry masonry. At the crossing of the streets there are handsome arched carriage-ways, supported by stone pillars. At the northern termination of the embankment, the bridge commences, extending from One hundred and sixth-street to One hundred and eighth-street.

"This tunnel is said to be as spacious as any other excavation of solid rock made in modern times, not excepting the excavation of the Simplon, made under the Emperor Napoleon; and the approach to it at both ends through a rock, 52 feet in depth, is an object not less interesting than the tunnel itself.

"There is scarcely to be found a more beautiful and picturesque scenery in any part of the world, than the view Hall Gate and its neighbourhood presents, in riding over the bridge and embankment, north of the tunnel, at an elevation of thirty feet above the level of the avenue.

"It is expected that this road will be travelled by the cars to Harlem some time in the month of July, 1837.

"Passengers’ Ticket Offices, at No. 244, Bowery; and at the corner of Fourteenth-street and Fourth Avenue.—Ibid., 14-15.

"It was in this year that the N. Y. & Harlem R. R. Co. acquired the block between 26th and 27th Sts, Madison and Fourth Aves, and erected on the southern half a depot, stables, machine-shop, and superintendent’s office.—From chronology supplied by the company.

May Day is morning-day in New York.—Disturnell, 19.

During 1836, Beaver St. was extended through the "Burnt District," intersecting Pearl at the corner of Wall St; Mill St. was connected with William St. in the same neighborhood, and it was proposed to change the name of Mill to South William. Fulton St. was widened on the south side between Broadway and Gold St. Gold St. was widened between Fulton and Frankfort Sts. Spruce St. was widened from Gold St. to Nassau. Chatham St. was widened between Murray and Franklin Sts, and it was proposed to change its name to West Broadway.—Ibid., 20.

N. Y. University, on Washington Square, just completed, is described, with view (frontispiece).—Ibid., 21.

The district burned over by the fire of Dec. 16 and 17, 1835, is already nearly all rebuilt. Most of the stores are occupied, and many of them are "entirely fireproof, constructed in the most durable manner, principally of brick."—Ibid., 22.

The construction of the new merchants’ exchange, the new custom-house, and the halls of justice is now under way. These are described in detail. "The merchants’ exchange is the building of Quincy granite which still stands on the block bounded by Exchange Place, Wall, William, and Hanover Sts. (constructed in 1830), and the National City Bankhouse also still stands, on the east side of Nassau St., between Wall and Pine Sts. (which became the sub-treasury). The halls of justice (or "Tombs"), built in the Egyptian style of architecture, were erected

on made ground where once was the Collect Pond. Every precaution has been used “to render the foundation secure by the introduction of iron ties, inverted arches, and heavy timbering.” The ground was excavated several feet below the water level, large timbers were placed together, and range timbers at right angles with these laid several feet wider than the respective walls.” The superstructure was erected “during the past season.”—Ibid., 24-27.

It is worthy of note that the Brooklyn city hall, at the intersection of Fulton, Court, and Joralemon Sts., was also in course of erection at this time.—Ibid., 27.

The National Academy of Design has the following lecturers: Samuel F. B. Morse, painting; Horatio Greenough, sculpture; William C. Bryant, mythology; Robert W. Weir, perspective; William Dunlap, historical composition; Thomas S. Cummings, miniature painting; Gulian C. Verplanck, history; A. J. Mason, wood engraving—Ibid., 66-67.

The meeting place of the N. Y. Sacred Music Soc. (established in 1823, and incorporated in 1829, p. 52), was at this time in the Chatham St. Chapel (formerly the Chatham Theatre).—Ibid., 72.

Views of New York in this year reproduced in the present work include (besides those cited under specific dates) the Hill-Bennett-Clover view from Brooklyn Heights (PL. 117), and the Merchants’ Exchange (PL. 118), both in Vol. III.

A survey of the Commissioners’ Lands is made this year by Francis Nightingale.—Sotheby & Co., 1841, for real estate bureau of comptroller’s office. See, further, Ag. 1838.

In this year, the cross-roads in the Forties and Fifties were being extensively opened. For example, the cost of opening 57th St. from river to river was provided for on March 16 to the amount of $11,100.—Man. Com. Coun. (1837), 353-357.

In this year, 1836, $60 buildings were erected in New York.—Exe. Post, F. 8, 1838, citing Jour. of Com.

"The house still remains [1837] in William street, New York, in which he [George Washington] instructed his hearers. Its peaked front and roof marks its antiquity, although it has been modernized. The street was then called "Horse and Cart street," from a sign of a horse and cart at a tavern door, opposite the house in which Washington discoursed, he occupying the upper story, which was then a sail loft."—Dunlap, Hist. of the New Neth, II: Appendix, CLXXI.

This was the so-called "rigging loft" at 120 William St.—See description of PL. 43, I: 1441 and L. M. R. K., III: 930.

In this year, the congregation of the South Church (Reformed Dutch) separated into two branches, one going to a church on Murray St., which was completed and opened on Dec. 24 (p. 53), and the other to Washington Square, to which was added the building of the University until its own building, which was being erected beside the University, should be completed, in 1840 (p. 0, O 1 see descrip. of PL. 139, III: 708). This congregation remained in the Washington Square church until 1876.—Corwin’s Manual, 1804: Historical Sketch of the South Dutch Church, 27, 29, 31, 37; Greenled, 20-21; Trow, The New Metropolis (1821), 66, 74, 139, Vol. Dunlop’s former church, No. 145, 2nd St., between the Hudson and Harlem Rivers, was bought by the University and was erected as Washington Square; it was erected in 1837-40 and demolished in 1895.

In this year, the city granted to the Soc. for the Reformation of Juvenile Delinquents a plot of ground between 23rd and 24th Sts., Ave. A and First Ave., in exchange for a re-conveyance to the city of land sold by the society at the lower end of Madison Square.—L. M. R. K., III: 924; Man. Com. Coun. (1837), 762. In 1834, the city gave the society a quit-claim deed of the entire block at First Ave., which contained the 1837 land-grant.—Ibid., (1870), 762.

In this year, assessments were levied for opening streets, including the following: Fifth Ave. between 21st and 42nd Sts; 4th and 57th Sts. from river to river; 86th St. from Eighth Ave. to the Hudson River; 145th St. from Third Ave. to the Harlem River; 157th St. between the Hudson and Harlem Rivers.—Index to Assessment Rolls, Vol. I, in comptroller’s office.

In this year, the firm of Tiffany & Young was established at 259 Broadway. In 1845, it introduced its first stock of standard gold and gem jewelry. In 1847 (then styled Tiffany, Young & Ellis), the firm moved to 271 Broadway; in 1853, when first called by the familiar name Tiffany & Co. It continued to occupy the same elegant at 520 Broadway; and, in 1870 (p. 99), it moved to Union Square.—From data supplied by the company; and Lossing, Hist. of N. Y. City, II: 797-99.

In this year, the store now familiarly known as "McCreevy’s"
1837 had its beginning, at 102 Canal St., under the firm name of Usdell & Peirson. For its history, see Evet. World, Aug 4, 1852.

9 In this year, Bangs, Merwin & Co. began business as auctioneers of literary works and prints. M. F. H. Bangs continued the business under the firm name of Bangs & Co.—Derby, Fifty Years among Authors, Books and Publishers (1884), 460. The good-will of Bangs & Co. was afterwards purchased by John Anderson, Jr., who gave his name to the business, and which, in 1903, became the Anderson Auction Co. In 1915, this company, with the Metropolitan Art Ass'n, became The Anderson Galleries, Inc., its premises being then on East 40th St., at the e. c. or. of Madison Ave. In 1917, the business occupied the Arion Society’s building, at the e. c. or. of Park Ave. and 59th St.—From data supplied by the company.

10 In this year, another fire (see 1832) occurred in Fraunces Tavern.—Drown, A Sketch of Fraunces Tavern (1919), 21. See, further, 1844.

11 In 1837-8, Franklin Market at Old Slip was rebuilt, of brick (L. M. R. K., III: 958), a temporary shed having been erected on the site after the burning of the old market in the great fire of Dec. 16, 1835 (De Voc, Market Book, 521).

12 In this year, the New York Review was established.—North, Newspaper and Periodical Press, 110.

13 In this year was published A History of New York, in 2 vols., by Wm. Dunlap.

14 “The chapel of the New York University is now nearly completed. It is small, of course, not being intended for the accommodation of a large audience, but it is uncommonly beautiful. The Gothick carvings in wood with which it is embellished are probably finer than any thing we have in this country. The stranger who visits our city do would to well to repair to Washington Square, were it only to see how nobly the University overlooks that spacious park. This building, which is of the simplest style of the Gothick sometimes called Byzantine[,] is the finest publick edifice of New York, and one of the finest in the whole country. Its proportions fill and satisfy the eye. The visitor should ascend the massive marble stair case, and peep in at the chapel door, which is politely left ajar. He will admire the effect of the two large windows, of the quaint Gothick tracery, of the richly wrought panels, and panneling and gro春风ions, thickly intersecting each other, and the knotting angels, with palmers in their hands, whose station is near the top of the large window back of the pulpit.”—Evet. Post, Ja 16, 1837.

15 Wm. Abbott announces that “Proposals will be received in the course of next week, for the erection of a splendid new Theatre, on the site of Masonic Hall, and lot adjoining, devoted to Italian and French Opera and Ballet, as well as the legitimate drama.”—Evet. Post, Ja 16, 1837.

16 The mayor approves assessments for laying the sidewalks of Fifth Ave. from Washington Place to 17th St.; and for grading 22d St. between Madison Avenue and the Hudson River.—Mayor's Message (1837), 68.

17 The mayor approves a joint resolution that the widening of Centre St. commence on May first, and that 20 days thereafter be allowed for the removal of the buildings which encroach upon it.—Proc, App'd by Mayor, IV: 173. This necessitated the destruction of the first public school building.—Halsey, Pictures of Early N. Y. on Dark Blue Staffordshire Pottery, 51. For the demolition of Free School No. 1, see 1839.

18 The legislature passes an act creating the Seventeenth Ward out of a part of the Eleventh Ward.—Laws of N. Y. (1837), chap. 16.

19 The name of the “Great Kill Road” (commonly known as the Great Kill Road) is changed to Gansevoort St.—Proc, App'd by Mayor, IV: 173. M. Merwin died in 1871. Wm. Dunlap, Richard Riker, and others, present to the board of assistant aldermen a petition “relative to translating and preserving the Dutch records now remaining in a disadipated state in the office of the Clerk of the Common Pleas of this County.”—Proc., Bd. of Ass't. Ald., IX, 110. This was the initial step toward the publication, in 1837, of The Records of New Amsterdam. For the action of the city on this petition, see 1839.

20 The following notice appears in a handbill and a newspaper:

*Bread, Meat, Rent, Fuel! Their Prices Must Come Down. The Voice of the People Shall be Heard, and Will Prevail*

“The People will meet in the Park, Rain or Shine at 4 o'clock, on Monday Afternoon [Feb. 15] To inquire into the Cause of the present unexampled Distress, and to divide a suitable Remedy. All Friends of Humanity, determined to resist Monopolists and Extortioners, are invited to attend.”—The document bears the names of eight citizens.—Evet. Post, Fe 10, 1837; and descrip. of Pl. 126-b, III: 969-971. See, further, F 15.

21 “Vanderbilt is building a splendid steamer to run on the Sound in opposition to the Transportation Company’s boats to commence on the 1st of March. He is the greatest practical anti-monopolist in the country.”—Evet. Post, F 10, 1837.

22 The legislature authorizes the establishment of a medical faculty in the University of the City of N. Y., which shall have power to confer the degree of doctor of medicine. The act requires the agent of the state prison at Sing Sing to deliver, at the prison, to the medical faculty of this university, “such dead bodies of convicts as are by law authorized to be dissected, not exceeding one half of the number of such bodies.”—Laws of N. Y. (1837), chap. 23.

23 “Disgraceful Riot and Destruction of Property.—Our city was yesterday [F 15] the scene of a riot and outrage upon private rights of citizens. ... A short time after the adjournment of the meeting in the Park yesterday afternoon [see F 10], a mob of several hundred repaired to the extensive flour warehouse of Eli Hart & Co., No. 175 Washington street, and commenced violent proceedings upon it and those who were in it.”—Evet. Post, F 14, citing The Times; see also N. Y. Com. Adv., F 14, 1837.

24 It was estimated that Mr. Hart’s losses would exceed $10,000. The opinion was expressed that the demonstration was organized to give certain persons political consequence, although it could not succeed in reducing the price of flour.—Morn. Chron., F 14, 1837. In the reference to the event in Vol. III, p. 525, line 32, “January” should be February.

25 See also the cartoon, “The Times,” which was published in connection with the “Loco Foco” campaign of 1837, and which is reproduced and described in Vol. III (p. 126-b). See Ap 10.

26 The mayor approves an assessment for paving the sidewalks of the Bloomingdale Road from 14th to 21st St.—Mayor’s Message (1837), 76. The common council permits John and Peter A. Delmonico, 17 who are erecting “an elegant and expensive building” on the triangular piece of land situated at the junction of William, Beaver, and Mill Sts., fronting on each of these streets, to build “an iron balcony in front of the windows on the second and third stories.”—Proc., App’d by Mayor, IV: 180; Mayor’s Message (1837), 77. See also descrip. of Pl. 118, III: 623; and D 18, 1830.

28 Friction or “Lococo” matches are introduced.—Com. Adv., F 22, 1837.

29 The mayor signs a resolution that the sidewalks around Washington Square be flagged.—Mayor’s Messages (C. W. Lawrence), 78.

30 Proposals are invited, until April 26 (q. v.), “for furnishing the materials and completing the construction of twenty-three sections of the Croton Aqueduct, including the dam in the Croton, the aqueduct bridge over Sing Sing Kill, and the necessary excavations and tunneling on the line of about 83 miles from the Croton to Sing Sing village.”—King, Memoirs of the Croton Aqueduct, 144-45.

31 In this month, the erection of the seminary building on Jackson Ave. (University Place) —see O, 1851; Ja 18, 1836—was begun. Suspended by the financial distress of the period, and hampered by a controversy which interrupted the Presbyterian denomination, the building was not finished and dedicated until Dec., 1838.—Lossing, Hist. of N. Y. City, II: 449-45. See, further, Mr. 1839.

The city acquires by condemnation proceedings the land comprised in Christopher St. Park, at Christopher, West 4th, and Grove Sts.—Prendergast, Record of Real Estate (1914), 49.

By this time, 125th St. was opened from Manhattan St. to the Bollingbrook Road.—Man. Com. Coun. (1857), 536. In 1849, the cost of this work was recorded as $2,650.39.—Ib. 533. See 1817.

The legislature passes "An Act to alter the map or plan of the city of New York, by establishing a public square or place in the sixteenth ward." The land is described as bounded on the north by 26th St., west by Fifth Ave., south by 23rd St., and east by "a certain street established by law, being seventy-five feet wide, and lying between the Fourth and Fifth Avenues."—Laws of N. Y. (1837), chap. 177. The land thus acquired, consisting of about 5 acres, was part of the Commercial Lots granted to the city by the Dongan Charter. This act was one of a series of acts whereby the area of the proposed "Parade," as laid down on the Commissioners' Map of 1807-11, was reduced. For the earlier acts in the series, see Mr. 21, 1828; Mr. 16, and Ap. 25, 1829. See also description of Pl. 148-a, III: 720; and of Pl. 163, III: 857.

On April 12, 1837, the city acquired an additional piece of real estate from Richard R. Ward (recorded in Liber Deeds 375, p. 257); in 1845, another, from Francis B. Cutting (Liber Deeds 378, pp. 192, 197), and in 1847 another by condemnation proceedings, all of which together comprise the present Madison Square.—Prendergast, Record of Real Estate (1914), 49. See also description of Pl. 114, III: 687.

"One of the signs of the times is to be seen in the sales of rich furniture. Men who a year ago thought themselves rich, and such expenditures justifiable, are now bankrupt. "Markets continue extravagantly high; meat of all kinds and poultry are as dear as ever. The farmers (or rather the market speculators) tell us this is owing to the scarcity of corn; but the shad, the cheapness of which in ordinary seasons makes them, as long as they last, a great resource for the market, could not fetch seventy-five cents and a dollar. Is this owing to the scarcity of corn, or are the fish afraid to come into our waters lest they may be caught in the vortex of Wall Street? Brooms, the price of which, time out of mind, has been twenty-five cents, are now sold at half a dollar; but corn is scarce. Poor New York."—Hone's Diary, I: 250. On the following day the Post, in its "Commercial Record" says: "More failures were announced yesterday after the number of banks stopped up to this time is said to be one hundred and twenty. Such a state of things is unprecedented, and we fear the worst is to come. It is really painful to hear of the distress of business men, who have always lived in affluence. This will be appreciated by those who know that the furniture of the Joseph's was sold at auction yesterday."—N. Y. Post, Ap. 11, 1837. Cf. McClure, Hist. of the People of the U. S., VII: 395. See also Ap. 18.

In the election held on this day and the two succeeding days, Aaron Clark, a Whig, was elected mayor.—Eve. Post, Ap. 11, 1837.

The legislature establishes Thirty-seventh Ave. as the permanent exterior street along the Hudson, between Hammond and 135th Sts., as laid down in a map made by Geo. B. Smith, city surveyor, dated March 10, 1837, approved by the corporation on April 28, and filed in the street commissioner's office. The act also provides for the extension of the streets south of and including 135th St. westward to Thirty-seventh Ave.; Eleventh Ave. shall be extended south from 35th St. to 19th St.; and Twelfth Ave. shall be extended north from 36th to 15th St. The act gives the city control of the water lots lying along the line of the proposed wide of the exterior street, subject to the pre-emptive right secured to their owners.—Laws of N. Y. (1837), chap. 182; amended by ibid. (1846), chap. 268.

The legislature passes a very full act "for the licensing and government of the pilots of the port of New-York, by the way of Sandy-Hook."—Laws of N. Y. (1837), chap. 184.

Columbia College celebrates the semi-centennial anniversary of the reconstruction of the college under the act of the legislature passed April 13, 1877. The honorary degree of master of arts is conferred on Fitz-Greene Halleck, Wm. Cullen Bryant, and Chas. Fenno Hoffman.—Eve. Post, Ap. 15; N. Y. Com. Adm., Ap. 14, 1877; Hist. of Columbia Univ. (1904), 118.

"Failures are taking place every day."—Eve. Post, Ap. 21, 1837.

The assistant Aldermen go on record in favour of translating and preserving certain Dutch records (see F 6). These records are to be "lying in the office of the New York Common Pleas, ... in a dilapidated state," consist of "will, deeds, the acts and doings of Governor P. Stuyvesant and Council, and the proceedings of the Burgomasters," while this city was under the
Chromology: Invention and Prosperity: 1815-1841

1837

Dutch governor. They were written, the report continues, "in characters, some words contracted, and many in French, English and Latin words, Dutchified" and difficult to translate, but Dr. Westbrooks explained in the Evening Post with this kind of writing, and should be employed in rescuing these papers from the oblivion which they must soon fall into." An appropriation of $500 is made. — *Journal & Obit*, ed. of Ast. Ald., IX: Dec. 15. The aldermen concurred, and the resolution won Mayor Clark's approval on Aug. 2 (g-3). While the matter was under discussion in the board of aldermen, "a foreign gentleman," in that board, says a note in the Evening Post, "tries and opposes the measure — nay, treats it with ridicule."

"This is just what might be expected. A foreigner can feel no interest in the history or the honor of New York. His feelings are engaged in the transactions of the present day, or if he looks back to the annals of any country with interest it is to those of the land of his nativity. We cannot blame him — we blame those who placed him in a seat that ought to be occupied by one who has the feelings of an American." — *N. Y. Eco. Post*, May 9, 1837.

25 A meeting of merchants is held in Masonic Hall, presided over by ex-Mayor Hone, "to take into consideration the causes of the existing distress, and to devise suitable measures of relief." A committee is appointed to "repair to Washington and prosecute" that case. The legislature authorized the continuance of the contract; see [Jl 11, 1837]; and in behalf of this meeting, and in the name of the merchants of New-York and the people of the United States, urge its immediate repeal. — *Morning Courier & N. Y. Enquirer*, Ap 25 & 26, 1837; *Hone's Diary*, I: 251 - 252, 254 - 55. See May 4.

Hone again attends a dinner of the governing committee of the Union at Windust's (see D 7, 1837). Record in his diary that the executive committee are engaged in preparing the house and laying in stores and furniture. They expect to be ready in about three weeks. He adds: "This club will be well suited to the purposes. A single gentleman will be able to get a good dinner and wine for half the price he would have to pay at a hotel." — *Hone's Diary*, I: 252. See, further, May 27.

The legislature incorporates "The society for the relief of half orphan and destitute children in the city of New York," the object of which is to "relieve, provide for, instruct, and protect such children." — *Laws of N. Y. (1837)*, chap. 27.

The following parts of streets are discontinued: 41st St. from Fifth to Sixth Aves.; 68th St. between Third and Fourth Aves.; 8th, 81st, 88, 84, 8th, and 8th Sts. between Sixth and Seventh Aves. — *Laws of N. Y. (1837)*, chap. 274.

About 4,000 or 5,000 people attend a Locofoco meeting in the Park and adopt resolutions advising a general retrenchment of expenses and the preservation of funds, recommending to the common council, in the present scarcity of work, to employ as many laborers as possible "in the construction of the works for bringing water to this city, and other public works in progress," suggesting that the city set an example of economy by reducing official salaries, and providing for the appointment of ward committees "to attend to the condition of destitute emigrants and others who may desire to remove to the country." — *Even Post*, May 4, 1837.

Pres. Van Buren replies to the committee of merchants (see Ap 25) who urged "an immediate repeal of the order requiring specie in payment on sales of public lands" that he has not been able to satisfy himself that he "ought, under existing circumstances, to interfere with the order referred to." — *N. Y. Eco. Post*, May 6, 9, 1837; cf. *Hone's Diary*, I: 252 - 56.

The common council permits the N. Y. & Harlem R. R. Co. to continue its rails by single or double track southwesterly from the north line of Prince St. to the north line of Walker St., subject to the same conditions and restrictions as imposed upon the company in respect to that part of the road between Prince and 23rd Sts. (see May 12). — *Papers by Mayor*, IV: 213; *Mayor's Message* (1837), 105; *Dec. No. 79*, Bd. of Ald., Dec. 7, 1836. See S 205; Mr. 12, 1838.

"There is great excitement to-day, occasioned by the sudden death of Mr. Fleming, Cashier of the Mechanics' Bank. He only resigned yesterday, and in consequence there was a run for specie

1837

May

"The crowds in Wall-street betoken the interest felt in the affairs of that bank. New-York never saw such a time. There is no parallel for the occasion." — *Even Post*, My 4, 1837. See also *ibi*, May 5, 1837.

The mayor signs a resolution "That a reservoir be constructed on the ground on 13th street, near the Bowery, similar to the one now in use under the direction of the Joint Committee on Fire and Water;" and $10,000 is appropriated for the work, which is to be done by contract after the common council has approved the plans, etc. — *Proc. Apd by Mayor*, IV: 238 - 39. See also Disturnell, *N. Y. As It Is*, In, 1837, 17, and L. M. K. R.: III: 976. A view showing the roofs of the two reservoirs is in the En P. L. *See. 3. In The Eco. Collection*, N. Y. P. L. — *See. 336 in The Eco. Collection of N. Y. Views*, by Weytenkamp (1827).

The Dry Dock Bank stops payment. — *Hone's Diary*, I: 254. Aaron Clark, Whig, takes office as mayor, succeeding Cornelius W. Lawrence, Democrat. — *Eve Post*, May 9, 1837. Immediately, "There was quite a scrambling for the 'spoils' among the whig members of the Corporation. . . . City officers were removed by dozens, and their places supplied by those who had voted the whig ticket." — *Ibid*, May 11, 1837. He was succeeded by Isaac L. Vanian, Democrat in 1839 (g-e, Ap 9 and My 14).

.. the banks in the city, and, so the state of the times will soon be such as to render the resumption of specie payments practicable. — *N. Y. E. Post*, May 10, 1837. "The experiment [see Jl 11, 1837] last succeeded; the volcano has burst and overshadowed New York; the glory of her merchants is departed. After a day of unexampled excitement, and a ruthless run upon all the banks, which drew from their vaults $600,000 in specie yesterday, nearly as much having been drawn on Monday, the officers held a meeting last evening and resolved to suspend specie payments." — *Hone's Diary*, I: 256.

"A few days before some banks in lesser cities of the Southwest had stopped. On the day after the New York suspension, the banks of Philadelphia, Baltimore, Albany, Hartford, New Haven, and Providence followed. On the 14th the banks of Boston and Mobile, on the 15th those of New Orleans, and on the 17th those of Charleston and Cincinnati fell in the same crash. There was now simply a general bankruptcy." — Shepard, *Martin Van Buren*, 274.

The legislature extends for two years more the time for commencing the construction of the N. Y. and Albany Railroad (see Ap 17, 1832). — *Laws of N. Y. (1837)*, chap. 411. See Ap 5, 1840.

The legislature authorizes the inhabitants of Morrisiana, in Westchester Co., "to build a free bridge for their private use across the Harlem river, between Harlem and said Morrisiana." The act requires that "Such bridge shall be constructed with a draw or slide for the passage of vessels with standing masts, and be so attended as not to obstruct or hinder the free passage of vessels navigating said river." The right granted by this act must be used in conformity with the right reserved to the inhabitants of Morrisiana in the act of March 31, 1790 (g-r), which granted to Lewis Morris, his heirs and assigns, the right of a toll-bridge across the Harlem River. — *Laws of N. Y. (1837)*, chap. 423.

The legislature incorporates "The American Society for the Diffusion of Useful Knowledge," to advance the cause of general education "by obtaining and publishing statistics and facts relative to the history, the progress and the improvements of the school systems of our own and other countries; of promoting associations among professional teachers, for the purpose of their mutual improvement and co-operation; and for the establishment more generally throughout our country of libraries and reading-rooms for popular use; of establishing correspondence with similar institutions in Europe, with a view to procure facilities for promoting by all laudable means, the general interest of literature, education, science
1748

THE ICONOGRAPHY OF MANHATTAN ISLAND

...and the arts. The society is "to be located in the city of New-York." Among the incorporators are Thomas De Witt, Alonso Potter, Jacob Abbott, Sam'l F. Morse, and Gorham D. Abbott.

The H. Hilton Square is rented out as a pasture land by the commissioners of the almshouse, bridewell, penitentiary, etc.-Minutes of the Comrs of Almshouse, Bellevue and Bridewell, etc. (MS.) in office of the nec. of dept. of public welfare.

20 N. Y. University, on University Place, on the east side of Washington Square, between Washington Place and Waverly Place, is dedicated. For an account of the ceremony, and a description of the building, see Evw. Post, My 19, 1837; N. Y. Mirror, Je 10, 1837; Chamberlain's N. Y. University (Boston, 1901), I: 67-69; N. Y. A: It Is, In 1837, 51; A Picture of N.Y. T. in 1846, 34. For view of the building, see N. Y. Mirror (1834); XII: 81; Men. Com. Coun. (1848), 106. For criticism of the architecture, see D 31, 1834. See also L. M. R. K., III: 941. When the university moved to University Heights, in The Bronx, in 1894 (q.t.c.), the building on Washington Square was demolished. The law school and certain other departments, however, are still maintained in a building since erected on the old site.

-Capt. Marryat is in New York. For Hone's estimate of him, see Hone's Diary, I: 260, 262.

22 Hone comments on the shocking loss of life in steamboat accidents, "especially on the Western waters."-Hone's Diary, I: 260.

26 "A deadly calm pervades this lately flourishing city. No goods are selling, no business stirring, no boxes encumber the sidewalks of Pearl street; stocks have fallen again, but not back to the prices at which they were before the suspension of specie payments. ..."-Hone's Diary, I: 261.

Hone records: "I dined with the governing committee of the Union Club, the first dinner in the club house, No. 343 Broadway [see Je 17, D 7, 1836; Ap 25, 1837]. The house will be open to the subscribers on Thursday next. It is well fitted up, the furniture neat and handsome; the servants are good, and, above all, there is a most recherché chef de cuisine. Subscribers will get a better dinner and pay less for it than at any hotel in town. It is a great resource for bachelors and men 'about town' but I do not see how we married men can be induced to leave our comfortable homes and families to dine 'en garçon' at the club, even under the temptation of Monsieur Julien's ban diners à la Paris. "-Hone's Diary, I: 261-62.

The City Directory of 1836 shows that 343 Broadway was the residence of Jacob R. Le Roy, after which time Le Roy lived in Lafayette Place. According to the Directory, the club-house stood on the west side of Broadway, just below Leonard St.; from which it appears that Wilson (Mem. Hist., IV: 234) is in error in stating that the Le Roy house was "near White Street." See also L. M. R. K., III: 939. The club's handbooks for 1812 and other years are, apparently, in error in stating, in a condensed chronology, that this first club-house was "opened" in "1836." For the second club-house, see My 13, 1842.

June

"Upwards of one hundred and thirty removals and appointments were made last evening by the Common Council. This is done working by wholesale."-Evw. Post, Je 5, 1837.

12 Referring to Prince Louis Napoleon Bonaparte (see Ap 17), Philip Hone writes: "This youthful scion of the Bonaparte stock, who for four years from Paris for a sally attempt at revolt made by him at Strasburg, after walking Broadway during the last three or four weeks, sailed to-day in the 'George Washington' for Liverpool. ..."-Hone's Diary, I: 263.

13 James Ryan, of Boston, announces that he has leased "the large building in Duane street, six doors from Broadway, known as Rutgers's College, for the purpose of a Hotel and Restaurant. After changes in plan, the common council adopts a resolution to rebuild Franklin Market at Old Slip, extending it 60 ft. on its northern end toward F stout St.-Proc., App'd by Mayor, V: 53.

Under this resolution a translation was made by Doctor West brook, from May, 1847, to the 31st of August, 1847, comprising a manuscript volume of about four hundred and fifty folio. The above appropriation having run out, the further prosecution of the work was discontinued, and nothing further in relation thereto was done until the year 1847" (see Ja 22, 1848).--Proc. Bd. of Ald. (1849), XXXVI, part 2, 572. This was Rev. C. D. Westbrook, of Peekskill.-Evw. Post, My 23, 1838, citing Albany Daily Ad.

15 "After some changes in plan, the common council adopts a resolution to rebuild Franklin Market at Old Slip, extending it 60 ft. on its northern end toward F stout St.-Proc., App'd by Mayor, V: 53. A brick market-house was erected soon after. In less than twenty years, the business had nearly all left this market.-De Voc, Market Book, 521-24.

The Broadway Theatre, on the east side of Broadway at the corner of Canal St., is opened. The building was formerly known as Euterpean Hall.-Evw. Post, Ag 28 and 29, 1837; Harwell's Reminiscences, 328; L. M. R. K., III: 982, under "Apollo Hall." Brown, Hist. of the N. T. Stage, I: 262-63, erroneously gives the date of opening as Aug. 28, 1836. See, further, D 4.

The Stuyvesant Institute (see My 25, 1836), at 695 Broadway, opposite Bond St., offers gratuitous accommodations to the N. Y. Philosophical Society. The application was accepted, and the society moves into two spacious rooms.-Kelby, The N. T. Hist. Soc., 1804-1894 (publ. in 1905), 44; 45; N. Y. H. S. Coll. (1841), 468; N. Y. H. S. Proc. (1848), 21. For view of the Stuyvesant Institute, see Kelby,
CHRONOLOGY : INVENTION AND PROSPERITY : 1815-1841

The society's last home was in the Remsen building.—See Ap 19, 1832. See, further, O 5, 1841.

Prof. Charles G. B. Daubeney, a distinguished botanist, from Oxford, writes of New York, where he arrived on this day: "... I must indeed confess that the Broadway, as a single street, eclipses in certain respects anything that I can call to my mind in London; there, it is true, in no such public edifices as those in Regent Street, but there, however, is the contrast of all that appertains to the city and neighbourhood. The Battery, for instance, is a promenade which in point of situation might compete with any in Europe, even with the boasted Villa Reale of Naples, commanding as it does the most extensive views of the beautiful Bay, enlivened by the numerous vessels constantly passing and repassing. It is kept, however, in a slovenly manner, and laid out with no sort of taste; nor are picture galleries or museums, on the plan of European cities, to be met with. The only public buildings that rank above mediocrity, are the City Hall, (which, however, would cut but a mean appearance by the side of any of the rich, though antiquated looking buildings of the kind in the Netherlands, or by that of the Bourse at Paris,) and the new University in Washington Square, which seems to be an imitation of the C.C., College, in Cambridge."—Jour. of a Tour through the U. S. and in Canada, made during the years 1837-38 (Oxford, 1841), 13-14.

The first number of the Daily News appears.—Eve. Post, S 4, 1837.

Wallack opened the National Theatre (late the Italian Opera House) this evening, with the comedy "The Rivals," writes Hole, describing theatricalisers. "The National is the prettiest theatre in the United States; but it is not in Broadway and the New Yorkers are the strongest people in the world in their predilection for fashionable locations."

"It is almost incredible that in these times of distress, when the study of economy is so great an object, there should be nine of these money drains in operation: The Park,—the old Drury of New York which has done well during the whole of the hard times; the Bowery...; the Franklin, in Chatham square; Miss Menier's Theatre, in Broadway, opposite St. Paul's,—little and weakly, and likely to die; the Euterpe Hall, Broadway, below Canal street,—short-lived, also, I suspect; the Broadway Theatre, next to Tatteralls's, which has been haphazardly fitted up, and is to be operated by Mr. Hamlion's Theatre, formerly Richmond Hill, where the Italian opera first placed its unstable foot in New York; the Circus, in Vauxhall Garden, nearly in the rear of my house [see Mr 9, 1846]; and Nibbo's Vauvelies,—the best concern of the whole at present, with a strong company playing little pieces à la française. Concerts, and rope-dancing, and other performances of the Ravel family, consisting of eight or ten of the most astonishing performers in their line who have ever appeared in this city. If Wallack can stand all this, he is immortal."—Hone's Diary, I: 266. See, however, S 23, 1839.

Hone records: "There never was a nation on the face of the earth which equalled this in rapid locomotion. The President's message was brought on to this city by railroad, steamboat, and horsemen, and carried from hence to Boston, which is not arrived in the inconceivably short period of twenty-four hours from Washington, a distance of five hundred miles."—Hone's Diary, I: 268.

The crowded and filthy condition of the bierwell compels the commissioners of the almshouse to urge the common council to push to completion the new house of detention.—Doc. No. 53, Bd. of Ald., S 11, 1837.

The brick wall around the grounds of St. Paul's Church is being removed, to be replaced by "a handsome iron railing."—N. T. Com. Adv., S 12, 1837.

The Olympic Theatre, at 442-444 Broadway, is opened. At first it was not successful.—Haswell's Reminiscences, 328; Brown, I: 264; L. M. R. K., III: 985. Cf. Man. Com. Com. (1865), 615. See also, S 22, 1837.

"We are gratified to perceive that the streets of this city begin to present a cheerful aspect. We learn that trade has very sensibly improved within a few days, and jobbers now have hopes of doing a respectable fall business. This, though not sufficient to relieve merchants wholly from the existing pressure, is still encouraging for the future..."—Eve. Post, S 16, 1837. See also ibid., S 21, 1837.

"That business will in a short time recover from its present depression, we have no doubt; and the step most essential in hastening such an event will be the resumption of specie payments by the banks, which we hope will be undertaken as speedily as possible."—Eve. Post, S 16, 1837.

The Y. & H. R. R. is "laid with a double track in the Bowery as far south as Walker street, and in a short time it is intended to lay the road down to the City Hall, and ultimately to Whitehall. The construction of the road even in the Bowery was and is defiance of the opposition of nearly all interested in any way in property on that thoroughfare."—Eve. Post, S 20, 1837. See also ibid., S 23, 25, 28. See, further, O 26.

The ground between Sixth and Seventh Aves., 79th and 86th Sts., is appropriated for a reservoir, also the ground between Fifth and Sixth Aves., 46th to 42d Sts.—Proc. App'd by Mayor, V 70.

The Yorkville or receiving reservoir was begun on the former site in 1838, and the Murray Hill or distributing reservoir on the latter.—66th Ann. Rep., Am. Soc. & Hist. Res. Soc. (1911), 343-352; 22d Ann. Rep. (1817), 354-355. The statement in L. M. R. K., III: 967, that the Yorkville reservoir began in 1838 extended from 66th to 60th Sts., is erroneous, as the one on this site was not authorized until 1839 (p. 50, JF 39).

"The fire district, has among other improvements, been the occasion of the restoration of Delmonico's establishment, with many additions to recommend it to public favor." The new restaurant, a three-storey building, was opened last week.—Eve. Post, S 26, 1837. It was at the intersection of South William and Beaver Sts.—L. M. R. K., III: 978.

Washington's coffin in the old vault at Mt. Vernon is opened, and the remains are deposited in a marble sarcophagus in a new vault on the estate. The lid of the sarcophagus is from a design by Wm. Strickland (1787-1854), architect and engineer, whom Dunlap thought he remembered as one "in the scene shop of the Park Theatre [New York], a companion of Hugh Reingale and a pupil of John Joseph Holland."—Hist. of the Arts of Design (Goodspeed ed.), III: 1735; Lossing, Mount Vernon and its Associations, 354-358; Wistach, Mount Vernon, 248-50. Cf. D 30.

The directors of the N. Y. & Harlem R. R. invite the common council and other citizens "to celebrate the completion of the great tunnel at Harlem Heights." The tunnel and other features of the route are described in the news report. A "most sumptuous entertainment" was served at "Nolan's great house, near the tunnel." Those who carried out the project, and who were called "a band of speculators," will be called "public benefactors."—N. Y. Com. Adv., O 27, 1837, citing the Express. The "whole course" of the road "is for the first time opened to the public." This includes "the Tunnel on the Fourth Avenue," described as an "artificial ravine that has been cleverly cut, quartering seventy feet, through the solid rocks of Mount Prospect."—N. Y. Mirror, XV: 1511 and see ibid. for Nov. 4; and N. Y. H. S. Bull., J 9, 1826, 117. See, further, N 22.

"The old pear tree on the Third Avenue planted by Governor Stuyvesant has lately been surrounded by a wooden paling to protect its trunk... The venerable tree yet annually drops its fruits, which we hope will be utilised as sportment, and not by accident or wantonness, will probably continue to do so for a century to come."—Eve. Post, O 31, 1837. See 1867.

The board of aldermen expresses its gratitude to Lieut. Thomas R. Gedney, U. S. N., for the discovery of the deep-water channel at the entrance to New York harbour.—Doc. No. 58, Bd. of Ald., N 7, 1837. See also Eve. Post, J 19, 1837.

The fare [on the N. Y. & Harlem Rd.] all the way through from the city to Harlem, is now reduced to 187 cents, one third

Sept. 16

Oct. 7

Nov. 22
THE ICONOGRAPHY OF MANHATTAN ISLAND

1837

22 (six cents) of which is for that portion of the route from Yorkville to Harlem.—*Even. Post*, N 22, 1837.

26 The Unitarian Church on Prince St., west of Broadway (see D. 7, 1826), is destroyed by fire.—*Even. Post*, N 27, 1837; Greenleaf, *Hist. of the Churches*, 376. The congregation engaged the large hall of the N. Y. Institute on Broadway, and used it for a place of assembly for a year and a half. The site of the burned church was sold, and "a substantial building of rough granite," erected "on Broadway, nearly opposite Washington Square," was opened for worship May 2, 1837 (p. 2), and named "The Church of the Messiah."—*Even. Post*, D 5, 1837.

29 The city hall bell is broken again (see JI, 22, 1836).—N. Y. *Com. Adv.*, N 29, 1837. See D 19.

Dec. 2 A news item reads: "Croton Water Works.—There are more than twenty miles of this work under contract and in progress. About twelve hundred men are employed on the various parts of the line, and the amount of work for the month of November alone amounted to nearly $45,000. Of the aqueduct about 2500 feet is completed. We learn that laborers are still in demand in Westchester. About three thousand will be employed in the spring."—*Even. Post*, D 2, 1837.

4 The Apollo "is a new amusement opened by Messrs. Bragalli and Palmo, at 410 Broadway, where a house has been elegantly fitted up, and the scenery and arrangements are burlotto'd by a manager called Italian Marlonetta."—*Even. Post*, D 4, 1837. This was formerly the Broadway Theatre (see Ag 28).—Hawwett's *Reminiscences*, 328; L. M. R. K., III: 982, under "Apollo Hall." See also Brown, I: 265.

6 The corner-stone of a new building for the N. Y. Institution for the Blind is laid on the premises occupied by the hall of the Lutheran and 34th St.'s.—The building now commenced is intended as the wing of a beautiful edifice of the Gothic order, spacious enough to accommodate all the blind of the state of New York. This wing will be built of stone, three stories in height, and will measure 150 feet in length and 35 in breadth. Another wing will be erected when the funds shall be procured, and next the main building, by which the wings will be connected.—*Even. Post*, D 5 and 7, 1837. See also L. M. R. K., III: 955.

8 A new bell is placed on the city hall, in place of the one broken on Nov. 20 (q. v.). It weighs between 5000 and 6000 lbs.—about 800 lbs. heavier than the old one. It was made by Messrs. Allaire.—N. Y. *Com. Adv.*, D 20; *Even. Post*, D 22, 1837. See also JI, 1837.

22 Carlton House "is an entirely new establishment, made by the union of two large brick houses on the east side of Broadway at the corner of Leonard street, and extending along Leonard street to Benson street, forming as extensive a building as can be desired for the purpose of a public house. . . ." "One advantage this house will have over others is its location, being in the very center of the part of Broadway is falling into neglect by the promenaders, whereas further up, near the Carlton, the street is gaining daily as a public resort."—*Even. Post*, D 22, 1837. See also Ibid., My 23, 1837.

24 The South Reformed Dutch Church, on the north-east corner of Murray and Church Sts., is dedicated by a branch of the congregation of the Garden St. church, which was destroyed in the fire of Dec. 16, 1833 (q. v.).—White, *Hist. Sketch of the South Church* (Ref. G), Greenleaf, 29; and see 1837. See, further, Je, 1849.

27 A large public meeting is held at Vauxhall Garden "in favor of the Canadian Patriots." Resolutions are adopted declaring that "the majority of the people of Canada have, by the election of their delegates to the Assembly of the Colony, evinced their desire to reform the abuses under which they have suffered for years; that Great Britain has despised the petitions of the Colonies as the despised those of these States prior to 1776, and that the grievances of the Canadians have not been redressed," expressing "the abhorrence with which we have witnessed the slaughter of men struggling for freedom—the destruction of their property—the burning of their villages and churches, and the persecution of our fellow men for the supposed crime of daring to ask for what was due to us,—the outrages of the Canadian as the effort of an enslaved people to obtain those rights which God and nature intended that they should exercise;" appointing ward committees to solicit subscriptions "to assist the Canadians who have taken refuge among us in every manner not forbidden by our treaties with Great Britain or by the Laws of Nations."—Dec. Dr. E. B. O'Callaghan, "Member of the House of Assembly of Lower Canada, and Editor of the Montreal Vindicator, for whose arrest the British Government has offered a reward of $2,000," addresses the meeting amid great applause.—*Even. Post*, D 28, 1837.

29 The remains of Washington.—The sepulchre of the Father of his Country was recently opened, in order to place his remains in the marble sarcophagus made by Mr. Struthers, of Philadelphia.—*N. Y. Mirror*, XV: 215; cf. O. Y. See also *Even. Post*, D 19, 1837.

By the end of this year, a chain of canals and railroads joined New York, Philadelphia, Baltimore, Wilmington, and Pittsburg, thus bringing the interior of the country along the Ohio and Mississippi Rivers into closer commercial relations with the Atlantic seacoast.—*See "Railway Development in the U. S., in the Papers and Discourses of the Am. Soc. of Civil Engineers*, XXXVII: 565.

1838

In this year, the English Public Record Office was established.—*Winson*, VIII: 459.

This year, Lord Durham made his important report on the state of Canada. He recommended the union of Upper and Lower Canada into a single colony with a single government and the organization of an executive council which should be responsible to the assembly.—Hazen, *Europe since 1815*, 225-27.

In this year, the library of the Union Theological Seminary was founded. In 1839, the Van Buren library was added to it by purchase (the collection of Mr. Van Loan and $1000, a gift of the editor of the Spectator and Vglate), which thereafter gave its name to the entire library.—*Mac. Com. Coun.*, (1836), 541.

In this year, the New York University Law School was established in the building on Washington Square. Benjamin F. Butler, who was attorney-general in Jackson's cabinet, was elected principal of the faculty, with William Kent and David Graham, Jr., as professors. When Butler was appointed U. S. district attorney, by Van Buren in 1839, the instruction lapsed.—*N. Y. University Bulletin*, Je 50, 1911. See also *Even. Post*, F 28 and Ap 19, 1838.

In this year and the next, the house of refuge (see JI, D 25, 1837) moved to Bellevue. First, a building was erected for the female delinquents, 150 by 45 ft., and three storied high; then the building known as the "Fever Hospital" (see 1824) was altered for the use of the boys, and the premises were enclosed by a wall.—14th *Ann. Rep. of the Managers of the Soc. for the Reformation of Juvenile Delinquents*, 1839; L. M. R. K., III: 942. See My 21, 1839. The Perris Insurance Map, Vol. VI (1854), shows these buildings on the East River, between 23d and 24th Sts.

In this year, an iron railing was erected around St. Mark's churchyard, replacing the wooden picket-fence which was built in 1830. This lower fence is still standing.—*Memorial of St. Mark's Church* (1899), 54, 145.

In this year, Common Lands in the Twelfth Ward were surveyed by Wm. Whitlock.—See map No. 86, in real estate bu. of comptroller's office. In 1853, a survey of lots in the same ward was made by John Callaghan.—See map No. 95, in same office.

In this year, Francis Nicholson made a survey of New York's squares, parks, and public places.—See map No. 89, in real estate bureau of comptroller's office.

In this year, John J. Serrell surveyed the city corporation's property between 23d and 42d Sts.—See map No. 79, in real estate bureau of comptroller's office. He surveyed also the city market grounds.—See map No. 200, in Ibid.

In this year, assessments were levied for opening Fifth Ave. between 42d and 125th Sts., and 34th St. from river to river (see also 1836).—*Index to Assessment Rolls*, Vol. I (comptroller's office).

In this year, the car-shops of John Stephenson were on the east side of Fourth Ave. between 128th and 129th Sts. Among the cars purchased for him by the N. Y. & Harlem R. were two large passenger coaches having diamond-shaped windows, built for the Erie R. R., but not desired owing to the failure of that company. These were made originally with 6 ft. gauge, but were altered to 4 ft. 8 $ in. to suit the gauge of the Fourth Ave. road.—From notes by W. S. Carman, supplied by the company. See also My 4.

In this year was published *Covenants on record in the Register's*
CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

Officer ... from the 1st January, 1835, to the 1st January, 1838, by Dudley Salter, with a Map of the Harlem Commons or Yorkville, compiled by J. F. Bridges, Jan., 1835, in four sections. The conveyances described are lots in the Harlem Commons, mainly as laid down on a map by Chas. Chilton in Dec., 1824. On pp. 117-23 are patents or confirmations issued by Gov. Richard Nicolls in 1666, and by Gov. Thos. Dongan in 1686, as well as much original matter relating to the establishment of the division line between Harlem and New York, and to the title of the Harlem Commons. Some of this matter is from the original Harlem records, now in the N.Y. P.L.

From 1835 to 1837, the Democratic Review was published. From 1835 to 1836, it was called the United States Review, and was succeeded by Florence and Lawrence's Democratic Quarterly Review. New York and the periodical press, 115.

While striking a fire alarm, a watchman cracks the bell on the city hall, (see D 19, 1837).—Com. Adv., 1838. See J. 24.

A report is current in the streets this morning ... that the British had crossed over to Fort Schuyler, on the American side, and burnt the steamboat Caroline, which had been chartered by the patriots. There were thirty persons on board, nine of whom were missing—supposed to have been drowned or burnt. If this be true, our neutrality has been violated more Signally by the British Canadians.—Ext. Rev., 193, 1838. This created great excitement in New York.—Ibid., 14, 1838. See also ibid., 10, 5, 129.

The foreign press, especially the British early in the morning of Dec. 5, and at least one man, Amos Furley, was killed and several wounded. Gen. Scott was at once dispatched with letters asking the governors of New York and Vermont to call out a military force, and a correspondence was opened with the British Minister, Henry S. Fox. Sir Francis Head, lieutenant-governor of Upper Canada, justified the attack on the grounds that the British had been invaded by the Canadian rebels. The federal government did not consider this a sufficient excuse for the act of aggression and protested to Great Britain. Nothing further was done until the autumn of 1839, when a Canadian named Alexander McLeod crossed the border and boasted, in taverns, that he had killed Furley. He was at once arrested and indicted. The British minister Fox protested against these proceedings, claiming that "the destruction of the steamboat Caroline was a public act of persons in her Majesty's service oberving the orders of their superiors," and that an individual could not be held responsible for an act done by order of the constituted authorities. The discussions over the case led to popular excitement in both countries, and there was at one time prospect of war between the U. S. and Great Britain had been avoided as far as possible by the President in 1814, and declared not guilty. The destruction of the "Caroline," however, having been admitted by the British to be a public act, an explanation and defence was demanded, and the affair was finally settled in 1842 by Lord Ashburton's assurance that "no slight to the authority of the United States was ever intended," that it was a "misrepresentation," and that an earlier apology should have been made. McMaster, Hist. of People of U. S., VI, 439-44, 461-73; VIII, 277. See also Here's Diary, 1 310.

The significance of the name High Bridge appears in a report of the water commissioners respecting the relative merits of a high bridge, "185 feet in height, on seven immense stone piers sunk in the water and mud, on an average of 24 feet below tide, with 80 feet span from pier to pier, with a wall one foot in the river, with an abutment," the latter being recommended because the expense would be about half a million less. In the light of modern developments, the following paragraph from this report is noteworthy. "If the [Harlem] river should ever be made navigable, by the removal of the hills at Kingbridge, and the obstruction of the dam at Macomb's Bridge, the facility afforded by the low bridges, of an archway of 80 feet in width, and 50 feet in height above full tide, will admit the passage of vessels of sufficient burthen and capacity, for every useful and necessary purpose, and the high bridge could do no more."

It is also interesting to observe the commissioners' admission "so far as architectural display is involved, that the high bridge has the preference."—Proc., P. & E. of Aids, XIV, 179-81. See J. 3.

President Van Buren issues a proclamation exhorting all Americans to refrain from interfering unlawfully in Canadian affairs, and declaring that "any persons who shall commit against this Government ... will render themselves liable to arrest and punishment under the laws of the United States."—Ext. Rev., 1838.

Washington Irving is considered as a candidate for several political offices, and he takes occasion to write to his friend Governor Kemble in New York, who is a member of the house of representatives in Washington, setting out his articles of political faith, and indulging in some criticism of the administration of President Van Buren.

A few weeks later President Van Buren wrote to Irving that the secretary of the navy was intending to resign, and tendered him the appointment. Irving declined, saying: "I shrink from the barest cares and turmoil of political life in Washington, and feel that I am too sensitive to endure the bitter personal hostility and the slanders and misrepresentations of the press which beset high station in this country. ... I really believe it would take but a short career of public life in Washington to render me mentally and physically a wreck and to hurry me prematurely into old age."—Life and Letters of Washington Irving, by Pierre M. Irving (N. Y., 1865), III, 96-97.

The common council appropriates $6,000 for another bell for the city hall (see J. 1) which shall be "warranted by the maker to answer all intended purposes for at least one year."—Proc., App'd by Mayor, 1838, p. 170; description of Pt. 14, III, 715. See F. 14.

The new alarm bell (see J. 24) is placed on the city hall. Although one of the largest of Spanish manufacture, weighing about 1,500 pounds, and placed in the tower, it rang only on the side for the clapper to rest against, it is feared that the tone will not be loud enough to reach the distant parts of the city.—Ext. Rev., 1, 1838. See Ag 1.

The Bowery Theatre (see S. 22, 1836) is destroyed by fire for the third time.—Ext. Rev., F. 19, 1838; Haswell's Reminiscences, 355; Costello, 229, Brown, I, 115; L. M. R. K., III, 392. It was rebuilt and opened on May 6, 1838.

When the Bowery Theatre was destroyed, the old Bull's Head Tavern, at that time known as "The Theater Hall," and "kept as a porter-house by Bradford Jones, with an oyster-cellar under it, and known as No. 50 Bowery," was gutted, and portions of its walls were overthrown. Repaired and reoccupied as a porter-house, a portion of its walls serving in the new structure, the old tavern, in 1867 and later, was known as the Atlantic Garden.—Hist. Mag., 26, 185.

St. Peter's Roman Catholic Church, at the corner of Barclay and Church Sts. (see O. 26, 1836), is consecrated.—Greenleaf, Hist. of the Churches, 356. See also Talley, Hist. of St. Patrick's Cathedrals, 13; L. M. R. K., III, 916; and The Freeman (1840), 321.

The common council appropriates "the further sum of $6,000" for the payment of the foundation of the Halls of Justice and House of Detention.—Proc., App'd by Mayor, 1838, p. 122. See D 1.

The name of Mill St. is changed to South William St.—Proc., App'd by Mayor, 1838, p. 126.

Consideration of Washington Irving as a candidate for mayor of New York becomes general, and Irving writes to his friend Governor Kemble in Washington, about it: "There is no truth in the rumor of my having consented to become a candidate for the Mayoralty. I have not even been applied to on the subject, but if I had been, nothing could induce me to undertake an office for which I feel myself so little fitted. Besides, I value my peace of mind too highly to suffer myself to be drawn into the vortex of New politics; which, not to speak profanely, is a perfect political Hell. However, a few days since the mayor expressed a kind of deputation from Tammany Hall at the cottage" (Sunnyside), informing him that he "had been unanimously and vociferously nominated a Mayor," and he concludes: "of course I declined."—Life and Letters of Washington Irving, by Pierre M. Irving (N. Y., 1863), III, 124, 126.

The St. George's Society of the city of N. Y. is incorporated.—Law Rev., 1838, chap. 97. Established in 1788, its membership was confined to residents of English birth or descent.—Losing, Hist. of N. Y. City, II, 186-88; A Hist. of St. George's Society of N. Y., from 1770 to 1815 (1915).

"A line of steam vessels to run between this city and London, attacking at Cork, in Ireland, has been established in England. The first trip will be made by the Sirius, a new steam vessel of seven hundred tons and three hundred and twenty horse power, which has been chartered by the company engaged in this
THE ICONOGRAPHY OF MANHATTAN ISLAND

1838, enterprise, and is expected to arrive here in April. This vessel is said
Mr.—to possess great recommendations for speed and seaworthiness.

24 Messrs. Wadsworth & Smith, of this city, are the agents of the
company. We believe that this is a different company from that
which sends out the "Great Western" steamboat, and is likely to
anticipate it in the enterprise.—Eve. Post, Mr 24, 1838. See also
ibid., Ap 19, 1838. The "Siris" arrived on April 22 (q.v.).

The editor of the Mirror writes of "the new American hotel,
which is nearly completed," at the north-west corner of Broad-
way and Barret St., and where, on May 1, this paper will occupy the
"first store," at No. 1 Barclay St.—N. Y. Mirror, XV: 311.
For view of the original American Hotel in 1827, see PL 100, Vol.
III; and, in 1831, Pl. 4 of the Bourne series, and PL 3 of the Pea-
body series.

29 An act of the legislature, assigning that of May 2, 1838 (q.v.),
for supplying the city with pure and wholesome water, authorises
the common council to raise a further sum of not more than $5,000,000
by loans, thereby creating a public fund or stock called "The
Water-Stock of the city of New-York."—Laws of N. Y. (1838),
chap. 127; Proc., App'd by Mayor, V: 159.

31 Parts of 115th, 116th, 117th, 118th, and 119th Sts., as laid out on the
plan of the city, between Tenth and Eleventh Aves., are dis-
continued.—Laws of N. Y. (1838), chap. 149. This was the
ground occupied originally by the N. Y. Hospital at Bloomingdale,
and now by Columbia University.—See descrip. of PL 178, III: 953.

A company called the "Sub-Marine Armour Co." is incor-
porated, with offices in New York, for the manufacture, sale, and
use of armour, as well as machinery and implements, for raising wrecked
or lost property from under water.—Laws of N. Y. (1838),
chap. 152.

The legislature authorises the extension of Lexington Ave.
from 42d to 66th St.—Laws of N. Y. (1838), chap. 148.

6 The legislature authorises the appointment of commissioners to
investigate the causes of fires in the city of New-York.—Laws of
N. Y. (1838), chap. 177.

7 The legislature incorporates the "Repository of the American
Institute."—Laws of N. Y. (1838), chap. 176.

In the election held on this day and the two succeeding days,
Mayor Clark was re-elected.—Eve. Post, Ap 10, 1838, et seq. "The
election . . . was contested with great animation. The three
parties in the field were the Democratic, Whig and Conservative.
The former adopted as their candidate for Mayor, Isaac L. Varian
. . . The Whigs renominated Mr. Clark, and the Conservatives
brought up Richard Riker, for many years Recorder of the city."
Clark received 19,723 votes, Varian, 19,204, and Riker, 395. The
Whigs "perpetuated their political power for another year" in the
common council by "a majority of one ward."

The N. Y. Hist. Soc. passes a resolution to memorialize the
legislature on the subject of collecting materials in Europe illustr-
ating the history of New-York. The draft of the memorial was not approved by the society until Jan. 8, 1839; and in that month it
was presented to the legislature, followed by a special message from Gov. Seward on Feb. 5, and adopted.—Kelby, The N. Y.
Historical Soc., 1804-1904, 41. See, further, My 2, 1839.

The legislature incorporates the "Rutgers Female Institute in

The legislature passes an act "to lay out a new street in the
twelfth and sixteenth wards." This defines the line of Broadway
northward from 21st St., including its intersections with Sixth and
Seventh Aves. That part of the Bloomingdale Road which lies
north of its intersection with Seventh Ave., the act states, shall
remain open as a public road until closed by city ordinance.—Laws
of N. Y. (1838), chap. 232. See also My 5 and D 11, 1837.

The "Association for the Benefit of Colored Orphans," organ-
ized in 1836, is incorporated.—Laws of N. Y. (1838), chap. 232.

Cf. My 8, 1845. So great was the prejudice against that portion of
the destitute whom this society proposed to relieve that suitable
premises could not be procured. After a time, two lots, with a
house, on 12th St., between Fifth and Sixth Aves., were bought.
So great was the manager's representations that the receipt of $1,700
was given as a "hurting fund."—Belden, N. Y. Past, Present, & Future
(1849), 95; Phelps, N. Y. City Guide (1854), 23. For its establishment
on upper Fifth Ave., see 1842.

The University of the City of New York becomes one of the
beneficiaries under an act of the legislature, passed this day, "to
appropriate the income of the U. S. deposit fund to the purposes of

The "Siris," the first steamboat supplied by Atlantic under the power of
steam alone, arrives at New York from Cork, having made the
voyage in 18 days. Her arrival is "an event of so great an interest
that the corporation of the city appointed a joint committee to
receive and visit her on her arrival." She is anchored off the Bat-
tery.—Hone's Diary, I: 205; Pasko's Old N. T., II: 234. The

alderman of the Sixth Ward, the route was changed through Broome
and Centre Sts., Mr. Erben's purpose being to cause the cars to pass through the organ-factory on Centre, near Walker St.—From notes by
W. S. Carman, supplemented by a dozen large steamboats with
crowded decks and ornamented by flags, among which the loving
embraces of St. George's Cross and the Stars and Stripes were
conspicuous in every instance. I went with a party on board the
'Providenc'-

"Having reached the bay below Staten Island, the 'Great
Western,' stopped, and the 'Providenee' went along side and took off
a large party of gentlemen who went down in her, among whom were
Governor Marcy, Mr. Seward, and many other distin-
guished persons. We then left her with shouts and good wishes
for her safe and speedy return. . . . She pursued her course in
fine style, and we returned to the city and got home to a late
luncheon. There was a great crowd on board the 'Providenee,' in
which all the ladies and the excitement was quite a pleasant
one. An interesting incident occurred whilst we lay along side
of the 'Great Western,' in the bay. The ship 'Colon,' from Havana,
came in with a number of passengers, with all sail set. Sailing
beautifully on the wind, she passed through the fleet of gay steam-
boats, cheered the 'Great Western,' went close under our bows,
almost touching the bowsprit, and passed triumphantly along
her way to the renowned city of Gotham; it was a fine aspect
of sails and rigging against steam and paddles."—Hone's Diary,
I: 311-12, *Ev't Post, My 7 and 8, 1838.* The "Great Western" made
70 trips across the Atlantic during her connection with the
New York-Bristol and New York-Liverpool lines—Bullock,
"First Steamships to Cross the Atlantic," in *Conn. Mag.* (1897),
II: 370.

The total cost of widening Art St. from the Bowery to Broad-
way amounts to $88,794.75.—*Mon. Com. Coun.* (1857), 257.

"The Suspension Law of this State expired yesterday [May
16], and all the banks are now bound to pay specie for their bills."
—Ev't Post, My 17, 1838.

"The existing prosperous condition of our city in pecuniary
affairs affords convincing evidence of the justness of our position.
The resumption of specie payments [see My 16] has realized every
reasonable expectation of the friends of that policy. We need not
extend our observations beyond the city of New York, in search of
the benefits arising from an honest policy on the part of banking
institutions. We see commerce reviving—mechanics actively
employed—buildings erecting—and in fact the most enterprising
enterprise. Witness the crowded thoroughfares of this city—the
wharf filled with merchandise from every quarter of the globe—ships loading and unloading—the restoration of confidence in capitalists—the investments in various
stocks."—Ev't Post, My 22, 1838.

"Progress of the Croton Aqueduct.—It is gratifying to
see the zeal, industry and perseverance with which this great work
is prosecuted by the several contractors and the men in their
employment, and, without any unforeseen or untoward hindrance,
there is a good degree of certainty that it will be completed within
the time specified within the respective contracts. The whole
through this county, we believe, is now under contract, and
may be reasonably expected to be completed before the expiration of
the year 1840."

Near the village of Westchester the work is progressing remark-
ably well. On Mr. Gregory's section, north of the village, a
few hundred feet of the Aqueduct were completed last season, and
attracted much attention. Mr. Clark's section, south of it, is
rapidly preparing for receiving the masonry trunks of masonry for
the later course. Messrs. Scott & Young's tunnel through the
hill has been completed by the excavated, and the great frame work
on which the stupendous arch over the Kill in this village is to be
constructed, is in a good state of forwardness. A large quantity
of cut stone, from the quarry of Mr. Jesse Ryder, in this town,
is also on the ground ready for the masons. The section of Messrs.
Carmichael & Delano is also advancing with surprising rapidity;
within a few weeks past about four hundred feet of the work has
been completed except the embankments, and presents a specimen
of what the appearance of the Aqueduct will be when finished.

Mr. Appleton's sections are also in fine progress, as also the
sections of Mr. Brayton, Mr. Riddle, and others further south.
More than 600 men, we think, are at work in and about this village
at the present time."—Ev't Post, My 24, 1838, citing Westchester
Herald.

The new American Hotel at the corner of Barclay street and
Broadway, opposite to the Astor House, has been taken by Mr.
Cozens, and very favorably known to visitors at West Point.
. . . It will be opened for the reception of guests on Tuesday
next [June 12]. The building has been lately rebuilt, and so en-
larged as to make it one of the most spacious and commodious
hotels in the city."—Ev't Post, Je 8, 1838.

Home describes the famous Stuyvesant pear-tree:—

"This pear tree was the subject of conversation at Mr. Stuyvesant's table
to-day. There is no doubt of the fact, I believe, which I now
record, that it was brought out from Holland by Governor Stuy-
vesant, and planted with his own hands on the spot where it now
stands. Governor Stuyvesant came to New York in . . . May,
1647; the pear-tree is, therefore, one hundred and ninety-one
years old."—*Hone's Diary,* I: 317.

The Prince de Joinville, on his arrival from France, was
received by the mayor at the city hall. A party of French gentlemen

"Three Cameleopards, the first ever brought into this country,
are now exhibiting at the upper part of Broadway. They are
imported from Southern Africa where multitudes of them are
captured with the noose and used for food. It is said that the Came-
leopard or Giraffe on being brought into northern climates is subject
to a kind of consumption, and dies in a short time."—Ev't Post,
Je 26, 1838.

of the ceremonies was published in the *N. Y. Com. Adv.,* Jl 25
and Ag 8 (with illustrations), 1838.

The board of assistants resolves: "That it is inexpedient to
July adopt the plan proposed by the Water Commissioners, for crossing
the Harlem river by means of a low bridge or syphon, and that
the plan of the high bridge referred to in the Report of the Com-
misioners [see Je 13], should be adopted."—King, *Memor. of the
Croton Aqueduct,* 156. Among citizens also, there was much oppo-
sition to the low bridge.—Ev't Post, Ag 9, 15, 16, 25, 26, 1838.
The opposition to the low bridge was so persistent that it finally
prevailed. See, further, S 7.

It is resolved by the board of assistant aldermen "That the
Street Committee be directed to give notice to Mr. Butler, that
he cause the materials of the Old Bridewell to be removed on or
before the 15th of September, or that the whole expense be
removed by the Common Council at his expense, and that in case
of the neglect or refusal of Mr. Butler so to remove the same,
the Street Com'ry hereby directed to remove the same; the said
Butler being hereby regarded as liable for the expenses."—*Jour.
and Doc. of the Board of Amt.,* XII: 83. Concurrence in such
action was recommended in the meeting of the board of aldermen,

"Mr. John Jacob Astor, with an enlightened and liberal spirit,
which does him immortal honor, has made to the corporation of
the city of New York, a donation amounting to $550,000, for the
establishment of a Public Library, including a lot of land, most
elegantly situated, for the erection of a building, for the accommoda-
tion of the institution."—Ev't Post, Jl 28, 1838. See Ag 25,
1839.

In this summer, the building called the 'Halls of Justice,'
Aug. or "Tombs," was completed.—*N. Y. As. Jt Bldg.,* 1839, p 27. For
description, see 1837; see also N 24, 1834; 1836; *Proc., App'd
by Mayor,* VI: 11, 19, 36, 50; L. M. R. K., III: 973. The exact
position of the Tombs in relation to the borders of the Collect
Point, where formerly covered its site, is shown in Pl. 59-b, Vol. I,
which reproduces a lithographic map of the region, issued in 1846.
*Cf. Ag 25.

A survey by Francis Nicholson, city surveyor, bearing this date,
shows the public squares, parks and places. It was published as a

A survey of the Common Lands by John J. Serrell bears this—
THE ICONOGRAPHY OF MANHATTAN ISLAND

1838 date. See map No. 81 in real estate bu. of comptroller’s office. Cf.
1 map No. 147 in same office. See, further, 1832.

The new bell is “put in its place on the top of the City Hall, and will in future give the alarms for fire as heretofore. This bell, which was cast by Messrs. Ames, of Springfield, Mass., is of a very
fine tone, and we think can be heard at a greater distance than any
bell which has as yet been tried. It is struck upon a new plan, the
invention of Messrs. Ames, and the clapper instead of striking in
one spot constantly, is carried around the rim of the bell by ma-

chinery at once simple and ingenious.”—Eve Post, Ag 2, 1838,
citing Courier.

Fire breaks out in a soap factory, in the rear of 162 Hammond
St., and large portions of the block bounded by Hammond, Wash-

ington, Perry, and West Sts., are burned, about 60 buildings in all.
—Eve Post, Ag 1, 1838; Costello, Our Firemen, 250.

The bridewell is at last being demolished. The editor of the
Mirror calls the building “the New York Bastile.”—N. Y. M,

irror, Ag 25, 1835 and descrip. of Pl. 97, III: 588. Valentine states that
it “became quite a stone quarry for the builder then engaged in
erecting the ‘Tombs,’ in Centre Street” (see Ag, supra).—Man.

Com. Coun. (1853), 491. The corner-stone was found on Sept. 3
(p. v).

On the destruction of the bridewell, the fire-alarm bell which
had hung in a bell-tower was placed in the “office of Naitad Hon.

Co., in Beaver street.” It had been in the belfry of the old provost
jail during the Revolution, and when that building was converted
into a hall of records (see Jl 12, 1870) it was placed on the brid-

ewell. It was lost in the extensive fire of July 19, 1845, which
destroyed the hose company’s house.—Ibid. (1855), 492.

Richard Rush, who had been sent to England in 1836 as agent
of the U. S. for the purpose, brings from London a legacy left by
James Smithson of England to the United States. Amounting to
over $70,000, it was in the court of chancery there, having been
left by Smithson for the advancement of knowledge in this coun-
try. It was used for establishing, in 1846, the Smithsonian Institu-
tion at Washington.—Eve Post, Ag 29, 1838; Annals of N. Am.,
585, 596.

The corner-stone of the Rutgers Female Institute, at 262–266
Madison St. (see Ap 10), is laid, on ground given by Wm. B. Crosby
who named the Institute after Col. Henry Rutgers, the former
Coun. (1870). The money required for the erection and furnishing
of the buildings was raised by subscription.—Belden, N. T. Post,
Present & Future (1845). For its removal to Fifth Ave, see Je 18,
1867, 150.

The city inspector reports to the common council “that the
corner stone of the Old Bridewell in the Park was found this day,
at the southwest angle. It is a red sand or free stone, about twenty
six inches by fourteen; on it is engraved, ‘Whitehead Hicks, Esq.
Mayor, 1775. He has caused it to be deposited in his office.’”—
Proc., Bd. of Aids, XV: 234–35. This stone was later placed in the
corner of N. Y. R.L.

“There are full four thousand men employed on the line of the
Croton Aqueduct, which is to supply the city of New York with
pure and wholesome water. About six of the sections will be com-
pleted this fall. The Commissioners will now proceed to contract
for the ‘Low Bridge’ across the Harlem river, according to the
original plan [see Ja 3]. The whole, when finished will be the most
magnificent works in the United States.”—Eve Post, S 7, 1838.

The opposition to the low bridge over the Harlem River was
great, and the landowners in that vicinity threatened to apply to the
U. S. Circuit Court to restrain any such construction in or over
that river, as “should impede or obstruct the navigation thereof,
and particularly from filling up the channel of the said river.”—
King, Memoir of the Croton Aqueduct, 160; descrip. of Pl. 157,9,
III: 706. The commissioners, however, resolved to adhere to their
original plan, and entered into a contract for a low or syphon bridge.
For this and the opposition, see O 1.

The corner-stone of the new Society Library building, at the
south-east corner of Broadway and Leonard St., is laid.—Keep,
The story of the building being erected (two lots, presented in 1836 and
1838 respectively) was confirmed to the society by act of the
legislature on Feb. 14, 1845.—Laws of N. T. (1843), chap. 16.

The water commissioners open the bids from the various iron
masters in England and the United States for supplying the iron
pipes for the Croton water supply. There were three offers from
England and seven from the United States. The West Point
Founry Association was the lowest bidder, and the contract was
awarded to them. “The Commissioners also let out upon advan-
tageous terms the difficult and important sections from 86 to 97,
part of the fourth division. These included the bridge to support
the syphons across the Harlem River, the work to support the
pipes across Manhattan valley, the bridge over Clendingen valley,
the receiving reservoir at Eighty-sixth-street, and the distributing
reservoir at Murray Hill.”

“This completed the contracts, from the dam at the Croton to
the distributing reservoir, a distance of about 41 miles.”—King,
Memoir of the Croton Aqueduct, 160.

Landowners and others, however, protested to the legislature
against the construction of a low or syphon bridge over the Harlem,
and, on May 3, 1839 (p. v.), an act was passed definitely prescribing
that the river be crossed by a high bridge.—Ibid., 161.

“In Broadway, in front of Dr. Brandreth’s Office, an exper-
iment is making in laying down the foot-walk on the west side of
the street, with a composition formed of asphaltum and pounded stone.
The asphaltum is said to be from Switzerland, and is a natural
production of the earth. The pavement, so far as it is made, has
a neat, dry surface.”—Ibid., 162.

A ferry is established, and is to be leased, from the foot
of Houston St., East River, to the foot of Grand St., Williamsburg.—
Proc., App’d by Mayer, VI: 64.

Ten gentlemen, dining at the home of John Ward, Bond St.,
organize (with two others) a club, “to dine at each other’s houses
every Monday, at five o’clock.” Philip Hone records: “The mem-
bers did me the honour to name the club ‘The Hone Club,’ and
I was appointed the President.”—Hone’s Diary, I: 325, 333. Its
declaration of principles is found in an ode, written by Hone and
set to music.—Ibid., I: 245–46.

Hone records the text of a circular letter issued by a committee
of abolitionists. In commenting upon it he says: “This new enemy
to the peace of mankind [abolition], which I fear is destined to
overawe our institutions and our country, has placed its
head proudly in this State. . . .”—Hone’s Diary, I: 226–28.

The finance committee reports in favour of leasing the Red Ford
at the foot of Hubert St., to R. E. Stockton.—Proc., Bd. of Aids,
XV: 348. See also Dec. 18, Bd. of Aids.

At the state election this and the two days following, the
Whig candidates were successful. Wm. H. Seward was elected
governor.—N. Y. Com. Adv., N 9, 1838. The editor of the Post
charged that great frauds were practised at this election. “Besides
letting out the inmates of the city prison on condition of their vot-
ing the whig ticket, arrangements were made for procuring a large
number of whig voters from Philadelphia.”—N. Y. Eve. Post,
N 8, 1838. See also Testimony relating to the great election frauds of
the Whig in the Records, taken in the Records, New York, in October,
1840, in N. Y. P. L.; and D. 20 Hone gives the account of a prelimi-
nary Whig meeting in Wall St.—Hone’s Diary, I: 329.

President Van Buren issues another proclamation warning
Americans against interfering in Canadian affairs.—Eve Post,
N 23, 1838.

“The house at the corner of Wall and Hanover streets has been
sold to the North American Trust and Banking Company, by
Thomas E. Davis, for the enormous sum of $45,000; higher than
anything which has yet been heard of. This building is somewhat
notorious from its having been erected upon the site of one built
by J. L. and S. Joseph, which, about the time it was completed,
fell to the ground one night with a crash which shook Wall street;
and its fall was the precursor of a much more tremendous crash in
that celebrated street, commencing with the failure of the firm that
erected it, and ending with the suspension of specie payments, and
the bankruptcy of one half of the merchants and traders of New
York.”—Hone’s Diary, I: 336.

The common council resolves “That it be referred to the Dec.
Committee on Public Offices and Repairs to inquire into and
report the propriety of appropriating a suitable portion of the
profits of the Post Office, as now in progress of being built
[see My, 1838; Ja 17, 1839] for the use of the several uniform
military companies of the city.” The committee reported favour-
ably, saying: “. . . There are four rooms connected together,
by openings of twelve feet, which can be closed at pleasure, and
In 1839, in this year, the "Liberty Party" was formed by certain abolitionists who believed in political action.—Winsoir, VII. 288.

In this year, at N. Y. University, Dr. John W. Draper perfected Daguerre's system of photography and became the pioneer in the art of photographing from the life. Professors Draper and Morse installed the first photographic gallery, on the roof of the university.—N. Y. Univ. Bulletin, Je 10, 1911. See 1846.

In Stotes Records, Vol. I, Pt. 2, p. 151, my father relates how his uncle, Anson G. Phelps, in 1841, on his return from abroad, where he had met Eugenius said to his father, "Father, I saw a strange thing in Paris. There is a man there who polishes a plate of metal so that when you look at it your likeness remains on it."

Mr. Phelps, Sr., replied: "My son, if you are weak enough to believe such a thing, you ought to have sense enough not to tell it." (Instead of 1841, however, it must have been a couple of years earlier. I think, as daguerreotypes were well known in New York before the end of 1839.) See N 21, 1839.

In this year, anti-riot troubles in New York began. They lasted several years.—Winsoir, VII. 283. See also Mr 11, 1841.

In this year, a volume of the city's Laws and Ordinances was published.

"The city of New York . . . at present covers about three miles, and has a population of three hundred thousand inhabitants. Building lots were marked out for the other seven miles; and, by calculation, these lots, when built upon, would contain an additional population of one million and three-quarters. These were first purchased to occupy separate apartments, without incomming each other. . . ." It is therefore resolved:

"That the room fronting on Grand Street, in the second story of Centre Market, and the room next adjoining, be given to the officers commanding the Division of Artillery of this city (Maj.-Gen. Sandford), for the purpose of drilling and exercising the men under his command, under the following regulations: viz., no arms, ammunition, or accoutrements shall at any time be kept in these rooms; meetings for any other purposes than those mentioned above shall not be allowed.

"Resolved, That the use of the two remaining rooms, extending up to the keeper's apartments, be given to the officers commanding the several Divisions of Infantry in this city (Maj.-Gen. Daughtry, Maj.-Gen. Syrney, Maj.-Gen. Jones, Maj.-Gen. Lloyd), for the accommodation of their several Divisions, for the purpose and under the restrictions mentioned in the preceding resolution."

A glimpse at New York's military history, at this time, is found in the following statement by De Voe, himself an active participant:

"The 'rooms' were divided up among the several Regiments composing the eight Brigades, to be used as drill-rooms, meetings, &c. The necessary arrangements were made by a Committee consisting of one Colonel from each Brigade, organized as follows:

Colonel George H. Biddle, 9th Brigade.

Thomas F. De Voe, 6th.

Charles H. Mitchell, 11th.

H. M. Schieffelin, 58th.

John Ewen, 10th.

S. Jones Mumford, 65th.

Nicholas Carroll, 3d.

Robert C. Morris, 64th.

"For several years the commandants of regiments ordered their officers and non-commissioned officers to drill on certain evenings . . ."—De Voe, Market Book, 475-76, 478. See also L. M. R. K., III: 98.

In 1862, the Centre Market accommodated the Sixth, Eighth, and Seventy-first Regiments.—De Voe, 478.

The New York (Union) Theological Seminary building in University Place, between 6th and 8th Sts. is to be dedicated this evening—Even. Post, D 12, 1838. See also L. M. R. K., III: 941.

A marble tablet, about 3 ft. square, is inscribed with the words:

"Erected by the Whigs & Conservatives to commemorate their glorious triumph in 1835 Wth H. Seward Gov't elect 1041 Majority New York Dec 20, 1838. See N 6. It is now preserved in the N. Y. Hist. Soc., to which society it was presented on June 4, 1897, by J. Charles Eagles. This society has no record as to where the tablet was 'erected.'"
1839. The view bears the copyright date 1840.—See descrip. of ibid.,
III: 685.

Jan. A branch post-office is opened at the north-west corner of
Coun. (1837), 537.

10. "The taste for improvement in our city churches appears to be
increasing, if we are to judge from the fact that the different con-
gregations are rapidly introducing organs into their churches. The
South Dutch Church at the corner of Murray and Church streets,
has recently procured a very fine instrument, with two sets of keys,
and pedals, finished in the most beautiful manner, and in perfect
keeping with the building.

"Grace Church in Broadway . . . has likewise had a new
organ erected, which contains upwards of 1500 pipes, and has
three sets of keys, pedals, coupling movements, combination pedals,
and all the modern improvements in organ building. These instru-
ments are from the manufacturer of Mr. Henry Erben of this city."
—Eve. Post, Ja 10, 1839.

12. "New publick buildings.—The workmen continue busily
engaged upon the new Exchange, . . . A short distance above, in
West St., the new Custom-house. Its towers higher and higher, every
day, its white marble front. . . . The foundation has been laid for
the erection of the new building for our Athenaeum library in
Broadway, opposite the Athenaeum Hotel. This structure is to
be of brown freestone, a very appropriate and beautiful material,
obtained from the quarries of our own state.—N. T. Mirror, XVI: 231.

17. The new Centre Market (see May, 1838) is opened with a sup-
er and a "butchers’ hall," arranged by Mr. and Mrs. Niblo. One
report of the event says: "It should be known that this market,
after the design of Mr. [Thomas] Thomas, the architect, is the first in
this country which may be deemed a complete building. Faneuil
Hall, Boston, is something like it, but the London markets of the
first class come nearer to it. . . ."—De Voe, Market Book, 472-
74, citing the Eve. Star, Ja 8 and 18, 1839; Eve. Post, Ja 9, 12, 17,
18, 1839, III: 99.

21. "It is said that one of the front rooms in the new building now
erection for the Bank of the United States, has been leased for
$4,000 per annum.—This is a great price, and the demand for offices
in Wall street is doubtless owing to the concentration of all kinds
of monetized business in that quarter, which renders a location there
more than commonly desirable."—Eve. Post, Ja 21, 1839.
The rooms are rented for rooms in the merchants’ exchange, in “John
Warner’s building” (opposite Hanover St.), and in other buildings
in Wall St., are listed in a news item in ibid., Ja 26, 1839.

Feb. In this month, a patent for vulcanized India rubber was granted
to Charles Goodyear of New-York.—Bishop, Hist. of Am.
Manufactures, II: 418.

The legislature incorporates "The American Atlantic Steam
Navigation Co." The incorporators include James De Peyster Ogden,
Archibald Gracie, James Boorman, Moses Taylor, and other
leading merchants and financiers of New York. The corporation is
for the purpose of carrying on the business of navigation and trans-
portation on the ocean to foreign parts by steam, and of building
and owning vessels for that employment."—Laws of N. Y. (1839),
chap. 35.

"The Association to promote the Fine Arts in the United States,
held a meeting this evening at the Apollo. The gallery of Paint-
ings, which is now open, contains the works of more than a hun-
dred of the best Artists of our country. . . . the object of the
Association is to raise a fund by small annual subscriptions, for the
purchase of American pictures, which at the end of the year are to
become, by lot, a property of individual subscribers. It is said
that nearly $2000 is already subscribed."—Eve. Post, Fb 23, 1839.

Mar. The legislature incorporates "The New-York Museum of Nat-
ural History and Science," for the purpose of diffusing knowledge in
the various branches of natural history, the arts, and in general
science.—Laws of N. Y. (1839), chap. 47. See Fb 8, 1842.

Prof. S. F. B. Morse describes, in a letter to the editor of the
N. Y. Observer, what he has recently, and the latter’s invention or discovery of the so-called Daguerreotype.
This is re-printed in the N. Y. Com. Adv., Ap 22, 1839, citing the
Observer of Ap 20. Regarding this new invention, see also Eve.
Post, Mr 15, Ap 22 and 25, 1839.

... Around Union-Place new blocks of houses, capacious and
and stately, are springing up with surprising celerity. At the corner
of Broadway and Eighty-sixth street, a beautiful square, extending
to the Bowery, and occupying some acres of ground, is soon to be
enclosed. On the East River, the wharves, from Coffee-House Slip to
Corlase’s Hook are to be enlarged and improved in a manner
that will much enhance the value of property in that direction.
It is proposed to extend Broadway some miles beyond Union-
Place. . . . Fourteenth-street will doubtless be considered the
heart rather than the extremity of the town in the course of a few
years. . . . N. T. Mirror, XVI: 395.

The legislature incorporates a "State Hospital, of the city of
New York," to be located in this city. Among the governors
named in the act, from the large number of incorporators, are
William Bard, Moses H. Grinnell, Robert B. Minturn, Moses Allen,
Thomas A. Emmet, Henry Brevoort, Jr., Samuel B. Ruggles, Joseph
Dallafio, Francis B. Cutting, and S. H. Howland.—Laws of N. Y.
(1839), chap. 7; ibid. (1840), chap. 82.

On April 25, 1840, the legislature provided for the payment to
this hospital of a sum not exceeding $15,000 a year out of "hos-
pital money collected from passengers in vessels from a foreign part,
and on board coating vessels," during a period of twenty years.
The governors of the hospital, with this grant from the state,
shall improve the grounds, and, to the best of their ability, support the
medical and other necessary attendance, for at least seventy
indigent patients from any part of this state.

It was also provided in the same act that the governors of this hospital shall “within two years, erect a building for their hospital,
of the clear, unincumbered value of $50,000, exclusive of the
ground on which it may be built.” On failure to meet these
conditions, “the whole sum,” from the passengers’ fund shall be dis-
continued.” The hospital itself, and its expenditures, shall be examined
by the surrogate of the city and county of New York, who shall report annually thereon to the governor of the state.—
Ibid. (1840), chap. 161.

On May 26, 1841, the time was extended three years from that
date, in which to erect the hospital.—Ibid. (1841), chap. 279. On
May 10, 1845, all previous conditions of the hospital were re-
pealed, and the legislature appropriated the funds in the hands of
the treasurer of the hospital to the benefit of the Colored
Home (see My 8, 1845).

The city acquires by condemnation proceedings the land con-
sumed in Manhattan Square or Park, bounded by Central Park
West, 77th St. and 81st St. (see My 4, 1846).—Trendsetter, Record of
Real Estate Sales (hence), 1; L. M. R. K., III: 970.

The theological seminary, which recently completed its building
27 on University Place (see Ja 18, 1836; Mr 1837), is incorporated
under the title of the “Union Theological Seminary in the City of
New York.” Among the incorporators are Abijah Fisher, Richard
Haines, Anson G. Phelps, etc.—Laws of N. Y. (1839), chap. 99.
Postscript: the further development of the property of the
Am. Cat. of the Union Theological Sem. (1911-1912). See,
further, 1884 and 1900.

The last entry in the “Keeper’s Book” of the Am. Acad. of the
Arts Fine Arts bears this date. It reads: “At this time efforts were
being made for a spring exhibition, when a fire occurred in the library
of the academy [in Barclay St.] which consumed many of the books
and prints, especially the case of Piranesi, damaging the paintings,
&c. . . . no measures were taken to revive the energies of the
Academy. Artists still continued to study in the Sculpture
gallery, . . . the property . . . [was] returned to the Donors. The
remaining effects, together with the portrait of West was sold to pay
debts ($2,400.00). The portrait went to the Wadsworth Atheneum,
Hartford, Ct.”—From the original MS. vol. owned by the N. Y.
Hist. Soc. The Piranesi prints had been presented by Napoleon
Bonaparte.—Howe, Hist. of the Metropolitan Museum of Art (1913),

In this month, it was found necessary to move the curb-stone
on the east side of M. Dugueure, St. six feet into the sidewalk, on account
of the tracks of the Harlem R. R. which were recently laid along this
street. In spite of this large reduction in the width of the wall,
there still remained twelve feet for the sidewalk along Centre
Market.—De Voe, Market Book, 476-77, citing the proceedings of
and "the beautiful new Bank of the United States opposite, still obstructs the walks" there are four banks in process of destruction,—the City, Manhattan, Merchants', and Union. On the corner of Broadway and Chambers St. (probably the north-west corner), "a row of old buildings has been removed to make way for one of those mighty edifices called hotels,—eating, drinking, and lodging above and gay shops below; and so all the way up the spirit of pulling down and building up is abroad. The whole of New York is rebuilt about once in ten years."—Hone's Diary, I, 506.

The legislature passes an act appropriating $4,000 (increased to over $15,000 by later acts) to defray the expenses of an agent, to be appointed by the governor, to visit England, Holland, and France, "for the purpose of procuring, if possible, the originals, and, if not, copies, of all such documents and papers, in the archives and offices of those governments relating to or in any way affecting the Colonial or other history of this State, as he may deem important to illustrate that history." Such documents, when procured, are to be "deposited in the office of the Secretary of this State, subject to the use of the State Historical Society."—Laws of N. Y. (1839), chap. 315. Not until two years later, on Jan. 15, 1841, was the agent appointed. This was John Romney Brodhead. He received Gov. Seward's instruction (see "General Introduction" to N. Y. Col. Doc. XV, I: 3xxii-3xxxi) on March 26, 1841, and departed for Europe on May 1, 1841. He presented his final report to Gov. Wright on Feb. 15, 1845. This was printed in full in ibid., I: xxiii-xxxvi, together with the report of a committee of the senate (May 5, 1845) to whom it was referred (ibid., I: xxxvi-xxli). The documents were not printed until 1853 and later, in accordance with acts of the legislature of March 10, 1843, and April 5, 1844. See also May, 1847.

The Church of the Messiah (Unitarian), on Broadway, opposite Waverly Place, is completed, and dedicated.—Eve. Post, Ap 30 and My 2, 1839. For description of it, see Picture of N. T. in 1846, 134. For wood-cut view of it, see The Citizen and Strangers' Pictorial and Business Directory (1853), 124. It was built by the congregation which had worshipped in the church at the corner of Prince and Mercer Sts., which burned Nov. 26, 1837 (p. u.).—Hone's Diary, I: 360-361; Haswell, Reminiscences, 208; Greenleaf, Hist. of the Churches, 376. The church was sold in 1865, and converted by A. T. Stewart into a theatre.—Haswell, 208, 212. See also Man. Com. Coun. (1865), 653; L. M. R. K., III: 957.

The legislature incorporates the "Ocean Steam-Packet Co."—Laws of N. Y. (1839), chap. 348. The rebuilt Bowery Theatre (see F 18, 1838) is opened._—Haswell's Reminiscences, 341; Brown, I: 115; L. M. R. K., III: 952. See also Eve. Post, Ja 10, 1839.

The legislature passes an act to provide for the translation of Liber "GG" of patents, in the secretary of state's office.—Laws of N. Y. (1839), chap. 366. The translator chosen was Rev. C. D. Westbrooke (see also Ag 2, 1837). He was paid $787.90 for the work. A translation of Liber H.H. (1652-1664), made by Jas. Van Ingen, had been deposited in the secretary's office in two parts in 1822 and 1826 respectively.—Van Laer, The Translation and
1839 Publication of the Manuscript Dutch Records of New Netherland
My. 7 (1910), 7, 10, 14, 15.

The affairs of the "University of the City of New York" are the subject of Senate investigation.—Laws of N. Y. (1839), chap. 390 (p. 568).

The common council passes an ordinance for the appointment of a superintendent of building. His duty shall be "personally to examine and oversee all public building or works under his charge, during the progress of erecting, altering, or repairing the same." The ordinance was amended on May 14, the official being then named the superintendent of buildings. He is to advance, for estimates, but "shall not perform any work or job, the cost of which shall exceed the sum of fifteen dollars, without a written order from the committee on public offices and repairs."—By-Laws and Ordinances: of the City of N. Y. (1839), 59, 52.

The common council passes an ordinance creating the street commissioner's department. This commissioner must be one of the city surveyors. He shall have charge of street and road improvements, such as regulating and paving. Wells, pumps, canals, sewers, wharves, and piers are all in his province. He shall also attend to surveying lots about to be built upon, and prevent encroachments on the streets. He shall cause the sewers to be cleaned, for which purpose he shall have the assistance of the prisoners of the almshouse.—By-Laws and Ordinances: of the City of N. Y. (1839), 35.

The Collegiate Dutch Church on Lafayette Pl., at the corner of 4th St., near Broadway, is dedicated. Of the three Dutch churches, the "North Dutch Church" was the farthest south at this time. The one farthest north was the " Ninth Street Church" and this one on 4th St., after 1854, inherited the name of the "Middle Dutch Church." It was of Grecian architecture. For fuller description, see Picture of N. Y. in 1846, 131.

In 1855, there was placed in it the bell of 1731 (see Ag 8, 1782), which had hung in the Middle Dutch Church in Nassau St. It now hangs in the tower of the Reformed Church at the corner of Fifth Ave. and 49th St.—Greenleaf, Hist. of the Churches of N. Y., 17, Mag. of Am. Hist., XVI: 3-4; Corwin's Manual (1862), 997.

Mill Wall street between the Custom House and the Exchange, two immense and most costly structures which are in progress—the banking houses heretofore occupied by the Union, the Manhattan the Merchants', and the City Bank, together with the intermediate house between the National and Manhattan Banks, are already nearly levelled with the ground since the 1st of May.

The above copy from the American of last evening. It may be added that on the North-east corner of Broadway and Maiden Lane, the old buildings are down, and an elegant establishment is to be immediately put up by James McBride, Esq., five stories high, with an attic—to be occupied as stores below, and above by Mr. Howard, the well known hotel-keeper, now of Broad street. [For view of the "Howard Hotel," see A. Pl. 25-a, Vol. III.] A little farther up Broadway, near Park Place, that once elegant private establishment, built by the late Mr. Munford, and since for many years occupied by Philip Hone, Esq. [see Pl. 100, Vol. III, where the house is shown by Hone's name in the lower margin] is to come down—how to be replaced we have not learned. Still farther up, on the corner of Chambers street and Broadway, a number of small buildings have been pulled down, and a large and elegant granite building is to be erected, one hundred feet on Broadway, and the same on Chambers street. . . The lower part is to be fitted up for stores, and the upper to be large rooms for public purposes, somewhat after the manner of the Stuyvesant Institute.—N. Y. Com. Adv., My 10, 1839.

"New buildings.—Nihlo's Opera House is completed, and will be opened in the course of a few days. The new Bowery theatre [see My 6] is quite a stately edifice, and reflects credit alike upon . . . the architects, and . . . Hamblin, under whose sole management it is conducted. The foundation of the new Chatham Theatre is laid, and the building, it is said, will be ready for the reception of the public by the fourth of July. . . ."—For building-houses, beyond the East River, near Barclay St., next to the Broadway corner] and Canal-street, have been converted into spacious stores since the first instant. The number of contracts for new houses exceeds that of any former year . . . It is not the fashion here to live in the house of one's forefathers. May Every succeeding generation improve upon the primitive habits of the past, and we are becoming so over-run with strangers from every quarter of the globe, that we begin to apprehend that the time is not distant when there will be a stranger in New-York . . ."—N. Y. Mirror, XVI: 167.

Isaac L. Varian is inaugurated as mayor, having been elected in April (q.v., 9). He succeeds Aaron Clark (see Ap 11 and My 9, 1837).—Even Post, My 15, 1839; Home's Diary, I, 361. Varian's successor was Robt. H. Morris.—See Ap 15, 1841.

The ship "Archimedes," in the English Channel, introduces there the screw propeller. "Paddle boxes for the ocean are now superseded."—Even Post, Je 6, 1839, citing the Jour. of Com. containing a London letter of My 17.

Geo. Nowlan leaves his Prospect Hall, at Yorkville (see Jl 30, 1834), and opens the Pavilion Hotel at the Harlem River terminus of the Harlem R.—N. Y. H. S. Bull., Ja, 1926, 119, citing the Herald.

The centre building, and the wing nearest the Bloomingdale Road, of the old house of refuge (see Ja 1, D 25, 1825; 1838) are totally destroyed by fire.

"In consideration of the removal [see 1838], and the relinquishment of the building, now partially destroyed, the Corporation gave the Board of Managers the building on the East river known as the fever hospital, built in 1824 [see Ap 11]. Another edifice has been erected on the premises [an East River] which we believe is nearly completed."—Com. Adv., My 22; Morn. Cour., My 22, 1839. See also descrip. of Pl. 124, III: 687; Peris Insurance Map, Vol. VI (1854); L. M. R. K., III: 954.

"An experimental steamboat, built to run on the Delaware and Raritan Canal, has just arrived in this port from London, after a passage of forty-five days. The name of the vessel is the Robert L. Stockton, an iron schooner, fitted with Captain Ericson's patent engine. . . . She came out under canvas, without the aid of steam . . . ."—Even Post, My 28, 1839.

John B. Jervis, chief engineer, reports to the water commissioners in favor of crossing the Harlem by means of a high bridge rather than a tunnel under the channel of the river. The commissioners agreed with him and immediately solicited proposals for building the bridge.—King, Memoir of the Croton Aqueduct, 1839. See Ag 12, 1839.

"At the termination of the Harlem railroad, on the edge of Harlem River, a neat, spacious, and very commodious building has been erected which is now taken by Mr. Nowland, late of Prospect Hall, who has furnished it in a most elegant manner." It is called Nowlan's Pavilion.—Even Post, Je 1, 1839.

The Board of Directors of the Harlem Railroad have ordered a line of cars to be run between the City Hall and Fifteenth street, to start from the post office at the park every 10 minutes, from 7 o'clock in the morning until 8 o'clock in the evening; and from Union Square every 10 minutes. . . .

"This line of cars commenced running on Monday last [June 10], . . . the charge for the whole distance from the Park at the City Hall to the Park at Union Place is fixed at 6 cents only."—N. Y. American, Je 15, 1839. See, further, O 7.

Another fire occurs at the old house of refuge buildings (see My 21). This destroys the two-storey brick building occupied as the workshop of the institution, and damages the roof of the adjoining building known as the "old powder-house."—N. Y. Com. Adv., Je 24; N. Y. American, Je 21; Courier & Enquirer, Je 21, 1839. See also descrip. of Pl. 124, III: 687.

Assessments are being levied for filling in Sun Fish Pond, situated between 30th and 33d Sts, the Old and the Middle Post Roads.—Proc., App'd by Mayor, VII: 14; Index to Assessment Rolls: Vol. I (in comptroller's office).

The Protestant Episcopal Church of St. Timothy, on 6th St. near Second Ave., "completed the last summer, and consecrated at that time [see Ap 15, 1838]," is destroyed by fire.—N. Y. Com. Adv., Jl 1; Even Post, Jl 1 and 2, 1839; Greenleaf, 87. In a year or two, the site was
July 9

President Van Buren leaves New York City "for the north." He was attended for some distance on his departure by the Mayor, a portion of the Common Council, the Young Men's Committee on horseback, and a large concourse of other citizens in carriages and on horseback."—Evac. Post, Jl 9, 1839. See also ibid., Jl 10, 1839.

19 . . . We perceive that Trinity Church is now in the hands of the spoilers. . . . The roof is utterly demolished, and only the walls are standing. We have heard it suggested that while the vestry were about it they might as well have taken down the walls too, and set about building a new church altogether."—N. Y. Com. Ady, July 19, 1839. See also description of Pl. 54-1: 414-15.

27 Assessments are being levied for the opening of 110th St. from the Old Harlem Road to the Bloomingdale Road.—Proc., App'd by Mayor, VII: 29.

28 The "British Queen," the first steamboat built for transoceanic service, arrives at New York from Portsmouth. "Her cabin is superbly fitted up, and the state-rooms adjoining it are convenient and pleasant as possible; and in every respect are calculated to be dark and confined."—Howe's Diary, I: 369-70; N. Y. Evac. Post, Jl 29, 1839. The "British Queen" is shown on Pl. 123-4, Vol. III. See also Bullock, "First Steamships to Cross the Atlantic," in Conn. Mag. (1907), II: 49 et seq.

In this month, the high bridge over the Harlem River was contracted for, at 1,775,753; to be completed in Aug., 1841.—King, Memoir of the Croton Aqueduct, 175; Man. Com. Coun. (1854), 221. The building of the bridge proceeded slowly, and while temporary arrangements were made for conducting the Croton water to the New York shore in 1842, by means of pipes along the dam, the bridge itself was not completed until 1848.

Proc., App'd by Mayor, VII: 32.

5 "The joint Committee on the repairs of Trinity Church" (see Jl 19) makes a report to the vestry on "the Condition of the tower and Spire of that building, accompanied with Estimates of the Cost, to be submitted to the vestry at its next Meeting and then passed on."—Trin. Min. (MS.). See also description of Pl. 120, III: 625, and Pl. 122, III: 629. See, further, S. 9.

On Aug. 8, the following news report was published: "Trinity Church. It has been ascertained that this venerable edifice, which has been undergoing repairs for some time past—or rather which the builders were preparing to repair—must be razed to the ground. Last year, it may be recollected, some apprehensions existed as to the safety of the roof, and it was the purpose of the corporation to build a new roof the present season, with which design the workmen have been several weeks employed upon the building. In the course of their labors it has been ascertained that the walls and butt of plumb, and are in some places cracked from the corner to the base. Even after this the tower was supposed to be firm; but an examination has shown that it also is unsound. Indeed the whole structure seems to have been miserably built. The mortar has not its due proportion of sand, and has never formed a cement—crumbling now at the touch. The result is, that the building must come down, and a new edifice be reared in its stead.
1839 The present building was erected, we believe, about the Aug.
year 1789—fifty years ago [see 1788—90] ... .

5 "The church will of course be built on its present site...
Since the prohibition of interments in the church-yard, in 1823, the whole space has been thickly planted with trees, which are in full and vigorous growth, girded with a hedge of privet, planted, we believe, by the late James M. Farlan.

We may be permitted, perhaps, to express a hope that the vestry, in their plans for the restoration of the edifice, will not forget, ... the restoration of that pleasing chime of bells, which in former years constituted one of the most delightful peculiarities of old Trinity.... "—N. T. Com. Adv., Ag 8, 1839. See also Ev. Post, Ag 12, 1839.

17 The corner destined for the new Exchange building in Wall st., taken from the quarries of Quincy, (Mass.) are said to be nearly completed. They are the largest that have been obtained from the quarries, each pillar weighing about thirty three tons, and costing, exclusive of transportation, four thousand dollars each. The columns are fluted with beautifully carved capitals, and altogether resemble the best specimens of marble.—Ev. Post, Ag 17, 1839.

19 Arago reveals to the Académie des Sciences the process for the reproduction of pictures with the aid of a dark room, by means of what was promptly named "daguerreotypie."—N. T. Times, JI 19, 1835.

21 Henry Clay arrives in New York from Newburgh. He was enthusiastically received at the foot of Hammond St., Greenwich, and escorted by a procession to his lodgings. He addressed the people in front of the city hall.—Ev. Post, Ag 20, 21, and 22, 1839. On Aug. 22, he received callers in the governor's room.—Ibid.; Hon'ts Diary, I: 176—77.

22 By a cordial to his will, John Jacob Astor appropriates $400,000 for the endowment of the Astor Library, $25,000 of which is to be expended for the building, and $120,000 for books, etc.; the residue to be invested as a fund for the gradual increase of the library. For a contemporary account of the initial steps in this development, see Gleason's Pictorial, III: 200 (S 25). See also Lydengberg's Hist. of the N. Y. Public Library; and JI 28, 1838.

24 In spite of some remonstrance, on May 23, this year, a report was presented to the common council, and confirmed, whereby the city acquired 22.173 acres of the old "Race Course Farm" at Harlem for a public square, as provided for by the law of May 10, 1836 (q.v.)—Prendergast, Record of Real Estate Owned by the City (1914), 51; Proc., App'd by Mayor, VII: 6. See, further, Mr. 4, 1841. This place had already been named Mount Morris.—See the Colton Map of 1836. From this it became known in the city records as Mount Morris Square. For the possible origin of the name, see the 1836 Ann. Rep., the Am. Scenic & Hist. Pres. Soc. (1915), 200. See also L. M. R. K., III: 971.

9 "The joint Committee [of Trinity vestry] on the repairs of Trinity Church [see Ag 5] herewith submit to the Vestry, in conformity with its directions, plans and drawings of a new Church Edifice, ... An Estimate of the Cost has been made by the Architect [Richard Upjohn], the building, with a Spire of Wood, will cost somewhat less than $85,000, and with a Spire of Stone, an additional Sum not exceeding five thousand dollars.

"The tower & spire of the proposed Edifice exceed by fifty feet in height, those of the old church. The width is the same and the interior length of the body of the church greater by fifteen feet.

"The Architect is of Opinion that the length of the new church could be further increased, to the Extent of one or two Inter- columns, without an Expanse much exceeding the above mentioned Estimate, and thereby, whilst improving the appearance of the building, afford great additional accommodations for Strangers ... The same vestry thereupon passes the following resolutions: "that the Spire of the new Church Edifice, and the Columns to support the Galleries and clear Story, be constructed of Stone;" "that the joint Committee be directed to proceed in the Construction of the new Church Edifice in conformity with the foregoing resolutions and with the plan & drawings now exhibited, and that the Committee be instructed to enquire and report as to the kind of Stone most suitable for the Exterior of the building as to "that the joint Committee be authorized in their discretion, to increase the length of the building according to the suggestion of the Architect,"—

9 The New Chatham Theatre, built for Flynn & Willard on the south-east side of Chatham St. between James and Roosevelt Sts. (present No. 201—205 Chatham St.), is opened.—Haswell's Daily Intelligencer, 1444; Ireland, Records of the N. Y. Stage, II: 311; L. M. R. K., III: 987; see Dec.

17 The old Trinity Church is now removed, "and Wall street has an unobstructed view of the bright blue western sky."—Hon'ts Diary, I: 386.

The front of the new building in Broadway near Leonard street, erected to contain the New York Library will do no honor to the architectural taste of this city. The row of red sandstone columns which stand close to the wall and support nothing, are useless as members of the building, and posterores as ornaments. Columns should never be employed but to support a roof, their original purpose. ...—Ev. Post, S 18, 1839. See also Ibid., S 23, 1839.

22 A writer asks why the "rich corporation of old Trinity" should select red sandstone to rebuild the church instead of "everlasting granite," and "why not erect a cathedral?"—N. T. Com. Adv., S 19, 1839. See, however, N I 11. See, further, S 30.

18 A fire which starts in the National Theatre (formerly the 23 Italian Opera House—see Ag 29, 1839), at the corner of Leonard and Church Sts., completely destroys the theatre, as well as Zion African M. E. Church on the south-west corner, the Eglise St. Esprit at Church and Franklin Sts., the New Dutch Reformed Church in Franklin St. between Chapel and Church Sts., and several other buildings.—Ev. Post, S 24, 1839. Buckingham, The Eastern and Western States of Am. (1843), II: 7—9: Upcott Coll., VI: 435, Costello, Our Firemen, 231. See also L. M. R. K., III: 950, 939, 984. For view of this fire, see item No. 322 of the sales catalogue of the Pyne collection of N. Y. views.

After the burning of the National Theatre, Wallack (see S 4, 1837) took refuge at Niblo's, with a stock company, including several "stars,"—Vandenhoff, Chas. Kean, Forrest, and "the best opera corps in the country," but did not succeed there. His theatre there closed during the week of Nov. 24, 1839—Hon'ts Diary, I: 388.

A new house of worship for the African Methodists was erected on the same site in 1840—Greenleaf, 322. The successor of this congregation is now at 127 W. 86th St.—L. M. R. K., III: 930. See 1822.

24 The centenary of Methodism is celebrated in the John St. Church. It is to be observed in turn in each of the Methodist Episcopal churches in the city.—Ev. Post, S 25, 1839. See also Ibid., O 4, 1839.

"The nuisance of smoking in the streets has much increased 25 lately. The atmosphere of some parts of Broadway, of a fine evening, is almost as narcotic and sickening with tobacco smoke as the air of the traveller's room in a High Dutch tavern. Little boys make a parade of themselves on the side-walks smoking long pipes almost as tall as themselves. ... No doubt many of those persons who indulge in their favorite habit in the public streets, do it thoughtlessly without thinking how offensive it is to others, and would be surprised at hearing that they are guilty of a black-guard practice."—Ev. Post, S 25, 1839.

The joint committee [of Trinity vestry] on the rebuilding of Trinity Church [see Ag 5, S 4] Respectfully report, to the Vestry, that they deem it expedient to increase the width of the aisles on the floor of the ground floor of the new church, beyond those of the old one, the middle aisle of which was six feet and two inches wide, and the side aisles one foot narrower. If, as is generally supposed, these dimensions were too narrow, the defect will be more important in the new building, both as to convenience, and architectural taste and proportions, by reason of the partial projection of the columns into the aisles, and the consequent obstruction to the congregation in retiring from the church, and of the increased length of the interior of the building, and the greater disproportion thereby produced, between the length and breadth of the aisles; To obviate this defect, the Committee recommend that six feet be added to the inside of the building, above the floor.... "It is also deemed expedient that the new Edifice, should be so placed, as to bring the middle of the tower in a line corresponding
In removing the foundation of the tower of Trinity Church a vaulted grave was opened, which contained the coffins and bones of Lady Cornbury, wife of the Governor of the colony, who died in this city in the year 1706, and was buried under the original church, which was burned in the time of the Revolutionary War. A large plate and fragments of the coffin were found, ...; this is perfectly legible and nearly uninjured by its interments. Before the death of the last of her noble line, who was sister to the Earl of Richmond and a Viscountess in her own right, were engraved on the plate, with her pedigree, age, the time of her death, etc., distinctly, but very rudely, written below. She died at the age of thirty-four. ... 

"... I proposed last evening to the vestry that these relics should be presented to the Historical Society, but it was not granted. They determined to have a new tomb provided, in which they are to be interred."—Home's Diary, I: 394-95.

Commenting on the discovery of these relics, Watson says: "A record of burials at this church is preserved from the year 1702 (with the omission of the time of the revolution) making 160,000 bodies, thus making as many bodies below ground as now (in 1840) dwell alive above ground in New York."—Watson's Annals, 259.

"The beautiful representations of external nature produced by the Daguerreotype, are now publicly exhibited at No. 57 Broadway. To the specimens brought over from Paris, some have been added since the arrival of Mr. Gouraud in this country, which will augment the interest of the collection."—Eve. Post, D 13, 1839. Gouraud was a friend and pupil of Daguerre. He came to New York "on his way to Havana, to execute a commission connected with the new art."—Ibid., D 4, 1839. He was agent for Giroux & Co. of Paris.—N. Y. Com. Adv., D 13, 1839. See also N 22, supra; Eve. Post, D 16, 1839; and J 28, 1840.

Hone records the death of Robert Leesc. "He was formerly a merchant and magistrate of this city, and died one of its richest citizens."—Home's Diary, I: 397.

A report of the city inspectors to the common council shows the 31 number of new buildings erected in New York yearly during the last six years to be as follows: In 1834, 857; 1835, 1,293; 1836, 1,828; 1837, 840; 1838, 781; 1839, 674.—N. Y. Com. Adv., My 7, 1840.

1840

In this year, David Livingston, a Scotch missionary and traveller, began his African career and continued it until his death in 1873. He traced the course of the Zambesi River, of the upper Congo, and the region around Lakes Tanganyika and Nyassa and crossed the continent from sea to sea in higher latitudes than any before him. Haze, Europe, 1845, 552, 553.

In this year, the Adams Express Company between Boston and New York, via Springfield, was founded.—Savage, Boston Events, 52; Encyclop. Brit., XI: 84.

Early in this year, Prof. John W. Draper, M.D., LL.D, of the University of the City of New York, made a daguerreotype portrait of his sister, Miss Dorothy Catherine Draper, the first full length portrait of the human face ever made. For a reproduction of an artotype copy of this portrait, the original of which in 1901, was the property of Sir William John Herschel of England, see Chamberlain's N. Y. University (Boston, 1901), I: 140; and the "Drazer Centennial Number" of The Colonnade, J 6, 1911, containing, among other articles, "The Contribution of John W. Draper to Photography," by Arthur B. Lamb, Ph.D. Mr. Lamb states (pp. 9-10): "It happened that Professor of Fine Arts at our University, was in Europe during the summer of 1839, when Daguerre's discovery was announced. More familiarized himself with the process and brought home full details to Professor Draper. Daguerre had not succeeded in taking portraits of persons. ..." The writer explains how Draper reduced the long exposure to strong light, previously necessary, to only 50 seconds, which permitted a sitter to endure the discomfort. See also Draper's own paper "On the process of daguerreotype and its application to taking portraits from the life," in Phil. Mag. (1840), XVI: 515 (June); XVII: 217 (Sept.), cited in Geo. F. Barker's Memoir of John William Draper.

Early in this year, the N. Y. & Harlem R. R. purchased the controlling interest in the N. Y. & Albany R. R. Co., which had been organized eight years before to build a line to Albany, but

CHRONOLOGY: INVENTION AND PROSPERITY: 1815-1841

1839

Sept. 30

with the middle of Wall Street, according to its general course between William Street and Broad Way, so as from that position, and command this view, the North wall of the new building, (if its breadth be increased as proposed) must be removed fourteen feet, and the South Wall eight feet further north than the walls of the present building. A Majority of the Committee and the Architect unite in opinion as to the propriety of this change of position, which is accordingly recommended to the adoption of the Vestry. The conclusion of the contract for the foundation, awaits the decision of the Vestry on these questions, ..."

The vestry resolves “that the breadth of the new Edifice be encreased six feet beyond that of the old one;” “that the new Edifice be placed as far South as may be practicable without disturbing the range of vaults along the wall of the old building;” and “that the owners of walls thereto, which the foundation walls of the new Edifice may pass, and also of those which may be enclosed within the walls, and to which access will be thereby prevented be entitled to new vaults, at the Exence of this Corporation, so far as they may respectively require the same.”—Trin. Min. (MS.). See, further, N 11.

Mr. Audubon, the ornithologist [sic], has brought to this city the original drawings from which the illustrations of his summptuous work, entitled the Birds of America, were engraved. They have been placed in the spacious and commodious room which contains the cabinet of the Lyceum of Natural History, 56th Broadway, where they are to be publicly exhibited. ...”—Eve. Post, S 39, 1839. See also ibid., O 9, 12, 30, 1839. Some of these drawings were by the N. Y. Hist. Soc.

By previous order, Sixth Ave. was to be opened on this day from 14th to 129th St.—Proc. App'd by Mayor, VII: 52; see also ibid., VII: 175.

A disastrous fire destroys 20 buildings in Water St., three on Burling Slip, 10 on Front St., two on Fulton St., and one on Fletcher St.—Eve. Post, O 7, 1839.

The Harlem R. R. celebrates the completion of a double track from the city hall to the Harlem River. Cars bearing the guests of the railroad went over the entire route, "Nowlan's Hotel, on the Harlem river," being the objective. The toasts are published in the news report. Philip Hone's was "The locomotive—the only good motive for riding a man on a rail."—N. Y. Com. Adv., O 6, 1839; Hone's Diary, I: 381-82.

Some of the original petitions and remonstrances during the building of the road are filed with "Franchises, 1831-1840," in a metal file so labelled in city clerk's record-room.

Philip Hone writes: "I went, by invitation of Mr. Grinnell, this morning, and partook of a collation on board the splendid new ship 'Patrick Henry,' intended for Grinnell and Minturn's line of packet. The ship is 400 tons burthen, and will be the largest ship of her class that will be built."—Hone's Diary, I: 385-86.

"The joint Committee on the rebuilding of Trinity Church [see S 30] ... recommending brown Sand Stone as the Material to be used in the Construction of the new Edifice. ...[this] was approved & adopted."—Trin. Min. (MS.).

Hone describes, in his diary, Gouraud's exhibition of Daguerreotypes, consisting of views of Paris and objects of still life, and the process of their production. He closes with this remarkable prophecy: "It appears to me not less wonderful that light should be made an active operating power in this manner, than that some such effect should be produced by sound; and who knows whether, in this age of invention and discoveries, we may not be called upon to countenance all the new invention of a tree, a horse, or a ship produced by the human voice muttering over a metal plate, prepared in the same or some other manner, the words 'tree,' 'horse,' and 'ship.' How greatly astonished of their ignorance the by-gone generations of mankind ought to be."—Hone's Diary, I: 391-92. See also D 10.

To this month, the New Chatham Theatre (see S 11) was reconstructed and opened as Purdy's National Theatre.—Hawell's Reminiscences, 345; L. M. R. K., III: 983.

Wm. Mitchell leases the Olympic Theatre (see S 13, 1837) and opens it as a low-priced house for amusing entertainments. It was hencforforth called Mitchell's Olympic. "The house became the fashion, and a steady prosperity followed it for ten years."—Hawell's Reminiscences, 345; Brown, Hist. of the N. Y. Stage, I: 261; King's Handbook (1893), 52.

1840

Dec. 10

"In removing the foundation of the tower of Trinity Church..."
THE ICONOGRAPHY OF MANHATTAN ISLAND

1840

which had not begun its construction.—From notes supplied by the
secretary's office. See Ap 1.

In this year, 

In this year, the population of Manhattan Island was 312,710—
13th U. S. Census Bulletin (1910).

From 1836 to 1842, the N. Y. Stock and Exchange Board, occupied
the second floor of one of the Jaunee courts on the site of the present (1894) 41 Wall Street. These buildings were
removed in 1849, and Jaunee Court was constructed upon the
site.

'A Description of New York in 1800,' written in 1840, contains the following:

Mr. Jaunee, an English gentleman who lived in great style,
occupied the building now rented by Messrs. Dykers & Alstone;
his stable was the same building now [1840] used by the Board of
Brokers. The very room in which millions of stock are sold every
week was then a hay loft.'—Eames, The N. T. Stock Exchange, 51.

At this time, "Tattersall's" (a place for the sale of horses and
rigs) stood on the east side of Broadway between Howard and
Grand Sts. For an outline of the history of this property since 1812,
with view, see Man. Com. Coun. (1863), 626, 635. See also the
Horner view of Broadway (1856), Pl. 53.

The Central Log Cabin, at 562 Broadway, the New Jerusalem
Chapel, at 563 Broadway; and the completion of Stuyvesant
Institute (see 1834 S. 1, 1837), at 659 Broadway, all date from this
year.—Ibid, 655-6.

In this year, the present Church of the Ascension was erected,
on the north-west corner of Fifth Ave. and 10th St. For its de
dication, see N. Y., 1841.

Between 1840 and 1842, P. T. Barnum occupied part of
the Vauxhall property, at Fourth Ave. and Astor Pl.—Brown, Hist.
of the N. T. Stage, I: 172-74; L. M. R. K., III: 981; and cf. Je 18,
1852. For earlier references in the Chronology to this property, see
Ja 30, 1845; Ap 20, Je 5 and 25, Ji 4, Ag 8, 1850; Ap 23, My 2,
Jl 4, 1850; Je 6, Jl 4 and 15, Ag 17, 1877; Ji 11, Ag 17 and 20,
1868; Ji 4, 1899; Ji 14, 1899; Ji 4 and 31, 1811; Je 18, 1852. See,
Further, 1855.

For interior views of the Walton house, Pearl St., 1845, see

For view of Broadway, between Howard and Grand Sts., 1840
see ibid. (1861), 452.

In this year, the Harlem Market on Third Ave., west side,
had a street known as 131 St., was erected. In 1843, old buildings
remaining on Harlem Square were sold at auction.—De Voe, 590.

In 1849, Edwin Smith made a survey of the Harlem Market
grounds.—See map No. 200 in real estate bureau of the comptroller's
office. Ten years later, it was demolished.—L. M. R. K., III: 959.

About 1840, there was a "Shakespeare Inn" on 12th St., near
Broadway, about opposite the Hotel St. George of later years.
A narrow passageway led from the street into a large room where
one could get an English chop, a golden hock, or a mug of ale.

In this year, Geo. Palmer Putnam established the publishing
firm of Wiley & Putnam; in 1848, he continued the business
under his own name; in 1866, his sons were associated with him,
and, until his death in 1872, he was head of the firm of G. P.

In 1840, the value of the real estate in New York City was
$185,121,464 and that of the personal estate, $65,719,699-5.
The city debt was $8,978,167, and the average tax rate was 51 cents on
$100.—Man. Com. Coun. (1841-2, 3, 40, 45; (1859), 520-4.

The steamboat "Lexington," in her passage through the Sound
from New York to Providence, is destroyed by fire with almost
everyone on board. More than 100 people lose their lives.—Eve.
Post, 28, 30, 31, 32, 33, 34, 35, 36, 37, 38, 40, 19, 20, 21, 22, 23, 24, 25,
Jan. 24, 25, 26, 27, 28, 29, 30, 31, 1840.

Two galleries of ancient and modern original Italian paintings
and statues, owned by Mr. John Clark, are on exhibition at 281
Broadway, "in the granite buildings opposite Washington Hotel." Among them are said to be "undoubtedly specimens from the pencils
of Salvator Rosa, Domenichino, Guido, Correggio, Poussin, Raphael,
and all the other great masters."—Eve. Post, Ja 13, 1849; N. Y.

The Antarctic continent is discovered by an American explor-
ing expedition under Lieut. Chas. Wilkes. On the next day, it
was sighted by the French expedition under Dumont d'Urville.—

A Daguerreotype exhibition is being conducted by Mr.
Gouraud (see D 19, 1819) at the corner of Broadway and Chambers
St. for the benefit of the charitable institutions of the city.—
Eve. Post, Ja 28, 1840. The next day he announced his intention
of giving a lecture, with "practical demonstrations of the process
of the Daguerreotype," to commence on Feb. 1, at "the place
where he has held his exhibition, viz: the large granite building,
corner of Chambers street and Broadway. He says: "The views of
the City Hall, of the American Museum, and those which will serve
to illustrate the process."—Ibid, Ja 29, 1840. These views are the
earliest of the kind definitely mentioned as made in this city.
See F 21.

"The employment of horses in dragging fire engines would be
a great improvement on the present mode.

The use of horses to drag fire engines is well known in
England, and on the continent of Europe. If the practice were
introduced here, it appears to us that it would much diminish
the danger of fires. Besides, preventing their spread, it would have
the effect of extinguishing them before the thieves and plunderers
who do so much mischief, could have time to collect about them.

"Eve. Post, Ja 29, 1840.

Fire, starting in a ship-chandler on South St. near Dover St.,
caused a damage of $1,000,000.—Costello, Our Firemen, 272.

Queen Victoria marries Prince Albert of Saxe-Cohburg-Gotha.

Haydn's Dict. of Dates, 336.

A new daily print has made its appearance in this city, with the
tide of the Morning Chronicle. Its editor is Mr. William H.
Hudson, one of the original proprietors of the New York Express.

"Eve. Post, F 13, 1840.

The trustees of the several (8) Roman Catholic churches in
the city petition the common council for a share of the common
school fund on the ground that there are "Free Schools" attached
to these churches in which some 3,000 poor children are being educated.—Jour. & Docs. Biol. of Asti. Ayl., XV: 356-57. Similar petitions
were presented by the Scotch Presbyterian Church and by "the Congre-
gations of the Hebrew Persecution" on March 16. These met with
remonstrances from the Public School Society, the "Commissioners
of School Monies," Methodist and other Protestant organizations,
and groups of citizens. The "entire overthrow of our republican
institutions" is prophesied, if such petitions are granted.—Ibid, XV:
366-91. The assistant alderman took adverse action on the
petitions by a vote of 16 to 1, on April 27 (q.v.).

G. W. Foxchard advertises the manufacture and sale of Daguerre-
type apparatus, with the endorsement of Morse, Draper, and others.

"Eve. Post, F 21, 1840. Another maker, J. G. Wolf, an optician,
soon came into the field, and the art was fairly launched in New
York.—Ibid, F 24 and 7, 1840.

A notable masked ball is given by Mrs. Henry Brevnost in the
notable mansion on the north-west corner of Fifth Ave. and 9th
St. (see 1843). This locality was on the northern border of the city,
all the residences of the fashionable people at the time being south
of 36th St.—Lossing, Hist. of N. T. City (1835), II: 438-39; Howe's Diary, II: 10, 11-15. This was not the first masked ball
held in New York, as stated by Lossing.—See the common council's
prohibition against them on Jan. 8 and 15, 1810.

Lossing relates a stirring romantic episode which transpired
after the ball, when Miss Mathilda Barclay and a young South Caro-
linian named Burgwyn, still in the costumes of the ball,
elope, and were married before dawn. "This elopement was a topic
for town talk for a month, and it cast such odium upon masked balls
that no other was attempted by reputable families for many years
afterward."—Ibid. See, further, Ja 21, 1850.

This is the date announced for the opening of "Howard's Hotel,"
the recently erected at the corner of Broadway and Maiden Lane;
the architect is Mr. Hunt.—N. Y. Com. Adv., F 17, 1840. See also
A. Pl. 35-36, Vol. III.

"The ancient mansion of the late Mrs. E. White, No. 11 Broad-

Jan. 19
way, opposite the Bowling Green, was sold at auction one day this week [March 2], by order of her executors, and brought only $15,000. The lot is thirty-nine feet front on Broadway, twenty-seven feet side in the rear, and extends through to Greenwich street nearly two hundred feet. This is the saddest proof of the fall in real estate in this devoted city that has been realized as yet. . . .

—Hone's Diary, II: 15-16. Eve. Post, Mr 2, 1840.

5 The committee on fire and water recommends "that the Fire Department of this city be changed entirely or in part, from a voluntary system to a paid department."—Eve. Post, Mr 5, 1840.

See also ibid, Mr 7, 1840.

Assessment is being levied for regulating 42d St. from Third to Fifth Ave.—Proc. App'd by Mayor, VII: 126.

7 "At noon to-day this fortunate steam-packet [the "Great Western"] made her appearance, after a voyage of sixteen days, having sailed on the 20th of February. None of her competitors have made their trips with equal dispatch and regularity. Owing to an unprecedented delay in the arrival of the regular packets, we have been without accounts from England for forty-one days, which gap has now been filled up, by the arrival of the "Great Western." The most important event noted in the news from England is the marriage of the queen. This ship brought a piece of the queen's wedding-cake to Hone's daughter Margaret, through the courtesy of Mr. St. Gervan. This, however, Hone states, was "nothing to the present . . . received . . . by Miss Rush, daughter of the former Minister from the United States. Here came from the Queen herself,—a piece of the cake, with a letter enclosed in a beautiful satin-work box, on which the letter V is emblazoned in diamonds. This young lady was presented to a collection of youthful daydreams, perhaps her childhood dreams dared not soar to the height of her present greatness, and the 'Sea of Glory' on which she now 'swims' had no place on the map of her imagination."

Hone's Diary, II: 16.

The legislature passes a pension law "to prevent illegal voting in the city of New-York, and to promote the convenience of legal voters." While the law is of an old type, its importance is best illustrated by the opposition it met (see Ap 17, 1822), it was the fullest attempt by statute in the direction of the modern system. It provided for the appointment of commissioners by the governor whose duty it was to divide the city into election districts, and to render a report thereon, with map; the appointment of election inspectors; the election of commissioners of registry; the manner of registering the qualified voters, and ascertaining their qualifications; against voting in more than one district; the publication of registers, and how they are to be revised; the conduct of the elections, the canvass, etc.—Laws of N. Y. (1840), chap. 78. On April 13, a supplementary act was passed relating to the challenging of voters.—Ibid. (1840), chap. 106. The act was extensively amended on May 14.—Ibid. (1840), chap. 361, and p. 338; and ibid. (1843), chap. 60. As extended, the act is in all respects one of the most important measures of the current session, and in part of the act of March 30, 1840.—Ibid. (1842), chaps. 150, 138. A separate act was passed at that time relating to congressional elections.—Ibid. (1842), chaps. 325, 326. Still another election law was passed April 15, 1859 (q. v.).

The N. Y. & Harlem R. R. is 7½ miles long from the city hall to the free bridge over the Harlem River. At this point it is designed to connect the road with the New York & Albany R. R. A double track extends nearly the whole distance. The tracks, depots, fixtures, and motive power has cost $1,100,000; the receipts for the year ending April 1, 1840, are $90,000. The road has carried 1,810,000 passengers.—N. Y. Ann. Register, 1837.

13 In an act "relating to the state arsenal in the city of New-York," the legislature directs the commissary-general "to cause the necessary drawings and estimates for the construction of a fire-proof building on the present site, for the safe-keeping of arms to be made, and report the same, with his opinion, to the next legislature of this state." He is allowed $500 for this purpose.—Laws of N. Y. (1840), chap. 125.

Israel L. Varian, Democrat, is reflected mayor.—Eve. Post, Apr 16, 1840.

Mr. Woodcock, in the large granite building at the corner of Broadway and Chambers street . . . executes portraits with an improved Daguerreotype, in an incredibly short space of time. The face of the subject is required to be exposed to the sun only a minute and three quarters. The glare of the sun's rays is tempered by making them pass through a blue liquid before they fall on the face. . . ."—Eve. Post, Ap 20, 1840.

The Croton water-works.—We are gratified to learn, by the annual report of the commissioners of the Croton water-works, that this great work will be completed for use at the coming year. The cost will be about nine millions, which is three millions less than the estimate of the legislature. Near four millions have been expended, of which one million two hundred thousand were spent in the last half of 1839. There are ninety-seven sections to the aqueduct, of which fifty-four are completed; about twenty-six miles are arched complete. The remains to be finished six and a half miles in Westchester county, and seven and a half with the water-pipe, on the island of New-York. The whole length, from the Croton river to the distributing reservoir at Murray's Hill, (forty-second street,) is forty miles. The crossing at Harlem river by the high bridge will not be completed till 1843."—N. Y. Mirror, XVII: 331.

The legislature passes a law authorizing the city to raise a further sum not exceeding $2,000,000, "by the creation of a public fund or stock, to be called 'The Water Stock of the city of New-York,' the money to be used for supplying the city with pure and wholesome water in accordance with the provisions of the act of May 2, 1834 (q. s.).—Laws of N. Y. (1840), chap. 175.

The common council, through an adverse vote of the assistant aldermen, denies to sectarian school societies a share of the public school funds. This decision followed an exhaustive report on the subject rendered by the board's committee of arts and sciences. "The Constitution acknowledges no distinction among men on account of their religious faith," reads the report; "our institutions are designed, not to create or perpetuate religious distinctions, but to protect all men under a common footing of equality. Religion needs not the support of secular power. Its appeals are to the judgments and hearts of men. Truth is its only weapon, and the only shield it requires is that of broad and equal protection. Religious liberty is necessary to the free development of religious truth. That liberty all sects possess in the fullest degree; and no sect can rightfully procure more. The purity of the church and the justness of the laws of the State are more surely obtained by a distinct and separate existence of the two, than by their union. The opinions of the American people are settled upon this subject, and they will observe with jealous anxiety any approaches to a re-establishment of the explosed doctrine, that it is the duty of the State to protect the religious interests of the People, or propagate, at the public expense, the doctrines of any faith, however true they may be." The report continues: "Religious instruction is no part of a common school education. The Church and the fireside are the proper seminaries, and the parents and pastors are the proper teachers of religion. In their hands the cause of religion is safe. Let the public schoolmaster confine his attention to the moral and intellectual education of the young committed to his charge, and he fully performs the duties of his profession, ditto and high-minded, in him as a public agent, and fulfills his obligations as a citizen."—Jour. & Decis., Board of Amt. Ald., XV: 401 and Doc. No. 80.

The will of Robert Lenox, which bears this date, contains the following provision: "I give, devise and bequeath to my son, James Lenox, my farm at the five-mile stone, purchased in part from the Corporation of the City of New York, containing about thirty acres, with all its improvements, stock of horses, cattle and farming utensils, for and during the term of his life and after his death to his heirs forever. My motive for so leaving this property is a firm persuasion that it may at no distant day be the site of a village, and as it costs me much more than its present worth, from circumstances known to my family I believe and cherish the belief that it may be realized to them, at all events I want the experiment made by keeping the property from being sold."—N. Y. Eve. Post, F 21, 1845. The Presbyterian Hospital and the Lenox Library, between Fifth and Park Aves, 70th and 71st Sts., were afterwards built on parts of this property by gift from James Lenox. See also Fifth Avenue (pub. by the Fifth Ave. Bank, 1913).

The Nunnery St. Society of the Mechanics' Library (see Ap 30, 1796, 1795) having been sold in 1836, and the library, in conjunction with the N. Y. Athenaeum, having purchased land and built a building for both, at the south-east corner of Broadway and Leonard St. (see S 19, 1838, for corner-stone), the library moves from the rooms of the Mechanics Society at No. 12 Chambers St., where it has been since 1836, to its new building on Broadway (the
THE ICONOGRAPHY OF MANHATTAN ISLAND

1840 present site of the N. Y. Life Ins. Co. building. — Keep, Hist. of Apr. the N. T. Society Lib., 361, 378-400, 421; Man. Com. Conn. (1855), 307-81; Ibid. (1865), 319. The architect of the new building was Fred'k Diaper. There is a lithographic view of it, drawn by G. Moore, in the Ecol collection, in the N. Y. P. L. It is reproduced in Keep's Hist., op. cit. The library remained here until 1852 (q. v., D 18) when the building was sold. See, further, Ap, and My, 1853; Ap 28, 1856; F 12, 1857. Regarding the developments in this part of Broadway, see Man. Com. Conn. (1855), 592.

May

This month, postage-stamps were introduced in England. — Enc. Brit., XVII: 181. Seven years later (see Mr 3, 1847), postage-stamps were first used in the U. S.

By previous order, Manhattan Square was to be opened on this day. — Proc., App'd by Mayor, VIII: 34; VIII: 75, 76, 106.

The legislature empowers the N. Y. & Harlem R. R. Co. to extend its line through Westchester Co. from the Harlem River to an intersection, at a point agreed upon, with the N. Y. & Albany R. Co.'s line of road. It also gives it the right to run a branch eastward to the Connecticut border, "with the view of intersecting a line or lines of railroad from said state of Connecticut, as well as from the state of Massachussets." The N. Y. & Harlem R. R. is required first, however, to "construct the road to the north line of Westchester county... And for that purpose, the said company is authorized to construct a bridge across the roads, and the Harlem river, in order to connect the New-York and Harlem railroad, as now constructed, with the road authorized by this act, in such manner that the same shall have a draw not less than forty feet in width... and shall not have more than three piers and two abutments in said river, and shall not in any way impair the navigation thereof; and it shall be within the power of the legislature of this state to incorporate any other companies for the making of any rail-roads eastwardly, through the county of Westchester, to the line of the state of Connecticut, notwithstanding the passage of this act."

The general powers of the Harlem line are here defined in this act, and the company is authorized to increase its capital stock $1,000,000, as the board of directors may prescribe. The time allowed for the completion of the branch to Manhattanville is extended two years from this date. — Laws of N. Y.: (1840), chap. 242.

This act conferred on the N. Y. & Harlem R. R. Co. all the powers and privileges of the N. Y. & Albany R. Co. which had been recently purchased (see 1840). It gave the right to issue $1,000,000 additional capital. Jacob Little & Co. subscribed $500,000; Dykers, Alstyne & Co., $250,000, and David Banks intended to subscribe himself and others $250,000. On the election of new directors, however, on May 25, differences and other attendant circumstances arose which plunged the company into a series of financial difficulties. — From notes supplied by the company. See Ag 5.

The legislature passes an act to incorporate the Apollo Association, for "the promotion of the fine arts within the United States." John H. Francis is the first named of the incorporators, under ch. 1 of N. T. (1840), chap. 237. In 1844 (q. v., J 293), its name was changed to the American Art Union. For fuller account of its work, see the latter date. This act of incorporation was amended by another of Nov. 26, 1847. — Ibid. (1847), chap. 402. For the origin of the Apollo Asa, see Howe's Hist. of the Metropolitan Museum of Art (1913), 57-58.

The common council appoints a committee to welcome "Ahmet Bendenman," the representative of the Imam of Muskat, and who is the commander of the Arabian ship "Sultana," the arrival of which is recognized as the first step towards the establishment of commercial intercourse with Muskat. — Proc., App'd by Mayor, VII: 169; VIII: 3. See also Enc. Past, My 14, 1840. On Sept. 23, 1840, the board appropriated $500 to pay for a portrait of "Ahmet Ben Ahman," painted by Edward Mearny. — Ibid., VIII: 53.

The city conveys to the Anglo-American Free Church of St. George the Martyr 24 lots on Fifth Ave., from 45th to 55th St., West Side, running 300 ft. deep, for $1, and the further consideration of receiving from the corporation of Trinity Church a good and perfect title to the block bounded by Washington, West, Duane, and Reade Sts., to which that church made claim. On Nov. 20, 1851, the corporation adopted a resolution permitting this ground to be transferred to St. Luke's Hospital, on condition that they comply with the covenants in the original lease. — Man. Com. Conn. (1870), 762.

The legislature authorizes the common council to fund and pay the old floating debt of the city by a tax. — Laws of N. Y.: (1840), May chap. 327.

The common council orders that the houses in Lafayette Place be numbered. — Proc., App'd by Mayor, VII: 177.

"A déjeuner à la faroche is something of a novelty in this country, and the last imitation of European refinement. This series of breakfasts given by Mr. William Douglass, at his fine mansion, corner of Park place and Church street, can hardly be called an imitation; for in taste, elegance, and good management it goes beyond most things of the kind in Europe, and seems to be placed as a bright object in the overwhelming flood of vulgarity which is sweeping over our land. The first of these breakfasts was given last Thursday, and they are to be repeated weekly until further notice." — Home's Diary, II: 27.

Fanny Ellider, the dancer, makes her first appearance in America, at the Park Theatre. — Brown, I: 55. "Her reception was the warmest and most enthusiastic I ever saw." — Home's Diary, II: 28. She finished her engagement there on June 11, "having danced fifteen nights, and brought to the house something like $14,000, at the ordinary prices, of which sum she puts $9,000 or $10,000 in her own pockets. ..." — Ibid., III: 31.

The owners of old buildings in the lower part of the city, taking advantage of the low price of rents, are tearing down the old structures and putting up structures of more substantial and elegant kinds. — Enc. Past, My 15, 1840.

The common council directs the street com'Y "to cause New street to be numbered and proper signs or guide boards to be put up at the corners of said street." — Proc., App'd by Mayor, VIII: 4.

The editor of the Mirror derides the so-called "improvements" now going on of the prostration of the pretty places, between St. Peter's Church and Harlem, the "dismal spaces" which distinguish the whole scene, and the carting off of the green knolls into the marshes of Kipp's Bay, are undoubtedly a very distinct "improvement." — Let observers, he continues, "traverse the Sound side of the island, from Fifteenth-street to Cate's. Let them look at the straits to which rurality is driven, by the meagering march of the aforesaid improvement. It is pulled up near the street and thrown into the barn for the landscape, ... and the 'cottage of a hundred years' is demolished that a groggy may minister whiskey to the operaas on the public works. Lovely hills are dug down, and green villas are undermined, merely that the mounds of unseemly builders may be piled up in their places! Instead of the beauty-spots which once decorated the road from Harlem-brige, the traveller has nothing but the rugged vestiges of vandalism, that has blown into fragments the picturesque, in order to elevate the unsightliness of a subterranean quarrying after gray and blue sand-stone!" — N. T. Mirror, XVII: 38.

Livingston's sugar-house, on the south side of Liberty St., east of the Middle Dutch Church, which was built in 1754 (q. v.), and used by the British as a prison in the Revolution (see 1777), is being pulled down for a sub-streasury, and is very strongly built. Many of the stones show prisoners' initials. — Enc. Past, Je 3; Com. Adv, Je 4, 1840. See L. M. K., III: 965.

The Graham House, in Barclay St., kept by a Mr. Goss, where "Mr. Greely, of the New Yorker " lodges, where Gov. Seward is a guest, is described as a vegetarian boarding-house. "Graham bread" is also a feature of the menu. — N. T. Com. Adv., Je 12, 1840. Cf. p. 6, 1845.

The editor of the Mirror writes of New York as "The city of modern ruins." He says in part: "No sooner is a fine building erected than it is torn down to be put up a better. ... We have our misgivings as to the permanency of the Merchants' Exchange now going up in Wall-street. It is very much to be feared that it will be torn down and "improved" before it can be fairly finished; so restless are the tastes and habits of the city. The new Custom House [the present sub-treasury] is safe for a brief space, at least, for it is nearly the only building within our knowledge that would give much trouble in the demolition. This edifice is built for durability, and will stand a thousand years, if the improvers can be kept from it. ... Oh, for the day when some portion of New-York may be considered finished for a few years." — N. T. Mirror, XVII: 467.

I have, in common with a great many of my fellow-citizens, noticed the valuable improvements going on in West-street. It is well known that Washington-street was formerly the location for the most important foreign commerce; but in consequence of the

The New York and Albany Railroad—A steamboat and railroad mail service from New York to Albany was introduced in 1841.
1840
Aug.
6 says: "Then we had our landmarks by which situations were de-

1832, Washington the two, and many other places of equal note... when I returned, some few years gone, I was prepared to find an altered city. I knew that the Stone Bridge was made a splendid thoroughfare, Vauxhall Garden cut in two, Stuyvesant Pond filled up, and Richmond Hill cut down." Speaking of the change in the names which he knew formerly, he says: "Stuyvesant Pond we had Stuyvesant Place; Richmond Hill was changed to Richmond Hill Garden, etc. . . . This year I visited new places, . . . I forsook Vauxhall, and located at Cast Garden; I cut Cato’s and rode out to Burnham’s; I forget the Village in admiring Chelsea; Poodles Hook I deserted, and sailed to Port Richmond; and my Long Island wall was changed from the Wallabout to Colonnade Garden." On hearing that certain artists were to sing at the Tivoli Garden, he inquired the way and was told that the Greenwich stages would take him there. "I jumped on a stage," he reports, "and we stopped at Richmond-

8. The common council consents, as required by the act of April
18, 1826, incorporating the Harlem River Canal Co., to the con-
struction of a canal from Harlem Basin, across the island, to the
North river, at or near the line of 222d St., under certain restric-
tions and conditions. — Proc., App’d by Mayor, VIII: 44-45.

17. The steamship "President," of the British and American Steam Navigation Co., arrives at New York from Liverpool after her first trip across the Atlantic. — Eco. Post, Ag 10 and 18, 1840. The ship is described in ibid., Ag 25, 1840. See Mr 11, 1841.

9. Charles Green, the aeronaut, projects a trans-Atlantic trip. He says: "We are busily employed on the Balloon and find it in as good condition as I expected, in short even better, as it regards the varnishing, and I think we shall have it in such condition by the end of the week that I shd like a voyage with it from here to St Petersburg, as I am sure I could accomplish it from its capability of retaining the gas during a much longer voyage, & were it not for its great increase of weight caused by the bad varnishing of it, I would immediately leave England for New York with it. . . ."

12. The Standard, conducted by John L. Mumford, makes its first appearance this morning among our daily papers. — Eco. Post, S 1, 1840.

3. The Tabernacle Congregational Church is organized in "The Tabernacle" on Broadway, which was erected in 1835 by Presby-

14. The new custom-house is nearly finished. "It is two hundred feet six inches wide, and sixty feet long, with two porticoes of eight columns each, fronting on Wall and Pine streets, constructed after the Grecian Doric style of architecture. . . ."

14. There are three stories above the basement, the floors of which are formed by vaultings of groined arches, and the ceilings of which are finished in a chaste style of panel work. On the side towards Pine street, there are eight rooms of similar dimensions. In the second story are four galleries, running around the great central room. Two stairways, right and left, rise above midway of the interior, ascending from the basement to the attic. Besides these, there are two spiral stairways running from the rotunda to the attic. . . ."

14. The floors and roof of this building are entirely of marble, and there is not a particle of wood in any part of it. . . ."

14. The Methodist Church in John St. (erected in 1818, q. v., j3 4) is being demolished. — Eco. Post, S 24, 1840, citing Express; Green-

leaf, 284; L. M. R. K., III, 930 (under "Wesley Chapel"). It was immediately rebuilt.—See Ap 27, 1841.

12. The walls of the new Trinity Church have risen several feet, "a steam-engine, of sufficient power, being placed upon the grounds to aid in the operation of hewing the stones to their places." The dark-red sandstone used is "from the quarry in New-Jersey selected by Thom, the celebrated sculptor, for his statue of Old Mortality and the colossal statue of Washington. . . . and, what will ensure an execution of the ornamental portions of the structure, equal to the beauty and chasteness of the design, is the fact that Mr Thom himself is employed upon it. . . ." — N. Y. Mirror, XVII, 111.

12. The up-town branch of the congregation of the old South Church (see 1837) dedicates its new house of worship at the south-east corner of Washington Place and Wooster St. (University Place), fronting Washington Square, after worshiping temporarily in the chapel of N. Y. University. The building is 62 ft. wide and 80 ft. long, and is built of dark coloured granite, rather roughly hewn. The cost of the ground was $44,000; of the building, $80,000. — Ruggles, Picture of N. Y. in 1846 (with view of the church), 132-33; L. M. R. K., III, 936; descript. of Pl. 139, III: 708; Greenwich, 26-21; Corwin’s Manual, 1003; Tow, The Great Metropolis (1831), 66; Perris Insurance Map (1834), Vol. VI, Pl. 61.

12. Trinity reverts orders "that the Steeple of St Paul’s Church be
 brought down to 3000 feet, and that the Committee of Supplies and repairs be further directed to cause the Steeple to be sanded, unless on further Inquiry they shall find that the Sanding will not be sufficiently durable." — Trin. Min. (M.S.).

12. The New National Theatre, erected at the corner of Leonard and Church Sts., on the site of the one destroyed by fire on Sept. 23, 1839 (q. v.), is opened. — Eco. Post, O 10, 1840. See My 29, 1841.

12. Beautifully furnished, the old Trinity Church is copied from the one which adorned the Mirror some years ago [jl 14, 1827, q. v.], has been published by J. A. Brook, No. 72 Carmine-Street.— N. Y. Mirror, O 17, 1840. For reproduction and description of this view, see this, Vol. III, Cf. jf 25.

12. The political campaign of William Henry Harrison (called "Tippecanoe"), for president, and John Tyler for vice-president, occurs. It is known as the "Tip and Tyler" campaign, and was the first by modern methods. — Winor, VII, 289.

12. Wm. H. Harrison and John Tyler, Whig candidates, are elected president and vice-president. The Democrats nominated Martin Van Buren for president, but made no choice for vice-president.—McKee, National Conventions and Platforms, 40-46.

12. A meeting of citizens held at the city hall passes favourably
upon the subject of the immediate construction of the N. Y. and Albany R. R. (incorporated Ap 17, 1832, q. v.)—See pamphlet entitled Sketch of the remarks made by the president of the company, at a meeting of citizens held at the City Hall, November 10, 1840; together with a copy of the resolutions passed at that meeting, and other information of interest on the subject of railroads generally (N. Y., n., d.), a copy of which is in the N. Y. H. S. See JL 20, 1842.

12. The Society Library (see Ap 30) has been reopened, in its

12. Construction is begun on the first steam-fire-engine built in the United States. Completed on April 25, 1841, it was designed and built by Paul Rapsey Hodge, C. E., in this city, and, being a self-propelled engine, it was the first of its kind ever constructed. It was arranged to be drawn by horses or by hand, as well as propelled by its own steam-power.—Costello, Our Firemen, 199. The first attempt to make a "fire-engine" in New York was in 1737 (q. v., My 3). See D 15, 1841.

12. The Case of the Heirs of Anneke Jane Bogardus.—This case, which was carried by appeal from the decision of the Chancellor to the Court of Errors, was decided in that court on Thursday last [Dec. 24], against the applicants. The decree of the Chancellor was affirmed unanimously. The title of the case was Humbert and others, vs. Trinity Church, and involved property to the amount of many millions.—Eco. Post, D 31, 1840, citing Jour. of Com. The same is a typographical error for those, for Anneke Jane Bogardus. For the state chancellor’s decision, see Aug. 9, 1832.

31. During the year 1840, 60,699 passengers arrived at the port of N. Y.—Arrivals of Alien Passenger and Immigrants (1891), p. 64.
1841

In this year, the first Manual of the Common Council, bearing date of 1841-2, was published, having been copyrighted "by Samuel J. Willis, in behalf of the Corporation of the City of New York." Its table of contents shows 26 items of information respecting the affairs of the city, including its financial condition, a list of the members of the council, and the value of public property as assessed each year from 1836 to 1840 inclusive, the names of members of the city council from 1655 to 1841, the population of the city at various periods, and the census for 1840 (giving the population for that year as 312,852); also a map of the city showing the fire and watch districts. S. J. Willis in 1841 was clerk of the common council, and David T. Valentine was his assistant.

The first volume is a 240 page, bound in black muslin, 4½ inches tall and 7½ inches wide. Its sole illustration is the folding map above mentioned. It is now exceedingly scarce, and has sold at auction at prices varying from $4.75 (in 1907) to $175 (in 1916). —See Auction Prices of Books (1905) and Am. Book Prices Current (1912), both edited by Livingston. For a brief account of the compiler and editor of the series, David T. Valentine, whose name first appears on the title-page of the Manual of 1842-43, and who conducted it for 25 years, see the "Introduction" to An Index to the Illustrations in the Manuals (1906).

Valentine's Manuals were the successors of a series of pamphlets entitled Names and Places of Abode of the Members of the Common Council, and of the Officers who Hold Appointments under them, already mentioned.

For the purposes of this Chronology, at the beginning of each year in which the Manual was published is given a summary of the principal historical articles appearing in that year's issue, and a first appears on the title-page of the Manual of 1842-43, and who list of the principal Manual views which depict the city in that year. The Index to the Illustrations in the Manuals, pub'd by the Soc'y of Iconophiles in 1906, does not assemble the views under the dates depicted but under the dates of publication.

"David T. Valentine edited the volumes for 1841-2 to 1866, inclusive; those of 1868 and 1869 were issued under the supervision of J. Shannon, and that of 1870 by John Hardy. No manual was published for the calendar year 1846, when the change was made from an issue for the fiscal year to one for the calendar year; none was published for 1867. These annuals, once a drug in the market and subject to mutilation for their illustrations, are now sought for with avidity by libraries and collectors at an enhanced price. Each volume contains a record of the year's administration of the city. This once despised material has become the soundest evidence for the historian and economist. The supplementary materials, consisting of the complete history of the city, as translations from records, and data from early newspapers, together with facsimiles, portraits, views, maps, etc., are less sound for historical uses. They should be used with great caution, because the texts are often inaccurate, whilst deductions are unsound. The danger lies in the uncritical use of this mass of unsystematic material. Valuable as this supplementary matter is when consulted for suggestions and when used with judgement, it remains true that the hitherto careless use has done much to discredit the written history of Manhattan Island during the Dutch and English periods. Valentine had the cooperation of others, and contributions were signed by Henry B. Dawson, R. C. Horton, John Gilmary Shea, etc.; the numerous extracts from early newspapers were furnished mainly by the late William Kelby.

"Lists of the illustrations in the Manuals are given in the volumes of 1875 and 1876; also in Pasko's Old New York, Vol. I, pp. 24-37, 105-116, 165-176; and more particularly in An Index to the Illustrations (N. Y., pub. by the Society of Iconophiles, 1906). The illustrations often vary as to location, due to the carelessness of the New York; the value of the real and personal property, in "An index to the historical articles in the set, see the Historical Index to the Manuals of the Corporation of the City of New York (Valentine's Manuals)," with introduction by Otto Hufeland, published in 1900 (q.c.); and, for a collation of each volume, see Bulletin of New York Public Library, Vol. V (1901), pp. 9-12. —From bibliographical notes prepared for the Iconophiles by W. Parke, Esq.

"In this year, John James Audubon, the naturalist, soon after completing his Birds of America, bought the land which is now em-braced in "Audubon Park." For an account of the development of this property, where he built his residence, see the 18th Ann. Rep. of the Am. Soc. & Hist. Proc. Soc. (1913), 460-61. "Audubon Park to-day is but the name of a section of the City. It is not a park, the property all being privately owned." —Ibid., 463. The old house, however, still stands, on a triangular plot on the line of 165th St., near the Hudson River. "The Princeton" was built as a screw-propeller. Her constructor was John Ericsson. She was the first ship whose propelling mechanism was wholly below the water-line and therefore safe from shot. —Church, Life of John Ericsson, I: 117 et seq. and see Jb 18, 1844. For the invention and introduction of the screw-propeller, see 1856 and 1857.

In this year, John W. Griffiths, a naval architect of New York, exhibited at the American Institute in a model ship of the type called "clipper." Two years later, the "Rainbow" was built for William H. Aspinwall from Griffiths' designs. On her first voyage to Canton, this ship broke the record each way. —Sears, American Merchant Marine, 227.

In this year, the work of a medical college, established by New York University, was begun at the Stuyvesant Institute, 669 Broadway, later the site of the Broadway Central Hotel. The most noted men of the faculty were Dr. Valentine Mott, the foremost surgeon of the day, and Dr. John W. Draper, professor of chemistry. During the first year, there were 239 students, from 27 states and foreign countries, and by 1850 more than 400 students. —N. Y. University Bulletin, Jb 30, 1911. See 1851.

In 1840, the First Baptist Church required better accommodation for the congregation. "The old meeting-house in Gold street was accordingly taken down, the ground sold, and a new and elegant building of stone was erected on Broome street, corner of Elizabeth street, measuring 100 feet by 75, which was opened for public worship in the spring of 1841." —Greenleaf, 239. For view and fuller description, see the Picture of N. Y. in 1846, 127-28. See, further, 1868; S, 3, 1871.

"When the Church of St. John the Evangelist was founded, in 1841, the old [Jesuit] college buildings [at Fifth Ave. and 50th St.] were used as a rectory. These buildings were later removed to where now [1908] stands the Villard Block on Madison Avenue, opposite the Archbishop's residence, to make way for the construction of the present Cathedral." —Farley, Hist. of St. Patrick's Cathedral (1908), 117.

"The church of St. John the Evangelist, the pastoral residence, and the parochial school, stood for many years on the portion of the property lying to the east of Madison Avenue. The church was destroyed by fire while the Cathedral was in course of erection, but was immediately rebuilt, and until the Cathedral was occupied was the constant use. The church, though of no great material value, was among the most important of the Roman Catholic Churches in the city. The buildings have been removed [1852], and all the property lying to the east of Madison Avenue was sold, with the condition that no other than first-class private dwellings should be erected on Madison Avenue, and for a distance of 200 feet on the street." —Ibid., 114, citing N. Y. Jour. of Comm., Jb 18, 1882. Regarding St. Patrick's Cathedral, see 1858.
